Please make sure you consult the Liberal Studies Requirements, Major Requirements, and College Core Requirements for full degree requirements.

NOTE: Secondary Education students now have the option to double major in Secondary Education and Environmental Science. With the double major, students will graduate with a Bachelor of Science degree with a major in Secondary Education and a major in Environmental Science. Students should declare Secondary Education as their primary major (see Secondary Education BA/BS for degree requirements) and Environmental Science (see Environmental Science BS for degree requirements) as their secondary major. If you have already begun the Secondary Education Environmental Science major and want to switch to the Secondary Education Major and Environmental Science double major, you should contact your academic advisor because the double major may require additional coursework. Students who pursue the Bachelor of Science degree with a major in Secondary Education Environmental Science do not have the option to double major in Environmental Science.

Licensure

Illinois Professional Educator License with endorsement in Secondary Education Science-Environmental Science (grades 6-12), an Illinois State Board of Education (ISBE) approved program.

Learning Outcomes

Students will be able to:

- articulate and communicate orally and in writing, as well as demonstrate in practice, a personal philosophy of teaching grounded in adolescent development and learning theories, global perspectives, pedagogical content knowledge research, and DePaul’s Vincentian Mission and the COE’s Conceptual Framework.
- define, create, and evaluate a safe, healthy, creative, and rigorous learning environment that facilitates cultural and linguistic responsiveness, emotional well-being, self-efficacy, positive social interaction and collaboration, and mutual respect and empathy, and encourages active engagement, academic risk-taking, divergent and creative thinking, self-motivation, and personal and whole-class goal-setting.
- identify, justify, implement, and evaluate differentiated instructional strategies that support rigorous critical, creative, and exploratory thinking and metacognitive awareness, and problem-solving, collaboration, and academic, social, and emotional development of all students.
- articulate, analyze, and theorize an understanding of adolescent development within historical scholarly traditions that recognizes the complex roles that linguistic (including English learning and nonmainstream English dialects), social, economic, cultural, academic, spiritual, and personal experiences both inside and outside of school have on classroom instruction and adolescent development and learning.
- plan, design, implement, and evaluate curricula and instructional practices based on disciplinary content knowledge, pedagogical content knowledge, multiple literacies, diverse student characteristics such as language, learning, and socio-emotional and behavioral differences, diverse types of student performance data, curriculum goals, and the community context.
- articulate and demonstrate in practice a foundational knowledge of reading, writing, speaking, listening, and cognitive development theories and related pedagogies that are grounded in sociocultural theories of literacy and reflect an understanding of multiple literacy theory and practice.
- articulate and demonstrate disciplinary content knowledge expertise and the historical, social, economic, and political roles and implications of that disciplinary content on human development and societies.
- plan, design, implement, and evaluate formative and short- and long-term summative assessments for promoting student learning and self-assessment, identifying student needs, monitoring student progress, measuring student growth, and evaluating curriculum and student outcomes using diverse types of data.
- identify, articulate, plan, and implement a theory of collaborative practice with students, parents/guardians,
school partners, and community stakeholders that recognizes student’s social, emotional, spiritual, and academic development and promotes human and environmental empathy, social justice, and democratic practices.

- articulate and demonstrate professional educator dispositions that are grounded in ethical and Vincentian tenets of human relations and that exhibit professionalism, with an emphasis on leadership, collaboration, and advocacy for students and their communities.

**College Core Requirements**

**Dispositions**

The academic programs within the College of Education have set forth these dispositions as educational and professional expectations for all students. Students should be aware that failing to abide by DePaul University or College of Education policies including, under certain circumstances, these dispositions, could result in adverse consequences for the student, including removal from his or her program, the College of Education, or the University.

The following dispositions apply to Early Childhood Education, Elementary Education, Physical Education, Secondary Education, and World Language Education majors only:

- Reflects on progress and identifies strengths and weaknesses, including evaluating strategies for success, finding alternatives for inappropriate strategies, and modifying future practices
- Is receptive to faculty feedback and acts meaningfully and professionally upon suggestions
- Values critical thinking, including engaging theoretical and philosophical frameworks and shows evidence of critical thinking through discussion and writing (e.g., journals, response to prompts)
- Understands the importance of and is committed to communicating clearly orally and in writing both in traditional and in new and emerging digital formats
- Values and is committed to continually developing strong content area knowledge and/or knowledge of the professional field, including pedagogical content knowledge
- Takes initiative, uses imagination and creativity, and seeks out information using a variety of human and material resources and technology to inform his or her teaching
- Is aware of the role of classroom environment and uses management procedures that reflect respect and care for learners and concern for their emotional and physical well being
- Takes the time and effort needed to understand how students learn, including discovering their interests and experiences and determining how to shape teaching acts (using technology as appropriate) that engage learners meaningfully and actively
- Values and is committed to using assessment to evaluate and ensure the continuous intellectual, social, emotional, and physical development of the learner
- Respects and considers cultural contexts in order to determine how to be responsive to learners and to proactively promote all students' learning
- Takes initiative
- Values and is responsive to diverse learners’ academic, emotional, and social needs through teaching acts (including careful instructional planning, implementation, and differentiation) and through everyday interactions with students
- Is committed to collaboration with colleagues, families, and communities in order to promote all students' learning and development
- Recognizes and fulfills professional responsibilities and habits of conduct (e.g., dress, language, preparedness, attendance, punctuality, etc.)
- Demonstrates collegiality, honesty, good judgment, courtesy, respect, and diplomacy
- Balances self-confidence and assertiveness with respect for others’ perspectives
- Respects the requirements, expectations, and procedures of both the College of Education and of our field partners and appreciates the issues of trust, fairness, and professionalism involved

The following dispositions apply to Special Education majors only:

- Is receptive to faculty feedback and acts meaningfully and professionally upon suggestions
- Reflects on his or her own progress, identifies strengths and weaknesses, and evaluates strategies for success and professional growth
- Takes initiative
- Is open to new ideas and engagement in learning
- Respects diversity and cultural contexts to determine how to be responsive to learners and to proactively promote all students’ learning
- Expresses positive attitudes toward individuals with disabilities and a willingness to advocate on their behalf
- Is committed to collaboration with colleagues, families, and communities in order to promote all students' learning and development
- Demonstrates professional ethical and legal behavior as defined by the respective codes of ethics and laws
- Demonstrates consistent professional behavior across all academic settings
- Maintains appropriate interpersonal and professional boundaries
- Accepts personal responsibility for one's behavior
- Expresses feelings and opinions effectively and appropriately
- Upholds confidentiality

**Skill Building Courses**

Before taking any math or English courses, students must take the DePaul placement tests to determine if skill level is at the college level. If placement indicates skill level in these courses, the courses become part of degree requirements. Consult with your advisor regarding placement test results and any required classes.

**Advanced Standing**

Students are conditionally admitted to the College of Education. There are additional requirements to reach Advanced Standing in your program in the College of Education. Requirements must be met to progress in the major and take courses in the Advanced Standing category.

Advanced Standing requirements are:

- Maintain a DePaul undergraduate 2.5 GPA
- Pass the Illinois Test of Academic Proficiency (TAP)
- Submit a petition for advanced standing form

Students should attempt to complete the Advanced Standing requirements soon after beginning the program. There is no time limit to meet these criteria; however, students will only be able to take pre-education courses until requirements have been met. Students can also take liberal studies or content area courses before or after meeting Advanced Standing requirements.

**Modern Language Competence Requirement**

Students pursuing a Bachelor of Arts degree in the College of Education will be required to demonstrate a measure of competence in a modern language, as defined by the college. Such competence may be demonstrated in one of several ways:

- completing two years of a language sequence in high school
- completing the last course in the first-year college sequence of any language
- completing a college course beyond the first-year level in any language
- achieving a satisfactory score on any of the Modern Language placement examinations administered at DePaul
- achieving a satisfactory rating in a proficiency examination accepted by DePaul
- achieving a score of 3 or higher on the Advance Placement (AP) test for any language
- achieving a score of 5 or higher in the Language B assessment from a Standard or Higher Level International Baccalaureate (IB) program
- achieving a satisfactory score on the CLEP examination

Please note: The Modern Language Competence Requirement is not required for students in the Early Childhood Education: SNL Joint Program (BAECE) program.

For further information regarding satisfactory scores and possible credit from the DePaul placement, AP, CLEP, or IB examinations, please contact the Office of the University Registrar.

Students who complete an Inter-College Transfer (ICT) to the College of Education will abide by the COE Modern Language Requirement in place on the effective date of the ICT.

B.A. students who meet College requirements and wish to pursue further work in the language may elect the “Modern Language Option” of the Liberal Studies Program. While B.S. students are not required to demonstrate competency in a modern language, the “Modern Language Option” is available to them for language study at any level.

**Licensure Tests**

All individuals licensed by the Illinois State Board of Education (ISBE) are required to complete licensure tests specific to their teaching license.

**Field Experiences**
Each student seeking licensure from the College of Education/Professional Education Unit must complete supervised field experiences in appropriate settings in conjunction with education courses. The field experiences must include a variety of grade levels, multicultural experiences, and a minimum of 10 hours in special education settings. All field experiences must be completed prior to final approval for student teaching. Field experience hours should be entered by the student into the FEDS system when completing courses with field experience requirements.

**Endorsements**

An endorsement is a statement appearing on a license that identifies the specific subjects or grade level that the license holder is authorized to teach.

The Illinois State Board of Education (ISBE) issues endorsements in various subject areas. To view the full list and requirements, visit the ISBE website.

Please note that the Illinois State Board of Education (ISBE) may change the state licensure and endorsement requirements at any time and without prior notice. Individuals are bound by the requirements in place when applying for the license or endorsement, not the requirements in place when beginning the program.

**Student Teaching Requirements**

Student Teaching is the culminating clinical experience in the student's program. All students in teacher preparation programs must meet the following requirements before applying for student teaching:

**Academic Requirements:**

- Completion of all Liberal Studies, Pre-Education, Advanced Standing and concentration/content area courses
- Overall cumulative G.P.A. of 2.50 or better
- Cumulative GPA. of 2.75 or better in all education courses
- Meet all other program requirements (e.g., modern language and residency requirements)
- Meet designated program standards
- Pass the required Illinois licensure content area test

**Clinical Requirements:**

- Completion of all required field experiences
- Three satisfactory evaluations in field experiences
- Three satisfactory faculty recommendations
- Attendance at mandatory meeting for student teaching
- Application for student teaching, resume, transcripts, and writing sample (check deadlines)
- Review and approval by Student Teaching Committee of the College of Education

**Student Teaching Timeline and Deadlines:**

- Attend a Mandatory Meeting approximately 1 year prior to expected quarter of student teaching.
- Submit application for student teaching after attending Mandatory Meeting, approximately 1 year prior to student teaching.
- Academic requirements are due one quarter before expected quarter of student teaching.
- Clinical requirements are completed as course requirements. Field experience hours are entered by the student as coursework is completed.

Online Faculty Evaluations are entered by the instructor of relevant courses. All data must be entered in the Field Experience Documentation System (FEDS) due one month prior to student teaching.

Individual child care agencies and public and private school districts may have additional requirements (application, training, background check, etc.).

**Degree Conferral and Graduation**

The awarding of a degree is not automatic. You must submit an application to be considered for the degree. DePaul awards and posts degrees at the end of each regular academic term (autumn, winter, spring, summer).

It is your responsibility to initiate the degree conferral application process by submitting an online application. Submitting an application means you intend to finish your degree requirements by the end of the term for which you have applied.

Undergraduate students must be approved for student teaching and complete student teaching and capstone to be cleared for the degree. Student must submit graduation application for the quarter that matches the quarter...
you are student teaching.

After you submit the application, you cannot register for any term after the one selected in the application.

To apply for degree conferral, log on to Campus Connection. Select STUDENT CENTER, then MY ACADEMICS. On screen instructions will take you through the application process.

Provided that all requirements and financial obligations are met, degrees are posted 30 days after the official end of the term. Official dates are listed on the Academic Calendar.

DePaul holds one commencement ceremony each year in June. If you intend to participate, you must first apply for degree conferral for the current academic year and then submit a cap and gown order. Honors are not announced at the ceremony for undergraduates completing their final courses in spring quarter because a final GPA is not available at the time of the ceremony.

Additional information about degree conferral and graduation can be found on the College of Education website at: http://education.depaul.edu/.

**Licensure**

Requirements for licensure include completion of full bachelor's degree program, all licensure tests (including OPI for world language majors), and awarding of bachelor's degree. A bachelor's degree is required to qualify for licensure and must be awarded before applying for the license.

Individuals must submit an application directly to the Illinois State Board of Education after completion of requirements and after DePaul has submitted notification to ISBE. Application requirements include application form, application fee, official transcripts, and registration fee.

All individuals must meet ISBE requirements in place at the time of application for the license. Requirements are subject to change per the discretion of ISBE. All coursework and requirements pertaining to licensure requirements must be completed before DePaul University can recommend an individual for the license.

Individuals seeking additional endorsements after applying for the licensure must contact ISBE directly for an evaluation request.

All coursework and requirements must be completed before DePaul University can recommend an individual for the license.

**Liberal Studies Requirements**

Honors program requirements can be found in the individual Colleges & Schools section of the University Catalog. Select Academics, followed by Undergraduate, then Honors Program Alternative.

**First Year Program**

**Chicago Quarter**

- LSP 110 DISCOVER CHICAGO
  or LSP 111 EXPLORE CHICAGO

**Focal Point**

- LSP 112 FOCAL POINT SEMINAR

**Writing**

- WRD 103 COMPOSITION AND RHETORIC I *
WRD 104 COMPOSITION AND RHETORIC II *

Quantitative Reasoning & Technological Literacy

- LSP 120 QUANTITATIVE REASONING & TECHNOLOGICAL LITERACY I
- LSP 121 QUANTITATIVE REASONING AND TECHNOLOGICAL LITERACY II (Note: See information below)

Sophomore Year

Multiculturalism in the US

- LSP 200 SEMINAR ON MULTICULTURALISM IN THE UNITED STATES

Junior Year

Experiential Learning

- Met by successful completion of required field experience hours.

Senior Year

Capstone

- SEC 387 CAPSTONE SEMINAR IN SECONDARY EDUCATION *
  (Note: This must be taken with student teaching. Students must earn a C or better in this course.)

Learning Domains

Arts and Literature (AL)

- 3 Courses Required

Philosophical Inquiry (PI)

- 2 Courses Required
  - LSE 380 PHILOSOPHICAL ISSUES IN EDUCATION AND CULTURE
  - 1 Additional Course
    (Note: PHIL 100 recommended)

Scientific Inquiry (SI)

- STEM 230 INTRODUCTION TO EARTH AND SPACE SCIENCE
  (Note: Science as a Way of Knowing and Lab course requirements are met through the Science Core within the major.)

Social, Cultural, and Behavioral Inquiry (SCBI)

- 3 Courses Required
  - PSC 120 THE AMERICAN POLITICAL SYSTEM
  - 2 Additional Courses

Religious Dimensions (RD)

- 2 Courses Required

Understanding the Past (UP)

- 2 Courses Required
  (Note: One must be US History.)

* Students must earn a C- or better in this course.

Notes

Specified required courses within Liberal Studies may have grade minimums (e.g. C- or better). Please consult your advisor or your
Courses offered in the student's primary major cannot be taken to fulfill LSP Domain requirements. If students double major, LSP Domain courses may double count for both LSP credit and the second major.

In meeting learning domain requirements, no more than one course that is outside the student's major and is cross-listed with a course within the student's major, can be applied to count for LSP domain credit. This policy does not apply to those who are pursuing a double major or earning BFA or BM degrees.

**Quantitative Reasoning and Technological Literacy**

Readiness for LSP 120 is determined by the math placement test taken online after admission. Students may need to take developmental coursework prior to LSP 120. The LSP 120 requirement may be waived by credit already earned for advanced math coursework or by passing a dedicated proficiency exam. Students who complete both LSP 120 and LSP 121 take one less Learning Domain course. Students may not apply the course reduction to any Domain where only one course is required, and if taken within the SI Domain, the reduction cannot be applied to the SI Lab requirement.

**Major Requirements**

**Course Requirements**

**Content Area Courses**

**Science Core: 36 quarter hours required, grade of C or better required**

- BIO 191 GENERAL BIOLOGY I FOR SCIENCE MAJORS
- BIO 192 GENERAL BIOLOGY II FOR SCIENCE MAJORS
- BIO 193 GENERAL BIOLOGY III FOR SCIENCE MAJORS
- CHE 130 GENERAL CHEMISTRY I (3 quarter hours) and CHE 131 GENERAL CHEMISTRY I LABORATORY (1 quarter hour)
- CHE 132 GENERAL CHEMISTRY II (3 quarter hours) and CHE 133 GENERAL CHEMISTRY LABORATORY II (1 quarter hour)
- CHE 134 GENERAL CHEMISTRY III (3 quarter hours) and CHE 135 GENERAL CHEMISTRY LABORATORY III (1 quarter hour)
- PHY 150 GENERAL PHYSICS I
- PHY 151 GENERAL PHYSICS II
- PHY 152 GENERAL PHYSICS III

**Environmental Science Core: 26 quarter hours required, grade of C or better required**

- BIO 215 ECOLOGY
- ENV 216 EARTH SYSTEM SCIENCE
- ENV 217 HUMAN IMPACTS ON THE ENVIRONMENT
- ENV 260 ENVIRONMENTAL DATA ANALYSIS
- ENV 294 SECOND YEAR SEMINAR (2 quarter hours)
- ENV 350 ENVIRONMENTAL SCIENCE AND STUDIES CAPSTONE
- CMNS 326 ENVIRONMENTAL POLITICS AND RHETORIC

**Environmental Science Electives: 4 quarter hours required, grade of C or better required**

Choose one of the following (* indicates lab):

- ENV 152 ECOLOGICAL AND SOCIAL ECONOMICS
- ENV 204 ENERGY AND THE ENVIRONMENT
- ENV 230 GLOBAL CLIMATE CHANGE
- ENV 300 PLANT IDENTIFICATION *
- ENV 310 ENVIRONMENTAL SOIL SCIENCE *
Pre-Education Introductory Courses: 20 quarter hours required, grade of C or better required

- SCU 207 SOCIAL AND HISTORICAL ISSUES IN EDUCATION
- SEC 364 METHODS: CURRICULUM AND INSTRUCTION IN SECONDARY SCHOOLS
- SEC 314 THE NATURE OF SCIENCE
- SEC 324 INQUIRY & APPLICATION IN DEVELOPING SECONDARY SCIENCE PEDAGOGY
- SCU 336 ADOLESCENT AND ADULT GROWTH AND DEVELOPMENT
  or SCU 337 HUMAN GROWTH AND DEVELOPMENT

Advanced Standing Education Courses: 28 quarter hours required, grade of C or better required

- LSI 346 STRATEGIES FOR MAINSTREAMING AND INCLUSION
- SEC 325 LITERACY IN THE CONTENT AREAS
- SEC 374 TEACHING THE SCIENCES IN THE HIGH SCHOOL 1
- SEC 385 TEACHING THE SCIENCES IN THE HIGH SCHOOL 2
- SCU 351 DOING CRITICAL PRACTITIONER RESEARCH IN EDUCATION (Taken in conjunction with SEC 385)
- SEC 395 ASSESSMENT ISSUES IN SECONDARY EDUCATION
- BBE 301 TEACHING ADOLESCENT ENGLISH LANGUAGE LEARNERS AND DIALECT SPEAKERS ACROSS THE CURRICULUM

Student Teaching: 10 quarter hours required, grade of B- or better required

Registration in student teaching requires completion of all requirements and procedures indicated in the college core section. EDU 95 indicates to the Illinois State Board of Education that all field experience hours are complete. All students also take SEC 387, Capstone Seminar with student teaching (listed in the Liberal Studies section).

- SEC 390 SECONDARY STUDENT TEACHING (10 credit hours)
- EDU 95 CLINICAL EXPERIENCE WITH CHILDREN AND YOUTH (non-credit, non-tuition, PA grade required)

Licensure Tests

All individuals licensed by the Illinois State Board of Education (ISBE) are required to complete licensure tests specific to their teaching license. Secondary Education Environmental Science majors must complete the following tests:

- Test of Academic Proficiency (TAP) (test #400) - assesses knowledge of reading comprehension, language arts, writing, and math. Test is required to qualify for Advanced Standing. *Check with your advisor about qualifying for a waiver with acceptable ACT or SAT test scores.
- Science: Environmental Science Content Area Test (test #112) – assesses knowledge of life science, physical science, and the living environment. Test is required before Student Teaching (deadlines apply).
- EdTPA - assessment conducted during the student teaching experience including video clips of instruction, lesson plans, student work samples, analysis of student learning and reflective commentaries. Students will submit an electronic portfolio to an outside agency for independent evaluation and a fee will be imposed by that agency as part of the assessment.
Secondary Education History (BA)

The Bachelor of Arts program in Secondary Education History prepares students to teach 6th through 12th grade in a variety of urban and suburban education settings, including public and private middle schools and high schools.

Students learn educational theories and effective teaching practices, participate in field experiences, which require observation and participation in teaching activities at multiple schools, and student teaching. Students should meet early and regularly with their advisor to design and monitor their program of study.

The program combines theoretical principles of education and field work with the student's choice of major. Students follow a general pattern of study for middle school and high school levels. In all cases, appropriate field experience plays an integral role.

In addition to completing the requirements for licensure in Illinois, and in aligning with a commitment to preparing students with a global mindset, teacher candidates will also complete the requirements to gain a certificate in Teaching and Learning from the International Baccalaureate Organization. The IB Certificate in Teaching and Learning for the Middle Years Program (MYP) and the Diploma Program (DP) provides teacher candidates the background and expertise to teach in an IB school. The IB Certificate in Teaching and Learning expands the opportunities for teacher candidates and training in IB open expands the vision of inquiry and reflective practice.

Students entering the program must be able and willing to devote themselves to a program requiring a minimum of 100 hours of daytime field experiences in schools. These school-based clinical hours are completed in conjunction with methodology courses that require students to spend a half-day each week in a school. As students will be completing requirements to earn the IB Certificate, a majority of the 100-110 hours will be completed in International Baccalaureate Schools. In addition, the student must spend a minimum of 11 weeks in full-time student teaching.

Please make sure you consult the Liberal Studies Requirements, Major Requirements, and College Core Requirements for full degree requirements.

NOTE: Secondary Education students now have the option to double major in Secondary Education and History. With the double major, students will graduate with a Bachelor of Arts degree with a major in Secondary Education and a major in History. Students should declare Secondary Education as their primary major (see Secondary Education BA/BS for degree requirements) and History (see History BA for degree requirements) as their secondary major. If you have already begun the Secondary Education History major and want to switch to the Secondary Education Major and History double major, you should contact your academic advisor because the double major may require additional coursework. Students who pursue the Bachelor of Arts degree with a major in Secondary Education History do not have the option to double major in History.

Licensure

Illinois Professional Educator License with endorsement in Secondary Education Social Science-History (grades 6-12), an Illinois State Board of Education (ISBE) approved program.

Learning Outcomes

Students will be able to:

- articulate and communicate orally and in writing, as well as demonstrate in practice, a personal philosophy of teaching grounded in adolescent development and learning theories, global perspectives, pedagogical content knowledge research, and DePaul’s Vincentian Mission and the COE's Conceptual Framework.
• define, create, and evaluate a safe, healthy, creative, and rigorous learning environment that facilitates cultural and linguistic responsiveness, emotional well-being, self-efficacy, positive social interaction and collaboration, and mutual respect and empathy, and encourages active engagement, academic risk-taking, divergent and creative thinking, self-motivation, and personal and whole-class goal-setting.
• identify, justify, implement, and evaluate differentiated instructional strategies that support rigorous critical, creative, and exploratory thinking and metacognitive awareness, and problem-solving, collaboration, and academic, social, and emotional development of all students.
• articulate, analyze, and theorize an understanding of adolescent development within historical scholarly traditions that recognizes the complex roles that linguistic (including English learning and nonmainstream English dialects), social, economic, cultural, academic, spiritual, and personal experiences both inside and outside of school have on classroom instruction and adolescent development and learning.
• plan, design, implement, and evaluate curricula and instructional practices based on disciplinary content knowledge, pedagogical content knowledge, multiple literacies, diverse student characteristics such as language, learning, and socio-emotional and behavioral differences, diverse types of student performance data, curriculum goals, and the community context.
• articulate and demonstrate in practice a foundational knowledge of reading, writing, speaking, listening, and cognitive development theories and related pedagogies that are grounded in sociocultural theories of literacy and reflect an understanding of multiple literacy theory and practice.
• articulate and demonstrate disciplinary content knowledge expertise and the historical, social, economic, and political roles and implications of that disciplinary content on human development and societies.
• plan, design, implement, and evaluate formative and short- and long-term summative assessments for promoting student learning and self-assessment, identifying student needs, monitoring student progress, measuring student growth, and evaluating curriculum and student outcomes using diverse types of data.
• identify, articulate, plan, and implement a theory of collaborative practice with students, parents/guardians, school partners, and community stakeholders that recognizes student’s social, emotional, spiritual, and academic development and promotes human and environmental empathy, social justice, and democratic practices.
• articulate and demonstrate professional educator dispositions that are grounded in ethical and Vincentian tenets of human relations and that exhibit professionalism, with an emphasis on leadership, collaboration, and advocacy for students and their communities.

College Core Requirements

Dispositions

The academic programs within the College of Education have set forth these dispositions as educational and professional expectations for all students. Students should be aware that failing to abide by DePaul University or College of Education policies including, under certain circumstances, these dispositions, could result in adverse consequences for the student, including removal from his or her program, the College of Education, or the University.

The following dispositions apply to Early Childhood Education, Elementary Education, Physical Education, Secondary Education, and World Language Education majors only:

• Reflects on progress and identifies strengths and weaknesses, including evaluating strategies for success, finding alternatives for inappropriate strategies, and modifying future practices
• Is receptive to faculty feedback and acts meaningfully and professionally upon suggestions
• Values critical thinking, including engaging theoretical and philosophical frameworks and shows evidence of critical thinking through discussion and writing (e.g., journals, response to prompts)
• Understands the importance of and is committed to communicating clearly orally and in writing both in traditional and in new and emerging digital formats
• Values and is committed to continually developing strong content area knowledge and/or knowledge of the professional field, including pedagogical content knowledge
• Takes initiative, uses imagination and creativity, and seeks out information using a variety of human and material resources and technology to inform his or her teaching
• Is aware of the role of classroom environment and uses management procedures that reflect respect and care for learners and concern for their emotional and physical well being
• Takes the time and effort needed to understand how students learn, including discovering their interests and experiences and determining how to shape teaching acts (using technology as appropriate) that engage learners meaningfully and actively
• Values and is committed to using assessment to evaluate and ensure the continuous intellectual, social,
emotional, and physical development of the learner

- Respects and considers cultural contexts in order to determine how to be responsive to learners and to proactively promote all students' learning
- Values and is responsive to diverse learners' academic, emotional, and social needs through teaching acts (including careful instructional planning, implementation, and differentiation) and through everyday interactions with students
- Is committed to collaboration with colleagues, families, and communities in order to promote all students' learning and development
- Recognizes and fulfills professional responsibilities and habits of conduct (e.g., dress, language, preparedness, attendance, punctuality, etc.)
- Demonstrates collegiality, honesty, good judgment, courtesy, respect, and diplomacy
- Balances self-confidence and assertiveness with respect for others' perspectives
- Respects the requirements, expectations, and procedures of both the College of Education and of our field partners and appreciates the issues of trust, fairness, and professionalism involved

The following dispositions apply to Special Education majors only:

- Is receptive to faculty feedback and acts meaningfully and professionally upon suggestions
- Reflects on his or her own progress, identifies strengths and weaknesses, and evaluates strategies for success and professional growth
- Takes initiative
- Is open to new ideas and engagement in learning
- Respects diversity and cultural contexts to determine how to be responsive to learners and to proactively promote all students' learning
- Expresses positive attitudes toward individuals with disabilities and a willingness to advocate on their behalf
- Is committed to collaboration with colleagues, families, and communities in order to promote all students' learning and development
- Demonstrates professional ethical and legal behavior as defined by the respective codes of ethics and laws
- Demonstrates consistent professional behavior across all academic settings
- Maintains appropriate interpersonal and professional boundaries
- Accepts personal responsibility for one's behavior
- Expresses feelings and opinions effectively and appropriately
- Upholds confidentiality

**Skill Building Courses**

Before taking any math or English courses, students must take the DePaul placement tests to determine if skill level is at the college level. If placement indicates skill level in these courses, the courses become part of degree requirements. Consult with your advisor regarding placement test results and any required classes.

**Advanced Standing**

Students are conditionally admitted to the College of Education. There are additional requirements to reach Advanced Standing in your program in the College of Education. Requirements must be met to progress in the major and take courses in the Advanced Standing category.

Advanced Standing requirements are:

- Maintain a DePaul undergraduate 2.5 GPA
- Pass the Illinois Test of Academic Proficiency (TAP)
- Submit a petition for advanced standing form

Students should attempt to complete the Advanced Standing requirements soon after beginning the program. There is no time limit to meet these criteria; however, students will only be able to take pre-education courses until requirements have been met. Students can also take liberal studies or content area courses before or after meeting Advanced Standing requirements.

**Modern Language Competence Requirement**

Students pursuing a Bachelor of Arts degree in the College of Education will be required to demonstrate a measure of competence in a modern language, as defined by the college. Such competence may be demonstrated in one of several ways:

- completing two years of a language sequence in high school
- completing the last course in the first-year college sequence of any language
- completing a college course beyond the first-year level in any language
- achieving a satisfactory score on any of the Modern Language placement examinations administered at DePaul
- achieving a satisfactory rating in a proficiency examination accepted by DePaul
achieving a score of 3 or higher on the Advance Placement (AP) test for any language
achieving a score of 5 or higher in the Language B assessment from a Standard or Higher Level International Baccalaureate (IB) program
achieving a satisfactory score on the CLEP examination

Please note: The Modern Language Competence Requirement is not required for students in the Early Childhood Education: SNL Joint Program (BAECE) program.

For further information regarding satisfactory scores and possible credit from the DePaul placement, AP, CLEP, or IB examinations, please contact the Office of the University Registrar.

Students who complete an Inter-College Transfer (ICT) to the College of Education will abide by the COE Modern Language Requirement in place on the effective date of the ICT.

B.A. students who meet College requirements and wish to pursue further work in the language may elect the “Modern Language Option” of the Liberal Studies Program. While B.S. students are not required to demonstrate competency in a modern language, the ”Modern Language Option” is available to them for language study at any level.

**Licensure Tests**

All individuals licensed by the Illinois State Board of Education (ISBE) are required to complete licensure tests specific to their teaching license.

**Field Experiences**

Each student seeking licensure from the College of Education/Professional Education Unit must complete supervised field experiences in appropriate settings in conjunction with education courses. The field experiences must include a variety of grade levels, multicultural experiences, and a minimum of 10 hours in special education settings. All field experiences must be completed prior to final approval for student teaching. Field experience hours should be entered by the student into the FEDS system when completing courses with field experience requirements.

**Endorsements**

An endorsement is a statement appearing on a license that identifies the specific subjects or grade level that the license holder is authorized to teach.

The Illinois State Board of Education (ISBE) issues endorsements in various subject areas. To view the full list and requirements, visit the ISBE website.

Please note that the Illinois State Board of Education (ISBE) may change the state licensure and endorsement requirements at any time and without prior notice. Individuals are bound by the requirements in place when applying for the license or endorsement, not the requirements in place when beginning the program.

**Student Teaching Requirements**

Student Teaching is the culminating clinical experience in the student's program. All students in teacher preparation programs must meet the following requirements before applying for student teaching:

**Academic Requirements:**

- Completion of all Liberal Studies, Pre-Education, Advanced Standing and concentration/content area courses
- Overall cumulative G.P.A. of 2.50 or better
- Cumulative GPA. of 2.75 or better in all education courses
- Meet all other program requirements (e.g., modern language and residency requirements)
- Meet designated program standards
- Pass the required Illinois licensure content area test

**Clinical Requirements:**

- Completion of all required field experiences
- Three satisfactory evaluations in field experiences
- Three satisfactory faculty recommendations
- Attendance at mandatory meeting for student teaching
- Application for student teaching, resume, transcripts, and writing sample (check deadlines)
- Review and approval by Student Teaching Committee of the College of Education

**Student Teaching Timeline and Deadlines:**
• Attend a Mandatory Meeting approximately 1 year prior to expected quarter of student teaching.
• Submit application for student teaching after attending Mandatory Meeting, approximately 1 year prior to student teaching.
• Academic requirements are due one quarter before expected quarter of student teaching.
• Clinical requirements are completed as course requirements. Field experience hours are entered by the student as coursework is completed.

Online Faculty Evaluations are entered by the instructor of relevant courses. All data must be entered in the Field Experience Documentation System (FEDS) due one month prior to student teaching.

Individual child care agencies and public and private school districts may have additional requirements (application, training, background check, etc.).

**Degree Conferral and Graduation**

The awarding of a degree is not automatic. You must submit an application to be considered for the degree. DePaul awards and posts degrees at the end of each regular academic term (autumn, winter, spring, summer).

It is your responsibility to initiate the degree conferral application process by submitting an online application. Submitting an application means you intend to finish your degree requirements by the end of the term for which you have applied.

Undergraduate students must be approved for student teaching and complete student teaching and capstone to be cleared for the degree. Student must submit graduation application for the quarter that matches the quarter you are student teaching.

After you submit the application, you cannot register for any term after the one selected in the application.

To apply for degree conferral, log on to Campus Connection. Select STUDENT CENTER, then MY ACADEMICS. On screen instructions will take you through the application process.

Provided that all requirements and financial obligations are met, degrees are posted 30 days after the official end of the term. Official dates are listed on the Academic Calendar.

DePaul holds one commencement ceremony each year in June. If you intend to participate, you must first apply for degree conferral for the current academic year and then submit a cap and gown order. Honors are not announced at the ceremony for undergraduates completing their final courses in spring quarter because a final GPA is not available at the time of the ceremony.

Additional information about degree conferral and graduation can be found on the College of Education website at: [http://education.depaul.edu/](http://education.depaul.edu/).

**Licensure**

Requirements for licensure include completion of full bachelor's degree program, all licensure tests (including OPI for world language majors), and awarding of bachelor's degree. A bachelor's degree is required to qualify for licensure and must be awarded before applying for the license.

Individuals must submit an application directly to the Illinois State Board of Education after completion of requirements and after DePaul has submitted notification to ISBE. Application requirements include application form, application fee, official transcripts, and registration fee.

All individuals must meet ISBE requirements in place at the time of application for the license. Requirements are subject to change per the discretion of ISBE. All coursework and requirements pertaining to licensure requirements must be completed before DePaul University can recommend an individual for the license.

Individuals seeking additional endorsements after applying for the licensure must contact ISBE directly for an evaluation request.

All coursework and requirements must be completed before DePaul University can recommend an individual for the license.
Liberal Studies Requirements

Honors program requirements can be found in the individual Colleges & Schools section of the University Catalog. Select Academics, followed by Undergraduate, then Honors Program Alternative.

First Year Program

Chicago Quarter

- LSP 110 DISCOVER CHICAGO
  or LSP 111 EXPLORE CHICAGO

Focal Point

- LSP 112 FOCAL POINT SEMINAR

Writing

- WRD 103 COMPOSITION AND RHETORIC I *
- WRD 104 COMPOSITION AND RHETORIC II *

Quantitative Reasoning & Technological Literacy

- LSP 120 QUANTITATIVE REASONING & TECHNOLOGICAL LITERACY I
- LSP 121 QUANTITATIVE REASONING AND TECHNOLOGICAL LITERACY II
  (Note: See information below.)

Sophomore Year

Multiculturalism in the US

- LSP 200 SEMINAR ON MULTICULTURALISM IN THE UNITED STATES

Junior Year

Experiential Learning

- Met by successful completion of required field experience hours

Senior Year

Capstone

- SEC 387 CAPSTONE SEMINAR IN SECONDARY EDUCATION *
  (Note: This must be taken with student teaching. Students must earn a C or better in this course.)

Learning Domains

Arts and Literature (AL)

- 3 Courses Required

Philosophical Inquiry (PI)

- 2 Courses Required:
  - LSE 380 PHILOSOPHICAL ISSUES IN EDUCATION AND CULTURE
  - 1 Additional Course
    (Note: PHL 100 recommended)

Scientific Inquiry (SI)
• 3 Courses Required:
  - 1 BIO
  - 1 CHE/ENV/GEO/PHY
  - 1 Additional Course
    (Note: One course must be a lab or SWK)

Social, Cultural, and Behavioral Inquiry (SCBI)

• 2 Courses Required:
  - PSC 120 THE AMERICAN POLITICAL SYSTEM
  - 1 ECO course

Religious Dimensions (RD)

• 2 Courses Required

Understanding the Past (UP)

• 1 Course Required
  (Note: This must be U.S. History)

* Students must earn a C- or better in this course.

Notes

Specified required courses within Liberal Studies may have grade minimums (e.g. C- or better). Please consult your advisor or your college and major requirements.

Courses offered in the student's primary major cannot be taken to fulfill LSP Domain requirements. If students double major, LSP Domain courses may double count for both LSP credit and the second major.

In meeting learning domain requirements, no more than one course that is outside the student's major and is cross-listed with a course within the student's major, can be applied to count for LSP domain credit. This policy does not apply to those who are pursuing a double major or earning BFA or BM degrees.

Quantitative Reasoning and Technological Literacy

Readiness for LSP 120 is determined by the math placement test taken online after admission. Students may need to take developmental coursework prior to LSP 120. The LSP 120 requirement may be waived by credit already earned for advanced math coursework or by passing a dedicated proficiency exam. Students who complete both LSP 120 and LSP 121 take one less Learning Domain course. Students may not apply the course reduction to any Domain where only one course is required, and if taken within the SI Domain, the reduction cannot be applied to the SI Lab or SWK requirement.

Major Requirements

Course Requirements

Content Area Courses

History Core: 16 quarter hours required, grade of C or better required

• HST 181 UNITED STATES TO 1800
• HST 182 UNITED STATES, 1800-1900
• HST 111 THE WORLD TO C.1500
• HST 112 THE WORLD, C.1500-1914
Historical Methods: 8 quarter hours required, grade of C or better required

- HST 298 INTRODUCTION TO HISTORICAL SOURCES AND METHODS
- HST 299 CRAFT OF HISTORY

Advanced History Course: 16 quarter hours required, grade of C or better required

- HST US History elective 1
- HST US History elective 2
- HST Non-US History
- HST World History elective

History Elective Course: 16 quarter hours required, grade of C or better required

- HST Elective 1
- HST Elective 2
- HST Elective 3
- HST Elective 4

Note: A minimum of 6 HST courses must be at the 300 level.

Pre-Education Introductory Courses: 20 quarter hours required, grade of C or better required

- SCU 207 SOCIAL AND HISTORICAL ISSUES IN EDUCATION
- SEC 364 METHODS: CURRICULUM AND INSTRUCTION IN SECONDARY SCHOOLS
- SEC 312 THE NATURE OF HISTORY AND THE SOCIAL SCIENCES
- SEC 322 INQUIRY & APPLICATION IN DEVELOPING SECONDARY HISTORY AND SOCIAL SCIENCES PEDAGOGY
- SCU 336 ADOLESCENT AND ADULT GROWTH AND DEVELOPMENT
  or SCU 337 HUMAN GROWTH AND DEVELOPMENT

Advanced Standing Education Courses: 28 quarter hours required, grade of C or better required

- LSI 346 STRATEGIES FOR MAINSTREAMING AND INCLUSION
- SEC 325 LITERACY IN THE CONTENT AREAS
- SEC 372 TEACHING HISTORY AND THE SOCIAL SCIENCES IN THE HIGH SCHOOL 1
- SEC 382 TEACHING HISTORY AND THE SOCIAL SCIENCES IN THE HIGH SCHOOL 2
- SCU 351 DOING CRITICAL PRACTITIONER RESEARCH IN EDUCATION (Taken in conjunction with SEC 382)
- SEC 395 ASSESSMENT ISSUES IN SECONDARY EDUCATION
- BBE 301 TEACHING ADOLESCENT ENGLISH LANGUAGE LEARNERS AND DIALECT SPEAKERS ACROSS THE CURRICULUM

Student Teaching: 10 quarter hours required, grade of B- or better required

Registration in student teaching requires completion of all requirements and procedures listed in the college core requirements. EDU 95 indicates to the Illinois State Board of Education that all field experience hours are complete. All students also take SEC 387, Capstone Seminar with student teaching (listed in the Liberal Studies section).

- SEC 390 SECONDARY STUDENT TEACHING (10 credit hours)
- EDU 95 CLINICAL EXPERIENCE WITH CHILDREN AND YOUTH (non-credit, non-tuition, PA grade required)

Licensure Tests

All individuals licensed by the Illinois State Board of Education (ISBE) are required to complete licensure tests specific to their teaching license. Secondary Education History majors must complete the following tests:

- Test of Academic Proficiency (TAP) (test #400) - assesses knowledge of reading comprehension, language arts, writing, and math. Test is required to qualify for Advanced Standing. * Check with your advisor about qualifying for a waiver with acceptable ACT or SAT test scores.
- Social Science: History Content Area Test (test #114) – assesses and measures the candidate’s core knowledge across history and social science fields. Test is required before Student Teaching (deadlines apply).
Secondary Education Mathematics (BA)

The Bachelor of Arts program in Secondary Education Mathematics prepares students to teach 6th through 12th grade in a variety of urban and suburban education settings, including public and private middle schools and high schools.

Students learn educational theories and effective teaching practices, participate in field experiences, which require observation and participation in teaching activities at multiple schools, and student teaching. Students should meet early and regularly with their advisor to design and monitor their program of study.

The program combines theoretical principles of education and field work with the student’s choice of major. Students follow a general pattern of study for middle school and high school levels. In all cases, appropriate field experience plays an integral role.

In addition to completing the requirements for licensure in Illinois, and in aligning with a commitment to preparing students with a global mindset, teacher candidates will also complete the requirements to gain a certificate in Teaching and Learning from the International Baccalaureate Organization. The IB Certificate in Teaching and Learning for the Middle Years Program (MYP) and the Diploma Program (DP) provides teacher candidates the background and expertise to teach in an IB school. The IB Certificate in Teaching and Learning expands the opportunities for teacher candidates and training in IB open expands the vision of inquiry and reflective practice.

Students entering the program must be able and willing to devote themselves to a program requiring a minimum of 100 hours of daytime field experiences in schools. These school-based clinical hours are completed in conjunction with methodology courses that require students to spend a half-day each week in a school. As students will be completing requirements to earn the IB Certificate, a majority of the 100-110 hours will be completed in International Baccalaureate Schools. In addition, the student must spend a minimum of 11 weeks in full-time student teaching.

Please make sure you consult the Liberal Studies Requirements, Major Requirements, and College Core Requirements for full degree requirements.

Note: Secondary Education students now have the option to double major in Secondary Education and Mathematical Sciences. With the double major, students will graduate with a Bachelor of Arts degree with a major in Secondary Education and a major in Mathematical Sciences. Students should declare Secondary Education as their primary major (see Secondary Education BA/BS for degree requirements) and Mathematical Sciences (see Mathematical Sciences BA for degree requirements) as their secondary major. If you have already begun the Secondary Education Mathematics major and want to switch to the Secondary Education Major and Mathematical Sciences double major, you should contact your academic advisor because the double major may require additional coursework. Students who pursue the Bachelor of Science degree with a major in Secondary Education Mathematics do not have the option to double major in Mathematical Sciences.

Licensure

Illinois Professional Educator License with endorsement in Secondary Education Mathematics (grades 6-12), an Illinois State Board of Education (ISBE) approved program.
Learning Outcomes

Students will be able to:

- articulate and communicate orally and in writing, as well as demonstrate in practice, a personal philosophy of teaching grounded in adolescent development and learning theories, global perspectives, pedagogical content knowledge research, and DePaul's Vincentian Mission and the COE's Conceptual Framework.
- define, create, and evaluate a safe, healthy, creative, and rigorous learning environment that facilitates cultural and linguistic responsiveness, emotional well-being, self-efficacy, positive social interaction and collaboration, and mutual respect and empathy, and encourages active engagement, academic risk-taking, divergent and creative thinking, self-motivation, and personal and whole-class goal-setting.
- identify, justify, implement, and evaluate differentiated instructional strategies that support rigorous critical, creative, and exploratory thinking and metacognitive awareness, and problem-solving, collaboration, and academic, social, and emotional development of all students.
- articulate, analyze, and theorize an understanding of adolescent development within historical scholarly traditions that recognizes the complex roles that linguistic (including English learning and nonmainstream English dialects), social, economic, cultural, academic, spiritual, and personal experiences both inside and outside of school have on classroom instruction and adolescent development and learning.
- plan, design, implement, and evaluate curricula and instructional practices based on disciplinary content knowledge, pedagogical content knowledge, multiple literacies, diverse student characteristics such as language, learning, and socio-emotional and behavioral differences, diverse types of student performance data, curriculum goals, and the community context.
- articulate and demonstrate in practice a foundational knowledge of reading, writing, speaking, listening, and cognitive development theories and related pedagogies that are grounded in sociocultural theories of literacy and reflect an understanding of multiple literacy theory and practice.
- articulate and demonstrate disciplinary content knowledge expertise and the historical, social, economic, and political roles and implications of that disciplinary content on human development and societies.
- plan, design, implement, and evaluate formative and short- and long-term summative assessments for promoting student learning and self-assessment, identifying student needs, monitoring student progress, measuring student growth, and evaluating curriculum and student outcomes using diverse types of data.
- identify, articulate, plan, and implement a theory of collaborative practice with students, parents/guardians, school partners, and community stakeholders that recognizes student's social, emotional, spiritual, and academic development and promotes human and environmental empathy, social justice, and democratic practices.
- articulate and demonstrate professional educator dispositions that are grounded in ethical and Vincentian tenets of human relations and that exhibit professionalism, with an emphasis on leadership, collaboration, and advocacy for students and their communities.

College Core Requirements

Dispositions

The academic programs within the College of Education have set forth these dispositions as educational and professional expectations for all students. Students should be aware that failing to abide by DePaul University or College of Education policies including, under certain circumstances, these dispositions, could result in adverse consequences for the student, including removal from his or her program, the College of Education, or the University.

The following dispositions apply to Early Childhood Education, Elementary Education, Physical Education, Secondary Education, and World Language Education majors only:

- Reflects on progress and identifies strengths and weaknesses, including evaluating strategies for success, finding alternatives for inappropriate strategies, and modifying future practices
- Is receptive to faculty feedback and acts meaningfully and professionally upon suggestions
- Values critical thinking, including engaging theoretical and philosophical frameworks and shows evidence of critical thinking through discussion and writing (e.g., journals, response to prompts)
- Understands the importance of and is committed to communicating clearly orally and in writing both in
Values and is committed to continually developing strong content area knowledge and/or knowledge of the professional field, including pedagogical content knowledge

- Takes initiative, uses imagination and creativity, and seeks out information using a variety of human and material resources and technology to inform his or her teaching

- Is aware of the role of classroom environment and uses management procedures that reflect respect and care for learners and concern for their emotional and physical well being

- Takes the time and effort needed to understand how students learn, including discovering their interests and experiences and determining how to shape teaching acts (using technology as appropriate) that engage learners meaningfully and actively

- Values and is committed to using assessment to evaluate and ensure the continuous intellectual, social, emotional, and physical development of the learner

- Respects and considers cultural contexts in order to determine how to be responsive to learners and to proactively promote all students' learning

- Values and is responsive to diverse learners' academic, emotional, and social needs through teaching acts (including careful instructional planning, implementation, and differentiation) and through everyday interactions with students

- Is committed to collaboration with colleagues, families, and communities in order to promote all students' learning and development

- Recognizes and fulfills professional responsibilities and habits of conduct (e.g., dress, language, preparedness, attendance, punctuality, etc.)

- Demonstrates collegiality, honesty, good judgment, courtesy, respect, and diplomacy

- Balances self-confidence and assertiveness with respect for others' perspectives

- Respects the requirements, expectations, and procedures of both the College of Education and of our field partners and appreciates the issues of trust, fairness, and professionalism involved

The following dispositions apply to Special Education majors only:

- Is receptive to faculty feedback and acts meaningfully and professionally upon suggestions

- Reflects on his or her own progress, identifies strengths and weaknesses, and evaluates strategies for success and professional growth

- Takes initiative

- Is open to new ideas and engagement in learning

- Respects diversity and cultural contexts to determine how to be responsive to learners and to proactively promote all students' learning

- Expresses positive attitudes toward individuals with disabilities and a willingness to advocate on their behalf

- Is committed to collaboration with colleagues, families, and communities in order to promote all students' learning and development

- Demonstrates professional ethical and legal behavior as defined by the respective codes of ethics and laws

- Demonstrates consistent professional behavior across all academic settings

- Maintains appropriate interpersonal and professional boundaries

- Accepts personal responsibility for one's behavior

- Expresses feelings and opinions effectively and appropriately

- Upholds confidentiality

**Skill Building Courses**

Before taking any math or English courses, students must take the DePaul placement tests to determine if skill level is at the college level. If placement indicates skill level in these courses, the courses become part of degree requirements. Consult with your advisor regarding placement test results and any required classes.

**Advanced Standing**

Students are conditionally admitted to the College of Education. There are additional requirements to reach Advanced Standing in your program in the College of Education. Requirements must be met to progress in the major and take courses in the Advanced Standing category.

Advanced Standing requirements are:

- Maintain a DePaul undergraduate 2.5 GPA
- Pass the Illinois Test of Academic Proficiency (TAP)
- Submit a petition for advanced standing form

Students should attempt to complete the Advanced Standing requirements soon after beginning the program. There is no time limit to meet these criteria; however, students will only be able to take pre-education courses until requirements have been met. Students can also take liberal studies or content area courses before or after meeting Advanced Standing requirements.

**Modern Language Competence Requirement**
Students pursuing a Bachelor of Arts degree in the College of Education will be required to demonstrate a measure of competence in a modern language, as defined by the college. Such competence may be demonstrated in one of several ways:

- completing two years of a language sequence in high school
- completing the last course in the first-year college sequence of any language
- completing a college course beyond the first-year level in any language
- achieving a satisfactory score on any of the Modern Language placement examinations administered at DePaul
- achieving a satisfactory rating in a proficiency examination accepted by DePaul
- achieving a score of 3 or higher on the Advance Placement (AP) test for any language
- achieving a score of 5 or higher in the Language B assessment from a Standard or Higher Level International Baccalaureate (IB) program
- achieving a satisfactory score on the CLEP examination

Please note: The Modern Language Competence Requirement is not required for students in the Early Childhood Education: SNL Joint Program (BAECE) program.

For further information regarding satisfactory scores and possible credit from the DePaul placement, AP, CLEP, or IB examinations, please contact the Office of the University Registrar.

Students who complete an Inter-College Transfer (ICT) to the College of Education will abide by the COE Modern Language Requirement in place on the effective date of the ICT.

B.A. students who meet College requirements and wish to pursue further work in the language may elect the "Modern Language Option" of the Liberal Studies Program. While B.S. students are not required to demonstrate competency in a modern language, the "Modern Language Option" is available to them for language study at any level.

**Licensure Tests**

All individuals licensed by the Illinois State Board of Education (ISBE) are required to complete licensure tests specific to their teaching license.

**Field Experiences**

Each student seeking licensure from the College of Education/Professional Education Unit must complete supervised field experiences in appropriate settings in conjunction with education courses. The field experiences must include a variety of grade levels, multicultural experiences, and a minimum of 10 hours in special education settings. All field experiences must be completed prior to final approval for student teaching. Field experience hours should be entered by the student into the FEDS system when completing courses with field experience requirements.

**Endorsements**

An endorsement is a statement appearing on a license that identifies the specific subjects or grade level that the license holder is authorized to teach.

The Illinois State Board of Education (ISBE) issues endorsements in various subject areas. To view the full list and requirements, visit the ISBE website.

Please note that the Illinois State Board of Education (ISBE) may change the state licensure and endorsement requirements at any time and without prior notice. Individuals are bound by the requirements in place when applying for the license or endorsement, not the requirements in place when beginning the program.

**Student Teaching Requirements**

Student Teaching is the culminating clinical experience in the student's program. All students in teacher preparation programs must meet the following requirements before applying for student teaching:

**Academic Requirements:**

- Completion of all Liberal Studies, Pre-Education, Advanced Standing and concentration/content area courses
- Overall cumulative G.P.A. of 2.50 or better
- Cumulative G.P.A. of 2.75 or better in all education courses
- Meet all other program requirements (e.g., modern language and residency requirements)
- Meet designated program standards
- Pass the required Illinois licensure content area test
Clinical Requirements:

- Completion of all required field experiences
- Three satisfactory evaluations in field experiences
- Three satisfactory faculty recommendations
- Attendance at mandatory meeting for student teaching
- Application for student teaching, resume, transcripts, and writing sample (check deadlines)
- Review and approval by Student Teaching Committee of the College of Education

Student Teaching Timeline and Deadlines:

- Attend a Mandatory Meeting approximately 1 year prior to expected quarter of student teaching.
- Submit application for student teaching after attending Mandatory Meeting, approximately 1 year prior to student teaching.
- Academic requirements are due one quarter before expected quarter of student teaching.
- Clinical requirements are completed as course requirements. Field experience hours are entered by the student as coursework is completed.

Online Faculty Evaluations are entered by the instructor of relevant courses. All data must be entered in the Field Experience Documentation System (FEDS) due one month prior to student teaching.

Individual child care agencies and public and private school districts may have additional requirements (application, training, background check, etc.).

Degree Conferral and Graduation

The awarding of a degree is not automatic. You must submit an application to be considered for the degree. DePaul awards and posts degrees at the end of each regular academic term (autumn, winter, spring, summer).

It is your responsibility to initiate the degree conferral application process by submitting an online application. Submitting an application means you intend to finish your degree requirements by the end of the term for which you have applied.

Undergraduate students must be approved for student teaching and complete student teaching and capstone to be cleared for the degree. Student must submit graduation application for the quarter that matches the quarter you are student teaching.

After you submit the application, you cannot register for any term after the one selected in the application.

To apply for degree conferral, log on to Campus Connection. Select STUDENT CENTER, then MY ACADEMICS. On screen instructions will take you through the application process.

Provided that all requirements and financial obligations are met, degrees are posted 30 days after the official end of the term. Official dates are listed on the Academic Calendar.

DePaul holds one commencement ceremony each year in June. If you intend to participate, you must first apply for degree conferral for the current academic year and then submit a cap and gown order. Honors are not announced at the ceremony for undergraduates completing their final courses in spring quarter because a final GPA is not available at the time of the ceremony.

Additional information about degree conferral and graduation can be found on the College of Education website at: http://education.depaul.edu/.

Licensure

Requirements for licensure include completion of full bachelor's degree program, all licensure tests (including OPI for world language majors), and awarding of bachelor's degree. A bachelor's degree is required to qualify for licensure and must be awarded before applying for the license.

Individuals must submit an application directly to the Illinois State Board of Education after completion of requirements and after DePaul has submitted notification to ISBE. Application requirements include application form, application fee, official transcripts, and registration fee.

All individuals must meet ISBE requirements in place at the time of application for the license. Requirements are subject to change per the discretion of ISBE. All coursework and requirements pertaining to licensure requirements must be completed before DePaul University can recommend an individual for the license.
Individuals seeking additional endorsements after applying for the licensure must contact ISBE directly for an evaluation request. All coursework and requirements must be completed before DePaul University can recommend an individual for the license.

Liberal Studies Requirements

Honors program requirements can be found in the individual Colleges & Schools section of the University Catalog. Select Academics, followed by Undergraduate, then Honors Program Alternative.

This policy does not apply to those who are pursuing a double major or earning BFA or BM degrees.

Major Requirements

Course Requirements

Content Area Courses

Math Core: 28 quarter hours required, grade of C or better required

Math courses must be taken in sequence (i.e. 150 is followed by 151, 160 is followed by 161, etc.). Consult your advisor for a full list of sequences and prerequisites.
MAT 150 CALCULUS I
or MAT 160 CALCULUS FOR MATHEMATICS AND SCIENCE MAJORS I (5qh)
MAT 151 CALCULUS II
or MAT 161 CALCULUS FOR MATHEMATICS AND SCIENCE MAJORS II (5qh)
MAT 152 CALCULUS III
or MAT 162 CALCULUS FOR MATHEMATICS AND SCIENCE MAJORS III (5qh)
• One of the following options
  o MAT 215 INTRODUCTION TO MATHEMATICAL REASONING
  o Discrete Mathematics Sequence
    ▪ MAT 140 DISCRETE MATHEMATICS I
    ▪ MAT 141 DISCRETE MATHEMATICS II
• MAT 260 MULTIVARIABLE CALCULUS I
• MAT 261 MULTIVARIABLE CALCULUS II
• MAT 262 LINEAR ALGEBRA

Computer Science Language: 4 quarter hours required, grade of C or better required
• IT 130 INTRODUCTORY COMPUTING FOR THE WEB
  or any CSC 200 level course

Algebra and Geometry Core: 16 quarter hours required, grade of C or better required
• MAT 310 ABSTRACT ALGEBRA I
• MAT 311 ABSTRACT ALGEBRA II
  or MAT 303 THEORY OF NUMBERS
• MAT 320 GEOMETRY I
• MAT 321 GEOMETRY II
  or MAT 335 REAL ANALYSIS I

Probability and Statistics Core: 4 quarter hours required, grade of C or better required
• MAT 348 APPLIED STATISTICAL METHODS
  or MAT 351 PROBABILITY AND STATISTICS I

History of Math Core: 4 quarter hours required, grade of C or better required
• MAT 301 HISTORY OF MATHEMATICS

Pre-Education Introductory Courses: 20 quarter hours required, grade of C or better required
• SCU 207 SOCIAL AND HISTORICAL ISSUES IN EDUCATION
• SEC 364 METHODS: CURRICULUM AND INSTRUCTION IN SECONDARY SCHOOLS
• SEC 313 THE NATURE OF MATHEMATICS
• SEC 323 INQUIRY & APPLICATION IN DEVELOPING SECONDARY MATHEMATICS PEDAGOGY
• SCU 336 ADOLESCENT AND ADULT GROWTH AND DEVELOPMENT
  or SCU 337 HUMAN GROWTH AND DEVELOPMENT

Advanced Standing Education Courses: 28 quarter hours required, grade of C or better required
• LSI 346 STRATEGIES FOR MAINSTREAMING AND INCLUSION
• SEC 325 LITERACY IN THE CONTENT AREAS
• SEC 373 TEACHING MATHEMATICS IN THE HIGH SCHOOL I
• SEC 383 TEACHING MATHEMATICS IN THE HIGH SCHOOL 2
• SCU 351 DOING CRITICAL PRACTITIONER RESEARCH IN EDUCATION (Taken in conjunction with SEC 383)
• SEC 395 ASSESSMENT ISSUES IN SECONDARY EDUCATION
• BBE 301 TEACHING ADOLESCENT ENGLISH LANGUAGE LEARNERS AND DIALECT SPEAKERS ACROSS THE CURRICULUM

Bachelor of Science Requirements
To qualify for the Bachelor of Science degree, complete 4 quarter hours in natural or computer science beyond the requirements for the Bachelor of Arts degree. Please consult your advisor for approval of appropriate natural and computer science courses.

Open Electives: 4 quarter hours are required
Open elective credit also is required to meet the minimum graduation requirement of 192 hours. The following cannot be used to fulfill an open elective: WRD 98, MAT 94, and MAT 95.

**Student Teaching: 10 quarter hours required, grade of B- or better required**

Registration in student teaching requires completion of all requirements and procedures indicated in the college core section. EDU 95 indicates to the Illinois State Board of Education that all field experience hours are complete. All students also take SEC 387, Capstone Seminar with student teaching (listed in the Liberal Studies section).

- SEC 390 SECONDARY STUDENT TEACHING (10 credit hours)
- EDU 95 CLINICAL EXPERIENCE WITH CHILDREN AND YOUTH (non-credit, non-tuition, PA grade required)

**Licensure Tests**

All individuals licensed by the Illinois State Board of Education (ISBE) are required to complete licensure tests specific to their teaching license. Secondary Education Mathematics majors must complete the following tests:

- Test of Academic Proficiency (TAP) (test #400) - assesses knowledge of reading comprehension, language arts, writing, and math. Test is required to qualify for Advanced Standing. *Check with your advisor about qualifying for a waiver with acceptable ACT or SAT test scores.
- Mathematics Content Area Test (test #115) – assesses knowledge of both the processes and applications of mathematics. Test is required before Student Teaching (deadlines apply).
- EdTPA - assessment conducted during the student teaching experience including video clips of instruction, lesson plans, student work samples, analysis of student learning and reflective commentaries. Students will submit an electronic portfolio to an outside agency for independent evaluation and a fee will be imposed by that agency as part of the assessment.

**Secondary Education Mathematics (BS)**

The Bachelor of Science program in Secondary Education Mathematics prepares students to teach 6th through 12th grade in a variety of urban and suburban education settings, including public and private middle schools and high schools.

Students learn educational theories and effective teaching practices, participate in field experiences, which require observation and participation in teaching activities at multiple schools, and student teaching. Students should meet early and regularly with their advisor to design and monitor their program of study.

The program combines theoretical principles of education and field work with the student's choice of major. Students follow a general pattern of study for middle school and high school levels. In all cases, appropriate field experience plays an integral role.

In addition to completing the requirements for licensure in Illinois, and in aligning with a commitment to preparing students with a global mindset, teacher candidates will also complete the requirements to gain a certificate in Teaching and Learning from the International Baccalaureate Organization. The IB Certificate in Teaching and Learning for the Middle Years Program (MYP) and the Diploma Program (DP) provides teacher candidates the background and expertise to teach in an IB school. The IB Certificate in Teaching and Learning expands the opportunities for teacher candidates and training in IB open expands the vision of inquiry and reflective practice.

Students entering the program must be able and willing to devote themselves to a program requiring a minimum of 100 hours of daytime field experiences in schools. These school-based clinical hours are completed in conjunction with methodology courses that require students to spend a half-day each week in a school. As students will be completing requirements to earn the IB Certificate, a majority of the 100-110 hours will be completed in International Baccalaureate Schools. In addition, the student must spend a minimum of 11 weeks in full-time student teaching.
Please make sure you consult the Liberal Studies Requirements, Major Requirements, and College Core Requirements for full degree requirements.

NOTE: Secondary Education students now have the option to double major in Secondary Education and Mathematical Sciences. With the double major, students will graduate with a Bachelor of Science degree with a major in Secondary Education and a major in Mathematical Sciences. Students should declare Secondary Education as their primary major (see Secondary Education BA/BS for degree requirements) and Mathematical Sciences (see Mathematical Sciences BS for degree requirements) as their secondary major. If you have already begun the Secondary Education Mathematics major and want to switch to the Secondary Education Major and Mathematical Sciences double major, you should contact your academic advisor because the double major may require additional coursework. Students who pursue the Bachelor of Science degree with a major in Secondary Education Mathematics do not have the option to double major in Mathematical Sciences.

**Licensure**

Illinois Professional Educator License with endorsement in Secondary Education Mathematics (grades 6-12), an Illinois State Board of Education (ISBE) approved program.

**Learning Outcomes**

Students will be able to:

- articulate and communicate orally and in writing, as well as demonstrate in practice, a personal philosophy of teaching grounded in adolescent development and learning theories, global perspectives, pedagogical content knowledge research, and DePaul’s Vincentian Mission and the COE’s Conceptual Framework.
- define, create, and evaluate a safe, healthy, creative, and rigorous learning environment that facilitates cultural and linguistic responsiveness, emotional well-being, self-efficacy, positive social interaction and collaboration, and mutual respect and empathy, and encourages active engagement, academic risk-taking, divergent and creative thinking, self-motivation, and personal and whole-class goal-setting.
- identify, justify, implement, and evaluate differentiated instructional strategies that support rigorous critical, creative, and exploratory thinking and metacognitive awareness, and problem-solving, collaboration, and academic, social, and emotional development of all students.
- articulate, analyze, and theorize an understanding of adolescent development within historical scholarly traditions that recognizes the complex roles that linguistic (including English learning and nonmainstream English dialects), social, economic, cultural, academic, spiritual, and personal experiences both inside and outside of school have on classroom instruction and adolescent development and learning.
- plan, design, implement, and evaluate curricula and instructional practices based on disciplinary content knowledge, pedagogical content knowledge, multiple literacies, diverse student characteristics such as language, learning, and socio-emotional and behavioral differences, diverse types of student performance data, curriculum goals, and the community context.
- articulate and demonstrate in practice a foundational knowledge of reading, writing, speaking, listening, and cognitive development theories and related pedagogies that are grounded in sociocultural theories of literacy and reflect an understanding of multiple literacy theory and practice.
- articulate and demonstrate disciplinary content knowledge expertise and the historical, social, economic, and political roles and implications of that disciplinary content on human development and societies.
- plan, design, implement, and evaluate formative and short- and long-term summative assessments for promoting student learning and self-assessment, identifying student needs, monitoring student progress, measuring student growth, and evaluating curriculum and student outcomes using diverse types of data.
- identify, articulate, plan, and implement a theory of collaborative practice with students, parents/guardians, school partners, and community stakeholders that recognizes student’s social, emotional, spiritual, and academic development and promotes human and environmental empathy, social justice, and democratic practices.
- articulate and demonstrate professional educator dispositions that are grounded in ethical and Vincentian tenets of human relations and that exhibit professionalism, with an emphasis on leadership, collaboration, and advocacy for students and their communities.
College Core Requirements

Dispositions

The academic programs within the College of Education have set forth these dispositions as educational and professional expectations for all students. Students should be aware that failing to abide by DePaul University or College of Education policies including, under certain circumstances, these dispositions, could result in adverse consequences for the student, including removal from his or her program, the College of Education, or the University.

The following dispositions apply to Early Childhood Education, Elementary Education, Physical Education, Secondary Education, and World Language Education majors only:

- Reflects on progress and identifies strengths and weaknesses, including evaluating strategies for success, finding alternatives for inappropriate strategies, and modifying future practices
- Is receptive to faculty feedback and acts meaningfully and professionally upon suggestions
- Values critical thinking, including engaging theoretical and philosophical frameworks and shows evidence of critical thinking through discussion and writing (e.g., journals, response to prompts)
- Understands the importance of and is committed to communicating clearly orally and in writing (both in traditional and in new and emerging digital formats)
- Values and is committed to continually developing strong content area knowledge and/or knowledge of the professional field, including pedagogical content knowledge
- Takes initiative, uses imagination and creativity, and seeks out information using a variety of human and material resources and technology to inform his or her teaching
- Is aware of the role of classroom environment and uses management procedures that reflect respect and care for learners and concern for their emotional and physical well-being
- Takes the time and effort needed to understand how students learn, including discovering their interests and experiences and determining how to shape teaching acts (using technology as appropriate) that engage learners meaningfully and actively
- Values and is committed to using assessment to evaluate and ensure the continuous intellectual, social, emotional, and physical development of the learner
- Values and is responsive to diverse learners' academic, emotional, and social needs through teaching acts (including careful instructional planning, implementation, and differentiation) and through everyday interactions with students
- Is committed to collaboration with colleagues, families, and communities in order to promote all students' learning and development
- Recognizes and fulfills professional responsibilities and habits of conduct (e.g., dress, language, preparedness, attendance, punctuality, etc.)
- Demonstrates collegiality, honesty, good judgment, courtesy, respect, and diplomacy
- Balances self-confidence and assertiveness with respect for others' perspectives
- Respects the requirements, expectations, and procedures of both the College of Education and of our field partners and appreciates the issues of trust, fairness, and professionalism involved

The following dispositions apply to Special Education majors only:

- Is receptive to faculty feedback and acts meaningfully and professionally upon suggestions
- Reflects on his or her own progress, identifies strengths and weaknesses, and evaluates strategies for success and professional growth
- Takes initiative
- Is open to new ideas and engagement in learning
- Respects diversity and cultural contexts to determine how to be responsive to learners and to proactively promote all students' learning
- Expresses positive attitudes toward individuals with disabilities and a willingness to advocate on their behalf
- Is committed to collaboration with colleagues, families, and communities in order to promote all students' learning and development
- Demonstrates professional ethical and legal behavior as defined by the respective codes of ethics and laws
- Demonstrates consistent professional behavior across all academic settings
- Maintains appropriate interpersonal and professional boundaries
- Accepts personal responsibility for one's behavior
- Expresses feelings and opinions effectively and appropriately
- Upholds confidentiality
Skill Building Courses

Before taking any math or English courses, students must take the DePaul placement tests to determine if skill level is at the college level. If placement indicates skill level in these courses, the courses become part of degree requirements. Consult with your advisor regarding placement test results and any required classes.

Advanced Standing

Students are conditionally admitted to the College of Education. There are additional requirements to reach Advanced Standing in your program in the College of Education. Requirements must be met to progress in the major and take courses in the Advanced Standing category.

Advanced Standing requirements are:

- Maintain a DePaul undergraduate 2.5 GPA
- Pass the Illinois Test of Academic Proficiency (TAP)
- Submit a petition for advanced standing form

Students should attempt to complete the Advanced Standing requirements soon after beginning the program. There is no time limit to meet these criteria; however, students will only be able to take pre-education courses until requirements have been met. Students can also take liberal studies or content area courses before or after meeting Advanced Standing requirements.

Modern Language Competence Requirement

Students pursuing a Bachelor of Arts degree in the College of Education will be required to demonstrate a measure of competence in a modern language, as defined by the college. Such competence may be demonstrated in one of several ways:

- completing two years of a language sequence in high school
- completing the last course in the first-year college sequence of any language
- completing a college course beyond the first-year level in any language
- achieving a satisfactory score on any of the Modern Language placement examinations administered at DePaul
- achieving a satisfactory rating in a proficiency examination accepted by DePaul
- achieving a score of 3 or higher on the Advance Placement (AP) test for any language
- achieving a score of 5 or higher in the Language B assessment from a Standard or Higher Level International Baccalaureate (IB) program
- achieving a satisfactory score on the CLEP examination

Please note: The Modern Language Competence Requirement is not required for students in the Early Childhood Education: SNL Joint Program (BAECE) program.

For further information regarding satisfactory scores and possible credit from the DePaul placement, AP, CLEP, or IB examinations, please contact the Office of the University Registrar.

Students who complete an Inter-College Transfer (ICT) to the College of Education will abide by the COE Modern Language Requirement in place on the effective date of the ICT.

B.A. students who meet College requirements and wish to pursue further work in the language may elect the "Modern Language Option" of the Liberal Studies Program. While B.S. students are not required to demonstrate competency in a modern language, the "Modern Language Option" is available to them for language study at any level.

Licensure Tests

All individuals licensed by the Illinois State Board of Education (ISBE) are required to complete licensure tests specific to their teaching license.

Field Experiences

Each student seeking licensure from the College of Education/Professional Education Unit must complete supervised field experiences in appropriate settings in conjunction with education courses. The field experiences must include a variety of grade levels, multicultural experiences, and a minimum of 10 hours in special education settings. All field experiences must be completed prior to final approval for student teaching. Field experience hours should be entered by the student into the FEDS system when completing courses with field experience requirements.
Endorsements

An endorsement is a statement appearing on a license that identifies the specific subjects or grade level that the license holder is authorized to teach.

The Illinois State Board of Education (ISBE) issues endorsements in various subject areas. To view the full list and requirements, visit the ISBE website.

Please note that the Illinois State Board of Education (ISBE) may change the state licensure and endorsement requirements at any time and without prior notice. Individuals are bound by the requirements in place when applying for the license or endorsement, not the requirements in place when beginning the program.

Student Teaching Requirements

Student Teaching is the culminating clinical experience in the student's program. All students in teacher preparation programs must meet the following requirements before applying for student teaching:

Academic Requirements:

- Completion of all Liberal Studies, Pre-Education, Advanced Standing and concentration/content area courses
- Overall cumulative G.P.A. of 2.50 or better
- Cumulative G.P.A. of 2.75 or better in all education courses
- Meet all other program requirements (e.g., modern language and residency requirements)
- Meet designated program standards
- Pass the required Illinois licensure content area test

Clinical Requirements:

- Completion of all required field experiences
- Three satisfactory evaluations in field experiences
- Three satisfactory faculty recommendations
- Attendance at mandatory meeting for student teaching
- Application for student teaching, resume, transcripts, and writing sample (check deadlines)
- Review and approval by Student Teaching Committee of the College of Education

Student Teaching Timeline and Deadlines:

- Attend a Mandatory Meeting approximately 1 year prior to expected quarter of student teaching.
- Submit application for student teaching after attending Mandatory Meeting, approximately 1 year prior to student teaching.
- Academic requirements are due one quarter before expected quarter of student teaching.
- Clinical requirements are completed as course requirements. Field experience hours are entered by the student as coursework is completed.

Online Faculty Evaluations are entered by the instructor of relevant courses. All data must be entered in the Field Experience Documentation System (FEDS) due one month prior to student teaching.

Individual child care agencies and public and private school districts may have additional requirements (application, training, background check, etc.).

Degree Conferral and Graduation

The awarding of a degree is not automatic. You must submit an application to be considered for the degree. DePaul awards and posts degrees at the end of each regular academic term (autumn, winter, spring, summer).

It is your responsibility to initiate the degree conferral application process by submitting an online application. Submitting an application means you intend to finish your degree requirements by the end of the term for which you have applied.

Undergraduate students must be approved for student teaching and complete student teaching and capstone to be cleared for the degree. Student must submit graduation application for the quarter that matches the quarter you are student teaching.

After you submit the application, you cannot register for any term after the one selected in the application.

To apply for degree conferral, log on to Campus Connection. Select STUDENT CENTER, then MY ACADEMICS. On screen instructions will take you through the application process.

Provided that all requirements and financial obligations are met, degrees are posted 30 days after the official end
of the term. Official dates are listed on the Academic Calendar.

DePaul holds one commencement ceremony each year in June. If you intend to participate, you must first apply for degree conferral for the current academic year and then submit a cap and gown order. Honors are not announced at the ceremony for undergraduates completing their final courses in spring quarter because a final GPA is not available at the time of the ceremony.

Additional information about degree conferral and graduation can be found on the College of Education website at: http://education.depaul.edu/.

**Licensure**

Requirements for licensure include completion of full bachelor’s degree program, all licensure tests (including OPI for world language majors), and awarding of bachelor’s degree. A bachelor's degree is required to qualify for licensure and must be awarded before applying for the license.

Individuals must submit an application directly to the Illinois State Board of Education after completion of requirements and after DePaul has submitted notification to ISBE. Application requirements include application form, application fee, official transcripts, and registration fee.

All individuals must meet ISBE requirements in place at the time of application for the license. Requirements are subject to change per the discretion of ISBE. All coursework and requirements pertaining to licensure requirements must be completed before DePaul University can recommend an individual for the license.

Individuals seeking additional endorsements after applying for the licensure must contact ISBE directly for an evaluation request.

All coursework and requirements must be completed before DePaul University can recommend an individual for the license.

---

**Liberal Studies Requirements**

Honors program requirements can be found in the individual Colleges & Schools section of the University Catalog. Select Academics, followed by Undergraduate, then Honors Program Alternative.

**First Year Program**

**Chicago Quarter**

- LSP 110 DISCOVER CHICAGO
  or LSP 111 EXPLORE CHICAGO

**Focal Point**

- LSP 112 FOCAL POINT SEMINAR

**Writing**

- WRD 103 COMPOSITION AND RHETORIC I *
- WRD 104 COMPOSITION AND RHETORIC II *

**Quantitative Reasoning & Technological Literacy**

- Not Required

**Sophomore Year**

---
Multiculturalism in the US
- LSP 200 SEMINAR ON MULTICULTURALISM IN THE UNITED STATES

Junior Year

Experiential Learning
- Met by successful completion of required field experience hours.

Senior Year

Capstone
- SEC 387 CAPSTONE SEMINAR IN SECONDARY EDUCATION *
  (Note: This must be taken with student teaching. Students must earn a C or better in this course.)

Learning Domains

Arts and Literature (AL)
- 2 Courses Required

Philosophical Inquiry (PI)
- 2 Courses Required:
  - LSE 380 PHILOSOPHICAL ISSUES IN EDUCATION AND CULTURE
  - 1 Additional Course
  (Note: PHL 100 recommended)

Scientific Inquiry (SI)
- 3 Courses Required:
  - 1 BIO course
  - 1 CHE/ENV/GEO/PHY course
  - 1 Additional Course
  (Note: One course must be a lab or SWK.)

Social, Cultural, and Behavioral Inquiry (SCBI)
- 2 Courses Required:
  - PSC 120 THE AMERICAN POLITICAL SYSTEM
  - 1 Additional Course

Religious Dimensions (RD)
- 2 Courses Required

Understanding the Past (UP)
- 2 Courses Required
  (Note: One must be US History.)

* Students must earn a C- or better in this course.

Notes

Specified required courses within Liberal Studies may have grade minimums (e.g. C- or better). Please consult your advisor or your college and major requirements.

Courses offered in the student's primary major cannot be taken to fulfill LSP Domain requirements. If students double major, LSP Domain courses may double count for both LSP credit and the second major.

In meeting learning domain requirements, no more than one course that is outside the student's major and is cross-listed with a course within the student's major, can be applied to count for LSP domain credit. This policy does not apply to those who are pursuing a double major or earning BFA or BM degrees.
Major Requirements

Course Requirements

Content Area Courses

Math Core: 28 quarter hours required, grade of C or better required

Math courses must be taken in sequence (i.e. 150 is followed by 151, 160 is followed by 161, etc.). Consult your advisor for a full list of sequences and prerequisites.

- MAT 150 CALCULUS I
  or MAT 160 CALCULUS FOR MATHEMATICS AND SCIENCE MAJORS I (5qh)
- MAT 151 CALCULUS II
  or MAT 161 CALCULUS FOR MATHEMATICS AND SCIENCE MAJORS II (5qh)
- MAT 152 CALCULUS III
  or MAT 162 CALCULUS FOR MATHEMATICS AND SCIENCE MAJORS III (5qh)
- One of the following options
  - MAT 215 INTRODUCTION TO MATHEMATICAL REASONING
  - Discrete Mathematics Sequence
    - MAT 140 DISCRETE MATHEMATICS I
    - MAT 141 DISCRETE MATHEMATICS II
  - MAT 260 MULTIVARIABLE CALCULUS I
  - MAT 261 MULTIVARIABLE CALCULUS II
  - MAT 262 LINEAR ALGEBRA

Computer Science Language: 4 quarter hours required, grade of C or better required

- IT 130 INTRODUCTORY COMPUTING FOR THE WEB
  or any CSC 200 level course

Algebra and Geometry Core: 16 quarter hours required, grade of C or better required

- MAT 310 ABSTRACT ALGEBRA I
- MAT 311 ABSTRACT ALGEBRA II
  or MAT 303 THEORY OF NUMBERS
- MAT 320 GEOMETRY I
- MAT 321 GEOMETRY II
  or MAT 335 REAL ANALYSIS I

Probability and Statistics Core: 4 quarter hours required, grade of C or better required

- MAT 348 APPLIED STATISTICAL METHODS
  or MAT 351 PROBABILITY AND STATISTICS I

History of Math Core: 4 quarter hours required, grade of C or better required

- MAT 301 HISTORY OF MATHEMATICS

Pre-Education Introductory Courses: 20 quarter hours required, grade of C or better required

- SCU 207 SOCIAL AND HISTORICAL ISSUES IN EDUCATION
- SEC 364 METHODS: CURRICULUM AND INSTRUCTION IN SECONDARY SCHOOLS
Advanced Standing Education Courses: 28 quarter hours required, grade of C or better required

- LSI 346 STRATEGIES FOR MAINSTREAMING AND INCLUSION
- SEC 325 LITERACY IN THE CONTENT AREAS
- SEC 373 TEACHING MATHEMATICS IN THE HIGH SCHOOL 1
- SEC 383 TEACHING MATHEMATICS IN THE HIGH SCHOOL 2
- SCU 351 DOING CRITICAL PRACTITIONER RESEARCH IN EDUCATION (Taken in conjunction with SEC 383)
- SEC 395 ASSESSMENT ISSUES IN SECONDARY EDUCATION
- BBE 301 TEACHING ADOLESCENT ENGLISH LANGUAGE LEARNERS AND DIALECT SPEAKERS ACROSS THE CURRICULUM

Bachelor of Science Requirements: 4 quarter hours are required

- 4 additional quarter hours in natural or computer science. Please consult your advisor for approval of appropriate natural and computer science courses.

Open Electives: 4 quarter hours are required

Open elective credit also is required to meet the minimum graduation requirement of 192 hours. The following cannot be used to fulfill an open elective: WRD 98, MAT 94, and MAT 95.

Student Teaching: 10 quarter hours required, grade of B- or better required

Registration in student teaching requires completion of all requirements and procedures listed in the college core section. EDU 95 indicates to the Illinois State Board of Education that all field experience hours are complete. All students also take SEC 387, Capstone Seminar with student teaching (listed in the Liberal Studies section).

- SEC 390 SECONDARY STUDENT TEACHING (10 credit hours)
- EDU 95 CLINICAL EXPERIENCE WITH CHILDREN AND YOUTH (non-credit, non-tuition, PA grade required)

Licensure Tests

All individuals licensed by the Illinois State Board of Education (ISBE) are required to complete licensure tests specific to their teaching license. Secondary Education Mathematics majors must complete the following tests:

- Basic Skills (test #096) or TAP (test #300, or #400) - assesses knowledge of reading comprehension, language arts, and math. Test is required to qualify for Advanced Standing.
- Mathematics Content Area Test (test #115) – assesses knowledge of both the processes and applications of mathematics. Test is required before Student Teaching (deadlines apply).
- EdTPA - assessment conducted during the student teaching experience including video clips of instruction, lesson plans, student work samples, analysis of student learning and reflective commentaries. Students will submit an electronic portfolio to an outside agency for independent evaluation and a fee will be imposed by that agency as part of the assessment.

Secondary Education Physics (BS)

The Bachelor of Science program in Secondary Education Physics prepares students to teach 6th through 12th grade in a variety of urban and suburban education settings, including public and private middle schools and high schools.
Students learn educational theories and effective teaching practices, participate in field experiences, which require observation and participation in teaching activities at multiple schools, and student teaching. Students should meet early and regularly with their advisor to design and monitor their program of study.

The program combines theoretical principles of education and field work with the student's choice of major. Students follow a general pattern of study for middle school and high school levels. In all cases, appropriate field experience plays an integral role.

In addition to completing the requirements for licensure in Illinois, and in aligning with a commitment to preparing students with a global mindset, teacher candidates will also complete the requirements to gain a certificate in Teaching and Learning from the International Baccalaureate Organization. The IB Certificate in Teaching and Learning for the Middle Years Program (MYP) and the Diploma Program (DP) provides teacher candidates the background and expertise to teach in an IB school. The IB Certificate in Teaching and Learning expands the opportunities for teacher candidates and training in IB open expands the vision of inquiry and reflective practice.

Students entering the program must be able and willing to devote themselves to a program requiring a minimum of 100 hours of daytime field experiences in schools. These school-based clinical hours are completed in conjunction with methodology courses that require students to spend a half-day each week in a school. As students will be completing requirements to earn the IB Certificate, a majority of the 100-110 hours will be completed in International Baccalaureate Schools. In addition, the student must spend a minimum of 11 weeks in full-time student teaching.

Please make sure you consult the Liberal Studies Requirements, Major Requirements, and College Core Requirements for full degree requirements.

NOTE: Secondary Education students now have the option to double major in Secondary Education and Physics. With the double major, students will graduate with a Bachelor of Science degree with a major in Secondary Education and a major in Physics. Students should declare Secondary Education as their primary major (see Secondary Education BA/BS for degree requirements) and Physics (see Physics BS for degree requirements) as their secondary major. If you have already begun the Secondary Education Physics major and want to switch to the Secondary Education Major and Physics Major double major, you should contact your academic advisor because the double major may require additional coursework. Students who pursue the Bachelor of Science degree with a major in Secondary Education Physics do not have the option to double major in Physics.

**Licensure**

Illinois Professional Educator License with endorsement in Secondary Education Science-Physics (grades 6-12), an Illinois State Board of Education (ISBE) approved program.

- identify, articulate, plan, and implement a theory of collaborative practice with students, parents/guardians, school partners, and community stakeholders that recognizes student's social, emotional, spiritual, and academic development and promotes human and environmental empathy, social justice, and democratic practices.
- articulate and demonstrate professional educator dispositions that are grounded in ethical and Vincentian tenets of human relations and that exhibit professionalism, with an emphasis on leadership, collaboration, and advocacy for students and their communities.

---

**College Core Requirements**

**Dispositions**

The academic programs within the College of Education have set forth these dispositions as educational and professional expectations for all students. Students should be aware that failing to abide by DePaul University or College of Education policies including, under certain circumstances, these dispositions, could result in adverse consequences for the student, including removal from his or her program, the College of Education, or the University.

The following dispositions apply to Early Childhood Education, Elementary Education, Physical Education, Secondary Education, and World Language Education majors only:

- Reflects on progress and identifies strengths and weaknesses, including evaluating strategies for success, finding alternatives for inappropriate strategies, and modifying future practices
- Is receptive to faculty feedback and acts meaningfully and professionally upon suggestions
- Values critical thinking, including engaging theoretical and philosophical frameworks and shows evidence of critical thinking through discussion and writing (e.g., journals, response to prompts)
- Understands the importance of and is committed to communicating clearly orally and in writing both in traditional and in new and emerging digital formats
- Values and is committed to continually developing strong content area knowledge and/or knowledge of the professional field, including pedagogical content knowledge
- Takes initiative, uses imagination and creativity, and seeks out information using a variety of human and material resources and technology to inform his or her teaching
- Is aware of the role of classroom environment and uses management procedures that reflect respect and care for learners and concern for their emotional and physical well being
- Takes the time and effort needed to understand how students learn, including discovering their interests and experiences and determining how to shape teaching acts (using technology as appropriate) that engage learners meaningfully and actively
- Values and is committed to using assessment to evaluate and ensure the continuous intellectual, social, emotional, and physical development of the learner
- Respects and considers cultural contexts in order to determine how to be responsive to learners and to proactively promote all students' learning
- Values and is responsive to diverse learners' academic, emotional, and social needs through teaching acts (including careful instructional planning, implementation, and differentiation) and through everyday interactions with students
- Is committed to collaboration with colleagues, families, and communities in order to promote all students' learning and development
- Recognizes and fulfills professional responsibilities and habits of conduct (e.g., dress, language, preparedness, attendance, punctuality, etc.)
Demonstrates collegiality, honesty, good judgment, courtesy, respect, and diplomacy
Balances self-confidence and assertiveness with respect for others' perspectives
Respects the requirements, expectations, and procedures of both the College of Education and of our field partners and appreciates the issues of trust, fairness, and professionalism involved

The following dispositions apply to Special Education majors only:

- Is receptive to faculty feedback and acts meaningfully and professionally upon suggestions
- Reflects on his or her own progress, identifies strengths and weaknesses, and evaluates strategies for success and professional growth
- Takes initiative
- Is open to new ideas and engagement in learning
- Respects diversity and cultural contexts to determine how to be responsive to learners and to proactively promote all students' learning
- Expresses positive attitudes toward individuals with disabilities and a willingness to advocate on their behalf
- Is committed to collaboration with colleagues, families, and communities in order to promote all students' learning and development
- Demonstrates professional ethical and legal behavior as defined by the respective codes of ethics and laws
- Demonstrates consistent professional behavior across all academic settings
- Maintains appropriate interpersonal and professional boundaries
- Accepts personal responsibility for one's behavior
- Expresses feelings and opinions effectively and appropriately
- Upholds confidentiality

Skill Building Courses

Before taking any math or English courses, students must take the DePaul placement tests to determine if skill level is at the college level. If placement indicates skill level in these courses, the courses become part of degree requirements. Consult with your advisor regarding placement test results and any required classes.

Advanced Standing

Students are conditionally admitted to the College of Education. There are additional requirements to reach Advanced Standing in your program in the College of Education. Requirements must be met to progress in the major and take courses in the Advanced Standing category.

Advanced Standing requirements are:

- Maintain a DePaul undergraduate 2.5 GPA
- Pass the Illinois Test of Academic Proficiency (TAP)
- Submit a petition for advanced standing form

Students should attempt to complete the Advanced Standing requirements soon after beginning the program. There is no time limit to meet these criteria; however, students will only be able to take pre-education courses until requirements have been met. Students can also take liberal studies or content area courses before or after meeting Advanced Standing requirements.

Modern Language Competence Requirement

Students pursuing a Bachelor of Arts degree in the College of Education will be required to demonstrate a measure of competence in a modern language, as defined by the college. Such competence may be demonstrated in one of several ways:

- completing two years of a language sequence in high school
- completing the last course in the first-year college sequence of any language
- completing a college course beyond the first-year level in any language
- achieving a satisfactory score on any of the Modern Language placement examinations administered at DePaul
- achieving a satisfactory rating in a proficiency examination accepted by DePaul
- achieving a score of 3 or higher on the Advance Placement (AP) test for any language
- achieving a score of 5 or higher in the Language B assessment from a Standard or Higher Level International Baccalaureate (IB) program
- achieving a satisfactory score on the CLEP examination

Please note: The Modern Language Competence Requirement is not required for students in the Early Childhood Education: SNL Joint Program (BAECE) program.

For further information regarding satisfactory scores and possible credit from the DePaul placement, AP, CLEP, or IB examinations, please contact the Office of the University Registrar.
Students who complete an Inter-College Transfer (ICT) to the College of Education will abide by the COE Modern Language Requirement in place on the effective date of the ICT.

B.A. students who meet College requirements and wish to pursue further work in the language may elect the “Modern Language Option” of the Liberal Studies Program. While B.S. students are not required to demonstrate competency in a modern language, the “Modern Language Option” is available to them for language study at any level.

**Licensure Tests**

All individuals licensed by the Illinois State Board of Education (ISBE) are required to complete licensure tests specific to their teaching license.

**Field Experiences**

Each student seeking licensure from the College of Education/Professional Education Unit must complete supervised field experiences in appropriate settings in conjunction with education courses. The field experiences must include a variety of grade levels, multicultural experiences, and a minimum of 10 hours in special education settings. All field experiences must be completed prior to final approval for student teaching. Field experience hours should be entered by the student into the FEDS system when completing courses with field experience requirements.

**Endorsements**

An endorsement is a statement appearing on a license that identifies the specific subjects or grade level that the license holder is authorized to teach.

The Illinois State Board of Education (ISBE) issues endorsements in various subject areas. To view the full list and requirements, visit the ISBE website.

Please note that the Illinois State Board of Education (ISBE) may change the state licensure and endorsement requirements at any time and without prior notice. Individuals are bound by the requirements in place when applying for the license or endorsement, not the requirements in place when beginning the program.

**Student Teaching Requirements**

Student Teaching is the culminating clinical experience in the student's program. All students in teacher preparation programs must meet the following requirements before applying for student teaching:

**Academic Requirements:**

- Completion of all Liberal Studies, Pre-Education, Advanced Standing and concentration/content area courses
- Overall cumulative G.P.A. of 2.50 or better
- Cumulative GPA of 2.75 or better in all education courses
- Meet all other program requirements (e.g., modern language and residency requirements)
- Meet designated program standards
- Pass the required Illinois licensure content area test

**Clinical Requirements:**

- Completion of all required field experiences
- Three satisfactory evaluations in field experiences
- Three satisfactory faculty recommendations
- Attendance at mandatory meeting for student teaching
- Application for student teaching, resume, transcripts, and writing sample (check deadlines)
- Review and approval by Student Teaching Committee of the College of Education

**Student Teaching Timeline and Deadlines:**

- Attend a Mandatory Meeting approximately 1 year prior to expected quarter of student teaching.
- Submit application for student teaching after attending Mandatory Meeting, approximately 1 year prior to student teaching.
- Academic requirements are due one quarter before expected quarter of student teaching.
- Clinical requirements are completed as course requirements. Field experience hours are entered by the student as coursework is completed.

Online Faculty Evaluations are entered by the instructor of relevant courses. All data must be entered in the Field Experience Documentation System (FEDS) due one month prior to student teaching.
Individual child care agencies and public and private school districts may have additional requirements (application, training, background check, etc.).

**Degree Conferral and Graduation**

The awarding of a degree is not automatic. You must submit an application to be considered for the degree. DePaul awards and posts degrees at the end of each regular academic term (autumn, winter, spring, summer).

It is your responsibility to initiate the degree conferral application process by submitting an online application. Submitting an application means you intend to finish your degree requirements by the end of the term for which you have applied.

Undergraduate students must be approved for student teaching and complete student teaching and capstone to be cleared for the degree. Student must submit graduation application for the quarter that matches the quarter you are student teaching.

After you submit the application, you cannot register for any term after the one selected in the application.

To apply for degree conferral, log on to Campus Connection. Select STUDENT CENTER, then MY ACADEMICS. On screen instructions will take you through the application process.

Provided that all requirements and financial obligations are met, degrees are posted 30 days after the official end of the term. Official dates are listed on the Academic Calendar.

DePaul holds one commencement ceremony each year in June. If you intend to participate, you must first apply for degree conferral for the current academic year and then submit a cap and gown order. Honors are not announced at the ceremony for undergraduates completing their final courses in spring quarter because a final GPA is not available at the time of the ceremony.

Additional information about degree conferral and graduation can be found on the College of Education website at: http://education.depaul.edu/.

**Licensure**

Requirements for licensure include completion of full bachelor’s degree program, all licensure tests (including OPI for world language majors), and awarding of bachelor’s degree. A bachelor’s degree is required to qualify for licensure and must be awarded before applying for the license.

Individuals must submit an application directly to the Illinois State Board of Education after completion of requirements and after DePaul has submitted notification to ISBE. Application requirements include application form, application fee, official transcripts, and registration fee.

All individuals must meet ISBE requirements in place at the time of application for the license. Requirements are subject to change per the discretion of ISBE. All coursework and requirements pertaining to licensure requirements must be completed before DePaul University can recommend an individual for the license.

Individuals seeking additional endorsements after applying for the licensure must contact ISBE directly for an evaluation request.

All coursework and requirements must be completed before DePaul University can recommend an individual for the license.

**Liberal Studies Requirements**

Honors program requirements can be found in the individual Colleges & Schools section of the University Catalog. Select Academics, followed by Undergraduate, then Honors Program Alternative.
First Year Program

Chicago Quarter

- LSP 110 DISCOVER CHICAGO
  or LSP 111 EXPLORE CHICAGO

Focal Point

- WRD 104 COMPOSITION AND RHETORIC II *

Quantitative Reasoning & Technological Literacy

- Not Required

Sophomore Year

Multiculturalism in the US

- LSP 200 SEMINAR ON MULTICULTURALISM IN THE UNITED STATES

Junior Year

Experiential Learning

- Met by successful completion of required field experience hours.

Senior Year

Capstone

- SEC 387 CAPSTONE SEMINAR IN SECONDARY EDUCATION *
  (Note: This must be taken with student teaching.)

Learning Domains

Arts and Literature (AL)

- 3 Courses Required

Philosophical Inquiry (PI)

- 2 Courses Required:
  - LSE 380 PHILOSOPHICAL ISSUES IN EDUCATION AND CULTURE
  - 1 Additional Course
    (Note: PHL 100 recommended)

Scientific Inquiry (SI)

- 1 SWK Course Required
  (Note: This must be a BIO course.)

Social, Cultural, and Behavioral Inquiry (SCBI)

- 3 Courses Required:
  - PSC 120 THE AMERICAN POLITICAL SYSTEM
  - 2 Additional Courses

Religious Dimensions (RD)
2 Courses Required

Understanding the Past (UP)

2 Courses Required
(Note: One must be US History.)

* Students must earn a C- or better in this course.

Notes

Specified required courses within Liberal Studies may have grade minimums (e.g. C- or better). Please consult your advisor or your college and major requirements.

Courses offered in the student's primary major cannot be taken to fulfill LSP Domain requirements. If students double major, LSP Domain courses may double count for both LSP credit and the second major.

In meeting learning domain requirements, no more than one course that is outside the student's major and is cross-listed with a course within the student's major, can be applied to count for LSP domain credit. This policy does not apply to those who are pursuing a double major or earning BFA or BM degrees.

Major Requirements

Course Requirements

Content Area Courses

Physics Core: 28 quarter hours required, grade of C or better required

- PHY 170 UNIVERSITY PHYSICS I
- PHY 171 UNIVERSITY PHYSICS II
- PHY 172 UNIVERSITY PHYSICS III
- PHY 270 UNIVERSITY PHYSICS IV
- PHY 300 METHODS OF COMPUTATIONAL AND THEORETICAL PHYSICS I
- PHY 301 METHODS OF COMPUTATIONAL AND THEORETICAL PHYSICS II
- PHY 310 MECHANICS I

Physics Electives: 16 quarter hours required, grade of C or better required

Physics Electives should be chosen in consultation with the Physics faculty content advisor.

- PHY elective course 1
- PHY elective course 2
- PHY elective course 3
- PHY elective course 4

Math Core: 20 quarter hours required, grade of C or better required

- MAT 160 CALCULUS FOR MATHEMATICS AND SCIENCE MAJORS I (5qh)
- MAT 161 CALCULUS FOR MATHEMATICS AND SCIENCE MAJORS II (5qh)
- MAT 162 CALCULUS FOR MATHEMATICS AND SCIENCE MAJORS III (5qh)
- MAT 260 MULTIVARIABLE CALCULUS I
- MAT 261 MULTIVARIABLE CALCULUS II

Chemistry Core: 12 quarter hours required, grade of C or better required

- CHE 130 GENERAL CHEMISTRY I (3qh) and CHE 131 GENERAL CHEMISTRY I LABORATORY (1qh)
CHE 132 GENERAL CHEMISTRY II (3qh) and CHE 133 GENERAL CHEMISTRY LABORATORY II (1qh)
CHE 134 GENERAL CHEMISTRY III (3qh) and CHE 135 GENERAL CHEMISTRY LABORATORY III (1qh)

Pre-Education Introductory Courses: 20 quarter hours required, grade of C or better required

- SCU 207 SOCIAL AND HISTORICAL ISSUES IN EDUCATION
- SEC 364 METHODS: CURRICULUM AND INSTRUCTION IN SECONDARY SCHOOLS
- SEC 314 THE NATURE OF SCIENCE
- SEC 324 INQUIRY & APPLICATION IN DEVELOPING SECONDARY SCIENCE PEDAGOGY
- SCU 336 ADOLESCENT AND ADULT GROWTH AND DEVELOPMENT
  or SCU 337 HUMAN GROWTH AND DEVELOPMENT

Advanced Standing Education Courses: 28 quarter hours required, grade of C or better required

- LSI 346 STRATEGIES FOR MAINSTREAMING AND INCLUSION
- SEC 325 LITERACY IN THE CONTENT AREAS
- SEC 374 TEACHING THE SCIENCES IN THE HIGH SCHOOL 1
- SEC 385 TEACHING THE SCIENCES IN THE HIGH SCHOOL 2
- SCU 351 DOING CRITICAL PRACTITIONER RESEARCH IN EDUCATION  (Taken in conjunction with SEC 385)
- SEC 395 ASSESSMENT ISSUES IN SECONDARY EDUCATION
- BBE 301 TEACHING ADOLESCENT ENGLISH LANGUAGE LEARNERS AND DIALECT SPEAKERS ACROSS THE CURRICULUM

Student Teaching: 10 quarter hours required, grade of B- or better required

Registration in student teaching requires completion of all requirements and procedures indicated in the college core section. EDU 95 indicates to the Illinois State Board of Education that all field experience hours are complete. All students also take SEC 387, Capstone Seminar with student teaching (listed in the Liberal Studies section).

- SEC 390 SECONDARY STUDENT TEACHING (10 credit hours)
- EDU 95 CLINICAL EXPERIENCE WITH CHILDREN AND YOUTH (non-credit, non-tuition, PA grade required)

Licensure Tests

All individuals licensed by the Illinois State Board of Education (ISBE) are required to complete licensure tests specific to their teaching license. Secondary Education Physics majors must complete the following tests:

- Test of Academic Proficiency (TAP) (test #400) - assesses knowledge of reading comprehension, language arts, writing, and math. Test is required to qualify for Advanced Standing. *Check with your advisor about qualifying for a waiver with acceptable ACT or SAT test scores.
- Science: Physics Content Area Test (test #116) – assesses knowledge of both life and physical science, including Earth systems, technology, and the universe. Test is required before Student Teaching (deadlines apply).
- EdTPA - assessment conducted during the student teaching experience including video clips of instruction, lesson plans, student work samples, analysis of student learning and reflective commentaries. Students will submit an electronic portfolio to an outside agency for independent evaluation and a fee will be imposed by that agency as part of the assessment.

Secondary Education Social Science (BA)

The Bachelor of Arts program in Secondary Education Social Science prepares students to teach 6th through 12th grade in a variety of urban and suburban education settings, including public and private middle schools and high schools.
Students learn educational theories and effective teaching practices, participate in field experiences, which require observation and participation in teaching activities at multiple schools, and student teaching. Students should meet early and regularly with their advisor to design and monitor their program of study.

The program combines theoretical principles of education and field work with the student's choice of major. Students follow a general pattern of study for middle school and high school levels. In all cases, appropriate field experience plays an integral role.

In addition to completing the requirements for licensure in Illinois, and in aligning with a commitment to preparing students with a global mindset, teacher candidates will also complete the requirements to gain a certificate in Teaching and Learning from the International Baccalaureate Organization. The IB Certificate in Teaching and Learning for the Middle Years Program (MYP) and the Diploma Program (DP) provides teacher candidates the background and expertise to teach in an IB school. The IB Certificate in Teaching and Learning expands the opportunities for teacher candidates and training in IB open expands the vision of inquiry and reflective practice.

Students entering the program must be able and willing to devote themselves to a program requiring a minimum of 100 hours of daytime field experiences in schools. These school-based clinical hours are completed in conjunction with methodology courses that require students to spend a half-day each week in a school. As students will be completing requirements to earn the IB Certificate, a majority of the 100-110 hours will be completed in International Baccalaureate Schools. In addition, the student must spend a minimum of 11 weeks in full-time student teaching.

Please make sure you consult the Liberal Studies Requirements, Major Requirements, and College Core Requirements for full degree requirements.

**Licensure**

Illinois Professional Educator License with an endorsement in Secondary Education Social Science-History (grades 6-12), an Illinois State Board of Education (ISBE) approved program.

**Learning Outcomes**

Students will be able to:

- articulate and communicate orally and in writing, as well as demonstrate in practice, a personal philosophy of teaching grounded in adolescent development and learning theories, global perspectives, pedagogical content knowledge research, and DePaul's Vincentian Mission and the COE's Conceptual Framework.
- define, create, and evaluate a safe, healthy, creative, and rigorous learning environment that facilitates cultural and linguistic responsiveness, emotional well-being, self-efficacy, positive social interaction and collaboration, and mutual respect and empathy, and encourages active engagement, academic risk-taking, divergent and creative thinking, self-motivation, and personal and whole-class goal-setting.
- identify, justify, implement, and evaluate differentiated instructional strategies that support rigorous critical, creative, and exploratory thinking and metacognitive awareness, and problem-solving, collaboration, and academic, social, and emotional development of all students.
- articulate, analyze, and theorize an understanding of adolescent development within historical scholarly traditions that recognizes the complex roles that linguistic (including English learning and nonmainstream English dialects), social, economic, cultural, academic, spiritual, and personal experiences both inside and outside of school have on classroom instruction and adolescent development and learning.
- plan, design, implement, and evaluate curricula and instructional practices based on disciplinary content knowledge, pedagogical content knowledge, multiple literacies, diverse student characteristics such as language, learning, and socio-emotional and behavioral differences, diverse types of student performance data, curriculum goals, and the community context.
- articulate and demonstrate in practice a foundational knowledge of reading, writing, speaking, listening, and cognitive development theories and related pedagogies that are grounded in sociocultural theories of literacy and reflect an understanding of multiple literacy theory and practice.
- articulate and demonstrate disciplinary content knowledge expertise and the historical, social, economic,
and political roles and implications of that disciplinary content on human development and societies.

- plan, design, implement, and evaluate formative and short- and long-term summative assessments for promoting student learning and self-assessment, identifying student needs, monitoring student progress, measuring student growth, and evaluating curriculum and student outcomes using diverse types of data.
- identify, articulate, plan, and implement a theory of collaborative practice with students, parents/guardians, school partners, and community stakeholders that recognizes student's social, emotional, spiritual, and academic development and promotes human and environmental empathy, social justice, and democratic practices.
- articulate and demonstrate professional educator dispositions that are grounded in ethical and Vincentian tenets of human relations and that exhibit professionalism, with an emphasis on leadership, collaboration, and advocacy for students and their communities.

College Core Requirements

Dispositions

The academic programs within the College of Education have set forth these dispositions as educational and professional expectations for all students. Students should be aware that failing to abide by DePaul University or College of Education policies including, under certain circumstances, these dispositions, could result in adverse consequences for the student, including removal from his or her program, the College of Education, or the University.

The following dispositions apply to Early Childhood Education, Elementary Education, Physical Education, Secondary Education, and World Language Education majors only:

- Reflects on progress and identifies strengths and weaknesses, including evaluating strategies for success, finding alternatives for inappropriate strategies, and modifying future practices
- Is receptive to faculty feedback and acts meaningfully and professionally upon suggestions
- Values critical thinking, including engaging theoretical and philosophical frameworks and shows evidence of critical thinking through discussion and writing (e.g., journals, response to prompts)
- Understands the importance of and is committed to communicating clearly orally and in writing both in traditional and in new and emerging digital formats
- Values and is committed to continually developing strong content area knowledge and/or knowledge of the professional field, including pedagogical content knowledge
- Takes initiative, uses imagination and creativity, and seeks out information using a variety of human and material resources and technology to inform his or her teaching
- Is aware of the role of classroom environment and uses management procedures that reflect respect and care for learners and concern for their emotional and physical well being
- Takes the time and effort needed to understand how students learn, including discovering their interests and experiences and determining how to shape teaching acts (using technology as appropriate) that engage learners meaningfully and actively
- Values and is committed to using assessment to evaluate and ensure the continuous intellectual, social, emotional, and physical development of the learner
- Respects and considers cultural contexts in order to determine how to be responsive to learners and to proactively promote all students' learning
- Values and is responsive to diverse learners' academic, emotional, and social needs through teaching acts (including careful instructional planning, implementation, and differentiation) and through everyday interactions with students
- Is committed to collaboration with colleagues, families, and communities in order to promote all students' learning and development
- Recognizes and fulfills professional responsibilities and habits of conduct (e.g., dress, language, preparedness, attendance, punctuality, etc.)
- Demonstrates collegiality, honesty, good judgment, courtesy, respect, and diplomacy
- Balances self-confidence and assertiveness with respect for others' perspectives
- Respects the requirements, expectations, and procedures of both the College of Education and of our field partners and appreciates the issues of trust, fairness, and professionalism involved

The following dispositions apply to Special Education majors only:

- Is receptive to faculty feedback and acts meaningfully and professionally upon suggestions
- Reflects on his or her own progress, identifies strengths and weaknesses, and evaluates strategies for success and professional growth
• Takes initiative
• Is open to new ideas and engagement in learning
• Respects diversity and cultural contexts to determine how to be responsive to learners and to proactively promote all students' learning
• Expresses positive attitudes toward individuals with disabilities and a willingness to advocate on their behalf
• Is committed to collaboration with colleagues, families, and communities in order to promote all students' learning and development
• Demonstrates professional ethical and legal behavior as defined by the respective codes of ethics and laws
• Demonstrates consistent professional behavior across all academic settings
• Maintains appropriate interpersonal and professional boundaries
• Accepts personal responsibility for one's behavior
• Expresses feelings and opinions effectively and appropriately
• Upholds confidentiality

Skill Building Courses

Before taking any math or English courses, students must take the DePaul placement tests to determine if skill level is at the college level. If placement indicates skill level in these courses, the courses become part of degree requirements. Consult with your advisor regarding placement test results and any required classes.

Advanced Standing

Students are conditionally admitted to the College of Education. There are additional requirements to reach Advanced Standing in your program in the College of Education. Requirements must be met to progress in the major and take courses in the Advanced Standing category.

Advanced Standing requirements are:

• Maintain a DePaul undergraduate 2.5 GPA
• Pass the Illinois Test of Academic Proficiency (TAP)
• Submit a petition for advanced standing form

Students should attempt to complete the Advanced Standing requirements soon after beginning the program. There is no time limit to meet these criteria; however, students will only be able to take pre-education courses until requirements have been met. Students can also take liberal studies or content area courses before or after meeting Advanced Standing requirements.

Modern Language Competence Requirement

Students pursuing a Bachelor of Arts degree in the College of Education will be required to demonstrate a measure of competence in a modern language, as defined by the college. Such competence may be demonstrated in one of several ways:

• completing two years of a language sequence in high school
• completing the last course in the first-year college sequence of any language
• completing a college course beyond the first-year level in any language
• achieving a satisfactory score on any of the Modern Language placement examinations administered at DePaul
• achieving a satisfactory rating in a proficiency examination accepted by DePaul
• achieving a score of 3 or higher on the Advance Placement (AP) test for any language
• achieving a score of 5 or higher in the Language B assessment from a Standard or Higher Level International Baccalaureate (IB) program
• achieving a satisfactory score on the CLEP examination

Please note: The Modern Language Competence Requirement is not required for students in the Early Childhood Education: SNL Joint Program (BAECE) program.

For further information regarding satisfactory scores and possible credit from the DePaul placement, AP, CLEP, or IB examinations, please contact the Office of the University Registrar.

Students who complete an Inter-College Transfer (ICT) to the College of Education will abide by the COE Modern Language Requirement in place on the effective date of the ICT.

B.A. students who meet College requirements and wish to pursue further work in the language may elect the "Modern Language Option" of the Liberal Studies Program. While B.S. students are not required to demonstrate competency in a modern language, the "Modern Language Option" is available to them for language study at any level.

Licensure Tests
All individuals licensed by the Illinois State Board of Education (ISBE) are required to complete licensure tests specific to their teaching license.

**Field Experiences**

Each student seeking licensure from the College of Education/Professional Education Unit must complete supervised field experiences in appropriate settings in conjunction with education courses. The field experiences must include a variety of grade levels, multicultural experiences, and a minimum of 10 hours in special education settings. All field experiences must be completed prior to final approval for student teaching. Field experience hours should be entered by the student into the FEDS system when completing courses with field experience requirements.

**Endorsements**

An endorsement is a statement appearing on a license that identifies the specific subjects or grade level that the license holder is authorized to teach.

The Illinois State Board of Education (ISBE) issues endorsements in various subject areas. To view the full list and requirements, visit the ISBE website.

Please note that the Illinois State Board of Education (ISBE) may change the state licensure and endorsement requirements at any time and without prior notice. Individuals are bound by the requirements in place when applying for the license or endorsement, not the requirements in place when beginning the program.

**Student Teaching Requirements**

Student Teaching is the culminating clinical experience in the student's program. All students in teacher preparation programs must meet the following requirements before applying for student teaching:

**Academic Requirements:**
- Completion of all Liberal Studies, Pre-Education, Advanced Standing and concentration/content area courses
- Overall cumulative G.P.A. of 2.50 or better
- Cumulative GPA. of 2.75 or better in all education courses
- Meet all other program requirements (e.g., modern language and residency requirements)
- Meet designated program standards
- Pass the required Illinois licensure content area test

**Clinical Requirements:**
- Completion of all required field experiences
- Three satisfactory evaluations in field experiences
- Three satisfactory faculty recommendations
- Attendance at mandatory meeting for student teaching
- Application for student teaching, resume, transcripts, and writing sample (check deadlines)
- Review and approval by Student Teaching Committee of the College of Education

**Student Teaching Timeline and Deadlines:**
- Attend a Mandatory Meeting approximately 1 year prior to expected quarter of student teaching.
- Submit application for student teaching after attending Mandatory Meeting, approximately 1 year prior to student teaching.
- Academic requirements are due one quarter before expected quarter of student teaching.
- Clinical requirements are completed as course requirements. Field experience hours are entered by the student as coursework is completed.

Online Faculty Evaluations are entered by the instructor of relevant courses. All data must be entered in the Field Experience Documentation System (FEDS) due one month prior to student teaching.

Individual child care agencies and public and private school districts may have additional requirements (application, training, background check, etc.).

**Degree Conferral and Graduation**

The awarding of a degree is not automatic. You must submit an application to be considered for the degree. DePaul awards and posts degrees at the end of each regular academic term (autumn, winter, spring, summer).

It is your responsibility to initiate the degree conferral application process by submitting an online application.
Submitting an application means you intend to finish your degree requirements by the end of the term for which you have applied.

Undergraduate students must be approved for student teaching and complete student teaching and capstone to be cleared for the degree. Student must submit graduation application for the quarter that matches the quarter you are student teaching.

After you submit the application, you cannot register for any term after the one selected in the application.

To apply for degree conferral, log on to Campus Connection. Select STUDENT CENTER, then MY ACADEMICS. On screen instructions will take you through the application process.

Provided that all requirements and financial obligations are met, degrees are posted 30 days after the official end of the term. Official dates are listed on the Academic Calendar.

DePaul holds one commencement ceremony each year in June. If you intend to participate, you must first apply for degree conferral for the current academic year and then submit a cap and gown order. Honors are not announced at the ceremony for undergraduates completing their final courses in spring quarter because a final GPA is not available at the time of the ceremony.

Additional information about degree conferral and graduation can be found on the College of Education website at: http://education.depaul.edu/.

**Licensure**

Requirements for licensure include completion of full bachelor's degree program, all licensure tests (including OPI for world language majors), and awarding of bachelor's degree. A bachelor's degree is required to qualify for licensure and must be awarded before applying for the license.

Individuals must submit an application directly to the Illinois State Board of Education after completion of requirements and after DePaul has submitted notification to ISBE. Application requirements include application form, application fee, official transcripts, and registration fee.

All individuals must meet ISBE requirements in place at the time of application for the license. Requirements are subject to change per the discretion of ISBE. All coursework and requirements pertaining to licensure requirements must be completed before DePaul University can recommend an individual for the license.

Individuals seeking additional endorsements after applying for the licensure must contact ISBE directly for an evaluation request.

All coursework and requirements must be completed before DePaul University can recommend an individual for the license.

**Liberal Studies Requirements**

Honors program requirements can be found in the individual Colleges & Schools section of the University Catalog. Select Academics, followed by Undergraduate, then Honors Program Alternative.

**First Year Program**

**Chicago Quarter**

- LSP 110 DISCOVER CHICAGO
  or LSP 111 EXPLORE CHICAGO

**Focal Point**
Writing

- WRD 103 COMPOSITION AND RHETORIC I *
- WRD 104 COMPOSITION AND RHETORIC II *

Quantitative Reasoning & Technological Literacy

- LSP 120 QUANTITATIVE REASONING & TECHNOLOGICAL LITERACY I
- LSP 121 QUANTITATIVE REASONING AND TECHNOLOGICAL LITERACY II
  (Note: See information below.)

Sophomore Year

Multiculturalism in the US

- LSP 200 SEMINAR ON MULTICULTURALISM IN THE UNITED STATES

Junior Year

Experiential Learning

- Met by successful completion of required field experience hours.

Senior Year

Capstone

- SEC 387 CAPSTONE SEMINAR IN SECONDARY EDUCATION *
  (Note: This must be taken with student teaching. Students must earn a C or better in this course.)

Learning Domains

Arts and Literature (AL)

- 3 Courses Required

Philosophical Inquiry (PI)

- 2 Courses Required:
  - LSE 380 PHILOSOPHICAL ISSUES IN EDUCATION AND CULTURE
  - 1 Additional Course
    (Note: PHL 100 recommended)

Scientific Inquiry (SI)

- 3 Courses Required:
  - 1 BIO course
  - 1 CHE/ENV/GEO/PHY course
  - 1 Additional Course
    (Note: 1 course must be a Lab or SWK.)

Social, Cultural, and Behavioral Inquiry (SCBI)

- 2 Courses Required:
  - PSC 120 THE AMERICAN POLITICAL SYSTEM
  - 1 Additional course
    (Note: An ECO course recommended)

Religious Dimensions (RD)

- 2 Courses Required

Understanding the Past (UP)
1 Course Required  
(Note: Must be in US History)

* Students must earn a C- or better in this course.

Notes

Specified required courses within Liberal Studies may have grade minimums (e.g. C- or better). Please consult your advisor or your college and major requirements.

Courses offered in the student's primary major cannot be taken to fulfill LSP Domain requirements. If students double major, LSP Domain courses may double count for both LSP credit and the second major.

In meeting learning domain requirements, no more than one course that is outside the student’s major and is cross-listed with a course within the student’s major, can be applied to count for LSP domain credit. This policy does not apply to those who are pursuing a double major or earning BFA or BM degrees.

Quantitative Reasoning and Technological Literacy

Readiness for LSP 120 is determined by the math placement test taken online after admission. Students may need to take developmental coursework prior to LSP 120. The LSP 120 requirement may be waived by credit already earned for advanced math coursework or by passing a dedicated proficiency exam. Students who complete both LSP 120 and LSP 121 take one less Learning Domain course. Students may not apply the course reduction to any Domain where only one course is required, and if taken within the SI Domain, the reduction cannot be applied to the SI Lab or SWK requirement.

Major Requirements

Course Requirements

Content Area Courses

Note: HST 298 is a prerequisite for all 300 level history courses.

United States History Courses: 16 quarter hours required, grade of C or better required

- HST 181 UNITED STATES TO 1800
- HST 182 UNITED STATES, 1800-1900
- HST US History elective 1
- HST US History elective 2

World History Course: 16 quarter hours required, grade of C or better required

World history electives can be chosen from any non-US history area

- HST 111 THE WORLD TO C.1500
- HST 112 THE WORLD, C.1500-1914
- HST World History elective 1
- HST World History elective 2

Secondary Field: 24 quarter hours required, grade of C or better required

Choose six courses from Anthropology, Economics, Geography, Political Science, Psychology or Sociology. All courses must be from a single field.

- ANT, ECO, GEO, PSC, PSY, or SOC elective 1
- ANT, ECO, GEO, PSC, PSY, or SOC elective 2
- ANT, ECO, GEO, PSC, PSY, or SOC elective 3
Pre-Education Introductory Courses: 20 quarter hours required, grade of C or better required

- SCU 207 SOCIAL AND HISTORICAL ISSUES IN EDUCATION
- SEC 364 METHODS: CURRICULUM AND INSTRUCTION IN SECONDARY SCHOOLS
- SEC 312 THE NATURE OF HISTORY AND THE SOCIAL SCIENCES
- SEC 322 INQUIRY & APPLICATION IN DEVELOPING SECONDARY HISTORY AND SOCIAL SCIENCES PEDAGOGY
- SCU 336 ADOLESCENT AND ADULT GROWTH AND DEVELOPMENT
  or SCU 337 HUMAN GROWTH AND DEVELOPMENT

Advanced Standing Education Courses: 28 quarter hours required, grade of C or better required

- LSI 346 STRATEGIES FOR MAINSTREAMING AND INCLUSION
- SEC 325 LITERACY IN THE CONTENT AREAS
- SEC 372 TEACHING HISTORY AND THE SOCIAL SCIENCES IN THE HIGH SCHOOL 1
- SEC 382 TEACHING HISTORY AND THE SOCIAL SCIENCES IN THE HIGH SCHOOL 2
- SCU 351 DOING CRITICAL PRACTITIONER RESEARCH IN EDUCATION (Taken in conjunction with SEC 382)
- SEC 395 ASSESSMENT ISSUES IN SECONDARY EDUCATION
- BBE 301 TEACHING ADOLESCENT ENGLISH LANGUAGE LEARNERS AND DIALECT SPEAKERS ACROSS THE CURRICULUM

Student Teaching: 10 quarter hours required, grade of B- or better required

Registration in student teaching requires completion of all requirements and procedures indicated in the college core section. EDU 95 indicates to the Illinois State Board of Education that all field experience hours are complete. All students also take SEC 387, Capstone Seminar with student teaching (listed in the Liberal Studies section).

- SEC 390 SECONDARY STUDENT TEACHING (10 credit hours)
- EDU 95 CLINICAL EXPERIENCE WITH CHILDREN AND YOUTH (non-credit, non-tuition, PA grade required)

Licensure Tests

All individuals licensed by the Illinois State Board of Education (ISBE) are required to complete licensure tests specific to their teaching license. Secondary Education Social Science majors must complete the following tests:

- Test of Academic Proficiency (TAP) (test #400) - assesses knowledge of reading comprehension, language arts, writing, and math. Test is required to qualify for Advanced Standing. *Check with your advisor about qualifying for a waiver with acceptable ACT or SAT test scores.
- Social Science: History Content Area Test (test #114) – assesses and measures the candidate's core knowledge across history and social science fields. Test is required before Student Teaching (deadlines apply).
- EdTPA - assessment conducted during the student teaching experience including video clips of instruction, lesson plans, student work samples, analysis of student learning and reflective commentaries. Students will submit an electronic portfolio to an outside agency for independent evaluation and a fee will be imposed by that agency as part of the assessment.

Secondary Education Visual Art (BA)

The Bachelor of Arts program in Secondary Education Visual Art prepares students to teach 6th through 12th grade in a variety of urban and suburban education settings, including public and private middle schools and high schools.
Students learn educational theories and effective teaching practices, participate in field experiences, which require observation and participation in teaching activities at multiple schools, and student teaching. Students should meet early and regularly with their advisor to design and monitor their program of study.

The program combines theoretical principles of education and field work with the student's choice of major. Students follow a general pattern of study for middle school and high school levels. In all cases, appropriate field experience plays an integral role.

In addition to completing the requirements for licensure in Illinois, and in aligning with a commitment to preparing students with a global mindset, teacher candidates will also complete the requirements to gain a certificate in Teaching and Learning from the International Baccalaureate Organization. The IB Certificate in Teaching and Learning for the Middle Years Program (MYP) and the Diploma Program (DP) provides teacher candidates the background and expertise to teach in an IB school. The IB Certificate in Teaching and Learning expands the opportunities for teacher candidates and training in IB open expands the vision of inquiry and reflective practice.

Students entering the program must be able and willing to devote themselves to a program requiring a minimum of 100 hours of daytime field experiences in schools. These school-based clinical hours are completed in conjunction with methodology courses that require students to spend a half-day each week in a school. As students will be completing requirements to earn the IB Certificate, a majority of the 100-110 hours will be completed in International Baccalaureate Schools. In addition, the student must spend a minimum of 11 weeks in full-time student teaching.

Please make sure you consult the Liberal Studies Requirements, Major Requirements, and College Core Requirements for full degree requirements.

NOTE: Secondary Education students now have the option to double major in Secondary Education and Art, Media, and Design. With the double major, students will graduate with a Bachelor of Arts degree with a major in Secondary Education and a major in Art, Media, and Design. Students should declare Secondary Education as their primary major (see Secondary Education BA/BS for degree requirements) and Art, Media, and Design (see Art, Media, and Design BA for degree requirements) as their secondary major. If you have already begun the Secondary Education Visual Arts major and want to switch to the Secondary Education Major and Art, Media, and Design double major, you should contact your academic advisor because the double major may require additional coursework. Students who pursue the Bachelor of Arts degree with a major in Secondary Education Visual Arts do not have the option to double major in Art Media and Design.

Licensure

Illinois Professional Educator License with an endorsement in Secondary Education Visual Art (grades 6-12), an Illinois State Board of Education (ISBE) approved program.

Learning Outcomes

Students will be able to:

- articulate and communicate orally and in writing, as well as demonstrate in practice, a personal philosophy of teaching grounded in adolescent development and learning theories, global perspectives, pedagogical content knowledge research, and DePaul's Vincentian Mission and the COE's Conceptual Framework.
- define, create, and evaluate a safe, healthy, creative, and rigorous learning environment that facilitates cultural and linguistic responsiveness, emotional well-being, self-efficacy, positive social interaction and collaboration, and mutual respect and empathy, and encourages active engagement, academic risk-taking, divergent and creative thinking, self-motivation, and personal and whole-class goal-setting.
- identify, justify, implement, and evaluate differentiated instructional strategies that support rigorous critical, creative, and exploratory thinking and metacognitive awareness, and problem-solving, collaboration, and academic, social, and emotional development of all students.
- articulate, analyze, and theorize an understanding of adolescent development within historical scholarly traditions that recognizes the complex roles that linguistic (including English learning and nonmainstream
English dialects), social, economic, cultural, academic, spiritual, and personal experiences both inside and outside of school have on classroom instruction and adolescent development and learning.

- plan, design, implement, and evaluate curricula and instructional practices based on disciplinary content knowledge, pedagogical content knowledge, multiple literacies, diverse student characteristics such as language, learning, and socio-emotional and behavioral differences, diverse types of student performance data, curriculum goals, and the community context.

- articulate and demonstrate in practice a foundational knowledge of reading, writing, speaking, listening, and cognitive development theories and related pedagogies that are grounded in sociocultural theories of literacy and reflect an understanding of multiple literacy theory and practice.

- articulate and demonstrate disciplinary content knowledge expertise and the historical, social, economic, and political roles and implications of that disciplinary content on human development and societies.

- plan, design, implement, and evaluate formative and short- and long-term summative assessments for promoting student learning and self-assessment, identifying student needs, monitoring student progress, measuring student growth, and evaluating curriculum and student outcomes using diverse types of data.

- identify, articulate, plan, and implement a theory of collaborative practice with students, parents/guardians, school partners, and community stakeholders that recognizes student's social, emotional, spiritual, and academic development and promotes human and environmental empathy, social justice, and democratic practices.

- articulate and demonstrate professional educator dispositions that are grounded in ethical and Vincentian tenets of human relations and that exhibit professionalism, with an emphasis on leadership, collaboration, and advocacy for students and their communities.

---

**College Core Requirements**

**Dispositions**

The academic programs within the College of Education have set forth these dispositions as educational and professional expectations for all students. Students should be aware that failing to abide by DePaul University or College of Education policies including, under certain circumstances, these dispositions, could result in adverse consequences for the student, including removal from his or her program, the College of Education, or the University.

The following dispositions apply to Early Childhood Education, Elementary Education, Physical Education, Secondary Education, and World Language Education majors only:

- Reflects on progress and identifies strengths and weaknesses, including evaluating strategies for success, finding alternatives for inappropriate strategies, and modifying future practices

- Is receptive to faculty feedback and acts meaningfully and professionally upon suggestions

- Values critical thinking, including engaging theoretical and philosophical frameworks and shows evidence of critical thinking through discussion and writing (e.g., journals, response to prompts)

- Understands the importance of and is committed to communicating clearly orally and in writing both in traditional and in new and emerging digital formats

- Values and is committed to continually developing strong content area knowledge and/or knowledge of the professional field, including pedagogical content knowledge

- Takes initiative, uses imagination and creativity, and seeks out information using a variety of human and material resources and technology to inform his or her teaching

- Is aware of the role of classroom environment and uses management procedures that reflect respect and care for learners and concern for their emotional and physical well being

- Takes the time and effort needed to understand how students learn, including discovering their interests and experiences and determining how to shape teaching acts (using technology as appropriate) that engage learners meaningfully and actively

- Values and is committed to using assessment to evaluate and ensure the continuous intellectual, social, emotional, and physical development of the learner

- Respects and considers cultural contexts in order to determine how to be responsive to learners and to proactively promote all students' learning

- Values and is responsive to diverse learners' academic, emotional, and social needs through teaching acts (including careful instructional planning, implementation, and differentiation) and through everyday interactions with students

- Is committed to collaboration with colleagues, families, and communities in order to promote all students' learning and development

- Recognizes and fulfills professional responsibilities and habits of conduct (e.g., dress, language,
preparedness, attendance, punctuality, etc.)
- Demonstrates collegiality, honesty, good judgment, courtesy, respect, and diplomacy
- Balances self-confidence and assertiveness with respect for others’ perspectives
- Respects the requirements, expectations, and procedures of both the College of Education and of our field partners and appreciates the issues of trust, fairness, and professionalism involved

The following dispositions apply to Special Education majors only:
- Is receptive to faculty feedback and acts meaningfully and professionally upon suggestions
- Reflects on his or her own progress, identifies strengths and weaknesses, and evaluates strategies for success and professional growth
- Takes initiative
- Is open to new ideas and engagement in learning
- Respects diversity and cultural contexts to determine how to be responsive to learners and to proactively promote all students' learning
- Expresses positive attitudes toward individuals with disabilities and a willingness to advocate on their behalf
- Is committed to collaboration with colleagues, families, and communities in order to promote all students' learning and development
- Demonstrates professional ethical and legal behavior as defined by the respective codes of ethics and laws
- Demonstrates consistent professional behavior across all academic settings
- Maintains appropriate interpersonal and professional boundaries
- Accepts personal responsibility for one's behavior
- Expresses feelings and opinions effectively and appropriately
- Upholds confidentiality

**Skill Building Courses**

Before taking any math or English courses, students must take the DePaul placement tests to determine if skill level is at the college level. If placement indicates skill level in these courses, the courses become part of degree requirements. Consult with your advisor regarding placement test results and any required classes.

**Advanced Standing**

Students are conditionally admitted to the College of Education. There are additional requirements to reach Advanced Standing in your program in the College of Education. Requirements must be met to progress in the major and take courses in the Advanced Standing category.

Advanced Standing requirements are:
- Maintain a DePaul undergraduate 2.5 GPA
- Pass the Illinois Test of Academic Proficiency (TAP)
- Submit a petition for advanced standing form

Students should attempt to complete the Advanced Standing requirements soon after beginning the program. There is no time limit to meet these criteria; however, students will only be able to take pre-education courses until requirements have been met. Students can also take liberal studies or content area courses before or after meeting Advanced Standing requirements.

**Modern Language Competence Requirement**

Students pursuing a Bachelor of Arts degree in the College of Education will be required to demonstrate a measure of competence in a modern language, as defined by the college. Such competence may be demonstrated in one of several ways:

- completing two years of a language sequence in high school
- completing the last course in the first-year college sequence of any language
- completing a college course beyond the first-year level in any language
- achieving a satisfactory score on any of the Modern Language placement examinations administered at DePaul
- achieving a satisfactory rating in a proficiency examination accepted by DePaul
- achieving a score of 3 or higher on the Advance Placement (AP) test for any language
- achieving a score of 5 or higher in the Language B assessment from a Standard or Higher Level International Baccalaureate (IB) program
- achieving a satisfactory score on the CLEP examination

Please note: The Modern Language Competence Requirement is not required for students in the Early Childhood Education: SNL Joint Program (BAECE) program.

For further information regarding satisfactory scores and possible credit from the DePaul placement, AP, CLEP,
or IB examinations, please contact the Office of the University Registrar.

Students who complete an Inter-College Transfer (ICT) to the College of Education will abide by the COE Modern Language Requirement in place on the effective date of the ICT.

B.A. students who meet College requirements and wish to pursue further work in the language may elect the "Modern Language Option" of the Liberal Studies Program. While B.S. students are not required to demonstrate competency in a modern language, the "Modern Language Option" is available to them for language study at any level.

Licensure Tests

All individuals licensed by the Illinois State Board of Education (ISBE) are required to complete licensure tests specific to their teaching license.

Field Experiences

Each student seeking licensure from the College of Education/Professional Education Unit must complete supervised field experiences in appropriate settings in conjunction with education courses. The field experiences must include a variety of grade levels, multicultural experiences, and a minimum of 10 hours in special education settings. All field experiences must be completed prior to final approval for student teaching. Field experience hours should be entered by the student into the FEDS system when completing courses with field experience requirements.

Endorsements

An endorsement is a statement appearing on a license that identifies the specific subjects or grade level that the license holder is authorized to teach.

The Illinois State Board of Education (ISBE) issues endorsements in various subject areas. To view the full list and requirements, visit the ISBE website.

Please note that the Illinois State Board of Education (ISBE) may change the state licensure and endorsement requirements at any time and without prior notice. Individuals are bound by the requirements in place when applying for the license or endorsement, not the requirements in place when beginning the program.

Student Teaching Requirements

Student Teaching is the culminating clinical experience in the student's program. All students in teacher preparation programs must meet the following requirements before applying for student teaching:

Academic Requirements:

- Completion of all Liberal Studies, Pre-Education, Advanced Standing and concentration/content area courses
- Overall cumulative G.P.A. of 2.50 or better
- Cumulative GPA. of 2.75 or better in all education courses
- Meet all other program requirements (e.g., modern language and residency requirements)
- Meet designated program standards
- Pass the required Illinois licensure content area test

Clinical Requirements:

- Completion of all required field experiences
- Three satisfactory evaluations in field experiences
- Three satisfactory faculty recommendations
- Attendance at mandatory meeting for student teaching
- Application for student teaching, resume, transcripts, and writing sample (check deadlines)
- Review and approval by Student Teaching Committee of the College of Education

Student Teaching Timeline and Deadlines:

- Attend a Mandatory Meeting approximately 1 year prior to expected quarter of student teaching.
- Submit application for student teaching after attending Mandatory Meeting, approximately 1 year prior to student teaching.
- Academic requirements are due one quarter before expected quarter of student teaching.
- Clinical requirements are completed as course requirements. Field experience hours are entered by the student as coursework is completed.

Online Faculty Evaluations are entered by the instructor of relevant courses. All data must be entered in the
Field Experience Documentation System (FEDS) due one month prior to student teaching.

Individual child care agencies and public and private school districts may have additional requirements (application, training, background check, etc.).

**Degree Conferral and Graduation**

The awarding of a degree is not automatic. You must submit an application to be considered for the degree. DePaul awards and posts degrees at the end of each regular academic term (autumn, winter, spring, summer).

It is your responsibility to initiate the degree conferral application process by submitting an online application. Submitting an application means you intend to finish your degree requirements by the end of the term for which you have applied.

Undergraduate students must be approved for student teaching and complete student teaching and capstone to be cleared for the degree. Student must submit graduation application for the quarter that matches the quarter you are student teaching.

After you submit the application, you cannot register for any term after the one selected in the application.

To apply for degree conferral, log on to Campus Connection. Select STUDENT CENTER, then MY ACADEMICS. On screen instructions will take you through the application process.

Provided that all requirements and financial obligations are met, degrees are posted 30 days after the official end of the term. Official dates are listed on the Academic Calendar.

DePaul holds one commencement ceremony each year in June. If you intend to participate, you must first apply for degree conferral for the current academic year and then submit a cap and gown order. Honors are not announced at the ceremony for undergraduates completing their final courses in spring quarter because a final GPA is not available at the time of the ceremony.

Additional information about degree conferral and graduation can be found on the College of Education website at: [http://education.depaul.edu/](http://education.depaul.edu/).

**Licensure**

Requirements for licensure include completion of full bachelor's degree program, all licensure tests (including OPI for world language majors), and awarding of bachelor's degree. A bachelor's degree is required to qualify for licensure and must be awarded before applying for the license.

Individuals must submit an application directly to the Illinois State Board of Education after completion of requirements and after DePaul has submitted notification to ISBE. Application requirements include application form, application fee, official transcripts, and registration fee.

All individuals must meet ISBE requirements in place at the time of application for the license. Requirements are subject to change per the discretion of ISBE. All coursework and requirements pertaining to licensure requirements must be completed before DePaul University can recommend an individual for the license.

Individuals seeking additional endorsements after applying for the licensure must contact ISBE directly for an evaluation request.

All coursework and requirements must be completed before DePaul University can recommend an individual for the license.
Liberal Studies Requirements

Honors program requirements can be found in the individual Colleges & Schools section of the University Catalog. Select Academics, followed by Undergraduate, then Honors Program Alternative.

First Year Program

Chicago Quarter

- LSP 110 DISCOVER CHICAGO
  or LSP 111 EXPLORE CHICAGO

Focal Point

- LSP 112 FOCAL POINT SEMINAR

Writing

- WRD 103 COMPOSITION AND RHETORIC I *
- WRD 104 COMPOSITION AND RHETORIC II *

Quantitative Reasoning & Technological Literacy

- LSP 120 QUANTITATIVE REASONING & TECHNOLOGICAL LITERACY I
- LSP 121 QUANTITATIVE REASONING AND TECHNOLOGICAL LITERACY II (Note: See information below)

Sophomore Year

Multiculturalism in the US

- LSP 200 SEMINAR ON MULTICULTURALISM IN THE UNITED STATES

Junior Year

Experiential Learning

- Met by successful completion of required field experience hours.

Senior Year

Capstone

- SEC 387 CAPSTONE SEMINAR IN SECONDARY EDUCATION *
  (Note: This must be taken with student teaching. Students must earn a C or better in this course.)

Learning Domains

Arts and Literature (AL)

- 1 Course Required
  (Note: This must not be an ART or HAA course.)

Philosophical Inquiry (PI)

- 2 Courses Required:
  - LSE 380 PHILOSOPHICAL ISSUES IN EDUCATION AND CULTURE
  - 1 Additional Course
    (Note: PHL 100 recommended)

Scientific Inquiry (SI)
- 3 Courses Required:
  - 1 BIO course
  - 1 CHE/ENV/GEO/PHY course
  - 1 Additional Course
    (Note: One course must be a lab or SWK.)

Social, Cultural, and Behavioral Inquiry (SCBI)

- 3 Courses Required:
  - PSC 120 THE AMERICAN POLITICAL SYSTEM
  - 2 Additional Courses

Religious Dimensions (RD)

- 2 Courses Required

Understanding the Past (UP)

- 2 Courses Required
  (Note: One must be US History)

* Students must earn a C- or better in this course.

Notes

Specified required courses within Liberal Studies may have grade minimums (e.g. C- or better). Please consult your advisor or your college and major requirements.

Courses offered in the student's primary major cannot be taken to fulfill LSP Domain requirements. If students double major, LSP Domain courses may double count for both LSP credit and the second major.

In meeting learning domain requirements, no more than one course that is outside the student's major and is cross-listed with a course within the student's major, can be applied to count for LSP domain credit. This policy does not apply to those who are pursuing a double major or earning BFA or BM degrees.

Quantitative Reasoning and Technological Literacy

Readiness for LSP 120 is determined by the math placement test taken online after admission. Students may need to take developmental coursework prior to LSP 120. The LSP 120 requirement may be waived by credit already earned for advanced math coursework or by passing a dedicated proficiency exam. Students who complete both LSP 120 and LSP 121 take one less Learning Domain course. Students may not apply the course reduction to any Domain where only one course is required, and if taken within the SI Domain, the reduction cannot be applied to the SI Lab or SWK requirement.

Major Requirements

Course Requirements

Content Area Courses

Core: 20 quarter hours required, grade of C or better required

- ART 101 DIGITAL TOOLS FOR VISUAL THINKERS
- ART 105 TWO-DIMENSIONAL FOUNDATIONS
- ART 106 BEGINNING DRAWING
- ART 200 ART & ARTISTS IN CONTEMPORARY CULTURE
- ART 113 THREE DIMENSIONAL FOUNDATIONS
Studio Art: 20 quarter hours required, grade of C or better required

- ART 110 BEGINNING PAINTING
- ART 115 BEGINNING SCULPTURE
- ART 206 INTERMEDIATE DRAWING
  or ART 218 FIGURE DRAWING
- ART 229 BEGINNING PRINTMAKING
- One Art History Course

Media Arts: 16 quarter hours required, grade of C or better required

- ART 225 BEGINNING PHOTOGRAPHY
  or ART 224 BEGINNING DIGITAL PHOTOGRAPHY
- ART 226 VIDEO ART
  or ART 289 EXPERIMENTAL VIDEO ART
- ART 358 GRAPHIC ART
  or ART 332 TOPICS IN PHOTOGRAPHIC PRACTICE
- 300-level ART Studio Elective Course

Pre-Education Introductory Courses: 12 quarter hours required, grade of C or better required

- SCU 207 SOCIAL AND HISTORICAL ISSUES IN EDUCATION
- SEC 364 METHODS: CURRICULUM AND INSTRUCTION IN SECONDARY SCHOOLS
- SCU 336 ADOLESCENT AND ADULT GROWTH AND DEVELOPMENT
  or SCU 337 HUMAN GROWTH AND DEVELOPMENT

Advanced Standing Education Courses: 28 quarter hours required, grade of C or better required

- LSI 346 STRATEGIES FOR MAINSTREAMING AND INCLUSION
- SEC 325 LITERACY IN THE CONTENT AREAS
- SEC 365 ART AND PEDAGOGY
- SEC 366 TEACHER AS ARTIST
- SCU 351 DOING CRITICAL PRACTITIONER RESEARCH IN EDUCATION (Taken in conjunction with SEC 366)
- SEC 395 ASSESSMENT ISSUES IN SECONDARY EDUCATION
- BBE 301 TEACHING ADOLESCENT ENGLISH LANGUAGE LEARNERS AND DIALECT SPEAKERS ACROSS THE CURRICULUM

Open Electives: 8 quarter hours are required

Open elective credit also is required to meet the minimum graduation requirement of 192 hours. The following cannot be used to fulfill an open elective: WRD 98, MAT 94, and MAT 95.

Student Teaching: 10 quarter hours required, grade of B- or better required

Registration in student teaching requires completion of all requirements and procedures indicated in the college core section. EDU 95 indicates to the Illinois State Board of Education that all field experience hours are complete. All students also take SEC 387, Capstone Seminar with student teaching (listed in the Liberal Studies section).

- SEC 390 SECONDARY STUDENT TEACHING (10 credit hours)
- EDU 95 CLINICAL EXPERIENCE WITH CHILDREN AND YOUTH (non-credit, non-tuition, PA grade required)

Licensure Tests

All individuals licensed by the Illinois State Board of Education (ISBE) are required to complete licensure tests specific to their teaching license. Secondary Education Visual Art majors must complete the following tests:

- Test of Academic Proficiency (TAP) (test #400) - assesses knowledge of reading comprehension, language
arts, writing, and math. Test is required to qualify for Advanced Standing. *Check with your advisor about qualifying for a waiver with acceptable ACT or SAT test scores.

- **Visual Art Content Area Test (test #145)** – assesses elements, principles, and expressive features of the visual arts; creating and producing works of visual art; analyzing and evaluating works of visual art; and the role of the visual arts. Test is required before Student Teaching (deadlines apply).
- **EdTPA** - assessment conducted during the student teaching experience including video clips of instruction, lesson plans, student work samples, analysis of student learning and reflective commentaries. Students will submit an electronic portfolio to an outside agency for independent evaluation and a fee will be imposed by that agency as part of the assessment.

---

**Sociology (BA)**

Sociology is the study of groups, societies, social processes, and institutions. To study these, the department provides a program that focuses on sociological methods (how we know) and sociological theory (how we explain). The curriculum provides students with a basis for understanding and participation in their own communities and enables them to pursue careers and occupations in professions related to sociological knowledge and training.

<table>
<thead>
<tr>

<td>32 hours</td>
</tr>
<tr>
<td>Open Electives</td>
<td>56 hours</td>
</tr>
<tr>
<td><strong>Total hours required</strong></td>
<td><strong>192 hours</strong></td>
</tr>
</tbody>
</table>

**Learning Outcomes**

Students will be able to:

- Explain the sociological perspective and analyze societies, institutions, groups, organizations, cultures, and social issues and policies, through its lens.
- Describe the history of sociology as a discipline and identify major classical, 20th century, and contemporary theorists and theoretical perspectives.
- Recognize and use basic concepts and procedures of introductory statistics for the social sciences (sampling, descriptive statistics, statistical inference, data analysis techniques such as cross-tabs and regression, and presentation of quantitative information).
- Design research and apply major types of research methods and techniques to data.
- Use theories and concepts to identify research questions and analyze empirical situations.
- Critically evaluate the role of class, race-ethnicity, gender, and sexual orientation in society.
- Describe and explain key concepts of sociology such as social structure, inequality and disparities, deviance and social control, power and authority, complex organization, interaction, and culture.
  - Use these concepts in the analysis of specific institutions of societies such as the media, health care systems, education and socialization, collective action and social movements, social services, the economy, law and the state, and systems of social control.
- Recognize how the social context affects individual goals, ideas, values and behaviors.
- Apply sociological perspectives at different levels of analysis, such as: individuals in social contexts; interacting groups; social networks; communities, cities, and metropolitan regions; organizations; societies at the national level; and the global system.
College Core Requirements

Study in the Major Field

The student's course of study in the College consists of three parts: Liberal Studies, the major field, and electives. Together these three parts contribute to the liberal education of the student which is the common purpose of all study in the College. By "liberal education" the College understands not only a deep and through knowledge of a particular area of study but a knowledge of the diverse areas of study represented by criticism, history, the arts, the behavioral and social sciences, philosophy, religious studies, the natural science, and mathematics.

The major field program generally is built upon a set of core courses and a specialized "concentration." The number of courses required for a major varies by department. Most students go beyond the minimum requirements, electing additional courses which both broaden and deepen their understanding of their chosen discipline.

Because no academic major program is built in isolation, students are required to pursue a number of electives of the student's choice. The inherent flexibility of this curriculum demands that the student consult an academic advisor at each stage in the total program and at least once prior to each registration. Students will be prompted to visit the College Office for their official graduation check early in their senior year.

Declaration of Major, Minor and Concentration

All students in the College are required to declare a major field prior to beginning their junior year. The student will then be assigned a faculty advisor in the major field department or program and should make an appointment to see that advisor at his or her earliest convenience.

Students must declare or change majors, minors, and concentrations, via Campus Connection. However, for the purpose of exploring the possibility of changing a major field, the student should consult an academic advisor in the the Office for Academic Advising Support.

The Modern Language Requirement (MLR)

All students will be required to demonstrate competence in a modern language (i.e., a language other than English) equivalent to the proficiency attained from one year of college-level language study. This Modern Language Requirement (MLR) may be demonstrated by:

- placing into 104 or above on the DePaul language placement exam
- completing the last course or earning AP/IB credit for the last course in the first-year college sequence of any language (e.g. 103 for DePaul language classes)
- completing a college course or earning AP/IB credit for a college course beyond the first-year level in any language (e.g. 104 or above for DePaul language classes)
- completing the final course of a four-year sequence of the same modern language in high school*
- completing a proctored exam by BYU and passing the exam (see the Department of Modern Languages website for registration details)
- completing a proctored Written Proficiency Test (WPT) by Language Testing International (LTI) and achieving a score of Beginner High or above (see the Department of Modern Languages website for registration details)

* Students are strongly encouraged to take the DePaul language placement exam even if they have met the MLR via study of a language in high school. This will ensure continuation of language study at the proper level.

Students who complete an Inter-College Transfer (ICT) to the College will abide by this MLR in place on the effective date of the ICT, regardless of when they first matriculated at DePaul.

Students who have met the MLR and wish to pursue further work in the language may elect the "Modern Language Option" (MLO) of the Liberal Studies Program (see "Special Programs").

External Credit and Residency

A student who has been admitted to the College begins residency within the college as of the first day of classes of the term in which the student is registered. Students in residence, whether attending on a full-time or part-time basis, may not take courses away from DePaul University without the written permission of the college. Permission must be obtained in advance of registration to avoid loss of credit or residency in the college; see the LAS website for more information.
Liberal Studies Requirements

Honors program requirements can be found in the individual Colleges & Schools section of the University Catalog. Select Academics, followed by Undergraduate, then Honors Program Alternative.

Junior Year

Experiential Learning

  - Required

Senior Year

Capstone

- SOC 395 CAPSTONE IN SOCIOLOGY * [See Note Below]

Learning Domains

Arts and Literature (AL)

  - 3 Courses Required

Philosophical Inquiry (PI)

- 2 Courses Required

**Scientific Inquiry (SI)**

- 3 Courses Required
  - [1 SWK Course, 1 Lab Course, and 1 Additional Course]

**Social, Cultural, and Behavioral Inquiry (SCBI)**

- 1 Course Required

**Religious Dimensions (RD)**

- 2 Courses Required

**Understanding the Past (UP)**

- 2 Courses Required

* Students must earn a C- or better in this course.

**Notes**

A student whose only major is Sociology is required to complete the Capstone offered by the Sociology Department. A student who is double majoring (or pursuing dual degrees) with the primary major (or primary degree) in Sociology may substitute the Capstone of the secondary major or degree. A Sociology major in the University Honors Program shall take only the University Honors Capstone, not both the Honors Capstone and the Sociology Capstone.

Courses offered in the student's primary major cannot be taken to fulfill LSP Domain requirements. If students double major, LSP Domain courses may double count for both LSP credit and the second major. Students who choose to take an experiential learning course offered by the major may count it either as a general elective or the experiential learning requirement.

In meeting learning domain requirements, no more than one course that is outside the student’s major and is cross-listed with a course within the student’s major, can be applied to count for LSP domain credit. This policy does not apply to those who are pursuing a double major or earning BFA or BM degrees.

**Quantitative Reasoning and Technological Literacy**

Readiness for LSP 120 is determined by the math placement test taken online after admission. Students may need to take developmental coursework prior to LSP 120. The LSP 120 requirement may be waived by credit already earned for advanced math coursework or by passing a dedicated proficiency exam. Students who complete both LSP 120 and LSP 121 take one less Learning Domain course. Students may not apply the course reduction to any Domain where only one course is required, and if taken within the SI Domain, the reduction cannot be applied to the SI Lab or SWK requirement.

---

**Major Requirements**

**Course Requirements**

**Core**

- SOC 101 INTRODUCTION TO SOCIOLOGY or SOC 102 INTRODUCTION TO CRIMINOLOGY or SOC 105 SOCIAL PROBLEMS
• SOC 279 INTRO STATS FOR THE SOCIAL SCIENCES *
• SOC 331 SOCIOLOGICAL THEORY
• SOC 380 RESEARCH METHODS IN SOCIOLOGY I
• SOC 381 RESEARCH METHODS IN SOCIOLOGY II

Concentration Requirements

Students must complete 8 additional courses from one of the following concentrations: Standard; Sociology of Culture; Health and Human Services; Law, Crime, and Criminology; or Cities, Action, Power, and Practice (CAPP).

*The statistics requirement may also be fulfilled by PSY 240 STATISTICS I, MAT 137 BUSINESS STATISTICS, or MAT 242 ELEMENTS OF STATISTICS.

NOTE: A maximum of 8 credits of SOC 398 INTERNSHIP can be counted toward major field credit. Additional SOC 398 credit may be earned but it will count for open elective credit or Junior Year Experiential Learning (JYEL) credit, if applicable.

Concentration Requirements

Concentrations, tracks and specializations provide focus to the major. In addition to any college core requirements, liberal studies requirements and major requirements, students are required to choose one of the following:

• Cities, Action, Power, and Practice (CAPP)
• Health and Human Services
• Law, Crime, and Criminology
• Sociology of Culture
• Standard

Standard Concentration

This concentration is for students who want a broad and generalized course of study. Students in this concentration may take a broad array of 200 and 300 level courses. This concentration is excellent preparation for graduate work in sociology and other disciplines, as well as careers in many different areas.

Course Requirements

• Five 300-level Sociology courses
• Three additional Sociology courses at the 200 or 300-level

Students should select these courses in consultation with their advisor.

Open Electives

Open elective credit also is required to meet the minimum graduation requirement of 192 hours.

Combined Bachelor’s/ Master’s Degree

Students with a Standard concentration will have the following three courses substituted for three 400-level courses, which will count toward both undergraduate and graduate degree programs:
Sociology of Culture Concentration

This concentration focuses on popular culture, the media, technology, and the arts, as well as cultural diversity in post-industrial society. Students in this concentration will take a critical look at how the culture of everyday life is linked to the economy, state, family, education, and politics. Students interested in pursuing careers in communications, advertising, cultural criticism, market research and journalism should consider this concentration. We strongly suggest that students in this concentration take SOC 280 MASS MEDIA AND CULTURE. In addition to the core sociology course requirements, students will complete eight additional courses from the concentration list below:

Course Requirements

- Two 200-level courses from the following list:
  - SOC 205 SELF AND SOCIETY
  - SOC 207 YOUTH AND SOCIETY
  - SOC 209 SOCIOLOGY OF WOMEN
  - SOC 233 SOCIOLOGY OF SPORT
  - SOC 280 MASS MEDIA AND CULTURE
  - SOC 281 SOCIOLOGY OF ROCK MUSIC
- Three 300-level courses from the following list:
  - SOC 309 SOCIOLOGY OF SEXUALITY
  - SOC 330 THEMES IN SOCIAL THOUGHT
  - SOC 382 QUALITATIVE METHODS
  - SOC 383 VISUAL SOCIOLOGY
  - SOC 384 ETHNOGRAPHIC DOCUMENTARY FILM PRODUCTION
  - SOC 386 POPULAR CULTURE AND THE ARTS
  - SOC 387 SOCIOLOGY OF CELEBRITY
  - SOC 388 SOCIOLOGY OF CONSUMPTION
  - SOC 390 SEMINAR IN SOCIOLOGY (with approval)
  - SOC 394 COMMUNITY BASED SOCIOLOGY (with approval)
  - SOC 398 INTERNSHIP (with approval)

- Three 400-level electives in Sociology, which may include those courses listed above
- One additional 200 or 300-level elective in Sociology, which may include those courses listed above

Open Electives

Open elective credit also is required to meet the minimum graduation requirement of 192 hours.

Combined Bachelor's/Master's Degree

Students with a Health and Human Services concentration will have the following three courses substituted for three 400-level courses, which will count toward both undergraduate and graduate degree programs:

- Two 300 level electives in Sociology
- One additional 200 or 300 level elective in Sociology
Law, Crime, and Criminology Concentration

This concentration spans topics of criminalization, the legal system, and criminal justice systems, paying particular attention to the way these affect marginalized segments of the population and work to maintain interlocking systems of oppression. Students in this concentration will learn about the cultural and structural forces that work to define deviance, inform the construction and interpretation of the law, and delimit the experiences of people affected by the criminal justice system. This concentration prepares students for careers in law, non-profit social justice work, social work, or youth services. We strongly suggest that students in this concentration take SOC 220 THEORIES OF CRIME AND DELINQUENCY. In addition to the core sociology course requirements, students will complete eight additional courses from the concentration list below:

Course Requirements

- Two 200-level courses from the following list:
  - SOC 207 YOUTH AND SOCIETY
  - SOC 208 LAW AND SOCIETY
  - SOC 214 POLICE AND THE URBAN COMMUNITY
  - SOC 220 THEORIES OF CRIME AND DELINQUENCY
  - SOC 248 WHITE RACISM
- Three 300-level courses from the following list:
  - SOC 301 THE JUVENILE COURT SYSTEM: ITS OPERATIONS
  - SOC 304 SOCIAL DEVIANCE
  - SOC 305 POWER, DEVIANCE AND SOCIAL CONTROL
  - SOC 307 SOCIOLOGY OF SUBSTANCE USE AND ABUSE
  - SOC 310 CRIMINAL- LEGAL SYSTEM: CRITICAL PERSPECTIVES
  - SOC 315 LAW, POWER AND RESISTANCE
  - SOC 316 STREET GANGS
  - SOC 317 GENDER, CRIME AND JUSTICE
  - SOC 322 TREATMENT AND PREVENTION OF DELINQUENCY
  - SOC 332 THEORETICAL CRIMINOLOGY
  - SOC 373 PUBLIC HEALTH AND HIGH RISK BEHAVIOR
  - SOC 378 QUANTITATIVE METHODS IN CRIMINOLOGY
  - SOC 379 QUALITATIVE METHODS IN CRIMINOLOGY
  - SOC 390 SEMINAR IN SOCIOLOGY (with approval)
  - SOC 394 COMMUNITY BASED SOCIOLOGY (with approval)
  - SOC 398 INTERNSHIP (with approval)
- Two 300-level electives in Sociology, which may include those courses listed above.
- One additional 200 or 300-level elective in Sociology, which may include those courses listed above.

Open Electives

Open elective credit also is required to meet the minimum graduation requirement of 192 hours.

Combined Bachelor's/ Master's Degree

Students with a Law, Crime and Criminology concentration will have the following three courses substituted for three 400-level courses, which will count toward both undergraduate and graduate degree programs:

- Two 300 level electives in Sociology
- One additional 200 or 300 level elective in Sociology
Health and Human Services Concentration

This concentration addresses policies and issues of health and public welfare in the U.S. and abroad. Students develop an understanding of the social factors that create disparities in health and illness, health care delivery systems, and other social resources. Students interested in careers in health care, health policy, public health, nursing, and social work should consider this concentration. We strongly suggest that students in this concentration take SOC 221 INTRODUCTION TO THE U.S HEALTH CARE SYSTEM. In addition to the core sociology course requirements, students will complete eight additional courses from the concentration list below:

Course Requirements

- Two 200-level courses from the following list:
  - SOC 200 SOCIAL WORK AND SOCIAL WELFARE
  - SOC 221 INTRODUCTION TO THE U.S. HEALTH CARE SYSTEM
  - SOC 223 SOCIOLOGY OF HEALTH AND ILLNESS
  - SOC 235 ADOLESCENT HEALTH
  - SOC 236 IMMIGRATION, HEALTH AND ILLNESS

- Three 300-level courses from the following list:
  - SOC 307 SOCIOLOGY OF SUBSTANCE USE AND ABUSE
  - SOC 321 HEALTH AND HUMAN SERVICE ORGANIZATIONS
  - SOC 323 THE SOCIAL WELFARE INSTITUTION
  - SOC 326 AGING AND THE LIFE COURSE
  - SOC 351 HEALTH DISPARITIES
  - SOC 353 SOCIOLOGY OF MENTAL ILLNESS
  - SOC 365 HEALTH AND GLOBALIZATION
  - SOC 370 PEOPLE, PLACES, AND FOOD
  - SOC 373 PUBLIC HEALTH AND HIGH RISK BEHAVIOR
  - SOC 390 SEMINAR IN SOCIOLOGY (with approval)
  - SOC 394 COMMUNITY BASED SOCIOLOGY (with approval)
  - SOC 398 INTERNSHIP (with approval)

- Two 300-level electives in Sociology, which may include those courses listed above.
- One additional 200/300-level elective in Sociology, which may include those courses listed above.

Open Electives

Open elective credit also is required to meet the minimum graduation requirement of 192 hours.

Combined Bachelor’s/ Master’s Degree

Students with a Health and Human Services concentration will have the following three courses substituted for three 400-level courses, which will count toward both undergraduate and graduate degree programs:

- Two 300 level electives in Sociology
- One additional 200 or 300 level elective in Sociology

Cities, Action, Power, and Practice (CAPP) Concentration

This concentration equips students to work for change in developing sustainable local communities. Concentrators will explore social, political, economic, and environmental aspects of communities in the United States and around the world. Topics include the critical analysis of the historical development and current conditions of downtown centers, residential neighborhoods, and suburban areas. Students will investigate the interrelated issues of poverty, housing, education, and crime in phenomena like public housing and gentrification. As they do, they will also consider the activists, organizations, and policy efforts that mobilize around these issues. Collaborations with community organizations will provide the student with a familiarity of
urban issues and institutions. Cross-cutting sociological subjects such as work, race/ethnicity, gender, immigration, policing and law, and community activism are central to the work of the concentration. CAPP prepares students to work with community-centered non-profit organizations of various types or within government. It serves as an excellent preparation for graduate study in public policy, public administration, social work, urban planning, and law. In addition to the core sociology course requirements, students will complete eight additional courses from the concentration list below:

Course Requirements

Two 200-level CAPP Courses

- One Foundation Course
  - SOC 245 URBAN SOCIOLOGY
- One 200-level CAPP Sociology Elective course from the following list:
  - SOC 212 COMMUNITY AND SOCIETY
  - SOC 214 POLICE AND THE URBAN COMMUNITY
  - SOC 217 WORK IN A GLOBALIZED WORLD
  - SOC 220 THEORIES OF CRIME AND DELINQUENCY
  - SOC 230 SEX AND GENDER IN THE CITY
  - SOC 231 RACE AND ETHNICITY IN THE CITY
  - SOC 232 GLOBAL CITIES

Three 300-level CAPP Courses

- One Foundation Course
  - SOC 347 CLASS, POWER AND DECISION MAKING IN THE CITY
- One 300-level CAPP Sociology Elective course from the following list:
  - SOC 305 POWER, DEVIANCE AND SOCIAL CONTROL
  - SOC 313 SOCIOLOGY OF EDUCATION
  - SOC 316 STREET GANGS
  - SOC 321 HEALTH AND HUMAN SERVICE ORGANIZATIONS
  - SOC 340 SOCIAL INEQUALITY
  - SOC 348 THE CITY IN THE FUTURE
  - SOC 355 CHICAGO AS A SOCIAL SYSTEM
  - SOC 356 THE CITY IN CROSS-CULTURAL PERSPECTIVE
  - SOC 370 PEOPLE, PLACES, AND FOOD
  - SOC 398 INTERNSHIP (with approval)
- One CAPP Practice course from the following list:
  - SOC 390 SEMINAR IN SOCIOLOGY: EVALUATING POLICIES, PROGRAMS, AND PRACTICES
  - SOC 346 URBAN ETHNOGRAPHY
  - SOC 384 ETHNOGRAPHIC DOCUMENTARY FILM PRODUCTION
  - GEO 141 GEOGRAPHIC INFORMATION SYSTEMS I: DIGITAL MAPPING

Two CAPP Elective Courses

- One 200-level CAPP Elective from the CAPP Sociology Elective course list or the following list:
  - ABD 259 MOVIN' UP: BLACK MIGRATION TO THE NORTH, 1877 - 1941
  - HAA 288 COMPARATIVE URBANISM
  - CSS 201 CRITICAL COMMUNITY ENGAGEMENT
  - ENV 200 CITIES AND THE ENVIRONMENT
  - ENV 217 HUMAN IMPACTS ON THE ENVIRONMENT
  - ENV 245 URBAN AND COMMUNITY AGRICULTURE
  - GEO 200 SUSTAINABLE URBANISM
  - GEO 205 URBAN ENVIRONMENTAL JUSTICE
  - GEO 233 COMPARATIVE URBANISM
  - HST 240 HISTORY OF CHICAGO
  - HST 254 AMERICAN URBAN HISTORY
  - HST 291 THE FERTILE CRESCENT: MESOPOTAMIA AND BEYOND
  - HST 296 ANCIENT ROME: ORIGINS TO THE END OF THE REPUBLIC
  - LST 202 CONSTRUCTING LATINO COMMUNITIES
  - PSC 223 URBAN POLITICS
  - PSC 282 POLITICAL ACTION AND SOCIAL JUSTICE
  - PPS 250 ISSUES IN NEIGHBORHOOD DEVELOPMENT
  - PPS 251 URBAN POVERTY
- One 300-level CAPP Elective from the CAPP Sociology Elective course list or the following list:
  - HAA 380 CHICAGO ARCHITECTURE AND URBANISM (WORLD CITIES)
  - CSS 300 INTRODUCTION TO NON-PROFIT MANAGEMENT
  - CSS 320 COMMUNITY FOOD SYSTEMS
  - ENV 344 ENVIRONMENTAL JUSTICE AND ADVOCACY
One 300-level Elective course in Sociology

- Any 300-level Sociology course (including those listed above)

Open Electives

Open elective credit also is required to meet the minimum graduation requirement of 192 hours.

Combined Bachelor’s/Master’s Degree

Students with a Cities, Action, Power, and Practice (CAPP) concentration will have the following three courses substituted for three 400-level courses, which will count toward both undergraduate and graduate degree programs:

- One CAPP Practice course
- One 200-level CAPP Elective from the CAPP Sociology Elective course list
- One 300-level Sociology Elective course

Combined Bachelor's/ Master's Degree

The combined Bachelor's/Master's degree programs allow students to complete 12 graduate credit hours while still undergraduates. These 12 graduate credit hours will count toward both the undergraduate and graduate degree programs.

The Sociology BA offers two options:

- Sociology BA/Sociology MA
- Sociology BA/Secondary Education Social Science MEd

Sociology BA/ Sociology MA

Students apply to this program in spring of their junior year; interested students should meet with the Director of the program. Students in this program take twelve graduate credit hours in their senior year; these graduate courses apply toward both undergraduate and graduate Sociology requirements. An application to the Sociology BA/Sociology MA program is required. Students accepted to the Sociology BA/Sociology MA program must register for graduate classes in consultation with the Graduate Program Director.

Students with a Standard concentration will have the following three courses substituted for three 400-level courses, which will count toward both undergraduate and graduate degree programs:

- Three Sociology elective courses at the 200 or 300-level

Students with a Sociology of Culture concentration will have the following three courses substituted for three 400-level courses, which will count toward both undergraduate and graduate degree programs:

- Two 300 level electives in Sociology
One additional 200 or 300 level elective in Sociology

Students with a Law, Crime and Criminology concentration will have the following three courses substituted for three 400-level courses, which will count toward both undergraduate and graduate degree programs:

- Two 300 level electives in Sociology
- One additional 200 or 300 level elective in Sociology

Students with a Health and Human Services concentration will have the following three courses substituted for three 400-level courses, which will count toward both undergraduate and graduate degree programs:

- Two 300 level electives in Sociology
- One additional 200 or 300 level elective in Sociology

Students with a Cities, Action, Power, and Practice (CAPP) concentration will have the following three courses substituted for three 400-level courses, which will count toward both undergraduate and graduate degree programs:

- One CAPP Practice course
- One 200-level CAPP Elective from the CAPP Sociology Elective course list
- One 300-level Sociology Elective course

**Sociology BA/ Secondary Education Social Science MEd**

The TEACH Program combines a Liberal Arts and Social Sciences (LAS) undergraduate Social Science major (Anthropology, Economics, Geography, History, Political Science, or Sociology) or a Science and Health (Psychology) major with a graduate level College of Education (COE) Master’s in Education Program. Students graduate with a BA or BS in their disciplinary major and a MEd in Education with State of Illinois Secondary Social Science licensure.

Students may apply to the Program during the spring of their junior year. They must enroll in the Junior Year Experiential Learning course, TCH 320 EXPLORING TEACHING IN THE URBAN HIGH SCHOOL, and meet other application criteria; these include completion of at least 16 quarter credit hours at DePaul and a 3.0 grade point average. During their senior year, students are required to complete a Program capstone course, TCH 390 CAPSTONE: INTEGRATING EDUCATION & DISCIPLINARY FOUNDATIONS, and three 400-level courses that count toward both their undergraduate and graduate degrees:

- TCH 401 TEACHING AS A PROFESSION IN SECONDARY SCHOOL
- TCH 412 THE NATURE OF HISTORY AND THE SOCIAL SCIENCES
- TCH 422 INQUIRY & APPLICATION IN DEVELOPING SECONDARY HISTORY AND SOCIAL SCIENCES PEDAGOGY

Social Science Content Area (grades of C or better required for licensure): The following Social Science content area requirements are required. These can be taken as part of the major, liberal studies or open elective requirements:

- HST 298 INTRODUCTION TO HISTORICAL SOURCES AND METHODS
- HST 299 CRAFT OF HISTORY
- 3 United States History courses
- 2 Non- United States History courses
- 6 from the sociology major
- Additional licensure requirements: (one course in each area required)
  - Geography (GEO 101 recommended)
  - Economics (ECO 101 recommended)
  - Political Science (PSC 120 recommended)
  - Psychology (PSY 105 recommended)
  - Anthropology (ANT 102 recommended)

The Master’s year comprises teacher-preparation coursework that culminates with student teaching during Spring quarter. Upon graduation and the fulfilling of State of Illinois licensure requirements (which may require some additional coursework in the student’s major and related fields), students are eligible to be licensed to teach Social Sciences at the 6th-12th grade levels.

A full description of the Program can be found on the College of Education website in the graduate course catalog. Students interested in the Program should consult with the designated TEACH Program advisor in their home department.
Sociology (Minor)

The Sociology minor is designed to provide you with the critical thinking skills needed to effectively observe people in social groups and institutions. The program offers an overview of sociological research and theory.

Course Requirements

- SOC 101 INTRODUCTION TO SOCIOLOGY or SOC 102 INTRODUCTION TO CRIMINOLOGY or SOC 105 SOCIAL PROBLEMS
- Four courses from the 200/300-level SOC course offerings.

Courses in theory, research methods, and statistics are recommended, but not required.

Students are now able to complete the Sociology minor in an online/hybrid format. Online/hybrid courses currently include SOC 101 INTRODUCTION TO SOCIOLOGY, SOC 205 SELF AND SOCIETY, SOC 207 YOUTH AND SOCIETY, SOC 235 ADOLESCENT HEALTH, and SOC 245 URBAN SOCIOLOGY. Additional online classes are being developed.

Students majoring in Sociology are restricted from earning this minor.

Sound Design - CDM (Minor)

The minor in Sound Design provides you with the basic skills to edit, record and compose sound for film, television, games and more. You will use the hardware and software used by professionals in the field.

Course Requirements

- DC 215 INTRODUCTION TO SOUND DESIGN
- DC 312 SCORING FOR FILM AND VIDEO
- DC 313 PRODUCTION SOUND
- DC 315 POST-PRODUCTION SOUND DESIGN
- 3 courses from the following list:
  - ANI 315 AUDIO FOR ANIMATION
  - GAM 250 GAME SOUND DESIGN I
  - DC 317 ADVANCED SOUND MIXING
  - DC 318 ADVANCED DIALOGUE EDITING
  - DC 319 ADVANCED SOUND EFFECTS RECORDING AND EDITING
  - DC 113 AUDIO FOR PODCASTS AND OTHER MEDIA

Students majoring in Film and Television (BFA) - Sound Design concentration are restricted from earning this minor.
Sound Design (BFA)

The Theatre School's Bachelor of Fine Arts (BFA) degree in Sound Design trains students to be successful sound designers and engineers in all levels of the theatre and entertainment industries. Sound design students learn techniques for sound editing, recording and composition using the hardware and software that are the standard tools of the industry. Students collaborate with directors, other designers and our professional production staff to get practical experience designing and rigging sound as part of our production program.

Learning Outcomes

Core Outcomes

Students will be able to:

- Identify and describe the historical and theoretical significance of a range of theatrical artists, works and artistic approaches from antiquity to the present, encompassing a broad range of periods, cultures, and styles.
- Synthesize and apply elements of their education and training in classes, rehearsals, and productions.
- Participate in theatrical production in a professional manner, with discipline, respect, and maturity.
- Demonstrate the role of the theatre practitioner as an active member of society and of the cultural and social impact of the arts.

Program Specific Outcomes

Students will be able to:

- Apply General knowledge of theatre history, dramatic literature covering a broad range of historical periods, cultures, and styles, and major theatre artists on both a national and international level.
- Utilize the principles and vocabulary of performance, directing, design, and a thorough grounding in the theory of their particular area of specialization.
- Write with competency in a variety of writing styles from casual to formal.
- Fully engage with knowledge through the ability to access, analyze, and evaluate information and ideas from multiple sources in order to identify underlying arguments and assumptions and to formulate conclusions.
- Utilize existing knowledge to generate and synthesize ideas in original, creative, and imaginative ways.
- Articulate clearly the process of transforming the written text into the theatrical event.
- Design, develop, and execute a noteworthy intellectual and/or creative project.
- Develop a profound understanding of the role of the artist in society.
- Develop an understanding of the cultural and sociopolitical context of theatre from the perspective of both historical and contemporary practice.
- Develop strong self-discipline, self-motivation, and an ability to work independently.
- Work collaboratively and effectively within a group process and with creative artists from all theatrical disciplines.
- Understand the interrelationship of what it means to be human and what it means to be a theatre artist.
- Evaluate ethical issues with respect to theatrical analysis, concept, and practice.
- Contribute artistically to communities through socially responsible engagement and leadership.
- Develop an understanding of and respect for a multiplicity of cultural and artistic perspectives that may be different from their own.
- Understand the availability and/or scarcity of global resources for a sustainable future.
- Set goals for future work that are the result of rigorous self-appraisal and reflection.
- Articulate their skills and knowledge as they represent themselves to external audiences.
- Work both independently and collaboratively.
- Use technology to create, communicate, and synthesize their ideas.
Liberal Studies Requirements

Honors program requirements can be found in the individual Colleges & Schools section of the University Catalog. Select Academics, followed by Undergraduate, then Honors Program Alternative.

First Year Program

Chicago Quarter

LSP 110 DISCOVER CHICAGO
or LSP 111 EXPLORE CHICAGO

Focal Point

Not Required

Writing

1 Course Required

Scientific Inquiry (SI)
• 1 SWK or 1 Lab Course Required

Social, Cultural, and Behavioral Inquiry (SCBI)
• Not Required

Religious Dimensions (RD)
• 1 Course Required

Understanding the Past (UP)
• 1 Course Required

Other
• Choose 1 course from the above learning domains as an elective

* Students must earn a C- or better in this course.

Notes
Specified required courses within Liberal Studies may have grade minimums (e.g. C- or better). Please consult your advisor or your college and major requirements.

Courses offered in the student's primary major cannot be taken to fulfill LSP Domain requirements. If students double major, LSP Domain courses may double count for both LSP credit and the second major.

In meeting learning domain requirements, no more than one course that is outside the student's major and is cross-listed with a course within the student's major, can be applied to count for LSP domain credit. This policy does not apply to those who are pursuing a double major or earning BFA or BM degrees.

Quantitative Reasoning and Technological Literacy
Readiness for LSP 120 is determined by the math placement test taken online after admission. Students may need to take developmental coursework prior to LSP 120. The LSP 120 requirement may be waived by credit already earned for advanced math coursework or by passing a dedicated proficiency exam. Students who complete both LSP 120 and LSP 121 take one less Learning Domain course. Students may not apply the course reduction to any Domain where only one course is required, and if taken within the SI Domain, the reduction cannot be applied to the SI Lab or SWK requirement.

Major Requirements

First Year
• Technical Drawing Sequence I
  o TEC 151 TECHNICAL DRAWING I
  o TEC 152 TECHNICAL DRAWING I
  o TEC 153 TECHNICAL DRAWING I
• Principles of Design Sequence
  o DES 141 PRINCIPLES OF DESIGN
  o DES 142 PRINCIPLES OF DESIGN
  o DES 143 PRINCIPLES OF DESIGN
• History of Dramatic Literature Sequence (Arts and Literature Requirement)
  o THE 204 HISTORY OF DRAMATIC LITERATURE
  o THE 205 HISTORY OF DRAMATIC LITERATURE
  o THE 206 HISTORY OF DRAMATIC LITERATURE
• three Quarters of Theatre Crew
  o TEC 107 THEATRE CREW
Students are strongly encouraged but not required to also take TEC 104

Second Year

- Sound Design Sequence I
  - DES 208 SOUND DESIGN I
  - DES 209 SOUND DESIGN I
  - DES 210 SOUND DESIGN I
- Sound Technology Sequence I
  - TEC 208 SOUND TECHNOLOGY I
  - TEC 209 SOUND TECHNOLOGY I
  - TEC 210 SOUND TECHNOLOGY I
- Survey of the Arts for Theatre Sequence
  - THE 381 SURVEY OF THE ARTS FOR THEATRE
  - THE 382 SURVEY OF THE ARTS FOR THEATRE
  - THE 383 SURVEY OF THE ARTS FOR THEATRE
- Production Practice Sequence I
  - DES 271 DESIGN PRODUCTION PRACTICE I
  - DES 272 DESIGN PRODUCTION PRACTICE I
  - DES 273 DESIGN PRODUCTION PRACTICE I

Third Year

- Sound Design Sequence II
  - DES 308 SOUND DESIGN II
  - DES 309 SOUND DESIGN II
  - DES 310 SOUND DESIGN II
- Theatrical Collaboration
  - DES 641 THEATRICAL COLLABORATION
  - DES 642 THEATRICAL COLLABORATION
- TEC 320 TECHNICAL COLLABORATION
- Design/Theatre Electives
  - Three courses, chosen in consultation with advisor
- Production Practice Sequence II
  - DES 371 DESIGN PRODUCTION PRACTICE II
  - DES 372 DESIGN PRODUCTION PRACTICE II
  - DES 373 DESIGN PRODUCTION PRACTICE II

Fourth Year

- Sound Design Sequence III
  - DES 408 SOUND DESIGN III
  - DES 409 SOUND DESIGN III
  - DES 410 SOUND DESIGN III
- Design/Theatre Electives
  - Three courses, chosen in consultation with advisor
- Music, Physics, Editing, or other Electives
  - Two courses, chosen in consultation with advisor
- Production Practice III
  - Select three from the following list:
    - DES 471 DESIGN PRODUCTION PRACTICE III
    - DES 472 DESIGN PRODUCTION PRACTICE III
    - DES 473 DESIGN PRODUCTION PRACTICE III
    - DES 490 DESIGN INTERNSHIP

Open Electives

Open elective credit also is required to meet the minimum graduation requirement of 192 hours.
Sound Recording Technology (BS)

The Bachelor of Science degree with an emphasis in Sound Recording Technology (SRT) prepares students for careers in the audio industry. The SRT program includes coursework in classical and popular recording, music production, surround sound audio for film and multimedia, as well as physics, electronics, and mathematics. The faculty is comprised of experienced recording engineers, dedicated to teaching excellence. Drawing upon the resources of the city, students have the opportunity to work and study at Chicago area recording studios and live performance venues.

Learning Outcomes

Core Outcomes

Students will be able to:

- Perform with an acceptable tone quality, pitch and rhythmic accuracy, dynamic control, articulation, and expressiveness.
- Participate in a musical ensemble, with appropriate technique and musicality.
- Identify and analyze the elements of music in a given piece, including an understanding of its compositional processes, aesthetic properties, and artistic, social, and historical context.
- Identify significant composers and works in the Western music tradition, and trace the evolution of musical styles through the Medieval, Renaissance, Baroque, Classical, Romantic, and Contemporary periods, as well as in jazz and select world music cultures.
- Hear, notate, analyze, and perform music through aural skills, sight-singing, and keyboard skills.
- Demonstrate basic conducting knowledge and skills for both instrumental and vocal settings.
- Develop an expanded global awareness and cultural understanding through musical study.
- Describe basic information about health and safety within the contexts of practice, performing, teaching, and listening; topics will include hearing, vocal, and musculoskeletal health and injury prevention.

Program Specific Outcomes

Students will be able to:

- Demonstrate a thorough knowledge of the physics of sound and acoustics.
- Possess technical knowledge of microphones and microphone techniques and creatively use them in audio applications.
- Demonstrate a fundamental knowledge of analog electronics and signal processing and magnetic recording systems.
- Possess a fundamental knowledge of digital electronics and operate contemporary audio recording and processing software.
- Possess a thorough knowledge of analog digital consoles and creatively use the knowledge in audio applications.
- Possess a thorough knowledge of multimedia, synchronize audio with video, and deliver content through optical media authoring.
Music Core Requirements

Course Requirements

All students in the School of Music are required to enroll in the following music courses:

Musicianship (36 credits)

- Musicianship Sequence
  - MUS 110 MUSICIANSHIP I
  - MUS 120 MUSICIANSHIP II
  - MUS 130 MUSICIANSHIP III
  - MUS 210 MUSICIANSHIP IV
  - MUS 220 MUSICIANSHIP V
  - MUS 230 MUSICIANSHIP VI

- Aural Training Sequence
  - MUS 111 AURAL TRAINING I
  - MUS 121 AURAL TRAINING II
  - MUS 131 AURAL TRAINING III
  - MUS 211 AURAL TRAINING IV
  - MUS 221 AURAL TRAINING V
  - MUS 231 AURAL TRAINING VI

- Group Piano Sequence
  - MUS 113 GROUP PIANO I
  - MUS 123 GROUP PIANO II
  - MUS 133 GROUP PIANO III
  - MUS 213 GROUP PIANO IV
  - MUS 223 GROUP PIANO V
  - MUS 233 GROUP PIANO VI

Additional Courses

- MUS 265 MUSICAL TRADITIONS OF AMERICA AND THE WORLD
- MUS 303 BASIC CONDUCTING PRACTICUM
- MUS 304 BASIC CONDUCTING

Applied Music

Students may enroll in a maximum of 4 credits of applied study per quarter, with a maximum of 48 credits total. The requirements for applied study vary by degree program:

- BM in performance, 48 credits
- BM in jazz studies, 30 credits
- BM in composition, 24 credits
- BM in music education, 24 credits
- BM in performing arts management, 24 credits
- BA in music, 16 credits
- BS in sound recording technology, 12 credits

Except performance majors, students may enroll in additional applied credits, which will count towards music electives.

Modern Language Option

If a music student wishes to study a modern language for a three-course sequence (12 credits), one quarter of language study (4 credits) may be used to replace a course requirement in Arts and Literature, Philosophical Inquiry, or Religious Dimensions. The remaining two quarters of language (8 credits) will be applied towards free electives.
Liberal Studies Requirements

Honors program requirements can be found in the individual Colleges & Schools section of the University Catalog. Select Academics, followed by Undergraduate, then Honors Program Alternative.

First Year Program

Chicago Quarter

- LSP 110 DISCOVER CHICAGO  
or LSP 111 EXPLORE CHICAGO

Focal Point

- Not Required

Writing

- WRD 103 COMPOSITION AND RHETORIC I  
- WRD 104 COMPOSITION AND RHETORIC II

Quantitative Reasoning & Technological Literacy

- Not required

Sophomore Year

Multiculturalism in the US

- LSP 200 SEMINAR ON MULTICULTURALISM IN THE UNITED STATES

Learning Domains

Arts and Literature (AL)

- 2 Courses Required

Philosophical Inquiry (PI)

- 1 Course Required

Scientific Inquiry (SI)

- Not Required  
  (Note: Included in specialization)

Social, Cultural, and Behavioral Inquiry (SCBI)

- 1 Course Required

Religious Dimensions (RD)

- 1 Course Required

Understanding the Past (UP)

- 1 Course Required
  * Students must earn a C- or better in this course.

Notes

Courses offered in the student's primary major cannot be taken to fulfill LSP Domain requirements. If students
double major, LSP Domain courses may double count for both LSP credit and the second major.

In meeting learning domain requirements, no more than one course that is outside the student’s major and is cross-listed with a course within the student’s major, can be applied to count for LSP domain credit. This policy does not apply to those who are pursuing a double major or earning BFA or BM degrees.

### Petition to Major

Students are admitted to a specialization on the basis of a petition to major process, which occurs during the spring of the freshmen or sophomore year. The petition to major process differs for each specialization, and students should contact the department chairs or program directors/coordinators for more information. Students are not permitted to enroll in classes in the specialization until they have passed their petition to major.

### Course Requirements

- REC 200 INTRODUCTION TO SOUND RECORDING TECHNOLOGY (2 credits)
- **Sound Recording Technology Sequence**
  - REC 201 RECORDING TECHNOLOGY I
  - REC 202 RECORDING TECHNOLOGY II
  - REC 203 RECORDING TECHNOLOGY III
  - REC 301 RECORDING TECHNOLOGY IV
  - REC 302 RECORDING TECHNOLOGY V
  - REC 303 RECORDING TECHNOLOGY VI
- **Sound Recording Practicum Sequence**
  - REC 304 SOUND PRACTICUM I
  - REC 305 SOUND PRACTICUM II
  - REC 306 SOUND PRACTICUM III
- **PAM 200 INTRODUCTION TO MUSIC BUSINESS**
- **Electro-Acoustic Music Sequence**
  - COM 326 ELECTRO-ACOUSTIC MUSIC I
  - COM 327 ELECTRO-ACOUSTIC MUSIC II
- **Math Sequence**
  - MAT 130 PRECALCULUS
  - MAT 131 TRIGONOMETRY
  - Choose one of the following
    - MAT 150 CALCULUS I
    - MAT 152 CALCULUS III
    - MAT 152 CALCULUS III
- **PHY 110 BASIC ELECTRONICS: PRINCIPLES & TECHNIQUES**
- **PHY 206 SOUND AND ACOUSTICS**
- **PHY 231 LINEAR ELECTRIC CIRCUITS**
- **PHY 232 INTRODUCTION TO DIGITAL ELECTRONICS**
- **PHY 236 THE SCIENCE OF DIGITAL AUDIO**
- Any CSC or DC course - (CSC 110, 150, 200 or 215 recommended)
- **Large Ensemble (3 credits, 1st year)**
- Any Ensemble (3 credits, 2nd, 3rd, 4th years)
- **Music Electives (6 credits)**
- **Free Electives (8 credits)**
Spanish (BA)

In DePaul’s Spanish program, students will study Spanish language, literature and culture. Spanish is one of the most widely spoken languages in the world and one of the official languages of the United Nations and the European Union. Because Spanish is becoming more widely used in the United States, having the ability to speak and understand the Spanish language will provide students with many professional opportunities.

Courses in the Spanish major cover a variety of topics, including:

- Business
- Cinema
- Culture
- Language
- Linguistics
- Literature
- Translation

As Spanish majors, students are encouraged to participate in one of DePaul’s Study Abroad programs in order to grow linguistically and expand their cultural understanding of Spanish-speaking societies. DePaul sponsors programs in Argentina, Chile, Mexico, Peru, Puerto Rico and Spain.

Chicago is a diverse city that—through its festivals, neighborhoods, restaurants, museums, and other cultural institutions—provides students with many opportunities to practice their Spanish and explore the cultures of the Spanish-speaking world.

</tbody>
</table>

**Learning Outcomes**

Students will be able to:

- Proficiently speak, understand, read, and write the studied language(s) to:
  - Engage in conversations.
  - Interpret and create a variety of written texts.
  - Provide and obtain information
  - Express feelings and emotions.
  - Exchange opinions.
- Acquire knowledge of the cultures related to the studied language(s) with appropriate background in geography, history, politics, and society.
- Acquire knowledge of the literary traditions related to the studied language(s) along with techniques of literary and rhetorical analysis.
- Acquire basic notion of the history and theory of language and language study, including linguistics, sociolinguistics, language acquisition, and dialectology.
- Acquire basic notion of the theory and practice of translation and interpretation.
College Core Requirements

Study in the Major Field

The student’s course of study in the College consists of three parts: Liberal Studies, the major field, and electives. Together these three parts contribute to the liberal education of the student which is the common purpose of all study in the College. By “liberal education” the College understands not only a deep and thorough knowledge of a particular area of study but a knowledge of the diverse areas of study represented by criticism, history, the arts, the behavioral and social sciences, philosophy, religious studies, the natural science, and mathematics.

The major field program generally is built upon a set of core courses and a specialized “concentration.” The number of courses required for a major varies by department. Most students go beyond the minimum requirements, electing additional courses which both broaden and deepen their understanding of their chosen discipline.

Because no academic major program is built in isolation, students are required to pursue a number of electives of the student’s choice. The inherent flexibility of this curriculum demands that the student consult an academic advisor at each stage in the total program and at least once prior to each registration.

Students will be prompted to visit the College Office for their official graduation check early in their senior year.

Declaration of Major, Minor and Concentration

All students in the College are required to declare a major field prior to beginning their junior year. The student will then be assigned a faculty advisor in the major field department or program and should make an appointment to see that advisor at his or her earliest convenience.

Students must declare or change majors, minors, and concentrations, via Campus Connection. However, for the purpose of exploring the possibility of changing a major field, the student should consult an academic advisor in the Office for Academic Advising Support.

The Modern Language Requirement (MLR)

All students will be required to demonstrate competence in a modern language (i.e., a language other than English) equivalent to the proficiency attained from one year of college-level language study. This Modern Language Requirement (MLR) may be demonstrated by:

- placing into 104 or above on the DePaul language placement exam
- completing the last course or earning AP/IB credit for the last course in the first-year college sequence of any language (e.g. 103 for DePaul language classes)
- completing a college course or earning AP/IB credit for a college course beyond the first-year level in any language (e.g. 104 or above for DePaul language classes)
- completing the final course of a four-year sequence of the same modern language in high school*
- completing a proctored exam by BYU and passing the exam (see the Department of Modern Languages website for registration details)
- completing a proctored Written Proficiency Test (WPT) by Language Testing International (LTI) and achieving a score of Beginner High or above (see the Department of Modern Languages website for registration details)

* Students are strongly encouraged to take the DePaul language placement exam even if they have met the MLR via study of a language in high school. This will ensure continuation of language study at the proper level.

Students who complete an Inter-College Transfer (ICT) to the College will abide by this MLR in place on the effective date of the ICT, regardless of when they first matriculated at DePaul.

Students who have met the MLR and wish to pursue further work in the language may elect the "Modern Language Option" (MLO) of the Liberal Studies Program (see “Special Programs”).

External Credit and Residency

A student who has been admitted to the College begins residency within the college as of the first day of classes of the term in which the student is registered. Students in residence, whether attending on a full-time or part-time basis, may not take courses away from DePaul University without the written permission of the college. Permission must be obtained in advance of registration to avoid loss of credit or residency in the college; see the LAS website for more information.
Liberal Studies Requirements

Honors program requirements can be found in the individual Colleges & Schools section of the University Catalog. Select Academics, followed by Undergraduate, then Honors Program Alternative.

Major Requirements

Course Requirements

- SPN 201 ADVANCED GRAMMAR AND COMMUNICATION
- SPN 202 ADVANCED COMPOSITION AND COMMUNICATION
- SPN 203 ADVANCED CONVERSATION
- SPN 352 SPANISH PHONOLOGY AND PHONETICS
- SPN 220 INTRODUCTION TO LITERARY ANALYSIS IN SPANISH
- Three SPN Literature courses, one from three of the following areas:
  - Spanish Literature from Middle Ages through Golden Age
Spanish Literature from Enlightenment to present
Latin American Literature from origins through Romanticism
Latin American Literature from Modernism through present

- Two 300-level SPN electives
- Two 200/300 level SPN electives

Students whose level of proficiency allows them to begin studying Spanish at DePaul in SPN 202 or higher may substitute 300-level language courses for three 200-level language courses. Heritage speakers of Spanish should take:

- SPN 205 ADVANCED GRAMMAR AND COMPOSITION FOR HERITAGE SPEAKERS I (instead of SPN 201)
- SPN 206 ADVANCED GRAMMAR AND COMPOSITION FOR HERITAGE SPEAKERS II (instead of SPN 202)
- SPN 207 ADVANCED CONVERSATION FOR THE HERITAGE SPEAKER (instead of 203/204)

Spanish Literature Categories

Category I: Spanish Literature from Middle Ages through Golden Age

- SPN 301 SPANISH LITERATURE I: MIDDLE AGES THROUGH THE GOLDEN AGE
- SPN 308 MEDIEVAL SPANISH LITERATURE
- SPN 309 SPANISH BALLAD
- SPN 310 GOLDEN AGE POETRY
- SPN 311 CERVANTES
- SPN 324 THE BIRTH OF THE NOVEL IN SPAIN
- SPN 333 GOLDEN AGE THEATER

Category II: Spanish Literature from Enlightenment to present

- SPN 302 SPANISH LITERATURE II: THE ENLIGHTENMENT TO THE PRESENT
- SPN 312 THE SPANISH NOVEL
- SPN 313 THE GENERATION OF 1898
- SPN 332 NINETEENTH-CENTURY SPANISH NOVEL
- SPN 339 THE GENERATION OF 1927

Category III: Latin American Literature from origins through Romanticism

- SPN 303 LATIN AMERICAN LITERATURE & CULTURE I
- SPN 374 LITERATURE OF THE CONQUEST
- SPN 375 LATIN AMERICAN LITERATURE FROM INDEPENDENCE TO MODERNISM
- SPN 376 SOR JUANA INES DE LA CRUZ
- SPN 378 FOUNDATIONAL FICTIONS

Category IV: Latin American Literature from Modernism to present

- SPN 304 LATIN AMERICAN LITERATURE AND CULTURE II
- SPN 305 LATIN AMERICAN NOVEL
- SPN 306 HISPANIC LITERATURE OF THE CARIBBEAN
- SPN 315 MEXICAN LITERATURE
- SPN 321 U.S. LATINO/A WRITERS
- SPN 323 REVOLUTION IN LATIN AMERICAN LITERATURE
- SPN 328 MODERN LATIN AMERICAN THEATRE
- SPN 329 LATINO GAY AND LESBIAN LITERATURE
- SPN 335 U.S. LATINA WRITERS

Open Electives

Open elective credit also is required to meet the minimum graduation requirement of 192 hours.
Spanish (Minor)

The Spanish language, spoken by over 30 million people in the United States, is one of the world’s major languages. DePaul’s minor in Spanish offers a basic proficiency in writing, reading and speaking Spanish, which can open the door to several career opportunities.

The minor consists of a total of 5 courses in Spanish language at the 200/300-level.

Students majoring in Spanish (BA) or minoring in Commercial Spanish are restricted from earning this minor.

Spanish Linguistics (Minor)

Course Requirements

The Spanish Linguistics minor introduces students to the formal study of Spanish Phonetics, Phonology, Morphology, Syntax, Sociolinguistics and Spanish in the U.S.

Students seeking to complete a minor in Spanish Linguistics must complete 24 quarter-hour credits of coursework, or 6 courses, distributed as follows:

- Two advanced language courses from the following:
  - SPN 201 ADVANCED GRAMMAR AND COMMUNICATION
  - SPN 202 ADVANCED COMPOSITION AND COMMUNICATION
  - SPN 203 ADVANCED CONVERSATION
  - SPN 205 ADVANCED GRAMMAR AND COMPOSITION FOR HERITAGE SPEAKERS I
  - SPN 206 ADVANCED GRAMMAR AND COMPOSITION FOR HERITAGE SPEAKERS II
  - SPN 207 ADVANCED CONVERSATION FOR THE HERITAGE SPEAKER
- SPN 242 INTRODUCTION TO SPANISH LINGUISTICS
- 12 credits of advanced (300-level) coursework in Spanish linguistics, selected from the list of approved electives. Any three of the following may be chosen (additional courses may be considered with the approval of the student’s faculty advisor):
  - SPN 351 SPANISH IN THE U.S.
  - SPN 352 SPANISH PHONOLOGY AND PHONETICS
  - SPN 353 THE STRUCTURE OF SPANISH
  - SPN 354 SPANISH SOCIOLINGUISTICS
  - SPN 355 THE HISTORY OF THE SPANISH LANGUAGE
  - SPN 391 SOCIOLINGUISTICS OF HERITAGE LANGUAGE LITERACY
  - SPN 397 SPECIAL TOPICS IN SPANISH (depending on topic, with advisor approval)
  - SPN 399 INDEPENDENT STUDY (depending on topic, with advisor approval)
  - MOL 354 THEORETICAL FOUNDATIONS/CURRENT RESEARCH SECOND/FOREIGN LANGUAGE ACQUISITION
  - MOL 356 PSYCHOLINGUISTICS

Depending on their level of prior expertise with Spanish, students may need to complete courses at the Basic and Intermediate levels before enrolling in 200 or 300-level language courses.

Students majoring in Spanish (BA) or minoring in Spanish or Commercial Spanish are restricted from earning this minor.
Spanish Translation (Minor)

Course Requirements

- 4 credits of an advanced language level course (SPN 201 or SPN 202 / SPN 205 or SPN 206 for Heritage Language Learners)
- 8 credits of required courses (SPN 243 and SPN 325) to develop appropriate levels of proficiency in the language and methods of translation from Spanish to English and from English to Spanish
- 12 credits of advanced elective coursework in related classes.

Spanish Translation Minor Approved Electives

The Spanish program offers a total of six courses in areas related to business, health, law, media, and community engagement from which students in the Translation Minor could select their electives:

- SPN 251 SPANISH FOR THE MEDICAL PROFESSIONS
- SPN 252 COMMERCIAL SPANISH I
- SPN 254 SPANISH FOR LAW PROFESSIONALS
- SPN 320 COMMERCIAL SPANISH II
- SPN 393 LATINO MEDIA AND DIGITAL CULTURE LITERACY
- SPN 394 LATINO CULTURAL LITERACY AND COMMUNITY ENGAGEMENT

Depending on their level of prior expertise with Spanish, students may need to complete courses at the Basic and Intermediate levels before enrolling in 200 or 300-level language courses.

Students majoring in Spanish (BA) or minorin Spanish or Commercial Spanish are restricted from earning this minor.

Special Education (BS)

The Bachelor of Science in Special Education will prepare you to teach students with exceptionalities in kindergarten through 12th grade in a variety of urban and suburban educational settings, including public and private schools.

By completing the Special Education program, you will be eligible for the Illinois Learning and Behavior Specialist I (LBS1) license, provided you complete additional state requirements.

As a Special Education major, you will learn to:

- Apply specific strategies needed to teach exceptional learners
- Consult and co-teach in general education inclusion classrooms
- Modify content for exceptional learners in reading, math, natural and social sciences
- Teach small groups of exceptional students in a resource room
- Teach students with more significant disabilities in a self-contained classroom

Courses in the Special Education curriculum will prepare you to do the following:

- Assess exceptional learners
- Implement classroom and behavior management
- Collaborate with parents and professionals
- Understand how exceptional students learn
- Teach reading, math and the natural and social sciences
- Differentiate instruction
- Teach students with significant disabilities
- Develop transitional and vocational plans
Students entering the program must be able and willing to devote themselves to a program requiring a minimum of 130 hours of field experience. Students should expect to spend 40 hours of evening field hours in the Education and Counseling Center, and 90 hours of daytime field experience in schools. These school-based clinical hours are completed in conjunction with methodology courses that require students to spend a half-day each week in a school. In addition, the student must spend a minimum of 16 weeks in full-time student teaching.

Please make sure you consult the Liberal Studies Requirements, Major Requirements, and College Core Requirements for full degree requirements.

Licensure

This program leads to Illinois licensure in special education (Learning and Behavior Specialist 1)

Learning Outcomes

**Students will be able to:**

- Understand the philosophies, theories, laws, diverse and historical points of view, and human issues related to special education and how they influence assessment, planning, implementation, and program evaluation, as well as families, cultures, schools, special education services, school systems, and agencies.
- Understand characteristics of typical and atypical children and how exceptional learning needs interact with human development, social and academic learning, life skills, family, and community.
  - Respond to the abilities and behaviors of children with learning disabilities, cognitive disabilities, or physical and multiple disabilities.
- Understand characteristics of typical and atypical children and how exceptional learning needs interact with human development, social and academic learning, life skills, family, and community.
- Understand characteristics of typical and atypical children and how exceptional learning needs interact with human development, social and academic learning, life skills, family, and community.
- Understand characteristics of typical and atypical children and how exceptional learning needs interact with human development, social and academic learning, life skills, family, and community.
- Understand the effects of exceptional conditions on learning. Students should understand the interrelationships of beliefs, traditions, language, and cultures with students, families, schools and the student's exceptional condition and apply these understandings when providing meaningful and challenging learning experiences.
- Demonstrate proficiency in the use of mathematics.
  - Understand, communicate, and connect the major concepts, procedures, and reasoning processes of mathematics.
  - Promote students' mathematical thinking skills.
- Have a general understanding of reading and reading instruction and know how to assess, teach, and support the literacy education of students with disabilities.
- Understand the fundamental concepts and principles related to the natural and social sciences and know how to assess, teach, and support the science and social science education of students with disabilities.
- Use a repertoire of strategies to individualize instruction, promote development and positive learning results, and modify learning environments for students accessing the general curriculum.
  - Promote students' learning and generalization of critical thinking, problem solving, and performance skills and increase self-awareness, -management, -control, -reliance, and -esteem.
- Use a repertoire of strategies to individualize instruction, promote development and positive learning results, and modify learning environments for students accessing an independence curriculum. Students should promote students' learning and generalization of critical thinking, problem solving, and performance skills and increase self-awareness, -management, -control, -reliance, and -esteem.
- Create learning environments that foster active engagement in learning, cultural understanding, safety, positive social interactions, independence, self-motivation, -direction, -advocacy, and personal empowerment. Students should intervene and teach students to respond to current expectations. Students should help regular educators, paraprofessionals, and volunteers sustain positive learning environments.
- Understand language development and use strategies and assistive technologies to teach and support
students’ communication skills. Students should be able to use an effective language model and match communication methods and resources to students’ proficiency, primary language, and culture.

- Work in collaboration with students, families, and other professionals, create, monitor, and modify appropriate and effective individualized educational plans for students accessing a general curriculum, that include challenging yet achievable goals/objectives, powerful instructional strategies, appropriate materials, transition plans, and appropriate technologies.
- Work in collaboration with students, families, and other professionals, create, monitor, and modify appropriate and effective individualized educational plans for students accessing an independence curriculum, that include challenging yet achievable goals/objectives, powerful instructional strategies, appropriate materials, transition plans, and appropriate technologies.
- Use assessment results to identify needs, make wise educational decisions, and to plan, implement, and adjust instruction. Students should understand legal, technical, and technological aspects of assessment.
  - Collaborate with educators, families and professionals to conduct appropriate, multifaceted assessments and monitor progress.
- Enable students with disabilities to learn about and to use assistive technology.
- Undertake independent inquiry and use technology as one tool to assist him or her in the overall inquiry process.
- Be aware of the multiple roles of special educators, the need for sensitivity to the many aspects of diversity and exceptionality, and the serious, complex, legal and ethical issues involved in special education.
  - Engage in on-going reflection and professional development and adjust practice appropriately.
- Effectively collaborate with families, educators, and other professionals in culturally responsive ways to address student educational needs, advocate for students, plan effective transitions, and serve as a resource to colleagues and community.

### College Core Requirements

#### Dispositions

The academic programs within the College of Education have set forth these dispositions as educational and professional expectations for all students. Students should be aware that failing to abide by DePaul University or College of Education policies including, under certain circumstances, these dispositions, could result in adverse consequences for the student, including removal from his or her program, the College of Education, or the University.

The following dispositions apply to Early Childhood Education, Elementary Education, Physical Education, Secondary Education, and World Language Education majors only:

- Reflects on progress and identifies strengths and weaknesses, including evaluating strategies for success, finding alternatives for inappropriate strategies, and modifying future practices
- Is receptive to faculty feedback and acts meaningfully and professionally upon suggestions
- Values critical thinking, including engaging theoretical and philosophical frameworks and shows evidence of critical thinking through discussion and writing (e.g., journals, response to prompts)
- Understands the importance of and is committed to communicating clearly orally and in writing both in traditional and in new and emerging digital formats
- Values and is committed to continually developing strong content area knowledge and/or knowledge of the professional field, including pedagogical content knowledge
- Takes initiative, uses imagination and creativity, and seeks out information using a variety of human and material resources and technology to inform his or her teaching
- Is aware of the role of classroom environment and uses management procedures that reflect respect and care for learners and concern for their emotional and physical well being
- Takes the time and effort needed to understand how students learn, including discovering their interests and experiences and determining how to shape teaching acts (using technology as appropriate) that engage learners meaningfully and actively
- Values and is committed to using assessment to evaluate and ensure the continuous intellectual, social, emotional, and physical development of the learner
- Respects and considers cultural contexts in order to determine how to be responsive to learners and to proactively promote all students’ learning
- Values and is responsive to diverse learners’ academic, emotional, and social needs through teaching acts (including careful instructional planning, implementation, and differentiation) and through everyday interactions with students
- Is committed to collaboration with colleagues, families, and communities in order to promote all students’
Recognizes and fulfills professional responsibilities and habits of conduct (e.g., dress, language, preparedness, attendance, punctuality, etc.)

Demonstrates collegiality, honesty, good judgment, courtesy, respect, and diplomacy

Balances self-confidence and assertiveness with respect for others’ perspectives

Respects the requirements, expectations, and procedures of both the College of Education and of our field partners and appreciates the issues of trust, fairness, and professionalism involved

The following dispositions apply to Special Education majors only:

- Is receptive to faculty feedback and acts meaningfully and professionally upon suggestions
- Reflects on his or her own progress, identifies strengths and weaknesses, and evaluates strategies for success and professional growth
- Takes initiative
- Is open to new ideas and engagement in learning
- Respects diversity and cultural contexts to determine how to be responsive to learners and to proactively promote all students’ learning
- Expresses positive attitudes toward individuals with disabilities and a willingness to advocate on their behalf
- Is committed to collaboration with colleagues, families, and communities in order to promote all students’ learning and development
- Demonstrates professional ethical and legal behavior as defined by the respective codes of ethics and laws
- Demonstrates consistent professional behavior across all academic settings
- Maintains appropriate interpersonal and professional boundaries
- Accepts personal responsibility for one's behavior
- Expresses feelings and opinions effectively and appropriately
- Upholds confidentiality

**Skill Building Courses**

Before taking any math or English courses, students must take the DePaul placement tests to determine if skill level is at the college level. If placement indicates skill level in these courses, the courses become part of degree requirements. Consult with your advisor regarding placement test results and any required classes.

**Advanced Standing**

Students are conditionally admitted to the College of Education. There are additional requirements to reach Advanced Standing in your program in the College of Education. Requirements must be met to progress in the major and take courses in the Advanced Standing category.

Advanced Standing requirements are:

- Maintain a DePaul undergraduate 2.5 GPA
- Pass the Illinois Test of Academic Proficiency (TAP)
- Submit a petition for advanced standing form

Students should attempt to complete the Advanced Standing requirements soon after beginning the program. There is no time limit to meet these criteria; however, students will only be able to take pre-education courses until requirements have been met. Students can also take liberal studies or content area courses before or after meeting Advanced Standing requirements.

**Modern Language Competence Requirement**

Students pursuing a Bachelor of Arts degree in the College of Education will be required to demonstrate a measure of competence in a modern language, as defined by the college. Such competence may be demonstrated in one of several ways:

- completing two years of a language sequence in high school
- completing the last course in the first-year college sequence of any language
- completing a college course beyond the first-year level in any language
- achieving a satisfactory score on any of the Modern Language placement examinations administered at DePaul
- achieving a satisfactory rating in a proficiency examination accepted by DePaul
- achieving a score of 3 or higher on the Advance Placement (AP) test for any language
- achieving a score of 5 or higher in the Language B assessment from a Standard or Higher Level International Baccalaureate (IB) program
- achieving a satisfactory score on the CLEP examination

Please note: The Modern Language Competence Requirement is not required for students in the Early Childhood Education: SNL Joint Program (BÆCE) program.
For further information regarding satisfactory scores and possible credit from the DePaul placement, AP, CLEP, or IB examinations, please contact the Office of the University Registrar.

Students who complete an Inter-College Transfer (ICT) to the College of Education will abide by the COE Modern Language Requirement in place on the effective date of the ICT.

B.A. students who meet College requirements and wish to pursue further work in the language may elect the "Modern Language Option" of the Liberal Studies Program. While B.S. students are not required to demonstrate competency in a modern language, the "Modern Language Option" is available to them for language study at any level.

**Licensure Tests**

All individuals licensed by the Illinois State Board of Education (ISBE) are required to complete licensure tests specific to their teaching license.

**Field Experiences**

Each student seeking licensure from the College of Education/Professional Education Unit must complete supervised field experiences in appropriate settings in conjunction with education courses. The field experiences must include a variety of grade levels, multicultural experiences, and a minimum of 10 hours in special education settings. All field experiences must be completed prior to final approval for student teaching. Field experience hours should be entered by the student into the FEDS system when completing courses with field experience requirements.

**Endorsements**

An endorsement is a statement appearing on a license that identifies the specific subjects or grade level that the license holder is authorized to teach.

The Illinois State Board of Education (ISBE) issues endorsements in various subject areas. To view the full list and requirements, visit the ISBE website.

Please note that the Illinois State Board of Education (ISBE) may change the state licensure and endorsement requirements at any time and without prior notice. Individuals are bound by the requirements in place when applying for the license or endorsement, not the requirements in place when beginning the program.

**Student Teaching Requirements**

Student Teaching is the culminating clinical experience in the student's program. All students in teacher preparation programs must meet the following requirements before applying for student teaching:

**Academic Requirements:**

- Completion of all Liberal Studies, Pre-Education, Advanced Standing and concentration/content area courses
- Overall cumulative G.P.A. of 2.50 or better
- Cumulative GPA. of 2.75 or better in all education courses
- Meet all other program requirements (e.g., modern language and residency requirements)
- Meet designated program standards
- Pass the required Illinois licensure content area test

**Clinical Requirements:**

- Completion of all required field experiences
- Three satisfactory evaluations in field experiences
- Three satisfactory faculty recommendations
- Attendance at mandatory meeting for student teaching
- Application for student teaching, resume, transcripts, and writing sample (check deadlines)
- Review and approval by Student Teaching Committee of the College of Education

**Student Teaching Timeline and Deadlines:**

- Attend a Mandatory Meeting approximately 1 year prior to expected quarter of student teaching.
- Submit application for student teaching after attending Mandatory Meeting, approximately 1 year prior to student teaching.
- Academic requirements are due one quarter before expected quarter of student teaching.
- Clinical requirements are completed as course requirements. Field experience hours are entered by the student as coursework is completed.
Online Faculty Evaluations are entered by the instructor of relevant courses. All data must be entered in the Field Experience Documentation System (FEDS) due one month prior to student teaching.

Individual child care agencies and public and private school districts may have additional requirements (application, training, background check, etc.).

**Degree Conferral and Graduation**

The awarding of a degree is not automatic. You must submit an application to be considered for the degree. DePaul awards and posts degrees at the end of each regular academic term (autumn, winter, spring, summer).

It is your responsibility to initiate the degree conferral application process by submitting an online application. Submitting an application means you intend to finish your degree requirements by the end of the term for which you have applied.

Undergraduate students must be approved for student teaching and complete student teaching and capstone to be cleared for the degree. Student must submit graduation application for the quarter that matches the quarter you are student teaching.

After you submit the application, you cannot register for any term after the one selected in the application.

To apply for degree conferral, log on to Campus Connection. Select STUDENT CENTER, then MY ACADEMICS. On screen instructions will take you through the application process.

Provided that all requirements and financial obligations are met, degrees are posted 30 days after the official end of the term. Official dates are listed on the Academic Calendar.

DePaul holds one commencement ceremony each year in June. If you intend to participate, you must first apply for degree conferral for the current academic year and then submit a cap and gown order. Honors are not announced at the ceremony for undergraduates completing their final courses in spring quarter because a final GPA is not available at the time of the ceremony.

Additional information about degree conferral and graduation can be found on the College of Education website at: http://education.depaul.edu/.

**Licensure**

Requirements for licensure include completion of full bachelor's degree program, all licensure tests (including OPI for world language majors), and awarding of bachelor's degree. A bachelor's degree is required to qualify for licensure and must be awarded before applying for the license.

Individuals must submit an application directly to the Illinois State Board of Education after completion of requirements and after DePaul has submitted notification to ISBE. Application requirements include application form, application fee, official transcripts, and registration fee.

All individuals must meet ISBE requirements in place at the time of application for the license. Requirements are subject to change per the discretion of ISBE. All coursework and requirements pertaining to licensure requirements must be completed before DePaul University can recommend an individual for the license.

Individuals seeking additional endorsements after applying for the licensure must contact ISBE directly for an evaluation request.

All coursework and requirements must be completed before DePaul University can recommend an individual for the license.
Liberal Studies Requirements

Honors program requirements can be found in the individual Colleges & Schools section of the University Catalog. Select Academics, followed by Undergraduate, then Honors Program Alternative.

First Year Program

Chicago Quarter

- LSP 110 DISCOVER CHICAGO
  or LSP 111 EXPLORE CHICAGO

Focal Point

- LSP 112 FOCAL POINT SEMINAR

Writing

- WRD 103 COMPOSITION AND RHETORIC I *
- WRD 104 COMPOSITION AND RHETORIC II *

Quantitative Reasoning & Technological Literacy

- LSP 120 QUANTITATIVE REASONING & TECHNOLOGICAL LITERACY I
- LSP 121 QUANTITATIVE REASONING AND TECHNOLOGICAL LITERACY II
  (Note: See information below)

Sophomore Year

Multiculturalism in the US

- LSP 200 SEMINAR ON MULTICULTURALISM IN THE UNITED STATES

Junior Year

Experiential Learning

- Met by successful completion of required field experience hours.

Senior Year

Capstone

- LSI 384 CAPSTONE IN SPECIAL EDUCATION *
  (Note: This must be taken with student teaching. Students must earn a C or better in this course.)

Learning Domains

Arts and Literature (AL)

- 2 Courses Required

Philosophical Inquiry (PI)

- 2 Courses Required
  - LSE 380 PHILOSOPHICAL ISSUES IN EDUCATION AND CULTURE
  - 1 Additional Course
    (Note: PHL 100 recommended)

Scientific Inquiry (SI)
3 Courses Required:
  - 1 BIO
  - 1 CHE/ENV/GEO/PHY
  - 1 Additional Course
    (Note: One course must be a lab or SWK.)

Social, Cultural, and Behavioral Inquiry (SCBI)

- 3 Courses Required
  - PSC 120 THE AMERICAN POLITICAL SYSTEM
  - 2 Additional Courses

Religious Dimensions (RD)

- 1 Course Required

Understanding the Past (UP)

- 2 Courses Required
  (Note: One must be US History.)

* Students must earn a C- or better in this course.

Notes

Specified required courses within Liberal Studies may have grade minimums (e.g. C- or better). Please consult your advisor or your college and major requirements.

Courses offered in the student's primary major cannot be taken to fulfill LSP Domain requirements. If students double major, LSP Domain courses may double count for both LSP credit and the second major.

In meeting learning domain requirements, no more than one course that is outside the student's major and is cross-listed with a course within the student's major, can be applied to count for LSP domain credit. This policy does not apply to those who are pursuing a double major or earning BFA or BM degrees.

Quantitative Reasoning and Technological Literacy

Readiness for LSP 120 is determined by the math placement test taken online after admission. Students may need to take developmental coursework prior to LSP 120. The LSP 120 requirement may be waived by credit already earned for advanced math coursework or by passing a dedicated proficiency exam. Students who complete both LSP 120 and LSP 121 take one less Learning Domain course. Students may not apply the course reduction to any Domain where only one course is required, and if taken within the SI Domain, the reduction cannot be applied to the SI Lab or SWK requirement.

Major Requirements

Course Requirements

Pre-Education Core: 22 quarter hours with a grade of C or better required:

- LSI 300 INTRO TO SPECIAL EDUCATION I: EXCEPTIONALITY & LEARNING
- LSI 301 INTRO TO SPECIAL EDUCATION II - FOUNDATIONS AND CHARACTERISTICS
- LSI 302 INSTRUCTION AND DIFFERENTIATION IN SPECIAL EDUCATION: CONTENT AREA
- LSI 310 TEACHING MATHEMATICS TO EXCEPTIONAL STUDENTS
- LSI 311 TEACHING MATHEMATICS FIELD EXPERIENCE LAB (2 credit hours)
- SCU 207 SOCIAL AND HISTORICAL ISSUES IN EDUCATION
Advanced Standing Courses: 50 quarter hours required (excluding courses counted as Pre-Education Core) with a grade of C or better.

- BBE 311 FUNDAMENTALS OF ENGLISH LANGUAGE LEARNER EDUCATION
- SCU 336 ADOLESCENT AND ADULT GROWTH AND DEVELOPMENT OR SCU 337 HUMAN GROWTH AND DEVELOPMENT
- LSI 303 CLASSROOM AND BEHAVIOR MANAGEMENT IN SPECIAL EDUCATION
- LSI 314 TEACHING LITERACY TO EXCEPTIONAL STUDENTS
- LSI 315 TEACHING LITERACY FIELD EXPERIENCE LAB (2 credit hours)
- LSI 320 COLLABORATION AND SPECIAL EDUCATION
- LSI 321 FORMAL ASSESSMENT IN SPECIAL EDUCATION
- LSI 322 TEACHING STUDENTS WITH SIGNIFICANT DISABILITIES I: ACADEMICS, LIFE SKILLS, & TRANSITION
- LSI 323 TEACHING STUDENTS WITH SIGNIFICANT DISABILITIES II: COMMUNICATION & SOCIAL SKILLS
- LSI 324 PRACTICUM I: INCLUSION SETTING (2 credit hours)
- LSI 325 TOPICS IN SPECIAL EDUCATION (2 credit hours)
- LSI 327 PRACTICUM II: SELF-CONTAINED SETTING (2 credit hours)
- LSI 328 CONTEMPORARY ISSUES IN SPECIAL EDUCATION (2 credit hours)
- LSI 329 TEACHING LITERACY IN THE CONTENT AREAS
- LSI 383 STUDENT TEACHING SEMINAR

Open Electives: 20 quarter hours, grade of C or better required.

Open elective credit also is required to meet the minimum graduation requirement of 192 hours. The following cannot be used to fulfill an open elective: WRD 98, MAT 94 and MAT 95.

Student Teaching: 20 quarter hours required, grade of B- or better required

Registration in student teaching requires completion of all requirements and procedures indicated in the college core section. EDU 95 indicates to the Illinois State Board of Education that all field experience hours are complete.

- LSI 385 STUDENT TEACHING IN SPECIAL EDUCATION: ELEMENTARY (8 credit hours)
- LSI 386 STUDENT TEACHING IN SPECIAL EDUCATION: SECONDARY (12 credit hours)

Licensure Tests

All individuals licensed by the Illinois State Board of Education (ISBE) are required to complete licensure tests specific to their teaching license. Special Education majors must complete the following tests:

- Test of Academic Proficiency (TAP) (test #400) - assesses knowledge of reading comprehension, language arts, writing, and math. Test is required to qualify for Advanced Standing. *Check with your advisor about qualifying for a waiver with acceptable ACT or SAT test scores.
- Learning Behavior Specialist (#155) - assesses knowledge of working with students with disabilities and special needs. Test is required before Student Teaching (deadlines apply).
- General Curriculum for Special Education Teachers- (#163)- assesses knowledge of reading & literacy, mathematics, natural science, and social science. Test is required before Student Teaching (deadlines apply).
- EdTPA - assessment conducted during the student teaching experience including video clips of instruction, lesson plans, student work samples, analysis of student learning and reflective commentaries. Students will submit an electronic portfolio to an outside agency for independent evaluation and a fee will be imposed by that agency as part of the assessment.
**Special Education (Minor)**

The Special Education Minor will prepare general educators to work with a variety of learners with disabilities in their classrooms. If desired, upon completion of the minor candidates will be eligible to take the Learning-Behavior Specialist Test (#155) to earn the special education endorsement on their primary license. This will enable candidates to teach in general or special education classrooms within their licensure range. Beyond increasing candidates' foundational knowledge and repertoire of teaching skills, adding an endorsement to primary licensure will enhance versatility in the job market.

The movement toward inclusive practices in schools requires educators to be prepared to work with individuals with disabilities in their classrooms. According to the National Center for Education Statistics (2015), in 2011 95% of students with disabilities were served in regular schools, with 61% spending 80% or more of their time inside the general education classroom. It is therefore beneficial for general education candidates to learn techniques, methods, and strategies to assist students with disabilities in their classrooms.

**Course Requirements**

The Special Education Minor requires 26 credit hours (7 courses). This includes 4 core courses plus one course from each of 3 areas as seen below.

**Core Courses**

- LSI 302 INSTRUCTION AND DIFFERENTIATION IN SPECIAL EDUCATION: CONTENT AREA
- LSI 303 CLASSROOM AND BEHAVIOR MANAGEMENT IN SPECIAL EDUCATION
- LSI 320 COLLABORATION AND SPECIAL EDUCATION
- LSI 321 FORMAL ASSESSMENT IN SPECIAL EDUCATION

**Area 1 (choose one of the following):**

- LSI 301 INTRO TO SPECIAL EDUCATION II - FOUNDATIONS AND CHARACTERISTICS
- LSI 346 STRATEGIES FOR MAINSTREAMING AND INCLUSION

**Area 2 (choose one of the following):**

- LSI 322 TEACHING STUDENTS WITH SIGNIFICANT DISABILITIES I: ACADEMICS, LIFE SKILLS, & TRANSITION
- LSI 323 TEACHING STUDENTS WITH SIGNIFICANT DISABILITIES II: COMMUNICATION & SOCIAL SKILLS

**Area 3 (choose one of the following):**

- LSI 324 PRACTICUM I: INCLUSION SETTING  (2 credit hours)
- LSI 327 PRACTICUM II: SELF-CONTAINED SETTING  (2 credit hours)

**Minor in Special Education with LSB1 Endorsement**

This option is only available to undergraduates in the College of Education pursuing ISBE licensure.

The minor with endorsement requires the 7 courses above, plus a passing score on the ISBE Learning-Behavior Specialist Test (#155).

**Note:** Students in DePaul's College of Education program in Special Education cannot select the Special Education Minor.
Stage Management (BFA)

The Theatre School's Bachelor of Fine Arts (BFA) degree in Stage Management is a blend of training in management, design and technical skills. The four-year curriculum in many ways simulates a stage managers professional experience and process. Students learn to communicate with and manage all areas of production. Students collaborate with directors, designers, actors, administration and our professional production staff as part of our production program.

Learning Outcomes

Core Outcomes

Students will be able to:

- Identify and describe the historical and theoretical significance of a range of theatrical artists, works and artistic approaches from antiquity to the present, encompassing a broad range of periods, cultures, and styles.
- Synthesize and apply elements of their education and training in classes, rehearsals, and productions.
- Participate in theatrical production in a professional manner, with discipline, respect, and maturity.
- Demonstrate the role of the theatre practitioner as an active member of society and of the cultural and social impact of the arts.

Program Specific Outcomes

Students will be able to:

- Apply General knowledge of theatre history, dramatic literature covering a broad range of historical periods, cultures, and styles, and major theatre artists on both a national and international level.
- Utilize he principles and vocabulary of performance, directing, design, and a thorough grounding in the theory of their particular area of specialization.
- Write with competency in a variety of writing styles from casual to formal.
- Fully engage with knowledge through the ability to access, analyze, and evaluate information and ideas from multiple sources in order to identify underlying arguments and assumptions and to formulate conclusions.
- Utilize existing knowledge to generate and synthesize ideas in original, creative, and imaginative ways.
- Articulate clearly the process of transforming the written text into the theatrical event.
- Design, develop, and execute a noteworthy intellectual and/or creative project.
- Develop a profound understanding of the role of the artist in society.
- Develop an understanding of the cultural and sociopolitical context of theatre from the perspective of both historical and contemporary practice.
- Develop strong self-discipline, self-motivation, and an ability to work independently.
- Work collaboratively and effectively within a group process and with creative artists from all theatrical disciplines.
- Understand the interrelationship of what it means to be human and what it means to be a theatre artist.
- Evaluate ethical issues with respect to theatrical analysis, concept, and practice.
- Contribute artistically to communities through socially responsible engagement and leadership.
- Develop an understanding of and a respect for a multiplicity of cultural and artistic perspectives that may be different from their own.
- Understand the availability and/or scarcity of global resources for a sustainable future
- Set goals for future work that are the result of rigorous self-appraisal and reflection.
- Articulate their skills and knowledge as they represent themselves to external audiences.
- Work both independently and collaboratively.
- Use technology to create, communicate, and synthesize their ideas.

Students who complete both LSP 120 and LSP 121 take one less Learning Domain course. Students may not apply the course reduction to any Domain where only one course is required, and if taken within the SI Domain, the reduction cannot be applied to the SI Lab or SWK requirement.

Major Requirements

First Year
- TEC 105 INTRODUCTION TO STAGE MANAGEMENT
- ART 106 BEGINNING DRAWING
- Technical Drawing Sequence
  - TEC 151 TECHNICAL DRAWING I
  - TEC 152 TECHNICAL DRAWING I
  - TEC 153 TECHNICAL DRAWING I
- Principles of Design Sequence
  - DES 141 PRINCIPLES OF DESIGN
  - DES 142 PRINCIPLES OF DESIGN
  - DES 143 PRINCIPLES OF DESIGN
- History of Dramatic Literature Sequence (Arts and Literature Requirement)
  - THE 204 HISTORY OF DRAMATIC LITERATURE
Second Year

- Stage Management Sequence I
  - TEC 267 STAGE MANAGEMENT I
  - TEC 268 STAGE MANAGEMENT I
  - TEC 269 STAGE MANAGEMENT I
- Production Practice Sequence I
  - TEC 271 TECHNICAL PRODUCTION PRACTICE I
  - TEC 272 TECHNICAL PRODUCTION PRACTICE I
  - TEC 273 TECHNICAL PRODUCTION PRACTICE I
- Design Electives
  - Three courses
- Theatre Electives
  - Three courses

Third Year

- Survey of the Arts for Theatre Sequence
  - THE 381 SURVEY OF THE ARTS FOR THEATRE
  - THE 382 SURVEY OF THE ARTS FOR THEATRE
  - THE 383 SURVEY OF THE ARTS FOR THEATRE
- Stage Management Sequence II
  - TEC 367 STAGE MANAGEMENT II
  - TEC 368 STAGE MANAGEMENT II
  - TEC 369 STAGE MANAGEMENT II
- Production Practice II
  - Select two courses from the following list:
    - TEC 371 TECHNICAL PRODUCTION PRACTICE II
    - TEC 372 TECHNICAL PRODUCTION PRACTICE II
    - TEC 373 TECHNICAL PRODUCTION PRACTICE II
- Design Electives
  - Three courses
- Theatre Electives
  - Three courses

Fourth Year

- Stage Management Sequence III
  - TEC 467 STAGE MANAGEMENT III
  - TEC 468 STAGE MANAGEMENT III
  - TEC 469 STAGE MANAGEMENT III
- Production Practice III and/or Internship
  - Select two courses from the following list:
    - TEC 471 TECHNICAL PRODUCTION PRACTICE III
    - TEC 472 TECHNICAL PRODUCTION PRACTICE III
    - TEC 473 TECHNICAL PRODUCTION PRACTICE III
    - TEC 490 INTERNSHIP
- Design Electives
  - Three courses
- Theatre Electives
  - Three courses

Open Electives

Open elective credit also is required to meet the minimum graduation requirement of 192 hours.
Statistics (Minor)

The Statistics minor is designed for students who wish to apply advanced statistical skills to a career in engineering, physics, business, or biological science.

Students will learn statistical computation, theory, and analysis.

Course Requirements

A total of six courses are required based upon the below outline.

- One of the following five Calculus sequences:
  - **Sequence One**
    - MAT 160 CALCULUS FOR MATHEMATICS AND SCIENCE MAJORS I
    - MAT 161 CALCULUS FOR MATHEMATICS AND SCIENCE MAJORS II
    - MAT 162 CALCULUS FOR MATHEMATICS AND SCIENCE MAJORS III
  - **Sequence Two**
    - MAT 150 CALCULUS I
    - MAT 151 CALCULUS II
    - MAT 152 CALCULUS III
  - **Sequence Three**
    - MAT 147 CALCULUS WITH INTEGRATED PRECALCULUS I
    - MAT 148 CALCULUS WITH INTEGRATED PRECALCULUS II
    - MAT 149 CALCULUS WITH INTEGRATED PRECALCULUS III
  - **Sequence Four**
    - MAT 170 CALCULUS FOR LIFE SCIENCES I
    - MAT 171 CALCULUS FOR LIFE SCIENCES II
    - MAT 172 CALCULUS III WITH DIFFERENTIAL EQUATIONS
  - **Sequence Five**
    - MAT 155 SUMMER CALCULUS I
    - MAT 156 SUMMER CALCULUS II

*Note: This Calculus sequence is offered only during the summer, in two 6-credit hour courses. Students successfully completing MAT 131, 147, 150 or 160 should enroll in MAT 155; students who successfully complete MAT 148, 151 or 161 should enroll in MAT 156. Students who successfully complete MAT 155 may enroll in either MAT 151 or MAT 156.*

- MAT 348 APPLIED STATISTICAL METHODS
- MAT 349 APPLIED STATISTICAL METHODS II
- One course from the following list
  - MAT 326 SAMPLE SURVEY METHODS
  - MAT 328 DESIGN OF EXPERIMENTS
  - MAT 356 APPLIED REGRESSION ANALYSIS
  - MAT 357 NONPARAMETRIC STATISTICS

Business students who have an exceptionally strong background in calculus, including calculus of trig functions, may be permitted by the chair to substitute MAT 135 BUSINESS CALCULUS I and MAT 136 BUSINESS CALCULUS II for MAT 150 CALCULUS I.

In case course offerings are not available, certain alternative substitutions can be made in consultation with the academic advisor and the chair.

Students cannot earn a minor in the same academic program as their major.
Studio Art (Minor)

The Studio Art minor provides students with the opportunity to choose studio art area courses in painting, drawing, printmaking, and/or sculpture. A total of six courses are required for a studio art minor.

Course Requirements

- Choose two courses from the following list:
  - One of the following:
    - ART 101 DIGITAL TOOLS FOR VISUAL THINKERS
    - ART 106 BEGINNING DRAWING
    - ART 113 THREE DIMENSIONAL FOUNDATIONS
    - ART 114 FOUR DIMENSIONAL FOUNDATIONS
  - One of the following:
    - ART 104 CREATING ART
    - ART 105 TWO-DIMENSIONAL FOUNDATIONS
    - ART 200 ART & ARTISTS IN CONTEMPORARY CULTURE

- Choose any four courses from the following list. At least one course must be 200-level and one course must be 300-level.
  - ART 106 BEGINNING DRAWING
  - ART 110 BEGINNING PAINTING
  - ART 115 BEGINNING SCULPTURE
  - ART 206 INTERMEDIATE DRAWING
  - ART 210 INTERMEDIATE PAINTING I
  - ART 215 INTERMEDIATE SCULPTURE
  - ART 218 FIGURE DRAWING
  - ART 219 BEGINNING FIGURE SCULPTURE
  - ART 229 BEGINNING PRINTMAKING
  - ART 245 PAINTING: MIXOLOGY
  - ART 292 COMMUNITY VIDEO PRODUCTION
    - or ART 382 STUDENTS TEACHING ART IN THE ELEMENTARY CLASSROOM
    - or ART 383 SERVICE LEARNING IN THE ARTS INTERNSHIP
  - ART 306 ADVANCED DRAWING
  - ART 310 ADVANCED PAINTING I
  - ART 315 ADVANCED SCULPTURE
  - ART 317 ADVANCED FIGURE SCULPTURE
  - ART 318 ADVANCED FIGURE DRAWING
  - ART 395 SPECIAL TOPICS IN STUDIO PRACTICE

Students majoring in Art, Media, and Design (BA) or minoring in Photography or Graphic Art are restricted from earning this minor.

Environmental Sustainability (Minor)

The Environmental Sustainability minor offers students a focused set of courses to develop the knowledge and skills needed to lead society in adopting more sustainable environmental practices.

Course Requirements

- ENV 102 INTRO TO ENVIRONMENTAL SCIENCE WITH LAB
- ENV 151 INTRODUCTION TO SUSTAINABILITY
- ENV 152 ECOLOGICAL AND SOCIAL ECONOMICS
- PPS 330 SUSTAINABLE DEVELOPMENT
- CMNS 325 PROMOTING SUSTAINABLE PRACTICES
  - or CMNS 326 ENVIRONMENTAL POLITICS AND RHETORIC
One Sustainability elective from the following list:
- ENV 204 ENERGY AND THE ENVIRONMENT
- ENV 230 GLOBAL CLIMATE CHANGE
- ENV 245 URBAN AND COMMUNITY AGRICULTURE
- ENV 320 CONSERVATION BIOLOGY
- CSS 320 COMMUNITY FOOD SYSTEMS
- PPS 333 GREEN CITIES
- GEO 200 SUSTAINABLE URBANISM
- GEO 205 JUSTICE, INEQUALITY AND THE URBAN ENVIRONMENT

Students cannot earn a minor in the same academic program as their major.

Television Production (Minor)

The Television Production minor will give you a foundation in writing, editing and producing television programs. You may specialize in a specific area to complement your major course of study.

Course Requirements

- DC 201 INTRODUCTION TO SCREENWRITING
- DC 210 DIGITAL CINEMA PRODUCTION I
- TV 110 FOUNDATIONS OF TELEVISION
- TV 271 INTRODUCTION TO TELEVISION PRODUCTION
- 3 courses from the following list:
  - TV 289 THE BUSINESS OF TELEVISION
  - TV 301 THE WRITERS ROOM: DEVELOPING THE HOUR LONG DRAMA
  - TV 302 THE WRITERS ROOM: DEVELOPING THE HALF HOUR COMEDY
  - TV 320 EDITING FOR TELEVISION
  - TV 330 DIGITAL SERIES PRODUCTION
  - TV 385 PRODUCING TELEVISION
  - DC 220 EDITING I
  - DC 272 INTRODUCTION TO TELEVISION WRITING
  - DC 306 WRITING THE SITCOM
  - DC 307 WRITING THE EPISODIC DRAMA
  - DC 371 DOCUMENTARY PRODUCTION
  - TV 372 TOPICS IN TV PRODUCTION
  - VFX 200 INTRODUCTION TO VISUAL EFFECTS

Students majoring in Film and Television (BA) or Film and Television (BFA) or minoring in Digital Cinema are restricted from earning this minor.

Theatre Arts (BFA)

The Theatre School's Bachelor of Fine Arts (BFA) degree in Theatre Arts is our most flexible program and allows students to study and get experience in a variety of theatrical disciplines. The program is tailored toward students interested in pursuing careers in areas as diverse as directing, arts writing, educational outreach, literary management, arts administration or law.

Newly admitted Theatre Arts majors are automatically placed in the standard Theatre Arts curriculum, which includes all core and elective requirements for the B.F.A. degree in Theatre Arts. After completing a minimum of two quarters of study at The Theatre School, students have the option of adding a concentration in either Theatre for Young Audiences (TYA) or Directing.
With respect to the core and elective requirements, students who do not declare a concentration remain in the standard Theatre Arts curriculum, which includes successful completion of all core requirements plus six elective courses in theatre (24 credit hours), chosen in consultation with the student’s advisor. The requirements for those students who declare a concentration in either TYA or Directing include successful completion of all core requirements plus eight courses (or 32 credit hours) to fulfill the requirements of the concentration.

### Learning Outcomes

**Students will be able to:**

- Demonstrate and apply:
  - General knowledge of theatre history, dramatic literature covering a broad range of historical periods, cultures, and styles, and major theatre artists on both a national and international level.
  - The principles and vocabulary of performance, directing, design, and a thorough grounding in the theory of their particular area of specialization.
- Write with competency in a variety of writing styles from casual to formal.
- Fully engage with knowledge through the ability to access, analyze, and evaluate information and ideas from multiple sources in order to identify underlying arguments and assumptions and to formulate conclusions.
- Utilize existing knowledge to generate and synthesize ideas in original, creative, and imaginative ways.
- Articulate clearly the process of transforming the written text into the theatrical event.
- Design, develop, and execute a noteworthy intellectual and/or creative project.
- Develop a profound understanding of the role of the artist in society.
- Develop an understanding of the cultural and sociopolitical context of theatre from the perspective of both historical and contemporary practice.
- Develop strong self-discipline, self-motivation, and an ability to work independently.
- Work collaboratively and effectively within a group process and with creative artists from all theatrical disciplines.
- Understand the interrelationship of what it means to be human and what it means to be a theatre artist.
- Evaluate ethical issues with respect to theatrical analysis, concept, and practice.
- Contribute artistically to communities through socially responsible engagement and leadership.
- Develop an understanding of and a respect for a multiplicity of cultural and artistic perspectives that may be different from their own.
- Understand the availability and/or scarcity of global resources for a sustainable future.
- Set goals for future work that are the result of rigorous self-appraisal and reflection.
- Articulate their skills and knowledge as they represent themselves to external audiences.
- Work both independently and collaboratively.
- Use technology to create, communicate, and synthesize their ideas.

- 1 Course Required

Other

- Choose 1 course from the above learning domains as an elective

* Students must earn a C- or better in this course.

Notes

Specified required courses within Liberal Studies may have grade minimums (e.g. C- or better). Please consult your advisor or your college and major requirements.

Courses offered in the student's primary major cannot be taken to fulfill LSP Domain requirements. If students double major, LSP Domain courses may double count for both LSP credit and the second major.

In meeting learning domain requirements, no more than one course that is outside the student’s major and is cross-listed with a course within the student’s major, can be applied to count for LSP domain credit. This policy does not apply to those who are pursuing a double major or earning BFA or BM degrees.

Quantitative Reasoning and Technological Literacy

Readiness for LSP 120 is determined by the math placement test taken online after admission. Students may need to take developmental coursework prior to LSP 120. The LSP 120 requirement may be waived by credit already earned for advanced math coursework or by passing a dedicated proficiency exam. Students who complete both LSP 120 and LSP 121 take one less Learning Domain course. Students may not apply the course reduction to any Domain where only one course is required, and if taken within the SI Domain, the reduction cannot be applied to the SI Lab or SWK requirement.

Major Requirements

First Year

- THE 212 INTRODUCTION TO THEATRE STUDIES
- THE 210 SCRIPT ANALYSIS
Concentration in Theatre for Young Audiences

The concentration in Theatre for Young Audiences (TYA) focuses on the theoretical knowledge and practical skills necessary for continuing work in this field. The concentration requires 8 courses or 32 credit hours of coursework. The breakdown of this coursework includes the three-term Dramaturgy I sequence (12 credit hours), a minimum of three terms (12 credit hours) of Production Practice assignments in The Theatre School’s Playworks Series and/or a TYA Internship—in which the student serves as assistant director, dramaturg, or assistant dramaturg, and two additional courses (8 credit hours) as approved by the student’s advisor, as follows:
- Dramaturgy Sequence I
  - THE 234 DRAMATURGY I: INTRODUCTION TO DRAMATURGY
  - THE 235 DRAMATURGY I: INTRODUCTION TO PRODUCTION DRAMATURGY
  - THE 236 DRAMATURGY I: TYA AND PLAYWORKS DRAMATURGY
- Three (3) courses from among the following:
  - THE 271 THEATRE STUDIES PRODUCTION PRACTICE I
  - THE 272 THEATRE STUDIES PRODUCTION PRACTICE I
  - THE 273 THEATRE STUDIES PRODUCTION PRACTICE I
  - THE 371 THEATRE STUDIES PRODUCTION PRACTICE II
  - THE 372 THEATRE STUDIES PRODUCTION PRACTICE II
  - THE 373 THEATRE STUDIES PRODUCTION PRACTICE II
  - THE 471 THEATRE STUDIES PRODUCTION PRACTICE III
  - THE 472 THEATRE STUDIES PRODUCTION PRACTICE III
  - THE 473 THEATRE STUDIES PRODUCTION PRACTICE III
  - THE 490 THEATRE STUDIES INTERNSHIP
- Two additional courses as approved by the advisor.

Open Electives

Open elective credit also is required to meet the minimum graduation requirement of 192 hours. Courses should be chosen in consultation with the student’s advisor. Students are strongly encouraged to utilize these courses to pursue a minor or second major.

Concentration in Directing

The concentration in Directing focuses on the theoretical knowledge and practical skills necessary for continuing work in this field. The concentration requires 8 courses or 32 credit hours of coursework that includes the first two quarters of the Dramaturgy I sequence (8 credit hours), two courses chosen from a corpus of four, depending on the student’s directorial focus and interests (8 credit hours), a combination of two production practices and/or internship (8 credit hours), and two additional courses approved in consultation with the student’s advisor. The breakdown of this coursework is as follows:

- The first two quarters of the Dramaturgy I sequence
  - THE 234 DRAMATURGY I: INTRODUCTION TO DRAMATURGY
  - THE 235 DRAMATURGY I: INTRODUCTION TO PRODUCTION DRAMATURGY
- Two courses from the following:
  - THE 236 DRAMATURGY I: TYA AND PLAYWORKS DRAMATURGY
  - THE 334 DRAMATURGY II: CLASSICAL DRAMATURGY
  - THE 335 DRAMATURGY II: NEW PLAY DRAMATURGY
  - PRF 418 NEW PLAY WORKSHOP
  - PRF 419 NEW PLAY WORKSHOP
- Two courses from the following:
  - THE 271 THEATRE STUDIES PRODUCTION PRACTICE I
  - THE 272 THEATRE STUDIES PRODUCTION PRACTICE I
  - THE 273 THEATRE STUDIES PRODUCTION PRACTICE I
  - THE 371 THEATRE STUDIES PRODUCTION PRACTICE II
  - THE 372 THEATRE STUDIES PRODUCTION PRACTICE II
  - THE 373 THEATRE STUDIES PRODUCTION PRACTICE II
  - THE 471 THEATRE STUDIES PRODUCTION PRACTICE III
  - THE 472 THEATRE STUDIES PRODUCTION PRACTICE III
  - THE 473 THEATRE STUDIES PRODUCTION PRACTICE III
  - THE 490 THEATRE STUDIES INTERNSHIP
- Two additional courses as approved by the advisor.

Open Electives

Open elective credit also is required to meet the minimum graduation requirement of 192 hours. Courses should be chosen in consultation with the student’s advisor. Students are strongly encouraged to utilize these courses to pursue a minor or second major.
Theatre Management (BFA)

The Theatre School's Bachelor of Fine Arts (BFA) degree in Theatre Management program teaches students both the art and business of theatre while preparing them for careers in the extensive and growing performing arts industry. With a focus on both non-profit arts administration and the commercial theatre, the Theatre Management program uses the theatrical community in Chicago as a laboratory where students interview arts leaders, discover best practices through research, and participate in the art form through internships and production practice assignments.

The Theatre Management curriculum combines Theatre Arts courses from The Theatre School with courses from the Liberal Studies program and The Driehaus College of Business. In alternating years the program offers the New York City Intensive, a one week independent study in New York City, America's commercial theatre capital. Theatre Management faculty members are industry professionals allowing you a first-hand experience.

Upon completion of the Theatre Management program you will earn a Bachelor of Fine Arts (BFA) in Theatre Management at The Theatre School and, with the addition of a single course, a minor in Management through The Driehaus College of Business.

Learning Outcomes

Core Outcomes

Students will be able to:

- Identify and describe the historical and theoretical significance of a range of theatrical artists, works and artistic approaches from antiquity to the present, encompassing a broad range of periods, cultures, and styles.
- Synthesize and apply elements of their education and training in classes, rehearsals, and productions.
- Participate in theatrical production in a professional manner, with discipline, respect, and maturity.
- Demonstrate the role of the theatre practitioner as an active member of society and of the cultural and social impact of the arts.

Program Specific Outcomes

Students will be able to:

- Apply General knowledge of theatre history, dramatic literature covering a broad range of historical periods, cultures, and styles, and major theatre artists on both a national and international level.
- Utilize he principles and vocabulary of performance, directing, design, and a thorough grounding in the theory of their particular area of specialization.
- Write with competency in a variety of writing styles from casual to formal.
- Fully engage with knowledge through the ability to access, analyze, and evaluate information and ideas from multiple sources in order to identify underlying arguments and assumptions and to formulate conclusions.
- Utilize existing knowledge to generate and synthesize ideas in original, creative, and imaginative ways.
- Articulate clearly the process of transforming the written text into the theatrical event.
- Design, develop, and execute a noteworthy intellectual and/or creative project.
- Develop a profound understanding of the role of the artist in society.
- Develop an understanding of the cultural and sociopolitical context of theatre from the perspective of both historical and contemporary practice.
- Develop strong self-discipline, self-motivation, and an ability to work independently.
- Work collaboratively and effectively within a group process and with creative artists from all theatrical disciplines.
- Understand the interrelationship of what it means to be human and what it means to be a theatre artist.
- Evaluate ethical issues with respect to theatrical analysis, concept, and practice.
Contribute artistically to communities through socially responsible engagement and leadership.
Develop an understanding of and a respect for a multiplicity of cultural and artistic perspectives that may be different from their own.
Understand the availability and/or scarcity of global resources for a sustainable future.
Set goals for future work that are the result of rigorous self-appraisal and reflection.
Articulate their skills and knowledge as they represent themselves to external audiences.
Work both independently and collaboratively.
Use technology to create, communicate, and synthesize their ideas.

Students will be able to:

- Demonstrate and apply:
  - General knowledge of theatre history, dramatic literature covering a broad range of historical periods, cultures, and styles, and major theatre artists on both a national and international level.

- MGT 307 HUMAN RESOURCES MANAGEMENT
- MGT 370 BUSINESS PLAN DEVELOPMENT
- Dramatic Literature Electives
  - Three courses to be chosen in consultation with advisor
- Internships*
  - Two required, six credit-hours each

*Note: Internships are designed to meet the individual needs of the student. The internship will entail practical work in the Theatre Management field with a producing theatre company. Internships will be supervised and evaluated by the faculty of the program.

Open Electives
Open elective credit also is required to meet the minimum graduation requirement of 192 hours.

Theatre Studies (Minor)

The Theatre School offers a minor as a way for DePaul University students in other colleges to engage and explore their interest in the theatre through a broad range of theatre coursework. Theatre School students are not eligible to declare a minor in Theatre Studies.

Course Requirements

A minor in Theatre Studies requires the completion of 24 Theatre School credits of the student's choosing, based on the list below. Students from outside The Theatre School may take the following classes at their home college tuition rate:

- PRF 290 PERFORMANCE WORKSHOP FOR NON-MAJORS
- PRF 380 ADVANCED PERFORMANCE WORKSHOP FOR NON-MAJORS
- THE 100 WORLD OF THE THEATRE
- THE 200 THEATRE & THE ART OF PRODUCTION: GENDER & SEXUALITY IN THE THEATRE
- THE 209 SKETCH COMEDY
- THE 213 SCI-FI AND OTHER GENRE FICTION IN THEATRE
- THE 215 PLAYS ABOUT SPORTS
- THE 216 SCREEN TO STAGE
- THE 217 THE ART OF STORYTELLING
- THE 223 IMPROVISATION FOR FUN AND PROFIT
- THE 241 ARE WE STILL FABULOUS?: QUEER IDENTITY IN CONTEMPORARY DRAMA
- THE 242 STAGE DIRECTION FOR NON-MAJORS
- THE 244 DRAMATIC WRITING FOR NON-MAJORS
- THE 246 STAGE DESIGN FOR NON-MAJORS
- THE 250 AMERICAN FUNNY: STAGE COMEDY FROM GROUCHO MARX TO TINA FEY
- THE 251 STAGE TO SCREEN: CINEMATIC TRANSLATIONS OF THE DRAMATIC CANON
- THE 253 THEME PARK THEATRE
All courses are offered on an as needed basis. On occasion, Theatre Studies minors may take Theatre Studies (THE) classes not listed above.* Availability of those courses is dependent on space available in the class, completion of appropriate prerequisites and permission of the instructor, which the student must obtain in order to enroll. Classes in the acting program (PRF) are not open to students pursuing a minor.

Students pursuing a minor who are approved to take Theatre School courses not on this list will be charged the part-time, per-credit Theatre School tuition rate for those classes.

*If approved by instructor, any Theatre Studies (THE) course may be applied towards completion of the minor.

**Theatre Technology (BFA)**

The Theatre School's Bachelor of Fine Arts (BFA) degree in Theatre Technology trains students in the execution and realization of a designer's vision. Theatre Technology majors collaborate with the Scenic, Lighting, and Sound Designers, and other technicians to create the set, props, light and sound for theatre and entertainment productions.

  - TEC 373 TECHNICAL PRODUCTION PRACTICE II

Fourth Year
- Production Management Seminar
Urban Geography and Planning (Minor)

This specialized minor offers students an overview of the field of geography, focusing on urban geography courses with topics including urbanization, urban issues and solutions, and urban planning.

Course Requirements

- GEO 103 URBANIZATION
- GEO 233 COMPARATIVE URBANISM
- Four courses selected from the following list:
  - GEO 133 URBAN GEOGRAPHY - EXPERIENTIAL LEARNING
  - GEO 200 SUSTAINABLE URBAN DEVELOPMENT
  - GEO 205 URBAN ENVIRONMENTAL JUSTICE
  - GEO 230 SUSTAINABLE URBAN TRANSPORTATION
  - GEO 141 GEOGRAPHIC INFORMATION SYSTEMS I: DIGITAL MAPPING
  - GEO 242 GEOGRAPHIC INFORMATION SYSTEMS II: COMMUNITY GIS
  - GEO 299 THE NATURE OF GEOGRAPHY
  - GEO 310 GREEN INFRASTRUCTURE
  - GEO 331 CHICAGO: SPATIAL ANATOMY OF A METROPOLIS
  - GEO 333 URBAN PLANNING
  - GEO 339 TOPICS IN ARCHITECTURE AND URBANISM
  - GEO 395 SEMINAR IN SELECTED TOPICS (as applicable)

Courses should be selected with the consent of the student’s Geography faculty advisor.

A student completing an Urban Geography and Planning minor is eligible to simultaneously complete a GIS Certificate. Only GEO 241 from the Urban Geography and Planning Minor can also be applied to the GIS Certificate. A student wishing to complete an Urban Geography and Planning minor and a GIS Certificate will complete a minimum of 10 Geography courses. Please see a faculty advisor in the Department of Geography for further details.

Students majoring in Geography (BA) or minoring in Geography or Geography Nature-Society Studies are restricted from earning this minor.
Visual Effects (Minor)

Students will explore contemporary concepts and approaches to visual effects in film, television and multimedia. The hands-on curriculum focuses on learning skills in compositing, editing, computer graphics and modeling.

Course Requirements

- ANI 230 3D DESIGN & MODELING
- ANI 379 3D COMPOSITING
- DC 220 EDITING I
- DC 325 COLOR CORRECTION
- VFX 200 INTRODUCTION TO VISUAL EFFECTS
- VFX 374 DIGITAL COMPOSITING I (Formerly VFX 278)
- VFX 378 DIGITAL COMPOSITING II

Students majoring in Film and Television (BFA) - Visual Effects concentration are restricted from earning this minor.

Women's and Gender Studies (BA)

The Department of Women's and Gender Studies provides students with a strong educational foundation for lifelong learning. It nurtures students' abilities to think critically and to examine social and cultural circumstances that too often remain unquestioned. The curriculum also emphasizes the development of strong written & oral communication skills.

A thirteen-course major is offered, consisting of a six-course common core, four courses in a concentration, and three electives.

As a Women's and Gender Studies major, you will take courses such as:

- Women and Film
- Women in the Middle East
- Feminist Theories
- Gender and Education
- Deconstructing the Diva
- Gender, Community, & Activism: Community-Based Learning in WGS
- Growing Up Female in the U.S.
- Growing up Latino/Latina in the United States
- Gender Violence and Resistance
- Women and Politics
- Women and the Law
- Female Identities: Young Adult Literature
- Antiracist Feminisms
- Introduction to Transgender Studies
- Queer Theory

Learning Outcomes

Students will be able to:

- Describe and discuss social, cultural, and historical constructions of gender in local and transnational contexts.
- Explain the interconnectedness of systems of oppression and privilege, including gender, race, class, sexuality, national, ethnicity, age, ability, among others.
- Differentiate and compare a variety of theoretical interdisciplinary frameworks within Women’s and Gender Studies.
- Identify and explain women’s accomplishments, conditions, and contributions within transnational contexts across a spectrum of disciplines.
- Distinguish diverse human experiences regarding a construction and negotiation of gendered identities and expressions.
- Construct socially responsible ethical frameworks that are informed by historical consciousness of transnational contexts.
- Apply information about cultural, historical, social, and economic diversity to an assessment of their own position within structures of inequality.
- Critique and analyze concepts, as well as exhibit creative and holistic problem solving skills.
- Discuss the meaning and demands of interdisciplinary research methodologies, interpreting information and how questions are posed, how arguments and discourses are constructed, and how research and other scholarly endeavors proceed in the field of Women's and Gender studies.
- Explain the various ways in which women’s and gender related movements have contributed to social change.
- Discuss the links between scholarship and activism, and apply this knowledge to issues of social justices and social transformation.

College Core Requirements

Study in the Major Field

The student’s course of study in the College consists of three parts: Liberal Studies, the major field, and electives. Together these three parts contribute to the liberal education of the student which is the common purpose of all study in the College. By “liberal education” the College understands not only a deep and thorough knowledge of a particular area of study but a knowledge of the diverse areas of study represented by criticism, history, the arts, the behavioral and social sciences, philosophy, religious studies, the natural science, and mathematics.

The major field program generally is built upon a set of core courses and a specialized “concentration.” The number of courses required for a major varies by department. Most students go beyond the minimum requirements, electing additional courses which both broaden and deepen their understanding of their chosen discipline.

Because no academic program is built in isolation, students are required to pursue a number of electives of the student's choice. The inherent flexibility of this curriculum demands that the student consult an academic advisor at each stage in the total program and at least once prior to each registration.

Students will be prompted to visit the College Office for their official graduation check early in their senior year.

Declaration of Major, Minor and Concentration

All students in the College are required to declare a major field prior to beginning their junior year. The student will then be assigned a faculty advisor in the major field department or program and should make an appointment to see that advisor at his or her earliest convenience.

Students must declare or change majors, minors, and concentrations, via Campus Connection. However, for the purpose of exploring the possibility of changing a major field, the student should consult an academic advisor in the the Office for Academic Advising Support.
The Modern Language Requirement (MLR)

All students will be required to demonstrate competence in a modern language (i.e., a language other than English) equivalent to the proficiency attained from one year of college-level language study. This Modern Language Requirement (MLR) may be demonstrated by:

- placing into 104 or above on the DePaul language placement exam
- completing the last course or earning AP/IB credit for the last course in the first-year college sequence of any language (e.g. 103 for DePaul language classes)
- completing a college course or earning AP/IB credit for a college course beyond the first-year level in any language (e.g. 104 or above for DePaul language classes)
- completing the final course of a four-year sequence of the same modern language in high school*
- completing a proctored exam by BYU and passing the exam (see the Department of Modern Languages website for registration details)
- completing a proctored Written Proficiency Test (WPT) by Language Testing International (LTI) and achieving a score of Beginner High or above (see the Department of Modern Languages website for registration details)

* Students are strongly encouraged to take the DePaul language placement exam even if they have met the MLR via study of a language in high school. This will ensure continuation of language study at the proper level.

Students who complete an Inter-College Transfer (ICT) to the College will abide by this MLR in place on the effective date of the ICT, regardless of when they first matriculated at DePaul.

Students who have met the MLR and wish to pursue further work in the language may elect the "Modern Language Option" (MLO) of the Liberal Studies Program (see "Special Programs").

External Credit and Residency

A student who has been admitted to the College begins residency within the college as of the first day of classes of the term in which the student is registered. Students in residence, whether attending on a full-time or part-time basis, may not take courses away from DePaul University without the written permission of the college. Permission must be obtained in advance of registration to avoid loss of credit or residency in the college; see the LAS website for more information.

Liberal Studies Requirements

Honors program requirements can be found in the individual Colleges & Schools section of the University Catalog. Select Academics, followed by Undergraduate, then Honors Program Alternative.

First Year Program

Chicago Quarter

- LSP 110 DISCOVER CHICAGO
  or LSP 111 EXPLORE CHICAGO

Focal Point

- LSP 112 FOCAL POINT SEMINAR

Writing

- WRD 103 COMPOSITION AND RHETORIC I *
- WRD 104 COMPOSITION AND RHETORIC II *
Quantitative Reasoning & Technological Literacy

- LSP 120 QUANTITATIVE REASONING & TECHNOLOGICAL LITERACY I
- LSP 121 QUANTITATIVE REASONING AND TECHNOLOGICAL LITERACY II
  (Note: See information below)

Sophomore Year

Multiculturalism in the US

- LSP 200 SEMINAR ON MULTICULTURALISM IN THE UNITED STATES

Junior Year

Experiential Learning

- Required

Senior Year

Capstone

- WGS 395 WOMEN'S STUDIES ADVANCED SEMINAR * [See Note Below]

Learning Domains

Arts and Literature (AL)

- 2 Courses Required

Philosophical Inquiry (PI)

- 2 Courses Required

Scientific Inquiry (SI)

- 3 Courses Required
  [1 SWK Course, 1 Lab Course, and 1 Additional Course]

Social, Cultural, and Behavioral Inquiry (SCBI)

- 2 Courses Required

Religious Dimensions (RD)

- 2 Courses Required

Understanding the Past (UP)

- 2 Courses Required

* Students must earn a C- or better in this course.

Notes

A student majoring in Women's and Gender Studies (WGS) is required to complete the Capstone offered by the WGS Department. This is the case even if a student is double majoring (or pursuing a dual degree) and the secondary major (or degree) requires its own Capstone. A WGS major in the University Honors Program shall take the University Honors Capstone and the WGS Capstone.

Courses offered in the student's primary major cannot be taken to fulfill LSP Domain requirements. If students double major, LSP Domain courses may double count for both LSP credit and the second major. Students who choose to take an experiential learning course offered by the major may count it either as a general elective or the experiential learning requirement.
In meeting learning domain requirements, no more than one course that is outside the student's major and is cross-listed with a course within the student's major, can be applied to count for LSP domain credit. This policy does not apply to those who are pursuing a double major or earning BFA or BM degrees.

**Quantitative Reasoning and Technological Literacy**

Readiness for LSP 120 is determined by the math placement test taken online after admission. Students may need to take developmental coursework prior to LSP 120. The LSP 120 requirement may be waived by credit already earned for advanced math coursework or by passing a dedicated proficiency exam. Students who complete both LSP 120 and LSP 121 take one less Learning Domain course. Students may not apply the course reduction to any Domain where only one course is required, and if taken within the SI Domain, the reduction cannot be applied to the SI Lab or SWK requirement.

**Major Requirements**

**Course Requirements**

**Common Core**

- WGS 100 WOMEN'S LIVES: RACE/CLASS/GENDER (Students are encouraged to take this before taking additional coursework in the major)
- WGS 200 WOMEN'S STUDIES IN TRANSNATIONAL CONTEXTS
- WGS 250 FEMINIST FRAMEWORKS
- WGS 300 FEMINIST THEORIES
- WGS 391 METHODS AND SCHOLARSHIP IN WOMEN'S STUDIES
- WGS 395 WOMEN'S STUDIES ADVANCED SEMINAR

**Concentration**

Students must also complete a four-course concentration. Concentrations include: International Perspectives; Gender, Culture, and the Arts; Gender and Human Development; Social Justice and Public Policy; Theoretical Perspectives; Perspectives on Race and Class; or Individualized.

**Major Field Electives**

Three additional electives chosen by the student from the list of courses approved for the Women's and Gender Studies major.

**Concentration Requirements**

Concentrations, tracks and specializations provide focus to the major. In addition to any college core requirements, liberal studies requirements and major requirements, students are required to choose one of the following:

- Theoretical Perspectives
- Social Justice and Public Policy
- Perspectives on Race and Class
- International Perspectives
- Individualized Concentration
- Gender, Culture, and the Arts
- Gender and Human Development
Theoretical Perspectives Concentration

Course Requirements

Four courses from the following list:

- WGS 275 BLACK FEMINIST THEORIES IN A U.S. CONTEXT
- WGS 310 FEMINIST ETHICS
- WGS 314 ANTIRACIST FEMINISMS
- WGS 316 REPRESENTATIONS OF THE BODY
- WGS 362 INTRODUCTION TO TRANSGENDER STUDIES
- WGS 388 QUEER THEORY: AN INTRODUCTION
- ABD 379 BLACK FEMINIST THEORY / ENG 379 TOPICS IN LITERATURE: Black Feminists in Action
- PHL 233 ISSUES IN SEX AND GENDER
- PHL 238 PHILOSOPHY AND WOMEN
- REL 322 FEMINIST ETHICS
- REL 278 WOMEN AND RELIGION
- REL 370 FEMINIST THEOLOGIES

This list includes examples of courses that fulfill concentration requirements. This list is not, however, an exhaustive list of courses students can take to fulfill the concentration. Majors should work with their department advisors to develop the courses they will take toward their concentration.

Social Justice and Public Policy Concentration

Course Requirements

Four courses from the following list:

- WGS 303 GENDER, VIOLENCE AND RESISTANCE
- WGS 306 GENDER AND FAMILIES
- WGS 314 ANTIRACIST FEMINISMS
- WGS 320 TRANSFORMATIVE JUSTICE: THEORY AND PRACTICE
- WGS 326 WOMEN AND LAW
- WGS 332 CREATING CHANGE: CONTEMPORARY GLBT POLITICS
- WGS 338 SEXUAL JUSTICE: LESBIANS, GAYS AND THE LAW
- ABD 379 BLACK FEMINIST THEORY
- ECO 319 ECONOMICS AND GENDER
- HST 288 WOMEN IN UNITED STATES HISTORY
- LST 202 CONSTRUCTING LATINO COMMUNITIES
- PSC 217 WOMEN AND POLITICS
- PSC 358 GLOBAL GENDER ISSUES
- SOC 209 SOCIOLOGY OF WOMEN

This list includes examples of courses that fulfill concentration requirements. This list is not, however, an exhaustive list of courses students can take to fulfill the concentration. Majors should work with their department advisors to develop the courses they will take toward their concentration.
Perspectives on Race and Class Concentration

Course Requirements

Four courses from the following list:

- WGS 212 GROWING UP FEMALE IN THE U.S.
- WGS 215 GENDER AND EDUCATION
- WGS 275 BLACK FEMINIST THEORIES IN A U.S. CONTEXT
- WGS 303 GENDER, VIOLENCE AND RESISTANCE
- WGS 306 GENDER AND FAMILIES
- WGS 307 WOMEN IN THE MIDDLE EAST: BEYOND THE VEIL
- WGS 314 ANTIRACIST FEMINISMS
- WGS 316 REPRESENTATIONS OF THE BODY
- WGS 326 WOMEN AND LAW
- WGS 386 BLACK WOMEN'S EXPERIENCES: VARIABLE TOPICS
- WGS 390 WOMEN ACROSS CULTURES
- ABD 379 BLACK FEMINIST THEORY / ENG 379 TOPICS IN LITERATURE
- ANT 314 ANTHROPOLOGY OF GENDER
- LST 202 CONSTRUCTING LATINO COMMUNITIES
- LST 307 GROWING UP LATINO/LATINA IN THE U.S.

This list includes examples of courses that fulfill concentration requirements. This list is not, however, an exhaustive list of courses students can take to fulfill the concentration. Majors should work with their department advisors to develop the courses they will take toward their concentration.

International Perspectives Concentration

International Perspectives Concentration

Four courses from the following list:

- WGS 303 GENDER, VIOLENCE AND RESISTANCE
- WGS 307 WOMEN IN THE MIDDLE EAST: BEYOND THE VEIL
- WGS 324 WOMEN IN THEATRE: A GLOBAL PERSPECTIVE
- WGS 334 GIRLHOOD ALL AROUND THE WORLD
- WGS 336 WOMEN AND FILM
- WGS 345 WOMEN, WAR AND RESISTANCE
- WGS 364 POLITICAL AUTOBIOGRAPHY
- WGS 390 WOMEN ACROSS CULTURES
- ANT 314 ANTHROPOLOGY OF GENDER
- FCH 319 FRENCH/FRANCOPHONE WOMEN WRITERS
- GER 317 WOMEN WRITERS OF GERMAN EXPRESSION
- HST 212 MEDIEVAL AND RENAISSANCE WOMEN
- HST 239 WOMEN IN MODERN EUROPE, 1800-PRESENT
- HST 258 WOMEN IN HISTORY
- PSC 358 GLOBAL GENDER ISSUES
- SPN 322 HISPANIC WOMEN WRITERS

This list includes examples of courses that fulfill concentration requirements. This list is not, however, an exhaustive list of courses students can take to fulfill the concentration. Majors should work with their department advisors to develop the courses they will take toward their concentration.
Individualized Concentration

Course Requirements

Four courses to be chosen by the student from the list of courses approved for the major. These courses must be approved, in writing, by a Department of Women’s and Gender Studies faculty advisor.

Gender, Culture, and the Arts Concentration

Course Requirements

Four courses from the following list:

- WGS 322 FEMALE IDENTITIES: YOUNG ADULT LITERATURE
- WGS 255 DECONSTRUCTING THE DIVA
- WGS 324 WOMEN IN THEATRE: A GLOBAL PERSPECTIVE
- WGS 336 WOMEN AND FILM
- WGS 364 POLITICAL AUTOBIOGRAPHY
- WGS 390 WOMEN ACROSS CULTURES
- HAA 366 TOPICS ON WOMEN AND ART
- CPL 312 THE LITERATURE OF IDENTITY: Constructing Gay and Lesbian Identity
- CPL 313 FEMINIST LITERATURE: Contemporary Women’s Literature
- ENG 383 WOMEN AND LITERATURE
- CPL 312 THE LITERATURE OF IDENTITY: Constructing Gay and Lesbian Identity
- HAA 366 TOPICS ON WOMEN AND ART
- CPL 312 THE LITERATURE OF IDENTITY: Constructing Gay and Lesbian Identity
- CPL 312 THE LITERATURE OF IDENTITY: Constructing Gay and Lesbian Identity

This list includes examples of courses that fulfill concentration requirements. This list is not, however, an exhaustive list of courses students can take to fulfill the concentration. Majors should work with their department advisors to develop the courses they will take toward their concentration.

Gender and Human Development Concentration

Course Requirements

Four courses from the following list:

- WGS 212 GROWING UP FEMALE IN THE U.S.
- WGS 215 GENDER AND EDUCATION
- WGS 306 GENDER AND FAMILIES
- WGS 316 REPRESENTATIONS OF THE BODY
- WGS 322 FEMALE IDENTITIES: YOUNG ADULT LITERATURE
- WGS 334 GIRLHOOD ALL AROUND THE WORLD
- WGS 362 INTRODUCTION TO TRANSGENDER STUDIES
- ANT 314 ANTHROPOLOGY OF GENDER
- CMNS 361 GENDER AND COMMUNICATION
- CPL 312 THE LITERATURE OF IDENTITY: Constructing Gay and Lesbian Identity
This list includes examples of courses that fulfill concentration requirements. This list is not, however, an exhaustive list of courses students can take to fulfill the concentration. Majors should work with their department advisors to develop the courses they will take toward their concentration.

Combined Bachelor’s/ Master’s Degree

The combined Bachelor's/Master's degree programs allow students to complete 12 graduate credit hours while still undergraduates. These 12 graduate credit hours will count toward both the undergraduate and graduate degree programs.

Women’s and Gender Studies (BA) / Women’s and Gender Studies (MA)

Students apply to this program in spring of their junior year; interested students should contact the WGS graduate director. Students in this program take twelve graduate credit hours in their senior year; these graduate courses apply toward both undergraduate and graduate Women's and Gender Studies requirements.

In the senior year students complete:

- WGS 400 FEMINIST THEORIES
- WGS 465 GLOBALIZATION, TRANSNATIONALISM, AND GENDER
- WGS graduate elective

Once the student has graduated with their undergraduate BA in Women's and Gender Studies, they will matriculate into the MA Program. As MA Students, the students take the remaining 9 courses toward the MA degree – usually students will take 3 graduate courses per quarter in order to complete the MA in the one additional year. This will include two of the required graduate courses:

- WGS 415 CONTENTIONS IN FEMINIST AND GENDER THEORIZING: NEW DIRECTIONS
- WGS 485 WOMEN, GENDER, AGENCY, AND SOCIAL CHANGE

Also:

- 4-5 electives, depending on the Final Project selected.
- 1-2 courses of WGS 493 FINAL PROJECT INDEPENDENT RESEARCH (taken with Chair of MA Final Project Committee)

Elective courses will be chosen by the student in conjunction with a faculty advisor in order to tailor a coherent program of study to the individual student's particular academic and/or professional objectives while ensuring that the student sustains strong interdisciplinary focus at the graduate level. Elective courses may be offered by Women's and Gender Studies or approved courses offered by other departments/programs at DePaul. A list of courses approved by WGS are circulated prior to registration for each quarter.

Capstone/ Final Project Requirements

All students must complete an MA Final Project, selecting one of the following options:

Thesis Project

The Thesis Option requires that the student plan, execute, and defend an independent and original analytical research project that makes a contribution to current scholarship in the field of women's and gender studies and related subfields. The thesis should show accomplishment in methods of research, critical judgment, and, if
appropriate, praxis that characterizes feminist research. Thesis research must be grounded in interdisciplinary scholarship as well as feminist and/or gender theories, and must reflect considerable engagement with relevant literature and methodology in the field. The thesis consists of approximately 50 pages of text with a substantial bibliography.

Students who select the Thesis option will complete, in addition to required Core Courses in the MA Program, a five-course elective focus, and two courses of WGS 493 Final Project Independent Research focused on researching and writing the thesis. You are required to present and defend the thesis to an MA Final Project Committee. The student is also required to present their final project to a public audience at a WGS Graduate Student Final Project Presentation event.

**Practical Project**

The Practical Project Option requires that the student plan, develop, and defend a practical project that is grounded in interdisciplinary scholarship, feminist and/or gender theories, and that has a direct and practical application to community service, advocacy, and/or education. Practical projects take a variety of forms; for instance, it could be a participatory action research project with an organization, or a curriculum to be taught in community-based or educational setting, or a public policy or human rights related educational or advocacy project, or any project created for implementation with a broader community. In general, the MA Practical Project in WGS consists of the project itself (e.g., the curriculum, the participatory action research report) and a Framing Paper (minimum 25 pages) in which you frame the mission, goals, methods, components, and expected outcomes of the project you have undertaken.

Students who select the Practical Project option will complete, in addition to required Core Courses in the MA Program, a five-course elective focus, plus an additional two courses (total of 8 credit hours) of WGS 493 Final Project Independent Research. They will also be required to present and defend the Practical Project to an MA Final Project Committee. The student is also required to present their final project to a public audience at a WGS Graduate Student Final Project Presentation event.

**Creative Project**

The Creative Project Option requires students to create an artistic and/or literary project that gives voice to issues or questions in Women’s and Gender Studies. It should be informed by feminist theory and scholarship, and it should address a significant theme or question within the field. A Creative Project may be a play, an art exhibit, a memoir, a novel, a collection of short stories, a collection of non-fiction essays, a mixed-media work, a dance or musical performance, a film, a website—to name just a few of the multiple possibilities open to students choosing this option. In general, the MA Creative Project in WGS consists of the creative project itself and a Creative Project Framing Paper (minimum 25 pages) in which you describe and frame the creative project.

Students who select the Creative Project Option will complete, in addition to required Core Courses in the MA Program, a five-course elective focus, plus an additional two courses of independent study and research. You will also be required to present and defend the creative project to an MA Final Project Committee. The student is also required to present their final project to a public audience at a WGS Graduate Student Final Project Presentation event.

**Portfolio Project**

The Portfolio Final Project Option requires that the student conduct a comprehensive analysis of their learning while a graduate student in WGS. The student must prepare and submit (1) a collection of at least six seminar papers, practical or creative projects, and/or other research products that are the outcomes of core and elective courses; and (2) a Portfolio Essay (minimum 25 pages) that offers a reflective and critical analysis of how the papers/projects reflect the students intellectual, creative, and analytical development over the course of their graduate studies.

Students who select the Portfolio Option will complete, in addition to required Core Courses in the MA Program, a six-course elective focus, plus an additional course WGS 493 – Final Project Independent Research during which they will write the Portfolio Essay. They will also be required to present and defend the portfolio project to the Chair of their Final Project and one additional faculty member, who must both be appointed in the Department of Women’s and Gender Studies at DePaul. The student is also required to present their final project to a public audience at a WGS Graduate Student Final Project Presentation event.
Women's and Gender Studies (Minor)

Similar to the major, the Women's and Gender Studies minor includes three basic social analysis courses aimed at providing students with a gendered lens through which to see social, cultural, and political issues. Students are encouraged to expand their view of their personal lives to include a framework that promotes resilient responses to all forms of oppression. To complete the minor, students take three additional courses to be chosen from the approved course list from the Women's and Gender Studies Department.

Students wishing to attain the Women's and Gender Studies minor are required to successfully complete 24 credit hours (six classes): the three core classes listed below and three general electives approved for the Women's and Gender Studies major.

Course Requirements

- WGS 100 WOMEN'S LIVES: RACE/CLASS/GENDER
- WGS 200 WOMEN'S STUDIES IN TRANSNATIONAL CONTEXTS
- WGS 250 FEMINIST FRAMEWORKS

Students majoring in Women's and Gender Studies (BA) are restricted from earning this minor.

World Language Education Chinese (BA)

The Bachelor of Arts program in World Language Education Chinese prepares students to teach Kindergarten through 12th grade in a variety of urban and suburban education settings, including public and private elementary and high schools.

Students learn educational theories and effective teaching practices, participate in field experiences, which require observation and participation in teaching activities at multiple schools, and student teaching. Students should meet early and regularly with their advisor to design and monitor their program of study.

The program combines theoretical principles of education and field work with the student's choice of major. Students follow a general pattern of study for middle school and high school levels. In all cases, appropriate field experience plays an integral role.

Students entering the program must be able and willing to devote themselves to a program requiring a minimum of 130-135 hours of daytime field experiences in schools. These school-based clinical hours are completed in conjunction with methodology courses that require students to spend a half-day each week in a school. In addition, the student must spend a minimum of 11 weeks in full-time student teaching.

Please make sure you consult the Liberal Studies Requirements, Major Requirements, and College Core Requirements for full degree requirements.

Licensure

Illinois Professional Educator License with endorsement in Foreign Language Chinese (kindergarten-grade 12), an Illinois State Board of Education (ISBE) approved program.

Learning Outcomes

Students will be able to:

- Apply theoretical foundations of language education to develop sound instruction and teaching approaches for language learners.
- Integrate theory and research on second language acquisition into practice for language learners.
- Evaluate history and policies of language education and how historical and policy context affect the education of language learners.
- Analyze various assessment issues that affect language learners, such as accountability, reliability, validity, bias, special education.

College Core Requirements

Dispositions

The academic programs within the College of Education have set forth these dispositions as educational and professional expectations for all students. Students should be aware that failing to abide by DePaul University or College of Education policies including, under certain circumstances, these dispositions, could result in adverse consequences for the student, including removal from his or her program, the College of Education, or the University.

The following dispositions apply to Early Childhood Education, Elementary Education, Physical Education, Secondary Education, and World Language Education majors only:

- Reflects on progress and identifies strengths and weaknesses, including evaluating strategies for success, finding alternatives for inappropriate strategies, and modifying future practices
- Is receptive to faculty feedback and acts meaningfully and professionally upon suggestions
- Values critical thinking, including engaging theoretical and philosophical frameworks and shows evidence of critical thinking through discussion and writing (e.g., journals, response to prompts)
- Understands the importance of and is committed to communicating clearly orally and in writing both in traditional and in new and emerging digital formats
- Values and is committed to continually developing strong content area knowledge and/or knowledge of the professional field, including pedagogical content knowledge
- Takes initiative, uses imagination and creativity, and seeks out information using a variety of human and material resources and technology to inform his or her teaching
- Is aware of the role of classroom environment and uses management procedures that reflect respect and care for learners and concern for their emotional and physical well being
- Takes the time and effort needed to understand how students learn, including discovering their interests and experiences and determining how to shape teaching acts (using technology as appropriate) that engage learners meaningfully and actively
- Values and is committed to using assessment to evaluate and ensure the continuous intellectual, social, emotional, and physical development of the learner
- Respects and considers cultural contexts in order to determine how to be responsive to learners and to proactively promote all students' learning
- Values and is responsive to diverse learners' academic, emotional, and social needs through teaching acts (including careful instructional planning, implementation, and differentiation) and through everyday interactions with students
- Is committed to collaboration with colleagues, families, and communities in order to promote all students' learning and development
- Recognizes and fulfills professional responsibilities and habits of conduct (e.g., dress, language, preparedness, attendance, punctuality, etc.)
- Demonstrates collegiality, honesty, good judgment, courtesy, respect, and diplomacy
- Balances self-confidence and assertiveness with respect for others' perspectives
- Respects the requirements, expectations, and procedures of both the College of Education and of our field partners and appreciates the issues of trust, fairness, and professionalism involved
The following dispositions apply to Special Education majors only:

- Is receptive to faculty feedback and acts meaningfully and professionally upon suggestions
- Reflects on his or her own progress, identifies strengths and weaknesses, and evaluates strategies for success and professional growth
- Takes initiative
- Is open to new ideas and engagement in learning
- Respects diversity and cultural contexts to determine how to be responsive to learners and to proactively promote all students' learning
- Expresses positive attitudes toward individuals with disabilities and a willingness to advocate on their behalf
- Is committed to collaboration with colleagues, families, and communities in order to promote all students' learning and development
- Demonstrates professional ethical and legal behavior as defined by the respective codes of ethics and laws
- Maintains appropriate interpersonal and professional boundaries
- Accepts personal responsibility for one's behavior
- Expresses feelings and opinions effectively and appropriately
- Upholds confidentiality

Skill Building Courses

Before taking any math or English courses, students must take the DePaul placement tests to determine if skill level is at the college level. If placement indicates skill level in these courses, the courses become part of degree requirements. Consult with your advisor regarding placement test results and any required classes.

Advanced Standing

Students are conditionally admitted to the College of Education. There are additional requirements to reach Advanced Standing in your program in the College of Education. Requirements must be met to progress in the major and take courses in the Advanced Standing category.

Advanced Standing requirements are:

- Maintain a DePaul undergraduate 2.5 GPA
- Pass the Illinois Test of Academic Proficiency (TAP)
- Submit a petition for advanced standing form

Students should attempt to complete the Advanced Standing requirements soon after beginning the program. There is no time limit to meet these criteria; however, students will only be able to take pre-education courses until requirements have been met. Students can also take liberal studies or content area courses before or after meeting Advanced Standing requirements.

Modern Language Competence Requirement

Students pursuing a Bachelor of Arts degree in the College of Education will be required to demonstrate a measure of competence in a modern language, as defined by the college. Such competence may be demonstrated in one of several ways:

- completing two years of a language sequence in high school
- completing the last course in the first-year college sequence of any language
- completing a college course beyond the first-year level in any language
- achieving a satisfactory score on any of the Modern Language placement examinations administered at DePaul
- achieving a satisfactory rating in a proficiency examination accepted by DePaul
- achieving a score of 3 or higher on the Advance Placement (AP) test for any language
- achieving a score of 5 or higher in the Language B assessment from a Standard or Higher Level International Baccalaureate (IB) program
- achieving a satisfactory score on the CLEP examination

Please note: The Modern Language Competence Requirement is not required for students in the Early Childhood Education: SNL Joint Program (BAECE) program.

For further information regarding satisfactory scores and possible credit from the DePaul placement, AP, CLEP, or IB examinations, please contact the Office of the University Registrar.

Students who complete an Inter-College Transfer (ICT) to the College of Education will abide by the COE Modern Language Requirement in place on the effective date of the ICT.

B.A. students who meet College requirements and wish to pursue further work in the language may elect the
“Modern Language Option” of the Liberal Studies Program. While B.S. students are not required to demonstrate competency in a modern language, the "Modern Language Option" is available to them for language study at any level.

Licensure Tests

All individuals licensed by the Illinois State Board of Education (ISBE) are required to complete licensure tests specific to their teaching license.

Field Experiences

Each student seeking licensure from the College of Education/Professional Education Unit must complete supervised field experiences in appropriate settings in conjunction with education courses. The field experiences must include a variety of grade levels, multicultural experiences, and a minimum of 10 hours in special education settings. All field experiences must be completed prior to final approval for student teaching. Field experience hours should be entered by the student into the FEDS system when completing courses with field experience requirements.

Endorsements

An endorsement is a statement appearing on a license that identifies the specific subjects or grade level that the license holder is authorized to teach.

The Illinois State Board of Education (ISBE) issues endorsements in various subject areas. To view the full list and requirements, visit the ISBE website.

Please note that the Illinois State Board of Education (ISBE) may change the state licensure and endorsement requirements at any time and without prior notice. Individuals are bound by the requirements in place when applying for the license or endorsement, not the requirements in place when beginning the program.

Student Teaching Requirements

Student Teaching is the culminating clinical experience in the student's program. All students in teacher preparation programs must meet the following requirements before applying for student teaching:

Academic Requirements:

- Completion of all Liberal Studies, Pre-Education, Advanced Standing and concentration/content area courses
- Overall cumulative G.P.A. of 2.50 or better
- Cumulative GPA. of 2.75 or better in all education courses
- Meet all other program requirements (e.g., modern language and residency requirements)
- Meet designated program standards
- Pass the required Illinois licensure content area test

Clinical Requirements:

- Completion of all required field experiences
- Three satisfactory evaluations in field experiences
- Three satisfactory faculty recommendations
- Attendance at mandatory meeting for student teaching
- Application for student teaching, resume, transcripts, and writing sample (check deadlines)
- Review and approval by Student Teaching Committee of the College of Education

Student Teaching Timeline and Deadlines:

- Attend a Mandatory Meeting approximately 1 year prior to expected quarter of student teaching.
- Submit application for student teaching after attending Mandatory Meeting, approximately 1 year prior to student teaching.
- Academic requirements are due one quarter before expected quarter of student teaching.
- Clinical requirements are completed as course requirements. Field experience hours are entered by the student as coursework is completed.

Online Faculty Evaluations are entered by the instructor of relevant courses. All data must be entered in the Field Experience Documentation System (FEDS) due one month prior to student teaching.

Individual child care agencies and public and private school districts may have additional requirements (application, training, background check, etc.).
Degree Conferral and Graduation

The awarding of a degree is not automatic. You must submit an application to be considered for the degree. DePaul awards and posts degrees at the end of each regular academic term (autumn, winter, spring, summer).

It is your responsibility to initiate the degree conferral application process by submitting an online application. Submitting an application means you intend to finish your degree requirements by the end of the term for which you have applied.

Undergraduate students must be approved for student teaching and complete student teaching and capstone to be cleared for the degree. Student must submit graduation application for the quarter that matches the quarter you are student teaching.

After you submit the application, you cannot register for any term after the one selected in the application.

To apply for degree conferral, log on to Campus Connection. Select STUDENT CENTER, then MY ACADEMICS. On screen instructions will take you through the application process.

Provided that all requirements and financial obligations are met, degrees are posted 30 days after the official end of the term. Official dates are listed on the Academic Calendar.

DePaul holds one commencement ceremony each year in June. If you intend to participate, you must first apply for degree conferral for the current academic year and then submit a cap and gown order. Honors are not announced at the ceremony for undergraduates completing their final courses in spring quarter because a final GPA is not available at the time of the ceremony.

Additional information about degree conferral and graduation can be found on the College of Education website at: http://education.depaul.edu/.

Licensure

Requirements for licensure include completion of full bachelor’s degree program, all licensure tests (including OPI for world language majors), and awarding of bachelor’s degree. A bachelor’s degree is required to qualify for licensure and must be awarded before applying for the license.

Individuals must submit an application directly to the Illinois State Board of Education after completion of requirements and after DePaul has submitted notification to ISBE. Application requirements include application form, application fee, official transcripts, and registration fee.

All individuals must meet ISBE requirements in place at the time of application for the license. Requirements are subject to change per the discretion of ISBE. All coursework and requirements pertaining to licensure requirements must be completed before DePaul University can recommend an individual for the license.

Individuals seeking additional endorsements after applying for the licensure must contact ISBE directly for an evaluation request.

All coursework and requirements must be completed before DePaul University can recommend an individual for the license.

Liberal Studies Requirements

Honors program requirements can be found in the individual Colleges & Schools section of the University Catalog. Select Academics, followed by Undergraduate, then Honors Program Alternative.

First Year Program

Chicago Quarter

DePaul University Winter/Spring/Summer 2016-2017 Page 990 of 2776
- LSP 110 DISCOVER CHICAGO 
or LSP 111 EXPLORE CHICAGO

**Focal Point**
- LSP 112 FOCAL POINT SEMINAR

**Writing**
- WRD 103 COMPOSITION AND RHETORIC I *
- WRD 104 COMPOSITION AND RHETORIC II *

**Quantitative Reasoning & Technological Literacy**
- LSP 120 QUANTITATIVE REASONING & TECHNOLOGICAL LITERACY I
- LSP 121 QUANTITATIVE REASONING AND TECHNOLOGICAL LITERACY II
  (Note: See information below)

**Sophomore Year**

**Multiculturalism in the US**
- LSP 200 SEMINAR ON MULTICULTURALISM IN THE UNITED STATES

**Junior Year**

**Experiential Learning**
- Met by successful completion of required field experience hours.

**Senior Year**

**Capstone**
- WLE 384 CAPSTONE IN WORLD LANGUAGE EDUCATION *
  (Note: This must be taken with student teaching. Students must earn a C or better in this course.)

**Learning Domains**

**Arts and Literature (AL)**
- 2 Courses Required

**Philosophical Inquiry (PI)**
- 2 Courses Required:
  - LSE 380 PHILOSOPHICAL ISSUES IN EDUCATION AND CULTURE
  - 1 Additional Course
  (Note: PHL 100 recommended)

**Scientific Inquiry (SI)**
- 3 Courses Required:
  - 1 BIO course
  - 1 CHE/ENV/GEO/PHY course
  - 1 Additional Course
  (Note: One course must be a lab or SWK.)

**Social, Cultural, and Behavioral Inquiry (SCBI)**
- 2 Courses Required:
  - PSC 120 THE AMERICAN POLITICAL SYSTEM
  - 1 Additional Course

**Religious Dimensions (RD)**
Understanding the Past (UP)

- 2 Courses Required
  (Note: One must be US History.)

  * Students must earn a C- or better in this course.

Notes

Specified required courses within Liberal Studies may have grade minimums (e.g. C- or better). Please consult your advisor or your college and major requirements.

Courses offered in the student's primary major cannot be taken to fulfill LSP Domain requirements. If students double major, LSP Domain courses may double count for both LSP credit and the second major.

In meeting learning domain requirements, no more than one course that is outside the student's major and is cross-listed with a course within the student's major, can be applied to count for LSP domain credit. This policy does not apply to those who are pursuing a double major or earning BFA or BM degrees.

Quantitative Reasoning and Technological Literacy

Readiness for LSP 120 is determined by the math placement test taken online after admission. Students may need to take developmental coursework prior to LSP 120. The LSP 120 requirement may be waived by credit already earned for advanced math coursework or by passing a dedicated proficiency exam. Students who complete both LSP 120 and LSP 121 take one less Learning Domain course. Students may not apply the course reduction to any Domain where only one course is required, and if taken within the SI Domain, the reduction cannot be applied to the SI Lab or SWK requirement.

Major Requirements

Course Requirements

Content Area Courses

Note: Language courses begin at the Advanced level for the major. A placement test in the language is required to determine skill level and appropriate level to begin the language. Beginning and Intermediate language courses are in addition to the content area requirements but can fulfill open elective requirements.

Advanced Language Core: 24 quarter hours required, grade of C or better required

- CHN 201 ADVANCED CHINESE I
- CHN 202 ADVANCED CHINESE II
- CHN 203 ADVANCED CHINESE III
- CHN Advanced Chinese Conversation course 1
- CHN Advanced Chinese Conversation course 2
- CHN Advanced Chinese Conversation course 3

Chinese Studies: 24 quarter hours required, grade of C or better required

- Choose six of the following:
  - HAA 115 ASIAN ART
  - HAA 220 BUDDHIST ART
  - HAA 215 CHINESE ART
  - GEO 215 INTERNATIONAL DEVELOPMENT AND REGIONAL INEQUALITY
  - HST 232 CULTURE AND POLITICS IN IMPERIAL CHINA
  - HST 233 THE RISE OF MODERN CHINA
  - HST 150 EAST ASIA TO C. 1200
Teaching Culture Core: 4 quarter hours required, grade of C or better required

- WLE 370 SECOND & WORLD LANGUAGE LITERACIES AND CULTURES

Education Courses: 40 quarter hours required, grade of C or better required

- SCU 207 SOCIAL AND HISTORICAL ISSUES IN EDUCATION
- SCU 337 HUMAN GROWTH AND DEVELOPMENT
- SEC 364 METHODS: CURRICULUM AND INSTRUCTION IN SECONDARY SCHOOLS
- BBE 307 EQUITY ISSUES IN ASSESSMENT OF LANGUAGE LEARNERS
- LSI 346 STRATEGIES FOR MAINSTREAMING AND INCLUSION
- WLE 326 THEORETICAL FOUNDATIONS OF TEACHING ESL AND WLE
- WLE 349 STANDARD AND CONTENT-BASED METHODS OF TEACHING WORLD LANGUAGES K-12
- WLE 360 SECOND, WORLD AND HERITAGE LANGUAGE ACQUISITION K-12
- WLE 375 WLE HISTORY, POLICY, AND CURRICULUM DEVELOPMENT
- SCU 338 THE PROCESS AND EVALUATION OF LEARNING
  or SCU 339 PHILOSOPHY AND PSYCHOLOGY OF YOUTH AND MIDDLE LEVEL EDUCATION

Oral Proficiency Interview (OPI) Test

Pursuing certification in the teaching of a world language (Chinese, French, German, Italian, Japanese, or Spanish) requires the oral proficiency test – an Interview – before you begin student teaching. You must earn a rating of “intermediate high” or better on the test.

Open Electives: 8 quarter hours are required

Open elective credit also is required to meet the minimum graduation requirement of 192 hours. The following cannot be used to fulfill an open elective: WRD 98, MAT 94, and MAT 95. EE 281 recommended as open elective course. Electives must be approved by the WLE Program director.

Student Teaching: 12 quarter hours required, grade of B- or better required

Registration in student teaching requires completion of all requirements and procedures indicated in the college core section. EDU 95 indicates to the Illinois State Board of Education that all field experience hours are complete. All students also take WLE 384 with student teaching (listed in the Liberal Studies section).

- WLE 385 STUDENT TEACHING IN WORLD LANGUAGES (12 credit hours)
- EDU 95 CLINICAL EXPERIENCE WITH CHILDREN AND YOUTH (non-credit, non-tuition, PA grade required)

Licensure Tests

All individuals licensed by the Illinois State Board of Education (ISBE) are required to complete licensure tests specific to their teaching license. World Language Education Chinese majors must complete the following tests:

- Test of Academic Proficiency (TAP) (test #400) - assesses knowledge of reading comprehension, language arts, writing, and math. It is recommended to be taken during the first or second quarter in the program. Test is required before Student Teaching (deadlines apply).  *Check with your advisor about qualifying for a waiver with acceptable ACT or SAT test scores.
- Chinese Content Area Test (test #126) – assesses knowledge of the Chinese language and culture. Test is required before Student Teaching (deadlines apply).
- OPI Test (see above).
- EdTPA - assessment conducted during the student teaching experience including video clips of instruction,
lesson plans, student work samples, analysis of student learning and reflective commentaries. Students will submit an electronic portfolio to an outside agency for independent evaluation and a fee will be imposed by that agency as part of the assessment.

World Language Education French (BA)

The Bachelor of Arts program in World Language Education French prepares students to teach Kindergarten through 12th grade in a variety of urban and suburban education settings, including public and private elementary and high schools.

Students learn educational theories and effective teaching practices, participate in field experiences, which require observation and participation in teaching activities at multiple schools, and student teaching. Students should meet early and regularly with their advisor to design and monitor their program of study.

The program combines theoretical principles of education and field work with the student's choice of major. Students follow a general pattern of study for middle school and high school levels. In all cases, appropriate field experience plays an integral role.

Students entering the program must be able and willing to devote themselves to a program requiring a minimum of 130-135 hours of daytime field experiences in schools. These school-based clinical hours are completed in conjunction with methodology courses that require students to spend a half-day each week in a school. In addition, the student must spend a minimum of 11 weeks in full-time student teaching.

Please make sure you consult the Liberal Studies Requirements, Major Requirements, and College Core Requirements for full degree requirements.

Licensure

Illinois Professional Educator License with endorsement in Foreign Language French (Kindergarten-grade 12), an Illinois State Board of Education (ISBE) approved program.

Learning Outcomes

Students will be able to:

- Apply theoretical foundations of language education to develop sound instruction and teaching approaches for language learners.
- Integrate theory and research on second language acquisition into practice for language learners.
- Evaluate history and policies of language education and how historical and policy context affect the education of language learners.
- Analyze various assessment issues that affect language learners, such as accountability, reliability, validity, bias, special education.
Dispositions

The academic programs within the College of Education have set forth these dispositions as educational and professional expectations for all students. Students should be aware that failing to abide by DePaul University or College of Education policies including, under certain circumstances, these dispositions, could result in adverse consequences for the student, including removal from his or her program, the College of Education, or the University.

The following dispositions apply to Early Childhood Education, Elementary Education, Physical Education, Secondary Education, and World Language Education majors only:

- Reflects on progress and identifies strengths and weaknesses, including evaluating strategies for success, finding alternatives for inappropriate strategies, and modifying future practices
- Is receptive to faculty feedback and acts meaningfully and professionally upon suggestions
- Values critical thinking, including engaging theoretical and philosophical frameworks and shows evidence of critical thinking through discussion and writing (e.g., journals, response to prompts)
- Understands the importance of and is committed to communicating clearly orally and in writing both in traditional and in new and emerging digital formats
- Values and is committed to continually developing strong content area knowledge and/or knowledge of the professional field, including pedagogical content knowledge
- Takes initiative, uses imagination and creativity, and seeks out information using a variety of human and material resources and technology to inform his or her teaching
- Is aware of the role of classroom environment and uses management procedures that reflect respect and care for learners and concern for their emotional and physical well being
- Takes the time and effort needed to understand how students learn, including discovering their interests and experiences and determining how to shape teaching acts (using technology as appropriate) that engage learners meaningfully and actively
- Values and is committed to using assessment to evaluate and ensure the continuous intellectual, social, emotional, and physical development of the learner
- Respects and considers cultural contexts in order to determine how to be responsive to learners and to proactively promote all students' learning
- Values and is responsive to diverse learners' academic, emotional, and social needs through teaching acts (including careful instructional planning, implementation, and differentiation) and through everyday interactions with students
- Is committed to collaboration with colleagues, families, and communities in order to promote all students' learning and development
- Recognizes and fulfills professional responsibilities and habits of conduct (e.g., dress, language, preparedness, attendance, punctuality, etc.)
- Demonstrates collegiality, honesty, good judgment, courtesy, respect, and diplomacy
- Balances self-confidence and assertiveness with respect for others' perspectives
- Respects the requirements, expectations, and procedures of both the College of Education and of our field partners and appreciates the issues of trust, fairness, and professionalism involved

The following dispositions apply to Special Education majors only:

- Is receptive to faculty feedback and acts meaningfully and professionally upon suggestions
- Reflects on his or her own progress, identifies strengths and weaknesses, and evaluates strategies for success and professional growth
- Takes initiative
- Is open to new ideas and engagement in learning
- Respects diversity and cultural contexts to determine how to be responsive to learners and to proactively promote all students' learning
- Expresses positive attitudes toward individuals with disabilities and a willingness to advocate on their behalf
- Is committed to collaboration with colleagues, families, and communities in order to promote all students' learning and development
- Demonstrates professional ethical and legal behavior as defined by the respective codes of ethics and laws
- Demonstrates consistent professional behavior across all academic settings
- Maintains appropriate interpersonal and professional boundaries
- Accepts personal responsibility for one's behavior
- Expresses feelings and opinions effectively and appropriately
- Upholds confidentiality
Skill Building Courses

Before taking any math or English courses, students must take the DePaul placement tests to determine if skill level is at the college level. If placement indicates skill level in these courses, the courses become part of degree requirements. Consult with your advisor regarding placement test results and any required classes.

Advanced Standing

Students are conditionally admitted to the College of Education. There are additional requirements to reach Advanced Standing in your program in the College of Education. Requirements must be met to progress in the major and take courses in the Advanced Standing category.

Advanced Standing requirements are:

- Maintain a DePaul undergraduate 2.5 GPA
- Pass the Illinois Test of Academic Proficiency (TAP)
- Submit a petition for advanced standing form

Students should attempt to complete the Advanced Standing requirements soon after beginning the program. There is no time limit to meet these criteria; however, students will only be able to take pre-education courses until requirements have been met. Students can also take liberal studies or content area courses before or after meeting Advanced Standing requirements.

Modern Language Competence Requirement

Students pursuing a Bachelor of Arts degree in the College of Education will be required to demonstrate a measure of competence in a modern language, as defined by the college. Such competence may be demonstrated in one of several ways:

- completing two years of a language sequence in high school
- completing the last course in the first-year college sequence of any language
- completing a college course beyond the first-year level in any language
- achieving a satisfactory score on any of the Modern Language placement examinations administered at DePaul
- achieving a satisfactory rating in a proficiency examination accepted by DePaul
- achieving a score of 3 or higher on the Advanced Placement (AP) test for any language
- achieving a score of 5 or higher in the Language B assessment from a Standard or Higher Level International Baccalaureate (IB) program
- achieving a satisfactory score on the CLEP examination

Please note: The Modern Language Competence Requirement is not required for students in the Early Childhood Education: SNL Joint Program (BAECE) program.

For further information regarding satisfactory scores and possible credit from the DePaul placement, AP, CLEP, or IB examinations, please contact the Office of the University Registrar.

Students who complete an Inter-College Transfer (ICT) to the College of Education will abide by the COE Modern Language Requirement in place on the effective date of the ICT.

B.A. students who meet College requirements and wish to pursue further work in the language may elect the "Modern Language Option" of the Liberal Studies Program. While B.S. students are not required to demonstrate competency in a modern language, the "Modern Language Option" is available to them for language study at any level.

Licensure Tests

All individuals licensed by the Illinois State Board of Education (ISBE) are required to complete licensure tests specific to their teaching license.

Field Experiences

Each student seeking licensure from the College of Education/Professional Education Unit must complete supervised field experiences in appropriate settings in conjunction with education courses. The field experiences must include a variety of grade levels, multicultural experiences, and a minimum of 10 hours in special education settings. All field experiences must be completed prior to final approval for student teaching. Field experience hours should be entered by the student into the FEDS system when completing courses with field experience requirements.

Endorsements
An endorsement is a statement appearing on a license that identifies the specific subjects or grade level that the license holder is authorized to teach.

The Illinois State Board of Education (ISBE) issues endorsements in various subject areas. To view the full list and requirements, visit the ISBE website.

Please note that the Illinois State Board of Education (ISBE) may change the state licensure and endorsement requirements at any time and without prior notice. Individuals are bound by the requirements in place when applying for the license or endorsement, not the requirements in place when beginning the program.

**Student Teaching Requirements**

Student Teaching is the culminating clinical experience in the student's program. All students in teacher preparation programs must meet the following requirements before applying for student teaching:

**Academic Requirements:**
- Completion of all Liberal Studies, Pre-Education, Advanced Standing and concentration/content area courses
- Overall cumulative G.P.A. of 2.50 or better
- Cumulative GPA of 2.75 or better in all education courses
- Meet all other program requirements (e.g., modern language and residency requirements)
- Meet designated program standards
- Pass the required Illinois licensure content area test

**Clinical Requirements:**
- Completion of all required field experiences
- Three satisfactory evaluations in field experiences
- Three satisfactory faculty recommendations
- Attendance at mandatory meeting for student teaching
- Application for student teaching, resume, transcripts, and writing sample (check deadlines)
- Review and approval by Student Teaching Committee of the College of Education

**Student Teaching Timeline and Deadlines:**
- Attend a Mandatory Meeting approximately 1 year prior to expected quarter of student teaching.
- Submit application for student teaching after attending Mandatory Meeting, approximately 1 year prior to student teaching.
- Academic requirements are due one quarter before expected quarter of student teaching.
- Clinical requirements are completed as course requirements. Field experience hours are entered by the student as coursework is completed.

Online Faculty Evaluations are entered by the instructor of relevant courses. All data must be entered in the Field Experience Documentation System (FEDS) due one month prior to student teaching.

Individual child care agencies and public and private school districts may have additional requirements (application, training, background check, etc.).

**Degree Conferral and Graduation**

The awarding of a degree is not automatic. You must submit an application to be considered for the degree. DePaul awards and posts degrees at the end of each regular academic term (autumn, winter, spring, summer).

It is your responsibility to initiate the degree conferral application process by submitting an online application. Submitting an application means you intend to finish your degree requirements by the end of the term for which you have applied.

Undergraduate students must be approved for student teaching and complete student teaching and capstone to be cleared for the degree. Student must submit graduation application for the quarter that matches the quarter you are student teaching.

After you submit the application, you cannot register for any term after the one selected in the application.

To apply for degree conferral, log on to Campus Connection. Select STUDENT CENTER, then MY ACADEMICS. On screen instructions will take you through the application process.

Provided that all requirements and financial obligations are met, degrees are posted 30 days after the official end of the term. Official dates are listed on the Academic Calendar.
DePaul holds one commencement ceremony each year in June. If you intend to participate, you must first apply for degree conferral for the current academic year and then submit a cap and gown order. Honors are not announced at the ceremony for undergraduates completing their final courses in spring quarter because a final GPA is not available at the time of the ceremony.

Additional information about degree conferral and graduation can be found on the College of Education website at: http://education.depaul.edu/.

Licensure

Requirements for licensure include completion of full bachelor’s degree program, all licensure tests (including OPI for world language majors), and awarding of bachelor’s degree. A bachelor’s degree is required to qualify for licensure and must be awarded before applying for the license.

Individuals must submit an application directly to the Illinois State Board of Education after completion of requirements and after DePaul has submitted notification to ISBE. Application requirements include application form, application fee, official transcripts, and registration fee.

All individuals must meet ISBE requirements in place at the time of application for the license. Requirements are subject to change per the discretion of ISBE. All coursework and requirements pertaining to licensure requirements must be completed before DePaul University can recommend an individual for the license.

Individuals seeking additional endorsements after applying for the licensure must contact ISBE directly for an evaluation request.

All coursework and requirements must be completed before DePaul University can recommend an individual for the license.

Liberal Studies Requirements

Honors program requirements can be found in the individual Colleges & Schools section of the University Catalog. Select Academics, followed by Undergraduate, then Honors Program Alternative.

First Year Program

Chicago Quarter

- LSP 110 DISCOVER CHICAGO
  or LSP 111 EXPLORE CHICAGO

Focal Point

- LSP 112 FOCAL POINT SEMINAR

Writing

- WRD 103 COMPOSITION AND RHETORIC I *
- WRD 104 COMPOSITION AND RHETORIC II *

Quantitative Reasoning & Technological Literacy

- LSP 120 QUANTITATIVE REASONING & TECHNOLOGICAL LITERACY I
- LSP 121 QUANTITATIVE REASONING AND TECHNOLOGICAL LITERACY II
  (Note: See information below)

Sophomore Year
Multiculturalism in the US

- LSP 200 SEMINAR ON MULTICULTURALISM IN THE UNITED STATES

Junior Year

Experiential Learning

- Met by successful completion of required field experience hours.

Senior Year

Capstone

- WLE 384 CAPSTONE IN WORLD LANGUAGE EDUCATION *
  (Note: This must be taken with student teaching. Students must earn a C or better in this course.)

Learning Domains

Arts and Literature (AL)

- 2 Courses Required

Philosophical Inquiry (PI)

- 2 Courses Required:
  - LSE 380 PHILOSOPHICAL ISSUES IN EDUCATION AND CULTURE
  - 1 Additional Course
    (Note: PHL 100 recommended)

Scientific Inquiry (SI)

- 3 Courses Required:
  - 1 BIO course
  - 1 CHE/ENV/GEO/PHY course
  - 1 Additional Course
    (Note: One course must be a lab or SWK.)

Social, Cultural, and Behavioral Inquiry (SCBI)

- 2 Courses Required:
  - PSC 120 THE AMERICAN POLITICAL SYSTEM
  - 1 Additional Course

Religious Dimensions (RD)

- 2 Courses Required

Understanding the Past (UP)

- 2 Courses Required
  (Note: One must be US History.)

* Students must earn a C- or better in this course.

Notes

Specified required courses within Liberal Studies may have grade minimums (e.g. C- or better). Please consult your advisor or your college and major requirements.

Courses offered in the student's primary major cannot be taken to fulfill LSP Domain requirements. If students double major, LSP Domain courses may double count for both LSP credit and the second major.

In meeting learning domain requirements, no more than one course that is outside the student’s major and is cross-listed with a course within the student’s major, can be applied to count for LSP domain credit. This policy...
does not apply to those who are pursuing a double major or earning BFA or BM degrees.

**Quantitative Reasoning and Technological Literacy**

Readiness for LSP 120 is determined by the math placement test taken online after admission. Students may need to take developmental coursework prior to LSP 120. The LSP 120 requirement may be waived by credit already earned for advanced math coursework or by passing a dedicated proficiency exam. Students who complete both LSP 120 and LSP 121 take one less Learning Domain course. Students may not apply the course reduction to any Domain where only one course is required, and if taken within the SI Domain, the reduction cannot be applied to the SI Lab or SWK requirement.

**Major Requirements**

**Course Requirements**

**Content Area Courses**

Note: Language courses begin at the Advanced level for the major. A placement test in the language is required to determine skill level and appropriate level to begin the language. Beginning and Intermediate language courses are in addition to the content area requirements but can fulfill open elective requirements.

**Advanced Language Core: 12 quarter hours required, grade of C or better required**

- FCH 201 ADVANCED COMMUNICATION I
- FCH 202 ADVANCED COMMUNICATION II
- FCH 203 ADVANCED COMMUNICATION III
- FCH 204 ADVANCED COMMUNICATION IV

**Literature & Culture Courses: 20 quarter hours required, grade of C or better required**

- FCH 200-300 level course 1
- FCH 200-300 level course 2
- FCH 200-300 level course 3
- FCH 200-300 level course 4
- FCH 200-300 level course 5

**Language Electives Core: 12 quarter hours required, grade of C or better required**

- FCH 300 level course 1
- FCH 300 level course 2
- FCH 300 level course 3

**Linguistics Core: 4 quarter hours required, grade of C or better required**

- FCH 350 FRENCH PHONOLOGY AND PHONETICS

**Teaching Culture Core: 4 quarter hours required, grade of C or better required**

- WLE 370 SECOND & WORLD LANGUAGE LITERACIES AND CULTURES

**Education Courses: 40 quarter hours required, grade of C or better required**

- SCU 207 SOCIAL AND HISTORICAL ISSUES IN EDUCATION
- SCU 337 HUMAN GROWTH AND DEVELOPMENT
- SEC 364 METHODS: CURRICULUM AND INSTRUCTION IN SECONDARY SCHOOLS
- BBE 307 EQUITY ISSUES IN ASSESSMENT OF LANGUAGE LEARNERS
- LSI 346 STRATEGIES FOR MAINSTREAMING AND INCLUSION
- WLE 326 THEORETICAL FOUNDATIONS OF TEACHING ESL AND WLE
- WLE 349 STANDARD AND CONTENT-BASED METHODS OF TEACHING WORLD LANGUAGES K-12
Oral Proficiency Interview (OPI) Test

Pursuing certification in the teaching of a world language (Chinese, French, German, Italian, Japanese, or Spanish) requires the oral proficiency test – an Interview – before you begin student teaching. You must earn a rating of "intermediate high" or better on the test.

Open Electives: 8 quarter hours are required

Open elective credit also is required to meet the minimum graduation requirement of 192 hours. The following cannot be used to fulfill an open elective: WRD 98, MAT 94, and MAT 95. EE 281 recommended as open elective course. Electives must be approved by the WLE Program director.

Student Teaching: 12 quarter hours required, grade of B- or better required

Registration in student teaching requires completion of all requirements and procedures indicated in the college core section. EDU 95 indicates to the Illinois State Board of Education that all field experience hours are complete. All students also take WLE 384 with student teaching (listed in the Liberal Studies section).

- WLE 385 STUDENT TEACHING IN WORLD LANGUAGES (12 credit hours)
- EDU 95 CLINICAL EXPERIENCE WITH CHILDREN AND YOUTH (non-credit, non-tuition, PA grade required)

Licensure Tests

All individuals licensed by the Illinois State Board of Education (ISBE) are required to complete licensure tests specific to their teaching license. World Language Education French majors must complete the following tests:

- Test of Academic Proficiency (TAP) (test #400) - assesses knowledge of reading comprehension, language arts, writing, and math. It is recommended to be taken during the first or second quarter in the program. Test is required before Student Teaching (deadlines apply). Check with your advisor about qualifying for a waiver with acceptable ACT or SAT test scores.
- French Content Area Test (test #127) – assesses knowledge of the French language and culture. Test is required before Student Teaching (deadlines apply).
- OPI Test (see above).
- EdTPA - assessment conducted during the student teaching experience including video clips of instruction, lesson plans, student work samples, analysis of student learning and reflective commentaries. Students will submit an electronic portfolio to an outside agency for independent evaluation and a fee will be imposed by that agency as part of the assessment.

World Language Education German (BA)

The Bachelor of Arts program in World Language Education German prepares students to teach Kindergarten through 12th grade in a variety of urban and suburban education settings, including public and private elementary and high schools.

Students learn educational theories and effective teaching practices, participate in field experiences, which require observation and participation in teaching activities at multiple schools, and student teaching. Students should meet early and regularly with their advisor to design and monitor their program of study.

The program combines theoretical principles of education and field work with the student's choice of major. Students follow a general pattern of study for middle school and high school levels. In all cases, appropriate field experience plays an integral role.
Students entering the program must be able and willing to devote themselves to a program requiring a minimum of 130-135 hours of daytime field experiences in schools. These school-based clinical hours are completed in conjunction with methodology courses that require students to spend a half-day each week in a school. In addition, the student must spend a minimum of 11 weeks in full-time student teaching.

Please make sure you consult the Liberal Studies Requirements, Major Requirements, and College Core Requirements for full degree requirements.

**Licensure**

Illinois Professional Educator License with endorsement in Foreign Language German (kindergarten-grade 12), an Illinois State Board of Education (ISBE) approved program

**Learning Outcomes**

Students will be able to:

- Apply theoretical foundations of language education to develop sound instruction and teaching approaches for language learners.
- Integrate theory and research on second language acquisition into practice for language learners.
- Evaluate history and policies of language education and how historical and policy context affect the education of language learners.
- Analyze various assessment issues that affect language learners, such as accountability, reliability, validity, bias, special education.

**College Core Requirements**

**Dispositions**

The academic programs within the College of Education have set forth these dispositions as educational and professional expectations for all students. Students should be aware that failing to abide by DePaul University or College of Education policies including, under certain circumstances, these dispositions, could result in adverse consequences for the student, including removal from his or her program, the College of Education, or the University.

The following dispositions apply to Early Childhood Education, Elementary Education, Physical Education, Secondary Education, and World Language Education majors only:

- Reflects on progress and identifies strengths and weaknesses, including evaluating strategies for success, finding alternatives for inappropriate strategies, and modifying future practices
- Is receptive to faculty feedback and acts meaningfully and professionally upon suggestions
- Values critical thinking, including engaging theoretical and philosophical frameworks and shows evidence of critical thinking through discussion and writing (e.g., journals, response to prompts)
- Understands the importance of and is committed to communicating clearly orally and in writing both in traditional and in new and emerging digital formats
- Values and is committed to continually developing strong content area knowledge and/or knowledge of the professional field, including pedagogical content knowledge
• Takes initiative, uses imagination and creativity, and seeks out information using a variety of human and material resources and technology to inform his or her teaching
• Is aware of the role of classroom environment and uses management procedures that reflect respect and care for learners and concern for their emotional and physical well being
• Takes the time and effort needed to understand how students learn, including discovering their interests and experiences and determining how to shape teaching acts (using technology as appropriate) that engage learners meaningfully and actively
• Values and is committed to using assessment to evaluate and ensure the continuous intellectual, social, emotional, and physical development of the learner
• Respects and considers cultural contexts in order to determine how to be responsive to learners and to proactively promote all students’ learning
• Values and is responsive to diverse learners’ academic, emotional, and social needs through teaching acts (including careful instructional planning, implementation, and differentiation) and through everyday interactions with students
• Is committed to collaboration with colleagues, families, and communities in order to promote all students’ learning and development
• Recognizes and fulfills professional responsibilities and habits of conduct (e.g., dress, language, preparedness, attendance, punctuality, etc.)
• Demonstrates collegiality, honesty, good judgment, courtesy, respect, and diplomacy
• Balances self-confidence and assertiveness with respect for others’ perspectives
• Respects the requirements, expectations, and procedures of both the College of Education and of our field partners and appreciates the issues of trust, fairness, and professionalism involved

The following dispositions apply to Special Education majors only:

• Is receptive to faculty feedback and acts meaningfully and professionally upon suggestions
• Reflects on his or her own progress, identifies strengths and weaknesses, and evaluates strategies for success and professional growth
• Takes initiative
• Is open to new ideas and engagement in learning
• Respects diversity and cultural contexts to determine how to be responsive to learners and to proactively promote all students’ learning
• Expresses positive attitudes toward individuals with disabilities and a willingness to advocate on their behalf
• Is committed to collaboration with colleagues, families, and communities in order to promote all students’ learning and development
• Demonstrates professional ethical and legal behavior as defined by the respective codes of ethics and laws
• Demonstrates consistent professional behavior across all academic settings
• Maintains appropriate interpersonal and professional boundaries
• Accepts personal responsibility for one’s behavior
• Expresses feelings and opinions effectively and appropriately
• Upholds confidentiality

Skill Building Courses

Before taking any math or English courses, students must take the DePaul placement tests to determine if skill level is at the college level. If placement indicates skill level in these courses, the courses become part of degree requirements. Consult with your advisor regarding placement test results and any required classes.

Advanced Standing

Students are conditionally admitted to the College of Education. There are additional requirements to reach Advanced Standing in your program in the College of Education. Requirements must be met to progress in the major and take courses in the Advanced Standing category.

Advanced Standing requirements are:

• Maintain a DePaul undergraduate 2.5 GPA
• Pass the Illinois Test of Academic Proficiency (TAP)
• Submit a petition for advanced standing form

Students should attempt to complete the Advanced Standing requirements soon after beginning the program. There is no time limit to meet these criteria; however, students will only be able to take pre-education courses until requirements have been met. Students can also take liberal studies or content area courses before or after meeting Advanced Standing requirements.

Modern Language Competence Requirement

Students pursuing a Bachelor of Arts degree in the College of Education will be required to demonstrate a measure of competence in a modern language, as defined by the college. Such competence may be demonstrated in one of several ways:
• completing two years of a language sequence in high school
• completing the last course in the first-year college sequence of any language
• completing a college course beyond the first-year level in any language
• achieving a satisfactory score on any of the Modern Language placement examinations administered at DePaul
• achieving a satisfactory rating in a proficiency examination accepted by DePaul
• achieving a score of 3 or higher on the Advance Placement (AP) test for any language
• achieving a score of 5 or higher in the Language B assessment from a Standard or Higher Level International Baccalaureate (IB) program
• achieving a satisfactory score on the CLEP examination

Please note: The Modern Language Competence Requirement is not required for students in the Early Childhood Education: SNL Joint Program (BAECE) program.

For further information regarding satisfactory scores and possible credit from the DePaul placement, AP, CLEP, or IB examinations, please contact the Office of the University Registrar.

Students who complete an Inter-College Transfer (ICT) to the College of Education will abide by the COE Modern Language Requirement in place on the effective date of the ICT.

B.A. students who meet College requirements and wish to pursue further work in the language may elect the “Modern Language Option” of the Liberal Studies Program. While B.S. students are not required to demonstrate competency in a modern language, the “Modern Language Option” is available to them for language study at any level.

Licensure Tests

All individuals licensed by the Illinois State Board of Education (ISBE) are required to complete licensure tests specific to their teaching license.

Field Experiences

Each student seeking licensure from the College of Education/Professional Education Unit must complete supervised field experiences in appropriate settings in conjunction with education courses. The field experiences must include a variety of grade levels, multicultural experiences, and a minimum of 10 hours in special education settings. All field experiences must be completed prior to final approval for student teaching. Field experience hours should be entered by the student into the FEDS system when completing courses with field experience requirements.

Endorsements

An endorsement is a statement appearing on a license that identifies the specific subjects or grade level that the license holder is authorized to teach.

The Illinois State Board of Education (ISBE) issues endorsements in various subject areas. To view the full list and requirements, visit the ISBE website.

Please note that the Illinois State Board of Education (ISBE) may change the state licensure and endorsement requirements at any time and without prior notice. Individuals are bound by the requirements in place when applying for the license or endorsement, not the requirements in place when beginning the program.

Student Teaching Requirements

Student Teaching is the culminating clinical experience in the student's program. All students in teacher preparation programs must meet the following requirements before applying for student teaching:

Academic Requirements:

• Completion of all Liberal Studies, Pre-Education, Advanced Standing and concentration/content area courses
• Overall cumulative G.P.A. of 2.50 or better
• Cumulative GPA. of 2.75 or better in all education courses
• Meet all other program requirements (e.g., modern language and residency requirements)
• Meet designated program standards
• Pass the required Illinois licensure content area test

Clinical Requirements:
• Completion of all required field experiences
• Three satisfactory evaluations in field experiences
• Three satisfactory faculty recommendations
• Attendance at mandatory meeting for student teaching
• Application for student teaching, resume, transcripts, and writing sample (check deadlines)
• Review and approval by Student Teaching Committee of the College of Education

**Student Teaching Timeline and Deadlines:**

• Attend a Mandatory Meeting approximately 1 year prior to expected quarter of student teaching.
• Submit application for student teaching after attending Mandatory Meeting, approximately 1 year prior to student teaching.
• Academic requirements are due one quarter before expected quarter of student teaching.
• Clinical requirements are completed as course requirements. Field experience hours are entered by the student as coursework is completed.

Online Faculty Evaluations are entered by the instructor of relevant courses. All data must be entered in the Field Experience Documentation System (FEDS) due one month prior to student teaching.

Individual child care agencies and public and private school districts may have additional requirements (application, training, background check, etc.).

**Degree Conferral and Graduation**

The awarding of a degree is not automatic. You must submit an application to be considered for the degree. DePaul awards and posts degrees at the end of each regular academic term (autumn, winter, spring, summer).

It is your responsibility to initiate the degree conferral application process by submitting an online application. Submitting an application means you intend to finish your degree requirements by the end of the term for which you have applied.

Undergraduate students must be approved for student teaching and complete student teaching and capstone to be cleared for the degree. Student must submit graduation application for the quarter that matches the quarter you are student teaching.

After you submit the application, you cannot register for any term after the one selected in the application.

To apply for degree conferral, log on to Campus Connection. Select STUDENT CENTER, then MY ACADEMICS. On screen instructions will take you through the application process.

Provided that all requirements and financial obligations are met, degrees are posted 30 days after the official end of the term. Official dates are listed on the Academic Calendar.

DePaul holds one commencement ceremony each year in June. If you intend to participate, you must first apply for degree conferral for the current academic year and then submit a cap and gown order. Honors are not announced at the ceremony for undergraduates completing their final courses in spring quarter because a final GPA is not available at the time of the ceremony.

Additional information about degree conferral and graduation can be found on the College of Education website at: http://education.depaul.edu/.

**Licensure**

Requirements for licensure include completion of full bachelor’s degree program, all licensure tests (including OPI for world language majors), and awarding of bachelor’s degree. A bachelor’s degree is required to qualify for licensure and must be awarded before applying for the license.

Individuals must submit an application directly to the Illinois State Board of Education after completion of requirements and after DePaul has submitted notification to ISBE. Application requirements include application form, application fee, official transcripts, and registration fee.

All individuals must meet ISBE requirements in place at the time of application for the license. Requirements are subject to change per the discretion of ISBE. All coursework and requirements pertaining to licensure requirements must be completed before DePaul University can recommend an individual for the license.

Individuals seeking additional endorsements after applying for the licensure must contact ISBE directly for an evaluation request.
All coursework and requirements must be completed before DePaul University can recommend an individual for the license.

Liberal Studies Requirements

Honors program requirements can be found in the individual Colleges & Schools section of the University Catalog. Select Academics, followed by Undergraduate, then Honors Program Alternative.

First Year Program

Chicago Quarter
- LSP 110 DISCOVER CHICAGO
  or LSP 111 EXPLORE CHICAGO

Focal Point
- LSP 112 FOCAL POINT SEMINAR

Writing
- WRD 103 COMPOSITION AND RHETORIC I *
- WRD 104 COMPOSITION AND RHETORIC II *

Quantitative Reasoning & Technological Literacy
- LSP 120 QUANTITATIVE REASONING & TECHNOLOGICAL LITERACY I
- LSP 121 QUANTITATIVE REASONING AND TECHNOLOGICAL LITERACY II
  (Note: See information below)

Sophomore Year

Multiculturalism in the US
- LSP 200 SEMINAR ON MULTICULTURALISM IN THE UNITED STATES

Junior Year

Experiential Learning
- Met by successful completion of required field experience hours.

Senior Year

Capstone
- WLE 384 CAPSTONE IN WORLD LANGUAGE EDUCATION *
  (Note: This must be taken with student teaching. Students must earn a C or better in this course.)

Learning Domains

Arts and Literature (AL)
- 2 Courses Required
Philosophical Inquiry (PI)

- 2 Courses Required:
  - LSE 380 PHILOSOPHICAL ISSUES IN EDUCATION AND CULTURE
  - 1 Additional Course
    (Note: PHL 100 recommended)

Scientific Inquiry (SI)

- 3 Courses Required:
  - 1 BIO course
  - 1 CHE/ENV/GEO/PHY course
  - 1 Additional Course
    (Note: One course must be a lab or SWK.)

Social, Cultural, and Behavioral Inquiry (SCBI)

- 2 Courses Required:
  - PSC 120 THE AMERICAN POLITICAL SYSTEM
  - 1 Additional Course

Religious Dimensions (RD)

- 2 Courses Required

Understanding the Past (UP)

- 2 Courses Required
  (Note: One must be US History.)

* Students must earn a C- or better in this course.

Notes

Specified required courses within Liberal Studies may have grade minimums (e.g. C- or better). Please consult your advisor or your college and major requirements.

Courses offered in the student's primary major cannot be taken to fulfill LSP Domain requirements. If students double major, LSP Domain courses may double count for both LSP credit and the second major.

In meeting learning domain requirements, no more than one course that is outside the student's major and is cross-listed with a course within the student's major, can be applied to count for LSP domain credit. This policy does not apply to those who are pursuing a double major or earning BFA or BM degrees.

Quantitative Reasoning and Technological Literacy

Readiness for LSP 120 is determined by the math placement test taken online after admission. Students may need to take developmental coursework prior to LSP 120. The LSP 120 requirement may be waived by credit already earned for advanced math coursework or by passing a dedicated proficiency exam. Students who complete both LSP 120 and LSP 121 take one less Learning Domain course. Students may not apply the course reduction to any Domain where only one course is required, and if taken within the SI Domain, the reduction cannot be applied to the SI Lab or SWK requirement.

Major Requirements

Course Requirements

Content Area Courses
Note: Language courses begin at the Advanced level for the major. A placement test in the language is required
to determine skill level and appropriate level to begin the language. Beginning and Intermediate language
courses are in addition to the content area requirements but can fulfill open elective requirements.

**Advanced Language Core: 12 quarter hours required, grade of C or better required**

- GER 201 ADVANCED COMMUNICATION I
- GER 202 ADVANCED COMMUNICATION II
- GER 203 ADVANCED COMMUNICATION III

**Language Electives Core: 36 quarter hours required, grade of C or better required**

- GER 200-300 level course 1
- GER 200-300 level course 2
- GER 200-300 level course 3
- GER 200-300 level course 4
- GER 200-300 level course 5
- GER 200-300 level course 6
- GER 200-300 level course 7
- GER 200-300 level course 8
- GER 200-300 level course 9

**Teaching Culture Core: 4 quarter hours required, grade of C or better required**

- WLE 370 SECOND & WORLD LANGUAGE LITERACIES AND CULTURES

**Education Courses: 40 quarter hours required, grade of C or better required**

- SCU 207 SOCIAL AND HISTORICAL ISSUES IN EDUCATION
- SCU 337 HUMAN GROWTH AND DEVELOPMENT
- SEC 364 METHODS: CURRICULUM AND INSTRUCTION IN SECONDARY SCHOOLS
- BBE 307 EQUITY ISSUES IN ASSESSMENT OF LANGUAGE LEARNERS
- LSI 346 STRATEGIES FOR MAINSTREAMING AND INCLUSION
- WLE 326 THEORETICAL FOUNDATIONS OF TEACHING ESL AND WLE
- WLE 349 STANDARD AND CONTENT-BASED METHODS OF TEACHING WORLD LANGUAGES K-12
- WLE 360 SECOND, WORLD AND HERITAGE LANGUAGE ACQUISITION K-12
- WLE 375 WLE HISTORY, POLICY, AND CURRICULUM DEVELOPMENT
- SCU 338 THE PROCESS AND EVALUATION OF LEARNING
  or SCU 339 PHILOSOPHY AND PSYCHOLOGY OF YOUTH AND MIDDLE LEVEL EDUCATION

**Oral Proficiency Interview (OPI) Test**

Pursuing certification in the teaching of a world language (Chinese, French, German, Italian, Japanese, or
Spanish) requires the oral proficiency test – an Interview – before you begin student teaching. You must earn a
rating of “intermediate high” or better on the test.

**Open Electives: 8 quarter hours are required**

Open elective credit also is required to meet the minimum graduation requirement of 192 hours. The following
cannot be used to fulfill an open elective: WRD 98, MAT 94, and MAT 95. EE 281 recommended as open
elective course. Electives must be approved by the WLE Program director.

**Student Teaching: 12 quarter hours required, grade of B- or better required**

Registration in student teaching requires completion of all requirements and procedures indicated in the college
core section. EDU 95 indicates to the Illinois State Board of Education that all field experience hours are
complete. All students also take WLE 384 with student teaching (listed in the Liberal Studies section).

- WLE 385 STUDENT TEACHING IN WORLD LANGUAGES (12 credit hours)
- EDU 95 CLINICAL EXPERIENCE WITH CHILDREN AND YOUTH (non-credit, non-tuition, PA grade
  required)

**Licensure Tests**

All individuals licensed by the Illinois State Board of Education (ISBE) are required to complete licensure tests
specific to their teaching license. World Language Education German majors must complete the following tests:
- Test of Academic Proficiency (TAP) (test #400) - assesses knowledge of reading comprehension, language arts, writing, and math. It is recommended to be taken during the first or second quarter in the program. Test is required before Student Teaching (deadlines apply). *Check with your advisor about qualifying for a waiver with acceptable ACT or SAT test scores.
- German Content Area Test (test #128) – assesses knowledge of the German language and culture. Test is required before Student Teaching (deadlines apply).
- OPI Test (see above).
- EdTPA - assessment conducted during the student teaching experience including video clips of instruction, lesson plans, student work samples, analysis of student learning and reflective commentaries. Students will submit an electronic portfolio to an outside agency for independent evaluation and a fee will be imposed by that agency as part of the assessment.

---

**World Language Education Italian (BA)**

The Bachelor of Arts program in World Language Education Italian prepares students to teach Kindergarten through 12th grade in a variety of urban and suburban education settings, including public and private elementary and high schools.

Students learn educational theories and effective teaching practices, participate in field experiences, which require observation and participation in teaching activities at multiple schools, and student teaching. Students should meet early and regularly with their advisor to design and monitor their program of study.

The program combines theoretical principles of education and field work with the student's choice of major. Students follow a general pattern of study for middle school and high school levels. In all cases, appropriate field experience plays an integral role.

Students entering the program must be able and willing to devote themselves to a program requiring a minimum of 130-135 hours of daytime field experiences in schools. These school-based clinical hours are completed in conjunction with methodology courses that require students to spend a half-day each week in a school. In addition, the student must spend a minimum of 11 weeks in full-time student teaching.

Please make sure you consult the Liberal Studies Requirements, Major Requirements, and College Core Requirements for full degree requirements.

**Licensure**

Illinois Professional Educator License with endorsement in Foreign Language Italian (kindergarten-grade 12), an Illinois State Board of Education (ISBE) approved program.

**Learning Outcomes**

Students will be able to:

- Apply theoretical foundations of language education to develop sound instruction and teaching approaches for language learners.
- Integrate theory and research on second language acquisition into practice for language learners.
• Evaluate history and policies of language education and how historical and policy context affect the education of language learners.

• Analyze various assessment issues that affect language learners, such as accountability, reliability, validity, bias, special education.

College Core Requirements

Dispositions

The academic programs within the College of Education have set forth these dispositions as educational and professional expectations for all students. Students should be aware that failing to abide by DePaul University or College of Education policies including, under certain circumstances, these dispositions, could result in adverse consequences for the student, including removal from his or her program, the College of Education, or the University.

The following dispositions apply to Early Childhood Education, Elementary Education, Physical Education, Secondary Education, and World Language Education majors only:

• Reflects on progress and identifies strengths and weaknesses, including evaluating strategies for success, finding alternatives for inappropriate strategies, and modifying future practices
• Is receptive to faculty feedback and acts meaningfully and professionally upon suggestions
• Values critical thinking, including engaging theoretical and philosophical frameworks and shows evidence of critical thinking through discussion and writing (e.g., journals, response to prompts)
• Understands the importance of and is committed to communicating clearly orally and in writing both in traditional and in new and emerging digital formats
• Values and is committed to continually developing strong content area knowledge and/or knowledge of the professional field, including pedagogical content knowledge
• Takes initiative, uses imagination and creativity, and seeks out information using a variety of human and material resources and technology to inform his or her teaching
• Is aware of the role of classroom environment and uses management procedures that reflect respect and care for learners and concern for their emotional and physical well being
• Takes the time and effort needed to understand how students learn, including discovering their interests and experiences and determining how to shape teaching acts (using technology as appropriate) that engage learners meaningfully and actively
• Values and is committed to using assessment to evaluate and ensure the continuous intellectual, social, emotional, and physical development of the learner
• Respects and considers cultural contexts in order to determine how to be responsive to learners and to proactively promote all students' learning
• Values and is responsive to diverse learners' academic, emotional, and social needs through teaching acts (including careful instructional planning, implementation, and differentiation) and through everyday interactions with students
• Is committed to collaboration with colleagues, families, and communities in order to promote all students' learning and development
• Recognizes and fulfills professional responsibilities and habits of conduct (e.g., dress, language, preparedness, attendance, punctuality, etc.)
• Demonstrates collegiality, honesty, good judgment, courtesy, respect, and diplomacy
• Balances self-confidence and assertiveness with respect for others' perspectives
• Respects the requirements, expectations, and procedures of both the College of Education and of our field partners and appreciates the issues of trust, fairness, and professionalism involved

The following dispositions apply to Special Education majors only:

• Is receptive to faculty feedback and acts meaningfully and professionally upon suggestions
• Reflects on his or her own progress, identifies strengths and weaknesses, and evaluates strategies for success and professional growth
• Takes initiative
• Is open to new ideas and engagement in learning
• Respects diversity and cultural contexts to determine how to be responsive to learners and to proactively promote all students' learning
• Expresses positive attitudes toward individuals with disabilities and a willingness to advocate on their behalf
• Is committed to collaboration with colleagues, families, and communities in order to promote all students' learning
learning and development

- Demonstrates professional ethical and legal behavior as defined by the respective codes of ethics and laws
- Demonstrates consistent professional behavior across all academic settings
- Maintains appropriate interpersonal and professional boundaries
- Accepts personal responsibility for one's behavior
- Expresses feelings and opinions effectively and appropriately
- Upholds confidentiality

Skill Building Courses

Before taking any math or English courses, students must take the DePaul placement tests to determine if skill level is at the college level. If placement indicates skill level in these courses, the courses become part of degree requirements. Consult with your advisor regarding placement test results and any required classes.

Advanced Standing

Students are conditionally admitted to the College of Education. There are additional requirements to reach Advanced Standing in your program in the College of Education. Requirements must be met to progress in the major and take courses in the Advanced Standing category.

Advanced Standing requirements are:

- Maintain a DePaul undergraduate 2.5 GPA
- Pass the Illinois Test of Academic Proficiency (TAP)
- Submit a petition for advanced standing form

Students should attempt to complete the Advanced Standing requirements soon after beginning the program. There is no time limit to meet these criteria; however, students will only be able to take pre-education courses until requirements have been met. Students can also take liberal studies or content area courses before or after meeting Advanced Standing requirements.

Modern Language Competence Requirement

Students pursuing a Bachelor of Arts degree in the College of Education will be required to demonstrate a measure of competence in a modern language, as defined by the college. Such competence may be demonstrated in one of several ways:

- completing two years of a language sequence in high school
- completing the last course in the first-year college sequence of any language
- completing a college course beyond the first-year level in any language
- achieving a satisfactory score on any of the Modern Language placement examinations administered at DePaul
- achieving a satisfactory rating in a proficiency examination accepted by DePaul
- achieving a score of 3 or higher on the Advance Placement (AP) test for any language
- achieving a score of 5 or higher in the Language B assessment from a Standard or Higher Level International Baccalaureate (IB) program
- achieving a satisfactory score on the CLEP examination

Please note: The Modern Language Competence Requirement is not required for students in the Early Childhood Education: SNL Joint Program (BAECE) program.

For further information regarding satisfactory scores and possible credit from the DePaul placement, AP, CLEP, or IB examinations, please contact the Office of the University Registrar.

Students who complete an Inter-College Transfer (ICT) to the College of Education will abide by the COE Modern Language Requirement in place on the effective date of the ICT.

B.A. students who meet College requirements and wish to pursue further work in the language may elect the "Modern Language Option" of the Liberal Studies Program. While B.S. students are not required to demonstrate competency in a modern language, the "Modern Language Option" is available to them for language study at any level.

Licensure Tests

All individuals licensed by the Illinois State Board of Education (ISBE) are required to complete licensure tests specific to their teaching license.

Field Experiences
Each student seeking licensure from the College of Education/Professional Education Unit must complete supervised field experiences in appropriate settings in conjunction with education courses. The field experiences must include a variety of grade levels, multicultural experiences, and a minimum of 10 hours in special education settings. All field experiences must be completed prior to final approval for student teaching. Field experience hours should be entered by the student into the FEDS system when completing courses with field experience requirements.

**Endorsements**

An endorsement is a statement appearing on a license that identifies the specific subjects or grade level that the license holder is authorized to teach.

The Illinois State Board of Education (ISBE) issues endorsements in various subject areas. To view the full list and requirements, visit the ISBE website.

Please note that the Illinois State Board of Education (ISBE) may change the state licensure and endorsement requirements at any time and without prior notice. Individuals are bound by the requirements in place when applying for the license or endorsement, not the requirements in place when beginning the program.

**Student Teaching Requirements**

Student Teaching is the culminating clinical experience in the student’s program. All students in teacher preparation programs must meet the following requirements before applying for student teaching:

**Academic Requirements:**

- Completion of all Liberal Studies, Pre-Education, Advanced Standing and concentration/content area courses
- Overall cumulative G.P.A. of 2.50 or better
- Cumulative GPA. of 2.75 or better in all education courses
- Meet all other program requirements (e.g., modern language and residency requirements)
- Meet designated program standards
- Pass the required Illinois licensure content area test

**Clinical Requirements:**

- Completion of all required field experiences
- Three satisfactory evaluations in field experiences
- Three satisfactory faculty recommendations
- Attendance at mandatory meeting for student teaching
- Application for student teaching, resume, transcripts, and writing sample (check deadlines)
- Review and approval by Student Teaching Committee of the College of Education

**Student Teaching Timeline and Deadlines:**

- Attend a Mandatory Meeting approximately 1 year prior to expected quarter of student teaching.
- Submit application for student teaching after attending Mandatory Meeting, approximately 1 year prior to student teaching.
- Academic requirements are due one quarter before expected quarter of student teaching.
- Clinical requirements are completed as course requirements. Field experience hours are entered by the student as coursework is completed.

Online Faculty Evaluations are entered by the instructor of relevant courses. All data must be entered in the Field Experience Documentation System (FEDS) due one month prior to student teaching.

Individual child care agencies and public and private school districts may have additional requirements (application, training, background check, etc.).

**Degree Conferral and Graduation**

The awarding of a degree is not automatic. You must submit an application to be considered for the degree. DePaul awards and posts degrees at the end of each regular academic term (autumn, winter, spring, summer).

It is your responsibility to initiate the degree conferral application process by submitting an online application. Submitting an application means you intend to finish your degree requirements by the end of the term for which you have applied.

Undergraduate students must be approved for student teaching and complete student teaching and capstone to be cleared for the degree. Student must submit graduation application for the quarter that matches the quarter you are student teaching.
After you submit the application, you cannot register for any term after the one selected in the application.

To apply for degree conferral, log on to Campus Connection. Select STUDENT CENTER, then MY ACADEMICS. On screen instructions will take you through the application process.

Provided that all requirements and financial obligations are met, degrees are posted 30 days after the official end of the term. Official dates are listed on the Academic Calendar.

DePaul holds one commencement ceremony each year in June. If you intend to participate, you must first apply for degree conferral for the current academic year and then submit a cap and gown order. Honors are not announced at the ceremony for undergraduates completing their final courses in spring quarter because a final GPA is not available at the time of the ceremony.

Additional information about degree conferral and graduation can be found on the College of Education website at: http://education.depaul.edu/.

**Licensure**

Requirements for licensure include completion of full bachelor’s degree program, all licensure tests (including OPI for world language majors), and awarding of bachelor’s degree. A bachelor’s degree is required to qualify for licensure and must be awarded before applying for the license.

Individuals must submit an application directly to the Illinois State Board of Education after completion of requirements and after DePaul has submitted notification to ISBE. Application requirements include application form, application fee, official transcripts, and registration fee.

All individuals must meet ISBE requirements in place at the time of application for the license. Requirements are subject to change per the discretion of ISBE. All coursework and requirements pertaining to licensure requirements must be completed before DePaul University can recommend an individual for the license.

Individuals seeking additional endorsements after applying for the licensure must contact ISBE directly for an evaluation request.

All coursework and requirements must be completed before DePaul University can recommend an individual for the license.

**Liberal Studies Requirements**

Honors program requirements can be found in the individual Colleges & Schools section of the University Catalog. Select Academics, followed by Undergraduate, then Honors Program Alternative.

**First Year Program**

**Chicago Quarter**

- LSP 110 DISCOVER CHICAGO
  or LSP 111 EXPLORE CHICAGO

**Focal Point**

- LSP 112 FOCAL POINT SEMINAR

  - 1 Additional Course

Religious Dimensions (RD)

- 2 Courses Required

Understanding the Past (UP)

- 2 Courses Required
  (Note: One must be US History.)

* Students must earn a C- or better in this course.

Notes
Specified required courses within Liberal Studies may have grade minimums (e.g. C- or better). Please consult your advisor or your college and major requirements.

Courses offered in the student's primary major cannot be taken to fulfill LSP Domain requirements. If students double major, LSP Domain courses may double count for both LSP credit and the second major.

In meeting learning domain requirements, no more than one course that is outside the student’s major and is cross-listed with a course within the student's major, can be applied to count for LSP domain credit. This policy does not apply to those who are pursuing a double major or earning BFA or BM degrees.

**Quantitative Reasoning and Technological Literacy**

Readiness for LSP 120 is determined by the math placement test taken online after admission. Students may need to take developmental coursework prior to LSP 120. The LSP 120 requirement may be waived by credit already earned for advanced math coursework or by passing a dedicated proficiency exam. Students who complete both LSP 120 and LSP 121 take one less Learning Domain course. Students may not apply the course reduction to any Domain where only one course is required, and if taken within the SI Domain, the reduction cannot be applied to the SI Lab or SWK requirement.

**Major Requirements**

**Course Requirements**

**Content Area Courses**

Note: Language courses begin at the Advanced level for the major. A placement test in the language is required to determine skill level and appropriate level to begin the language. Beginning and Intermediate language courses are in addition to the content area requirements but can fulfill open elective requirements.

**Advanced Language Core: 12 quarter hours required, grade of C or better required**

- ITA 200-300 level course 9

**Teaching Culture Core: 4 quarter hours required, grade of C or better required**

- WLE 370 SECOND & WORLD LANGUAGE LITERACIES AND CULTURES

**Education Courses: 40 quarter hours required, grade of C or better required**

- SCU 207 SOCIAL AND HISTORICAL ISSUES IN EDUCATION
- SCU 337 HUMAN GROWTH AND DEVELOPMENT
- SEC 364 METHODS: CURRICULUM AND INSTRUCTION IN SECONDARY SCHOOLS
- BBE 307 EQUITY ISSUES IN ASSESSMENT OF LANGUAGE LEARNERS
- LSI 346 STRATEGIES FOR MAINSTREAMING AND INCLUSION
- WLE 326 THEORETICAL FOUNDATIONS OF TEACHING ESL AND WLE
- WLE 349 STANDARD AND CONTENT-BASED METHODS OF TEACHING WORLD LANGUAGES K-12
Oral Proficiency Interview (OPI) Test

Pursuing certification in the teaching of a world language (Chinese, French, German, Italian, Japanese, or Spanish) requires the oral proficiency test—an Interview—before you begin student teaching. You must earn a rating of "intermediate high" or better on the test.

Open Electives: 8 quarter hours are required

Open elective credit also is required to meet the minimum graduation requirement of 192 hours. The following cannot be used to fulfill an open elective: WRD 98, MAT 94, and MAT 95. EE 281 recommended as open elective course. Electives must be approved by the WLE Program director.

Student Teaching: 12 quarter hours required, grade of B- or better required

Registration in student teaching requires completion of all requirements and procedures indicated in the college core section. EDU 95 indicates to the Illinois State Board of Education that all field experience hours are complete. All students also take WLE 384 with student teaching (listed in the Liberal Studies section).

- WLE 385 STUDENT TEACHING IN WORLD LANGUAGES (12 credit hours)
- EDU 95 CLINICAL EXPERIENCE WITH CHILDREN AND YOUTH (non-credit, non-tuition, PA grade required)

Licensure Tests

All individuals licensed by the Illinois State Board of Education (ISBE) are required to complete licensure tests specific to their teaching license. World Language Education Italian majors must complete the following tests:

- Test of Academic Proficiency (TAP) (test #400) - assesses knowledge of reading comprehension, language arts, writing, and math. It is recommended to be taken during the first or second quarter in the program. Test is required before Student Teaching (deadlines apply). *Check with your advisor about qualifying for a waiver with acceptable ACT or SAT test scores.
- Italian Content Area Test (test #130) – assesses knowledge of the Italian language and culture. Test is required before Student Teaching (deadlines apply).
- OPI Test (see above).
- EdTPA - assessment conducted during the student teaching experience including video clips of instruction, lesson plans, student work samples, analysis of student learning and reflective commentaries. Students will submit an electronic portfolio to an outside agency for independent evaluation and a fee will be imposed by that agency as part of the assessment.

World Language Education Japanese (BA)

The Bachelor of Arts program in World Language Education Japanese prepares students to teach Kindergarten through 12th grade in a variety of urban and suburban education settings, including public and private elementary and high schools.

Students learn educational theories and effective teaching practices, participate in field experiences, which require observation and participation in teaching activities at multiple schools, and student teaching. Students should meet early and regularly with their advisor to design and monitor their program of study.

The program combines theoretical principles of education and field work with the student's choice of major. Students follow a general pattern of study for middle school and high school levels. In all cases, appropriate field experience plays an integral role.

DePaul University

Winter/Spring/Summer 2016-2017

Page 1016 of 2776
Students entering the program must be able and willing to devote themselves to a program requiring a minimum of 130-135 hours of daytime field experiences in schools. These school-based clinical hours are completed in conjunction with methodology courses that require students to spend a half-day each week in a school. In addition, the student must spend a minimum of 11 weeks in full-time student teaching.

Please make sure you consult the Liberal Studies Requirements, Major Requirements, and College Core Requirements for full degree requirements.

**Licensure**

Illinois Professional Educator License with endorsement in Foreign Language Japanese (kindergarten-grade 12), an Illinois State Board of Education (ISBE) approved program.

**Learning Outcomes**

Students will be able to:

- Apply theoretical foundations of language education to develop sound instruction and teaching approaches for language learners.
- Integrate theory and research on second language acquisition into practice for language learners.
- Evaluate history and policies of language education and how historical and policy context affect the education of language learners.
- Analyze various assessment issues that affect language learners, such as accountability, reliability, validity, bias, special education.

**College Core Requirements**

**Dispositions**

The academic programs within the College of Education have set forth these dispositions as educational and professional expectations for all students. Students should be aware that failing to abide by DePaul University or College of Education policies including, under certain circumstances, these dispositions, could result in adverse consequences for the student, including removal from his or her program, the College of Education, or the University.

The following dispositions apply to Early Childhood Education, Elementary Education, Physical Education, Secondary Education, and World Language Education majors only:

- Reflects on progress and identifies strengths and weaknesses, including evaluating strategies for success, finding alternatives for inappropriate strategies, and modifying future practices
- Is receptive to faculty feedback and acts meaningfully and professionally upon suggestions
- Values critical thinking, including engaging theoretical and philosophical frameworks and shows evidence of critical thinking through discussion and writing (e.g., journals, response to prompts)
- Understands the importance of and is committed to communicating clearly orally and in writing both in traditional and in new and emerging digital formats
- Values and is committed to continually developing strong content area knowledge and/or knowledge of the professional field, including pedagogical content knowledge
• Takes initiative, uses imagination and creativity, and seeks out information using a variety of human and material resources and technology to inform his or her teaching
• Is aware of the role of classroom environment and uses management procedures that reflect respect and care for learners and concern for their emotional and physical well being
• Takes the time and effort needed to understand how students learn, including discovering their interests and experiences and determining how to shape teaching acts (using technology as appropriate) that engage learners meaningfully and actively
• Values and is committed to using assessment to evaluate and ensure the continuous intellectual, social, emotional, and physical development of the learner
• Respects and considers cultural contexts in order to determine how to be responsive to learners and to proactively promote all students' learning
• Values and is responsive to diverse learners' academic, emotional, and social needs through teaching acts (including careful instructional planning, implementation, and differentiation) and through everyday interactions with students
• Is committed to collaboration with colleagues, families, and communities in order to promote all students' learning and development
• Recognizes and fulfills professional responsibilities and habits of conduct (e.g., dress, language, preparedness, attendance, punctuality, etc.)
• Demonstrates collegiality, honesty, good judgment, courtesy, respect, and diplomacy
• Balances self-confidence and assertiveness with respect for others' perspectives
• Respects the requirements, expectations, and procedures of both the College of Education and of our field partners and appreciates the issues of trust, fairness, and professionalism involved

The following dispositions apply to Special Education majors only:

• Is receptive to faculty feedback and acts meaningfully and professionally upon suggestions
• Reflects on his or her own progress, identifies strengths and weaknesses, and evaluates strategies for success and professional growth
• Takes initiative
• Is open to new ideas and engagement in learning
• Respects diversity and cultural contexts to determine how to be responsive to learners and to proactively promote all students' learning
• Expresses positive attitudes toward individuals with disabilities and a willingness to advocate on their behalf
• Is committed to collaboration with colleagues, families, and communities in order to promote all students' learning and development
• Demonstrates professional ethical and legal behavior as defined by the respective codes of ethics and laws
• Demonstrates consistent professional behavior across all academic settings
• Maintains appropriate interpersonal and professional boundaries
• Accepts personal responsibility for one's behavior
• Expresses feelings and opinions effectively and appropriately
• Upholds confidentiality

Skill Building Courses

Before taking any math or English courses, students must take the DePaul placement tests to determine if skill level is at the college level. If placement indicates skill level in these courses, the courses become part of degree requirements. Consult with your advisor regarding placement test results and any required classes.

Advanced Standing

Students are conditionally admitted to the College of Education. There are additional requirements to reach Advanced Standing in your program in the College of Education. Requirements must be met to progress in the major and take courses in the Advanced Standing category.

Advanced Standing requirements are:

• Maintain a DePaul undergraduate 2.5 GPA
• Pass the Illinois Test of Academic Proficiency (TAP)
• Submit a petition for advanced standing form

Students should attempt to complete the Advanced Standing requirements soon after beginning the program. There is no time limit to meet these criteria; however, students will only be able to take pre-education courses until requirements have been met. Students can also take liberal studies or content area courses before or after meeting Advanced Standing requirements.

Modern Language Competence Requirement

Students pursuing a Bachelor of Arts degree in the College of Education will be required to demonstrate a measure of competence in a modern language, as defined by the college. Such competence may be demonstrated in one of several ways:
- completing two years of a language sequence in high school
- completing the last course in the first-year college sequence of any language
- completing a college course beyond the first-year level in any language
- achieving a satisfactory score on any of the Modern Language placement examinations administered at DePaul
- achieving a satisfactory rating in a proficiency examination accepted by DePaul
- achieving a score of 3 or higher on the Advance Placement (AP) test for any language
- achieving a score of 5 or higher in the Language B assessment from a Standard or Higher Level International Baccalaureate (IB) program
- achieving a satisfactory score on the CLEP examination

Please note: The Modern Language Competence Requirement is not required for students in the Early Childhood Education: SNL Joint Program (BAECE) program.

For further information regarding satisfactory scores and possible credit from the DePaul placement, AP, CLEP, or IB examinations, please contact the Office of the University Registrar.

Students who complete an Inter-College Transfer (ICT) to the College of Education will abide by the COE Modern Language Requirement in place on the effective date of the ICT.

B.A. students who meet College requirements and wish to pursue further work in the language may elect the "Modern Language Option" of the Liberal Studies Program. While B.S. students are not required to demonstrate competency in a modern language, the "Modern Language Option" is available to them for language study at any level.

**Licensure Tests**

All individuals licensed by the Illinois State Board of Education (ISBE) are required to complete licensure tests specific to their teaching license.

**Field Experiences**

Each student seeking licensure from the College of Education/Professional Education Unit must complete supervised field experiences in appropriate settings in conjunction with education courses. The field experiences must include a variety of grade levels, multicultural experiences, and a minimum of 10 hours in special education settings. All field experiences must be completed prior to final approval for student teaching. Field experience hours should be entered by the student into the FEDS system when completing courses with field experience requirements.

**Endorsements**

An endorsement is a statement appearing on a license that identifies the specific subjects or grade level that the license holder is authorized to teach.

The Illinois State Board of Education (ISBE) issues endorsements in various subject areas. To view the full list and requirements, visit the ISBE website.

Please note that the Illinois State Board of Education (ISBE) may change the state licensure and endorsement requirements at any time and without prior notice. Individuals are bound by the requirements in place when applying for the license or endorsement, not the requirements in place when beginning the program.

**Student Teaching Requirements**

Student Teaching is the culminating clinical experience in the student's program. All students in teacher preparation programs must meet the following requirements before applying for student teaching:

**Academic Requirements:**

- Completion of all Liberal Studies, Pre-Education, Advanced Standing and concentration/content area courses
- Overall cumulative G.P.A. of 2.50 or better
- Cumulative GPA. of 2.75 or better in all education courses
- Meet all other program requirements (e.g., modern language and residency requirements)
- Meet designated program standards
- Pass the required Illinois licensure content area test

**Clinical Requirements:**
Compliance of all required field experiences
Three satisfactory evaluations in field experiences
Three satisfactory faculty recommendations
Attendance at mandatory meeting for student teaching
Application for student teaching, resume, transcripts, and writing sample (check deadlines)
Review and approval by Student Teaching Committee of the College of Education

Student Teaching Timeline and Deadlines:

- Attend a Mandatory Meeting approximately 1 year prior to expected quarter of student teaching.
- Submit application for student teaching after attending Mandatory Meeting, approximately 1 year prior to student teaching.
- Academic requirements are due one quarter before expected quarter of student teaching.
- Clinical requirements are completed as course requirements. Field experience hours are entered by the student as coursework is completed.

Online Faculty Evaluations are entered by the instructor of relevant courses. All data must be entered in the Field Experience Documentation System (FEDS) due one month prior to student teaching.

Individual child care agencies and public and private school districts may have additional requirements (application, training, background check, etc.).

Degree Conferral and Graduation

The awarding of a degree is not automatic. You must submit an application to be considered for the degree. DePaul awards and posts degrees at the end of each regular academic term (autumn, winter, spring, summer).

It is your responsibility to initiate the degree conferral application process by submitting an online application. Submitting an application means you intend to finish your degree requirements by the end of the term for which you have applied.

Undergraduate students must be approved for student teaching and complete student teaching and capstone to be cleared for the degree. Student must submit graduation application for the quarter that matches the quarter you are student teaching.

After you submit the application, you cannot register for any term after the one selected in the application.

To apply for degree conferral, log on to Campus Connection. Select STUDENT CENTER, then MY ACADEMICS. On screen instructions will take you through the application process.

Provided that all requirements and financial obligations are met, degrees are posted 30 days after the official end of the term. Official dates are listed on the Academic Calendar.

DePaul holds one commencement ceremony each year in June. If you intend to participate, you must first apply for degree conferral for the current academic year and then submit a cap and gown order. Honors are not announced at the ceremony for undergraduates completing their final courses in spring quarter because a final GPA is not available at the time of the ceremony.

Additional information about degree conferral and graduation can be found on the College of Education website at: http://education.depaul.edu/.

Licensure

Requirements for licensure include completion of full bachelor's degree program, all licensure tests (including OPI for world language majors), and awarding of bachelor's degree. A bachelor's degree is required to qualify for licensure and must be awarded before applying for the license.

Individuals must submit an application directly to the Illinois State Board of Education after completion of requirements and after DePaul has submitted notification to ISBE. Application requirements include application form, application fee, official transcripts, and registration fee.

All individuals must meet ISBE requirements in place at the time of application for the license. Requirements are subject to change per the discretion of ISBE. All coursework and requirements pertaining to licensure requirements must be completed before DePaul University can recommend an individual for the license.

Individuals seeking additional endorsements after applying for the licensure must contact ISBE directly for an evaluation request.
All coursework and requirements must be completed before DePaul University can recommend an individual for the license.

Liberal Studies Requirements

Honors program requirements can be found in the individual Colleges & Schools section of the University Catalog. Select Academics, followed by Undergraduate, then Honors Program Alternative.

First Year Program

Chicago Quarter

- LSP 110 DISCOVER CHICAGO
  or LSP 111 EXPLORE CHICAGO

Focal Point

- LSP 112 FOCAL POINT SEMINAR

Writing

- WRD 103 COMPOSITION AND RHETORIC I *
- WRD 104 COMPOSITION AND RHETORIC II *

Quantitative Reasoning & Technological Literacy

- LSP 120 QUANTITATIVE REASONING & TECHNOLOGICAL LITERACY I
- LSP 121 QUANTITATIVE REASONING AND TECHNOLOGICAL LITERACY II
  (Note: See information below)

Sophomore Year

Multiculturalism in the US

- LSP 200 SEMINAR ON MULTICULTURALISM IN THE UNITED STATES

Junior Year

Experiential Learning

- Met by successful completion of required field experience hours.

Senior Year

Capstone

- WLE 384 CAPSTONE IN WORLD LANGUAGE EDUCATION *
  (Note: This must be taken with student teaching. Students must earn a C or better in this course.)

Learning Domains

Arts and Literature (AL)

- 2 Courses Required
Philosophical Inquiry (PI)

- 2 Courses Required:
  - LSE 380 PHILOSOPHICAL ISSUES IN EDUCATION AND CULTURE
  - 1 Additional Course
    (Note: PHL 100 recommended)

Scientific Inquiry (SI)

- 3 Courses Required:
  - 1 BIO course
  - 1 CHE/ENV/GEO/PHY course
  - 1 Additional Course
    (Note: One course must be a lab or SWK.)

Social, Cultural, and Behavioral Inquiry (SCBI)

- 2 Courses Required:
  - PSC 120 THE AMERICAN POLITICAL SYSTEM
  - 1 Additional Course

Religious Dimensions (RD)

- 2 Courses Required

Understanding the Past (UP)

- 2 Courses Required
  (Note: One must be US History.)

* Students must earn a C- or better in this course.

Notes

Specified required courses within Liberal Studies may have grade minimums (e.g. C- or better). Please consult your advisor or your college and major requirements.

Courses offered in the student's primary major cannot be taken to fulfill LSP Domain requirements. If students double major, LSP Domain courses may double count for both LSP credit and the second major.

In meeting learning domain requirements, no more than one course that is outside the student's major and is cross-listed with a course within the student's major, can be applied to count for LSP domain credit. This policy does not apply to those who are pursuing a double major or earning BFA or BM degrees.

Quantitative Reasoning and Technological Literacy

Readiness for LSP 120 is determined by the math placement test taken online after admission. Students may need to take developmental coursework prior to LSP 120. The LSP 120 requirement may be waived by credit already earned for advanced math coursework or by passing a dedicated proficiency exam. Students who complete both LSP 120 and LSP 121 take one less Learning Domain course. Students may not apply the course reduction to any Domain where only one course is required, and if taken within the SI Domain, the reduction cannot be applied to the SI Lab or SWK requirement.

Major Requirements

Course Requirements

Content Area Courses
Note: Language courses begin at the Advanced level for the major. A placement test in the language is required to determine skill level and appropriate level to begin the language. Beginning and Intermediate language courses are in addition to the content area requirements but can fulfill open elective requirements.

**Advanced Language Core: 24 quarter hours required, grade of C or better required**

- JPN 201 ADVANCED JAPANESE I
- JPN 202 ADVANCED JAPANESE II
- JPN 203 ADVANCED JAPANESE III
- JPN 311 ADVANCED DISCUSSION AND READING I
- JPN 312 ADVANCED DISCUSSION AND READING II
- JPN 313 ADVANCED DISCUSSION AND READING III

**Language Electives Core: 24 quarter hours required, grade of C or better required. Courses must be from at least 3 different departments.**

- Choose six of the following:
  - HAA 115 ASIAN ART
  - HAA 216 JAPANESE ART
  - HAA 397 SPECIAL TOPICS/HISTORY OF ART & ARCHITECTURE (as appropriate)
  - GEO 215 INTERNATIONAL DEVELOPMENT AND REGIONAL INEQUALITY
  - HST 263 JAPAN TO C. 1200
  - HST 264 JAPAN c.1200 - 1800
  - HST 265 JAPAN, c. 1800-PRESENT
  - HST 162 EAST ASIA c. 1200 TO 1800
  - HST 322 TOPICS IN ASIAN HISTORY
  - HST 340 CULTURE AND GENDER IN JAPAN
  - INT 330 TOPICS IN EAST ASIAN STUDIES
  - MOL 320 MODERN JAPANESE LITERATURE IN TRANSLATION
  - PSC 253 ASIAN POLITICS
  - PSC 349 ADVANCED TOPICS IN INTERNATIONAL RELATIONS
  - REL 202 ETHICAL WORLDS: MORAL ISSUES ACROSS CULTURES
  - REL 205 RELIGION AND ETHICS II
  - REL 245 RELIGION IN JAPANESE HISTORY, SOCIETY, AND CULTURE
  - REL 247 LITERATURE AND RELIGION IN JAPAN
  - REL 342 ZEN MIND

**Teaching Culture Core: 4 quarter hours required, grade of C or better required**

- WLE 370 SECOND & WORLD LANGUAGE LITERACIES AND CULTURES

**Education Courses: 40 quarter hours required, grade of C or better required**

- SCU 207 SOCIAL AND HISTORICAL ISSUES IN EDUCATION
- SCU 337 HUMAN GROWTH AND DEVELOPMENT
- SEC 364 METHODS: CURRICULUM AND INSTRUCTION IN SECONDARY SCHOOLS
- BBE 307 EQUITY ISSUES IN ASSESSMENT OF LANGUAGE LEARNERS
- LSI 346 STRATEGIES FOR MAINSTREAMING AND INCLUSION
- WLE 326 THEORETICAL FOUNDATIONS OF TEACHING ESL AND WLE
- WLE 349 STANDARD AND CONTENT-BASED METHODS OF TEACHING WORLD LANGUAGES K-12
- WLE 360 SECOND, WORLD AND HERITAGE LANGUAGE ACQUISITION K-12
- WLE 375 WLE HISTORY, POLICY, AND CURRICULUM DEVELOPMENT
- SCU 338 THE PROCESS AND EVALUATION OF LEARNING
  or SCU 339 PHILOSOPHY AND PSYCHOLOGY OF YOUTH AND MIDDLE LEVEL EDUCATION

**Oral Proficiency Interview (OPI) Test**

Pursuing certification in the teaching of a world language (Chinese, French, German, Italian, Japanese, or Spanish) requires the oral proficiency test – an Interview – before you begin student teaching. You must earn a rating of “intermediate high” or better on the test.

**Open Electives: 8 quarter hours are required**

Open elective credit also is required to meet the minimum graduation requirement of 192 hours. The following cannot be used to fulfill an open elective: WRD 98, MAT 94, and MAT 95. EE 281 recommended as open elective course. Electives must be approved by the WLE Program director.
Student Teaching: 12 quarter hours required, grade of B- or better required

Registration in student teaching requires completion of all requirements and procedures indicated in the college core section. EDU 95 indicates to the Illinois State Board of Education that all field experience hours are complete. All students also take WLE 384 with student teaching (listed in the Liberal Studies section).

- WLE 385 STUDENT TEACHING IN WORLD LANGUAGES (12 credit hours)
- EDU 95 CLINICAL EXPERIENCE WITH CHILDREN AND YOUTH (non-credit, non-tuition, PA grade required)

Licensure Tests

All individuals licensed by the Illinois State Board of Education (ISBE) are required to complete licensure tests specific to their teaching license. World Language Education Japanese majors must complete the following tests:

- Test of Academic Proficiency (TAP) (test #400) - assesses knowledge of reading comprehension, language arts, writing, and math. It is recommended to be taken during the first or second quarter in the program. Test is required before Student Teaching (deadlines apply). *Check with your advisor about qualifying for a waiver with acceptable ACT or SAT test scores.
- Japanese Content Area Test (test #131) – assesses knowledge of the Japanese language and culture. Test is required before Student Teaching (deadlines apply).
- OPI Test (see above).
- EdTPA - assessment conducted during the student teaching experience including video clips of instruction, lesson plans, student work samples, analysis of student learning and reflective commentaries. Students will submit an electronic portfolio to an outside agency for independent evaluation and a fee will be imposed by that agency as part of the assessment.

World Language Education Spanish (BA)

The Bachelor of Arts program in World Language Education Spanish prepares students to teach Kindergarten through 12th grade in a variety of urban and suburban education settings, including public and private elementary and high schools.

Students learn educational theories and effective teaching practices, participate in field experiences, which require observation and participation in teaching activities at multiple schools, and student teaching. Students should meet early and regularly with their advisor to design and monitor their program of study.

The program combines theoretical principles of education and field work with the student's choice of major. Students follow a general pattern of study for middle school and high school levels. In all cases, appropriate field experience plays an integral role.

Students entering the program must be able and willing to devote themselves to a program requiring a minimum of 130-135 hours of daytime field experiences in schools. These school-based clinical hours are completed in conjunction with methodology courses that require students to spend a half-day each week in a school. In addition, the student must spend a minimum of 11 weeks in full-time student teaching.

Please make sure you consult the Liberal Studies Requirements, Major Requirements, and College Core Requirements for full degree requirements.

Licensure

Illinois Professional Educator License with endorsement in Foreign Language Spanish (kindergarten-grade 12), an Illinois State Board of Education (ISBE) approved program.

Learning Outcomes

Students will be able to:

- Apply theoretical foundations of language education to develop sound instruction and teaching approaches for language learners.
- Integrate theory and research on second language acquisition into practice for language learners.
- Evaluate history and policies of language education and how historical and policy context affect the education of language learners.
- Analyze various assessment issues that affect language learners, such as accountability, reliability, validity, bias, special education.

College Core Requirements

Dispositions

The academic programs within the College of Education have set forth these dispositions as educational and professional expectations for all students. Students should be aware that failing to abide by DePaul University or College of Education policies including, under certain circumstances, these dispositions, could result in adverse consequences for the student, including removal from his or her program, the College of Education, or the University.

The following dispositions apply to Early Childhood Education, Elementary Education, Physical Education, Secondary Education, and World Language Education majors only:

- Reflects on progress and identifies strengths and weaknesses, including evaluating strategies for success, finding alternatives for inappropriate strategies, and modifying future practices
- Is receptive to faculty feedback and acts meaningfully and professionally upon suggestions
- Values critical thinking, including engaging theoretical and philosophical frameworks and shows evidence of critical thinking through discussion and writing (e.g., journals, response to prompts)
- Understands the importance of and is committed to communicating clearly orally and in writing both in traditional and in new and emerging digital formats
- Values and is committed to continually developing strong content area knowledge and/or knowledge of the professional field, including pedagogical content knowledge
- Takes initiative, uses imagination and creativity, and seeks out information using a variety of human and material resources and technology to inform his or her teaching
- Is aware of the role of classroom environment and uses management procedures that reflect respect and care for learners and concern for their emotional and physical well being
- Takes the time and effort needed to understand how students learn, including discovering their interests and experiences and determining how to shape teaching acts (using technology as appropriate) that engage learners meaningfully and actively
- Values and is committed to using assessment to evaluate and ensure the continuous intellectual, social, emotional, and physical development of the learner
- Respects and considers cultural contexts in order to determine how to be responsive to learners and to proactively promote all students' learning
- Values and is responsive to diverse learners' academic, emotional, and social needs through teaching acts (including careful instructional planning, implementation, and differentiation) and through everyday interactions with students
- Is committed to collaboration with colleagues, families, and communities in order to promote all students' learning and development
- Recognizes and fulfills professional responsibilities and habits of conduct (e.g., dress, language, preparedness, attendance, punctuality, etc.)
- Demonstrates collegiality, honesty, good judgment, courtesy, respect, and diplomacy
Balances self-confidence and assertiveness with respect for others' perspectives
Respects the requirements, expectations, and procedures of both the College of Education and of our field partners and appreciates the issues of trust, fairness, and professionalism involved

The following dispositions apply to Special Education majors only:

- Is receptive to faculty feedback and acts meaningfully and professionally upon suggestions
- Reflects on his or her own progress, identifies strengths and weaknesses, and evaluates strategies for success and professional growth
- Takes initiative
- Is open to new ideas and engagement in learning
- Respects diversity and cultural contexts to determine how to be responsive to learners and to proactively promote all students' learning
- Expresses positive attitudes toward individuals with disabilities and a willingness to advocate on their behalf
- Is committed to collaboration with colleagues, families, and communities in order to promote all students' learning and development
- Demonstrates professional ethical and legal behavior as defined by the respective codes of ethics and laws
- Demonstrates consistent professional behavior across all academic settings
- Maintains appropriate interpersonal and professional boundaries
- Accepts personal responsibility for one's behavior
- Expresses feelings and opinions effectively and appropriately
- Upholds confidentiality

**Skill Building Courses**

Before taking any math or English courses, students must take the DePaul placement tests to determine if skill level is at the college level. If placement indicates skill level in these courses, the courses become part of degree requirements. Consult with your advisor regarding placement test results and any required classes.

**Advanced Standing**

Students are conditionally admitted to the College of Education. There are additional requirements to reach Advanced Standing in your program in the College of Education. Requirements must be met to progress in the major and take courses in the Advanced Standing category.

Advanced Standing requirements are:

- Maintain a DePaul undergraduate 2.5 GPA
- Pass the Illinois Test of Academic Proficiency (TAP)
- Submit a petition for advanced standing form

Students should attempt to complete the Advanced Standing requirements soon after beginning the program. There is no time limit to meet these criteria; however, students will only be able to take pre-education courses until requirements have been met. Students can also take liberal studies or content area courses before or after meeting Advanced Standing requirements.

**Modern Language Competence Requirement**

Students pursuing a Bachelor of Arts degree in the College of Education will be required to demonstrate a measure of competence in a modern language, as defined by the college. Such competence may be demonstrated in one of several ways:

- completing two years of a language sequence in high school
- completing the last course in the first-year college sequence of any language
- completing a college course beyond the first-year level in any language
- achieving a satisfactory score on any of the Modern Language placement examinations administered at DePaul
- achieving a satisfactory rating in a proficiency examination accepted by DePaul
- achieving a score of 3 or higher on the Advance Placement (AP) test for any language
- achieving a score of 5 or higher in the Language B assessment from a Standard or Higher Level International Baccalaureate (IB) program
- achieving a satisfactory score on the CLEP examination

Please note: The Modern Language Competence Requirement is not required for students in the Early Childhood Education: SNL Joint Program (BAECE) program.

For further information regarding satisfactory scores and possible credit from the DePaul placement, AP, CLEP, or IB examinations, please contact the Office of the University Registrar.

Students who complete an Inter-College Transfer (ICT) to the College of Education will abide by the COE
Modern Language Requirement in place on the effective date of the ICT.

B.A. students who meet College requirements and wish to pursue further work in the language may elect the "Modern Language Option" of the Liberal Studies Program. While B.S. students are not required to demonstrate competency in a modern language, the "Modern Language Option" is available to them for language study at any level.

Licensure Tests

All individuals licensed by the Illinois State Board of Education (ISBE) are required to complete licensure tests specific to their teaching license.

Field Experiences

Each student seeking licensure from the College of Education/Professional Education Unit must complete supervised field experiences in appropriate settings in conjunction with education courses. The field experiences must include a variety of grade levels, multicultural experiences, and a minimum of 10 hours in special education settings. All field experiences must be completed prior to final approval for student teaching. Field experience hours should be entered by the student into the FEDS system when completing courses with field experience requirements.

Endorsements

An endorsement is a statement appearing on a license that identifies the specific subjects or grade level that the license holder is authorized to teach.

The Illinois State Board of Education (ISBE) issues endorsements in various subject areas. To view the full list and requirements, visit the ISBE website.

Please note that the Illinois State Board of Education (ISBE) may change the state licensure and endorsement requirements at any time and without prior notice. Individuals are bound by the requirements in place when applying for the license or endorsement, not the requirements in place when beginning the program.

Student Teaching Requirements

Student Teaching is the culminating clinical experience in the student's program. All students in teacher preparation programs must meet the following requirements before applying for student teaching:

Academic Requirements:

- Completion of all Liberal Studies, Pre-Education, Advanced Standing and concentration/content area courses
- Overall cumulative G.P.A. of 2.50 or better
- Cumulative GPA of 2.75 or better in all education courses
- Meet all other program requirements (e.g., modern language and residency requirements)
- Meet designated program standards
- Pass the required Illinois licensure content area test

Clinical Requirements:

- Completion of all required field experiences
- Three satisfactory evaluations in field experiences
- Three satisfactory faculty recommendations
- Attendance at mandatory meeting for student teaching
- Application for student teaching, resume, transcripts, and writing sample (check deadlines)
- Review and approval by Student Teaching Committee of the College of Education

Student Teaching Timeline and Deadlines:

- Attend a Mandatory Meeting approximately 1 year prior to expected quarter of student teaching.
- Submit application for student teaching after attending Mandatory Meeting, approximately 1 year prior to student teaching.
- Academic requirements are due one quarter before expected quarter of student teaching.
- Clinical requirements are completed as course requirements. Field experience hours are entered by the student as coursework is completed.

Online Faculty Evaluations are entered by the instructor of relevant courses. All data must be entered in the Field Experience Documentation System (FEDS) due one month prior to student teaching.
Individual child care agencies and public and private school districts may have additional requirements (application, training, background check, etc.).

**Degree Conferral and Graduation**

The awarding of a degree is not automatic. You must submit an application to be considered for the degree. DePaul awards and posts degrees at the end of each regular academic term (autumn, winter, spring, summer).

It is your responsibility to initiate the degree conferral application process by submitting an online application. Submitting an application means you intend to finish your degree requirements by the end of the term for which you have applied.

Undergraduate students must be approved for student teaching and complete student teaching and capstone to be cleared for the degree. Student must submit graduation application for the quarter that matches the quarter you are student teaching.

After you submit the application, you cannot register for any term after the one selected in the application.

To apply for degree conferral, log on to Campus Connection. Select STUDENT CENTER, then MY ACADEMICS. On screen instructions will take you through the application process.

Provided that all requirements and financial obligations are met, degrees are posted 30 days after the official end of the term. Official dates are listed on the Academic Calendar.

DePaul holds one commencement ceremony each year in June. If you intend to participate, you must first apply for degree conferral for the current academic year and then submit a cap and gown order. Honors are not announced at the ceremony for undergraduates completing their final courses in spring quarter because a final GPA is not available at the time of the ceremony.

Additional information about degree conferral and graduation can be found on the College of Education website at: [http://education.depaul.edu/](http://education.depaul.edu/).

**Licensure**

Requirements for licensure include completion of full bachelor’s degree program, all licensure tests (including OPI for world language majors), and awarding of bachelor’s degree. A bachelor’s degree is required to qualify for licensure and must be awarded before applying for the license.

Individuals must submit an application directly to the Illinois State Board of Education after completion of requirements and after DePaul has submitted notification to ISBE. Application requirements include application form, application fee, official transcripts, and registration fee.

All individuals must meet ISBE requirements in place at the time of application for the license. Requirements are subject to change per the discretion of ISBE. All coursework and requirements pertaining to licensure requirements must be completed before DePaul University can recommend an individual for the license.

Individuals seeking additional endorsements after applying for the licensure must contact ISBE directly for an evaluation request.

All coursework and requirements must be completed before DePaul University can recommend an individual for the license.

**Liberal Studies Requirements**

Honors program requirements can be found in the individual Colleges & Schools section of the University Catalog. Select Academics, followed by Undergraduate, then Honors Program Alternative.

**First Year Program**

DePaul University Winter/Spring/Summer 2016-2017 Page 1028 of 2776
Chicago Quarter

- LSP 110 DISCOVER CHICAGO
  or LSP 111 EXPLORE CHICAGO

Focal Point

- LSP 112 FOCAL POINT SEMINAR

Writing

- WRD 103 COMPOSITION AND RHETORIC I *
- WRD 104 COMPOSITION AND RHETORIC II *

Quantitative Reasoning & Technological Literacy

- LSP 120 QUANTITATIVE REASONING & TECHNOLOGICAL LITERACY I
- LSP 121 QUANTITATIVE REASONING AND TECHNOLOGICAL LITERACY II
  (Note: See information below)

Sophomore Year

Multiculturalism in the US

- LSP 200 SEMINAR ON MULTICULTURALISM IN THE UNITED STATES

Junior Year

Experiential Learning

- Met by successful completion of required field experience hours.

Senior Year

Capstone

- WLE 384 CAPSTONE IN WORLD LANGUAGE EDUCATION *
  (Note: This must be taken with student teaching. Students must earn a C or better in this course.)

Learning Domains

Arts and Literature (AL)

- 2 Courses Required

Philosophical Inquiry (PI)

- 2 Courses Required:
  - LSE 380 PHILOSOPHICAL ISSUES IN EDUCATION AND CULTURE
  - 1 Additional Course
    (Note: PHL 100 recommended)

Scientific Inquiry (SI)

- 3 Courses Required:
  - 1 BIO course
  - 1 CHE/ENV/GEO/PHY course
  - 1 Additional Course
    (Note: One course must be a lab or SWK.)

Social, Cultural, and Behavioral Inquiry (SCBI)

- 2 Courses Required:
  - PSC 120 THE AMERICAN POLITICAL SYSTEM
  - 1 Additional Course
Religious Dimensions (RD)
- 2 Courses Required

Understanding the Past (UP)
- 2 Courses Required
  (Note: One must be US History.)

* Students must earn a C- or better in this course.

Notes
Specified required courses within Liberal Studies may have grade minimums (e.g. C- or better). Please consult your advisor or your college and major requirements.

Courses offered in the student's primary major cannot be taken to fulfill LSP Domain requirements. If students double major, LSP Domain courses may double count for both LSP credit and the second major.

In meeting learning domain requirements, no more than one course that is outside the student's major and is cross-listed with a course within the student’s major, can be applied to count for LSP domain credit. This policy does not apply to those who are pursuing a double major or earning BFA or BM degrees.

Quantitative Reasoning and Technological Literacy
Readiness for LSP 120 is determined by the math placement test taken online after admission. Students may need to take developmental coursework prior to LSP 120. The LSP 120 requirement may be waived by credit already earned for advanced math coursework or by passing a dedicated proficiency exam. Students who complete both LSP 120 and LSP 121 take one less Learning Domain course. Students may not apply the course reduction to any Domain where only one course is required, and if taken within the SI Domain, the reduction cannot be applied to the SI Lab or SWK requirement.

Major Requirements

Course Requirements

Content Area Courses
Note: Language courses begin at the Advanced level for the major. A placement test in the language is required to determine skill level and appropriate level to begin the language. Beginning and Intermediate language courses are in addition to the content area requirements but can fulfill open elective requirements.

Advanced Language Core: 16 quarter hours required, grade of C or better required
- SPN 201 ADVANCED GRAMMAR AND COMMUNICATION
  or SPN 205 ADVANCED GRAMMAR AND COMPOSITION FOR HERITAGE SPEAKERS I
- SPN 202 ADVANCED COMPOSITION AND COMMUNICATION
  or SPN 206 ADVANCED GRAMMAR AND COMPOSITION FOR HERITAGE SPEAKERS II
- Choose one of the following:
  - SPN 203 ADVANCED CONVERSATION
  - SPN 207 ADVANCED CONVERSATION FOR THE HERITAGE SPEAKER
  - SPN 220 INTRODUCTION TO LITERARY ANALYSIS IN SPANISH

Language Electives Core: 28 quarter hours required, grade of C or better required
- SPN 200-300 level course 1
- SPN 200-300 level course 2
- SPN 200-300 level course 3
- SPN 200-300 level course 4
Linguistics Core: 4 quarter hours required, grade of C or better required

- SPN 352 SPANISH PHONOLOGY AND PHONETICS

Teaching Culture Core: 4 quarter hours required, grade of C or better required

- WLE 370 SECOND & WORLD LANGUAGE LITERACIES AND CULTURES

Education Courses: 40 quarter hours required, grade of C or better required

- SCU 207 SOCIAL AND HISTORICAL ISSUES IN EDUCATION
- SCU 337 HUMAN GROWTH AND DEVELOPMENT
- SEC 364 METHODS: CURRICULUM AND INSTRUCTION IN SECONDARY SCHOOLS
- BBE 307 EQUITY ISSUES IN ASSESSMENT OF LANGUAGE LEARNERS
- LSI 346 STRATEGIES FOR MAINSTREAMING AND INCLUSION
- WLE 326 THEORETICAL FOUNDATIONS OF TEACHING ESL AND WLE
- WLE 349 STANDARD AND CONTENT-BASED METHODS OF TEACHING WORLD LANGUAGES K-12
- WLE 360 SECOND, WORLD AND HERITAGE LANGUAGE ACQUISITION K-12
- WLE 375 WLE HISTORY, POLICY, AND CURRICULUM DEVELOPMENT
- SCU 338 THE PROCESS AND EVALUATION OF LEARNING
  or SCU 339 PHILOSOPHY AND PSYCHOLOGY OF YOUTH AND MIDDLE LEVEL EDUCATION

Oral Proficiency Interview (OPI) Test

Pursuing certification in the teaching of a world language (Chinese, French, German, Italian, Japanese, or Spanish) requires the oral proficiency test – an Interview – before you begin student teaching. You must earn a rating of "intermediate high" or better on the test.

Open Electives: 8 quarter hours are required

Open elective credit also is required to meet the minimum graduation requirement of 192 hours. The following cannot be used to fulfill an open elective: WRD 98, MAT 94, and MAT 95. EE 281 recommended as open elective course. Electives must be approved by the WLE Program director.

Student Teaching: 12 quarter hours required, grade of B- or better required

Registration in student teaching requires completion of all requirements and procedures indicated in the college core section. EDU 95 indicates to the Illinois State Board of Education that all field experience hours are complete. All students also take WLE 384 with student teaching (listed in the Liberal Studies section).

- WLE 385 STUDENT TEACHING IN WORLD LANGUAGES (12 credit hours)
- EDU 95 CLINICAL EXPERIENCE WITH CHILDREN AND YOUTH (non-credit, non-tuition, PA grade required)

Licensure Tests

All individuals licensed by the Illinois State Board of Education (ISBE) are required to complete licensure tests specific to their teaching license. World Language Education Spanish majors must complete the following tests:

- Test of Academic Proficiency (TAP) (test #400) - assesses knowledge of reading comprehension, language arts, writing, and math. It is recommended to be taken during the first or second quarter in the program. Test is required before Student Teaching (deadlines apply).  * Check with your advisor about qualifying for a waiver with acceptable ACT or SAT test scores.
- Spanish Content Area Test (test #135) – assesses knowledge of the Spanish language and culture. Test is required before Student Teaching (deadlines apply).
- OPI Test (see above).
- EdTPA - assessment conducted during the student teaching experience including video clips of instruction, lesson plans, student work samples, analysis of student learning and reflective commentaries. Students will submit an electronic portfolio to an outside agency for independent evaluation and a fee will be imposed by that agency as part of the assessment.
Writing for Film and Television (Minor)

The Writing for Film and Television minor is designed to help students develop the fundamental skills and creative acumen to write for film and television.

Course Requirements

- DC 101 SCREENWRITING FOR MAJORS
  or DC 201 INTRODUCTION TO SCREENWRITING
- DC 221 FILM STRUCTURE FOR MAJORS
  or DC 222 CLASSIC HOLLYWOOD FILM STRUCTURE
  or DC 229 TELEVISION GENRES
- 4 courses from the following list:
  o DC 301 ADVANCED SCREENWRITING I
  o DC 302 ADVANCED SCREENWRITING II
  o DC 303 REWRITING THE FEATURE FILM SCRIPT
  o DC 305 PITCHING SEMINAR
  o DC 308 WRITING ON ASSIGNMENT
  o DC 309 FEATURE DEVELOPMENT
  o DC 328 WRITING THE WEB SERIES
  o DC 343 WRITING THE SHORT FILM FOR PRODUCTION
  o DC 344 ADVANCED SCREENWRITING LAB
  o DC 272 INTRODUCTION TO TELEVISION WRITING
  o DC 306 WRITING THE SITCOM
  o DC 307 WRITING THE EPISODIC DRAMA
  o TV 301 THE WRITERS ROOM: DEVELOPING THE HOUR LONG DRAMA

Students majoring in Film and Television (BFA) - Screenwriting concentration are restricted from earning this minor.

Writing, Rhetoric and Discourse (BA)

The Bachelor of Arts in WRD focuses on the development and expression of ideas in writing—the very foundation of the liberal arts, and more broadly, contemporary democratic culture. Our lives are increasingly mediated by digital technologies that use writing to organize sound and image in interactive spaces like the World Wide Web. And through text messaging, email, and social networking, individual identity and interpersonal relationships are progressively bound up with writing. At the same time, we face growing demands for communicating across national, cultural, and linguistic borders, requiring us to rethink many assumptions we may have about written communication and expression.

WRD majors explore theories of language, rhetoric (how to make effective choices as writers), and discourse (the way writing structures human activity) as they develop understanding of the role of the individual writer within communities of writers. They write in a great variety of contexts and genres in preparation for a full range of dynamic and rewarding careers grounded in written communication.

WRD faculty members are published specialists in the fields that make up writing studies—rhetoric, technical and professional writing, new media studies, and linguistics—allowing students to learn from leading scholars.

</tr>
</tbody>
</table>
**Learning Outcomes**

Students will be able to:

- Describe and apply the conventions of a variety of writing genres and rhetorical concepts.
- Design and compose meaningful and effective texts.
- Compose texts using a range of technologies and modes.
- Explain the impact of writing technologies on the creation of texts.
- Compare and differentiate multiple opportunities for writers in workplaces and organizations.
- Discuss the history and evolution of written language and rhetorical concepts.
- Examine and practice a varied stylistic repertoire that can be adapted to multiple purposes.
- Assess the ethical, civic, and political dimensions of writing, including dynamics of culture and power.
- Examine and evaluate one’s own writing for effectiveness and appropriateness.
- Interpret reading and writing within a theoretical framework.

**College Core Requirements**

**Study in the Major Field**

The student’s course of study in the College consists of three parts: Liberal Studies, the major field, and electives. Together these three parts contribute to the liberal education of the student which is the common purpose of all study in the College. By “liberal education” the College understands not only a deep and thorough knowledge of a particular area of study but a knowledge of the diverse areas of study represented by criticism, history, the arts, the behavioral and social sciences, philosophy, religious studies, the natural science, and mathematics.

The major field program generally is built upon a set of core courses and a specialized “concentration.” The number of courses required for a major varies by department. Most students go beyond the minimum requirements, electing additional courses which both broaden and deepen their understanding of their chosen discipline.

Because no academic major program is built in isolation, students are required to pursue a number of electives of the student's choice. The inherent flexibility of this curriculum demands that the student consult an academic advisor at each stage in the total program and at least once prior to each registration. Students will be prompted to visit the College Office for their official graduation check early in their senior year.

**Declaration of Major, Minor and Concentration**

All students in the College are required to declare a major field prior to beginning their junior year. The student will then be assigned a faculty advisor in the major field department or program and should make an appointment to see that advisor at his or her earliest convenience.

Students must declare or change majors, minors, and concentrations, via Campus Connection. However, for the purpose of exploring the possibility of changing a major field, the student should consult an academic advisor in the the Office for Academic Advising Support.

**The Modern Language Requirement (MLR)**

All students will be required to demonstrate competence in a modern language (i.e., a language other than English) equivalent to the proficiency attained from one year of college-level language study. This Modern Language Requirement (MLR) may be demonstrated by:

- placing into 104 or above on the DePaul language placement exam
- completing the last course or earning AP/IB credit for the last course in the first-year college sequence of
any language (e.g. 103 for DePaul language classes)
- completing a college course or earning AP/IB credit for a college course beyond the first-year level in any language (e.g. 104 or above for DePaul language classes)
- completing the final course of a four-year sequence of the same modern language in high school*
- completing a proctored exam by BYU and passing the exam (see the Department of Modern Languages website for registration details)
- completing a proctored Written Proficiency Test (WPT) by Language Testing International (LTI) and achieving a score of Beginner High or above (see the Department of Modern Languages website for registration details)

* Students are strongly encouraged to take the DePaul language placement exam even if they have met the MLR via study of a language in high school. This will ensure continuation of language study at the proper level.

Students who complete an Inter-College Transfer (ICT) to the College will abide by this MLR in place on the effective date of the ICT, regardless of when they first matriculated at DePaul.

Students who have met the MLR and wish to pursue further work in the language may elect the "Modern Language Option" (MLO) of the Liberal Studies Program (see "Special Programs").

**External Credit and Residency**

A student who has been admitted to the College begins residency within the college as of the first day of classes of the term in which the student is registered. Students in residence, whether attending on a full-time or part-time basis, may not take courses away from DePaul University without the written permission of the college. Permission must be obtained in advance of registration to avoid loss of credit or residency in the college; see the LAS website for more information.

- 2 Courses Required

* Students must earn a C- or better in this course.

Notes

Courses offered in the student's primary major cannot be taken to fulfill LSP Domain requirements. If students double major, LSP Domain courses may double count for both LSP credit and the second major. Students who choose to take an experiential learning course offered by the major may count it either as a general elective or the experiential learning requirement.

In meeting learning domain requirements, no more than one course that is outside the student's major and is cross-listed with a course within the student’s major, can be applied to count for LSP domain credit. This policy does not apply to those who are pursuing a double major or earning BFA or BM degrees.

Quantitative Reasoning and Technological Literacy

Readiness for LSP 120 is determined by the math placement test taken online after admission. Students may need to take developmental coursework prior to LSP 120. The LSP 120 requirement may be waived by credit already earned for advanced math coursework or by passing a dedicated proficiency exam. Students who complete both LSP 120 and LSP 121 take one less Learning Domain course. Students may not apply the course
reduction to any Domain where only one course is required, and if taken within the SI Domain, the reduction cannot be applied to the SI Lab or SWK requirement.

Major Requirements

Course Requirements

Fifty-six quarter hours distributed as follows:

Core (5 courses)

- WRD 203 STYLE FOR WRITERS
- WRD 205 HISTORY OF LITERACIES AND WRITING
- WRD 209 GENRE AND DISCOURSE
- WRD 301 WRITING IN WORKPLACE CONTEXTS
- WRD 306 RHETORICAL TRADITIONS

WRD Elective Categories

One course is required from each of the two following WRD elective categories:

Writing

- WRD 201 DIGITAL WRITING
- WRD 204 TECHNICAL WRITING
- WRD 206 PROFESSIONAL WRITING
- WRD 240 ARGUMENTATIVE WRITING
- WRD 281 WRITING CENSORSHIP
- WRD 282 ETHICS OF PUBLIC AND PROFESSIONAL WRITING
- WRD 283 ENVIRONMENTAL WRITING
- WRD 284 SPORTS WRITING IN AMERICA: MYTHS, MEMORIES, HEROES AND VILLAINS
- WRD 286 WRITING WITH PHOTOGRAPHS
- WRD 300 COMPOSITION AND STYLE
- WRD 309 TOPICS IN WRITING, RHETORIC AND DISCOURSE *
- WRD 320 TOPICS IN PROFESSIONAL WRITING *
- WRD 321 WRITING IN THE LEGAL PROFESSION
- WRD 322 WRITING AND METADATA
- WRD 323 EDITING
- WRD 324 WRITING FOR PUBLIC HEALTH AND HEALTH CARE
- WRD 340 WRITING AND REVISIONING
- WRD 345 GHOSTWRITING
- WRD 376 FIELDWORK IN ARTS WRITING (EL/JYEL)
- WRD 377 WRITING AND SOCIAL ENGAGEMENT * (EL/JYEL)
- WRD 395 WRITING CENTER THEORY & PEDAGOGY (EL/JYEL)
- WRD 396 WRITING FELLOWS THEORY AND PRACTICE (EL)

Rhetoric and Discourse

- WRD 208 INTRODUCTION TO REASONED DISCOURSE
- WRD 260 RHETORICAL ANALYSIS
- WRD 261 DIGITAL CULTURE
- WRD 262 THE RHETORIC OF EVERYDAY TEXTS
- WRD 263 READING BETWEEN THE GROOVES: THE RHETORICAL POWER OF POPULAR MUSIC
- WRD 264 LANGUAGE, SELF AND SOCIETY
- WRD 285 TRUTH IN DISGUISE: THE RHETORIC OF SATIRE
- WRD 287 THE COMIC BOOK AS VISUAL ARGUMENT
- WRD 288 DIGITAL STORYTELLING
- WRD 330 LANGUAGE AND LINGUISTICS
- WRD 360 TOPICS IN RHETORIC *
Major Field Electives

The equivalent of seven additional four-hour electives may be drawn from either of the elective categories above and from the following:

- WRD 207 INTRODUCTION TO WRITING AND RHETORIC
- WRD 290 WRITER’S TOOLS WORKSHOP (2 hr course, may be repeated for major-field elective credit as long as topic differs)
- WRD 291 THE SCIENTIFIC RESEARCH POSTER
- WRD 398 INTERNSHIP (EL/JYEL)
- WRD 399 INDEPENDENT STUDY

Experiential Learning (EL) Requirement

All WRD students are required to take one EL-designated course within the major. WRD courses designated both EL and JYEL will fulfill the major’s EL requirement and the Liberal Studies Junior Year Experiential Learning requirement simultaneously. A JYEL course taken outside of WRD will not count toward the EL course requirement.

Open Electives

Open elective credit also is required to meet the minimum graduation requirement of 192 hours.

Combined Bachelor's/ Master's Degree

The combined Bachelor's/Master's degree programs allow students to complete 12 graduate credit hours while still undergraduates. These 12 graduate credit hours will count toward both the undergraduate and graduate degree programs.

The Writing, Rhetoric and Discourse (BA) offers three options:

- Writing, Rhetoric and Discourse (BA)/Writing, Rhetoric and Discourse
- Writing, Rhetoric and Discourse (BA)/New Media Studies (MA)
- Writing, Rhetoric and Discourse (BA)/Secondary Education English (MEd)

Writing, Rhetoric and Discourse (BA)/Writing, Rhetoric and Discourse (MA)

Writing, Rhetoric, & Discourse offers undergraduate majors the opportunity to begin earning an advanced degree as seniors. The program allows approved BA/MA students to take one graduate course in each quarter of the senior year, allowing for the completion of the MA in nine subsequent graduate courses rather than 12. Applicants must have a minimum GPA of 3.50 in the major and 3.20 overall at time of application, and they should have completed two of the undergraduate Core courses and at least one other 300-level course counting toward the major. Students must apply for this program no later than March 1 of their junior year.

Writing, Rhetoric and Discourse (BA)/New Media Studies (MA)

Writing, Rhetoric, & Discourse offers undergraduate majors the opportunity to begin earning a graduate degree
in its New Media Studies program as seniors. This combined-degree program allows approved BA/MA students to take one graduate course in each quarter of the senior year, allowing for the completion of the MA in NMS in nine subsequent graduate courses rather than 12. Applicants must have a minimum GPA of 3.50 in the major and 3.20 overall at time of application, and they should have completed two of the undergraduate Core courses and at least one other 300-level course counting toward the major. Students must apply for this program no later than March 1 of their junior year.

Writing, Rhetoric and Discourse (BA)/Secondary Education English (MED)

The TEACH Program combines a Liberal Arts and Social Sciences (LAS) undergraduate English major with a graduate level College of Education (COE) Master’s in Education Program. Students graduate with a BA in Writing, Rhetoric and Discourse and a MEd in Education with State of Illinois Secondary English Language Arts licensure. This combined degree program of the College of Liberal Arts and Social Sciences and the College of Education was collaboratively developed, and is governed and taught by faculty from these units.

Students may apply to the Program during the spring of their junior year. They must complete the Junior Year Experiential Learning course, TCH 320, and meet other application criteria prior to applying; these include completion of at least 16 quarter credit hours at DePaul and a 3.0 GPA. During their senior year, students are required to complete a Program capstone course, TCH 390 and three 400-level courses that count toward both their undergraduate and graduate degrees:

- TCH 401 TEACHING AS A PROFESSION IN SECONDARY SCHOOL
- TCH 411 THE NATURE OF ENGLISH
- TCH 421 INQUIRY & APPLICATION IN DEVELOPING SECONDARY ENGLISH PEDAGOGY

The following is a list of English Content Area requirements (grades of C or better required for licensure).

These can be taken as part of liberal studies, major and/or open elective requirements:

- Introduction to Literature course: ENG 120 or 200-level LSP English course
- Reading Poetry course: ENG 220 or ENG 366
- Shakespeare course: ENG 228 or ENG 328
- Literary Research and Writing/Reading Prose course: ENG 221
- Linguistics/Grammar/History of the English Language course: ENG 211, ENG 370, WRD 203, ENG 300, WRD 300, WRD 323, or WRD 340
- 3 British Literature courses chosen from: ENG 245, any ENG course in the 310s-350s sequence, ENG 382 (British authors), ENG 383 (British authors), ENG 387 (British literature), ENG 388 (British literature), ENG 389 (British literature)
- Romanticism in American Literature course: ENG 361
- 2 American Literature courses chosen from: ENG 371, ENG 373, ENG 374, ENG 382 (American authors), ENG 383 (American authors), ENG 387 (American literature), ENG 388 (American literature), ENG 389 (American literature)
- 300-level Literature elective courses (With permission, WRD majors can substitute upper-level WRD course)

The Master’s year comprises teacher-preparation coursework that culminates with student teaching during Spring Quarter. Upon graduation and the fulfilling of State of Illinois Certification requirements (which may require some additional course work in the student’s major and related fields), students are eligible to be certified to teach English at the 6th-12th grade levels.

A full description of the Program can be found on the College of Education website in the graduate course catalog. Students interested in the Program should consult with the designated TEACH Program advisor in their home department.

About

For nearly a century, the Driehaus College of Business has been committed to an urban and a metropolitan identification and the recognition that its past, present, and future are linked inextricably to the stability and vitality of the city of Chicago. For students in the college, this means studying and working in Chicago, one of the most dynamic business and financial centers in the world. For graduates of the Driehaus College of Business, this means abundant career choices and opportunities after leaving DePaul. In this way, DePaul has been the developer of Chicago's leaders in business for over nine decades.

In February 2012, Business alumnus and Life Trustee Richard H. Driehaus made the largest gift in DePaul history to support faculty excellence in graduate and undergraduate business programs. In recognition of Mr. Driehaus’ $30 million commitment, generosity, and vision, the University renamed the college in his honor as part of its centennial celebrations.

Faculty

Approximately 316 men and women serve on the faculty of the college (144 full-time and 172 part-time). These individuals are committed to providing DePaul students with a challenging, high-quality classroom learning experience. This commitment has led nearly 86% of full-time faculty to earn doctoral degrees in their respective disciplines. Additionally, many members of the faculty have demonstrated their technical competence by earning professional certifications in their special fields.

Among the certifications held by members of the faculty are the following:

- Accredited Personnel Specialist (APS)
- Associate in Risk Management (ARM)
- Certificate in Data Processing (CDP)
- Certificate in Dispute Resolution (CDR)
- Certificate in Management Accounting (CMA)
- Certified Information Systems Auditor (CISA)
- Certified Internal Auditor (CIA)
- Certified Financial Planner (CFP)
- Certified Fraud Examiner (CFE)
- Certified Information Technology Professional (CITP)
- Certified Public Accountant (CPA)
- Certified Secure Programmer (CSP)
- Chartered Financial Analyst (CFA)
- Chartered Financial Consultant (ChFC)
- Chartered Property and Casualty Underwriter (CPCU)

Academics

Established in 1912, the Driehaus College of Business is the nation's tenth oldest business school. The Kellstadt Graduate School of Business was established in 1948 and is noted for its innovative programs for full-time and part-time graduate students.

The College is accredited by AACSB International, The Association to Advance Collegiate Schools of Business, a distinction held by a limited percentage of business schools around the world.

Bachelor of Science in Business

The Bachelor of Science in Business (BSB) is the undergraduate business degree offered by the Driehaus College of Business. The degree is composed of study in several areas of required coursework:

Business Core

The Business Core is a group of requirements focusing on professional business preparation to be completed by all students seeking the BSB degree. The specific classes a student takes for Core completion can vary according to selection of major or minor.

Liberal Studies Program

The Liberal Studies Program is a set of requirements in which a student is exposed to liberal studies education through classes taken from departments and programs across the university. Students pursuing the BSB complete required courses in business ethics, business calculus, and business statistics through Liberal
Studies requirements.

Major

In the major program, a student pursues specialized coursework in a business area. Some majors in the college require selection of a concentration or a concentration and specialization to further focus the field of study. Majors must be declared, and while specific eligibility requirements exist for each major, an intended major in the college can be declared at any time.

Open Electives

Open Electives allow a student to explore additional areas of interest or work toward a minor or second major. The selection of major or minor determines the number of open elective hours needed.

While not required for completion of the degree, students in the college are able to pursue additional opportunities for study such as minors, modern languages, study abroad programs, and internship-based courses.

A minimum of 192 quarter hours of degree applicable credit is required for completion of the BSB. A student's degree plan and factors such as course selection, transfer credit, and major and minor requirements may result in a student exceeding the hours minimum. In addition to college and departmental requirements, all students pursuing the BSB are subject to university policies on degree conferral.

Majors

The Driehaus College of Business offers undergraduate majors in these areas:

- Accountancy (BSB)
- Accountancy Honors (BSB)
- Actuarial Science (BSB)
- Business Administration (BSB)
- Economics (BSB)
- Economics Honors (BSB)
- Finance (BSB)
- Finance Honors (BSB)
- Hospitality Leadership (BSB)
- Management (BSB)
- Management Honors (BSB)
- Management Information Systems (BSB)
- Marketing (BSB)
- Marketing Honors (BSB)
- Real Estate (BSB)

Minors

The Driehaus College of Business offers undergraduate minors in these areas:

- Accountancy (Minor)
- Accountancy (Minor: Business Students Only)
Joint Degrees

Bachelor of Arts in General Business

The Bachelor of Arts in General Business (BAGB) is a joint degree with the School for New Learning (SNL) and the Driehaus College of Business which combines the SNL adult-learning focus in liberal and lifelong learning with the core requirements from the Driehaus undergraduate program.

The joint degree is open to students age 24 or older.

Please refer to the School for New Learning for additional information on this program.

Course Prerequisites

A student in the Driehaus College of Business is expected to observe and adhere to course prerequisites. Prerequisites for courses are noted in Campus Connection and can include requirements for class standing, course completion and placement testing.

Given the sequential nature of coursework in business and the structure of major and minor programs in the college, consideration of course prerequisites is essential to successful planning and degree completion.
Graduation/ Degree Completion

Graduation/degree completion is the official granting of a degree by DePaul University upon successful completion of all degree requirements.

Degrees are awarded at the end of each quarter. In order to have the degree awarded, all requirements must be satisfied, including:

- Submission of an Application for Graduation in Campus Connection
- Declaration of the major (and minor, if applicable)
- Completion of WRD 103, WRD 104, the Professional Writing requirement and ICS 392 with a minimum grade of C- in each class
- Completion of all courses in the major and minor field with a minimum grade of C- in each class (even if extra or open elective)
- A minimum grade point average of 2.000 within the major and minor
- A minimum cumulative grade point average of 2.000 for DePaul coursework
- Completion of at least 192.0 hours
- Completion of the last 60.0 hours of coursework for the degree at DePaul

Posting of all of grades in Campus Connection by the end of the grading period (five business days after the quarter ends)

A student who is nearing the completion of the degree should consult with his or her academic advisor in the Undergraduate Programs office regarding the graduation/degree completion process.

Majors and Minors

For a student to earn the Bachelor of Science in Business, completion of at least one major in the Driehaus College of Business is required. In addition to the primary major in business, a Driehaus student may choose to complete a secondary major, additional concentrations or specializations, or a minor within the college or from another college at the university.

Non-business students are welcome to complement their areas of study by completing a major or minor in the Driehaus College of Business. They should meet with an academic advisor in the Driehaus Undergraduate Programs office to review relevant policies and course requirements.

Majors

Declaration

Upon matriculation into the university, a student may declare an intended Driehaus major. The student should declare the major once eligibility requirements are completed. Eligibility requirements vary by major and can change over time. A student will complete the major requirements in place at the time the student declares the major or intended major. Some majors require declaration of a concentration or a concentration and specialization; those may be added to the record at the time of intended or major declaration.

Major Policies and Requirements

For all students pursuing a Driehaus major, the following policies and requirements are in effect:

- All requirements for the major including concentration and specialization must be completed as specified by the major department at the time the student declares the major or intended major
- The number of hours required for completion of a major varies:
  - Majors that require fewer than 30.0 hours for completion may necessitate completing additional courses to earn the minimum 192.0 hours required for the degree
  - When majors require more than 30.0 hours for completion, the courses taken beyond the first 30.0 hours may be used toward a secondary purpose in the degree plan, such as an Open Elective
At least one half of the major field coursework must be completed at DePaul.

The following courses must be completed with a minimum grade of C- unless otherwise noted for a specific major:

- All courses completed from the major department whether taken for a requirement or for another purpose.
- All courses used toward completion of the major or required by the major department for declaration of the major.
- A minimum grade point average of 2.000 within the major is required for degree conferral.

Secondary Majors, Concentrations, and Specializations

For all students pursuing a secondary Driehaus major or additional concentrations or specializations for a Driehaus major, the following policies and requirements are in effect:

- Some combinations of secondary majors, additional concentrations and specializations, and minors are prohibited as noted in the requirements section for the major, concentration, specialization, or minor.
- At least 50% of the courses used for the completion of a second concentration or specialization must be unique to the completion of that concentration or specialization.
- A course taken as part of an secondary major, additional concentration, or additional specialization may be used toward another purpose in the degree plan, such as an Open Elective.

Majors outside the Driehaus College of Business

A student pursuing the Bachelor of Science in Business is allowed to complete non-business majors in addition to the required Driehaus major. A student interested in completing a major outside of the college should meet with an academic advisor in the Driehaus Undergraduate Programs office to review relevant policies and procedures. In addition, the student should contact the undergraduate program office for the college offering the non-Driehaus major for advising on requirements for completion of the major.

Minors

Declaration

Upon matriculation into the university, a student may declare an intended Driehaus minor. The student should declare the minor once eligibility requirements are completed. Eligibility requirements vary by minor and can change over time. A student will complete the minor requirements in place at the time the student declares the minor or intended minor.

Minor Policies and Requirements

For all students pursuing a Driehaus minor, the following requirements must be observed:

- All requirements for the minor must be completed as specified by the minor department at the time the student declares the minor or intended minor.
- A student may not minor in a subject area in which the student is also completing a major.
- Some combinations of secondary majors, additional concentrations and specializations, and minors are prohibited as noted in the requirements section for the major, concentration, specialization, or minor.
- At least one half of the minor field coursework must be completed at DePaul.
- The following courses must be completed with a minimum grade of C- unless otherwise noted for a specific minor:
  - All courses completed from the minor department whether taken for a requirement or for another purpose.
  - All courses used toward completion of the minor or required by the minor department for declaration of the minor.
  - A minimum grade point average of 2.000 within the minor is required for degree conferral.

Minors outside the Driehaus College of Business

A student pursuing the Bachelor of Science in Business is allowed to complete non-business minors. A student interested in completing a minor outside of the college should meet with an academic advisor in the Driehaus Undergraduate Programs office to review relevant policies and procedures.
Pass/Fail Option

The purpose of the pass/fail option is to encourage students to seek educational experiences in courses which are not required in the student's program.

In conformity with the university policy on the pass/fail option, students in the Driehaus College of Business may take only Open Electives pass/fail and then only in courses outside of the student's major or minor program. Only one pass/fail per discipline is allowed.

Degree seeking students in the college must enroll for a letter grade in all parts of the Liberal Studies Program, the Business Core, and in all major or minor program courses. Students must be in good standing with a GPA above 2.000 in order to apply for pass/fail and may take a maximum of one pass/fail class per quarter. Grades of A to D are considered passing grades.

Please refer to the Undergraduate Student Handbook for the complete university policy on the pass/fail option.

A student must complete a pass/fail application in the Undergraduate Programs office for each course taken on a pass/fail basis by the application deadline published by the university in the Academic Calendar.

Probation

Any student who fails to maintain a 2.000 (C) cumulative grade point average is on academic probation. A student is removed from academic probation when the cumulative grade point average reaches the required minimum of 2.000 (C). A student's academic status is reviewed after autumn, winter, spring and summer quarters in which the student was enrolled in at least 1 credit hour. A probationary student will be limited to 12 credit hours per quarter until a cumulative GPA of 2.000 (C) is reached. The student will not be permitted to remain on academic probation for longer than three sequential quarters (one year).

Residency

The residency requirement states that a student must have completed the following work at DePaul University: the final 60 quarter hours of credit; one-half of the credit earned in the major area of concentration; one-half of the credit earned in the minor if applicable; all courses in the senior year.

A student who has been admitted to the Driehaus College of Business begins residency within the college as of the first day of classes of the term to which the student has been admitted.

Students in residence in the college, whether attending on a full-time or part-time basis, may not take courses or otherwise earn academic credit away from DePaul University without the written permission of the college. Permission should be obtained in advance of registration to avoid loss of credit or residency in the college.
Test, Credit and Placement

Driehaus College of Business students are subject to the university’s policy on transfer credit and credit by examination:

A maximum of 132 transfer hours (quarter hours) will be applicable to any undergraduate degree at DePaul. This includes transfer courses taken at both community colleges and other four-year institutions. Of the 132 quarter hours, a maximum of 99 quarter hours earned at a community college may be applied to a DePaul University degree. CLEP, International Baccalaureate and/or AP credits combined with transfer credits from two-year institutions will total no more than 99 hours and combined with credits from four-year institutions will total no more than 132 hours.

More detail about DePaul policies on transfer credit and credit by examination may be found in the Undergraduate Student Handbook.

Learning Goals

The Learning Goals for the Driehaus College of Business undergraduate program are:

- Communication - Driehaus students will be able to communicate effectively both orally and in writing.
- Global Business Perspective - Driehaus students will understand business within a global context.
- Ethical and Legal Awareness - Driehaus students will be able to recognize ethical and legal issues confronting them.
- Decision-making - Driehaus students will be able to use analytical and reflective skills in making decisions.
- Teamwork - Driehaus students will be able to understand group and individual dynamics within a business setting.
- Mastery of Content - Driehaus students will acquire knowledge of the functional areas of business and the interrelationships among the functional areas within a business.

Honors Program Alternative

Students pursuing degrees in the Driehaus College of Business are to follow the Honors Program Requirements listed below:

Honors Core

- HON 110 HONORS DISCOVER CHICAGO
  or HON 111 HONORS EXPLORE CHICAGO
- HON 100 RHETORIC AND CRITICAL INQUIRY
- HON 101 WORLD LITERATURE
- HON 102 HISTORY IN GLOBAL CONTEXTS
- HON 104 RELIGIOUS WORLDVIEWS AND ETHICAL PERSPECTIVES
- HON 105 PHILOSOPHICAL INQUIRY
- HON 201 STATES, MARKETS, AND SOCIETIES
- HON 207 TOPICS IN COGNITIVE STUDIES

Business majors are not required to take HON 180 DATA ANALYSIS AND STATISTICS.

Science
Arts

- HON 205 INTERDISCIPLINARY ARTS
  - One applied, performance, or studio course from approved list.
  - Honors students in the Hospitality major may request a waiver from this requirement.

Language

- Three courses of intermediate or advanced language study.

Students who meet the proficiency requirement by placing at the 200-level of a language may consult with an Honors advisor for an alternative 3-course option for fulfilling the language requirement.

Junior Seminar

- HON 301 HONORS JUNIOR SEMINAR IN MULTICULTURALISM

The Honors Program is committed to developing students’ knowledge and cultural awareness so they may respect and learn from difference. Honors students meet the multicultural requirement by completing HON 301, the Junior Seminar in Multiculturalism.

Senior Capstone

- Choose one from below:
  - HON 350 HONORS SENIOR SEMINAR
  - HON 351 HONORS SENIOR SEMINAR IN SERVICE LEARNING
  - HON 395 HONORS SENIOR THESIS

Students who choose to complete an Honors Senior Thesis must have their project approved at least one term prior to executing the project. To gain approval for a senior thesis, students must complete an application, including a project proposal signed by a faculty advisor. In keeping with the interdisciplinary nature of the program, the thesis should attempt to move outside the boundaries normally associated with one particular discipline and should be supervised by two readers from different academic fields. While the final product must be a substantial piece of work building on the student’s accumulated knowledge and new research, specific requirements for each thesis will depend on the nature of the project. See the Director or Associate Director for an application. Students may opt to enroll in HON 300: Honors Research Seminar (a two-credit elective) to receive dedicated guidance as they prepare the thesis project.

Business Ethics

- Choose one from below:
  - PHL 248 BUSINESS ETHICS (CROSS-LISTED WITH MGT 248)
  - MGT 228 BUSINESS, ETHICS, AND SOCIETY
  - MGT 248 BUSINESS ETHICS
  - REL 228 BUSINESS, ETHICS AND SOCIETY

Honors Approved Elective

Business majors in the Honors Program are allotted one Honors Approved Elective. This course, selected in consultation with an Honors advisor to achieve specific academic or professional goals, will allow students to explore an area of study at the 200-300 level outside of the major. Students in the Hospitality major may request a waiver from this requirement.

Experiential Learning

Honors students fulfill the university’s requirement for Junior Year Experiential Learning (JYEL) through completion of an internship course, a service learning course, or a mentoring course, or through participation in a study abroad program. The course will verify completion of the JYEL requirement and be placed where appropriate in the student’s academic program – either as a major requirement, open elective, Honors Approved Elective, or (in the case of HON 351) an Honors core requirement.

Grade Requirements

A grade of C- or higher in HON 110 or 111 is required to remain in the Honors Program.

A grade of C- or higher is required to pass the following courses: HON 100, HON 350, HON 351, and HON 395.
Admission & Aid

To succeed in the study of business, students must possess a number of academic qualities. Specifically, students must be able to think analytically and reason to valid conclusions relying on both quantitative and qualitative information. Particular attention is therefore given to the mathematical and verbal abilities of candidates.

Undergraduate candidates interested in admission to the Driehaus College of Business should direct all inquiries to the Office of Admission, DePaul University, 1 E. Jackson Boulevard, Chicago, Illinois, 60604, admission@depaul.edu or (312) 362-8300.

Students interested in the Kellstadt Graduate School of Business should refer to the graduate admission section for more information.

For general information about admission and financial aid please visit: http://www.depaul.edu/admission-and-aid/Pages/default.aspx

For information about graduate admission, or to apply online, please visit: http://www.depaul.edu/admission-and-aid/types-of-admission/Pages/graduate-student.aspx

Graduate Admission

Kellstadt Graduate School of Business

Admission to Kellstadt’s Graduate School of Business is based on academic performance, work experience and career progression, as well as GMAT (or GRE) test scores. Learn more about our MBA and specialized master’s degree program formats and timelines.

General Admission Requirements

Completed Application and Fee

Apply online and submit a $60 application fee. Online applicants may pay by credit card. Otherwise, fees may be paid by check or money order payable to DePaul University.

Official Transcripts

All applicants should send official transcripts from all universities, colleges or community colleges attended.

Read more about transcript requirements for international students.

Admission Examinations

GMAT/ GRE Test Scores

Applicants to the following programs are not required to submit GMAT or GRE scores:
Applicants to the following programs are required to submit GMAT or GRE scores, unless they qualify for a GMAT/GRE waiver (see waiver policy below) or other exclusions noted below:

- Full-Time MBA
- All DePaul campus-based cohort MBA programs
- Master of Science in Accountancy
- Master of Science in Computational Finance
- Master of Science in Economics and Policy Analysis (see waiver policy below for applicants who have earned undergraduate degrees in economics from DePaul).
- Master of Science in Enterprise Risk Management
- Master of Science in Finance
- Master of Science in Marketing Analysis
- Master of Science in Real Estate
- Master of Science in Wealth Management (see waiver policy below for applicants who have earned CFP, CFA, CPA, MBA or related advanced degrees).

GMAT information, including test dates, a list of test centers, and applications for the exam, may be obtained at mba.com or by contacting Pearson VUE at (951) 681-3000. Submitted score reports must come directly to DePaul University from Pearson VUE. GRE information can be obtained at ETS.org. DePaul's GRE code is 1165. Tests taken more than five years prior to the date of application are not considered valid.

**GMAT/ GRE Waiver Policy**

Applicants may petition the admissions committee for a waiver of the GMAT or GRE based on any one of the following criteria:

- Five years of progressive work experience, showing both management and quantitative responsibilities, after completion of a bachelor's degree from an accredited university.
- A completed JD, MD, PhD from a United States higher education institution and quantitative skills, or a quantitative-based master's degree, such as a master's degree in finance, and an undergraduate degree from an accredited university.
- LSAT Score of 160 or higher and an undergraduate degree from an accredited university.
- Successful completion of all parts to the CPA exam and an undergraduate degree from an accredited university.
- Successful completion of all parts to the PE exam and an undergraduate degree from an accredited university.
- Driehaus College of Business undergraduate program alumni applicants to the Part-Time MBA with a DePaul cumulative GPA of 3.2 or higher and two years of professional work experience.
- MS in Economics and Policy Analysis applicants who have earned a DePaul University undergraduate economics degree.
- MS in Wealth Management applicants who have earned one or more of the following: CFP, CFA, CPA, MBA or related advanced degree.

All requests should be submitted with the applicant’s resume and transcripts to kgsb@depaul.edu. Please indicate your reasons for requesting the waiver and include all relevant supporting documents. Not all waiver requests are granted and students who already have taken the exam will not be granted a waiver.

**Language Proficiency for International Students**

Non-native English speakers who have not completed a bachelor's or master's degree in the United States are required to submit examination results from a recognized English proficiency test. Please refer to our International Students page for more information.
Essay Questions

Applicants to all MBA and MS programs are required to submit an essay explaining their interest and professional goals.

EDBA applicants are required to submit a personal statement, not to exceed 1½ pages, outlining professional and research goals.

Letters of Recommendation (MBA Applicants Only)

Full-time MBA applicants should submit two letters of recommendation from current or previous employers. Letters may be submitted through the online application or kgsb@depaul.edu. Be sure to include the name of the recommender and applicant's name on each letter.

EDBA applicants: two letters of recommendation required, submitted directly by the writers, per instructions in the online application.

Letters of recommendation are optional for applicants in all other Kellstadt MBA and MS degree programs.

Resume/ Curriculum Vitae (MBA Applicants Only)

MBA applicants must submit a professional resume. It should summarize your work experience and educational background.

Interviews

Interviews are required only for applicants to the Full-time Cohort MBA program. The admission committee may require applicants to other programs to schedule an interview if necessary.

Deadlines

Part-Time MBA

Students may apply to enroll in any quarter. To ensure that you will be able to enroll in the quarter of your choice, we recommend that you apply by these dates:

<table>
<thead>
<tr>
<th>Enrollment Quarter</th>
<th>Domestic Student Deadline</th>
<th>International Student</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fall</td>
<td>Aug. 1</td>
<td>July 1</td>
</tr>
<tr>
<td>Winter</td>
<td>Nov. 1</td>
<td>Oct. 1</td>
</tr>
<tr>
<td>Spring</td>
<td>March 1</td>
<td>Feb. 1</td>
</tr>
<tr>
<td>Summer</td>
<td>May 1</td>
<td>April 1</td>
</tr>
</tbody>
</table>

Evening Cohort MBA

The Evening Cohort MBA starts in the fall, but students may submit their applications any time of the year. The admission committee meets in February, April and July to make decisions on applicants. Students who apply after these deadlines may have their applications considered if space remains available.

Weekend Cohort MBA

The Weekend Cohort MBA program starts in the fall, but students may submit their applications any time of year. The admission committee meets in February, April and July to make decisions on applicants. Students who apply after these deadlines may have their applications considered if space remains available.

Full-Time Cohort MBA

The Full-Time Cohort MBA program starts in the fall, but students may submit their applications any time of year. The admission committee meets in February, April and July to make decisions on applicants. Full-time Cohort MBA applicants who wish to be considered for scholarships or graduate assistant positions should apply by April. Students who apply for admission after these deadlines may have their applications considered if space remains available.
remains available.

**Specialized Master's Degrees**

Students may apply to enroll in any quarter. To ensure that you will be able to enroll in the quarter of your choice, we recommend that you apply by these dates:

<table>
<thead>
<tr>
<th>Enrollment Quarter</th>
<th>Domestic Student Deadline</th>
<th>International Student</th>
</tr>
</thead>
<tbody>
<tr>

<td>May 1</td>
<td>April 1</td>
</tr>
</tbody>
</table>

**Doctorate in Business Administration**

Students may submit their applications any time of year for admission into the program in the fall. The admissions committee meets in March, May and July to make decisions on applicants who applied during the fall, winter and spring quarters, respectively.

For full DBA admission criteria and deadlines, visit go.depaul.edu/DBA.

**Readmission**

Students who have been previously admitted but absent from DePaul for one year or longer, must complete an application for readmission. Applicants are asked to submit a brief written explanation for the absence from the program and provide an updated resume.

**Deferred Admission**

A student previously admitted who has not enrolled may defer admission for up to one year. If the original application's academic documents have been shred, the student may be required to provide new copies of any admission documents.

**Revoked Admission**

Any applicant that has been found to provide forged or falsified information or who intentionally leaves out academic documents or information that would impact the admission decision process may have their admission revoked.

**Contact Us**

Please be sure that the applicant's name, DePaul student ID number or date of birth, and program of interest are noted on all admission correspondence. Necessary supporting documents and application fees should be sent to:

Kellstadt Graduate School of Business  
DePaul University  
1 East Jackson Blvd., Suite 5300  
Chicago, Illinois 60604-9983

Contact DePaul's Kellstadt Graduate School of Business with additional questions:

Scholarship Opportunities

Please refer to the individual departments for a listing of available scholarships.

Double Demon Scholarship

The Double Demon Scholarship is awarded to DePaul alumni and covers 25 percent of tuition for degree, non-degree or select certificate coursework taken at the graduate level.* Both full-time and part-time students are eligible and no application is necessary. To learn more, contact the admission office for your college of interest (see listing below).

*Please note: The Double Demon Scholarship cannot be used in conjunction with other DePaul scholarships, waivers or awards. University employees are eligible for other tuition benefits and are not eligible. The scholarship does not cover coursework from the Center for Professional Education (CPE), the Institute for Professional Development (IPD), coursework in a doctoral program or a master of fine arts (MFA), School of Music, the Theatre School, College of Law and a few other select programs.

Financial Aid

Financial aid and alternative financing programs, as well as scholarships are available to students. Completing a current FAFSA (Free Application for Federal Student Aid) is the first step to determining your overall eligibility for financial aid.

Additional information is available on DePaul's Admission and Aid website.

Undergraduate Programs Office

The Undergraduate Programs office supports the mission of the Driehaus College of Business in a variety of ways:

- **Academic Advising:** Provides students with guidance on course selection, degree planning, and major and minor selection.
- **Records Auditing:** Assists students with determining degree progress and remaining requirements.
- **Degree Conferral:** Verifies students are eligible to receive their DePaul degree.
- **Declaration Processing:** Allows students to declare major and minor programs.
- **Orientation:** Introduces new business students to the college through Premiere DePaul, Transition DePaul, and Inter-College Transfer programs.
- **Special Programs:** Enhances the student experience through opportunities and events like Beta Gamma Sigma, Freshman Honors Convocation, and the annual Commencement Ceremony.
The Undergraduate Programs office is located in DePaul Center 5200 and may be contacted by telephone at (312) 362-5358.

Academic Advising

All undergraduate degree seeking students in the Driehaus College of Business may receive academic advising in the Undergraduate Programs office.

Academic advisors are available to provide information concerning degree progress, curriculum, course selection, registration, academic regulations, and university policies and procedures. Academic advisors will also make appropriate referrals to help students in the use of college and university resources according to individual needs. Students are encouraged to consult their advisor periodically throughout the year.

In addition, faculty can assist in the selection of major electives and business electives which will best complement a student’s major and career orientation.

The Undergraduate Programs office is located in DePaul Center 5200 and may be contacted by telephone at (312) 362-5358.

About

Communication is the art and science of creating and sharing meaning. In the College of Communication, you'll develop a deeper understanding of the complex and challenging communication practices and processes that characterize our rapidly changing world; you'll master the techniques for crafting and delivering messages across a variety of social contexts and platforms: face to face, print, audio, video, Web and other social media. You'll learn from exceptional teachers - from professors who have many years of experience in some of the biggest media markets in the nation, and from scholars publishing in some of the top national and international journals. You'll gain hands-on experience in our state-of-the-art facilities, through our award-winning radio station and newspaper, and through a wide range of internships and community projects.

The College of Communication at DePaul has set the stage for enhanced quality, substantially enriched curricular and programmatic offerings, joint programming with other schools and colleges within the university, and expanded opportunities for our students to engage in experiential learning.

Academics
The College of Communication is home to both Undergraduate and Graduate degree programs.
Majors

- Communication and Media (BA)
- Communication Studies (BA)
- Intercultural Communication (BA)
- Journalism (BA)
- Media and Cinema Studies (BA)
- Organizational Communication (BA)
- Public Relations and Advertising (BA)
- Relational Communication (BA)

Minors

- Cinema Studies (Minor)
- Communication and Media (Minor)
- Communication Studies (Minor)
- Documentary Studies (Minor)
- Environmental Communication (Minor)
- Fandom, Cult Media and Subculture (Minor)
- Intercultural Communication (Minor)
- International Communication (Minor)
- Journalism (Minor)
- Latino Media and Communication (Minor)
- Legal and Public Affairs Communication (Minor)
- Media and Cinema Studies (Minor)
- Organizational Communication (Minor)
- Performance Studies (Minor)
- Public Relations and Advertising (Minor)
- Radio, TV, and New Media (Minor)
- Relational Communication (Minor)
- Rhetoric (Minor)

Concentration in Latino Media & Communication

The program educates students to think critically about all aspects of media and communication, with a particular focus on Latino media and Latino communities. Coursework provides students with the applied skills necessary to create communication strategies which effectively reach the Latino segment of the population, based on an understanding of Latino cultures in the US and grounded in an understanding of its cultural, economic and sociological aspects.

Learning Goals

Students who complete the concentration will:

- Develop an understanding of the heterogeneous and rapidly changing Latino communities locally, nationally, and globally.
- Ground their knowledge of intercultural studies within a more extensive and concrete knowledge of a
particular (even though diverse), rapidly growing, and increasingly important population within the US Latino communities.

- Increase their cross-cultural competence (understanding and ability to dialogue across difference, develop cultural sensitivity and awareness) with Latino communities.
- Develop insights into the needs and motivations of Latino populations in the workplace, in community situations, and other sites of engagement, and develop communications tools and strategies to address those needs and motivations.
- Enhance their capacity to communicate with and learn from Latino populations in the workplace, in community situations, and other sites of engagement.
- Recognize the impact of the movement of Latinos across the globe and to develop the skills to critically consume and produce media, public relations, and advertisement representations that communicate to and about Latino communities.
- Both engage and demonstrate their interest in Latino Studies within and across diverse areas of knowledge production in the Communication field.

Course Requirements

- LST 202 CONSTRUCTING LATINO COMMUNITIES
  or CMNS 335 LATINO COMMUNICATION, CULTURE, & COMMUNITY
- Any three additional courses from:
  - CMN 394 COMMUNICATION INTERNSHIP (for credit in this concentration, the internships must focus on Latino media and communication)
  - CMNS 308 TOPICS IN INTERCULTURAL COMMUNICATION (for credit in this concentration, the course topic must focus on Latino media and communication)
  - CMNS 335 LATINO COMMUNICATION, CULTURE, & COMMUNITY
  - CSS 201 CRITICAL COMMUNITY ENGAGEMENT
  - CSS 390 SPECIAL TOPICS IN COMMUNITY SERVICE STUDIES (for credit in this concentration, the course topic must focus on Latino media and communication)
  - LST 202 CONSTRUCTING LATINO COMMUNITIES
  - LST 300 SPECIAL TOPICS IN LATIN AMERICAN STUDIES
  - MCS 350 TOPICS IN GLOBAL CINEMA (for credit in this concentration, the course topic must focus on Latino media and communication)
  - MCS 353 TOPICS IN MEDIA STUDIES (for credit in this concentration, the course topic must focus on Latino media and communication)
  - MCS 375 LATINO/A TELEVISION AND MEDIA
  - MCS 376 LATIN AMERICAN CINEMA
  - MKT 340 MARKETING ACROSS CULTURES: A CULTURAL PERSPECTIVE ON MULTICULTURAL MARKETS
  - PRAD 361 ACCOUNT PLANNING AND CONSUMER INSIGHTS FOR LATINO MARKETS
  - PRAD 362 LATINO INTEGRATED MARKETING COMMUNICATION
  - PRAD 391 SPECIAL TOPICS IN PUBLIC RELATIONS (for credit in this concentration, the course topic must focus on Latino media and communication)
  - PRAD 392 SPECIAL TOPICS IN ADVERTISING (for credit in this concentration, the course topic must focus on Latino media and communication)
  - PSY 220 LATINA/O PSYCHOLOGY
  - SPN 393 LATINO MEDIA AND DIGITAL CULTURE LITERACY

Honors Program Alternative

Students pursuing degrees in the College of Communication are to follow the Honors Program Requirements listed below:

Honors Core

- HON 110 HONORS DISCOVER CHICAGO
  or HON 111 HONORS EXPLORE CHICAGO
- HON 100 RHETORIC AND CRITICAL INQUIRY
- HON 101 WORLD LITERATURE
- HON 102 HISTORY IN GLOBAL CONTEXTS
- HON 104 RELIGIOUS WORLDVIEWS AND ETHICAL PERSPECTIVES
- HON 105 PHILOSOPHICAL INQUIRY
• HON 180 DATA ANALYSIS AND STATISTICS
• HON 201 STATES, MARKETS, AND SOCIETIES
• HON 207 TOPICS IN COGNITIVE STUDIES

Science
• HON 225 HONORS LAB SCIENCE TOPICS
• One course from the university's Scientific Inquiry list

Arts
• HON 205 INTERDISCIPLINARY ARTS
• Fine Arts Elective: One applied, performance, or studio course outside of Communication from approved list.

Language
• Three courses of intermediate or advanced language study.

Students who meet the proficiency requirement by placing at the 200-level of a language may consult with an Honors advisor for alternative 3-course sequences to fulfill the language requirement.

Junior Seminar
• HON 301 HONORS JUNIOR SEMINAR IN MULTICULTURALISM

The Honors Program is committed to developing students' knowledge and cultural awareness so they may respect and learn from difference. Honors students meet the multicultural requirement by completing HON 301, the Junior Seminar in Multiculturalism.

Senior Capstone
• Choose one from below
  • HON 350 HONORS SENIOR SEMINAR
  • HON 351 HONORS SENIOR SEMINAR IN SERVICE LEARNING
  • HON 395 HONORS SENIOR THESIS

Honors students must complete HON 180, Data Analysis and Statistics, before enrolling in HON 207 or HON 225.

Students who choose to complete an Honors Senior Thesis must have their project approved at least one term prior to executing the project. To gain approval for a senior thesis, students must first complete an application, including a project proposal, signed by a faculty advisor. In keeping with the interdisciplinary nature of the program, the thesis should attempt to move outside the boundaries normally associated with one particular discipline and should be supervised by two readers from different academic fields. While the final product must be a substantial piece of work building on the student's accumulated knowledge and new research, specific requirements for each thesis will depend on the nature of the project. See the Director or Associate Director for an application. Students may opt to enroll in HON 300: Honors Research Seminar (a two-credit elective) to receive dedicated guidance as they prepare for the thesis project.

Honors Approved Electives

Honors students in Communication are allotted two Approved Electives in order to explore an area of study outside their major. Approved Electives are chosen in consultation with an Honors advisor to achieve specific academic or professional goals.

Experiential Learning

Honors students fulfill the university's requirement for Junior Year Experiential Learning (JYEL) through completion of an internship course, a service learning course, or a mentoring course, or through participation in a study abroad program. The course will verify completion of the JYEL requirement and be placed where appropriate in the student's academic program – either as a major requirement, open elective, Honors Approved Elective, or (in the case of HON 351) an Honors core requirement.

Grade Requirements

A grade of C- or higher in HON 110 or 111 is required to remain in the Honors Program.

A grade of C- or higher is required to pass the following courses: HON 100, HON 350, HON 351, and HON 395.
Admission & Aid

Undergraduate candidates interested in admission to the College of Communication BA programs should direct all inquiries to the Office of Admission:

Lincoln Park Campus
Welcome Center
2400 North Sheffield Ave.
Chicago, IL 60614
(312) 362-8300
admission@depaul.edu

Loop Campus
DePaul Center
1 East Jackson Blvd.
Chicago, IL 60604
(312) 362-8300
admission@depaul.edu

Graduate candidates interested in admission to the College of Communication MA programs should direct all inquiries to the Office of Graduate Admission:

Office of Graduate Admission
College of Communication
DePaul University
2400 N. Sheffield Avenue
Chicago, IL 60614
(773) 325-4405
gradcom@depaul.edu
Scholarship Opportunities

Undergraduate

DePaul awards a variety of admission scholarships to freshmen and transfer students, as well as some scholarships for current students. For information about university opportunities, visit the scholarship page of DePaul's Admission and Aid website at http://www.depaul.edu/admission-and-aid/Pages/scholarships.aspx. The College of Communication offers some scholarship support for continuing undergraduate students. Communication scholarships opportunities vary; typically three to five scholarships are awarded each year, in the $1000-$2500 range. Details on Communication scholarship offerings can be found at communication.depaul.edu.

Double Demon Scholarship

The Double Demon Scholarship is awarded to DePaul alumni and covers 25 percent of tuition for degree, non-degree or select certificate coursework taken at the graduate level.* Both full-time and part-time students are eligible and no application is necessary. To learn more, contact the admission office for your college of interest (see listing below).

*Please note: The Double Demon Scholarship cannot be used in conjunction with other DePaul scholarships, waivers or awards. University employees are eligible for other tuition benefits and are not eligible. The scholarship does not cover coursework from the Center for Professional Education (CPE), the Institute for Professional Development (IPD), coursework in a doctoral program or a master of fine arts (MFA), School of Music, the Theatre School, College of Law and a few other select programs.

Financial Aid

Students who plan to fund their education through federal loans should complete and submit the Free Application for Federal Student Aid (FAFSA). DePaul's Financial Aid Office will create a financial aid package based on your FAFSA information.

Graduate Admission

The College of Communication offers five graduate programs at the master's level: Communication and Media, Digital Communication and Media Arts (Digital Communication track), Health Communication, Journalism, and Public Relations and Advertising.

Classifications

Full Degree-Seeking Status

The minimum requirements for this status are:
Bachelor's degree conferred by a regionally accredited institution.
Scholastic achievement in undergraduate studies indicating a capacity to successfully pursue a specific program of graduate study.
A minimum cumulative grade point average of 3.0.
Submission of all required supporting credentials.

Conditional Degree-Seeking Status

The minimum requirements for this status are:

- Bachelor's degree conferred by a regionally accredited institution.
- Scholastic achievement in undergraduate studies indicating a capacity to successfully pursue a specific program of graduate study.
- Submission of all required supporting credentials.
- Conditional approval by the department or graduate program director of the applicants proposed program of graduate study.
- Academic conditions as designated in the conditional admission letter.
- No independent studies or non-program courses may be taken while in a conditional status.

A conditionally admitted applicant is eligible for reclassification to full, degree-seeking status when the conditions of his or her admission have been satisfied.

DePaul Students and Combined Degree Programs

Undergraduate students from any major at DePaul University are eligible to apply for admission in one of the five combined degree programs. Admission is conditional until the conferred bachelor's degree is posted on the DePaul transcript. The M.A. programs in Communication and Media, Digital Communication and Media Arts (Digital Communication track), Health Communication, Journalism, and Public Relations and Advertising offer an accelerated master's degree that begins in an undergraduate's senior year and may be completed in one subsequent year. Further information about these combined degree programs can be found within specific program descriptions in this Catalog and on the College website.

Admission Procedures

General Procedures

Procedures for admission to the graduate programs in the College of Communication are outlined below. For specific information about admission requirements and deadlines to each department or program, please consult the College of Communication website.

Application: You can apply online at: www.depaul.edu/apply. To request information about College of Communication graduate programs, please email gradcom@depaul.edu.

Supporting Credentials: We require official transcripts from all universities, colleges, and junior colleges you have attended. Please request that transcripts and other credentials be sent directly to the Office of Graduate Admission, College of Communication, 2400 N. Sheffield, Chicago, IL 60614-2215. We also accept official electronic transcripts sent to our office at gradcom@depaul.edu. We recommend that you request transcripts in sufficient time to meet the programs deadline.

The College of Communication graduate programs require additional supporting credentials before an application file is considered complete. Please consult the specific program listing on the College of Communication website to determine what additional materials are required for admission and the deadline by which applications and supporting materials should be submitted. International applicants should reference the additional admission requirements listed on our International Student Admission page on the College of Communication website.

Application Fee: You can pay the application fee online as part of the online application or send a check or money order payable to DePaul University. Consult the application instructions for specific information about amount of the fee. If paying by check or money order, send it along with your supporting credentials to the Office of Graduate Admission, 2400 N. Sheffield, Chicago, IL 60614-2215. Applications submitted without an application fee will not be processed. The fee is non-refundable.

Application Deadline and Entry Terms: Consult the College website for program-specific information about application deadlines and to which academic terms the program admits new students. Our office accepts and reviews applications on a rolling basis.

Admission Decisions: The graduate admission office will notify you of your admission decision by letter typically within 4-6 weeks of your application being complete. Admission applications will be reviewed only after the
application and all supporting credentials, along with the application fee, have been submitted.

Deferring Admission: If you do not enroll in the term to which you were admitted, you may request that your admission be deferred for up to one year after the term to which you were admitted. After one year, you must reapply to the program. Email gradcom@depaul.edu to request a deferral.

International Student Admission

Students who require a student visa (I-20) in order to study at DePaul must meet all admission requirements and demonstrate adequate financial support. Applicants educated in a country in which the native language is not officially recognized as English must also submit proof of English proficiency. College of Communication programs require a minimum TOEFL score of 590 (paper-based), 243 (computer-based), or 96 with no individual score less than 22 (internet-based). DePaul also accepts the IELTS (International English Language Testing System) with a minimum score of 7.5. English proficiency scores below these minimum scores may be considered for some programs. For more information on conditional admission, please visit the College of Communication website.

The letter of admission and I-20 are issued only after admission. International students are encouraged to complete their applications at least one month prior to any published program deadline, or no later than three months before the start of the term, whichever date comes first.

Special Programs

14 East

14 East is our topical, student-produced online magazine first launched in May of 2016. This collaborative of DePaul Students cultivates interest in any array of subjects, from politics, to literature, to culture. At 14 East, readers can find unique perspectives on issues that impact the lives of young adults in Chicago.

Adventors

The DePaul Student Advertising Group is the official organization for students interested in advertising at DePaul University, and part of the leading national industry trade organization devoted to best practices, professionalism, and education. Our purpose is to bring together students who share a passion for great advertising and communication solutions. Our group helps prepare students for a career in advertising by facilitating an ongoing dialogue that covers the latest developments and trends in the ad industry. We do this through a mix of guest speakers and advertising industry presentations, student ad competitions, networking and career information sessions, visits to local Chicago area advertising/communication agencies, and social events.

Good Day DePaul (GDD)

Good Day DePaul is a weekly television news program about DePaul that is produced by students in the College of Communication. Students do on-air reporting and anchoring for the program. They also work as producers, directors, and camera people. Good Day DePaul has won many honors from both the Society of Professional Journalists and the Chicago Television Academy.

Graduate Communication Association (GCA)

The Graduate Communication Association is a student-led, student-run organization with a primary goal to create community, relationships and camaraderie among students in the seven graduate programs in the College of Communication. We serve as a resource for students, faculty, staff and administration by offering a space to better meet the needs of the graduate students of DePaul University. We also provide students the opportunity to get involved in networking and social events, as well as philanthropic service hours.

Internship Program

The College offers an undergraduate internship program through which majors and minors can earn academic credit and gain practical experience in a professional setting. Students may be enrolled in CMN 394, Advanced Communication Internship, and/or CMN 395, Communication Internship Special Topics (topics vary), only after meeting college-established eligibility requirements. An individual student may participate in several internship experiences. A maximum of 16 quarter hours of internship and practicum credit can be applied to degree
requirements.  CMN 394 may be used to fulfill the Experiential Learning Requirement in the Liberal Studies Program and/or as a major field requirement. If a second internship is taken, CMN 395 may count as a communication elective. A maximum of two graded internships can be used toward the major field requirements. Subsequent hours of internship credit are taken through different CMN 395 special topics courses and fulfill unrestricted electives. Communication minors may have one graded internship count towards completion of the minor.

Public Relations Student Society of America (PRSSA)

For students interested in a career in public relations, participating in PRSSA is an essential cornerstone of your DePaul experience. The organization hosts a vibrant schedule of activities such as visits to Chicago public relations agencies and career fairs that will build your professional network and put you on the radar screens of future employers. The DePaul Chapter has won national recognition including the Teahan Award for Outstanding Regional Conference, the highest honor a PRSSA Chapter may earn. DePaul’s Regional Conferences have been sold-out events that have drawn students from campuses across the Midwest with such powerful themes such as Transforming Traditional Into Digital: The New Ways of PR; The Entertainment Industry: It’s Not Just an LA Thing; and PR: The Chicago Way.

Radio DePaul

The College manages Radio DePaul, the award winning campus radio station. Students may earn up to eight credit hours (four in the major) for radio production by enrolling with instructor’s permission in JOUR 393, Journalism Practicum.

Society of Professional Journalists (SPJ)/ Online News Association (ONA)

This is a student-run organization for students interested in careers in journalism. The DePaul chapter sponsors campus speakers, career information sessions, and journalism seminars/conferences. Student members are eligible to apply for SPJ and ONA - sponsored internships and student competitions.

The DePaulia

The DePaulia is the university's award winning student-run paper and web site, which is integrated into the Communication curriculum. Published weekly since 1922, the newspaper covers news, sports, features, and community-related events. Editors on the newspaper are eligible for four hours of credit under JOUR 393, Journalism Practicum. Other students gain college credit by enrolling in (JOUR 390) Writing for the DePaulia.

Certificates

- Digital Communication
- Health Communication

Digital Communication

The graduate certificate in Digital Communication provides both continuing education for professionals in communication fields such as advertising, journalism, media studies, and public relations, and also skills training in contemporary digital technology for communication professionals. This six course (24 credit hour) interdisciplinary certificate will help students understand how digital technology has affected communication practices across a range of subjects and disciplines, develop new technological practices that reflect changes in the field across a range of communication subjects, identify ethical perspectives and evaluate the ethical
dimensions of digital technology and practice, and evaluate professional-level communication skills and technological practices in order to become better communicators in digital environments.

**Course Requirements**

- CMNS 570 INTRODUCTION TO DIGITAL CMN
- Three digital technology focused courses among offerings in Journalism (JOUR), Media and Cinema Studies (MCS), and Public Relations and Advertising (PRAD). Pre-approved courses include:
  - JOUR 502 NEWS NOW: JOURNALISM IN THE INFORMATION AGE
  - JOUR 503 REPORTING FOR CONVERGED NEWSROOMS
  - JOUR 504 MULTIMEDIA NEWS PRODUCTION
  - JOUR 507 VISUAL COMMUNICATION
  - JOUR 520 DATA JOURNALISM
  - JOUR 522 MULTI-PLATFORM NEWS EDITING
  - JOUR 529 ONLINE NEWS BUREAU
  - JOUR 531 JOURNALISM BY NUMBERS
  - JOUR 533 JOURNALISM & FREEDOM OF INFORMATION
  - JOUR 537 FROM FRANKLIN TO THE INTERNET: A HISTORY OF AMERICAN JOURNALISM
  - JOUR 538 MASS COMMUNICATION IN THE DIGITAL AGE
  - JOUR 542 SOCIAL MEDIA AND THE NEWS
  - MCS 520 TOPICS IN MEDIA STUDIES*
  - MCS 530 NEW MEDIA AND CULTURE
  - MCS 550 FANDOM AND ACTIVE AUDIENCES
  - MCS 575 DIGITAL MEDIA ETHICS
  - PRAD 595 SPECIAL TOPICS IN PUBLIC RELATIONS & ADVERTISING*
- One Digital Media Arts (DMA) course from the College of Computing and Digital Media's School of Design. Pre-approved courses include:
  - DMA 410 DESIGN WORKSHOP
  - DMA 415 AUDIO WORKSHOP
  - DMA 425 STILL IMAGE WORKSHOP
  - DMA 475 MOVING IMAGE WORKSHOP
  - DMA 480 WEB/MEDIA DELIVERY WORKSHOP
  - DMA 525 FOUNDATION OF DIGITAL MEDIA
  - DMA 527 CREATIVE PROCESS AND STRATEGY
- One additional elective course from the digital technology focused courses in JOUR, MCS or PRAD, DMA courses in the School of Design, or pre-approved courses in allied fields.** Pre-approved allied field courses include:
  - ENG 477 TOPICS IN PUBLISHING
  - NMS 510 WRITING DIGITAL CONTENT
  - NMS 520 WEB DESIGN I
  - NMS 541 DIGITAL STORYTELLING

*Topics must be approved by graduate program director.

**With prior approval of the graduate program director, the additional elective course may come from other areas within the College of Communication, the College of Computing and Digital Media, or from relevant areas in other colleges at DePaul.

---

**Health Communication**

The graduate certificate in Health Communication provides communication education for professionals in the healthcare field and health industry education for communication professionals. The six-course (24 credit hour) certificate will prepare students to work alongside clinicians and public health officials to improve the quality and effectiveness of communication in health care settings.
Course Requirements

- HTHC 515 INTRO TO HEALTH COMMUNICATION
- Choose five courses from the following*:
  - HTHC 516 RESEARCH METHODS FOR HEALTH CARE PRACTITIONERS
  - HTHC 517 COMMUNICATION, HEALTH DISPARITIES, AND CULTURE
  - HTHC 519 ASSESSMENT AND INTERVENTION FOR HEALTH CARE ADMINISTRATORS
  - HTHC 520 HEALTH CARE CAMPAIGNS AND COMMUNITY ACTION
  - HTHC 521 HEALTH AND FAMILY COMMUNICATION
  - HTHC 523 TOPICS IN HEALTH COMMUNICATION
  - HTHC 525 NARRATIVES IN HEALTH CARE
  - HTHC 526 SOCIAL CONSTRUCTION OF HEALTH AND ILLNESS
  - CMN 591 INTERNSHIP

*With approval of the graduate program director, students can take up to two relevant elective courses from other College of Communication graduate programs. Course examples include:

- PRAD 515 PUBLIC RELATIONS WRITING
- PRAD 540 CRISIS COMMUNICATION MANAGEMENT
- PRAD 595 SPECIAL TOPICS IN PUBLIC RELATIONS & ADVERTISING
- CMNS 501 COMMUNICATION IN CULTURAL CONTEXTS
- CMNS 529 TOPICS IN ORGANIZATIONAL AND MULTICULTURAL COMMUNICATION
- CMNS 541 ORGANIZATIONAL COMMUNICATION AND CULTURE
- CMNS 548 TEAMS AND LEADERSHIP
- CMNS 552 STRATEGIC COMMUNICATION
- JOUR 507 VISUAL COMMUNICATION
- JOUR 522 MULTI-PLATFORM NEWS EDITING
- JOUR 532 THE PRESS AND THE PRESIDENCY
- JOUR 542 SOCIAL MEDIA AND THE NEWS
- RELC 500 RELATIONAL COMMUNICATION THEORIES
- RELC 502 ATTACHMENT & RELATIONAL COMMUNICATION
- RELC 511 TOPICS IN INTERPERSONAL COMMUNICATION

About

DePaul's College of Computing and Digital Media (CDM) is organized into three schools: the School of Cinematic Arts (SCA), the School of Computing (SoC), and the School of Design (SoD) featuring degree programs designed to keep pace with the latest developments in technology while remaining grounded in the liberal arts. DePaul CDM has a reputation for offering an extraordinary selection of degree programs and courses from traditional computer science, information systems, and network technologies to game development, film and television, animation, and graphic design. At CDM, students will experience a dynamic interdisciplinary curriculum and the opportunity to satisfy their academic curiosity through a wide range of minors that reflect the diverse offerings of CDM's curriculum.

Administration

David Miller - Dean
Lucia Dettori - Associate Dean

DePaul University Winter/Spring/Summer 2016-2017 Page 1069 of 2776
Academic Advising

The College believes that academic advising is necessary for the vitality and success of the student's education. Students are assigned a faculty advisor upon admission to the school. All students are encouraged to meet with their faculty advisor at least once each year for assistance in planning a course of study that best reflects their academic and career interests, skills, and lifestyle. Students are also assigned a staff advisor in the CDM Academic Success Center to assist with providing interpretations of university policy, academic success strategies and support services.

Advising Staff

- Writing for Film and Television (Minor)
Academic Policies

All students are expected to be familiar with and are responsible for the policies included in the DePaul University Undergraduate Handbook and the CDM web site.

As a student, you assume the responsibility to know and meet both the general and specific policies and deadlines outlined in this catalog and handbook.

Honors Program Alternative

Students pursuing degrees in the College of Computing and Digital Media are to follow the Honors Program Requirements listed below:

Honors Core
- HON 110 HONORS DISCOVER CHICAGO
  or HON 111 HONORS EXPLORE CHICAGO
- HON 100 RHETORIC AND CRITICAL INQUIRY
- HON 101 WORLD LITERATURE
- HON 102 HISTORY IN GLOBAL CONTEXTS
- HON 104 RELIGIOUS WORLDVIEWS AND ETHICAL PERSPECTIVES
- HON 105 PHILOSOPHICAL INQUIRY
- HON 180 DATA ANALYSIS AND STATISTICS (if indicated)
  o For BFA majors, requirement is LSP 120 OR HON 180
- HON 201 STATES, MARKETS, AND SOCIETIES
- HON 207 TOPICS IN COGNITIVE STUDIES

Honors students who do not have a calculus, discrete math, or statistics requirement as part of their major must complete HON 180, Data Analysis and Statistics, before enrolling in HON 207 or HON 225.

Science
- HON 225 HONORS LAB SCIENCE TOPICS

Students with a lab science requirement for the major will replace this course with one additional Honors Approved Elective.

Arts
- HON 205 INTERDISCIPLINARY ARTS
  - One applied, performance, or studio course from approved list.
  - BFA majors do not have an Arts requirement for the Honors Program.

Language
- Three courses of intermediate or advanced language study.
  - BFA majors do not have a language requirement for the Honors Program.

Students who meet the proficiency requirement by placing at the 200-level of a language may consult with an Honors advisor for an alternative 3-course sequence to replace the language requirement.

Junior Seminar
HON 301 HONORS JUNIOR SEMINAR IN MULTICULTURALISM

The Honors Program is committed to developing students’ knowledge and cultural awareness so they may respect and learn from difference. Honors students meet the multicultural requirement by completing HON 301, the Junior Seminar in Multiculturalism.

Senior Capstone

Choose one from below

- HON 350 HONORS SENIOR SEMINAR
- HON 351 HONORS SENIOR SEMINAR IN SERVICE LEARNING
- HON 395 HONORS SENIOR THESIS

Students who choose to complete an Honors Senior Thesis must have their project approved at least one term prior to executing the project. To gain approval for a senior thesis, students must complete an application, including a project proposal, signed by a faculty advisor. In keeping with the interdisciplinary nature of the program, the thesis should attempt to move outside the boundaries normally associated with one particular discipline and should be supervised by two readers from different academic fields. While the final product must be a substantial piece of work building on the student’s accumulated knowledge and new research, specific requirements for each thesis will depend on the nature of the project. See the Director or Associate Director for an application. Students may opt to enroll in HON 300: Honors Research Seminar (a two-credit elective) to receive dedicated guidance as they prepare the thesis project.

Honors Approved Electives

Approved Electives are designed to help students achieve expertise in a field outside of the major. These courses are chosen in consultation with an Honors advisor to achieve specific academic or professional goals. CDM students are allotted between 0 and 2 Approved Electives, depending on their major and concentration. Students should consult with an Honors Advisor to determine the number of Approved Electives they are required to fulfill.

Experiential Learning

Honors students fulfill the university’s requirement for Junior Year Experiential Learning (JYEL) through completion of an internship course, a service learning course, or a mentoring course, or through participation in a study abroad program. The course will verify completion of the JYEL requirement and be placed where appropriate in the student’s academic program — either as a major requirement, open elective, Honors Approved Elective, or (in the case of HON 351) an Honors core requirement.

Major Field Adjustments

In addition, participation in the University Honors Program may affect the requirements for a student’s major field. The following adjustments may occur:

- BFA majors in the Honors Program will replace the Honors Approved Elective with one of the required Arts & Literature courses. The second Arts & Literature course requirement is waived.
- CDM majors with major requirements placed in the liberal studies section of the degree will have their Honors Approved Elective requirement adjusted accordingly so that the number of Honors requirements coheres with the number of liberal studies requirements.

Grade Requirements

A grade of C- or higher in HON 110 or 111 is required to remain in the Honors Program.

A grade of C- or higher is required to pass the following courses: HON 100, HON 350, HON 351, and HON 395.
Online Learning

Undergraduate

Many courses are available for review and playback via the CDM Course Online playback system (COL). If a course is COL-enabled, any student registered in the course has access to the course playback. Students are strongly encouraged to utilize the COL resource wherever available. Some undergraduate courses are offered online. CDM is pleased to offer an online degree completion plan for undergraduate transfer students in B.S. in Information Technology and B.S. in Computer Science.

Graduate

DePaul CDM Online Learning programs are specifically designed to complement the busy lifestyle of working professionals. Our Course Online (COL) lecture playback system brings the unique experience of an on-campus DePaul CDM education to off-campus students, and gives them flexibility in how, when, and where they learn.

We offer many master's degree programs that can be completed entirely online, including:

- Business Information Technology
- Game Programming
- Computer Science
- Cybersecurity
- E-Commerce Technology
- Health Informatics
- Human-Computer Interaction
- Information Systems
- IT Project Management
- Network Engineering and Security
- Predictive Analytics*
- Software Engineering*

*Some courses in some concentrations are not available online. Please consult your faculty advisor to determine suitable alternative coursework.

Graduate students who wish to complete their degree through online learning do not register for a special online degree. Rather, they apply for one of our regular degree programs and then sign up for online learning courses. The degree earned by an online learning student is identical to the degree earned by an on-campus student.

Combined Degrees

Students who meet the admission requirements below may choose to apply to a combined degree program. Interested students should consult their faculty advisor regarding the application procedure. This program allows students to combine many CDM bachelor's degrees with a CDM master's degree following the structure outlined below.

Admission Criteria

- Minimum of 44 quarter hours earned
- Minimum of 12 quarter hours earned at DePaul
- GPA of 3.3 or higher in courses taken at DePaul
- Endorsement of faculty advisor

In order to apply for the combined degree program, your faculty advisor must send an e-mail recommendation to the CDM Academic Success Center. The recommendation should include your full name, student ID number, and the bachelor's and master's degrees you wish to combine.

Bachelor of Arts in Computing students who are enrolled via the School for New Learning (SNL) are also eligible.
for this program. Interested students who meet the admission criteria for a combined degree should contact Kenn Skorupa in SNL for more information.

**Program Structure**

Students in the combined degree program take a maximum of three graduate level courses that count toward both their bachelor's and master's degree requirements. Students may enroll in graduate level coursework in the junior and senior year only. Students in the combined degree program will receive the bachelor's degree after meeting all graduation requirements including the minimum credit hours required for graduation.

To earn the master's degree, the student must earn as many additional graduate credit hours as needed to reach the minimum number of graduate credit hours required in that master's degree.

Only CDM courses can be taken as part of this program. Advanced programs (e.g., JD/MS, MFA, and PhD) are not eligible for the combined degree program.

**Maintaining Good Standing**

Cumulative GPA and course grades will be reviewed after each Autumn, Winter, and Spring Quarter.

The student and faculty advisor will be notified when the student's cumulative GPA falls below 3.3 or when the students receives less than a C- in graduate level course.

If a student's cumulative GPA falls below 3.3, the student must earn a term GPA of 3.3 or above in the following quarter to stay in good standing. If the student does not achieve a 3.3 term GPA, then the student will be dismissed from the combined program and resume the traditional B.A./B.S./B.F.A.

If dismissed from the combined degree program after graduate courses have been passed, the graduate courses may only apply to the undergraduate degree. Should the student later be admitted to a graduate program, graduate courses applied to the undergraduate degree may not apply to the graduate program and may not be repeated if they are required in the declared graduate curriculum. Other graduate courses may be substituted in this case.

**Designing a Course of Study**

It is extremely important that the student and faculty advisor work together on a course of study immediately upon admission to the Combined Degree Program.

This course of study should include the graduate courses to be taken and the undergraduate courses that are replaced by the graduate courses. Failure to put together a solid plan can lead to extra coursework and a lengthening of the Combined Degree program.

It is advisable for the student and the faculty advisor to enter the proposed plan of study in the student communication record on the CDM intranet so it is available to the student and CDM faculty and staff.

**Registering for Master's Degree Courses**

Combined degree students must meet regularly with their faculty advisors. The faculty advisor will initiate the registration process for all graduate level courses taken during the undergraduate career.

**Bachelor's Degree to Master's Degree Transition**

In order to be fully admitted to the designated master's program, the student must meet all admission requirements for that program. When preparing to complete the undergraduate portion of the combined degree, students must submit the application for degree conferral for the undergraduate degree by the application deadline. At this time, the students should contact the CDM Academic Success Center about the procedure required to be formally admitted to the declared graduate program.
Certificates

- Analytics Certificate
- Post-Master's Certificates
- Professional Development

Analytics Certificate

A certificate program in Analytics is intended for students with a bachelor degree who want to gain technical skills in data mining and big data analytics.

Required Courses

- CSC 423 DATA ANALYSIS AND REGRESSION
- IS 467 FUNDAMENTALS OF DATA SCIENCE
- CSC 455 DATABASE PROCESSING FOR LARGE-SCALE ANALYTICS
- Two courses chosen among the following:
  - CSC 555 MINING BIG DATA
  - CSC 495 SOCIAL NETWORK ANALYSIS
  - ECT 584 WEB DATA MINING
  - CSC 478 PROGRAMMING MACHINE LEARNING APPLICATIONS
  - CSC 575 INTELLIGENT INFORMATION RETRIEVAL

A student in a certificate program may not use a course already taken as part of an MS program. In particular, students with an MS from CDM may not reuse, for certificate credit, any course already taken for the MS. A faculty advisor can make an appropriate substitution. A student in a certificate program may substitute a maximum of two courses.

A student must earn at least C- in each of the five courses and earn a cumulative GPA of at least 2.5 to receive the certificate.

Students who do not have a background in statistical inference, linear algebra and programming will be required to take up to three introductory courses.

Introductory Courses

- CSC 401 INTRODUCTION TO PROGRAMMING
- CSC 412 TOOLS AND TECHNIQUES FOR COMPUTATIONAL ANALYSIS
- IT 403 STATISTICS AND DATA ANALYSIS

Introductory courses can be waived by prior coursework, work experience or successful completion of a Graduate Assessment Examination (GAE) in the Introductory Course area.

Admission Requirements

The Certificate Program in Analytics has the same admission requirements as the MS in Predictive Analytics. After completing the certificate, students have the option to enroll in the MS degree and all courses from the certificate can be applied there.

All applicants must have:

- Successfully completed a bachelor's degree or its equivalent from a regionally accredited institution.
Post-Master's Certificates

Two post-master's certificates provide opportunities for master's degree holders to sharpen their skills. Students who earned their master's degree from DePaul CDM automatically qualify for a scholarship.

Project Management Post-Master's Certificate

- PM 430 FUNDAMENTALS OF IT PROJECT MANAGEMENT
- PM 440 COLLABORATIVE TECHNOLOGIES FOR LEADING PROJECTS
- PM 535 INFORMATION TECHNOLOGY INVESTMENT FINANCIAL ANALYSIS
- PM 556 ENTERPRISE PROJECT MANAGEMENT
- PM 570 ENTERPRISE SYSTEM IMPLEMENTATION

Governance, Risk Management, and Compliance Post-Master's Certificate

- IS 444 IT AUDITING
- CNS 440 INFORMATION SECURITY MANAGEMENT
- CNS 533 ENTERPRISE SECURITY INFRASTRUCTURE CONTROLS AND REGULATORY COMPLIANCE
- IS 505 BUSINESS CONTINUITY/DISASTER RECOVERY THEORIES AND STRATEGIES
- IS 506 BUSINESS CONTINUITY/DISASTER RECOVERY MANAGEMENT AND TACTICS

A student in a certificate program may not use a course already taken as part of an MS program. In particular, students with a MS from CDM may not reuse, for certificate credit, any course already taken for the MS. A faculty advisor can make an appropriate substitution. A student in a certificate program may substitute a maximum of two courses.

A student must earn at least B- in each of the five courses and earn a cumulative GPA of at least 3.0 to receive the certificate.

Admission Requirements

Applicants must hold a master's degree in any IT field or business subject or a master's degree in any subject plus three or more years of IT experience. Applicants must submit transcripts from their master's degree and a resume for consideration. Choose non-degree seeking programs on the DePaul Application.

Double Demon Scholarship

Any newly admitted student who has graduated from DePaul (has a degree conferred—bachelor's, master's or doctorate) will be eligible to receive a Double Demon Scholarship, as a 25% automatic discount, for any GRADUATE coursework they take after the degree is conferred. This includes degree coursework, certificate coursework and non-degree coursework. It does not include coursework from the Center for Professional Education (CPE), Institute for Professional Development (IPD), coursework in a doctoral program or a master of fine arts (MFA), Music, Theatre, Law and a few other select programs. The Double Demon Scholarship cannot be used in conjunction with any other institutional aid or discount.
Institute for Professional Development

The College of Computing and Digital Media established the Institute for Professional Development in 1985 to offer certificate programs designed to meet the needs of both individuals and businesses in the Chicagoland area. These non-degree offerings provide intensive training in a wide variety of areas, with each standalone certificate program addressing a different set of theoretical concepts and practical skills. Emphasis is placed on gaining practical experience through a combination of lectures and demonstrations complemented by laboratory exercises and homework assignments. Certificate programs are typically taught by a team of instructors, that includes both full-time faculty and part-time instructors from industry. The programs require a substantial commitment of time, as most meet two nights per week and in the morning on approximately half of the Saturdays during the program.

For a list of current certificate program offerings see
http://www.cdm.depaul.edu/academics/pages/professionaldevelopment.aspx

Admission

Graduate Admission

Applicants to CDM graduate programs can choose from degrees that span the computing and digital media spectrum, including master's, MFA, and PhD programs. Information about admission requirements can be found on the CDM website, under Prospective Students:
http://www.cdm.depaul.edu/Prospective%20Students/Pages/GraduateAdmissions.aspx

CDM does not permit admission to more than one graduate program at a time. Students wishing to pursue a second graduate program must complete the requirements for the first program (i.e., graduate) and then apply to the second program.

Domestic applications generally take one month to process while international applications take a minimum of three months to review.

About
DePaul University, founded on Judeo-Christian principles, continues to assert the relevance of these principles through higher education to our students. The University expresses these principles especially by passing on the heritage of St. Vincent DePaul: individual perfection manifested through purposeful involvement with other persons, communities and institutions. The College of Education manifests these principles in its purpose, and through its programs.

As an urban institution, the College of Education is committed to improving primary and secondary education in the metropolitan area and, in particular, in the city of Chicago. Framed within a commitment to promote and support diversity, the College of Education prepares all of its students to be "Urban Professional Multicultural Educators" who:
• Promote positive transformation
• Consider multiple perspectives
• Integrate inquiry, theory, and practice
• Exhibit Vincentian personalism
• Function as life long learners.

- English as a Second Language (Minor)
- English as a Second Language/Bilingual Education (Minor)
- Exceptionality and Learning (Minor)
- Health (Minor)
- Physical Education (Minor)
- Special Education (Minor)
Academic Policies

In addition to the DePaul University Undergraduate Student Handbook, the College of Education Undergraduate Student Handbook includes the rules and regulations for its undergraduate programs. Additional academic information and regulations applicable to our undergraduate programs appears in the specific undergraduate section.

As an undergraduate student you assume the responsibility to know and meet both the general and particular policies, and deadlines outlined in this catalog and handbook.

Licensure Requirements

To receive Illinois State Board of Education licensure, a student must complete all licensure coursework and requirements, including having all field experience hours completed and approved, have a 2.75 GPA, and have successfully passed the TAP, Content Area, and APT tests.

Endorsement Evaluations

Students in Teacher Education Programs can submit an application to their academic advisor to request an endorsement evaluation. The COE can only evaluate transcripts for those programs or content areas that are offered in the COE. Any other programs or content areas will require an Illinois State Board of Education evaluation. A grade of C or better is required for all courses to apply toward endorsements.

Endorsements conducted by DePaul are valid only prior to applying for the teaching license. After earning the license, the individual needs to request a separate evaluation directly with ISBE who will independently review the record and whose results may differ from the DePaul evaluation. The DePaul evaluation is based on ISBE requirements at the time of the evaluation and is subject to change per ISBE's discretion.
Evaluation and Credit

Auditing Courses

Students cannot audit courses that are part of their degree or certification requirement. However, students may choose to audit other courses. Audited courses are not graded and students receive no credit for the course.

Double Majors

Please refer to the undergraduate student handbook section of the catalog for the current policy regarding COE majors and options for double majoring.

Undergraduate Inter-College Transfer (ICT)

Undergraduate students who wish to transfer to another program within DePaul should submit an ICT request through Campus Connect. In order to transfer, students must meet the admission criteria of the program to which they are transferring.

Request to Register for More than 20 CREDIT HOURS (Undergraduates only).

For consideration of this request, you must have a 3.0 cumulative GPA, have successfully completed at least 44 credit hours, and have successfully completed 4 courses the previous quarter. DEADLINE: Last day to add classes deadline.

Request for Transfer Credit as Part of FINAL 60 Credit Hours at DePaul (Undergraduate Residency Requirement)

A request to take and transfer in credit from another institution as part of your final 60 hours of credit at DPU is granted only under extenuating or extra-ordinary circumstances. Any request must be accompanied by documentation demonstrating your need for this exception. All requests are evaluated on a case-by-case basis. DEADLINE: Last day to add classes for that term.

Undergraduate Academic Standing

In order to receive advanced standing, undergraduate students in most majors must have a 2.5 or better GPA. Students who do not have a 2.5 GPA will be placed on probation. Students who do not have a 2.75 GPA will receive an academic alert.

In order to student teach and graduate, undergraduate students must have a 2.75 GPA.

Students in the Exercise Science major must maintain a minimum GPA of 2.0 to remain in good standing and need a 2.0 GPA to graduate.

Discontinuation and Re-admission

Students who have stopped their program of study for 3 consecutive quarters will be dropped from that program and must re-apply for re-admission through the admission office. Re-admitted students must follow curriculum requirements as they exist at the time of re-admission.

Credit Hour Conversion

DePaul University’s academic calendar is based on the quarter system. College credit is accumulated on the basis of quarter hours. To convert credit hours from the semester system to the quarter system, multiply the number of semester hours by 1.5 (example: 3 semester hours x 1.5 = 4.5 quarter hours). To convert credit hours from the quarter system to the semester system, multiply the number of quarter hours by .67 (or 2/3) (example: 4 quarter hours x 2/3 = 2 2/3 semester hours).
Graduation Requirements

Degree Conferral Requirement

In order for a student's degree to be conferred, the student must complete all degree coursework and requirements, have a minimum 2.75 GPA, and meet the degree conferral application deadline for the quarter in which he or she wants the degree to be conferred.

Fall quarter deadline is October 1; Winter quarter deadline is January 15; Spring quarter deadline is February 1; and Summer deadline is July 15.

Requirements to Participate in Graduation Ceremony

To participate in the graduation ceremony in the spring, a student must complete all required degree coursework by the end of the Spring quarter preceding the ceremony and have applied for graduation before the designated deadline.

Honors at Commencement Ceremony

Honors announced and listed at the Spring Commencement ceremony are based on the cumulative GPA of the end of the Winter quarter prior to the Spring Commencement Ceremony. The final determination for qualifying for honors is made at the time the individual is awarded the degree, regardless of the announcement or listing at the ceremony. The official designation for honors will be noted on student's transcripts and diploma.

The determination for honors is based solely on the final cumulative grade point average.

- Cum Laude - cumulative GPA between 3.500 and 3.699
- Magna Cum Laude - cumulative GPA between 3.700 and 3.849
- Suma Cum Laude - cumulative GPA above 3.850

Probation and Dismissal

A student whose GPA falls below a program's minimum GPA requirement will receive a registration hold and be unable to register for classes. The student must meet with his or her academic advisor and make an appointment with the Academic Success Center to develop a plan for returning to good academic standing. Students who remain on academic probation for 3 consecutive quarters will be dismissed from the COE. Students may apply to transfer to other programs at DePaul.

Student Teaching

Content Area Coursework

All content area coursework requirements must be completed prior to student teaching. A grade of C or better is required for all content area coursework requirements. Remedial coursework and CLEP tests cannot substitute for content area coursework.

Defer Student Teaching
If extenuating circumstances exist, you may request a deferral of your student teaching placement. Valid reasons would only include health-related issues, change in employment status or employment opportunity, personal hardship, or course related issues. DEADLINE: First day of student teaching.

**Extend Student Teaching Clearance Deadline**

Requests to extend the academic clearance deadline for student teaching may be submitted under extenuating circumstances. A valid request, for example, might occur when you have applied to student teach on time but failed a content area test prior to final clearance. If another testing opportunity exists prior to the start of student teaching, you may apply for an exception to complete the requirement and have your clearance re-evaluated. DEADLINE: The prior quarter’s last day to add classes deadline (e.g., for Fall Quarter, the deadline is the prior Spring Quarter’s last day to add classes deadline; Winter is Fall’s deadline; Spring is Winter’s deadline).

**Out-of-State Student Teaching Placement Request**

Requests for out-of-state student teaching placements are granted only on rare occasions and require a statement of hardship for consideration. Valid reasons for the request include health-related issues, change in employment status or employment opportunity, personal hardship, or course-related issues. Please note that to ensure proper supervision additional costs may be associated with out-of-state student teaching. DEADLINE: Same as student teaching application deadline.

**Student Teaching in an Elementary, Middle School, or High School You Attended as a Student**

Students cannot student teach in any school in which they were enrolled as a student within the last 10 years.

**Student Teaching in Your Own Classroom Request**

In order to apply for this request, you must have at least two years of supervised classroom teaching experience. Attach a completed Application to Student Teach in Your Own Classroom form to the request for exception form. DEADLINE: Same as student teaching application deadline.

**Student Teaching Requirements**

All program coursework must be completed prior to student teaching. A grade of B- or better is required in student teaching to complete successfully student teaching.

**Waiving Student Teaching Requirements**

Requests to waive student teaching must follow the Illinois State Board of Education student teaching waiver policy.

**Registration: Exception to Advance Standing**

Exceptions to advanced standing are only granted on a one-time only basis and must be approved by the Associate Dean or his or her designate.
Registration Withdrawal

Withdraw from Classes Due to Hardship

Students may request to withdraw from classes due to personal and/or medical hardships. Students should contact the University Dean of Students to request a hardship withdrawal.

Withdrawal from the COE

To officially withdraw from any COE program, a student should contact his or her academic advisor and petition in writing his or her intent to withdraw.

Honors Program Alternative

Students pursuing a degree in the College of Education are to follow the Honors Program Requirements listed below:

Honors Core

- HON 110 HONORS DISCOVER CHICAGO
- HON 111 HONORS EXPLORE CHICAGO
- HON 100 RHETORIC AND CRITICAL INQUIRY
- HON 101 WORLD LITERATURE
- HON 102 HISTORY IN GLOBAL CONTEXTS
- HON 104 RELIGIOUS WORLDVIEWS AND ETHICAL PERSPECTIVES
- HON 105 PHILOSOPHICAL INQUIRY
- HON 180 DATA ANALYSIS AND STATISTICS (if indicated)
- HON 201 STATES, MARKETS, AND SOCIETIES
- HON 205 INTERDISCIPLINARY ARTS
- LSE 380 PHILOSOPHICAL ISSUES IN EDUCATION AND CULTURE
- PSC 120 THE AMERICAN POLITICAL SYSTEM
- Choose one from below:
  - HST 181 UNITED STATES TO 1800
  - HST 182 UNITED STATES, 1800-1900
  - HST 183 UNITED STATES, 1900-PRESENT
  - Students majoring in Secondary Education Social Science and History replace this requirement with an Economics course selected in consultation with the student's major advisor.

Science Requirement

- Two courses:
  - HON 225 HONORS LAB SCIENCE TOPICS (not a Biology section)
  - One Biology course
- Students majoring in Secondary Education Social Science and History will opt for an HON 225 Biology section and a Scientific Inquiry Geography course selected in consultation with the student’s major advisor. These students should also consult with their Honors advisor about successful completion of their science requirements.
- Students with a science major in Education will replace this requirement with two non-science electives at the 200 or 300 level.

Language Requirement

- Three courses of intermediate or advanced language study.

Students who meet the proficiency requirement by placing at the 200-level of a language may consult with an
Honors advisor for alternative 3-course sequence options to fulfill the language requirement. Language majors must fulfill the Honors language requirement with an alternate approved 3-course sequence.

Junior Seminar

- HON 301 HONORS JUNIOR SEMINAR IN MULTICULTURALISM

The Honors Program is committed to developing students’ knowledge and cultural awareness so they may respect and learn from difference. Honors students meet the multicultural requirement by completing HON 301, the Junior Seminar in Multiculturalism.

Senior Capstone

- Choose one from below
  - HON 350 HONORS SENIOR SEMINAR
  - HON 351 HONORS SENIOR SEMINAR IN SERVICE LEARNING
  - HON 395 HONORS SENIOR THESIS

Students who choose to complete an Honors Senior Thesis must have their project approved at least one term prior to executing the project. To gain approval for a senior thesis, students must complete an application, including a project proposal signed by a faculty advisor. In keeping with the interdisciplinary nature of the program, the thesis should attempt to move outside the boundaries normally associated with one particular discipline and should be supervised by two readers from different academic fields. While the final product must be a substantial piece of work building on the student's accumulated knowledge and research, specific requirements for each thesis will depend on the nature of the project. See the Director or Associate Director for an application. Students may opt to enroll in HON 300: Honors Research Seminar (a two-credit elective) to receive dedicated guidance as they prepare the thesis project.

Honors students who do not have a statistics or calculus requirement for their major must complete HON 180, Data Analysis and Statistics, before completing the science requirements. Honors students who have a statistics or calculus requirement for their major are waived from HON 180, and the course will be replaced by an open elective.

Grade Requirements

A grade of C- or higher in HON 110 or 111 is required to remain in the Honors Program.

A grade of C- or higher is required to pass the following courses: HON 100, HON 350, HON 351 and HON 395.

Combined Bachelors/ Masters

The TEACH Program provides students the opportunity to complete in five years an undergraduate degree in a core arts and science major and a Master's of Education degree with State of Illinois secondary education teaching certification in a content area related to their major. As a combined degree program of the College of Liberal Arts and Social Sciences, the College of Science and Health, and the College of Education, the Program is collaboratively governed and coordinated by faculty from all 3 units.

The Program is designed to draw on the expertise of LAS and CSH faculty who teach in the majors of English, Mathematics, History, the Sciences, and Social Sciences to ensure strong content knowledge preparation of students and facilitate the transition from being learners of content to teachers of content to diverse adolescent populations. The Program also draws on the expertise of faculty in the COE’s Secondary Education Program and Educational Policy Studies and Research Department to immerse students into essential issues and themes of education and theories and practices of teaching and learning. Such issues as educational inequality, politics of schooling, identity politics, social justice, identity development inside and beyond formal school settings, historical, cognitive, sociocultural, and sociopolitical nature of human development and society are integrated with issues of pedagogical content knowledge, critical pedagogy, constructivist teaching practices, theories of teaching and learning, curriculum development, and professional practice. Ensuring that students understand all these issues is integral to the Program design and delivery and to the preparation of teachers.
The measure of the academic quality of the Program relies on clearly articulated features of exemplary teacher-education programs. These include:

- a "common, clear vision of good teaching that permeates all coursework and clinical experiences...;"
- a "well-defined standard of professional practice and performance...;"
- a "strong core curriculum taught in the context of practice" and including understanding of human development and learning, social and cultural contexts, curriculum assessment, and subject-matter pedagogy;
- an "extended clinical experience" that supports ideas presented in coursework;
- an "extensive use of case methods, teacher research, performance assessments, and portfolio evaluation...;"
- "explicit strategies" to help students confront their own beliefs and assumptions about learning and students and to learn about the experiences of diverse people; and
- "strong relationships, common knowledge, and shared beliefs among school- and university-based faculty."

Students may apply to the Program during the spring of their junior year. They must complete the Junior Year Experiential Course TCH 320, Exploring Teaching in an Urban High School, and meet other application criteria prior to applying. The curriculum of the Program consists of three components:

- Courses necessary to satisfy requirements for a baccalaureate degree in the College of Liberal Arts and Social Sciences or College of Science and Health in one of the following state of Illinois secondary certification content areas: English; History; Math; Sciences (Biology, Chemistry, Environmental Science, or Physics); or Social Sciences.
- A set of five courses that will be taken by students in the Program while they are still undergraduates; three of these will also fulfill graduate degree requirements. These courses will serve as a bridge to the 5th year Master’s coursework.
- A fifth year of graduate courses which, together with the three double-counted courses mentioned above, will satisfy the requirements for a College of Education Master’s in Education and a secondary-education certification in the student’s discipline.

A full description of Program requirements for each content area can be found in the College of Education catalog.

Social and Cultural Foundations in Education Graduate Certificate

The certificate is for students in any field who want to complement their primary degree through interdisciplinary study of the foundations of education and educational policy from a critical perspective.

Course Requirements

The certificate Program requirements include completion of four graduate-level courses from among the following:

- SCG 603 CULTURE AND EDUCATION SEMINAR
- SCG 604 IDENTITY: CONSTRUCTIONS AND NEGOTIATIONS SEMINAR
- SCG 608 IDEOLOGY, POWER AND POLITICS SEMINAR
- SCG 611 PHILOSOPHICAL STUDIES IN EDUCATION, CULTURE AND ETHICS SEMINAR
- SCG 527 GLOBAL ISSUES IN EDUCATION SEMINAR
Admission & Aid

The College of Education offers several graduate programs at the master's and doctoral level as well as licensure and endorsement only programs. Admission to DePaul University College of Education is very competitive. We consider numerous factors in evaluating each applicant, including undergraduate academic performance, graduate academic performance (if applicable), professional work experience, writing ability, potential for leadership, professional and academic recommendations and the applicant's special talents, qualities, interests and socioeconomic and cultural background. No single factor is dispositive.

Personal qualities that demonstrate intellectual depth, high ideals and diligence also are considered, as are economic, societal or educational obstacles that have been successfully overcome. Diversity in background and experience among the members of each entering class is a continuing objective. Having a diverse student body allows us to encourage and foster the exchange of different ideas.

DePaul University has a nondiscriminatory admission policy; it does not discriminate on the basis of race, color, national origin, religion, sex, sexual orientation, age or disability.

General Admission Procedures

Application

You can apply online at: www.depaul.edu/apply. To request information about College of Education graduate programs, including endorsements, approvals and licensure, please email us at edgradadmissions@depaul.edu or call us at (773) 325-4405.

Supporting Credentials

We require official transcripts from all universities, colleges, and junior colleges you have attended. Please request that transcripts and other credentials be sent directly to the Office of Graduate Admission, College of Education, 2400 N. Sheffield, Chicago, IL 60614-2215. We recommend that you request transcripts in sufficient time to meet the programs deadline.

The College of Education graduate programs require additional supporting credentials before an application file is considered complete. Please consult the specific program listing on the College of Education website at http://education.depaul.edu/Admission/GraduateAdmission/AdmissionRequirements.asp to determine what additional materials are required for admission and the deadline by which applications and supporting materials should be submitted.

Application Fee

You can pay the $40 application fee online as part of the online application or send a check or money order payable to DePaul University. Consult the application instructions for specific information about amount of the fee. If paying by check or money order, send it along with your supporting credentials to the Office of Graduate Admission, 2400 N. Sheffield, Chicago, IL 60614-2215. Applications submitted without an application fee will not be processed. The fee is non-refundable.

Application Deadline and Entry Terms

Consult the College website for program-specific information about application deadlines and to which academic terms the program admits new students.

Admission Decisions: The graduate admission office will notify you of your admission decision by letter. Admission applications will be reviewed only after the application and all supporting credentials, along with the application fee, have been submitted.

International Student Admission

Students who require a student visa (I-20) in order to study at DePaul must meet all admission requirements and demonstrate adequate financial support. Applicants educated in a country in which the native language is not officially recognized as English must also submit proof of English proficiency. College of Education programs require a minimum TOEFL score of 590 (paper-based), 243 (computer-based), or 96 with no individual score less than 22 (internet-based). DePaul also accepts the IELTS (International English Language Testing System) with a minimum score of 7.5. However, students who otherwise have a strong overall academic record, but cannot demonstrate the necessary English proficiency, may be admitted conditionally. If granted a conditional admission, an applicant may enroll in DePaul’s English Language Academy (ELA). To formally begin studies in the College of Education, an applicant that has been conditionally admitted must either successfully complete ELA's University Bridge Certificate or otherwise demonstrate the necessary English language proficiency.
The letter of admission and I-20 are issued only after admission. International students are encouraged to complete their applications at least one month prior to any published program deadline, or no later than three months before the start of the term, whichever date comes first to allow for enough time for processing the I-20.

**Applicant for Five-Year B.A./ B.S. to M.Ed Programs**

The five-year B.A./B.S. to M.Ed. program is geared toward current DePaul undergraduate students who have reached junior status (88 or more quarter hours) who have declared Liberal Arts and Science major that will lead to educator licensure (biology, chemistry, English, environment science, history, mathematics, physics or social sciences). Students must have an overall grade point average of 3.0 or higher. If students have transferred to DePaul they must have at least 16 quarter hours completed at DePaul. Students must complete the Graduate College of Education Application for teaching and learning secondary education program, meeting all of the requirements outlined at the time of application. In addition to their application, students are required to submit the five-year B.A./B.S. to M.Ed. supplemental form, available at [http://www/education.depaul.edu](http://www/education.depaul.edu).

**Applicant for Subsequent Teaching Endorsement**

If you hold a valid teaching license in the state of Illinois, you may enroll in a program designed to help you obtain a subsequent teaching endorsement in the following areas: early childhood education, elementary education, secondary education, world languages education, and special education.

In order to be considered for admission, you must submit a completed application as specified by the admission requirements for the teaching and learning program or the special education for licensed teachers program. In addition to the standard application materials, you must also submit a valid Illinois teaching license and a letter from your school principal providing evidence of prior teaching experience and teaching performance. (If you are currently not employed as a teacher, then other evidence of prior teaching experience must be provided.) In addition, evidence of having passed the Illinois Basic Skills Test/Test of Academic Proficiency (TAP) must be submitted by the end of the first quarter of completed course work.

**Non-Degree Applicants**

The College of Education may admit non-degree seeking students who wish to take a course(s) to complete prerequisites for admission, personal enrichment or professional development. To enroll a non-degree student, all you will need to submit is an application and a $40 application fee. Official transcripts are not required for admissions but will be required after the completion of two courses. Please note that course work completed in a non-degree status may or may not be applicable to a degree program and is subject to approval by the advisor and appropriate department chair.

**Readmission Applicants**

If you were previously admitted to DePaul but have been absent for more than one year, you must submit an application form, DePaul transcripts, and transcripts of any courses taken elsewhere during your absence. To use materials from a previous application, you must indicate, in written form, which materials you would like to apply to your new application. If the original application has been destroyed (after an absence of two years), you will be required to resubmit the entire application and all supplemental materials. A $10 application fee is required.

**Deferring Admission**

If you do not enroll in the term to which you were admitted, you may request that your admission be deferred for up to one year after the term to which you were admitted. After one year, you must reapply to the program. Email edgradadmissions@depaul.edu to request a deferral.

**Scholarship Opportunities**

Please subscribe to the COE Advising weekly email to stay informed about COE scholarship opportunities that become available throughout the school year.

Any questions can be sent to coescholarships@depaul.edu.
Double Demon Scholarship

The Double Demon Scholarship is awarded to DePaul alumni and covers 25 percent of tuition for degree, non-degree or select certificate coursework taken at the graduate level. Both full-time and part-time students are eligible and no application is necessary. To learn more, contact the admission office for your college of interest (see listing below).

*Please note: The Double Demon Scholarship cannot be used in conjunction with other DePaul scholarships, waivers or awards. University employees are eligible for other tuition benefits and are not eligible. The scholarship does not cover coursework from the Center for Professional Education (CPE), the Institute for Professional Development (IPD), coursework in a doctoral program or a master of fine arts (MFA), School of Music, the Theatre School, College of Law and a few other select programs.

For other DePaul University scholarships please visit the Admission & Aid section on the DePaul home page.

Financial Aid

For all information regarding Financial Aid, please visit the Financial Aid link under the Admission & Aid section on the DePaul home page.

You may also contact DePaul Central for help with Financial Aid, Student Accounts and Student Records.

For questions regarding financial aid, payment processes, and student records during business hours, please call (312) 362-8610 or e-mail at dpcl@depaul.edu.

Counseling and Special Education

The vision of the Department of Counseling and Special Education is to advance knowledge, model effective practices, as well as promote advocacy both for our professions and for those whom we serve. We prepare professionals based on sound theory-guided and evidence-based practices to be socially responsible leaders who value the dignity and integrity of all people, particularly those who are historically under-served or under-represented.

The Department of Counseling and Special Education is a community of scholars who value the role of the practitioner in all roles of teaching, research and service. Faculty use student-focused methods to enhance engagement of future professionals in learning and applying their knowledge and skills in diverse settings. This commitment to theory-guided and evidence-based practices is also demonstrated through faculty's teaching, scholarship and service endeavors. We seek to foster Vincentian Personalism and provide opportunities for advancement through education.

The Department is comprised of two programs from distinct yet related fields. Each program has the following distinct foci and needs:

Counseling Program

The program in Counseling provides professionals with theoretical frameworks and competencies that prepare them to provide counseling services. Within the Counseling Program, there are three degree programs. These are clinical mental health counseling, school counseling, and college student development. The concentrations in
clinical mental health and school counseling integrate Illinois state requirements for licensure and all concentrations meet national standards for professional practice. School counseling and college student development programs are 72 credit hours and the clinical mental health program is 90 credit hours. All program include a 100-hour practicum and two 300 credit hour internships. These clinical experiences are mandatory and for the school and clinical mental health counseling concentrations are required by the state for licensure. A degree from this program gives rise to career opportunities such as school counseling in elementary, middle, and high schools; counseling in community agencies; counseling in higher education; career counseling through the lifespan; counseling in hospitals or institutional-care settings; group counseling; couples and family counseling; or counseling in private practice. All of the programs emphasize and are designed to foster leadership, advocacy, and social justice.

**Special Education Program**

The Special Education program currently offers three concentrations all leading to either an M.A or an M.Ed. The Special Education for Teachers program prepares currently licensed teachers to work in special education and results in a LBS1 license (K-12). Students in the Special Education for Teachers program may work in a variety of settings as special education teachers. Combining the disciplines of Learning Disabilities and Reading Education, the Reading and Learning Disabilities concentration leads to a Reading Specialist License (K-12) and prepares students to work as reading specialists within school as well as professionals in clinics or private practice. A third concentration, the Special and Elementary Education (Licensure) in Elementary Education and Special Education, is for individuals with a Bachelors Degree in an area other than education. This pre-service program leads to both a LBS1 and an Elementary Education license. Graduates of the Special and Elementary Education (License) program may teach in either general or special education settings.

The following graduate programs are offered at Lincoln Park:

- M.A or M.Ed. Counseling
- M.A or M.Ed. Literacy and Specialized Instruction

**Educational Policy Studies & Research**

The Department of Educational Policy Studies and Research (EPSR) studies the complex dynamic interplay between the individual, society, and sociocultural processes that unfold in multiple educational contexts. It offers courses examining educational theories, institutions, practices, policies, and human development across the life span, and issues in educational research. EPSR represents the foundational disciplines of history, philosophy, psychology, sociology and human development as they are related to the study of education. It also considers debates about investigative methodology in education, and the contribution of research to the understanding of educational and social problems. Accordingly, its courses examine questions of disciplined inquiry, theoretical discourse, educational and social development, inequality, economic and political change, and cultural identity in relation to formal and informal education, in schools and related settings. The study of these issues is informed by an ethical disposition that features a critical examination of assumptions regarding norms and standards, and the quest for social justice. The Department provides disciplinary and research course work for students in other programs of the College of Education, while also preparing students from EPSR for positions in, for example, government, service organizations, private foundations and institutes, adult education and training, cultural organizations, as well as for doctoral work in educational policy studies for a university teaching and research career.

The following graduate programs are offered at Lincoln Park:

- M.A in Social and Cultural Foundations in Education
- M.Ed. in Social and Cultural Foundations in Education
Leadership, Language & Curriculum

The Department of Leadership, Language and Curriculum is a multidisciplinary academic body that aims to fully prepare urban multicultural professional practitioners and leaders to work in a variety of educational and community settings. Practitioners who complete a course of study offered by our department will contribute to their respective fields, balance theory with practice, consider multiple points of view in decision making, promote positive transformations in the settings in which they are engaged, and continue to function as life long learners. The practitioner’s professional role is shaped by ongoing reflection and positive engagement with the individual, the community, and the larger sociopolitical realities. The preparation we offer practitioners demonstrates our commitment to social justice, critical pedagogy, and positive educational transformation. The disciplines in the Department address these themes from a variety of perspectives that include language and culture, curriculum theory and development, and educational leadership in administration and supervision.

The following programs are offered at Lincoln Park:

- M.A or M.Ed. in Bilingual Bicultural Education
- M.A or M.Ed. in Curriculum Studies
- M.A or M.Ed. in Educational Leadership
- Minor in Bilingual Education
- Minor in English as a Second Language
- Minor in English as a Second Language and Bilingual Education

Teacher Education

The Department of Teacher Education prepares Urban Professional Multicultural Educators through an integrated program of courses and field experiences. Programs offered are designed for the preparation of future educators. The programs of study center around our commitment to excellence in teaching in today’s diverse society through the investigation of significant educational issues, inquiry into student learning and effective teaching practices, and the use of technology in teaching and learning. We engage teacher candidates in critical reflection upon their practice throughout the program. We foster engagement in schools through our Partnership Schools and other school and agency affiliations. Upon completion of the program, teacher candidates measure themselves against the values of our guiding conceptual framework through the completion of professional portfolios. Values that are part of this framework include: commitment to social justice, critical pedagogy, and positive educational transformation within the context of a Vincentian personalism that honors the dignity of each person.

The program includes five distinctive features:

1. Becoming a teacher is viewed as a developmental process continuing at least through the first year of teaching;
2. Multiculturalism is infused throughout the curriculum;
3. Field experiences are an integral part of the curriculum;
4. Students are exposed to a variety of educational theories;
5. The program includes a research component as a basis for further professional development.
Doctoral Program

The primary, though perhaps not the only audience for this Ed.D. program consists of educational professionals who wish to improve the quality of their work in their current roles or to prepare themselves for new roles. This Ed.D. program is uniquely designed to link theory with practice and is not based on traditional assumptions about the relationships of theory with practice or on conventional notions about the status of practitioners and theorists. To be a practitioner is to make decisions about what to do and to take action; but professional practitioners — in education as in other areas — make reasonable decisions and act responsibly and ethically in the light of theoretical and professional knowledge.

- Professional educators are leaders as well as managers; they are not limited to making decisions according to rule or “by the book.” They must use discretion and judgment as they seek to find the most defensible course of action in specific, complicated, and perhaps idiosyncratic circumstances. These situations are not merely instances of abstract concepts.
- Although decisions are made in the light of theoretical knowledge, theoretical knowledge cannot be applied to practice in the same way as principles are applied to cases. No single theory is able to encompass the complexities of all aspects of learning or schooling. Professional educators understand the principles and terms that characterize and limit a variety of theories and can select amongst them in order to better understand the situations in which they are involved.
- Decisions also are made in the light of professional knowledge, learned on the job as well as from more formal sources. Professional educators can articulate the informal, often tacit knowledge that they develop from practice so that it engages with and modifies the more formal theories learned from other sources.
- Professional educators not only make decisions, they act upon them responsibly. They examine the value commitments implicit in their actions; they question the appropriateness of the ends that they seek; they connect their educational contexts to broader social contexts; and they assess the effects of their actions on the achievements, dispositions, and propensities of students, colleagues and community members.

The following graduate programs are offered at Lincoln Park:

- Ed.D. in Curriculum Studies
- Ed.D. in Educational Leadership
- Ed.D. in Early Childhood Education

Licensure and Endorsements

The College of Education offers a variety of licensure and endorsement programs for current and aspiring teachers, counselors and education specialists and leaders who are interested in furthering their professional development and enhancing their credentials.

Licensure

The Illinois State Board of Education (ISBE) issues educator credentials in the State of Illinois. Individuals must fulfill specific requirements in order to receive an educator license from ISBE. One of those requirements is the completion of an ISBE approved program. DePaul University’s College of Education has many ISBE approved programs which lead to the Professional Educator Licensure (PEL).

Individuals who successfully complete an ISBE approved program leading to a PEL will also receive an endorsement in the education area and grade range in which he or she studied. For example, an individual completing the Elementary Education program will be eligible to receive the Professional Educator License (PEL) with the Elementary Education (Self Contained General Education) endorsement for grades 1-6.
Early Childhood Licensure

Admission Requirements

To be eligible for the Early Childhood Education Licensure program, students must hold a bachelor’s degree from an accredited college or university.

To apply, please submit the following materials to the Office of Graduate Admission:

- A completed College of Education graduate application
- Application fee ($40)
- One official transcript from each college and/or university attended
- Two letters of recommendation from professors or employer
- Resume
- A brief statement that explains your reasons for wanting to enter the Early Childhood Education program at DePaul and discusses your potential for becoming a teacher.

Course Requirements

Pre-Education Introductory Courses: 12 quarter hours required

- SCG 404 CHILD GROWTH AND DEVELOPMENT
- T&L 421 CHILD AND FAMILY IN THE URBAN COMMUNITY
- T&L 406 LANGUAGE DEVELOPMENT IN EARLY CHILDHOOD (BIRTH TO 8)

Advanced Standing Courses: 36 quarter hours required

- T&L 411 ASSESSMENT IN EARLY CHILDHOOD INCLUSIVE SETTINGS
- T&L 420 MATH AND SCIENCE IN EARLY CHILDHOOD
- T&L 423 FUNCTIONAL BEHAVIOR ASSESSMENT: INTERVENTION AND SUPPORT IN EARLY CHILDHOOD
- T&L 427 YOUNG EXCEPTIONAL CHILD: METHODS AND CHARACTERISTICS
- T&L 432 EARLY CHILDHOOD CURRICULUM STRATEGIES AND PHILOSOPHY (BIRTH-8)
- T&L 434 LITERACY, LITERATURE, & THE YOUNG CHILD
- SCG 410 INTRODUCTION TO RESEARCH: PURPOSES, ISSUES, AND METHODOLOGIES
- T&L 481 INTERNSHIP IN PRESCHOOL SETTING (75 CLOCK HOURS OF SUPERVISED EXPERIENCE) (2qh)
- T&L 482 INTERNSHIP IN PRIMARY SETTING (75 CLOCK HOURS OF SUPERVISED EXPERIENCE) (2qh)
- One course from the following list:
  - SCG 408 EDUCATION AND SOCIETY
  - SCG 409 SOCIOLOGY OF EDUCATION
  - SCG 411 PHILOSOPHY OF EDUCATION

Health, Safety and Child Nutrition Requirement

Candidates should be prepared to document course or other experience that shows they meet the knowledge and skills to provide experiences for young, which appreciates the interrelationships among child, family and the areas of health, safety and nutrition. Candidates should demonstrate comprehension of the issues of health, safety and nutrition that affect young children from the ages of birth through age 8. In addition, candidates are expected to demonstrate understanding of cultural issues and special needs of children with health impairments. Finally candidates should be familiar with the knowledge and application of practices that promote good nutrition, dental health, physical, social and emotional well-being of young children.

- Can be completed by taking T&L 615 SPECIAL TOPICS IN TEACHING AND LEARNING: CHILD HEALTH SAFETY & NUTRITION, or a transferred equivalent.

Student Teaching: 8 quarter hours required
Registration in student teaching requires completion of all requirements and procedures listed in the college core section.

- T&L 595 EARLY CHILDHOOD STUDENT TEACHING (6 hours, grade of B- or better required)
- T&L 596 EARLY CHILDHOOD STUDENT TEACHING SEMINAR (2 hours, grade of C or better required)

**Licensure Tests**

All individuals licensed by the Illinois State Board of Education (ISBE) are required to complete licensure tests specific to their teaching license. Early Childhood majors must complete the following tests:

- Test of Academic Proficiency (TAP) (test #400) - assesses knowledge of reading comprehension, language arts, writing, and math. Test is required to qualify for Advanced Standing. *Check with your advisor about qualifying for a waiver with acceptable ACT or SAT test scores.*
- Early Childhood Content Area Test (test #107) – assesses knowledge of language and literacy development, learning across the curriculum, diversity, collaboration, and professionalism in the early childhood program. Test is required before Student Teaching (deadlines apply).
- EdTPA - assessment conducted during the student teaching experience including video clips of instruction, lesson plans, student work samples, analysis of student learning and reflective commentaries. Students will submit an electronic portfolio to an outside agency for independent evaluation and a fee will be imposed by that agency as part of the assessment.

**Internships & Other Field Experiences**

Each student seeking licensure from the College of Education/Professional Education Unit must complete supervised field experiences in appropriate settings in conjunction with education courses. The field experiences includes, two internships (T&L 481 INTERNSHIP IN PRESCHOOL SETTING (75 CLOCK HOURS OF SUPERVISED EXPERIENCE) and T&L 482 INTERNSHIP IN PRIMARY SETTING (75 CLOCK HOURS OF SUPERVISED EXPERIENCE) (K-2). Each internship requires students to be placed in the field for 75 hours in the quarter in which the internship is offered. Internships are associated with theory courses and should be taken concurrently or soon after successful completion of the related theory courses. In addition, students will complete 15 hours in a special education setting, and 15 hours in an infant/toddler setting. All field experiences must be completed prior to final approval for student teaching. Field experience hours should be entered by the student into the FEDS system when completing courses. FEDS entry of these clinical hours is not required. For details on requirements, expectations, documentation, & courses in your program that require hours, visit the College of Education website.

**Additional Requirements**

Please also view the college core requirements under the MA or MED for Early Childhood for additional requirements. Note that the Early Childhood Education Licensure program listed above does not lead to a degree.

**Elementary Licensure**

The requirements below are those approved by the Illinois State Board of Education December 2015.

**Admission Requirements**

To be eligible for the Elementary Education Licensure program, students must hold a bachelor's degree from an accredited college or university.

To apply, please submit the following materials to the Office of Graduate Admission:

- A completed College of Education graduate application
- Application fee ($40)
- One official transcript from each college and/or university attended
- Two letters of recommendation from professors or employer
- Resume
A brief statement which explains your reasons for wanting to enter the Elementary or Middle School program at DePaul and discusses your potential for becoming a teacher.

**Content Area Prerequisites**

Elementary Education teachers need to have an understanding of the subjects taught in classrooms at the Elementary level. DePaul's program requires that students in the Elementary program have a minimum of one college-level course in each of the following areas:

- mathematics*
- physical science
- life science
- earth and space science
- history
- geography
- political science/civics
- economics

These courses may be taken at the undergraduate level and may have been included in the student's bachelor's degree program. Elementary Education students will be evaluated by an academic advisor after admission to determine if additional coursework is needed. Completion of content area requirements are not prerequisites for admission, however coursework must be completed before student teaching. It is strongly encouraged that applicants meet with an advisor after admission and prior to taking content courses.

*DePaul alumni that have taken LSP 120 or ISP 120 can receive credit towards the math requirement.

**Course Requirements**

Pre-Education Introductory Courses: 17 quarter hours required

- T&L 404 INTRODUCTION TO ELEMENTARY EDUCATION
- SCG 403 HUMAN DEVELOPMENT AND LEARNING: ELEMENTARY
- T&L 583 FIELD EXPERIENCE LAB
- T&L 418 LEARNING THROUGH THE ARTS
- Choose one course from the following list:
  - SCG 408 EDUCATION AND SOCIETY
  - SCG 409 SOCIOLOGY OF EDUCATION
  - SCG 411 PHILOSOPHY OF EDUCATION

Advanced Standing Courses: 35 quarter hours required

- T&L 412 EMERGING READING AND LANGUAGE ARTS
- T&L 416 TEACHING AND LEARNING ELEMENTARY SCHOOL MATHEMATICS
- T&L 583 FIELD EXPERIENCE LAB
- LSI 446 PSYCHOLOGY AND EDUCATION OF THE EXCEPTIONAL CHILD
- T&L 413 READING/LANGUAGE ARTS IN THE INTERMEDIATE GRADES
- T&L 583 FIELD EXPERIENCE LAB (public school setting required)
- T&L 415 TEACHING AND LEARNING ELEMENTARY SCHOOL SCIENCE
- T&L 419 CURRICULUM AND STRATEGIES: SOCIAL STUDIES
- T&L 584 PRE-STUDENT TEACHING FIELD EXPERIENCE
- T&L 422 CLASSROOM ASSESSMENT
- BBE 400 TEACHING ELEMENTARY ENGLISH LANGUAGE LEARNERS: THEORY, POLICY AND PRACTICE

**Student Teaching: 8 quarter hours required**

Registration in student teaching requires completion of all requirements and procedures listed in the college core section. EDU 95 indicates to the Illinois State Board of Education that all field experience hours are complete.

- T&L 585 ELEMENTARY STUDENT TEACHING (6 hours, grade of B- or better required)
- T&L 586 ELEMENTARY STUDENT TEACHING SEMINAR (2 hours, grade of C or better required)
- EDU 95 CLINICAL EXPERIENCE WITH CHILDREN AND YOUTH (non-credit, non-tuition, PA grade required)

**Licensure Tests**

All individuals licensed by the Illinois State Board of Education (ISBE) are required to complete licensure tests
specific to their teaching license. Elementary majors must complete the following tests:

- **Test of Academic Proficiency (TAP)** (test #400) - assesses knowledge of reading comprehension, language arts, writing, and math. Test is required to qualify for Advanced Standing. *Check with your advisor about qualifying for a waiver with acceptable ACT or SAT test scores.*
- **Elementary/Middle Grades Content Area Test** (test #110) – assesses knowledge of language arts and literacy, mathematics, science, social sciences, the arts, health, and physical education. Test is required before Student Teaching (deadlines apply).
- **EdTPA** - assessment conducted during the student teaching experience including video clips of instruction, lesson plans, student work samples, analysis of student learning and reflective commentaries. Students will submit an electronic portfolio to an outside agency for independent evaluation and a fee will be imposed by that agency as part of the assessment.

**Field Experiences**

Each student seeking licensure from the College of Education/Professional Education Unit must complete supervised field experiences in appropriate lab settings in conjunction with education courses. Students are required to register for one lab for designated paired course. For example, during the first quarter of the program students must register for T&L 404 and SCG 403 plus one field experience lab. During the quarter when students take T&L 413 and LSI 446, a public school that services students with special needs is required. The field experiences must include a variety of grade levels, multicultural experiences, and a minimum of 15 hours in special education settings. All field experiences must be completed prior to final approval for student teaching. Field experience hours should be entered by the student into the FEDS system when completing courses with field experience requirements. For details on requirements, expectations, documentation, & courses in your program that require hours, visit the College of Education website.

**Additional Requirements**

Please also view the college core requirements under the MA or MED for Elementary Education for additional requirements. Note that the Elementary Education Licensure program listed above does not lead to a degree.

**Special Education for Teachers (Learning Behavior Specialist 1 PreK-21 years of age)**

**Admission Requirements**

To be eligible for the Special Education for Teachers (Learning Behavior Specialist 1) licensure program, students must hold a bachelor’s degree from an accredited college or university and a valid Illinois Professional Educator License (PEL).

To apply, please submit the following materials to the Office of Graduate Admission:

- A completed College of Education graduate application
- Application fee ($40)
- Copy of a valid Illinois teaching license
- A bachelor’s degree conferred by an accredited, recognized institution
- A previous grade point average of 2.75 or above on a 4.0 scale
- Two letters of reference, one of which must be from persons familiar with your academic work
- One official transcript from each college or university attended
- Personal statement (see below)*
- Resume or curriculum vitae showing evidence of adequate background for the program.
- The admission process also may include an interview with program faculty.

*Personal statement

Write a personal statement that discusses your future goals and your thoughts about your career as a special educator. As part of your statement please consider the following: the possible tasks/roles of a special education...
teacher are multiple and include inclusion specialist, team teacher with general educators, specialized instruction for exceptional students, advocate for exceptional students, response to intervention (RTI) coordinator, case manager or provider of staff development. From your perspective, rank order the tasks/roles and discuss your rationale for the top ranked roles.

Course Requirements

LBS1 PreK-21 Endorsement Requirements (40 hours)

Special Education Core Courses: 32 hours required, grade of B+ or better required

- LSI 402 INSTRUCTION AND DIFFERENTIATION IN SPECIAL EDUCATION
- LSI 403 CLASSROOM AND BEHAVIOR MANAGEMENT IN SPECIAL EDUCATION
- LSI 405 TEACHING LITERACY TO EXCEPTIONAL LEARNERS
- LSI 409 TEACHING STUDENTS WITH SIGNIFICANT DISABILITIES
- LSI 410 TEACHING MATHEMATICS TO EXCEPTIONAL LEARNERS
- LSI 421 FORMAL ASSESSMENT IN SPECIAL EDUCATION
- LSI 440 SURVEY OF EXCEPTIONAL LEARNERS: PSYCHOLOGY AND EDUCATION
- LSI 457 SEMINAR AND RESEARCH IN SPECIAL EDUCATION

Clinical Experience

The program requires two summer practicum experiences. Each practicum involves six full weeks of intensive supervised field experience in a cooperating school that operates an extended school year program. Candidates must apply for each practicum, and upon approval they are placed in appropriate summer practicum sites by the program. Practicum sites may also screen candidates prior to accepting them for placement. Candidates who will be admitted to the practicum will assume full teaching responsibility and will have weekly opportunities for feedback and discussion of issues and problems encountered. A grade of B+ or better is required for eligibility to participate in each summer practicum.

Practicum Courses: 8 hours required, grade of B+ or better required

- LSI 552 PRACTICUM EXPERIENCE WITH HIGH INCIDENCE DISABILITIES
- LSI 553 PRACTICUM EXPERIENCE WITH LOW INCIDENCE DISABILITIES

Licensure Tests

All individuals licensed by the Illinois State Board of Education (ISBE) are required to complete licensure tests specific to their teaching license.

LBS1 PreK-21 Endorsement students must complete the following tests:

- Test of Academic Proficiency (TAP) (test #400) - assesses knowledge of reading comprehension, language arts, writing, and math. Test is required to qualify for Advanced Standing. *Check with your advisor about qualifying for a waiver with acceptable ACT or SAT test scores.
- LBS1 Content Area Test (test #155) – assesses knowledge of working with students with disabilities and special needs. Test is required before Student Teaching (deadlines apply)
- Special Education General Curriculum Test (test #163) – assesses knowledge of reading & literacy, mathematics, natural science, and social science. Test is required for admission to Student Teaching.

Candidates who are conditionally admitted with an out-of-state (OOS) teaching license are required to transfer their license into Illinois, and therefore may also be required to take additional licensure tests. Students should work directly with ISBE to fulfill outstanding test requirements. These additional licensure tests may include the following:

- Test of Academic Proficiency (TAP) (test #400) - assesses knowledge of reading comprehension, language arts, writing, and math.
- EdTPA – an electronic portfolio that includes video clips of instruction, lesson plans, student work samples, analysis of student learning and reflective commentaries. Usually completed during pre-service student teaching experience.

Registration, testing schedules, and fees for ISBE licensure tests are available on the ISBE website.

Note that the LBS1 Licensure program listed above does not lead to a degree.
Principal Licensure

Admission Requirements

To be eligible for the Principal Preparation licensure program, students must hold a master’s degree from an accredited college or university. They must have a GPA of 2.75 or higher at the undergraduate level and a 3.25 or higher at the graduate level. Students must also possess at least two years of fulltime successful teaching experience, hold a valid Illinois teaching license, and possess proof of passing the basic skills or test of academic proficiency. At the time of program completion, students must have at least 4 years of full-time, successful teaching experience to apply for licensure.

To apply, please submit the following items to The Office of Graduate Admission:

- A completed graduate application
- Application fee ($40.00)
- A copy of valid Illinois teaching license
- Proof of passing Basic Skills Test or TAP Exam and two Principal content-area tests
- One official transcript from all colleges and/or universities attended
- Letters from district office recommending entrance into the principal preparation program
- Four letters of recommendation (two from a supervisor and two from colleagues)
- Resume showing evidence of adequate background for the program
- Statement of purpose indicating why you want to be a principal

Upon initial review, the process will include a required interview. Candidates will be expected to complete an on-site writing sample during the interview and submit a teaching portfolio.

Course Requirements

Licensure Only (Public School Strand)

The principal licensure program at DePaul University is an approved Illinois State Board of Education (ISBE) program. It is a rigorous program preparing principals and assistant principals for work service in public and private schools in the state of Illinois.

This is a 44 quarter hour program, which leads to the State of Illinois’ principal licensure.

Educational Leadership Courses: 36 quarter hours required, grade of C or better required in all courses

- A&S 491 EFFECTIVE LEADERSHIP OF SCHOOLS
- A&S 492 THE PRINCIPALSHIP
- A&S 493 DATA DRIVEN DECISION MAKING
- A&S 494 SCHOOL FINANCE
- A&S 495 SCHOOL LAW
- A&S 496 STAKEHOLDER RELATIONSHIPS
- A&S 498 INSTRUCTIONAL SUPERVISION AND SUPPORT
- A&S 602 PRINCIPAL LICENSURE INTERNSHIP I (2 quarter hours)
- A&S 603 PRINCIPAL LICENSURE INTERNSHIP II (2 quarter hours)
- A&S 608 CAPSTONE IN EDUCATIONAL LEADERSHIP

Curriculum Studies Courses: 8 quarter hours required, grade of C or better required in all courses

- CS 492 CREATING AND SUSTAINING PROFESSIONAL LEARNING COMMUNITIES
- CS 493 CURRICULUM DEVELOPMENT AND ASSESSMENT IN K-12 SCHOOLS

Specific requirements for entrance into the principal licensure program may be obtained from the office of graduate admissions or the LLC department office.

Individuals seeking the principal licensure must:
1. Complete an approved principal licensure program at an Illinois institution
2. Complete all state-mandated training and examinations
3. Have successfully completed the internship experiences
4. Hold a Master's degree

Upon successful completion of all principal licensure program requirements and any additional requirements, students must apply for their license. Students are to work with the College of Education's Licensure Officer when applying for the license.

Note: Courses in this program leading to the principal licensure are designed for practicing educators and are not open to students and any other program without the specific permission of the educational leadership program director.

Gainful Employment Disclosure

This graduate certificate program is approved as a Gainful Employment Program through the US Department of Education and is, therefore, eligible for Federal Student Aid. Disclosure Statements about occupations, on-time graduation rate, tuition and fees, and median loan debt for this program can be found at: http://core.depaul.edu/gedt/principal/gedt.html.

Principal Licensure with a Concentration in Catholic Leadership

Admission Requirements

To be eligible for the Principal Preparation licensure program with Catholic Leadership Concentration, students must hold a master’s degree from an accredited college or university. They must have a GPA of 2.75 or higher at the undergraduate level and a 3.25 or higher at the graduate level. Students must also possess at least two years of fulltime successful teaching experience, hold a valid Illinois teaching license, and possess proof of passing the basic skills or test of academic proficiency. At the time of program completion, students must have at least 4 years of full-time, successful teaching experience to apply for licensure.

To apply, please submit the following items to The Office of Graduate Admission:

- A completed graduate application
- Application fee ($40.00)
- A copy of valid Illinois teaching license
- Proof of passing Basic Skills Test or TAP Exam
- One official transcript from all colleges and/or universities attended
- Letters from district office recommending entrance into the principal preparation program
- Four letters of recommendation (two from a supervisor and two from colleagues)
- Resume showing evidence of adequate background for the program
- Statement of purpose indicating why you want to be a principal

Course Requirements

Licensure Only (Catholic School strand)

The principal licensure program at DePaul University is an approved Illinois State Board of Education (ISBE) program. It is a rigorous program preparing principals and assistant principals for work service in public and private schools in the state of Illinois.

This is a 48 quarter hour program that prepares candidates for state licensure and specifically prepares candidates for the Principalship or Assistant Principalship in Catholic schools.
**Educational Leadership Courses: 40 quarter hours required, grade of C or better required in all courses**

- A&S 491 EFFECTIVE LEADERSHIP OF SCHOOLS
- A&S 493 DATA DRIVEN DECISION MAKING
- A&S 494 SCHOOL FINANCE
- A&S 495 SCHOOL LAW
- A&S 496 STAKEHOLDER RELATIONSHIPS
- A&S 498 INSTRUCTIONAL SUPERVISION AND SUPPORT
- A&S 570 HISTORICAL, PHILOSOPHICAL AND THEOLOGICAL FOUNDATIONS OF CATHOLIC SCHOOL LEADERSHIP
- A&S 571 SPIRITUAL AND ADMINISTRATIVE LEADERSHIP IN CATHOLIC SCHOOLS

---

**Reading Specialist (K-12) Licensure**

**Admission Requirements**

To be eligible for the Reading Specialist endorsement only program, students must hold a bachelor's degree from an accredited college or university and a valid Illinois Professional Educator License (PEL).

To apply, please submit the following materials to the Office of Graduate Admission:

- A completed graduate application
Application fee ($40.00)
Copy of a valid Illinois teacher license
A bachelor's degree conferred by an accredited, recognized institution
A previous grade point average of 2.75 or above on a 4.0 scale
Two letters of reference, one of which must be from persons familiar with your academic work
One official transcript from each college or university attended
Resume or curriculum vitae showing evidence of adequate background for the program
The admission process also may include an interview with program faculty

Note: The Reading Specialist Endorsement requires a previously completed Master's degree.

Course Requirements

Reading Specialist Core Courses: 20 quarter hours required, grade of C or better required.

- LSI 430 INTRODUCTION TO READING ASSESSMENT
- LSI 431 FOUNDATIONS OF LITERACY: ASSESSMENT AND INSTRUCTION I
- LSI 432 DEVELOPING LITERACY: ASSESSMENT AND INSTRUCTION II
- LSI 433 ASSESSMENT AND DIAGNOSTIC TEACHING OF READING
- LSI 438 LITERATURE-BASED AND CONTENT AREA LITERACY INSTRUCTION

Leadership Courses: 8 quarter hours required, grade of C or better required.

- LSI 435 LITERACY PROGRAMS: CURRICULUM AND COLLABORATION
- LSI 437 LEADERSHIP AND PROFESSIONAL DEVELOPMENT IN LITERACY

Clinical Experience

The practicum courses provide an opportunity to apply knowledge from course work to teaching struggling learners and those with disabilities. In these courses, students provide diagnostic and remedial services to children and adolescents from the Chicago area under the supervision of program faculty. These courses are offered in an on-campus facility.

Practicum Courses: 12 quarter hours required, grade of C or better

- LSI 542 PRACTICUM IN LITERACY ASSESSMENT
- LSI 543 PRACTICUM IN LITERACY INSTRUCTION AND ASSESSMENT
- LSI 544 PRACTICUM IN LITERACY INSTRUCTION, ASSESSMENT, AND COLLABORATION

Licensure Tests

All individuals licensed by the Illinois State Board of Education (ISBE) are required to complete licensure tests specific to their teaching license.

Reading Specialist students must complete the following tests:

- Test of Academic Proficiency (TAP) (test #400) - assesses knowledge of reading comprehension, language arts, writing, and math. Test is required to qualify for Advanced Standing. *Check with your advisor about qualifying for a waiver with acceptable ACT or SAT test scores.
- Reading Specialist Content Area Test (test #176) – assesses knowledge of language, reading, and literacy.

School Counselor Licensure

The Counseling program's School Counseling concentration is an Illinois State Board of Education (ISBE) approved program for the School Counselor endorsement on an Illinois Professional Educator License. ISBE states the following guidelines:

Individuals seeking the School Counselor endorsement must:
1. complete an approved school counseling program at an Illinois institution
2. hold a Master’s degree in school counseling; counseling or a related field; or an educational field
3. pass the Basic Skills or Test of Academic Proficiency (TAP) and School Counselor content-area tests
4. hold or be qualified to hold a teaching certificate OR complete coursework addressing required knowledge as part of an approved program

**Admission Requirement**

To be eligible for the School Counselor only program, students must hold a bachelor’s degree from an accredited college or university. It is recommended that you have at least one year of working experience.

To apply, please submit the following materials to the Office of Graduate Admission:

- A completed application
- Application fee ($40)
- One official transcript from each college and/or university attended
- Three letters of recommendation: one from a professor addressing your academic ability, one from an employer, and the third from either another professor or employer
- Resume
- A personal statement (see below for more information)

The admission process also may include an interview with program faculty.

**Personal Statement**

Please answer all of the following questions. Your entire response should not exceed 1,500 words (or approximately 300 words per question).

1. Discuss why you want to enter the counseling field. Demonstrate in your response that you have researched the field and have a basic understanding of what counseling professionals do.
2. Given what you have researched about the profession, discuss your short-term and long-term professional goals should you eventually graduate from our program. Integrate into your response why DePaul’s counseling program will help you achieve your goals.
3. Discuss why self-awareness, self reflection and self-care are important skills for counselors. Explain ways in which you would attend to all of these should you be a student in our program.
4. Explain how your personal values and ethical beliefs will be an asset to you as a future counselor and explain any challenges you may face in future practice. Provide concrete examples from your personal or professional life to help illustrate your points.
5. Discuss your understanding of “multicultural proficiency” and “social justice.” Explain how you believe these play a role in the work of counseling professionals as well as how these fit with your own beliefs and values. Provide concrete examples from your personal or professional life to help illustrate your points.

**Course Requirements**

**Counseling Courses: 52-56* quarter hours required, grade of B- or better required**

- CSL 451 LEGAL AND ETHICAL ISSUES IN COUNSELING
- CSL 452 INTRODUCTION TO THE COUNSELING PROFESSION
- CSL 458 GROUP COUNSELING
- CSL 461 TESTING AND APPRAISAL
- CSL 467 COUNSELING THEORIES
- CSL 475 COLLEGE AND CAREER READINESS COUNSELING FOR SCHOOL COUNSELORS
- CSL 489 PSYCHOPATHOLOGY
- CSL 501 COUNSELING SKILLS
- CSL 510 MULTICULTURAL COUNSELING
- CSL 514 CRISIS INTERVENTION FOR SCHOOL COUNSELING
- CSL 519 SPECIAL EDUCATION: LEGAL AND PROFESSIONAL ISSUES FOR SCHOOL COUNSELORS
- CSL 520 COUNSELING CHILDREN AND ADOLESCENTS
- CSL 521 CONTEXTUAL DIMENSIONS OF SCHOOL COUNSELING
- CSL 522 DELIVERY OF COMPREHENSIVE DEVELOPMENTAL SCHOOL COUNSELING PROGRAMS
- CSL 523 LEARNING AND CLASSROOM MANAGEMENT FOR SCHOOL COUNSELORS (required only for students without a teaching certificate)
Social and Cultural Studies Courses: 8 quarter hours required, grade of B- or better required

- SCG 401 ADVANCED LIFESPAN DEVELOPMENT
- SCG 410 INTRODUCTION TO RESEARCH: PURPOSES, ISSUES, AND METHODOLOGIES

Clinical Experience

Students complete their Clinical Experience during the last year in the program. The Clinical Experience Courses include the Practicum, Internship in Counseling I, and Internship in Counseling II. Students are enrolled in the Practicum course Autumn Quarter; Internship in Counseling I Winter Quarter; Internship in Counseling II Spring Quarter. Students must complete a formal application process to participate in the Clinical Experience courses. This includes attending a clinical orientation a full year before beginning the Clinical Experience, submitting an initial application, and securing a placement site. Consult academic advisor for additional information on application and course enrollment process.

Clinical Experience Courses: 12 quarter hours required, grade of B or better required

Prerequisites: All courses with the exception of CSL 512 must be completed prior to being enrolled in the Practicum courses.

- CSL 552 PRACTICUM IN COUNSELING
- CSL 553 INTERNSHIP IN COUNSELING I (300 clock hours)
- CSL 554 INTERNSHIP IN COUNSELING II (300 clock hours)

Upon completion of the School Counseling concentration’s coursework and the additional State requirements, students must apply for their certificate. Students are to work with the College of Education’s Licensure Officer when applying for the license/endorsement.

Licensure Tests

All individuals licensed by the Illinois State Board of Education (ISBE) are required to complete licensure tests specific to their professional license area.

School Counseling students must complete the following tests:

- Test of Academic Proficiency (TAP) (test #400) - assesses knowledge of reading comprehension, language arts, writing, and math. *Students should consult with an advisor about qualifying for a waiver with acceptable ACT or SAT test scores.
- School Counseling Content Area (test #181) – assesses knowledge of student development, assessment, the school environment and the school counseling profession.

Gainful Employment Disclosure

This graduate certificate program is approved as a Gainful Employment Program through the US Department of Education and is, therefore, eligible for Federal Student Aid. Disclosure Statements about occupations, on-time graduation rate, tuition and fees, and median loan debt for this program can be found at: http://core.depaul.edu/gedt/school-counselor/gedt.html.
Secondary Education Licensure

Admission Requirements

To be eligible for the Secondary Education Licensure program, students must hold a bachelor’s degree from an accredited college or university.

To apply, please submit the following materials to the Office of Graduate Admission:

- A completed College of Education graduate application
- Application fee ($40)
- One official transcript from each college and/or university attended
- Two letters of recommendation from professors or employer
- Resume
- A brief statement which explains your reasons for wanting to enter the Secondary Education program at DePaul and discusses your potential for becoming a teacher.

Course Requirements

Pre-Education Introductory Courses: 12 quarter hours required

- T&L 425 CURRICULUM AND INSTRUCTION IN SECONDARY EDUCATION
- SCG 406 HUMAN DEVELOPMENT AND LEARNING: SECONDARY
- One course from the following list:
  - SCG 408 EDUCATION AND SOCIETY
  - SCG 409 SOCIOLOGY OF EDUCATION
  - SCG 411 PHILOSOPHY OF EDUCATION

Advanced Standing Courses: 20 quarter hours required

- LSI 446 PSYCHOLOGY AND EDUCATION OF THE EXCEPTIONAL CHILD
- BBE 501 TEACHING ADOLESCENT ENGLISH LANGUAGE LEARNERS AND DIALECT SPEAKERS ACROSS THE CURRICULUM
- SCG 451 DOING CRITICAL PRACTITIONER RESEARCH IN EDUCATION (Taken in conjunction with specified methods courses)
- T&L 525 READING, WRITING, AND COMMUNICATING ACROSS THE CURRICULUM
- TCH 495 ASSESSMENT ISSUES IN SECONDARY EDUCATION

Special Methods Courses: 8 quarter hours required

Complete the course(s) listed that correspond to your content area

Biology

- TCH 474 TEACHING THE SCIENCES IN THE HIGH SCHOOL 1
- TCH 484 TEACHING THE SCIENCES IN THE HIGH SCHOOL 2

Chemistry

- TCH 474 TEACHING THE SCIENCES IN THE HIGH SCHOOL 1
- TCH 484 TEACHING THE SCIENCES IN THE HIGH SCHOOL 2

Environmental Science

- TCH 474 TEACHING THE SCIENCES IN THE HIGH SCHOOL 1
- TCH 484 TEACHING THE SCIENCES IN THE HIGH SCHOOL 2

English

- TCH 471 TEACHING ENGLISH IN THE HIGH SCHOOL 1
- TCH 481 TEACHING ENGLISH IN THE HIGH SCHOOL 2

History

- TCH 472 TEACHING HISTORY AND THE SOCIAL SCIENCES IN THE HIGH SCHOOL 1
- TCH 482 TEACHING HISTORY AND THE SOCIAL SCIENCES IN THE HIGH SCHOOL 2

Math
Student Teaching: 8 quarter hours required

Registration in student teaching requires completion of all requirements and procedures listed in the college core section. EDU 95 indicates to the Illinois State Board of Education that all field experience hours are complete.

- T&L 590 SECONDARY STUDENT TEACHING (6 hours, grade of B- or better required)
- T&L 591 SECONDARY STUDENT TEACHING SEMINAR (2 hours, grade of C or better required)
- EDU 95 CLINICAL EXPERIENCE WITH CHILDREN AND YOUTH (non-credit, non-tuition, PA grade required)

Recommended/Optional Course

SCG 439 is required for middle school endorsements but is not required for the licensee. If taking SCG 439 for endorsement purposes, a grade of C or better is required.

- SCG 439 PHILOSOPHY AND PSYCHOLOGY OF YOUTH AND MIDDLE LEVEL EDUCATION

Content Area Courses

All students need to have sufficient knowledge of the subject they will be teaching. Illinois State Board of Education requires a minimum of 48 quarter hours (32 semester hours) in the content area subject. Students should meet with their designated Content Area advisor at the beginning of their program for an official written content evaluation and provide a copy to your academic advisor. Requirements can be satisfied by undergraduate coursework or courses taken elsewhere. Content courses must be completed before student teaching.

Requirements for Secondary Education Biology

Note: Effective for all individuals applying for licensure beginning February 1, 2012, all coursework in the content area must earn a grade of C or better.

- College Biology I
- College Biology II
- Ecology
- Cell Biology
- Physiology
- Genetics
- Molecular Biology
- Biology Elective
- Biology Elective (with lab)
- Biology Elective (with lab)
- College Algebra or Calculus I
- College Chemistry I
- College Chemistry II
- General Physics
- College Environmental Science or Earth and Space Science or Astronomy

Requirements for Secondary Education Chemistry

Note: Effective for all individuals applying for licensure beginning February 1, 2012, all coursework in the content area must earn a grade of C or better.
Chemistry Core: 36 quarter hours required, grade of C or better required
- General Chemistry I
- General Chemistry II
- Organic Chemistry I
- Organic Chemistry II
- Analytical Chemistry
- Physical Chemistry I
- Biochemistry
- Inorganic Chemistry
- Chemistry Elective I
- Chemistry Elective (with lab)
- Chemistry Elective (with lab)
- Calculus I
- Applied Probability and Statistics or Calculus II
- College Physics
- College Biology
- College Environmental Science or Earth and Space Science or Astronomy

Requirements for Secondary Education English
All coursework in the content area must earn a grade of C or better and a minimum of 18 quarter hours (12 semester hours) must be coursework at an undergraduate upper level or graduate level.
- 1 Reading Poetry course
- 1 Shakespeare course
- 1 Literary Research and Writing/Reading Prose course
- 2 British Literature courses
- 1 Romanticism in American Literature course
- 2 American Literature courses
- 3 Writing and Oral Language courses
- 1 Grammar or Language and Style course

Requirements for Secondary Education Environmental Science
All coursework in the content area must earn a grade of C or better.
- College Chemistry
- College Biology
- College Physics
- Environmental Science I
- Environmental Science II
- Earth's Environmental System I: Life System
- Earth's Environmental System II: Solid Earth System
- Earth's Environmental System III: Climate System
- Earth Energy/Resources and Sustainability
- Environmental Science Elective
- Environmental Science Elective (with lab)
- Environmental Science Elective (with lab)
- Ecology
- Oceanography
- College Algebra I OR Intro Statistics
- Plus two courses on Environmental Sciences at the Graduate Level, as noted below in the Graduate Content Area

Requirements for Secondary Education History
All coursework in the content area must earn a grade of C or better.
- Two US History courses (any level)
- Two Non-US History courses (any level)
- One additional History course (any level)
- One Economics course
- One Geography course
- One Political Science course focused on American Government
- One Anthropology, Sociology, or Psychology course
- Three additional courses in any social science area (Anthropology, Economics, Geography, History, Political Science, Sociology, or Psychology)
**Requirements for Secondary Education Mathematics**

All coursework in the content area must earn a grade of C or better and a minimum of 18 quarter hours (12 semester hours) must be coursework at an undergraduate upper level or graduate level.

- Calculus I
- Calculus II
- Calculus III
- Intro to Math Reasoning OR Discrete Math I and Discrete Math II
- Multivariable Calculus I
- Multivariable Calculus II
- Linear Algebra
- Programming Language
- Abstract Algebra I
- Theory of Numbers or Abstract Algebra II
- Geometry I
- Geometry II or Real Analysis I
- Probability & Statistics
- History of Mathematics

**Requirements for Secondary Education Physics**

All coursework in the content area must earn a grade of C or better.

- College Physics I
- College Physics II
- Classical Mechanics
- Electricity and Magnetism
- Thermal Physics
- Computational and Theoretical Physics
- Quantum Physics
- Physics Elective
- Physics Elective (with lab)
- Calculus I
- Calculus II or Multivariable Analysis & Linear Algebra I
- College Chemistry I
- College Biology I
- College Environmental Science or Earth and Space Science or Astronomy

**Requirements for Secondary Education Social Science**

All coursework in the content area must earn a grade of C or better.

- Two US History courses (any level)
- Two Non-US History courses (any level)
- One additional History course (any level)
- One Economics course
- One Geography course
- One Political Science course focused on American Government
- One Anthropology, Sociology, or Psychology course
- Three additional courses in any social science area (Anthropology, Economics, Geography, History, Political Science, Sociology, or Psychology)

**Requirements for Secondary Education Visual Arts**

All coursework in the content area must earn a grade of C or better and a minimum of 18 quarter hours (12 semester hours) must be coursework at an undergraduate upper level or graduate level.

- Two Dimensional Foundation
- Three Dimensional Foundation
- Drawing
- Intermediate or Adv. Drawing
- Painting
- Sculpture
- Computer Graphics
- Printmaking
- Principles of Art History
- Photography
- Video
Licensure Tests

All individuals licensed by the Illinois State Board of Education (ISBE) are required to complete licensure tests specific to their teaching license. Secondary Education majors must complete the following tests:

- Test of Academic Proficiency (TAP) (test #400) - assesses knowledge of reading comprehension, language arts, writing, and math. Test is required to qualify for Advanced Standing. *Check with your advisor about qualifying for a waiver with acceptable ACT or SAT test scores.
- Content Area Test (test numbers below) – assesses knowledge of content area. Test is required before Student Teaching (deadlines apply).
- EdTPA - assessment conducted during the student teaching experience including video clips of instruction, lesson plans, student work samples, analysis of student learning and reflective commentaries. Students will submit an electronic portfolio to an outside agency for independent evaluation and a fee will be imposed by that agency as part of the assessment.

Biology
- Science: Biology Content Area Test (test #105)

Chemistry
- Science: Chemistry Content Area Test (test #106)

English
- English Language Arts Content Area Test (test #111)

Environmental Science
- Science: Environmental Science Content Area Test (test #112)

History
- Social Science: History Content Area Test (test #114)

Math
- Math Content Area Test (test #115)

Physics
- Science: Physics Content Area Test (test #116)

Social Science
- Social Science: History Content Area Test (test #114)

Visual Arts
- Visual Arts Content Area Test (test #145)

Field Experiences

Each student seeking licensure from the College of Education/Professional Education Unit must complete supervised field experiences in appropriate settings in conjunction with education courses. The field experiences must include a variety of grade levels, multicultural experiences, and a minimum of 15 hours in special education settings. All field experiences must be completed prior to final approval for student teaching. Field experience hours should be entered by the student into the FEDS system when completing courses with field experience requirements. For details on requirements, expectations, documentation, & courses in your program that require hours, visit the College of Education website.

Additional Requirements

Please also view the college core requirements under the MA or MED for Secondary Education for additional requirements. Note that the Secondary Education Licensure program listed above does not lead to a degree.
Subsequent Teaching Endorsement

The State Board of Education authorizes higher education institutions with approved teacher preparation programs to offer subsequent teaching endorsement programs. Under the rules for licensure and assignment of educational staff, subsequent teaching endorsements are earned through passage of all relevant tests and completion of either a full or "focused" licensure program offered by an institution of higher education.

DePaul offers subsequent teaching endorsement programs in the following areas of teacher education:

- Early Childhood Education
- Elementary Education
- Secondary Education (English, Math, Science, History, Social Science, Visual Arts)
- World Languages Education (K-12)
- Special Education (LBS1)

Each institution is expected to provide candidates with information about how to apply for such an endorsement program and how, in the case of focused programs, the institution will determine what prior coursework and experience can be counted toward the requirements for the subsequent teaching endorsement. Candidates who complete a full or focused subsequent teaching endorsement program will be recommended for the endorsement by entitlement. The following is a summary of the policies on focused programs at DePaul University.

General Policies

- These are endorsement-only programs and do not lead to a degree. However, degree options are available, and candidates could subsequently apply to the appropriate degree program.
- All courses must be taken at DePaul; no transfer credit is allowed.
- General education courses are not required.
- Accepted candidates are admitted to the T&L or LSI subsequent teaching endorsement program and upon admission have advanced standing (no additional requirements for admission to the Unit).
- Accepted candidates will initially meet with a program faculty member, and subsequently with a College of Education advisor, who will review all credentials and determine a program that prepares the candidate to meet the teacher preparation standards for the teaching endorsement desired and that meets the minimum requirements (as outlined below).
- These focused programs are subject to change during the course of the program. If assessments of the candidate's performance suggest that the program plan should have additional requirements, the program will be modified accordingly.
- Accepted candidates will be required to complete student teaching at the grade level and/or content area in which the teaching endorsement is sought OR complete an intensive internship that will include extended contact hours with students at the grade level in which the license is sought and will include a demonstration of teaching proficiency at this grade level. The candidate's faculty advisor will determine the nature of the internship.

Admission Requirements

If you hold a valid teaching license in the state of Illinois, you may enroll in a program designed to help you obtain a subsequent license in the following areas: early childhood education, elementary education, secondary education, world languages education, and special education.

In order to be considered for admission for a Subsequent Teaching Endorsement, you must hold bachelor’s degree from an accredited college or university and hold a valid teaching license. To apply, please submit a completed application as specified by the admission requirements for the teaching and learning program or the special education for licensed teachers program. In addition to the standard application materials, you must also submit a valid Illinois teaching license and a letter from your school principal providing evidence of prior teaching experience and teaching performance. (If you are currently not employed as a teacher, then other evidence of prior teaching experience must be provided.) In addition, evidence of having passed the Illinois Basic Skills/TAP Test must be submitted by the end of the first quarter of completed course work.

In addition to the standard requirements for admission to graduate programs, candidates must submit:

- Valid Illinois teaching license
- A letter from candidate's School Principal giving evidence of prior teaching experience and teaching performance (If the candidate is currently not employed as a teacher, then other evidence of prior teaching experience must be provided).
- Evidence of having passed the Illinois TAP Test. *If a waiver was granted for this test by ISBE due to the candidate holding a license in another state or if a candidate does not have evidence of having passed the
test, the candidate must provide evidence of passing before the end of her or his first quarter at DPU.

Subsequent Teaching Endorsement Requirements for the following programs are provided below:

- Early Childhood Education
- Elementary Education
- Secondary Education (English, Math, Science, History, Social Science, Visual Arts)
- World Languages Education (K-12)
- Special Education (LBS1)

Besides meeting the following requirements, each program completer is expected to demonstrate the appropriate professional dispositions. A list of those dispositions are provided below.

Subsequent Teaching Endorsement Requirements for Early Childhood Education

Accepted candidates will initially meet with a member of the program faculty and subsequently with a College of Education advisor who will review all credentials and determine a program that prepares the candidate to meet the teacher preparation standards for the endorsement desired and that meets the following minimum requirements:

Course Requirements

Based on evaluation results; students will complete a minimum of 6 courses. The following list is an example of possible courses:

- SCG 408 / SCG 409 / SCG 411 Social and Cultural Foundations
- T&L 431 EARLY LANGUAGE AND LITERACY DEVELOPMENT
- T&L 411 and T&L 481 (6 qh total); or a 4 qh Practicum and one internship experience course (6 qh total)
- T&L 432 and T&L 482 (6 qh total); or a 4 qh Practicum and one internship experience course (6 qh total)
- One of the following:
  - T&L 423 FUNCTIONAL BEHAVIOR ASSESSMENT: INTERVENTION AND SUPPORT IN EARLY CHILDCHOOD
  - T&L 410 CHILDREN'S LITERATURE AND FAMILY LITERACY
  - T&L 421 CHILD AND FAMILY IN THE URBAN COMMUNITY
- T&L 420 MATH AND SCIENCE IN EARLY CHILDCHOOD
- T&L 427 YOUNG EXCEPTIONAL CHILD: METHODS AND CHARACTERISTICS
- BBE 466 FIRST AND SECOND LANGUAGE ACQUISITION

Student Teaching or Internship Requirements (to be determined by faculty advisor)

- 12 weeks of student teaching in early childhood education (T&L 595)
  or 1 candidate-specific internship, as defined by faculty advisor (T&L 615, Research and Internship in Education)

Licensure Requirements

- Illinois Test of Academic Proficiency (TAP)
- Early Childhood Content Area Test
- APT Test
- Health & Nutrition Competency

Subsequent Teaching Endorsement Requirements for Elementary Education

Accepted candidates will initially meet with a member of the program faculty and subsequently with a College of Education advisor who will review all credentials and determine a program that prepares the candidate to meet the teacher preparation standards for the endorsement desired and that meets the following minimum requirements:

Course Requirements

Based on evaluation results; students will complete a minimum of 6 courses. The following list is an example of
possible courses:

- SCG 408 / SCG 409 / SCG 411 Social and Cultural Foundations course
- T&L 412 EMERGING READING AND LANGUAGE ARTS
- T&L 413 READING/LANGUAGE ARTS IN THE INTERMEDIATE GRADES
- T&L 415 TEACHING AND LEARNING ELEMENTARY SCHOOL SCIENCE
- T&L 416 TEACHING AND LEARNING ELEMENTARY SCHOOL MATHEMATICS
- T&L 419 CURRICULUM AND STRATEGIES: SOCIAL STUDIES
- T&L 422 CLASSROOM ASSESSMENT
- BBE 466 FIRST AND SECOND LANGUAGE ACQUISITION
- BBE 474 READING AND ELLS
- BBE 402 BILINGUAL-BICULTURAL PROGRAM DESIGN AND CURRICULUM DEVELOPMENT
- BBE 510 SPECIAL TOPICS IN LANGUAGE EDUCATION AND CULTURE
- LSI 430 INTRODUCTION TO READING ASSESSMENT.
- LSI 431 FOUNDATIONS OF LITERACY: ASSESSMENT AND INSTRUCTION I
- LSI 433 ASSESSMENT AND DIAGNOSTIC TEACHING OF READING

**Student Teaching or Internship Requirements (to be determined by faculty advisor)**

- 10 weeks of student teaching in elementary education (T&L 585)
  or 1 candidate-specific internship, as defined by faculty advisor (T&L 615, Research and Internship in Education)

**Licensure Requirements**

- Illinois Test of Academic Proficiency (TAP)
- Elementary Education Content Area Test
- APT Test

**Subsequent Teaching Endorsement Requirements for Secondary Education**

Accepted candidates will initially meet with a member of the program faculty and subsequently with a College of Education advisor who will review all credentials and determine a program that prepares the candidate to meet the teacher preparation standards for the endorsement desired and that meets the following minimum requirements:

**Course Requirements**

Based on evaluation results; students will complete a minimum of 6 courses. The following list is an example of possible courses:

- SCG 408 / SCG 409 / SCG 411 Social and Cultural Foundations course
- T&L 525 READING, WRITING, AND COMMUNICATING ACROSS THE CURRICULUM
- TCH 421, TCH 431, TCH 481 English
- TCH 423, TCH 473, TCH 483 Math
- TCH 424, TCH 474, TCH 484 Science
- TCH 422, TCH 472, TCH 482 History/Social Science
- T&L 465, T&L 466 Visual Arts
- Graduate level content area courses Arts and Sciences

**Content Area Requirements**

A minimum of 32 semester hours is required in the subject area the candidate intends to teach. Deficiencies in the content area will be evaluated by program faculty. Secondary content area deficiencies may be taken at the undergraduate level and may require courses in addition to the minimum requirements above.

**Student Teaching or Internship Requirements (to be determined by faculty advisor)**

- 10 weeks of student teaching in secondary education (T&L 590)
  or 1 candidate-specific internship, as defined by faculty advisor (T&L 615, Research and Internship in Education)
Licensure Requirements

- Illinois Test of Academic Proficiency (TAP)
- English, Math, Science, Social Science or Visual Arts Content Area Test
- APT Test

Subsequent Teaching Endorsement Requirements for World Language Education

Accepted candidates will initially meet with a member of the program faculty and subsequently with a College of Education advisor who will review all credentials and determine a program that prepares the candidate to meet the teacher preparation standards for the endorsement desired and that meets the following minimum requirements:

Course Requirements

Based on evaluation results; students will complete a minimum of 6 courses. The following list is an example of possible courses:

- SCG 408 / SCG 409/ SCG 411 Social and Cultural Foundations course
- T&L 525 READING, WRITING, AND COMMUNICATING ACROSS THE CURRICULUM
- BBE 560 SECOND, WORLD AND HERITAGE LANGUAGE ACQUISITION K-12
- T&L 421 CHILD AND FAMILY IN THE URBAN COMMUNITY
- T&L 449 STANDARD AND CONTENT-BASED METHODS OF TEACHING WORLD LANGUAGES K-12
- BBE 466 FIRST AND SECOND LANGUAGE ACQUISITION
- BBE 476 BILITERACY PRACTICES: SECONDARY/ADULT
- BBE 402 BILINGUAL-BICULTURAL PROGRAM DESIGN AND CURRICULUM DEVELOPMENT
- BBE 510 SPECIAL TOPICS IN LANGUAGE EDUCATION AND CULTURE

- Graduate level content courses in the world language to be taught

Content Area Requirements

A minimum of 32 semester hours is required in the world language the candidate intends to teach. Deficiencies in the content area will be evaluated by program faculty. World language content area deficiencies may be taken at the undergraduate level and may require courses in addition to the minimum requirements below:

Student Teaching or Internship Requirements (to be determined by faculty advisor)

- 10 weeks of student teaching in world language education (T&L 592)
  or 1 candidate-specific internship, as defined by faculty advisor (T&L 615, Research and Internship in Education)

Licensure Requirements

- Illinois Test of Academic Proficiency (TAP)
- ACTFL Oral Language Proficiency Interview Or DePaul Oral Language Proficiency Exam (Spanish only)
- Foreign Language Content Area Test
- APT Test

Dispositions

The academic programs within the College of Education have set forth these dispositions as educational and professional expectations for all students. Students should be aware that failing to abide by DePaul University or College of Education policies including, under certain circumstances, these dispositions, could result in adverse consequences for the student, including removal from his or her program, the College of Education, or the University.

- Reflects on progress and identifies strengths and weaknesses, including evaluating strategies for success, finding alternatives for inappropriate strategies, and modifying future practices
- Is receptive to faculty feedback and acts meaningfully and professionally upon suggestions.
- Values critical thinking, including engaging theoretical and philosophical frameworks and shows evidence of critical thinking through discussion and writing (e.g., journals, response to prompts)
- Understands the importance of and is committed to communicating clearly orally and in writing both in traditional and in new and emerging digital formats
Subsequent Teaching Endorsement Requirements for Special Education (LBS1)

Accepted candidates will initially meet with a member of the program faculty and subsequently with a College of Education advisor who will review all credentials and determine a program that prepares the candidate to meet the teacher preparation standards for the endorsement desired and that meets the following minimum requirements:

**Course Requirements**

- LSI 440 SURVEY OF EXCEPTIONAL LEARNERS: PSYCHOLOGY AND EDUCATION
- LSI 443 PSYCHOLOGICAL TESTS AND METHODS IN DIAGNOSIS
- LSI 467 TEACHING STUDENTS WITH HIGH INCIDENCE DISABILITIES II
- LSI 468 TEACHING STUDENTS WITH LOW INCIDENCE DISABILITIES I
- LSI 469 TEACHING STUDENTS WITH LOW INCIDENCE DISABILITIES II
- LSI 462 INSTRUCTIONAL STRATEGIES FOR STUDENTS WITH DISABILITIES I: ACCESSING GENERAL EDUCATION CURRICULUM
- LSI 457 SEMINAR AND RESEARCH IN SPECIAL EDUCATION

**Content Area Requirements**

Because special educators must be prepared to teach a variety of subjects at a variety of grades, candidates must have a solid foundation in the content areas below. Deficiencies in the content area will be evaluated as part of the application process. Deficiencies may be taken at the undergraduate level and may require courses in addition to the minimum requirements below.

1 college course in each of the following:

- Writing
- Fine Art of Literature
- Science
- Math
- US History or US Government
- Social Science

**Practicum Requirements**

- LSI 552 PRACTICUM EXPERIENCE WITH HIGH INCIDENCE DISABILITIES
- LSI 553 PRACTICUM EXPERIENCE WITH LOW INCIDENCE DISABILITIES

**Licensure Requirements**

- Illinois Test of Academic Proficiency (TAP)
Dispositions

The academic programs within the College of Education have set forth these dispositions as educational and professional expectations for all students. Students should be aware that failing to abide by DePaul University or College of Education policies including, under certain circumstances, these dispositions, could result in adverse consequences for the student, including removal from his or her program, the College of Education, or the University.

- Is receptive to faculty feedback and acts meaningfully and professionally upon suggestions
- Reflects on his or her own progress, identifies strengths and weaknesses, and evaluates strategies for success and professional growth
- Takes initiative
- Is open to new ideas and engagement in learning
- Respects diversity and cultural contexts to determine how to be responsive to learners and to proactively promote all students' learning
- Expresses positive attitudes toward individuals with disabilities and a willingness to advocate on their behalf
- Is committed to collaboration with colleagues, families, and communities in order to promote all students' learning and development
- Demonstrates professional ethical and legal behavior as defined by the respective codes of ethics and laws
- Demonstrates consistent professional behavior across all academic settings
- Maintains appropriate interpersonal and professional boundaries
- Accepts personal responsibility for one's behavior
- Expresses feelings and opinions effectively and appropriately
- Upholds confidentiality

World Language Education Licensure

Admission Requirements

To be eligible for the World Language Licensure only program, students must hold a bachelor's degree from an accredited college or university.

To apply, please submit the following materials to the Office of Graduate Admission:

- A completed College of Education graduate application
- Application fee ($40)
- One official transcript from each college and/or university attended
- Two letters of recommendation from professors or employer
- Resume
- A brief statement which explains your reasons for wanting to enter the World Language Licensure program at DePaul and discusses your potential for becoming a teacher.

Course Requirements

Education Courses: 40 quarter hours required, grade of C or better required.

- SCG 406 HUMAN DEVELOPMENT AND LEARNING: SECONDARY
- T&L 425 CURRICULUM AND INSTRUCTION IN SECONDARY EDUCATION
- Choose one course from the following list:
  - SCG 408 EDUCATION AND SOCIETY
  - SCG 409 SOCIOLOGY OF EDUCATION
Education Elective Course: 4 quarter hours are required, grade of C or better required.

Open elective credit also is required to meet the minimum graduation requirement of 60 quarter hours. Choose an Education course in consultation with the Academic Advisor or Content Advisor. Courses must be approved by the WLE Program Director prior to registration and requires graduate level registration.

- Elective Course

Student Teaching: 8 quarter hours required

Registration in student teaching requires completion of all requirements and procedures listed in the college core section. EDU 95 indicates to the Illinois State Board of Education that all field experience hours are complete.

- T&L 592 WORLD LANGUAGES STUDENT TEACHING (6 hours, grade of B- or better required)
- T&L 593 WORLD LANGUAGES SEMINAR (2 hours, grade of C or better required)
- EDU 95 CLINICAL EXPERIENCE WITH CHILDREN AND YOUTH (non-credit, non-tuition, PA grade required)

Recommended/ Optional Course

SCG 439 is required for middle school endorsements but is not required for the license. If taking SCG 439 for endorsement purposes, a grade of C or better is required.

- SCG 439 PHILOSOPHY AND PSYCHOLOGY OF YOUTH AND MIDDLE LEVEL EDUCATION

Content Area Courses

All students need to have sufficient knowledge of the subject they will be teaching. Illinois State Board of Education requires a minimum of 48 quarter hours (32 semester hours) in the content area subject. Students should meet with their designated Content Area advisor at the beginning of their program for an official written content evaluation and provide a copy to your academic advisor. Requirements can be satisfied by undergraduate coursework or courses taken elsewhere. Content courses must be completed before student teaching.

Requirements for World Language Education Arabic include:

All coursework in the content area must earn a grade of C or better and a minimum of 18 quarter hours (12 semester hours) must be coursework at an undergraduate upper level or graduate level.

Licensure Tests

All individuals licensed by the Illinois State Board of Education (ISBE) are required to complete licensure tests specific to their teaching license. World Language Education majors must complete the following tests:

- Test of Academic Proficiency (TAP) (test #400) - assesses knowledge of reading comprehension, language arts, writing, and math. It is recommended to be taken during the first or second quarter in the program. Test is required before Student Teaching (deadlines apply). Check with your advisor about qualifying for a waiver with acceptable ACT or SAT test scores.
- Content Area Test (test numbers below) – assesses knowledge of the language and culture. Test is required before Student Teaching (deadlines apply).
- OPI Test (see below).
- EdTPA - assessment conducted during the student teaching experience including video clips of instruction, lesson plans, student work samples, analysis of student learning and reflective commentaries. Students will submit an electronic portfolio to an outside agency for independent evaluation and a fee will be imposed by that agency as part of the assessment.

Arabic
- Foreign Language: Arabic Content Area Test (test #137)

Chinese
- Foreign Language: Chinese (Mandarin) Content Area Test (test #126)

- Foreign Language: French Content Area Test (test #127)

German
- Foreign Language: German Content Area Test (test #128)

Italian
- Foreign Language: Italian Content Area Test (test #130)

Japanese
- Foreign Language: Japanese Content Area Test (test #131)

Latin
- Foreign Language: Latin Content Area Test (test #133)

Russian
- Foreign Language: Russian Content Area Test (test #134)

Spanish
- Foreign Language: Spanish Content Area Test (test #135)

Field Experiences

Each student seeking licensure from the College of Education/Professional Education Unit must complete supervised field experiences in appropriate settings in conjunction with education courses. The field experiences must include a variety of grade levels, multicultural experiences, and a minimum of 15 hours in special education settings. All field experiences must be completed prior to final approval for student teaching. Field experience hours should be entered by the student into the FEDS system when completing courses with field experience requirements. For details on requirements, expectations, documentation, & courses in your program that require hours, visit the College of Education website.

Oral Proficiency Interview (OPI) Test

Pursuing licensure in the teaching of a foreign language (Arabic, Chinese, French, German, Italian, Japanese, Latin, Russian, or Spanish) requires the oral proficiency test – an Interview – before you begin student teaching. You must earn a rating of “intermediate high” or better on the test.

For additional information about the OPI and a link to the test, please consult the OPI section of the College of Education website.
Additional Requirements

Please also view the college core requirements under the MA or MED for World Language Education for additional requirements. Note that the World Language Education Licensure program listed above does not lead to a degree.

Endorsements

Endorsements are credentials added to a Professional Educator License (PEL). An endorsement is a statement appearing on a license that identifies the specific subjects or grade level that the license holder is authorized to teach.

DePaul University's College of Education offers many programs which fulfill the requirements for specific endorsements that can be added to an individual’s Professional Educator Licensure (PEL).

For example, an individual who holds a Professional Educator License (PEL) in Elementary Education (Self Contained General Education) for grades 1-6 may complete the coursework for the Reading Teacher endorsement in order to be eligible to add it to his or her PEL at the current grade range (1-6).

Please note that the Illinois State Board of Education (ISBE) may change the State licensure and endorsement requirements at any time and without prior notice. Individuals are bound by the requirements in place when applying for the license or endorsement, not the requirements in place when beginning the program.

Undergraduate Endorsements

DePaul University's College of Education offers many programs at the undergraduate level which fulfill the requirements for specific endorsements that the individual may add to his or her Professional Educator Licensure (PEL).

Students must be enrolled in one of DePaul's approved teacher preparation bachelor's degree program and working towards their Illinois Professional Educator License (PEL) in order to be eligible to complete the endorsement coursework.

Please note that the Illinois State Board of Education (ISBE) may change the State licensure and endorsement requirements at any time and without prior notice. Individuals are bound by the requirements in place when applying for the license or endorsement, not the requirements in place when beginning the program.
Early Childhood Bilingual Endorsement - Undergraduate Program

To be eligible for the Early Childhood Education Bilingual Education (BE) endorsement, students must be enrolled in DePaul's Early Childhood Education bachelor's degree program and working towards their Professional Educator License (PEL) that includes an early childhood endorsement.

Course Requirements

32 quarter hours, grade of C or better required in all courses:

- BBE 305 THEORETICAL FOUNDATIONS IN BILINGUAL EARLY CHILDHOOD DEVELOPMENT
- BBE 325 BILITERACY PRACTICES IN BILINGUAL EDUCATION AND ESL
- BBE 366 FIRST AND SECOND LANGUAGE ACQUISITION
- ECE 313 CROSS CULTURAL STUDIES IN EARLY CHILDHOOD EDUCATION
- ECE 314 METHODS AND MATERIALS FOR ENGLISH LANGUAGE LEARNERS IN EARLY CHILDHOOD EDUCATION
- ECE 325 SECOND LANGUAGE ACQUISITION AND EARLY LITERACY DEVELOPMENT
- ECE 377 ASSESSMENT OF YOUNG BILINGUAL/ESL STUDENTS
- ECE 383 INTERNSHIP IN EARLY CHILDHOOD ESL/BILINGUAL EDUCATION SETTINGS

Licensure Test

Individuals seeking a bilingual endorsement must complete the Illinois State Board of Education (ISBE) Target Language Proficiency (TLP) test in the non-English language.

Endorsement Application

All individuals must notify their advisor upon completion of the required coursework and licensure tests for DePaul to submit entitlement notification to the Illinois State Board of Education (ISBE). Application for the endorsement may require an additional application fee if the individual already holds a Professional Educator License (PEL). All individuals must meet ISBE requirements at the time of application. Requirements are subject to change per the discretion of ISBE.

Early Childhood English as a Second Language Endorsement - Undergraduate Program

To be eligible for the Early Childhood Education English as a Second Language (ESL) endorsement, students must be enrolled in DePaul's Early Childhood Education bachelor's degree program and working towards their Professional Educator License (PEL) that includes an early childhood endorsement.

Course Requirements

32 quarter hours, grade of C or better required in all courses:

- BBE 306 FOUNDATIONS OF ENGLISH AS SECOND LANGUAGE INSTRUCTION IN EARLY CHILDHOOD EDUCATION
- BBE 325 BILITERACY PRACTICES IN BILINGUAL EDUCATION AND ESL
- BBE 366 FIRST AND SECOND LANGUAGE ACQUISITION
- ECE 313 CROSS CULTURAL STUDIES IN EARLY CHILDHOOD EDUCATION

DePaul University
Endorsement Application

All individuals must notify their advisor upon completion of the required coursework and licensure tests for DePaul to submit entitlement notification to the Illinois State Board of Education (ISBE). Application for the endorsement may require an additional application fee if the individual already holds a Professional Educator License (PEL). All individuals must meet ISBE requirements at the time of application. Requirements are subject to change per the discretion of ISBE.

Early Childhood Bilingual and ESL Combined Endorsements - Undergraduate Program

To be eligible for the Early Childhood Education Bilingual Education (BE) and English as a Second Language (ESL) endorsements, students must be enrolled in DePaul's Early Childhood Education bachelor's degree program and working towards their Professional Educator License (PEL) that includes an early childhood endorsement.

Course Requirements

36 quarter hours, grade of C or better required in all courses:

- BBE 305 THEORETICAL FOUNDATIONS IN BILINGUAL EARLY CHILDHOOD DEVELOPMENT
- BBE 306 FOUNDATIONS OF ENGLISH AS SECOND LANGUAGE INSTRUCTION IN EARLY CHILDHOOD EDUCATION
- BBE 325 BILITERACY PRACTICES IN BILINGUAL EDUCATION AND ESL
- BBE 366 FIRST AND SECOND LANGUAGE ACQUISITION
- ECE 313 CROSS CULTURAL STUDIES IN EARLY CHILDHOOD EDUCATION
- ECE 314 METHODS AND MATERIALS FOR ENGLISH LANGUAGE LEARNERS IN EARLY CHILDHOOD EDUCATION
- ECE 325 SECOND LANGUAGE ACQUISITION AND EARLY LITERACY DEVELOPMENT
- ECE 377 ASSESSMENT OF YOUNG BILINGUAL/ESL STUDENTS
- ECE 383 INTERNSHIP IN EARLY CHILDHOOD ESL/BILINGUAL EDUCATION SETTINGS

Licensure Test

Individuals seeking a bilingual endorsement must complete the Illinois State Board of Education (ISBE) Target Language Proficiency (TLP) test in the non-English language.

Endorsement Application

All individuals must notify their advisor upon completion of the required coursework and licensure tests for DePaul to submit entitlement notification to the Illinois State Board of Education (ISBE). Application for the endorsement may require an additional application fee if the individual already holds a Professional Educator License (PEL). All individuals must meet ISBE requirements at the time of application. Requirements are subject to change per the discretion of ISBE.
Special Education (Learning and Behavior Specialist 1) Endorsement - Undergraduate Program

To be eligible for the Learning and Behavior Specialist 1 (LBS1) endorsement at the undergraduate level, the candidate must be currently enrolled in a College of Education degree-seeking program resulting in initial licensure.

Course Requirements

Endorsement Requirements: 18 hours required, grade of C or better required

Complete these courses:

- LSI 302 INSTRUCTION AND DIFFERENTIATION IN SPECIAL EDUCATION: CONTENT AREA
- LSI 321 FORMAL ASSESSMENT IN SPECIAL EDUCATION
- Area 1 Choose one of the following:
  - LSI 301 INTRO TO SPECIAL EDUCATION II - FOUNDATIONS AND CHARACTERISTICS
  - LSI 346 STRATEGIES FOR MAINSTREAMING AND INCLUSION
- Area 2 Choose one of the following:
  - LSI 322 TEACHING STUDENTS WITH SIGNIFICANT DISABILITIES I: ACADEMICS, LIFE SKILLS, & TRANSITION
  - LSI 323 TEACHING STUDENTS WITH SIGNIFICANT DISABILITIES II: COMMUNICATION & SOCIAL SKILLS
- Area 3 Choose one of the following:
  - LSI 324 PRACTICUM I: INCLUSION SETTING (2 credit hours)
  - LSI 327 PRACTICUM II: SELF-CONTAINED SETTING (2 credit hours)

Licensure Tests

All individuals licensed by the Illinois State Board of Education (ISBE) are required to complete licensure tests specific to their teaching license. LBS1 Endorsement students must complete the following tests:

- LBS1 Content Area Test (test #155) – assesses knowledge of working with students with disabilities and special needs.

Endorsement Application

Individuals must submit an application directly to the Illinois State Board of Education (ISBE) upon successful completion of the required coursework and licensure tests. All individuals must meet ISBE requirements at the time of application. Requirements are subject to change per the discretion of ISBE.

Early Childhood Special Education (Learning Behavior Specialist 1) Endorsement - Undergraduate Program

To be eligible for the Learning Behavior Specialist 1 (LBS1) endorsement at the undergraduate level, the candidate must be currently enrolled in a College of Education early childhood degree-seeking with license or the non-degree licensure program.
Course Requirements

Endorsement Requirements: 16 hours required, grade of C or better required

Have completed the pre-requisite special education courses:

- ECE 307 LANGUAGE DEVELOPMENT IN EARLY CHILDHOOD (BIRTH TO 8)
- ECE 375 ASSESSMENT IN EARLY CHILDHOOD INCLUSIVE SETTINGS
- ECE 302 CHILD AND FAMILY IN THE URBAN COMMUNITY
- ECE 306 FUNCTIONAL BEHAVIOR ASSESSMENT: INTERVENTION AND SUPPORT IN EARLY CHILDHOOD
- ECE 309 YOUNG EXCEPTIONAL CHILD: METHODS AND CHARACTERISTICS

Compete the following courses:

- ECE 332 EARLY LITERACY AND ASSESSMENT FOR YOUNG CHILDREN WITH DISABILITIES
- ECE 333 EARLY CHILDHOOD EDUCATION FOR LOW INCIDENCE DISABILITIES
- ECE 334 SPECIAL EDUCATION CURRICULUM AND STRATEGIES FOR YOUNG CHILDREN
- ECE 380 EARLY CHILDHOOD SPECIAL EDUCATION PRACTICUM

Licensure Tests

All individuals licensed by the Illinois State Board of Education (ISBE) are required to complete licensure tests specific to their teaching license. LBS1 Endorsement students must complete the following tests:

- LBS1 Content Area Test (test #155) – assesses knowledge of working with students with disabilities and special needs.

Endorsement Application

Individuals must submit an application directly to the Illinois State Board of Education (ISBE) upon successful completion of the required coursework and licensure tests. All individuals must meet ISBE requirements at the time of application. Requirements are subject to change per the discretion of ISBE.

Graduate Endorsements

DePaul University’s College of Education offers many programs at the graduate level which fulfill the requirements for specific endorsements that the individual may add to his or her Professional Educator Licensure (PEL).

Some programs may require students to already hold an Illinois Professional Educator License (PEL) in order to be admitted to the endorsement program, while other programs may allow students who are enrolled in one of DePaul’s approved teacher preparation bachelor’s degree program and working towards their Professional Educator License (PEL) to complete the required endorsement coursework simultaneously.

Please note that the Illinois State Board of Education (ISBE) may change the State licensure and endorsement requirements at any time and without prior notice. Individuals are bound by the requirements in place when applying for the license or endorsement, not the requirements in place when beginning the program.
Early Childhood Bilingual and ESL Combined Endorsements - Graduate Program

Admission Requirements

To be eligible for the combined Early Childhood Bilingual and ESL endorsement program, students must hold a bachelor’s degree from an accredited college or university as well as a valid Professional Educator License (PEL) that includes an early childhood endorsement.

To apply, please submit the following items to The Office of Graduate Admission:

- A completed application
- Application fee ($40)
- One official transcript from all colleges and/or universities attended
- A copy of a valid professional educator license
- A résumé or curriculum vitae
- Two letters of recommendation from professors or employers
- Statement of purpose indicating professional development goals and related experience (750 words)

Course Requirements

36 quarter hours, grade of B or better required in all courses:

- BBE 408 BILINGUAL EARLY CHILDHOOD DEVELOPMENT THEORETICAL FOUNDATIONS
- BBE 409 ENGLISH AS A SECOND LANGUAGE INSTRUCTIONAL FOUNDATIONS IN EARLY CHILDHOOD SETTINGS
- T&L 443 ASSESSING YOUNG BILINGUAL/ESL LEARNERS
- T&L 440 EARLY CHILDHOOD EDUCATION CROSS-CULTURAL STUDIES
- T&L 441 EARLY CHILDHOOD METHODS AND MATERIALS FOR ENGLISH LANGUAGE LEARNERS

- BBE 466 FIRST AND SECOND LANGUAGE ACQUISITION
- T&L 442 EARLY LITERACY DEVELOPMENT AND SECOND LANGUAGE ACQUISITION
- T&L 444 INTERNSHIP IN EARLY CHILDHOOD ESL/BILINGUAL EDUCATION SETTINGS

Licensure Test

Individuals seeking a bilingual endorsement must complete the Illinois State Board of Education (ISBE) Target Language Proficiency (TLP) test in the non-English language.

Endorsement Application

All individuals must notify their advisor upon completion of the required coursework and licensure tests for DePaul to submit entitlement notification to the Illinois State Board of Education (ISBE). Application for the endorsement may require an additional application fee if the individual already holds a Professional Educator License (PEL). All individuals must meet ISBE requirements at the time of application. Requirements are subject to change per the discretion of ISBE.
Bilingual Education (BE) Endorsement

Admission Requirements

To be eligible for the Bilingual Bicultural Education endorsement program, students must hold a bachelor’s degree from an accredited college or university and hold a valid teaching license.

To apply, please submit the following items to The Office of Graduate Admission:

- A completed application
- Application fee ($40.00)
- One official transcript from all colleges and/or universities attended
- A copy of valid professional educator license
- A résumé or curriculum vitae
- Two letters of recommendation from professors or employers
- Statement of purpose indicating professional development goals and related experience (750 words)

Course Requirements

28 quarter hours, grade of C or better required in all courses

Illinois target language proficiency (TLP) test required in addition to the coursework and field experience hours below:

- BBE 510 SPECIAL TOPICS IN LANGUAGE EDUCATION AND CULTURE
- BBE 404 LANGUAGE, LITERACY AND CULTURE
- BBE 406 SOCIOCULTURAL AND HISTORICAL PERSPECTIVES IN BILINGUAL EDUCATION
- BBE 407 EQUITY ISSUES IN ASSESSMENT OF LANGUAGE LEARNERS
- BBE 425 BILITERACY PRACTICES IN BILINGUAL EDUCATION AND ESL
- BBE 466 FIRST AND SECOND LANGUAGE ACQUISITION
- BBE 524 METHODS OF TEACHING ENGLISH AS A SECOND LANGUAGE
- BBE 97100 FIELD EXPERIENCE HOURS IN ESL / BE DOCUMENTED (PA grade required)

Licensure Test

Individuals seeking a bilingual endorsement must complete the Target Language Proficiency (TLP) test in the non-English language.

Endorsement Application

Individuals must submit an application directly to the Illinois State Board of Education (ISBE) upon successful completion of the required coursework and licensure tests. All individuals must meet ISBE requirements at the time of application. Requirements are subject to change per the discretion of ISBE.

Early Childhood English as a Second Language Endorsement - Graduate Program

Admission Requirements

To be eligible for the Early Childhood English as a Second Language endorsement program, students must hold a bachelor’s degree from an accredited college or university as well as a valid Professional Educator License (PEL)
that includes an early childhood endorsement.

To apply, please submit the following items to The Office of Graduate Admission:

- A completed application
- Application fee ($40)
- One official transcript from all colleges and/or universities attended
- A copy of a valid professional educator license
- A résumé or curriculum vitae
- Two letters of recommendation from professors or employers
- Statement of purpose indicating professional development goals and related experience (750 words)

Course Requirements

32 quarter hours, grade of B or better required in all courses:

- BBE 409 ENGLISH AS A SECOND LANGUAGE INSTRUCTIONAL FOUNDATIONS IN EARLY CHILDHOOD SETTINGS

- T&L 444 INTERNSHIP IN EARLY CHILDHOOD ESL/BILINGUAL EDUCATION SETTINGS

Endorsement Application

All individuals must notify their advisor upon completion of the required coursework and licensure tests for DePaul to submit entitlement notification to the Illinois State Board of Education (ISBE). Application for the endorsement may require an additional application fee if the individual already holds a Professional Educator License (PEL). All individuals must meet ISBE requirements at the time of application. Requirements are subject to change per the discretion of ISBE.

English as a Second Language (ESL) Endorsement

Admission Requirements

To be eligible for the English as a Second Language (ESL) endorsement program, students must hold a bachelor’s degree from an accredited college or university and hold a valid teaching license.

To apply, please submit the following items to The Office of Graduate Admission:

- A completed application
- Application fee ($40.00)
- One official transcript from all colleges and/or universities attended
- A copy of valid professional educator license
- A resume or curriculum vitae
- Two letters of recommendation from professors or employers
- Statement of purpose indicating professional development goals and related experience (750 words)

Course Requirements

28 quarter hours, grade of C or better required

Must complete the coursework and field experience hours below:

- BBE 510 SPECIAL TOPICS IN LANGUAGE EDUCATION AND CULTURE
Endorsement Application

Individuals must submit an application directly to the Illinois State Board of Education (ISBE) upon successful completion of the required coursework. All individuals must meet ISBE requirements at the time of application. Requirements are subject to change per the discretion of ISBE.

Learning Behavior Specialist 1 (LBS1) Endorsement Only - Graduate Program

The endorsement is limited to the range of the program the candidate has completed to receive his/her Illinois Professional Educator License (PEL). For example, if a candidate has completed an elementary 1-6 program to receive the PEL, then the LBS1 endorsement will be applicable only to the 1-6 range.

Admission Requirements

To be eligible for the Learning Behavior Specialist 1 (LBS1) endorsement only program, students must hold a bachelor’s degree from an accredited college or university and a valid Illinois Professional Educator License (PEL).

To apply, please submit the following materials to the Office of Graduate Admission:

- A completed graduate application
- Application fee ($40.00)
- Copy of a valid Illinois teacher license
- A bachelor’s degree conferred by an accredited, recognized institution
- A previous grade point average of 2.75 or above on a 4.0 scale
- Two letters of reference, one of which must be from persons familiar with your academic work
- One official transcript from each college or university attended
- Personal statement (see below)*
- Resume or curriculum vitae showing evidence of adequate background for the program.
- The admission process also may include an interview with program faculty.

*Personal statement

Write a personal statement that discusses your future goals and your thoughts about your career as a special educator. As part of your statement please consider the following: the possible tasks/roles of a special education teacher are multiple and include inclusion specialist, team teacher with general educators, specialized instruction for exceptional students, advocate for exceptional students, response to intervention (RTI) coordinator, case manager or provider of staff development. From your perspective, rank order the tasks/roles and discuss your rationale for the top ranked roles.

Course Requirements

LBS1 Endorsement-Only Requirements 16 hours required, grade of B+ or better required

- LSI 402 INSTRUCTION AND DIFFERENTIATION IN SPECIAL EDUCATION
- LSI 409 TEACHING STUDENTS WITH SIGNIFICANT DISABILITIES
- LSI 421 FORMAL ASSESSMENT IN SPECIAL EDUCATION
- LSI 440 SURVEY OF EXCEPTIONAL LEARNERS: PSYCHOLOGY AND EDUCATION
Licensure Tests

All individuals licensed by the Illinois State Board of Education (ISBE) are required to complete licensure tests specific to their teaching license. LBS1 Endorsement students must complete the following tests:

- LBS1 Content Area Test (test #155) – assesses knowledge of working with students with disabilities and special needs.

Candidates who are conditionally admitted with an out-of-state (OOS) teaching license are required to transfer their license into Illinois, and therefore may also be required to take additional licensure tests. Students should work with ISBE to fulfill outstanding test requirements. These additional licensure tests may include the following:

- Test of Academic Proficiency (TAP) (test #400) - assesses knowledge of reading comprehension, language arts, writing, and math.
- EdTPA – an electronic portfolio that includes video clips of instruction, lesson plans, student work samples, analysis of student learning and reflective commentaries. Usually completed during pre-service student teaching experience.

Endorsement Application

Individuals must submit an application directly to the Illinois State Board of Education (ISBE) upon successful completion of the required coursework and licensure tests. All individuals must meet ISBE requirements at the time of application. Requirements are subject to change per the discretion of ISBE.

Registration, testing schedules, and fees for ISBE licensure tests are available on the ISBE website.

Note that the LBS1 Licensure endorsement program listed above does not lead to a degree.

Reading Teacher Endorsement

The Illinois State Board of Education (ISBE) requirements for the Reading Teacher Endorsement include:

1. Hold a valid 0-3, K-9, or 6-12 teaching license
2. Complete 24 semester hours or 36 quarter hours, including a practicum, of reading and literacy courses in the following areas:
   a) Foundations of reading,
   b) Content area reading,
   c) Assessment and diagnosis of reading problems,
   d) Developmental and remedial reading instruction and support,
   e) Developmental and remedial materials and resources, and
   f) Literature appropriate to students across all grade ranges
3. Pass the Reading Teacher content test (#177)

Students can pursue the Reading Teacher Endorsement by either:

1. Completing courses that are a subset of the Reading Specialist program (see below), or
2. Applying for a Reading Teacher endorsement evaluation through ISBE. Once a statement of area deficiencies is received, the student will meet with an advisor to determine the required outstanding coursework.

Admission Requirements

To be eligible for the Reading Teacher endorsement only program, students must hold a bachelor’s degree from an accredited college or university and a valid Illinois teaching license.

To apply, please submit the following materials to the Office of Graduate Admission:

- A completed graduate application
- Application fee ($40.00)
Copy of a valid Illinois professional teaching license
A bachelor’s degree conferred by an accredited, recognized institution
Two letters of reference, one of which must be from persons familiar with your academic work
One official transcript from each college or university attended
Resume or curriculum vitae showing evidence of adequate background for the program.

The admission process also may include an interview with program faculty.

Course Requirements

Reading Teacher Endorsement Coursework: 36 quarter hours required, grade of C or better required

- LSI 430 INTRODUCTION TO READING ASSESSMENT
- LSI 431 FOUNDATIONS OF LITERACY: ASSESSMENT AND INSTRUCTION I
- LSI 432 DEVELOPING LITERACY: ASSESSMENT AND INSTRUCTION II
- LSI 433 ASSESSMENT AND DIAGNOSTIC TEACHING OF READING
- LSI 435 LITERACY PROGRAMS: CURRICULUM AND COLLABORATION
- LSI 438 LITERATURE-BASED AND CONTENT AREA LITERACY INSTRUCTION

Practicum Courses

- LSI 542 PRACTICUM IN LITERACY ASSESSMENT
- LSI 543 PRACTICUM IN LITERACY INSTRUCTION AND ASSESSMENT
- LSI 544 PRACTICUM IN LITERACY INSTRUCTION, ASSESSMENT, AND COLLABORATION

The practicum courses provide an opportunity to apply knowledge from course work to teaching struggling learners and those with disabilities. In these courses, students provide diagnostic and remedial services to children and adolescents from the Chicago area under the supervision of program faculty. These courses are offered in an on-campus facility.

Teacher Leader Endorsement Only

Admission Requirements

To be eligible for the Teacher Leader endorsement program, students must hold a bachelor's degree and master's degree from an accredited college or university and hold a valid teaching license.

To apply, please submit the following items to The Office of Graduate Admission:

- A completed application
- Application fee ($40.00)
- 2 years of full-time teaching on a valid standard teaching Licensure at the time of application
- One official transcript from all colleges and/or universities attended
- A resume or curriculum vitae
- Proof of passing Basic Skills Test or TAP Exam
- Two letters of recommendation from professors or employers
- Statement of purpose indicating professional development goals and related experience (750 words)

Course Requirements

This non-degree program allows students who already have a Master's degree to obtain an ISBE Teacher Leader Endorsement. Candidates already holding a Master's degree (M.Ed. or M.A.) and a professional educator license may enter the program seeking the Teacher Leader Endorsement. Students not holding a Master's degree must complete either the existing Educational Leadership or Curriculum Studies Master's program and obtain their professional educator license before they can obtain the Teacher Leader Endorsement.

40 quarter hours, grade of C or better required in all courses
Educational Leadership Courses: 20 quarter hours required

- A&S 491 EFFECTIVE LEADERSHIP OF SCHOOLS
- A&S 493 DATA DRIVEN DECISION MAKING
- A&S 496 STAKEHOLDER RELATIONSHIPS
- A&S 498 INSTRUCTIONAL SUPERVISION AND SUPPORT
- A&S 499 PLANNING FOR PROFESSIONAL DEVELOPMENT

Curriculum Studies Courses Required: 16 quarter hours required

- CS 470 TEACHERS AS LEADERS
- CS 473 ASSESSMENT
- CS 482 THE HISTORY OF CURRICULUM PRACTICE
- CS 488 CURRICULUM DESIGN

Bilingual/Bicultural Education Courses Required: 4 quarter hours required

- BBE 599 LEADERSHIP IN EDUCATING LINGUISTICALLY DIVERSE LEARNERS

Gainful Employment Disclosure

This graduate certificate program is approved as a Gainful Employment Program through the US Department of Education and is, therefore, eligible for Federal Student Aid. Disclosure Statements about occupations, on-time graduation rate, tuition and fees, and median loan debt for this program can be found at: http://core.depaul.edu/gedt/teacher-leader-endorsement/gedt.html.

Early Childhood Bilingual Endorsement -Graduate Program

Admission Requirements

To be eligible for the Early Childhood Bilingual endorsement program, students must hold a bachelor’s degree from an accredited college or university as well as a valid Professional Educator License (PEL) that includes an early childhood endorsement.

To apply, please submit the following items to The Office of Graduate Admission:

- A completed application
- Application fee ($40)
- One official transcript from all colleges and/or universities attended
- A copy of a valid professional educator license
- A résumé or curriculum vitae
- Two letters of recommendation from professors or employers
- Statement of purpose indicating professional development goals and related experience (750 words)

Course Requirements

32 quarter hours, grade of B or better required in all courses:

- BBE 408 BILINGUAL EARLY CHILDHOOD DEVELOPMENT THEORETICAL FOUNDATIONS
- T&L 443 ASSESSING YOUNG BILINGUAL/ESL LEARNERS
- T&L 440 EARLY CHILDHOOD EDUCATION CROSS-CULTURAL STUDIES
- T&L 441 EARLY CHILDHOOD METHODS AND MATERIALS FOR ENGLISH LANGUAGE LEARNERS
- BBE 425 BILITERACY PRACTICES IN BILINGUAL EDUCATION AND ESL
- BBE 466 FIRST AND SECOND LANGUAGE ACQUISITION
- T&L 442 EARLY LITERACY DEVELOPMENT AND SECOND LANGUAGE ACQUISITION
- T&L 444 INTERNSHIP IN EARLY CHILDHOOD ESL/BILINGUAL EDUCATION SETTINGS

Licensure Test
Individuals seeking a bilingual endorsement must complete the Illinois State Board of Education (ISBE) Target Language Proficiency (TLP) test in the non-English language.

**Endorsement Application**

All individuals must notify their advisor upon completion of the required coursework and licensure tests for DePaul to submit entitlement notification to the Illinois State Board of Education (ISBE). Application for the endorsement may require an additional application fee if the individual already holds a Professional Educator License (PEL). All individuals must meet ISBE requirements at the time of application. Requirements are subject to change per the discretion of ISBE.

**Bilingual Education (BE) and ESL Combined Endorsements**

**Admission Requirements**

To be eligible for the Bilingual Bicultural Education endorsement program, students must hold a bachelor's degree from an accredited college or university and hold a valid teaching license.

To apply, please submit the following items to The Office of Graduate Admission:

- A completed application
- Application fee ($40.00)
- One official transcript from all colleges and/or universities attended
- A copy of valid professional educator license
- A résumé or curriculum vitae
- Two letters of recommendation from professors or employers
- Statement of purpose indicating professional development goals and related experience (750 words)

**Course Requirements**

**32 quarter hours, grade of C or better required in all courses**

Illinois target language proficiency (TLP) test required in addition to the coursework and field experience hours below:

- BBE 510 SPECIAL TOPICS IN LANGUAGE EDUCATION AND CULTURE
- BBE 404 LANGUAGE, LITERACY AND CULTURE
- BBE 406 SOCIOCULTURAL AND HISTORICAL PERSPECTIVES IN BILINGUAL EDUCATION
- BBE 407 EQUITY ISSUES IN ASSESSMENT OF LANGUAGE LEARNERS
- BBE 425 BILITERACY PRACTICES IN BILINGUAL EDUCATION AND ESL
- BBE 466 FIRST AND SECOND LANGUAGE ACQUISITION
- BBE 524 METHODS OF TEACHING ENGLISH AS A SECOND LANGUAGE
- BBE 526 THEORETICAL FOUNDATIONS OF TEACHING ESL AND WLE
- BBE 97 100 FIELD EXPERIENCE HOURS IN ESL / BE DOCUMENTED (PA grade required)

**Licensure Test**

Individuals seeking a bilingual endorsement must complete the Target Language Proficiency (TLP) test in the non-English language.

**Endorsement Application**

Individuals must submit an application directly to the Illinois State Board of Education (ISBE) upon successful completion of the required coursework and licensure tests. All individuals must meet ISBE requirements at the time of application. Requirements are subject to change per the discretion of ISBE.
Early Childhood Special Education (Learning Behavior Specialist 1) Endorsement - Graduate Program

To be eligible for the Learning Behavior Specialist 1 (LBS1) endorsement at the graduate level, the candidate must be currently enrolled in a College of Education early childhood degree-seeking with license or the non-degree licensure program.

Course Requirements

Endorsement Requirements: 16 hours required, grade of C or better required

Have completed the pre-requisite special education courses:

- T&L 406 LANGUAGE DEVELOPMENT IN EARLY CHILDHOOD (BIRTH TO 8)
- T&L 411 ASSESSMENT IN EARLY CHILDHOOD INCLUSIVE SETTINGS
- T&L 421 CHILD AND FAMILY IN THE URBAN COMMUNITY
- T&L 423 FUNCTIONAL BEHAVIOR ASSESSMENT: INTERVENTION AND SUPPORT IN EARLY CHILDHOOD
- T&L 427 YOUNG EXCEPTIONAL CHILD: METHODS AND CHARACTERISTICS

Compete the following courses:

- LSI 431 FOUNDATIONS OF LITERACY: ASSESSMENT AND INSTRUCTION I
- LSI 475 METHODS OF TEACHING EARLY CHILDHOOD STUDENTS WITH LOW INCIDENCE DISABILITIES
- LSI 476 SPECIAL EDUCATION CURRICULUM AND STRATEGIES FOR EARLY CHILDHOOD: HIGH INCIDENCE DISABILITIES
- LSI 597 EARLY CHILDHOOD EDUCATION SPECIAL EDUCATION PRACTICUM

Licensure Tests

All individuals licensed by the Illinois State Board of Education (ISBE) are required to complete licensure tests specific to their teaching license. LBS1 Endorsement students must complete the following tests:

- LBS1 Content Area Test (test #155) – assesses knowledge of working with students with disabilities and special needs.

Endorsement Application

Individuals must submit an application directly to the Illinois State Board of Education (ISBE) upon successful completion of the required coursework and licensure tests. All individuals must meet ISBE requirements at the time of application. Requirements are subject to change per the discretion of ISBE.

Licensed Professional Counselor

State Licensure Information

The State of Illinois requires that those who wish to work as a counselor have licensure as either a Licensed Professional Counselor (LPC) or an advanced Licensed Clinical Professional Counselor (LCPC). The Counseling
program's Clinical Mental Health Counseling concentration meets the educational requirements for the Licensed Clinical Professional Counselor. However, there are further requirements that must be met. For more information, contact the State of Illinois Department of Professional Regulation in Springfield, Illinois.

**Admission Requirements**

To be eligible for the Licensed Professional Counselor program, students must hold a bachelor's degree from an accredited college or university. It is recommended that you have at least one year of working experience.

To apply, please submit the following materials to the Office of Graduate Admission:

- A completed application
- Application fee ($40)
- One official transcript from each college and/or university attended
- Three letters of recommendation: one from a professor addressing your academic ability, one from an employer, and the third from either another professor or employer
- Resume
- A personal statement (see below for more information)

The admission process also may include an interview with program faculty.

**Personal Statement**

Please answer all of the following questions. Your entire response should not exceed 1,500 words (or approximately 300 words per question).

1. Discuss why you want to enter the counseling field. Demonstrate in your response that you have researched the field and have a basic understanding of what counseling professionals do.
2. Given what you have researched about the profession, discuss your short-term and long-term professional goals should you eventually graduate from our program. Integrate into your response why DePaul's counseling program will help you achieve your goals.
3. Discuss why self-awareness, self-reflection and self-care are important skills for counselors. Explain ways in which you would attend to all of these should you be a student in our program.
4. Explain how your personal values and ethical beliefs will be an asset to you as a future counselor and explain any challenges you may face in future practice. Provide concrete examples from your personal or professional life to help illustrate your points.
5. Discuss your understanding of "multicultural proficiency" and "social justice." Explain how you believe these play a role in the work of counseling professionals as well as how these fit with your own beliefs and values. Provide concrete examples from your personal or professional life to help illustrate your points.

**Licensed Professional Counselor Academic Criteria**

Individuals who have already completed a Counseling program at DePaul may be required to take additional coursework to meet all the course requirements below. Individuals who are interested in the LPC but did not complete a Counseling program at DePaul can apply as a non-degree student to complete the coursework below.

Applicants must complete coursework in the following areas:

- Human Growth and Development
  - SCG 401 ADVANCED LIFESPAN DEVELOPMENT
- Counseling Theory
  - CSL 467 COUNSELING THEORIES
- Counseling Techniques
  - CSL 501 COUNSELING SKILLS
- Group Dynamics, Processing and Counseling
  - CSL 458 GROUP COUNSELING
- Appraisals of Individuals
  - CSL 461 TESTING AND APPRAISAL
- Research and Evaluation
  - SCG 410 INTRODUCTION TO RESEARCH: PURPOSES, ISSUES, AND METHODOLOGIES
Professional, Legal and Ethical Responsibilities Relating to Professional Counseling, Especially as Related to Illinois Law

- CSL 451 LEGAL AND ETHICAL ISSUES IN COUNSELING
- CSL 452 INTRODUCTION TO THE COUNSELING PROFESSION

Social and Cultural Foundations

- CSL 510 MULTICULTURAL COUNSELING

Lifestyles and Career Development

- CSL 454 CAREER COUNSELING

Practicum/Internship

- CSL 552 PRACTICUM IN COUNSELING
- CSL 553 INTERNSHIP IN COUNSELING I
- CSL 554 INTERNSHIP IN COUNSELING II

Substance Abuse

- CSL 466 ASSESSMENT AND TREATMENT OF CHEMICAL DEPENDENCY

Maladaptive Behavior and Psychopathology

- CSL 489 PSYCHOPATHOLOGY

Family Dynamics

- CSL 556 COUPLES AND FAMILY COUNSELING

College of Law

DePaul University College of Law challenges and enlightens students by placing the highest priority on innovative programs of instruction that include both traditional classroom theory and professional skills training. We are distinguished by our highly successful centers and institutes, which emphasize collaborative learning among students and faculty in advancing the law and serving justice. Located in a vibrant urban environment, the College of Law brings together students, faculty, staff and alumni committed to serving the public and the legal profession in ways that enhance the social, economic, cultural and ethical values in the broader community. The College of Law is part of a university that derives its fundamental mission from St. Vincent de Paul, who advocated the acceptance of all people and devoted his life to helping the disadvantaged lead dignified lives. We
seek diversity in students' special talents, qualities, interests and socioeconomic backgrounds in creating a culture in which student learning is central. DePaul College of Law students can expect an academic environment that weaves together education, experience, service and community.

About

DePaul University College of Law challenges and enlightens students by placing the highest priority on innovative programs of instruction that include both traditional classroom theory and professional skills training. We are distinguished by our highly successful centers and institutes, which emphasize collaborative learning among students and faculty in advancing the law and serving justice. Located in a vibrant urban environment, the College of Law brings together students, faculty, staff and alumni committed to serving the public and the legal profession in ways that enhance the social, economic, cultural and ethical values in the broader community. The College of Law is part of a university that derives its fundamental mission from St. Vincent de Paul, who advocated the acceptance of all people and devoted his life to helping the disadvantaged lead dignified lives. We seek diversity in students' special talents, qualities, interests and socioeconomic backgrounds in creating a culture in which student learning is central. DePaul College of Law students can expect an academic environment that weaves together education, experience, service and community.

Academics

At DePaul University College of Law, tradition underlies everything: our deep roots, our enduring values and our commitment to service.

The College of Law provides theoretical instruction as well as offers creative approaches to professional skills training. Law students can earn academic credit by working with real clients on real cases in every type of legal environment. Through our Legal Clinics, Field Placement Program and Trial Advocacy Program, students gain valuable first-hand experience and insight working side-by-side with distinguished faculty members and practicing attorneys.

In addition to the core Juris Doctor curriculum, students also can choose from a variety of joint degrees, graduate programs and certificate options in a number of concentrations.

Professional Degrees

- Health Law (LLM)
- Intellectual Property (LLM)
- International Law (LLM)
- Law - Joint Degree (JD/LLM)
- Law (JD)
- Law (MJ)
- Law/Business - Joint Degree (JD/MBA)
- Law/Computer Science - Joint Degree (JD/MS)
- Law/Public Service - Joint Degree (JD)
- Taxation (LLM)
Health Law Certificate for Health Students & Professionals

The DePaul University Health Law Certificate for Health Students & Professionals is specifically designed to provide medical students and health care professionals with sufficient legal knowledge so that they are prepared to act in the best interests of their patients, without having to pursue a legal degree. The certificate is tailored for those who do not seek to practice law, but who do or will regularly encounter legal issues in their professions and who would benefit from a sophisticated and nuanced understanding of legal doctrine in the health law area. This specialized knowledge, taught by DePaul's expert health law faculty, will allow health professionals to better understand legal and regulatory issues they will encounter in their work, more effectively deal with the legal concerns of patients, and better communicate with legal counsel with whom they will come into contact in their careers.

The certificate course (LAW 750 HEALTH CARE LAW FOR HEALTH CARE PROFESSIONALS) consists of four, three-credit topics: Health Policy & the Law; Health Law Compliance & Regulations; Health Care Delivery Systems; and Quality of Care & Malpractice Liability. All four classes are offered as a combination of flexible online learning and intensive onsite instruction.

The certificate is a non-degree program, but students can transfer the credits into the College of Law's Master of Jurisprudence degree.

Admission & Aid

Electronic Application Process

All applicants to the College of Law must submit all materials electronically through the Law School Admission Council (LSAC) and register with the LSAC Credential Assembly Service (CAS). We only accept applications submitted through LSAC. Please read the application instructions included with the LSAC Electronic Application and follow them carefully. You can access the LSAC Electronic Application at law.depaul.edu or lsac.org.

We will not accept any paper application materials or paper updates to your application. Paper materials and updates will not be retained or reviewed by the Admissions Committee and will be discarded. You are welcome to submit updates to your file electronically. Application update materials may be submitted to lawinfo@depaul.edu. Please include your name and LSAC identification number on each attachment.

Disabled applicants in need of a reasonable accommodation to complete the application process, or other applicants who require a paper application, should contact the Office of Law Admissions at (312) 362-6831 or email lawinfo@depaul.edu with their request.

Admission Policy

Admission to DePaul University College of Law is very competitive. We consider numerous factors in evaluating each applicant, including undergraduate academic performance, Law School Admission Test (LSAT) scores, advanced degrees, professional work experience, writing ability, potential for leadership, professional and academic recommendations and the applicant's special talents, qualities, interests and socioeconomic and cultural background. No single factor is dispositive when determining admission.

Personal qualities that demonstrate intellectual depth, high ideals and diligence also are considered, as are economic, societal or educational obstacles that have been successfully overcome. Diversity in background and experience among the members of each entering class is a continuing objective. Having a diverse student body
allows us to encourage and foster the exchange of different ideas. In addition, a candidate's prior relations with
the DePaul University community and her or his potential for furthering DePaul's institutional goals are
considered.

Because applications are reviewed on a rolling basis, early application is highly recommended, especially for
those who desire merit scholarship and financial aid consideration. For first-year applicants with no previous law
school credit, admission is granted only for the fall semester. First-year applicants should ensure that their
application and all necessary documents are on file in the Office of Law Admission prior to the suggested
application deadline of March 1.

Prospective applicants who have received their baccalaureate degrees from accredited institutions or who have
received degrees prior to July of the year for which admission is sought are eligible to apply. In no event will
anyone who has yet to receive a baccalaureate degree be permitted to enroll in the College of Law. No specific
fields of study are prescribed at the baccalaureate level.

DePaul University has a nondiscriminatory admission policy; it does not discriminate on the basis of race, color,
national origin, religion, sex, sexual orientation, age or disability.

Application Instructions

Letter of Recommendation

One LSAC applicant evaluation or one letter of recommendation is required for all applicants. Additional letters
and evaluations are welcome. Letters of recommendation must be submitted through CAS.

Evaluations from an applicant's college professors are particularly useful. Evaluations also may be submitted by
employers or colleagues who are in positions to make critical and informed appraisals of an applicant's
qualifications.

Personal Statement

A personal statement is required and must be electronically attached to the application for admission. It should
not exceed two pages, and may provide the Admissions Committee with information regarding such matters as
intellectual interests and pursuits; personal, family or educational background; experiences and talents of special
interest; reasons for applying to law school as they may relate to personal goals and professional expectations;
or any other factors that will assist the committee's evaluation of the applicant's candidacy for admission.
Applicants also may describe, either within the personal statement or as an addendum, how their admission
would contribute to the diversity of the College of Law.

Resume

A current resume is strongly recommended and may be electronically attached to the application for admission.
It should not exceed two pages. It should include a complete employment record and identify honors,
scholarships and commendations received; membership in any scholastic, honorary and professional
associations; as well as community, volunteer and extracurricular activities.

Law School Admission Test / Credential Assembly Service

All applicants must take the LSAT. LSAT scores earned prior to June 2009 will not be accepted. In addition, all
applicants must register with CAS. Please visit the LSAC website (lsac.org) for additional information.

Application Fee

There is no application fee for the JD program.

International Applicant Information

Applicants who have earned degrees or received diplomas from foreign institutions must submit all materials
required of first-time JD applicants.

In addition, applicants who have completed coursework or earned degrees from foreign institutions should
submit their foreign transcripts through LSAC's CAS. Foreign transcripts received will be sent to the American
Association of Collegiate Registrars and Admissions Officers (AACRAO) where the transcript will be
authenticated and analyzed. This service is included in the standard CAS fee. The data will be assembled into a
foreign credential evaluation document that contains AACRAO's summary, copies of the transcripts (and
translations, as necessary) and a TOEFL or IELTS score, if applicable.

Applicants who were educated in foreign countries at institutions where English is not the primary language
must also register for the TOEFL (toefl.org) or IELTS (ielts.org). Applicants who register for the TOEFL must
advise Educational Testing Service (ETS) to send their TOEFL score to DePaul University College of Law (institution code 1165).

LSAC will incorporate the applicant's foreign credential evaluation, TOEFL or IELTS score and associated documents into the regular CAS report.

While the College of Law strongly encourages international applicants to submit their foreign transcripts to the CAS, we will also accept detailed evaluation reports from Educational Credential Evaluators (ece.org), World Educational Services (wes.org) or from any other member of the National Association of Credential Evaluation Services.

International applicants who have graduated from foreign law schools may receive up to 28 credit hours toward the JD degree. The determination of applicable credit is made upon admission. For additional information, including a copy of the Financial Affidavit of Support Form for International Students, please visit international.depaul.edu/admission.

**Joint Degree Programs**

DePaul offers five joint degree programs: the JD/MBA degree with the Kellstadt Graduate School of Business; the JD/MS in Public Service Management and the JD/MA in International Studies, both with the College of Liberal Arts & Social Sciences; the JD/MS in Computer Science Technology with the College of Computing and Digital Media; and the JD/Masters in International and European Business Law with the Pontificia Universidad Comillas (Madrid, Spain).

Those seeking a joint degree first must apply and be accepted for admission to the College of Law. Admission is made to the appropriate joint degree program only after completion of the first-year core curriculum in the College of Law with above average academic achievement. Thereafter, if accepted into the joint degree program, law students begin their joint degree studies.

A separate application may be required for each program and should be submitted during the first year of law school. In addition, an entrance exam such as the GRE or GMAT may be required depending on the requirements of the program to which the applicant is applying.

More information about joint degree programs is available at law.depaul.edu.

**Transfer Applicant Information**

DePaul University College of Law welcomes applications from students who will have completed, within the preceding two years, at least one year of study at another ABA-accredited law school. Transfer applicants may apply for admission to the day and evening programs during the fall and spring semesters. Transfer applicants admitted to the College of Law may receive up to 30 hours of credit toward the JD degree. The determination of applicable credit is made upon admission. DePaul University does not have an articulation agreement with any university or law school program regarding transfer admission.

Students applying for transfer admission complete a different online application than first-year applicants. Transfer applicants are required to submit the following: transfer student application form, one letter of recommendation from a law school professor, resume, personal statement and current LSAC CAS report. In addition, transfer applicants must submit directly to the Office of Law Admissions: (1) a letter of good standing indicating eligibility to return from all previously attended law schools, (2) law school transcripts from all previously attended law schools. Law school transcripts must provide grades for all coursework attempted. While a transcript showing spring grades generally is required to review the application, the Admissions Committee may make an exception and grant a conditional admission based upon an applicant's strong academic performance in the fall semester. Class ranks are not required to evaluate an applicant's transfer application.

In evaluating transfer applicants, the Admissions Committee will consider the applicant's undergraduate academic record, LSAT score, law school grades, personal statement, letter of recommendation and other information requested in the application.

**Financial Assistance**

DePaul University and the College of Law provide a range of financial assistance in the form of loans and scholarships. Should you wish to apply for financial assistance, indicate your intent in the application for admission. Financial aid applications will be available shortly after January 1.

**Scholarship Assistance**

All admitted students are automatically considered for applicable scholarship awards. No separate application is required. Dean's Scholarships are awarded to entering law students based upon their achievements, personal qualities and potential to contribute to the DePaul law community. Scholarship recipients are notified of their award in the acceptance letter.
Need-Based Assistance

To apply for loans and other need-based assistance, the Free Application for Federal Student Aid (FAFSA) is required and can be obtained after January 1 at colleges and universities or at the FAFSA website (fafsa.ed.gov). The FAFSA code for DePaul University College of Law is 001671. The FAFSA must be complete and on file in the Office of Financial Aid on or before March 1 in order to receive full consideration for DePaul-administered financial aid.

For additional financial aid and scholarship information, visit the DePaul University College of Law website at law.depaul.edu.

About

The College of Liberal Arts and Social Sciences is committed to providing all of its students with an education that balances in-depth study in select areas with a breadth of experience in the various disciplines that form the core of human knowledge. All programs of study share a commitment to the highest standards of academic quality, to a mode of study that nurtures critical thinking skills, to a self-conscious examination of questions of value and meaning, and to the development of those habits of the heart and mind intrinsic to a life-long and independent learner.

Our commitment is reflected in a faculty that is as strongly committed to teaching as it is to research. It is reflected in curricular practices that discourage students from concentrating in one subject area to the exclusion of all others. And it is reflected in the College’s encouragement of interdisciplinary areas of study that underline the connections and unities among the various areas of knowledge.

The College values and nurtures the Catholic, urban, and Vincentian mission of the University. The interactions among its faculty and between its faculty and its students are characterized by personalism. Significant portions of the curriculum speak to questions of social responsibility, ethical standards for behavior, and an active engagement with the people and the challenges of the Chicago community.

Academics

The College of Liberal Arts and Social Sciences offers a wide range of Undergraduate majors, Graduate programs and Certificates.

Majors

- African and Black Diaspora Studies (BA)
- American Studies (BA)
- Anthropology (BA)
- Arabic Studies (BA)
- Art, Media, and Design (BA)
- Catholic Studies (BA)
- Chinese Studies (BA)
- Economics (BA)
- Economics Honors (BA)
- English (BA)
- French (BA)
- Geography (BA)
- German (BA)
- History (BA)
- History of Art and Architecture (BA)
- International Studies (BA)
- Islamic World Studies (BA)
- Italian (BA)
Minors

- African and Black Diaspora Studies (Minor)
- American Politics (Minor)
- American Sign Language (Minor)
- American Studies (Minor)
- Anthropology (Minor)
- Arabic Language (Minor)
- Arabic Studies (Minor)
- Archaeology (Minor)
- Bioethics and Society (Minor)
- Catholic Studies (Minor)
- Chinese Language (Minor)
- Chinese Studies (Minor)
- Cities (Minor)
- Classical Studies (Minor)
- Commercial Chinese (Minor)
- Commercial French (Minor)
- Commercial Spanish (Minor)
- Community Service Studies (Minor)
- Comparative Literature (Minor)
- Creative Writing (Minor)
- Economics (Minor: Liberal Arts and Social Sciences)
- English Literature (Minor)
- Food Studies (Minor)
- French (Minor)
- French Translation (Minor)
- Geography (Minor)
- Geography Nature-Society Studies (Minor)
- German (Minor)
- German Studies (Minor)
- Global Asian Studies (Minor)
- Graphic Art (Minor)
- History (Minor)
- History of Art and Architecture (Minor)
- History of Law (Minor)
- Illustration (Minor)
- International Politics (Minor)
- International Studies (Minor)
- Irish Studies (Minor)
- Islamic World Studies (Minor)
- Italian (Minor)
- Japanese (Minor)
- Japanese Studies (Minor)
- Latin American and Latino Studies (Minor)
- Lesbian, Gay, Bisexual, Transgender, Queer Studies (Minor)
- Museum Studies (Minor)
- Peace, Justice and Conflict Studies (Minor)
Honors Program Alternative

Students pursuing degrees in the College of Science and Health are to follow the Honors Program Requirements listed below:

**Honors Core**

- HON 110 HONORS DISCOVER CHICAGO
  
  or  
  HON 111 HONORS EXPLORE CHICAGO

- HON 100 RHETORIC AND CRITICAL INQUIRY

- HON 101 WORLD LITERATURE

- HON 102 HISTORY IN GLOBAL CONTEXTS

- HON 104 RELIGIOUS WORLDVIEWS AND ETHICAL PERSPECTIVES

- HON 105 PHILOSOPHICAL INQUIRY

- HON 201 STATES, MARKETS, AND SOCIETIES

- HON 207 TOPICS IN COGNITIVE STUDIES

**Science Requirement**

- BA students in Math and Psychology complete a two course science requirement
  
  - HON 225 HONORS LAB SCIENCE TOPICS
  
  - One course chosen from the university's Scientific Inquiry list

- BA students in Environmental Studies replace the two Honors Science courses with Honors Approved Electives.

- BS students are waived from this requirement.

**Arts Requirement**

- HON 205 INTERDISCIPLINARY ARTS

- One applied, performance, or studio arts course from approved list. Pathways Honors students in a 3-year program may be waived from the Fine Arts Elective requirement.

**Language Requirement**

- Three courses of intermediate or advanced language study.

- Students who meet the proficiency requirement by placing at the 200-level of a language may consult with an Honors advisor for alternative options for a 3-course sequence to replace the language requirement.

**Junior Seminar**

- HON 301 HONORS JUNIOR SEMINAR IN MULTICULTURALISM
The Honors Program is committed to developing students' knowledge and cultural awareness so they may respect and learn from difference. Honors students meet the multicultural requirement by completing HON 301, the Juniors Seminar in Multiculturalism.

**Senior Capstone**

- Choose one from below
  - HON 350 HONORS SENIOR SEMINAR
  - HON 351 HONORS SENIOR SEMINAR IN SERVICE LEARNING
  - HON 395 HONORS SENIOR THESIS

Students who choose to complete an Honors Senior Thesis must have their project approved at least one term prior to executing the project. To gain approval for a senior thesis, students must complete an application, including a project proposal signed by a faculty advisor. In keeping with the interdisciplinary nature of the program, the thesis should attempt to move outside the boundaries normally associated with one particular discipline and should be supervised by two readers from different academic fields. While the final product must be a substantial piece of work building on the student's accumulated knowledge and new research, specific requirements for each thesis will depend on the nature of the project. See the Director or Associate Director for an application. Students may opt to enroll in HON 300: Honors Research Seminar (a two-credit elective) to receive dedicated guidance as they prepare the thesis project.

**Honors Approved Electives**

Approved Electives are chosen in consultation with an Honors advisor to achieve specific academic or professional goals. Courses completed for Study Abroad, 200-300 level courses taken to achieve a minor or a second major, or 200-300 level courses chosen to pursue an area of interest outside of the major can count as Honors Approved Electives. Students in Mathematics, B.A. students in Psychology, and B.A. students in Environmental Science have three Honors Approved Electives. B.S. students in Health Sciences may count the Ethics requirement in place of one of the four Approved Electives. All other B.S. students have four Honors Approved Electives.

Pathways Honors students in a 3-year program will be waived from the Fine Arts Elective requirement. Honors Approved Electives will be utilized to fulfill requirements for the academic program they are in.

B.A. students in Environmental Studies are required to complete HON 180 DATA ANALYSIS AND STATISTICS. All other CSH students follow the Calculus or Statistics requirement for the major and are waived from the HON 180 requirement.

**Experiential Learning**

Honors students fulfill the university's requirement for Junior Year Experiential Learning (JYEL) through completion of an internship course, a service learning course, or a mentoring course, or through participation in a study abroad program. The course will verify completion of the JYEL requirement and be placed where appropriate in the student's academic program – either as a major requirement, open elective, Honors Approved Elective, or (in the case of HON 351) an Honors core requirement.

**Grade Requirements**

A grade of C- or higher in HON 110 or 111 is required to remain in the Honors Program.

A grade of C- or higher is required to pass the following courses: HON 100, HON 350, HON 351 and HON 395.

**Exceptions for Neuroscience Majors or Concentrations**

Honors students majoring in Neuroscience are waived from HON 207 and the fourth Honors Approved Elective. Honors Approved Elective 3 is replaced by NEU/PHL 228.

Honors students majoring in Psychology BS with Cognitive Neuroscience concentration are waived from HON 207, which is replaced by a 5th Honors Approved Elective.

Honors students majoring in Biological Sciences with a concentration in Neuroscience are waived from HON 207, which is replaced by a 5th Honors Approved Elective.
Admission & Aid

Information about admission to the College of Liberal Arts and Social Sciences is found in the Admission & Aid section of the DePaul website (link here).

Scholarship Opportunities

Information about the majority of scholarships is found here.

The College awards a handful of targeted, one-off, and relatively small ($500 - $3000) scholarships annually. Some academic departments have similar scholarships for their eligible majors. All scholarships are managed via Scholarship Connect.

Graduate students may also be eligible for graduate assistantships, which package tuition waivers with a stipend, or full or partial tuition waivers. Contact Graduate Admission (GradDePaul@depaul.edu) or the graduate program of interest for more information about what opportunities exist.

Double Demon Scholarship

The Double Demon Scholarship is awarded to DePaul alumni and covers 25 percent of tuition for degree, non-degree or select certificate coursework taken at the graduate level.* Both full-time and part-time students are eligible and no application is necessary. To learn more, contact the admission office for your college of interest (see listing below).

*Please note: The Double Demon Scholarship cannot be used in conjunction with other DePaul scholarships, waivers or awards. University employees are eligible for other tuition benefits and are not eligible. The scholarship does not cover coursework from the Center for Professional Education (CPE), the Institute for Professional Development (IPD), coursework in a doctoral program or a master of fine arts (MFA), School of Music, the Theatre School, College of Law and a few other select programs.

Financial Aid

Information about financial aid is found here.
Graduate Admission

Applicants are admitted to the College of Liberal Arts and Social Sciences on the basis of their ability to complete programs of study and research prescribed for the master’s and doctoral degrees. Specifically, admission qualifications are measured by academic criteria. In accord with these criteria, applicants are admitted in one of three major categories: degree-seeking, non-degree-seeking, and student-at-large.

The admission process begins with an online application, found here.

Degree-Seeking Students

Applicants are admitted as degree-seeking students in either of two ways: full or conditional.

Full Degree-Seeking Status

The minimum requirements for this status are:

- Bachelor’s degree conferred by a regionally accredited institution.
- Scholastic achievement in undergraduate studies satisfying all requirements for entering a specific graduate program.
- Submission of all required supporting credentials.
- Unconditional approval by the department or program director of the applicant’s proposed course of graduate study.

Please note these are minimum requirements for full admission. The departmental and program sections of this Catalog provide additional, more specific and selective, criteria for admission to specific programs.

Conditional Degree-Seeking Status

The minimum requirements for this status are:

- Bachelor’s degree conferred by a regionally accredited institution.
- Scholastic achievement in undergraduate studies indicating a capacity to pursue successfully a specific program of graduate study.
- Submission of all required supporting credentials.
- Conditional approval by the department or program director of the applicant’s proposed course of graduate study.

A conditionally admitted applicant is eligible for reclassification to full, degree-seeking status when the conditions of his or her admission have been satisfied.

Non-Degree Seeking Students

The dean may admit as students those applicants who do not wish to pursue an advanced degree. Non-degree-seeking students may, at some future date, make application to a graduate program, but they are not accorded special consideration for admission. Students should consult the intended degree program’s website for information about application requirements.

The minimum requirements for this status are:

- Bachelor’s degree conferred by a regionally accredited institution
- Academic achievement in undergraduate studies indicating a capacity to succeed in graduate course work (minimum of 2.50/4.00)
- Submission of official transcript from bachelor’s degree granting college or university
- Approval by the director of graduate admission.

Students admitted as non-degree graduate students are eligible to enroll in graduate-level courses only.

When such students apply to a graduate program, the departmental or program director of their specific graduate course of study may recommend, in writing, to the dean that a maximum of three courses (12 quarter hours) completed by the student under the non-degree-seeking status be counted toward fulfillment of the advanced degree requirements.

Combined Bachelor’s/ Master’s Programs

Some programs of study offer an accelerated master’s degree. In these programs, Liberal Arts and Social Science
undergraduates take three graduate courses their senior year and complete the master's degree in a minimum of one additional year. Further information about these combined programs can be found within specific program descriptions in this Catalog.

About

The purpose of the African & Black Diaspora Studies Program is to provide DePaul students with a systematic, interdisciplinary, and integrated course of study of Africa & the Black Diaspora. The Program provides students with an opportunity to earn a Bachelor of Arts degree in African & Black Diaspora Studies with a concentration in Africa, Black America, and/or Afro-Caribbean and Latin America. African & Black Diaspora Studies will also train students in comparative analysis of regions (e.g., peoples, religions, philosophies) through an incorporation of the study of history, power, identity, gender, and race. The Program's offerings provide students with opportunities to learn about and develop expertise in the cultures, epistemologies, histories, sciences, and societies of Africans and peoples of African descent. The Program prepares students to pursue professions and careers that require a systematic knowledge of Africa and its Diaspora.

About

American Studies courses are methodologically grounded in many different areas of cultural studies including historiography, media studies, material culture, visual literacy, critical race theory, and gender/sexuality studies. Students are expected to gain competency in American cultural studies by mastering the theoretical and intellectual frameworks of their concentration and by learning to interpret and analyze primary documents.

About

Anthropology is the comparative study of humanity, focusing on people in all places and throughout history and prehistory. Courses engage students in the analysis of beliefs, values, and practices from a perspective that understands societies on their own terms. This perspective includes comparing the similarities and differences among different groups and appreciating and valuing different ways of living. Students study other cultures in order to learn more about their own. This curriculum affords students the opportunity to see the interaction between "what we know" and "what we do" that lies at the heart of the study of humanity.

Our curriculum combines the best parts of a critical, creative, liberal arts education with practical, professional preparation. The major courses direct the student toward the subfields of cultural anthropology, biological anthropology, and archaeology, with a focus on applied research in these sub-fields. As part of the major, students engage in several research projects, including those that expose them to the application of anthropological knowledge for non-academic audiences. Out-of-class research projects in the City of Chicago are integral components of several courses. Students graduate with an extensive knowledge of how anthropology is actually done. We bring students farther into this practical side of the discipline than any other BA program in the country.

Academic careers are attractive to some graduates, but more than half of all professional anthropologists work outside of academic institutions. Some of these careers include research for public and private organizations, administration and/or public policy on the local, regional, federal, or international level; research and work in museums; intercultural communication; advertising, marketing, and public relations; forensics; human resources; public health; health care; and law. They also contribute to non-governmental and international organizations. Within the context of administration or public policy, anthropologists are engaged in cultural resource management (CRM), monitoring the preservation of cultural resources for national parks, museums, and state or municipal cultural institutions (i.e., parks and historical societies). Anthropology enhances other career paths, such as modern languages, international studies, international relations, cultural studies, and international business. Students will have completed several ethnographic research projects and acquired archaeological research skills by the time they graduate.

The extensive ethnographic research experience qualifies students with BA degrees to work in both non-profit (social service agencies) and for-profit (marketing, design, user-based) research settings. The archaeological certification opens avenues for careers in cultural resource management (CRM), and monitoring the preservation of cultural resources for national parks, museums, and state or municipal cultural institutions.

About

The Department of Art, Media, and Design (AMD) offers a general curriculum which identifies and promotes continuing contact with the enduring values of our artistic heritage and the application of these values to the future. The educational aim of the department is to provide, through individualized instruction, a broad foundation in art practice and art history. The curriculum emphasizes fundamental artistic concepts through problem solving and experimentation.

The Department offers three concentrations: Graphic Art, Photography and Media Art, and Studio Art, and four minors: Graphic Art, Photography, Studio Art (not available to AMD majors), and Illustration (shared with CDM and available to AMD majors). Students can take advantage of the small class sizes and personalized instruction from studio and media art faculty. Among area universities, the department now boasts two of the finest digital computer laboratories dedicated solely to studio and media arts. Our newly renovated facility features two darkrooms, two computer digital laboratories, a teaching exhibition space, wood and metal sculpture studios, and dedicated studios for video, photography, digital imaging, sculpture, printmaking, painting and drawing.

Our program in Global Asian Studies at DePaul University is the only one of its kind in the United States. Courses offer an in-depth, challenging and critical thinking based perspective on ancient societies, cutting edge technology and current events in Asian countries, the Asian region, Asian diaspora and Asian American communities.

Our faculty teach more than 100 courses in the arts, humanities, languages and social sciences. We also offer a number of Study Abroad trips to Asia and the Americas, as well as host events and workshops for students.

Drawing from our leading expertise in China and Japan, our program also reflects growing expertise in India and Southeast Asia.

From ancient cultures to modern technology, DePaul's Global Asian Studies program provides an important foundation for students to prepare to have a leading role in the 21st "Pacific" Century.

About

The Department of Catholic Studies is intellectual in focus and interdisciplinary in nature. Rigorous intellectual study, a deepened critical understanding and an appreciation of the Catholic contribution to human civilization are its main goals. The program explores Roman Catholicism as a religious and cultural reality that expresses and motivates multiple forms of human expression. All members of the university are invited to participate in the scholarly examination of Catholicism and the development of Catholic thought. True to DePaul's tradition, no religious test is applied to either students or faculty participating in the department. In addition to the offerings of DePaul University, upper-level students in the program in Catholic Studies are able to take selected courses at the Catholic Theological Union at Chicago. The cooperative relationship between DePaul and CTU opens to
students in the program the resources of the largest Catholic school of theology and ministry in North America. The Catholic Studies major is designed to give students with differing learning objectives and career goals maximum flexibility in the design of their Bachelor of Arts degree. In order to ensure intellectual coherence in their program, all students are expected to meet quarterly with their academic advisor to design a course of study, refine their learning goals, and select classes that meet their educational and professional objectives.

About

The Community Service Studies (CSS) Minor is a multidisciplinary program that provides a framework for understanding and engaging in critical social issues at the level of community. While the notion of community is increasingly complex, the program explores the nuances of community as defined through the lens of groups with common affiliation, identity, or grievance that may be geographically or nongeographically-based. The curriculum relies heavily on community-based service learning courses and is designed to provide students with a foundation of analytical, reflective, interpersonal, and leadership skills. Through supporting university partnerships with Chicago-area community-based organizations, students gain a local perspective on social justice issues, including those built on race, class, and gender inequalities and other forms of social, economic and political exclusion.

The practice of service is often shaped by particular economic and cultural circumstances related to power, privilege, and identity. A central component of CSS is the importance of viewing communities through an asset lens and thus working to support existing community strengths rather than responding to needs. Students minoring in CSS therefore develop strong critical self-reflection skills that guide them as future leaders in making ethical and socially responsible decisions.

About

The Comparative Literature minor is designed for students who combine the drive and the ability to master foreign languages with a strong commitment to theoretical and interdisciplinary approaches to literature. Students must do a substantial portion of their work in at least one foreign language.

Although students will take many of their courses in the departments of their elected literary fields, the program in comparative literature is distinguished from national literature departments by its comparative scope and by the requirement of seminars that focus on fundamental theoretical questions regarding the nature of literature and literary inquiry. The requirements for the minor are designed to allow each student to follow a course of study that combines intellectual rigor with the pursuit of personal interests.

About

Critical Ethnic Studies is an interdisciplinary program offering a Master of Arts (MA) as well as a combined BA/MA with the Department of Latin American and Latino Studies. The Master of Arts in Critical Ethnic Studies prepares students for advanced analysis of race and ethnicity in an urban and global context. It provides an interdisciplinary approach to the studies of systematic marginalization of racialized minorities. It also looks at how racialized groups respond to and counter these forces through art, culture, political organization and other forms of social citizenship.

This program emphasizes social justice and transformation while focusing on U.S. ethno-racial populations through an intersectional, transnational, and urban framework. Students apply critical theories to complex social and cultural issues. The program consists of a combination of core courses and electives from across the university. The Critical Ethnic Studies final project may be comparative or focus on a single ethnic or racialized group through the use of intersectional methodologies.

The MA in Critical Ethnic Studies may also be expanded to include select graduate certificate programs covering particular areas of interest. Students participating in a combined MA/certificate program should consult with their academic advisor to determine what coursework might count toward both programs. A separate application process for the certificate is required. Students who are interested in any of the following combination programs should contact the Graduate Student Services Office for additional information.

- Critical Ethnic Studies + Community Development Certificate
- Critical Ethnic Studies + Digital Humanities Certificate
- Critical Ethnic Studies + Global Health Certificate
- Critical Ethnic Studies + Public Health Certificate
- Critical Ethnic Studies + Social and Cultural Foundations in Education
- Critical Ethnic Studies + Social Research Certificate
- Critical Ethnic Studies + Women's and Gender Studies Certificate

For more information on the Critical Ethnic Studies program, please visit the Critical Ethnic Studies Website.

Faculty
About

Economics is both a social science discipline and a framework for analyzing production, consumption, and distribution decisions. The goal of the undergraduate curriculum is to offer students the theoretical background necessary to understand business and policy issues, as well as the quantitative and analytical skills necessary to evaluate these issues independently. The Economics Department offers courses that explore topics such as unemployment, inflation, production and distribution, economic growth, environmental issues, poverty, urban and regional development, international trade, labor issues, economic history, and international economic relations.

Courses emphasize the need for accurate knowledge of business institutions and economic phenomena, for theories capable of explaining these phenomena, for estimating relationships among economic variables, and for testing explanations.

Graduates with a major in economics are solidly prepared for employment in the private, public, and non-profit sectors, or for advanced studies in business, law, and economics.

DePaul offers Economics as both a major and minor field of study through both the College of Liberal Arts and Social Sciences and the Driehaus College of Business. An Honors Track option is available to economic majors in both colleges. In addition, the Department of Economics offers the Accelerated Bachelor-Master of Science in Business and Economic Policy Analysis.

About

The study and practice of reading and writing literature are central to a liberal arts education and foster skills that are critical to success in virtually all professional and personal contexts. The English department at DePaul boasts an innovative and engaging curriculum, a faculty of highly accomplished teacher-scholars, friendly and efficient staff, committed advisors, outstanding students, and exciting opportunities for internships and other co-curricular involvement.

The department's curriculum unites historical and theoretical perspectives in literary study with sustained practice in creative and analytical writing. It encourages critical and creative thought, fosters research and communication skills, and develops a student's ability to negotiate diverse perspectives and points of view.

The English major undergraduate program--one of the largest in the College--offers two concentrations, Literary Studies and Creative Writing, as well as two minor programs, English Literature and Creative Writing. Junior English majors interested in graduate study may apply to the combined bachelor's/master's programs in English or Writing and Publishing, and those interested in teaching high school English may apply to the TEACH Program, a combined bachelor's/master's program developed and taught with faculty in the College of Education.

The department also houses two graduate programs, the Master's in English and the Master's in Writing and Publishing. Students in these two programs can elect to complete certificates in Teaching English in Two Year Colleges, Teaching English as a Second Language (TESOL), Women's and Gender Studies, Publishing, or Digital Humanities.

Special Programs

Internships

English students may qualify for a variety of internships, receiving significant on-the-job experience in such areas as creative writing, business writing, editing, publishing, communications, non-profit work, and education. Sophomores, juniors, and seniors may receive as many as 4 hours of elective credit toward their major, which includes Junior Year Experiential Learning (JYEL) credit. Students might locate an internship on their own or choose from the internships found quarterly by Prof. Chris Green, Coordinator of Professional Internships in Writing and Publishing. To earn credit, students will need Professor Green's approval to register for ENG 392/509, an online class designed to complement their internship work. Students will also benefit from quarterly Career Nights featuring panels of professionals.

Two-Year College Teaching Internship

Graduate students in English or a related field are eligible to apply for an internship at an area two-year college. This internship can be undertaken on its own, or as part of the Certificate in Teaching English in Two-Year Colleges. Please contact Dr. Carolyn Goffman for more information about this opportunity.

Certificate in Teaching English in Two-Year Colleges

The Certificate Program in Teaching English in Two-Year Colleges is an interdisciplinary program housed in the Department of English and taught by faculty in both English and the Department of Writing, Rhetoric, & Discourse. The program is designed to prepare prospective teachers of introductory classes in English, Writing, and the Humanities in city and community college settings. Participants in the Certificate Program will learn to teach critical and analytical reading, the processes and disciplines of writing, and other aspects of the arts, humanities, or communication curriculum in two-year colleges.

The Certificate is comprised of 16 hours of credit: three classroom-based courses and a teaching internship, enrolled as an Independent Study.

Application

To be admitted to the Certificate Program, students must have completed or be currently pursuing a master’s degree in English; Writing and Publishing; Writing, Rhetoric, and Discourse; or a related field.

Applications are accepted at any time. It is strongly recommended that the prospective applicant contact the program director, Dr. Carolyn Goffman, before applying (cgoffman@depaul.edu; 773-325-8688). Please email all application materials directly to Dr. Goffman (not to Graduate Admissions).

Application materials:

- Cover letter describing interest in teaching in a two-year college
- Current CV (résumé)
- Undergraduate and graduate academic transcripts
- Sample of recent academic or professional writing
- Names of two faculty references

Certificate Requirements:

- ENG 474 TEACHING LITERATURE
- WRD 540 TEACHING WRITING
- One course from the following list:
  - ENG 407 LANGUAGE AND STYLE FOR WRITERS
Two-Year College Teaching Internship

Graduate students in English or a related field are eligible to apply for the internship even if they are not enrolled in The Certificate Program. Please contact Dr. Goffman about applying for an internship.

Also, please note: Chicago-area two-year colleges operate on the semester system; therefore, the internship’s duration does not correspond to DePaul’s academic calendar. The intern should expect to complete the work for ENG 509 some time after the end of the quarter in which registered. A grade of “R” (indicating work in progress) will be assigned temporarily, to be changed to a letter grade when work is completed.

About

Located in the Lincoln Park neighborhood on Chicago’s north side, DePaul’s Department of Geography was founded in 1948. Over the last sixty-five years, the Department has grown and developed to reflect changes in the geographic discipline, in technology, and the labor market. Today, the Department includes eight full-time faculty members and additional contingent faculty instructors, teaching a wide variety of courses within several sub-disciplinary and topical areas. The American Association of Geographers recognized the achievements of DePaul’s Department of Geography with its 2016 Award for Bachelors Program Excellence.

As the largest geography department in the Chicago metropolitan region, we are positioned extremely well to be the major provider of undergraduate Geography degrees and professional certificates. With our commitment to critical human geography and to strong specializations in Urban Geography, Geotechnologies (Geographic Information Systems (GIS) and Remote Sensing), Cultural, and Environmental Geography, we offer high quality programs that lead to careers in government, GIS, community and international development, urban planning, environmental management, and intelligence, to name a few.

At DePaul, Geography courses can be found in every Liberal Studies Program Learning Domain, making it an ideal program of study for students interested in double majoring, or adding a six-course minor. Many Department of Geography alumni continue their studies at the graduate level in geography, urban planning, and other natural and social sciences. Recent graduates have joined MA or PhD programs in geography, GIS, urban planning, urban studies, and international relations at universities such as Syracuse University, Rutgers University, University of Illinois at Chicago, the University of Maryland, UCLA, University of Kentucky and the University of Colorado at Boulder.

Certificate in Geographic Information Systems

The Certificate Program requires 20 hours of instruction. It provides sophisticated education in GIS, remote sensing and cartography and serves as a basis for entry-level employment in the geotechnology industry. There are five required courses to complete the certificate:

- GEO 141 GEOGRAPHIC INFORMATION SYSTEMS I: DIGITAL MAPPING
- GEO 242 GEOGRAPHIC INFORMATION SYSTEMS II: COMMUNITY GIS
- GEO 243 REMOTE SENSING
- GEO 343 REMOTE SENSING II
  or GEO 344 GEOGRAPHIC INFORMATION SYSTEMS III: SPATIAL ANALYSIS FOR SUSTAINABILITY
- GEO 391 STATISTICAL DATA ANALYSIS FOR GIS

GEO 141, 242 and 344 must be taken in sequence. GEO 141 is a pre-requisite for GEO 391. GEO 243 can be taken at any time. Please contact the Department if you are considering pursuing the GIS Certificate, even if you are a declared geography major.

In order to earn a certificate in GIS, a student must:

- Earn at least a grade of C- in each Certificate course.
- Earn at least a cumulative GPA of 2.0 for all courses applied to the Certificate.
- Earn a letter grade. The pass / fail option may not be selected for courses in the Certificate.

A student completing a GIS Certificate is eligible to simultaneously complete a Geography minor. No more than 3 GIS Certificate courses can be applied to a Geography minor. A student wishing to complete a GIS Certificate and a Geography minor will complete a minimum of 8 Geography courses. Please see a faculty advisor in the Department of Geography for further details.

About

The Department of History offers an innovative curriculum that emphasizes student research and that allows students to tailor concentrations to meet their interests and goals. The History major teaches students how to research, write, and engage with other students and scholars about the processes of historical change in a global context. The curriculum culminates in an annual Student History Conference that highlights student achievement.

Currently home to more than 35 full- and part-time faculty, and approximately 300 majors and minors, the History Department serves as a robust center for talks, campus activities, and intellectual life in the College of Liberal Arts and Social Sciences. The department's faculty are teacher-scholars who specialize in virtually every
region of the world—American, African, Asian, European, Latin American, and World History—and who specialize in a broad range of subfields that allow students to understand a wide range of topics and methods.

The undergraduate program offers a variety of concentrations including the standard concentration, public history, pre-law, and secondary education in history. Students can also apply for one of our joint degree programs. The TEACH program combines history courses with those necessary for specialization in secondary education. TEACH students receive both BA and MA degrees. The Department of History, in conjunction with Journalism, offers another innovative joint degree program. Students combine a BA in History with an MA in Journalism. Students can also combine a BA in History with an MA in International Studies. These joint degree options allow students to acquire the valued skills and broad knowledge a history education provides while working towards a professional program and certification in five years. Plus, students received discounted graduate tuition.

The Department offers day and at night courses on the Lincoln Park and Loop Campuses, as well as fully online and hybrid courses. The history major offers a foundation for any number of career paths. DePaul History students also have an excellent track record of acceptance at leading professional programs and graduate schools.

About

The Department of the History of Art and Architecture offers a curriculum that identifies and promotes continuing contact with the enduring values of the world’s artistic heritage and the application of these values to the future. It provides a broad foundation in the history of art and architecture that emphasizes the exquisitely diverse ways that peoples across time and place have inscribed their most cherished cultural traditions into their material world.

About

The Interdisciplinary Studies Program (IDS) is an innovative, flexible, and highly individualized graduate program designed to meet students’ academic and professional goals. The program gives students the opportunity to design a program of study tailored to their own needs and interests. When students choose IDS, they take on the exciting challenge of creating their own curriculum and unique plan for learning. Creating an individualized program requires maturity, self-motivation, and independence. Students seeking a combination of flexible options and academic challenges are natural IDS candidates. IDS is a creative alternative to more rigid traditional, discipline-specific programs. Students can build their particular academic or professional interests and concentrate on specialized fields that are not available in traditional graduate programs.

The program offers students individualized cross-disciplinary majors, incorporating courses drawn from social sciences, humanities, business, computer and information science, and public service.

The program offers the following:

- Individual, self-designed graduate program of study that builds on specific academic and professional interests.
- Ability to combine various academic disciplines in chosen areas of study.
- Choice of courses in most colleges and schools.
About

The Department of International Studies offers a Bachelor of Arts (BA) degree, a Master of Arts (MA) degree, and a combined BA/MA program. We also provide a minor in International Studies for undergraduate students from other departments.

Our programs are designed to equip students with the interdisciplinary approach, critical thinking skills, and international perspectives necessary to address real world challenges. Our faculty and affiliated faculty come from diverse academic backgrounds and share a commitment to fostering critical thinking through a rigorous interdisciplinary curriculum founded in critical social theory and international political economy.

The BA and MA curricula are unique for their interdisciplinary approach to international studies and their commitment to placing the themes of power and inequality at the heart of academic inquiry. Unlike conventional programs that focus on international security and economy, our program addresses the economic in conjunction with the political and social. Moreover, all students are expected to develop and maintain proficiency in a language other than English. Students learn to think in more international and interdisciplinary contexts, to value social and cultural complexity, and to question conventional wisdom. As a result, our students often engage in activism and social justice work in Chicago, nationally, and internationally.

For more detailed and up to date information, please visit the International Studies Department Website.

Faculty

The department houses six core faculty and two visiting faculty whose research and teaching interests include postcolonial theory, Middle East politics, critical social theory, migration and diaspora studies, gender and sexuality, critical development studies, international law, international political economy, and social movements. As an interdisciplinary program, we involve faculty from across the university in teaching classes, hosting events, and advising students. Affiliated faculty come from Political Science, History, Geography, Modern Languages, Latin American and Latino Studies, Anthropology, African and Black Diaspora Studies, Religious Studies, Educational Policy Studies, Environmental Sciences, and Women's and Gender Studies. Despite the varied teaching and research interests, faculty members share a commitment to examining the world critically through an interdisciplinary and international lens.

The Irish Studies Program is an interdisciplinary field of study, offering an undergraduate minor to students interested in studying Ireland along with the worldwide Irish Diaspora and the contemporary integration of Ireland within globalized systems of political economy, international relations, travel and communication.

The Irish Studies Minor familiarizes students with a wide range of courses that explore Ireland and develop critical perspectives on its place in history and the contemporary world. Our faculty provides an interdisciplinary approach on a wide range of Irish topics from various fields of inquiry including History, Geography, Digital Media, Religious Studies, Women's and Gender Studies, Environmental Science, and English. Several study abroad programs offer courses that fulfill requirements towards the Minor as well. It takes six courses to meet the requirements for the Irish Studies Minor.

Our program grounds students in a study of Islam as a worldview/civilization and living reality. The program engages students in exploring primary texts, history, global Muslim communities and regional issues of the Islamic world. Three assumptions undergird the philosophy of this program: Islam is a religious tradition, an historical civilization and a living reality; it has interacted with all known forms of government and thus produced varied cultural expressions; and the religious core ties all of these cultural expressions together.

Students will not only investigate the history of Islam, major texts and ideas and sources in their coursework, but will also focus intensively on specific aspects of global Islamic experiences. Included in this coursework are the opportunities to take a closer look at the various histories of Islam in places such as the Middle East, Africa, South Asia, Central Asia, Europe and the Americas. Central to this project is a focus on specific contexts, local communities and individuals that continue to shape the legacies of Islam in their unique contexts.

This approach to the study of Islam is currently unmatched anywhere else in the United States and perhaps the world.

About

The Latin American and Latino Studies Program explores the cultural contributions of Latin Americans to the global community and highlights perspectives and traditions that have developed in the region. It analyzes the multicultural character of the peoples of Latin America by calling attention to the complex interplay among Indigenous, European, Semitic, Arab, Asian and African societies in the region. It explores the profound linkage that has emerged between Latin America and the United States, particularly through the construction of Latino communities in the U.S.

**About**

The LGBTQ Studies program posits sex and sexuality as central analytical categories within many different fields of inquiry. This emerging discipline scrutinizes the cultural production, dissemination, and vicissitudes of sexuality while attempting to decipher the meanings inscribed in the practices and discourses of sex. We may say that LGBTQ Studies does for sex and sexuality what women’s studies does for gender. It has grown out of women’s and gender studies, cultural studies, and the post-1969 discourse on the politics of sexuality both in the public sphere and the more limited arena of scholarly endeavor.

The Military Science Department offers students, as an adjunct to their major field of study, the opportunity to achieve commissions as Army officers in either the active Army, the U.S. Army Reserve, or National Guard through the Reserve Officers' Training Corps (ROTC) program. The program develops leadership, managerial potential, and the qualities of self-discipline, confidence, personal integrity, and individual responsibility. Emphasis is on learning through doing. The department's program prepares the student for a period of service as a commissioned officer in the United States Army, a service that can ultimately lead either to a military career or to a more responsible place in the civilian world. The curriculum is divided into two parts: Basic and Advanced. The Basic course normally encompasses the freshman and sophomore academic years. Basic-course students are under no obligation to enter into a contractual agreement with the U.S. Government. The advanced course encompasses juniors and seniors who have successfully completed the on-campus basic course. Students who have attended a special six-week summer training program, students who have previous Junior ROTC training, and qualified veterans may also be admitted into the advanced course. Upon enrollment in the Advanced Course, the student enters into a contractual agreement with the United States Government, whereby the student agrees to accept a commission in the United States Army for a period of active or reserve duty after his graduation. The government, in return, provides a monthly stipend of $300-500 for up to ten months of the school year.

Students may compete for ROTC two-year and three-year scholarships during their freshman or sophomore year. Scholarships can pay full tuition and fees, annual book allowance of $1,200, and $300-500 monthly during the remainder of the winner's undergraduate education. A Leaders Training Course summer program is available to selected students who have been unable to complete the normal two-year progression of Military Science. Students attend a six-week program at Fort Knox, Kentucky. This program, in conjunction with the normal two-year advanced program of Military Science, is designed to prepare the student for a period of service as a commissioned officer in the United States Army. The program provides an introduction to a variety of military-related topics. It involves instruction in map reading, marksmanship, first aid, tactics, fundamentals of...
leadership, and basic military skills.

About

The programs in Modern Languages seek to develop a student's ability to speak, understand, read, and write another language and to foster an appreciation of its literature and civilization. The department regularly offers courses in American Sign Language, Arabic, Chinese, French, German, Ancient Greek, Italian, Japanese, Latin, Russian, and Spanish.

Graduate Programs

The Department of Modern Languages offers the following graduate programs:

- Master of Arts in Arabic
- Master of Arts in Chinese
- Master of Arts in French
- Master of Arts in German
- Master of Arts in Italian
- Master of Arts in Japanese
- Master of Arts in Spanish

Undergraduate Programs

Major programs are available in Arabic Studies, Chinese Studies, French, German, Italian, Japanese Studies, and Spanish; these consist of advanced courses at the 200- and 300-levels. Students may begin their Modern Language major upon completion of elementary and intermediate courses (100-level courses) or successful placement testing.

Minor programs are available for all languages, including:

- American Sign Language
- Arabic Language
- Arabic Studies
- Chinese Language
- Chinese Studies
- Classical Studies
- Commercial Chinese Studies
- Commercial French
- Commercial Spanish
- French
- French Translation
- German
- German Studies
- Italian
All students are strongly encouraged to participate in DePaul’s Study Abroad Programs in China, France, Germany, Greece, Italy, Japan, Mexico, Spain, Poland, and other locations. Consult the Study Abroad Office for current offerings.

Language Proficiency Certificate

The Department of Modern Languages offers two certificates to current students and to non-degree seeking students/students-at-large: intermediate (low, mid, or high) language proficiency and advanced (low, mid, or high) language proficiency. Upon completion of the required classes and Written Proficiency Test, the student's certificate will be posted to their DePaul transcripts. Language proficiency certification will allow students to show future employers they are ready to compete in today’s global workplace.

To declare the certificate, students must contact the Department of Modern Languages.

Students will register and pay a fee to complete the Writing Proficiency Test (WPT) through Language Testing International, proctored by the Department of Modern Languages, and will receive a nationally recognized level of proficiency based on the standards developed by the American Council on the Teaching of Foreign Languages (ACTFL). Please refer to the Department of Modern Languages website for more information.

The department offers certificates in American Sign Language, Arabic, Chinese, French, German, Italian, Japanese, Russian, and Spanish. Certificates require a varying number of courses, depending on the student’s incoming language placement and desired level of proficiency.

Test credit and transfer credit are not applicable toward the certificate. All courses to be applied toward the certificate must be completed at DePaul.

Intermediate:

- Students are required to successfully complete a minimum of three courses at DePaul (level 104 and above - no transfer or test credit; DePaul study abroad program credit will be reviewed on a case by case basis) in order to earn the certificate.
- Student readiness for intermediate level (104 and above) courses will be established by the language placement exam, transfer credit, or test credit.
- The number of courses necessary to achieve an intermediate level certificate of proficiency (low, mid, or high) will depend on the student’s entering proficiency level (based on previous study/knowledge; courses required may be determined by the language placement exam, transfer credit, ACTFL Written Proficiency Test (WPT), or test credit) and student effort (time spent studying the language, the following recommendations for language proficiency development outside of the classroom, how well students perform in their language classes, etc.).
- At the end of the required number of courses, students must register and pay to take the American Sign Language Proficiency Interview to certify proficiency level. The level of proficiency, per ACTFL test results (Intermediate low, or higher), will be posted onto the student's DePaul transcripts.
- If students test below an intermediate level certificate, they may opt to:
  1. take additional language courses,
  2. work with the free language tutors through the Language Learning Center until the desired level of proficiency is achieved, and then retake the test, or
  3. drop the certificate program by emailing their advisor or college advising office.
- Students should familiarize themselves with the ACTFL proficiency standards for intermediate-level speakers in order to better understand how much time they may need to dedicate to language study for the certificate.

Advanced

- Students are required to successfully complete five courses at DePaul (200 and 300 level language courses - no transfer or test credit; DePaul study abroad program credit will be reviewed on a case by case basis).
- Student readiness for advanced level courses will be established by the language placement exam, transfer credit, or test credit.
- Degree-seeking students taking the certificate may also complete one of several minors in the language
simultaneous to the certificate.

- The number of courses necessary to achieve an advanced level certificate of proficiency (low, mid, or high) will depend on the student's entering proficiency level and student effort (time spent studying the language, the following recommendations for language proficiency development outside of the classroom, how well students perform in their language classes, etc.).
- At the end of the required number of courses, students must register and pay to take the ACTFL Written Proficiency Test (WPT) or the American Sign Language Proficiency Interview to certify proficiency level. The level of proficiency, per ACTFL test results (intermediate low, or higher), will be posted onto the student's DePaul transcripts.
- If students test below an advanced level certificate, they may opt to
  1. change their certificate program (intermediate low, mid, or high),
  2. take additional language courses,
  3. work with the free language tutors through the Language Learning Center until the desired level of proficiency is achieved, and then retake the test, or
  4. drop the certificate program by emailing their advisor or college advising office.

- Students should familiarize themselves with the ACTFL proficiency standards for advanced-level speakers in order to better understand how much time they may need to dedicate to language study for the certificate.

About

New Media Studies is an interdisciplinary field that studies the processes and platforms through which digitally-encoded media (photographs, text, audio, video) operate and circulate. New media studies is also the study of how digitally-encoded media products are combined into “new” media forms, such as web sites, webcasts, interactive games, graphic designs, and sales and technical information. The Master of Arts in New Media Studies combines critical interpretation and hands-on practice in coursework to prepare its graduates to function as productive and responsible individuals in the evolving social contexts created by digital media.

The Master of Arts in New Media Studies will prepare students to engage the new media by building:

- The ability to gather, process, and communicate information on the Internet
- An understanding of the historic role of new media in shaping contemporary consciousness
- An ability to identify appropriate technologies to accomplish a specific communication need using the Web and other online delivery systems
- An ability to edit and manage content for web sites and social media platforms
- An ability to apply rhetorically sophisticated strategies for writing, editing, and producing new media content
- A capacity to work well as part of a team charged with solving a communication problem using new media technologies
- An understanding of the relationship between “new” and “old” media
- An understanding of rhetoric and visual design—how visual, image-based communication differs from and interrelates with text- or language-based communication
- An understanding of the technical and practical logistics (planning, budgeting, scripting) of moving a project from idea to completion

The MA in New Media Studies is interdisciplinary in focus; although NMS is housed in Writing, Rhetoric, & Discourse, students are able to take courses from a wide variety of other units as well.

About

The Peace, Justice, & Conflict Studies Program offers students a BA major curriculum that helps them reflect on the origins and causes of conflict, violence, and social injustice as well as the wide spectrum of conflict intervention, from armed conflict, through governmental and organizational peacebuilding, to local and interpersonal conflict resolution. The Program also introduces students to strategies for resolving interpersonal, communal and international conflicts peacefully, as well as tactics that promote the common good in a way that addresses the structural origins of violence. The Peace, Justice, and Conflict Studies Program addresses the need for a critical examination of the origins and root causes of violence and conflict. The Program includes frank debate about the efficacy of nonviolent in comparison with violent approaches to social change. The inclusion of conflict theory and intervention as part of this program is a distinctive aspect of this program; the arena of conflict resolution offers many potential career options. The Program emphasizes hands-on, experiential components in the introductory course, the final seminar/internship and the workshops which emphasize skill training.

Students and faculty in Peace, Justice, & Conflict Studies question what constitutes a just society and world, what peace and peacebuilding can accomplish in a world full of conflict, and how attitudes toward social justice, violence, and peace reflect and reveal American and other cultures' values, beliefs, prejudices, assumptions, and perceptions.

Students are expected to gain competency in dealing with situations of conflict and injustice by mastering the theoretical and intellectual frameworks related to peacebuilding, human rights advocacy, and justice development, by learning to interpret and analyze real life situations in their complexity, by understanding how to build strategies for negotiation, consensus-building, advocacy, partnership development, and other intervention tools, and by understanding various research methodologies and the use of media and creative outlets.

Students majoring in many social science, humanities, and other interdisciplinary programs will find it beneficial to double major or minor in Peace, Justice, & Conflict Studies. Students who pursue the major are well prepared for graduate work in the humanities or social sciences, and specifically in peace, justice, or conflict studies, as well as for professional training in law, public service, or business.

About

The Department of Philosophy serves the needs of the student who seeks an understanding of philosophical issues for personal enrichment, the student who desires a more fundamental appreciation of philosophy in support of law, medicine, business, and various academic disciplines, and the student who wishes to continue the study of philosophy at the graduate level.

Through its courses and programs, the department acquaints students with various philosophical approaches and with basic problems posed by diverse thinkers. Courses have been designed to highlight both the humanistic
and technical features of philosophy.

The department also recognizes the important need for skills and training. Its courses in logic and analysis have been designed to help students become more perceptive in their experiences and more critical in their thinking.

Further, the department is aware that, in our age of rapid change, society often tends to neglect the meaning and worth of the person. Courses are therefore offered that investigate and emphasize the dignity of the person. By helping students understand the nature and grounds of ethical judgments, these courses aim to promote an appreciation and ordering of human values.

The department has designed all of its course offerings with the aim of both ensuring that our Liberal Studies courses remain responsive to the needs of the student who does not plan to specialize in philosophy and offering the student who chooses to major or minor in philosophy a rich and diverse curriculum.

The department is particularly proud of its "Philosophy Circle," an undergraduate philosophy club which provides a forum for the exchange of ideas between faculty and students.

About

Political Science is the study of the organization and behavior of people, groups, and institutions which make up our government and the larger political system. The program is designed to introduce students to questions, perspectives, and arguments about the political forces that shape their lives. As such, the program has value for Liberal Studies students as well as for those who may choose the discipline as a major field of study. Students find the substance and the methods of the discipline useful in the legal, business, civic, communications, governmental, and academic professions, as well as any endeavors that draw them into public service.

About

Master of Public Health (MPH)

The Master of Public Health (MPH) program prepares public health leaders to work collaboratively with diverse communities to prevent disease and ill-health, prioritize and investigate health concerns, achieve lasting social
change, and foster health equity to promote the health and well-being of all people. The MPH program has one focus, community health practice, and students will master the breadth of public health subject matter necessary for practice in this field. It is fully accredited by the Council on Education for Public Health.

One of the program's distinctive aspects is its community-based practicum and corresponding capstone course sequence which is completed during the students' final year of the program. The practicum constitutes nine months of professional community health-focused practice and provides students with a structured, comprehensive, and integrated application of their MPH course work. This experience culminates in the creation of a capstone thesis, a capstone product, and a formal presentation through a three-course capstone sequence.

Additional features unique to DePaul's MPH program include: a cohort-based learning model (including admitting students once per year); small class sizes; integrated field work and classroom learning in the practicum and capstone course sequence; ideal for working professionals--courses are offered in the evening; students can complete the degree in two, three, or four years; and a multidisciplinary perspective that prepares students to address the complexities of community health.

Director
Certificate in Global Health

The certificate in Global Health prepares professionals to work collaboratively with communities to prioritize and investigate health concerns to achieve lasting social change, and foster health equity to promote the health and well-being of populations in diverse global contexts. The four-course certificate trains students in key aspects of global health, using a multidisciplinary approach to analyze the underlying determinants of health, the relationship between public health and development, and public health practice.

Course Requirements

- MPH 551 GLOBAL HEALTH INEQUITIES
- MPH 554 GLOBAL PUBLIC HEALTH PRACTICE
- MPH 555 EPIDEMIOLOGY IN A GLOBAL CONTEXT
- Choose one from the following:
  - MPH 552 MATERNAL AND CHILD HEALTH
  - MPH 553 PUBLIC HEALTH AND FORCED MIGRATION
  - MPH 595 SPECIAL TOPICS IN PUBLIC HEALTH
  - MPH 599 INDEPENDENT STUDY IN PUBLIC HEALTH

Admission Requirements

Applications are accepted at any time, and students may begin the program at the start of any academic quarter. The program is open to both non-degree seeking students and students concurrently enrolled in a DePaul graduate degree program. All applicants must hold a bachelor’s degree. To apply to the program, prospective students must submit the following materials:

- An LAS graduate admission on-line application [application fee is waived for current DePaul students]
- Transcripts from all schools attended
- A personal statement of 300-500 words describing their professional interests and goals in the certificate
About

Public Policy Studies is a discipline that explores the role and impact of decision-making by governments. The discipline includes knowledge of both process and substance of a particular policy area. Thus, a student in public policy must have both generalist and specialist skills to apply to a particular public problem. In terms of political process, the study of public policy examines questions of how public policy is formulated, implemented, and evaluated over time. It also explores notions of agenda-setting and framing of issues that lead to a problem gaining the attention of the government. Public policy specialists and analysts are hired by all levels of government. During the past several years in addition to the government sector, the nonprofit and private sectors have sought public policy analysts for employment. Therefore, the curriculum prepares students for being public policy specialists in both the private and nonprofit sectors in addition to the public sector. The curriculum also is tailored to prepare students who would like to continue their education in graduate programs or law schools. The faculty members of the department work closely with students to place them in internships, and when possible, employment positions.

The Public Policy Studies Department (PPS) offers an undergraduate degree (BA) that allows majors the option to pursue concentrated work in the areas of Environmental or Urban Studies. Students take a common core of courses dealing with public policy theories, processes, methods of public policy analysis, and important environmental and urban policy issues. In addition, a data analysis course is required that the student selects from a list of approved courses. Microeconomics or statistics is strongly encouraged.

Beyond the core curriculum, students choose either the Environmental Studies or Urban Studies track, selecting from a group of courses within these specializations. A capstone course reconvenes the students at the end of their curriculum to study a public policy problem in-depth under the direction of a public policy professor. The capstone changes approximately every three years, to reflect a current issue on the public policy agenda.

The department is in the process of making a number of changes to the curriculum that will make it more exciting, more flexible for students, and responsive to suggestions from students. Until these innovative changes are established, the current curriculum shall be followed.

About

The Refugee and Forced Migration Studies graduate program is an interdisciplinary Master of Science program that trains students to work as practitioners in the field of refugee resettlement and advocacy. The degree is inherently interdisciplinary as students take a variety of courses in fields such as law, history, public service, public health and international studies. Each cohort is admitted in the autumn quarter and takes two courses per quarter to graduate in two years. Additionally the program takes a practical approach to curriculum such that students will have already gathered experience in the fields of refugee advocacy and resettlement by the time they graduate. This is ensured by the requirement of two distinct practicums with refugee-focused non-governmental organizations (NGOs) domestically and overseas.

Faculty

The Refugee and Forced Migration Studies Program incorporates faculty in two primary functions; the administration of the program and instruction of courses. Since it is an academic program and not a department, RFMS does not house any faculty of its own but instead is run and taught by professors from all over the University. This not only gives the curriculum a distinctly interdisciplinary flavor but allows for the integration and synthesis of administrative techniques formulated by several departments and schools. Our faculty are drawn from such departments such as International Studies, Anthropology, and History as well as several freestanding schools in the University such as the Law School and the School of Public Service. While all of our faculty have experience in the study of forced migration, they all approach the study from different academic angles and schools of method to give the program a truly robust curriculum. You can find a list of the members of our Curriculum Committee and other associated faculty below.

Curriculum Committee:

Shalija Sharma, PhD
Associate Professor (International Studies)
Director (Refugee and Forced Migration Studies)
SUNY Stony Brook

Ogenga Otunnu, PhD
Associate Professor (History)
About

While remaining intensely personal, the resurgence of religion in the public sphere is a characteristic of our era. Religion has become central to contemporary culture, politics, identity, and conflict in every part of the globe. At the same time, our world is marked by an emerging pluralism, as globalization, migration and technology bring diverse religious traditions into closer proximity and creates new religious communities.

The Department of Religious Studies offers DePaul students the opportunity to engage in the academic study of religion. The study of religion includes not only the traditional areas of sacred texts, myths, rituals, mystical experiences and doctrines, but also the ways in which political, social and economic forces shape these phenomena for religious communities. Drawing on a host of academic disciplines, religious studies challenges students to encounter the traditions of the world in all their rich diversity. Given the complexity of the subject matter, members of the department draw upon several other academic disciplines -- anthropology, art history, biblical studies, economics, environmental studies, ethics, gender studies, history, linguistics, literature and literary criticism, political science, philosophy, psychology, sociology, and theology -- as they do their work.

Beyond work with texts, students may also study religion through the media of film and video, music, the visual and dramatic arts, and the internet. The department emphasizes comprehensive learning in writing, synthetic and analytic thinking, and oral communication skills. Students can go beyond their course work with further learning opportunities, such as the senior thesis, independent study, study abroad and internships, and service learning, both locally and internationally.

A truly interdisciplinary field, religious studies at DePaul helps students broaden cultural literacy and deepen critical skills. The study of religion also prepares students to engage important conversations of our day. Further, students may find that the study of religions can help them respond not only to political, social and environmental challenges, but also to address the existential questions they face and that are encountered by other thoughtful men and women.

A religious studies major or minor is positioned to pursue a wide variety of careers. A bridge between the specialist’s perspectives on religion and a wider world that is often in need of these perspectives, religious studies majors have worked in the fields of law, social work, regional and international business, governmental and non-governmental service, secondary school teaching, and service in religious communities. A religious studies major
is also well-prepared for further studies in graduate programs leading to careers in academia.

Religious Studies at DePaul expresses the university's distinct identity, which respects engaged pluralistic inquiry in all religious issues and traditions. The department is committed to DePaul's Catholic, Vincentian and urban heritage, mission, and identity, and to its goal of establishing the university as a model of diversity. The department's course offerings reflect the diversity of the city of Chicago and of the students who attend DePaul.

The twenty-two full-time faculty constitute one of the largest and most diverse undergraduate departments of religious studies in the United States. This size and diversity enables us to offer courses in a wide range of geographical regions and historical periods. The research and teaching interests of the faculty include American religious history as well as South and East Asia, the African diaspora, North and Meso-America, the Middle East and Europe. The faculty and curriculum includes specialists in Judaism, Christianity, Islam, Hinduism, Buddhism, Confucianism, Taoism, Shinto, as well as Native American, African American, and Latino/a religious traditions.

In addition to excellence in teaching, the faculty also maintain high standards for research, and are actively engaged in presenting at major academic conferences and publishing their work in high-ranking professional journals.

The Department of Religious Studies sponsors the Center for Religion, Culture, and Community and is fully engaged with Center for Intercultural Theology and World Catholicism and other centers and institutes of the University. It has a close working relationship with the Department of Catholic Studies and the Islamic World Studies Program. Religious Studies is a vital part of the First Year, Liberal Studies and Honors Programs.

The Department encourages students in all major concentrations and minors to engage various questions related to the study of religion, such as (but not limited to):

- What is religion?
- How do religious communities come into being and define themselves?
- How do religious communities form worldviews, doctrines, and practices, and how does the study of religion help us to understand their change over time?
- How do sacred texts come into being, and what do they communicate to us?
- How does religion shape culture, and how does the wider culture define religion?
- What is the role of religion in the contemporary world?
- How do religion or religious sensibilities help us to relate (or hinder us from relating) to each other?
- How can an informed student of religion evaluate the rival claims to truth and moral rightness of different religious and secular ideologies?
- How do religious traditions and texts treat issues of sexuality and gender, race and class?
- How have religious traditions interacted with each other in the past, and how do they continue to do so today?

About

We educate women and men to be effective public service leaders in the global community guided by the values of St. Vincent de Paul.

The School of Public Service promotes effective management of nonprofit organizations and government agencies, and fosters the development of sound public policies affecting the delivery of social services. Programs of instruction, research, and community involvement prepare adult learners to pursue administrative careers in a broad range of public service organizations. Following the tradition of St. Vincent de Paul, the School of Public Service devotes special attention to policies and practices that promote social equity through the delivery of affordable, quality services to those in greatest need.

While the knowledge and skills required to manage organizations in the public sector are becoming indistinguishable from the best practices used in the private and nonprofit sectors, the ultimate goals of these organizations provide a sharp distinction. The School of Public Service keeps this distinction firmly in view in its course offerings. Degree and certificate programs are interdisciplinary, drawing primarily upon the knowledge bases of sociology, economics, political science, law and the human-service professions. The curriculum carefully balances theoretical and applied approaches to contemporary challenges of administration and policy analysis.

The School emphasizes ethical leadership in all aspects of its curriculum but especially by offering short-term, executive-style, study-abroad experiences for working professionals. Faculty encourage all students to take advantage of more than a dozen courses to developed and developing countries. Consistent with its mission, the School of Public Service purposefully strives to build an academic community that is racially, ethnically, religiously, and otherwise diverse. Part-time and full-time students are equally welcome.

Certificate in Community Development

This program offers community development specialists skills in organization planning, leadership development, and program evaluation. The program allows established and emerging professionals to broaden their perspective on urban-development programs in an inter-disciplinary learning environment by including knowledge from psychology, public service, sociology, geography and liberal studies.

Students must successfully complete a minimum of 16-quarter hours of graduate credit. Each course carries four-quarter hours. Students then must participate in a non-credit research colloquium. Each participant of the colloquium makes a presentation before a small group of students and faculty members. No more than two courses earned toward the certificate shall come from one department. Please note that the list of courses is subject to change.

Course Requirements

- MPS 571 METROPOLITAN PLANNING
- Select three (3) from the following:
  - GEO 441 GEOGRAPHIC INFORMATION SYSTEMS (GIS) FOR COMMUNITY DEVELOPMENT
Certificate in Metropolitan Planning and Development

This certificate program is designed for individuals who want to develop analytical skills and stay current on issues of regional land use, transportation, and economic development. It provides students with a perspective on the institutions of municipal and metropolitan planning and issues affecting the delivery of public services, and it explores innovative solutions to urban and suburban development problems. This certificate is offered in conjunction with The Chaddick Institute for Metropolitan Development. The Institute offers a variety of programs regarding land use, infrastructure and transportation in the region.

Course Requirements

- MPS 571 METROPOLITAN PLANNING
- Select two from the following:
  - MPS 526 LOCAL GOVERNMENT ADMINISTRATION
  - MPS 529 STRATEGIC MANAGEMENT AND PLANNING
  - MPS 541 ECONOMIC FOUNDATIONS OF PUBLIC SERVICE
  - MPS 543 POLICY IMPLEMENTATION
  - MPS 546 ADVOCACY AND LOBBYING
  - MPS 573 URBAN AND COMMUNITY DEVELOPMENT

About

The Master of Social Work (MSW) degree program is designed to prepare students for advanced social work, with an emphasis on community practice. The MSW degree prepares its graduates for work and leadership in broad and varied human service organizations which span child welfare, health and mental health, community planning, family services and the like.

About

The Department of Sociology consists of 16 full-time faculty, 350 undergraduate majors, and over 40 graduate students. Founded in 1922, the department has a long tradition of inspiring students to apply sociology to the world around them.

Sociology is the study of groups, social interaction, and social institutions. To study these, the department has developed a core curriculum centered on sociological methods (how we know) and sociological theory (how we explain). Beyond these core courses, faculty areas of interest are wide-ranging, which is reflected in the variety of courses and undergraduate concentrations we offer.

Our location in the Lincoln Park neighborhood in Chicago gives students access to a remarkable range of community service opportunities, field experiences, and internships. With its ethnic communities, economic development, and urban concerns, Chicago serves as a rich laboratory for research and observation.

Certificate in Social Research

The Certificate in Social Research familiarizes students with the choices they can make in designing social science research and to help them select the research tools that are right for the types of questions they are asking. The four-course program provides knowledge of current research designs, methods, and practices; quantitative and statistical skills; and the logic of inquiry.

A number of Sociology MA students may wish to obtain the certificate as part of their degree program. The certificate is also useful for students in fields ranging from the social and behavioral sciences to communication and education.

Course Requirements

Core Courses

Two core courses are required:

- A statistics or quantitative analysis class. This requirement is met by taking at least one of the following courses:
Elective Courses

Choose two courses from the following:

- SOC 412 DATA ANALYSIS
- SOC 413 QUALITATIVE METHODS
- SOC 417 ETHNOGRAPHIC DOCUMENTARY FILM PRODUCTION
- SOC 422 URBAN AND COMMUNITY ANALYSIS
- SOC 423 RESEARCH ON URBAN CULTURES
- SOC 493 VISUAL SOCIOLOGY

About

Women's and Gender Studies is an interdisciplinary department offering an undergraduate major and a minor, a combined BA/MA, a Master of Arts (MA), and a four-course Graduate Certificate. We also offer a joint Master's Program in Women's and Gender Studies & Social Work (MSW). Women's and Gender Studies courses examine women's lives, conditions, and contributions within their historical, social, cultural, national and transnational contexts and they explore how gender is constructed and negotiated within and across societies. Women's and men's identities and experiences are examined through the constructs of gender, race, class, age, ability, sexuality, culture, religion, nation, etc. within broader historical, social, and global contexts, such as colonialism, globalization, among others.

Through feminist and gender-based theories and methodologies, the Department of Women's and Gender Studies offers critical analyses, reflections, and contributions to knowledge regarding interlocking systems of oppression and privilege, thereby addressing issues of power, resistance, and social transformation. In addition, the emphasis on critical theory and analysis allows for work that interrogates feminist discourses as well as those of other disciplines in the arts, humanities, social sciences, and natural sciences.

The interdisciplinary Women's and Gender Studies major and minor combine courses taken in the Department of Women's and Gender Studies with approved elective courses offered in other departments and programs around the university. Courses are offered regularly by many departments in the college of Liberal Arts and Social Sciences –in the social sciences, and in the humanities—as well as by the other colleges and schools throughout the university.

In addition, many students decide to combine a Women's and Gender Studies major with a second major in another discipline. A double major is a rich educational experience and is actually easy to accomplish. To do so, you can double count courses that fulfill both Women's and Gender Studies and Liberal Studies requirements, and you can double count half of the courses that fulfill the requirements of both majors. We now have a combined BA/MA program that allows you to get both an undergraduate and graduate degree in five years. Students must apply their junior year for the program.

A major, double major, minor, and/or MA in Women's and Gender Studies prepares students for graduate study in many fields (law, social work, sociology, psychology, history, art and art history, communication, Latin American/Latino Studies, African and Black Diaspora Studies, International Studies, among many others) as well as for careers in the public and private sectors, including social services, social justice, public policy, education, media and popular culture, advocacy, creative arts, counseling, and more.

Students who would like to know more about the Department of Women's and Gender Studies are invited to speak with the department chair, and other faculty members of the department (5th Floor of Schmitt Academic Center) and/or visit the Department of Women's and Gender Studies website.

Certificate in Women's And Gender Studies

Graduate Certificate Program

The Women's and Gender Studies Graduate Certificate Program at DePaul University is available both to non-degree seeking students and to students in other DePaul graduate degree programs.

The Program's requirements are

- WGS 400 FEMINIST THEORIES (offered Fall Quarter only)
- Three graduate-level elective courses

It is highly recommended that students take the foundational course, WGS 400, prior to the other required three
WGS electives. The elective courses may be taken from the Women's and Gender Studies offerings and/or from courses in other departments and programs in the College of Liberal Arts and Social Sciences that have been approved by the Department of Women’s and Gender Studies.

To be considered for the certificate program, please follow the directions below.

**Non-degree seeking students**

Applications are accepted on an ongoing basis. Complete a DePaul University Liberal Arts and Social Sciences graduate admission online application; submit undergraduate and (if applicable) graduate transcripts and a personal statement of 300-500 words (describing your interest in Women's and Gender Studies, any prior experience in the field, and personal or professional goals for pursuing the certificate), and a letter of recommendation from a current or previous professor.

**Students enrolled in other DePaul graduate degree programs**

Applications are accepted on an ongoing basis. Complete a DePaul University Liberal Arts and Social Sciences graduate admission online application. Submit undergraduate and (if applicable) graduate transcripts, a personal statement of 300-500 words (describing your interest in Women's and Gender Studies, any prior experience in the field, and personal or professional goals for pursuing the certificate), a letter of recommendation from a current or previous professor, and a letter from the Director of Graduate Studies in the degree granting department indicating whether interdisciplinary courses in Women's and Gender Studies may be counted toward departmental degree requirements. Submit transcripts, personal statement and letter from the other graduate program.

Completed applications are reviewed by the Department of Women's and Gender Studies. Admission decisions are based on the prospective student’s ability to complete the academic requirements of courses in the program. The Graduate Director may use the personal statement as a basis for advising certificate students on the selection of courses and on any academic skills development that would aid successful participation in and completion of WGS graduate courses.

Descriptions of courses offered through the Department of Women's and Gender Studies can be found in Campus Connect through the "Search for Classes" function.

For more information please contact the Women’s and Gender Studies Graduate Program Director, Dr. Ann Russo (773-325-1774 or arusso@depaul.edu), or visit the Department of Women's and Gender Studies website, http://las.depaul.edu/wms/

**About**

The Master of Arts in Writing and Publishing program offers advanced training in the art and craft of writing poetry, fiction, and nonfiction. The program is specifically designed for students interested in careers in creative and literary writing, publishing, and editing, as well as for those seeking to expand their knowledge of writing for the purpose of teaching.

Special Programs

Internships
Writing & Publishing students can qualify for a variety of internships, receiving significant on-the-job experience in such areas as research, writing, editing, publishing, law, corporate communications, non-profit work, and library science. Students might locate an internship on their own or receive assistance from Prof. Chris Green, Coordinator of Professional Internships in Writing & Publishing. Quarterly Career Nights (featuring panels of professionals) and Career Workshops (emphasizing internship- and job-finding skills) will also enhance students' opportunities and experience.

Two-Year College Teaching Internship
Graduate students in English or a related field are eligible to apply for an internship at an area two-year college. This internship can be undertaken on its own, or as part of the Certificate in Teaching English in Two-Year Colleges. Please contact Dr. Carolyn Goffman for more information about this opportunity.
Certificate in Publishing

The Certificate in Publishing requires sixteen credit hours and welcomes students who have earned a bachelor's degree in any field.

The Certificate in Publishing can broaden and strengthen the preparation of students seeking to work in the publishing industry. This program serves students in graduate programs at DePaul as well as students-at-large interested in various aspects of publishing. Course offerings focus on book, magazine/journal, and digital publishing, and a wide array of internship opportunities allows students to gain practical skills and to network in the field.

Program Requirements:

- Three graduate courses in publishing. These courses may be chosen from among the following:
  - ENG 477 TOPICS IN PUBLISHING. This course may be repeated with different topics that include:
    - American Literary Magazine
    - Book Editing
    - Book Production
    - Book Launching/Publicity
    - Digital Publishing
    - The Independent Press
  - ENG 496 EDITING
- One Internship course (ENG 509 INTERNSHIP)

How to Apply:

- Please submit the following:
  - Official transcripts from all previous college coursework (a GPA of 3.0 or above on a 4.0 scale is recommended but not required for admission)
  - Completed online application (go.depaul.edu/apply)
  - Personal statement that describes the applicant's prior/current publishing-related experiences and explains his or her desire to earn a certificate
  - Current resume or curriculum vitae

About

The department of Writing, Rhetoric, and Discourse (WRD), one of the largest departments at DePaul, is dedicated to studying the history and theory of literate activity and helping students excel as writers in a wide range of academic, professional, and public settings. WRD is home to DePaul's First-Year Writing program; in addition, the department offers the Minor in Professional Writing and the major in WRD. At the graduate level, the Master of Arts in WRD addresses writing in professional and technical contexts, the preparation of postsecondary teacher-scholars in writing, and the study of language for writers. The Combined BA/MA in WRD allows undergraduates to begin taking graduate courses in their senior year. The department's Master of Arts in New Media Studies prepares graduates to function as productive and responsible individuals in social contexts created by digital media through both critical interpretation and hands-on practice. The department also offers a Graduate Certificate in Teaching English to Speakers of Other Languages (TESOL), which prepares students to...
teach English as a Second Language (ESL) to adult learners in the United States or abroad. Undergraduates who choose the BA/MA option may complete the TESOL Certificate within the MA portion of the program.

The act of writing in general and each student’s writing in particular are of central concern in all WRD courses. Theories of language, rhetoric (how to make effective choices as writers), and discourse (the way writing structures human activity) develop students’ understanding of how the individual act of writing is bound up in broader contexts of institution and culture.

WRD is made up of more than 70 faculty members, all of whom teach at the undergraduate level. The department’s Graduate Faculty comprises nationally recognized researchers in rhetorical theory and practice, composition theory, writing pedagogy, applied linguistics, second language writing, professional and technical writing, and writing program administration.

University of Massachusetts-Amherst

Tricia Hermes, MA
Professional Lecturer
DePaul University

Amy Hornat-Kaval, MA
Instructor
DePaul University

Jason Kalin, PhD
Assistant Professor
Certificate in Teaching English to Speakers of Other Languages

The WRD department offers a Graduate Certificate in TESOL, which may be completed by students in an existing DePaul graduate program or by students who wish to complete only the Certificate. Made up of courses in the programs of Writing, Rhetoric, & Discourse, Bilingual-Bicultural Education, English, and Modern Languages, the Certificate prepares students to teach English as a Second Language (ESL) to adult learners in the United States and abroad. The Certificate may also be attractive to faculty at non-U.S. institutions who wish to come to the U.S. for education in working with second language learners.

Course Requirements

- One Theory course from the following list:
  - BBE 526 THEORETICAL FOUNDATIONS OF TEACHING ESL AND WLE
  - MOL 454 THEORETICAL FOUNDATIONS/CURRENT RESEARCH SECOND/FOREIGN LANGUAGE ACQUISITION
  - BBE 466 FIRST AND SECOND LANGUAGE ACQUISITION
  - BBE 510 SPECIAL TOPICS IN LANGUAGE EDUCATION AND CULTURE (when topic is relevant)
  - BBE 560 SECOND, WORLD AND HERITAGE LANGUAGE ACQUISITION K-12
  - WRD 512 TOPICS IN LANGUAGE (when topic is relevant)
- One Methods course from the following list:
  - WRD 543 TEACHING ESL WRITING
  - WRD 544 TEACHING ENGLISH AS A SECOND OR FOREIGN LANGUAGE
  - WRD 550 TOPICS IN TEACHING WRITING AND LANGUAGE (when topic is relevant)
- One Sociolinguistics course from the following list:
  - WRD 507 GLOBAL ENGLISHES
One Language Structure course from the following list:
- ENG 400 STRUCTURE OF MODERN ENGLISH
- ENG 401 HISTORY OF THE ENGLISH LANGUAGE
- ENG 408 STYLISTICS
- ENG 478 TOPICS IN TEACHING: GRAMMAR FOR TEACHERS *
- WRD 512 TOPICS IN LANGUAGE (when topic is relevant)
- WRD 546 PEDAGOGICAL GRAMMAR

- 20 hours of field experience working with adult language learners. Field experience will be arranged individually with the Coordinator of the Certificate program.

* ENG 478 counts for TESOL credit only with this subtitle.

Students completing the Master's in Bilingual-Bicultural Education can complete the Certificate program by taking their Theory and Sociolinguistics courses in BBE and their Methods and Language Structure courses in WRD; they must complete all requirements for the BBE program to receive the Master's degree. Students in the Master of Arts in English (MAE) may complete their Language and Structure requirement in English; any two additional courses form the list above will count for credit in both MAE and the TESOL Certificate. For Students in the MA in WRD, a maximum of two courses (8 credits) from MOL or BBE may be counted as credits toward the MA in WRD degree.

Students who are concurrently completing any other graduate degree program at DePaul must work with their program director/advisor to determine if TESOL Certificate courses will count toward their degree requirements.

**Admission Requirements**

Applications are accepted at any time, and students may begin the program at the start of any academic quarter. The program is open to both non-degree seeking students and students concurrently enrolled in a DePaul graduate degree program. All applicants must hold a bachelor's degree. To apply to the program, prospective students must submit the following materials:

- an LAS graduate admission on-line application [application fee is waived for current DePaul students]
- transcripts from all schools attended
- a personal statement of 300-500 words describing their interest in the program, prior experience in TESOL or related fields, and professional goals for pursuing the certificate

**Modern Language Option**

The Modern Language Option is available to all BA students who wish to study a modern language beyond the level necessary to meet their College's language requirement and to B.S. students who wish to study a modern language at any level. Students selecting the option may substitute a three-course language sequence for two domain courses and one open elective. Students majoring in one modern language may use the Modern Language Option for study of a second language at the intermediate level or above.

MLO substitutions may not be used to replace the Scientific Inquiry - Lab or Scientific Inquiry - Science as a Way of Knowing requirement. Any substitutions must be consistent with the principle that students complete at least one course in each learning domain.
Pre-Law Study

The Association of American Law Schools does not consider it appropriate to prescribe certain undergraduate degree programs for students who are planning to study law at the professional level. The Association does, however, consider certain skills and knowledge essential for later success in law and appropriate for study on the undergraduate level.

Pre-law study in the College of Liberal Arts and Social Sciences entails advanced course work that further develops the capacities and skills essential for satisfactory performance in law school. Specifically, pre-law study sharpens: (1) the ability to use the English language skillfully and effectively in oral and written advocacy situations; (2) the power to think clearly, critically, and independently in situations requiring problem-solving ability and sound judgment; and (3) the ability to use and understand statistical calculations. Moreover, pre-law study is intended to promote an understanding of the psychological processes, economic systems, political organizations, and social structures essential to the study and practice of law. Students who are considering applying to law school should fulfill their open elective requirements with challenging, upper-level courses that expand the knowledge areas and skills mentioned above.

Admission to law school is based on scores achieved on the Law School Admissions Test (LSAT), collegiate performance, extracurricular activities, work experience, and letters of recommendation.

Students who want to prepare for law school should, whatever their academic major, consult with Dr. David Williams (dwill105@depaul.edu) in the Department of Political Science, or contact the Department of History (historyadvising@depaul.edu), where there is a pre-law concentration in the History major.

Study Abroad Program

A study abroad experience is an important part of a liberal education. The opportunity to live, study, and work with people from around the world provides students with a way to not only gain international competence and skills, but also helps them to more clearly understand their own identities and agency within a global context. Study Abroad programs are designed to emphasize social, political, historical, and cultural understanding through immersion in other cultures and societies.

Program lengths range from one year to one week. In traditional programs lasting one quarter or more, students live and take courses on site. Short-term programs are topic-focused tours led by DePaul faculty exploring specific aspects and issues of a country or society. These programs typically last 2-3 weeks and are offered during breaks between terms. First Year Abroad programs are for first-year students and combine on-campus study of a location prior to a one-week trip to that area.

Program fees ordinarily cover local transportation associated with course excursions, accommodations, and some meals. Short-term program fees also cover round-trip airfare. In addition students pay regular DePaul tuition for the credit received while abroad.

Courses taken through the Study Abroad Program may be used to fulfill Liberal Studies domain requirements (including experiential learning), modern language requirements, major field requirements, or open electives.

Please visit the Study Abroad Program's website for current offerings.
TEACH Program

This program provides students the opportunity to complete in five years an undergraduate degree in a core arts and sciences major and a Master’s of Education degree with State of Illinois secondary education teaching certification in a content area related to their major. As a combined degree program of the College of Liberal Arts and Social Sciences and the College of Education, the program is collaboratively developed, governed, and taught by faculty from both units.

Students may apply to the Program during the spring of their junior year. They must complete the Junior Year Experiential Learning course TCH 320, Exploring Teaching in an Urban High School, and meet other application criteria prior to applying; these include completion of at least 16 hours at DePaul and a 3.0 GPA. During their Senior Year, students are required to complete a program capstone course and three 400-level courses that count toward both their undergraduate and graduate degrees. The Master’s year comprises teacher-preparation coursework that culminates with student teaching during Spring quarter. Upon graduation and the fulfilling of State of Illinois Certification requirements (which may require some additional course work in the student’s major and related fields), students are eligible to be certified to teach English, History, or Social Science at the 6th-12th grade levels.

A full description of the Program can be found in the College of Education graduate course catalog.

Certificates

Undergraduate Certificates

- Geographic Information Systems
- Language Proficiency Certificate

Graduate Certificates

- Community Development
- Digital Humanities
- Global Health
- Metropolitan Planning and Development
- Publishing
- Social Research
- Teaching English in Two-Year Colleges
- Teaching English to Speakers of Other Languages
- Women's and Gender Studies

Course work credit leading to a graduate degree program in the College of Liberal Arts and Social Sciences may be double-counted toward ONE approved, paired, graduate certificate program. If a student seeks another (second or more) LAS certificate, and those certificate program requirements are again completely comprised of course work leading to the student's graduate degree, then the student must take at least two additional courses in order to earn the additional certificate(s).
Language Proficiency Certificate

The Department of Modern Languages offers two certificates to current students and to non-degree seeking students/students-at-large: intermediate (low, mid, or high) language proficiency and advanced (low, mid, or high) language proficiency. Upon completion of the required classes and Written Proficiency Test, the student's certificate will be posted to their DePaul transcripts. Language proficiency certification will allow students to show future employers they are ready to compete in today's global workplace.

To declare the certificate, students must contact the Department of Modern Languages.

Students will register and pay a fee to complete the Writing Proficiency Test (WPT) through Language Testing International, proctored by the Department of Modern Languages, and will receive a nationally recognized level of proficiency based on the standards developed by the American Council on the Teaching of Foreign Languages (ACTFL). Please refer to the Department of Modern Languages website for more information.

The department offers certificates in American Sign Language, Arabic, Chinese, French, German, Italian, Japanese, Russian, and Spanish. Certificates require a varying number of courses, depending on the student's incoming language placement and desired level of proficiency.

Test credit and transfer credit are not applicable toward the certificate. All courses to be applied toward the certificate must be completed at DePaul.

Intermediate:

- Students are required to successfully complete a minimum of three courses at DePaul (level 104 and above - no transfer or test credit; DePaul study abroad program credit will be reviewed on a case by case basis) in order to earn the certificate.
- Student readiness for intermediate level (104 and above) courses will be established by the language placement exam, transfer credit, or test credit.
- The number of courses necessary to achieve an intermediate level certificate of proficiency (low, mid, or high) will depend on the student's entering proficiency level (based on previous study/knowledge; courses required may be determined by the language placement exam, transfer credit, ACTFL Written Proficiency Test (WPT), or test credit) and student effort (time spent studying the language, the following recommendations for language proficiency development outside of the classroom, how well students perform in their language classes, etc.).
- At the end of the required number of courses, students must register and pay to take the American Sign Language Proficiency Interview to certify proficiency level. The level of proficiency, per ACTFL test results (Intermediate low, or higher), will be posted onto the student's DePaul transcripts.
- If students test below an intermediate level certificate, they may opt to
  1. take additional language courses,
  2. work with the free language tutors through the Language Learning Center until the desired level of proficiency is achieved, and then retake the test, or
  3. drop the certificate program by emailing their advisor or college advising office.

- Students should familiarize themselves with the ACTFL proficiency standards for intermediate-level speakers in order to better understand how much time they may need to dedicate to language study for the certificate.

Advanced

- Students are required to successfully complete five courses at DePaul (200 and 300 level language courses - no transfer or test credit; DePaul study abroad program credit will be reviewed on a case by case basis).
- Student readiness for advanced level courses will be established by the language placement exam, transfer credit, or test credit.
- Degree-seeking students taking the certificate may also complete one of several minors in the language simultaneous to the certificate.
- The number of courses necessary to achieve an advanced level certificate of proficiency (low, mid, or high) will depend on the student's entering proficiency level and student effort (time spent studying the language, the following recommendations for language proficiency development outside of the classroom,
how well students perform in their language classes, etc.).

- At the end of the required number of courses, students must register and pay to take the ACTFL Written Proficiency Test (WPT) or the American Sign Language Proficiency Interview to certify proficiency level. The level of proficiency, per ACTFL test results (intermediate low, or higher), will be posted onto the student's DePaul transcripts.

- If students test below an advanced level certificate, they may opt to
  
  1. change their certificate program (intermediate low, mid, or high),
  2. take additional language courses,
  3. work with the free language tutors through the Language Learning Center until the desired level of proficiency is achieved, and then retake the test, or
  4. drop the certificate program by emailing their advisor or college advising office.

- Students should familiarize themselves with the ACTFL proficiency standards for advanced-level speakers in order to better understand how much time they may need to dedicate to language study for the certificate.

Geographic Information Systems

The Certificate Program requires 20 hours of instruction. It provides sophisticated education in GIS, remote sensing and cartography and serves as a basis for entry-level employment in the geotechnology industry. There are five required courses to complete the certificate:

- GEO 141 GEOGRAPHIC INFORMATION SYSTEMS I: DIGITAL MAPPING
- GEO 242 GEOGRAPHIC INFORMATION SYSTEMS II: COMMUNITY GIS
- GEO 243 REMOTE SENSING
- GEO 343 REMOTE SENSING II
  - or GEO 344 GEOGRAPHIC INFORMATION SYSTEMS III: SPATIAL ANALYSIS FOR SUSTAINABILITY
- GEO 391 STATISTICAL DATA ANALYSIS FOR GIS

GEO 141, 242 and 344 must be taken in sequence. GEO 141 is a pre-requisite for GEO 391. GEO 243 can be taken at any time. Please contact the Department if you are considering pursuing the GIS Certificate, even if you are a declared geography major.

In order to earn a certificate in GIS, a student must:

- Earn at least a grade of C- in each Certificate course.
- Earn at least a cumulative GPA of 2.0 for all courses applied to the Certificate.
- Earn a letter grade. The pass / fail option may not be selected for courses in the Certificate.

A student completing a GIS Certificate is eligible to simultaneously complete a Geography minor. No more than 3 GIS Certificate courses can be applied to a Geography minor. A student wishing to complete a GIS Certificate and a Geography minor will complete a minimum of 8 Geography courses. Please see a faculty advisor in the Department of Geography for further details.

Community Development

This program offers community development specialists skills in organization planning, leadership development, and program evaluation. The program allows established and emerging professionals to broaden their perspective on urban-development programs in an inter-disciplinary learning environment by including knowledge from psychology, public service, sociology, geography and liberal studies.

Students must successfully complete a minimum of 16-quarter hours of graduate credit. Each course carries
Course Requirements

- MPS 571 METROPOLITAN PLANNING
- Select three (3) from the following:
  - GEO 441 GEOGRAPHIC INFORMATION SYSTEMS (GIS) FOR COMMUNITY DEVELOPMENT
  - MLS 404 THE CITY
  - MPS 526 LOCAL GOVERNMENT ADMINISTRATION
  - MPS 572 POVERTY, INEQUALITY AND PUBLIC POLICY
  - MPS 573 URBAN AND COMMUNITY DEVELOPMENT
  - PSY 654 COMMUNITY PSYCHOLOGY
  - PSY 680 INDUSTRIAL AND ORGANIZATIONAL PSYCHOLOGY
  - SOC 426 URBAN DEVELOPMENT POLICIES

Students may also enroll in the following elective courses, with permission of the program director and often the approval of the instructor. Generally, participants will be limited to one (1) of these courses:

- MPS 529 STRATEGIC MANAGEMENT AND PLANNING
- PSY 495 GRANT WRITING IN PSYCHOLOGY
- PSY 520 PRINCIPLES OF HUMAN DIVERSITY
- PSY 567 SPECIAL TOPICS IN COMMUNITY PSYCHOLOGY
- PSY 569 SEMINAR IN PROGRAM EVALUATION
- SOC 423 RESEARCH ON URBAN CULTURES
- SOC 360 SOCIAL SERVICES IN CONTEMPORARY SOCIETY

Digital Humanities

The Graduate Certificate in Digital Humanities requires 16 credit hours. The certificate program provides hands-on knowledge and guided experience with DH projects, tools, and methods. It is an interdisciplinary program taught by faculty from across the university. The certificate can broaden, and strengthen, employment prospects of students in all humanities fields. From public history and journalism to website development and all levels of teaching, real-world experience with state-of-the-art software makes digital humanities training stand out in a world powered by new media.

Course Requirements

- DHS 500 INTRODUCTION TO DIGITAL HUMANITIES
- NMS 580 MARKUP AND TEXT ENCODING IN THE HUMANITIES
- GEO 440 PLACES, HUMANITIES AND GEOGRAPHIC INFORMATION SYSTEMS

- One course selected from the following:
  - ENG 469 TOPICS IN AMERICAN LITERATURE: Digital Humanities in 19th Century American Literature
  - ENG 475 TOPICS IN LITERATURE: Digital Humanities Tools and Methods for Literary Study
  - HAA 402 DIGITAL MAPPING AND ART HISTORY
  - HST 438 COLLOQUIUM: SPECIAL TOPICS IN HISTORY: Digital History
  - NMS 540 DIGITAL ARCHIVES
  - WRD 520 COMPUTERS AND WRITING
Global Health

The certificate in Global Health prepares professionals to work collaboratively with communities to prioritize and investigate health concerns to achieve lasting social change, and foster health equity to promote the health and well-being of populations in diverse global contexts. The four-course certificate trains students in key aspects of global health, using a multidisciplinary approach to analyze the underlying determinants of health, the relationship between public health and development, and public health practice.

Course Requirements

- MPH 551 GLOBAL HEALTH INEQUITIES
- MPH 554 GLOBAL PUBLIC HEALTH PRACTICE
- MPH 555 EPIDEMIOLOGY IN A GLOBAL CONTEXT
- Choose one from the following:
  - MPH 552 MATERNAL AND CHILD HEALTH
  - MPH 553 PUBLIC HEALTH AND FORCED MIGRATION
  - MPH 595 SPECIAL TOPICS IN PUBLIC HEALTH
  - MPH 599 INDEPENDENT STUDY IN PUBLIC HEALTH

Admission Requirements

Applications are accepted at any time, and students may begin the program at the start of any academic quarter. The program is open to both non-degree seeking students and students concurrently enrolled in a DePaul graduate degree program. All applicants must hold a bachelor’s degree. To apply to the program, prospective students must submit the following materials:

- An LAS graduate admission on-line application [application fee is waived for current DePaul students]
- Transcripts from all schools attended
- A personal statement of 300-500 words describing their professional interests and goals in the certificate

Metropolitan Planning and Development

This certificate program is designed for individuals who want to develop analytical skills and stay current on issues of regional land use, transportation, and economic development. It provides students with a perspective on the institutions of municipal and metropolitan planning and issues affecting the delivery of public services, and it explores innovative solutions to urban and suburban development problems. This certificate is offered in conjunction with The Chaddick Institute for Metropolitan Development. The Institute offers a variety of programs regarding land use, infrastructure and transportation in the region.

Course Requirements

- MPS 571 METROPOLITAN PLANNING
- Select two from the following:
  - MPS 526 LOCAL GOVERNMENT ADMINISTRATION
  - MPS 529 STRATEGIC MANAGEMENT AND PLANNING
  - MPS 541 ECONOMIC FOUNDATIONS OF PUBLIC SERVICE
  - MPS 543 POLICY IMPLEMENTATION
  - MPS 546 ADVOCACY AND LOBBYING
  - MPS 573 URBAN AND COMMUNITY DEVELOPMENT
Publishing

The Certificate in Publishing requires sixteen credit hours and welcomes students who have earned a bachelor's degree in any field.

The Certificate in Publishing can broaden and strengthen the preparation of students seeking to work in the publishing industry. This program serves students in graduate programs at DePaul as well as students-at-large interested in various aspects of publishing. Course offerings focus on book, magazine/journal, and digital publishing, and a wide array of internship opportunities allows students to gain practical skills and to network in the field.

**Program Requirements:**

- Three graduate courses in publishing. These courses may be chosen from among the following:
  - ENG 477 TOPICS IN PUBLISHING. This course may be repeated with different topics that include:
    - American Literary Magazine
    - Book Editing
    - Book Production
    - Book Launching/Publicity
    - Digital Publishing
    - The Independent Press
  - ENG 496 EDITING

- One Internship course (ENG 509 INTERNSHIP)

**How to Apply:**

- Please submit the following:
  - Official transcripts from all previous college coursework (a GPA of 3.0 or above on a 4.0 scale is recommended but not required for admission)
  - Completed online application (go.depaul.edu/apply)
  - Personal statement that describes the applicant's prior/current publishing-related experiences and explains his or her desire to earn a certificate
  - Current resume or curriculum vitae

Social Research

The Certificate in Social Research familiarizes students with the choices they can make in designing social science research and to help them select the research tools that are right for the types of questions they are asking. The four-course program provides knowledge of current research designs, methods, and practices; quantitative and statistical skills; and the logic of inquiry.

A number of Sociology MA students may wish to obtain the certificate as part of their degree program. The certificate is also useful for students in fields ranging from the social and behavioral sciences to communication and education.
Course Requirements

Core Courses

Two core courses are required:

- A statistics or quantitative analysis class. This requirement is met by taking at least one of the following courses:
  - SOC 402 STATISTICS FOR THE SOCIAL SCIENCES
  - SOC 412 DATA ANALYSIS
  - SOC 450 ADVANCED STATISTICS I*
- SOC 411 SOCIAL RESEARCH (This class also includes the requirement of obtaining an online certificate in the protection of human subjects - currently offered through the DePaul Institutional Review Board [IRB] and Collaborative Institutional Training Initiative [CITI].)

* Students will be placed in the appropriate quantitative/statistics class on the basis of their graduate and undergraduate work.

Elective Courses

Choose two courses from the following:

- SOC 412 DATA ANALYSIS
- SOC 413 QUALITATIVE METHODS
- SOC 417 ETHNOGRAPHIC DOCUMENTARY FILM PRODUCTION
- SOC 422 URBAN AND COMMUNITY ANALYSIS
- SOC 423 RESEARCH ON URBAN CULTURES
- SOC 493 VISUAL SOCIOLOGY

Teaching English in Two-Year Colleges

The Certificate Program in Teaching English in Two-Year Colleges is an interdisciplinary program housed in the Department of English and taught by faculty in both English and the Department of Writing, Rhetoric, & Discourse. The program is designed to prepare prospective teachers of introductory classes in English, Writing, and the Humanities in city and community college settings. Participants in the Certificate Program will learn to teach critical and analytical reading, the processes and disciplines of writing, and other aspects of the arts, humanities, or communication curriculum in two-year colleges.

The Certificate is comprised of 16 hours of credit: three classroom-based courses and a teaching internship, enrolled as an Independent Study.

Application

To be admitted to the Certificate Program, students must have completed or be currently pursuing a master's degree in English; Writing and Publishing; Writing, Rhetoric, and Discourse; or a related field.

Applications are accepted at any time. It is strongly recommended that the prospective applicant contact the program director, Dr. Carolyn Goffman, before applying (cgoffman@depaul.edu; 773-325-8688). Please email all application materials directly to Dr. Goffman (not to Graduate Admissions).

Application materials:

- Cover letter describing interest in teaching in a two-year college
- Current CV (résumé)
- Undergraduate and graduate academic transcripts
- Sample of recent academic or professional writing
- Names of two faculty references

Certificate Requirements:
Two-Year College Teaching Internship

Graduate students in English or a related field are eligible to apply for the internship even if they are not enrolled in The Certificate Program. Please contact Dr. Goffman about applying for an internship.

Also, please note: Chicago-area two-year colleges operate on the semester system; therefore, the internship's duration does not correspond to DePaul's academic calendar. The intern should expect to complete the work for ENG 509 some time after the end of the quarter in which registered. A grade of "R" (indicating work in progress) will be assigned temporarily, to be changed to a letter grade when work is completed.

Teaching English to Speakers of Other Languages

The WRD department offers a Graduate Certificate in TESOL, which may be completed by students in an existing DePaul graduate program or by students who wish to complete only the Certificate. Made up of courses in the programs of Writing, Rhetoric, & Discourse, Bilingual-Bicultural Education, English, and Modern Languages, the Certificate prepares students to teach English as a Second Language (ESL) to adult learners in the United States and abroad. The Certificate may also be attractive to faculty at non-U.S. institutions who wish to come to the U.S. for education in working with second language learners.

Course Requirements

- One Theory course from the following list:
  - BBE 526 THEORETICAL FOUNDATIONS OF TEACHING ESL AND WLE
  - MOL 454 THEORETICAL FOUNDATIONS/CURRENT RESEARCH SECOND/FOREIGN LANGUAGE ACQUISITION
  - BBE 466 FIRST AND SECOND LANGUAGE ACQUISITION
  - BBE 510 SPECIAL TOPICS IN LANGUAGE EDUCATION AND CULTURE (when topic is relevant)
  - BBE 560 SECOND, WORLD AND HERITAGE LANGUAGE ACQUISITION K-12
  - WRD 512 TOPICS IN LANGUAGE (when topic is relevant)
- One Methods course from the following list:
  - WRD 543 TEACHING ESL WRITING
  - WRD 544 TEACHING ENGLISH AS A SECOND OR FOREIGN LANGUAGE
  - WRD 550 TOPICS IN TEACHING WRITING AND LANGUAGE (when topic is relevant)
- One Sociolinguistics course from the following list:
  - WRD 507 GLOBAL ENGLISHES
  - WRD 514 SOCIOGNOSTICS
  - BBE 510 SPECIAL TOPICS IN LANGUAGE EDUCATION AND CULTURE (when topic is relevant)
- One Language Structure course from the following list:
  - ENG 400 STRUCTURE OF MODERN ENGLISH
  - ENG 401 HISTORY OF THE ENGLISH LANGUAGE
  - ENG 408 STYLISTICS
  - ENG 478 TOPICS IN TEACHING: GRAMMAR FOR TEACHERS *
  - WRD 512 TOPICS IN LANGUAGE (when topic is relevant)
  - WRD 546 PEDAGOGICAL GRAMMAR
- 20 hours of field experience working with adult language learners. Field experience will be arranged individually with the Coordinator of the Certificate program.

* ENG 478 counts for TESOL credit only with this subtitle.
Students completing the Master’s in Bilingual-Bicultural Education can complete the Certificate program by taking their Theory and Sociolinguistics courses in BBE and their Methods and Language Structure courses in WRD; they must complete all requirements for the BBE program to receive the Master’s degree. Students in the Master of Arts in English (MAE) may complete their Language and Structure requirement in English; any two additional courses form the list above will count for credit in both MAE and the TESOL Certificate. For Students in the MA in WRD, a maximum of two courses (8 credits) from MOL or BBE may be counted as credits toward the MA in WRD degree.

Students who are concurrently completing any other graduate degree program at DePaul must work with their program director/advisor to determine if TESOL Certificate courses will count toward their degree requirements.

**Admission Requirements**

Applications are accepted at any time, and students may begin the program at the start of any academic quarter. The program is open to both non-degree seeking students and students concurrently enrolled in a DePaul graduate degree program. All applicants must hold a bachelor’s degree. To apply to the program, prospective students must submit the following materials:

- an LAS graduate admission on-line application [application fee is waived for current DePaul students]
- transcripts from all schools attended
- a personal statement of 300-500 words describing their interest in the program, prior experience in TESOL or related fields, and professional goals for pursuing the certificate

**Women's and Gender Studies**

**Graduate Certificate Program**

The Women’s and Gender Studies Graduate Certificate Program at DePaul University is available both to non-degree seeking students and to students in other DePaul graduate degree programs.

The Program’s requirements are

- WGS 400 FEMINIST THEORIES (offered Fall Quarter only)
- Three graduate-level elective courses

It is highly recommended that students take the foundational course, WGS 400, prior to the other required three WGS electives. The elective courses may be taken from the Women’s and Gender Studies offerings and/or from courses in other departments and programs in the College of Liberal Arts and Social Sciences that have been approved by the Department of Women’s and Gender Studies.

To be considered for the certificate program, please follow the directions below.

**Non-degree seeking students**

Applications are accepted on an ongoing basis. Complete a DePaul University Liberal Arts and Social Sciences graduate admission online application; submit undergraduate and (if applicable) graduate transcripts and a personal statement of 300-500 words (describing your interest in Women’s and Gender Studies, any prior experience in the field, and personal or professional goals for pursuing the certificate), and a letter of recommendation from a current or previous professor.

**Students enrolled in other DePaul graduate degree programs**

Applications are accepted on an ongoing basis. Complete a DePaul University Liberal Arts and Social Sciences graduate admission online application. Submit undergraduate and (if applicable) graduate transcripts, a personal statement of 300-500 words (describing your interest in Women’s and Gender Studies, any prior experience in the field, and personal or professional goals for pursuing the certificate), a letter of recommendation from a current or previous professor, and a letter from the Director of Graduate Studies in the degree granting department indicating whether interdisciplinary courses in Women’s and Gender Studies may be counted toward departmental degree requirements. Submit transcripts, personal statement and letter from the other graduate
program.

Completed applications are reviewed by the Department of Women’s and Gender Studies. Admission decisions are based on the prospective student’s ability to complete the academic requirements of courses in the program. The Graduate Director may use the personal statement as a basis for advising certificate students on the selection of courses and on any academic skills development that would aid successful participation in and completion of WGS graduate courses.

Descriptions of courses offered through the Department of Women’s and Gender Studies can be found in Campus Connect through the “Search for Classes” function.

For more information please contact the Women's and Gender Studies Graduate Program Director, Dr. Ann Russo (773-325-1774 or arusso@depaul.edu), or visit the Department of Women's and Gender Studies website, http://las.depaul.edu/wms/

---

**Academic Advising**

Academic advising is an essential part of student success. The College is committed to helping each student form a unique and coherent academic plan from the three components of the undergraduate career: the Liberal Studies or General Honors program; the major field of study; and open electives.

Students declare majors, concentrations, and minors through Campus Connection.

Once a student has declared a major, a faculty member from that department is assigned to the student as an academic advisor. The faculty advisor helps the student understand the requirements of the major and how to choose non-major course work to meet the student's needs and interests. In addition, the faculty advisor may inform the student about internships, studying abroad, and preparing for graduate or professional school.

Faculty advisors work closely with staff professional advisors in the Undergraduate College Office and in the larger academic departments (see Advising Staff). Each student is also assigned a staff professional advisor from whom they can receive holistic advising.

Students can find the name and contact information for their academic advisors on Campus Connection.

Student Support

The Graduate Student Services Office assists graduate students throughout their academic careers. Providing administrative support to the academic programs, the Graduate Student Services Office facilitates orientations, transferring academic credit, awarding of assistantships and tuition waivers, registering for independent study, and completing graduation requirements.

In addition, the Coordinator of Graduate Student Services in the Graduate Office provides supplementary advising on administrative, policy, and procedural matters. Generally, the Coordinator may serve as a first point of contact for any questions students may have about life in the College of Liberal Arts and Social Sciences and at DePaul University.

Graduate students should become familiar with the resources on the Graduate Student Services Office webpages (see URL below) as well as the content of the Graduate Student Handbook (see left menu, Academics > Graduate).

Graduate Student Services Office
About

The College of Science and Health provides students with innovative, science-based curricula with a strong liberal arts foundation. Our departments represent the natural sciences, mathematics, psychology, nursing, and health sciences, each of which is committed to providing the highest quality education. The College of Science and Health educates students with a strong Vincentian commitment to social justice and civic engagement. The college provides mathematical and scientific education/literacy for all undergraduate students within the University and participates in all aspects of DePaul’s distinctive Liberal Studies Program.

The College of Science and Health is dedicated to helping members of DePaul’s diverse student body reach their full academic and professional potential. The innovative curricula supported by the college encourages active participation in research, internships and other opportunities that further prepare students for successful careers and as life long learners. Faculty in the college embody the commitment to student academic and professional development through their quality instruction and by conducting meaningful, student accessible research.

Administration

Gerald P. Koocher, Ph.D., ABPP
   Dean

Phillip E. Funk, Ph.D.
   Associate Dean for External Relations

Susan D. McMahon, Ph.D.
   Associate Dean for Research and Faculty Development

Richard F. Niedziela, Ph.D.
   Associate Dean for Administration

Margaret E. Silliker, Ph.D.
   Associate Dean for Graduate Studies

Michael D. Roberts, M.B.A., M.Ed.
   Assistant Dean for Academic Services

Karen Reinbold, M.B.A.
Academics

Focusing on the disciplines of actuarial science, allied health technologies, biology, chemistry, environmental science, health sciences, mathematics, neuroscience, nursing, physics, psychology, and science education; the College of Science and Health’s undergraduate and graduate programs prepare students to meet the demands of the growing fields of science and health.

The College of Science and Health offers undergraduate majors in seven departments and one program and graduate programs in six departments and one school. Courses are offered in the day, evenings and on weekends, primarily on our Lincoln Park Campus.
Majors

- Actuarial Science (BS)
- Allied Health Technologies (BS)
- Biological Sciences (BS)
- Chemistry (BA)
- Chemistry (BS)
- Environmental Science (BS)
- Environmental Studies (BA)
- Health Sciences (BS)
- Health Sciences (BS)/Generalist Nursing (MS) Master's Entry to Nursing Practice
- Health Sciences (BS)/Health Communication (MA)
- Health Sciences (BS)/Master of Public Health (MPH)
- Mathematical Sciences (BA)
- Mathematical Sciences (BS)
- Mathematics and Computer Science (BS)
- Neuroscience (BS)
- Nursing RN to MS (BS)
- Physics (BS)
- Psychology (BA)
- Psychology (BS)

Minors

- Applied Psychology (Minor)
- Biological Science (Minor)
- Chemistry (Minor)
- Computational Physics (Minor)
- Electronics (Minor)
- Environmental Science (Minor)
- Environmental Studies (Minor)
- Environmental Sustainability (Minor)
- Fundamentals of Psychology (Minor)
- General Psychology (Minor)
- Industrial/Organizational Psychology (Minor)
- Mathematics (Minor)
- Physics (Minor)
- Psychological Research Methods (Minor)
- Public Health Studies (Minor)
- Statistics (Minor)
Honors Program Alternative

Students pursuing degrees in the College of Science and Health are to follow the Honors Program Requirements listed below:

**Honors Core**

- HON 110 HONORS DISCOVER CHICAGO
- or HON 111 HONORS EXPLORE CHICAGO
- HON 100 RHETORIC AND CRITICAL INQUIRY
- HON 101 WORLD LITERATURE
- HON 102 HISTORY IN GLOBAL CONTEXTS
- HON 104 RELIGIOUS WORLDVIEWS AND ETHICAL PERSPECTIVES
- HON 105 PHILOSOPHICAL INQUIRY
- HON 201 STATES, MARKETS, AND SOCIETIES
- HON 207 TOPICS IN COGNITIVE STUDIES

**Science Requirement**

- BA students in Math and Psychology complete a two course science requirement
  - HON 225 HONORS LAB SCIENCE TOPICS
  - One course chosen from the university's Scientific Inquiry list
- BA students in Environmental Studies replace the two Honors Science courses with Honors Approved Electives.
- BS students are waived from this requirement.

**Arts Requirement**

- HON 205 INTERDISCIPLINARY ARTS
- One applied, performance, or studio arts course from approved list. Pathways Honors students in a 3-year program may be waived from the Fine Arts Elective requirement.

**Language Requirement**

- Three courses of intermediate or advanced language study.
- Students who meet the proficiency requirement by placing at the 200-level of a language may consult with an Honors advisor for alternative options for a 3-course sequence to replace the language requirement.

**Junior Seminar**

- HON 301 HONORS JUNIOR SEMINAR IN MULTICULTURALISM

The Honors Program is committed to developing students’ knowledge and cultural awareness so they may respect and learn from difference. Honors students meet the multicultural requirement by completing HON 301, the Juniors Seminar in Multiculturalism.

**Senior Capstone**

- Choose one from below
  - HON 350 HONORS SENIOR SEMINAR
  - HON 351 HONORS SENIOR SEMINAR IN SERVICE LEARNING
  - HON 395 HONORS SENIOR THESIS

Students who choose to complete an Honors Senior Thesis must have their project approved at least one term prior to executing the project. To gain approval for a senior thesis, students must complete an application, including a project proposal signed by a faculty advisor. In keeping with the interdisciplinary nature of the program, the thesis should attempt to move outside the boundaries normally associated with one particular discipline and should be supervised by two readers from different academic fields. While the final product must be a substantial piece of work building on the student's accumulated knowledge and new research, specific requirements for each thesis will depend on the nature of the project. See the Director or Associate Director for an application. Students may opt to enroll in HON 300: Honors Research Seminar (a two-credit elective) to receive dedicated guidance as they prepare the thesis project.

**Honors Approved Electives**

Approved Electives are chosen in consultation with an Honors advisor to achieve specific academic or
professional goals. Courses completed for Study Abroad, 200-300 level courses taken to achieve a minor or a
second major, or 200-300 level courses chosen to pursue an area of interest outside of the major can count as
Honors Approved Electives. Students in Mathematics, B.A. students in Psychology, and
B.A. students in Environmental Science have three Honors Approved Electives. B.S. students in Health Sciences
may count the Ethics requirement in place of one of the four Approved Electives. All other B.S. students have
four Honors Approved Electives.

Pathways Honors students in a 3-year program will be waived from the Fine Arts Elective requirement. Honors
Approved Electives will be utilized to fulfill requirements for the academic program they are in.

B.A. students in Environmental Studies are required to complete HON 180 DATA ANALYSIS AND STATISTICS.
All other CSH students follow the Calculus or Statistics requirement for the major and are waived from the HON
180 requirement.

**Experiential Learning**

Honors students fulfill the university’s requirement for Junior Year Experiential Learning (JYEL) through
completion of an internship course, a service learning course, or a mentoring course, or through participation in
a study abroad program. The course will verify completion of the JYEL requirement and be placed where
appropriate in the student’s academic program – either as a major requirement, open elective, Honors Approved
Elective, or (in the case of HON 351) an Honors core requirement.

**Grade Requirements**

A grade of C- or higher in HON 110 or 111 is required to remain in the Honors Program.
A grade of C- or higher is required to pass the following courses: HON 100, HON 350, HON 351 and HON 395.

**Exceptions for Neuroscience Majors or Concentrations**

Honors students majoring in Neuroscience are waived from HON 207 and the fourth Honors Approved Elective.
Honors Approved Elective 3 is replaced by NEU/PHL 228.

Honors students majoring in Psychology BS with Cognitive Neuroscience concentration are waived from HON
207, which is replaced by a 5th Honors Approved Elective.

Honors students majoring in Biological Sciences with a concentration in Neuroscience are waived from HON 207,
which is replaced by a 5th Honors Approved Elective.

**Admission & Aid**

Candidates interested in admission to the College of Science and Health should direct all inquiries to the Office of
Admission, DePaul University, 1 E. Jackson Boulevard, Chicago, Illinois, 60604, admission@depaul.edu, or
(312) 362-8300.
For general information on the types of admission and possibility of financial aid, see University Information,
Admission.
Financial Aid

Applicants interested in financial aid options should direct all inquiries to the Office of Financial Aid. They are located in DePaul Central in the Schmitt Academic Center, Suite 101 on the Lincoln Park Campus. You may phone them at their Loop location at 312-362-8610.

Graduate Admission

Applicants are admitted to the College of Science and Health on the basis of their ability to complete programs of study and research prescribed for the master's and doctoral degrees. Specifically, admission qualifications are measured by academic criteria. In accord with these criteria, applicants are admitted in one of three major categories: degree-seeking, non-degree-seeking, and student-at-large.

Degree Seeking Students

Applicants are admitted as degree-seeking students in either of two ways: full or conditional.

Full Degree-Seeking Status

The minimum requirements for this status are:

- Bachelor's degree conferred by a regionally accredited institution.
- Scholastic achievement in undergraduate studies satisfying all requirements for entering a specific graduate program.
- Submission of all required supporting credentials.
- Unconditional approval by the department or program director of the applicant's proposed course of graduate study.

Please note these are minimum requirements for full admission. The departmental and program sections of this Catalog provide additional, more specific and selective, criteria for admission to specific programs.

Conditional Degree-Seeking Status

The minimum requirements for this status are:

- Bachelor's degree conferred by a regionally accredited institution.
- Scholastic achievement in undergraduate studies indicating a capacity to pursue successfully a specific program of graduate study.
- Submission of all required supporting credentials.
- Conditional approval by the department or program director of the applicant's proposed course of graduate study.

A conditionally admitted applicant is eligible for reclassification to full, degree-seeking status when the conditions of his or her admission have been satisfied.

Non Degree-Seeking Students

The dean may admit as students those applicants who do not wish to pursue an advanced degree. Non-degree-seeking students may, at some future date, make application to a graduate program, but they are not accorded special consideration for admission. Students should consult the intended degree program's website for information about application requirements.

Non-Degree Seeking Status

The minimum requirements for this status are:

- Bachelor's degree conferred by a regionally accredited institution
- Academic achievement in undergraduate studies indicating a capacity to succeed in graduate course work
Students admitted as non-degree graduate students are eligible to enroll in graduate-level courses only.

When such students apply to a graduate program, the departmental or program director of their specific graduate course of study may recommend, in writing, to the dean that a maximum of three courses (12 quarter hours) completed by the student under the non-degree-seeking status be counted toward fulfillment of the advanced degree requirements. The application of any or all recommended credit is at the discretion of the dean.

**DePaul Students and Combined Programs**

The combined Bachelor's/Master's degree program allows students to complete a maximum of 12 graduate credit hours as three courses while still an undergraduate student. These three graduate level courses will count toward both the undergraduate and graduate degree programs.

Students must formally apply to a combined program in spring of their junior year; interested students should meet with the Graduate Program Director of the program. Students formally accepted into this program take a maximum of twelve graduate credit hours as three courses in their senior year. Students must formally apply for undergraduate degree conferral via Campus Connection and be awarded their bachelor's degree in anticipation of continuing with their master's level coursework.

Please note that except for a student participating in an approved Bachelor's/Master's program at DePaul, graduate courses taken while an undergraduate will not apply toward a graduate degree at DePaul.

**Scholarship Opportunities**

**Double Demon Scholarship**

The Double Demon Scholarship is awarded to DePaul alumni and covers 25 percent of tuition for degree, non-degree or select certificate coursework taken at the graduate level.* Both full-time and part-time students are eligible and no application is necessary. To learn more, contact the admission office for your college of interest (see listing below).

*Please note: The Double Demon Scholarship cannot be used in conjunction with other DePaul scholarships, waivers or awards. University employees are eligible for other tuition benefits and are not eligible. The scholarship does not cover coursework from the Center for Professional Education (CPE), the Institute for Professional Development (IPD), coursework in a doctoral program or a master of fine arts (MFA), School of Music, the Theatre School, College of Law and a few other select programs.

- Mathematical Sciences
- Neuroscience
- Physics
- Psychology
- School of Nursing
- Science Education

About

The Department of Biological Sciences provides courses for biology majors, minors, and non-majors from all areas. The department currently has more than 600 majors in its undergraduate program leading to a bachelors of science and offers a graduate program leading to a master of arts or master of science.

   Assistant Professor
   University of Guelph

Stanley A. Cohn, Ph.D.
   Professor
   University of Colorado
About

The Department of Chemistry has several fundamental responsibilities. They are (a) to train students to understand, to criticize meaningfully, and to carry out scientific investigations, (b) to provide instruction and laboratory experience for those who wish to make chemistry their livelihood and/or pursue advanced study in chemistry, (c) to provide instruction and laboratory experience for those who wish to use chemistry as a background in an allied profession, and (d) to provide students not majoring in chemistry with up-to-date instruction in the principles of chemistry and methods of scientific inquiry.

In meeting these responsibilities, the department offers three tracks of study, each of which lead to a Bachelor of Science that is certified by the American Chemical Society, the department's accrediting body. The tracks include Standard Chemistry, Analytical and Physical Chemistry, and Biochemical and Synthetic Medicinal Chemistry. The department also offers a Bachelor of Arts degree. This option allows students to get a firm educational foundation in chemistry along with the ability to develop specialization in another field not necessarily related to chemistry.

In addition to its baccalaureate degrees, the department offers several combined degree programs. Students may pursue a degree in chemistry and chemical engineering through a joint program with the Illinois Institute of Technology. The department hosts its own combined BS/MS program. This option allows students to earn a BS and MS in chemistry.

Philosophy
The mission of DePaul University’s Department of Health Sciences is to educate and train students who will collaboratively address human health from interdisciplinary natural and social scientific perspectives in order to promote health and to improve the lives of individuals and communities.

The Department of Health Sciences offers a BS in Health Sciences, a minor in Public Health Studies, combined degree programs (BS+MA in Health Communications, BS+Master of Public Health, and BS+Master’s Entry to Nursing Practice), and several 3+ Accelerated Programs that combine undergraduate studies at DePaul with graduate health professions studies at Rosalind Franklin University of Medicine and Science.

The Health Sciences major offers concentrations in BioScience and Public Health Studies. In addition to General tracks, each concentration offers tracks that help students focus their interests and prepare for future careers. In BioScience students can choose from tracks in Medicine and Pre-nursing; while in Public Health Studies, students can choose tracks in Health Education, Community Health or Health Policy and Administration. This degree a) provides students interested in pursuing a career in one of many health-related professions with a common core of knowledge; b) provides a general track in each concentration but also articulates additional tracks that meet requirements for entry into graduate programs; c) provides enough flexibility to enable students to move among those tracks as their interests evolve, and d) brings students headed for multiple health-related professions into on-going cross-disciplinary conversation with each other. The curriculum is built on the principle that, in order to be effective, professionals working in health need to understand the factors that impact both the health of individuals and the health of populations.

About

The Department of Mathematical Sciences offers courses in pure and applied mathematics to help students reach a wide variety of intellectual, academic, and career goals.

Many students come to the department to obtain the mathematical background needed to be successful in programs in the natural sciences, computer science, social sciences, and business. Such students may choose to supplement their major in their home department by obtaining a minor in mathematics. Other students come to the department seeking a program leading to an undergraduate or graduate degree in one of the mathematical sciences.

Professor and Chair
University of Wisconsin

Enrico Au-Yeung, Ph.D.
Assistant Professor
University of Maryland
Neuroscience

The Neuroscience major is a new interdisciplinary program that draws from the natural, behavioral, and computational science fields. The program's concentrations explore fundamental concepts that underlie the function of the nervous system on a cellular and molecular level, how the nervous system produces behavior and cognition, and the role of computer science and mathematics in new technologies and therapies within the field. The degree earned is a BS. The knowledge gained from studying neuroscience can be applied to careers in these sub-fields, as well as in pursuit of professional programs in health, mental health, and medicine.

About

Physicists study and apply the laws of nature to answer fundamental questions about the evolution of the universe, the nature of light and matter, and the behavior of the natural world. The Physics Department engages students in a rigorous academic environment in graduate and undergraduate education. The undergraduate major provides the depth and breadth required for graduate study in physics, related or interdisciplinary areas, or for applied programs such as engineering, electronics, and optics. A major factor in our success in preparing students for advanced degrees and rewarding careers is the high level of cooperation and interaction we maintain between faculty and students. Our classes are small, often laboratory-oriented, promoting serious learning in a friendly environment. Students are encouraged to participate in research with faculty and are frequently co-authors of articles in physics journals. Many students are supported as research assistants by funds from the College of Science and Health or by external grants.

In addition to its strong undergraduate program with concentrations in standard physics and computational physics, the department offers a joint engineering program in conjunction with Illinois Institute of Technology, and a Master's degree in Applied Physics.

About

The Department of Psychology is committed to providing excellent teaching, mentoring and advising for undergraduates, masters, and doctoral students in our six undergraduate major concentrations, two masters programs and five doctoral programs. Moreover, the Department of Psychology is committed to making meaningful contributions to the science of psychology and encourages students to do likewise, and to serve our university, community, and profession so as to enact and realize the mission of DePaul.

The goal of the Department of Psychology is to provide students with an understanding of the methods and content of scientific and applied psychology.

About

The mission of the School of Nursing is the preservation, enrichment, and transmission of nursing science as a discipline, and its application to promote the health and well-being of individuals, families, and communities. The faculty pursues this mission through excellence in teaching as the primary focus of scholarship, and research that has the potential to enhance nursing knowledge, scientific inquiry, teaching, and health. The School maintains a commitment to serving persons with diverse talents, qualities, interests, and socioeconomic backgrounds in its educational programs and professional practice. It seeks to provide accelerated, inquiry-based education that anticipates the rapid pace of change in health promotion and illness care.

Philosophy of the School Of Nursing

Nursing is a learned profession with a distinct science and art. Students learn the practice of nursing through research and the study of diverse human and environmental patterns of health behavior as they affect individuals, families, and communities. Students incorporate scientific knowledge and the nursing process in their delivery of safe, ethical and quality care with deep regard for the differences along the dimensions of race/ethnicity, gender, class, sexuality, religion, heritage and language.

The focus of the faculty of the School of Nursing is the education and preparation of students for leadership roles in healthcare. Education is centered on providing care for persons and communities in both health and illness while conducting scientific research to generate knowledge that strengthens these endeavors. Critical thinking is emphasized, along with an insightful examination of society, thus affording students the opportunity to apply the science and art of nursing to promote and maintain health while upholding human dignity for the betterment of the community and society.

In keeping with the Vincentian values of DePaul University, students treat all human beings equally and with respect, and by doing so, are acting in the interest of the common good. The School of Nursing faculty is committed to education that will provide the foundation for a professional career as a caregiver, educator, leader, and scholar.

About

The Science, Technology, Engineering, and Mathematics (STEM) Studies Department offers innovative, interdisciplinary programs and courses spanning the sciences, mathematics, and technology at DePaul. The Department works in close collaboration with the DePaul STEM Center. The Department administers the Master of Science in Science Education, a program to prepare master teachers in science at the middle school level. The program addresses a great need for content-based graduate study to enhance the teaching of science at the middle school level. The program integrates content with pedagogy, is inquiry-based, and integrates mathematics and technology with science. The STEM Studies Department also offers innovative science courses and special programs for undergraduates to engage highly diverse audiences in rich, contemporary science content.

Special Programs

The College of Science and Health offers a number of special programs to meet the unique needs of its students.

Accelerated Program

Rosalind Franklin University of Medicine and Science (RFU):

The 3+ Accelerated Degree Program offers qualified Pathways Honors students with a major in health sciences an opportunity to apply to a selective RFU 3+4 pre-professional program in medicine, 3+4 pre-professional program in pharmacy, 3+2 pre-professional program in physician assistant studies, 3+2 pre-professional program in pathologists' assistant studies, 3+3 pre-professional program in physical therapy, or 3+4 pre-professional program in podiatric medicine. The program also offers qualified Pathways Honors students with a major in chemistry (BA-seeking) an opportunity to apply to the 3+4 pre-professional program in pharmacy.

Combined Programs

The combined Bachelor's/Master's degree program allows students to complete a maximum of 12 graduate credit hours as three courses while still an undergraduate student. These three graduate level courses will count toward both the undergraduate and graduate degree programs.

Students must formally apply to a combined program in spring of their junior year; interested students should meet with the Graduate Program Director of the program. Students formally accepted into this program take a maximum of twelve graduate credit hours as three courses in their senior year. Students must formally apply for undergraduate degree conferral via Campus Connection and be awarded their bachelor's degree in anticipation of continuing with their master's level coursework.

Please note that except for the 12 graduate credit hour limit as three courses for students participating in an approved Bachelor's/Master's program at DePaul, graduate courses taken while an undergraduate will not apply toward a graduate degree at DePaul.
TEACH Program

This combined degree program of the College of Science and Health and the College of Education was collaboratively developed, and is governed and taught by faculty from these units. A full description of the Program can be found on the College of Education website in the graduate course catalog.

Modern Language Option Program

The Modern Language Option is available to all B.A. students who wish to study a modern language beyond the level necessary to meet the College's modern language requirement and to B.S. students who wish to study a Modern Language at any level. Students selecting the option may substitute a three-course language sequence for two domain courses and one open elective. Students may use the Modern Language Option by applying two of the modern language courses toward two different learning domain combinations. Here are the available combinations: Philosophical Inquiry or Religious Dimensions; Understanding the Past or Self, Society, and the Modern World; or Arts and Literature or Scientific Inquiry (cannot substitute for the lab science or science as a way of knowing requirement.). Students majoring in one modern language may use the Modern Language Option for study of a second language at the intermediate level or above. Please see your advisor for additional information about Modern Language Option course placement.

Online Degree Programs

Bachelor of Arts (BA) in Psychology

The BA in Psychology can be completed online, by transfer students, if certain prerequisites and additional degree requirements are met. This online degree program is available for two concentrations within the psychology major: the Standard BA Concentration and the Human Development BA Concentration.

Admission criteria for online programs

In order to be eligible for the BA in Psychology online format, students must meet the following requirements:

- Be a transfer student with a minimum of 45 quarter hours/30 semester hours of transfer credit
- Have a minimum cumulative 2.0 GPA
- Be in good standing at the last school attended

Prerequisites

Transfer students are encouraged to complete writing courses equivalent to DePaul's WRD 103 and WRD 104 Composition & Rhetoric I and II (i.e. English Composition 101, and 102) requirements prior to beginning the online courses. Additionally, students will need to complete college algebra equivalent to DePaul's MAT 100 or MAT 101 (or a higher math course) before enrolling in the online program. Students who have successfully completed Statistics and/or Calculus will not need to take the math placement test.

Students should plan to complete all, or almost all, of their psychology courses at DePaul. Some elective and liberal studies courses may be completed with transfer credits. Consult the Transfer Course List for transferrable courses that may apply to Liberal Studies Program (LSP) and elective course requirements.

Bachelor of Arts Degree Requirements
The following degree requirements will need to be fulfilled in addition to the online course offerings:

- Complete the lab science course requirement through transfer course work, or credit by exam (CLEP/AP/IB). (Students may earn college level credit through taking College Level Equivalency Exams (CLEP) to validate knowledge previously acquired.)
- Complete the Modern Language requirement through transfer course work, proficiency, or credit by exam. (Proficiency may be documented by a satisfactory rating in a language proficiency examination administered, or accepted, by DePaul University.)

Graduation requirements for the BA in Psychology online degree program are identical to those for all psychology majors in the Standard Psychology or Human Development concentrations (see the Degree Requirements). DePaul bachelor's degrees require 192 quarter hours.

To complete the degree requirements online in a timely fashion, students will need to follow the recommended online degree plan. Degree plans are available through the Psychology department.

Transfer students should select the Psychology Online Degree Program as their major when submitting a transfer application for admission to DePaul.

Nursing RN to MS

The RN to MS curriculum provides for seamless progression for the Registered Nurse (RN) with an associate degree in nursing (ADN) to the master's degree (MS) in nursing, whether or not the student also holds either a BSN or a BA/BS in another field. Along the way, ADN-only students will earn the Bachelor of Science (BS) degree in nursing. Students who hold a BSN may proceed directly to pursuing the MS. Students who hold a BA/BS in a different field will be required to complete a number of prerequisite courses before pursuing the MS. The focus of the program is on the attainment of the MS degree.

The RN to MS program will be offered online except for the clinical requirements. Students will be required to complete clinical nursing experiences, which will be undertaken in their home communities with appropriate local preceptor agreements.

Pathways Honors Program

The Pathways Honors Program is designed for highly qualified and motivated College of Science and Health pre-professional students interested in pursuing a health career. Students who are part of the Pathways Honors Program will enter as a cohort during their first-year at DePaul. One of the primary features of the Pathways Honors Program is the Early Opportunity Program.

Early Opportunity Program: Offers eligible Pathways Honors students the opportunity for an early admission decision into one of six professional programs at Rosalind Franklin University of Medicine and Science (RFU): medicine, pharmacy, podiatry, physician assistant, pathologists' assistant, and physical therapy. The Early Opportunity Program will result in early acceptance for qualified Pathways Honors applicants into one of these abovementioned RFU professional programs. Students may apply at the end of their freshman, sophomore or junior year at DePaul. Students may matriculate at RFU as early as at the end of either their third year (3+ Accelerated Degree Program) or fourth year (4+ Traditional Degree Program) at DePaul.

Pathways Honors students will receive the same benefits as any other Pre-Health Program student at DePaul, but they will also have an opportunity to:

- enroll in special sections of some science courses
- meet regularly with faculty advisors and staff at Rosalind Franklin University of Medicine and Science (RFU) – a rare benefit for undergraduates in pre-professional programs
- network with RFU students
- participate in onsite research opportunities at RFU
- pursue the Early Opportunity Program
- pursue one of the 3+ Accelerated Degree Programs
The Pathways Honors Program is separate from the University Honors Program, but some students might be part of both programs.

Pre-Health Program

At DePaul University any enrolled student from any major (any college or school) who is considering a professional graduate degree leading to a career in health care can register for the College of Science and Health's Pre-Health Program. The Pre-Health Program is a pre-professional program designed to help students explore their interests and identify which health career might be the best fit for them.

Currently enrolled DePaul students may register to become part of the Pre-Health Program regardless of major, minor, or concentration.

Certificates

The College of Science and Health (CSH) offers certificate programs through our Mathematical Sciences Department.

The CSH also participates in an interdisciplinary program offered through the School of Public Service in the College of Liberal Arts and Social Sciences.

Certificate in Applied Statistics

The certificate program requires successful completion of six courses in Applied Statistics.

- MAT 441 APPLIED STATISTICS I
- MAT 442 APPLIED STATISTICS II
- MAT 443 APPLIED STATISTICS III
- Three courses selected from:
  - MAT 456 APPLIED REGRESSION ANALYSIS
  - MAT 457 NONPARAMETRIC STATISTICS
  - MAT 458 STATISTICAL QUALITY CONTROL
  - MAT 526 SAMPLING THEORY AND METHODS
  - MAT 528 DESIGN AND ANALYSIS OF EXPERIMENTS

Students in the Certificate in Applied Statistics program must follow the probation and dismissal guidelines found in the Program Graduate Academic Student Handbook for Applied Statistics.

Students in the Certificate in Applied Statistics program must apply for degree conferral via Campus Connection in advance of their final quarter in the program in order to have their coursework audited for the awarding of
Certificate in Community Development

This program offers community development specialists skills in organization planning, leadership development, and program evaluation. The program allows established and emerging professionals to broaden their perspective on urban-development programs in an inter-disciplinary learning environment by including knowledge from psychology, public service, sociology, geography and liberal studies.

Students must successfully complete a minimum of 16-quarter hours of graduate credit. Each course carries four-quarter hours. Students then must participate in a non-credit research colloquium. Each participant of the colloquium makes a presentation before a small group of students and faculty members. No more than two courses earned toward the certificate shall come from one department. Please note that the list of courses is subject to change.

Course Requirements

- MPS 571 METROPOLITAN PLANNING
- Select three (3) from the following:
  - GEO 441 GEOGRAPHIC INFORMATION SYSTEMS (GIS) FOR COMMUNITY DEVELOPMENT
  - MLS 404 THE CITY
  - MPS 526 LOCAL GOVERNMENT ADMINISTRATION
  - MPS 572 POVERTY, INEQUALITY AND PUBLIC POLICY
  - MPS 573 URBAN AND COMMUNITY DEVELOPMENT
  - PSY 654 COMMUNITY PSYCHOLOGY
  - PSY 680 INDUSTRIAL AND ORGANIZATIONAL PSYCHOLOGY
  - SOC 426 URBAN DEVELOPMENT POLICIES

Students may also enroll in the following elective courses, with permission of the program director and often the approval of the instructor. Generally, participants will be limited to one (1) of these courses:

- MPS 529 STRATEGIC MANAGEMENT AND PLANNING
- PSY 495 GRANT WRITING IN PSYCHOLOGY
- PSY 520 PRINCIPLES OF HUMAN DIVERSITY
- PSY 567 SPECIAL TOPICS IN COMMUNITY PSYCHOLOGY
- PSY 569 SEMINAR IN PROGRAM EVALUATION
- SOC 423 RESEARCH ON URBAN CULTURES
- SOC 360 SOCIAL SERVICES IN CONTEMPORARY SOCIETY

Certificate in Mathematics for Community College Teaching

Course Requirements

- MAT 470 ADVANCED LINEAR ALGEBRA
- MAT 642 MULTIVARIABLE CALCULUS FOR TEACHERS II
- MAT 644 DIFFERENTIAL EQUATIONS FOR MATHEMATICS TEACHERS
Students in the Certificate in Mathematics for Community College Teaching (‘Certificate’) program must follow the probation and dismissal guidelines found in the Program Graduate Academic Student Handbook for Master of Science in Mathematics for Teaching (MSMT).

Certificate seekers can only be recent graduates of DePaul University's Master of Arts in Mathematics Education (MAMEd) program. The purpose of the Certificate is to fortify the MAMEd degree for students who wish to teach at the community college level.

The Certificate is comprised of five courses at 20 credit hours, those of which are part of DePaul's Master of Science in Mathematics Teaching (MSMT) degree but which are not part of the MAMEd degree. Students are restricted from earning both the Certificate and the MSMT.

Students in the Certificate program must apply for degree conferral via Campus Connection in advance of their final quarter in the program in order to have their coursework audited for the awarding of their certificate.

Post-Baccalaureate Programs

The College of Science and Health's (CSH's) Post-Baccalaureate Pre-Health Program (“post-bac program”) at DePaul is a pre-professional program designed for career changers who aspire to pursue a graduate health professions program’s prerequisite coursework leading to a career in one of the following eight fields: dentistry, medicine, optometry, pharmacy, physical therapy, physician assistant practice, podiatry, or veterinary medicine. The post-bac program is flexible and allows students who might be working full-time or part-time to complete the courses (offered during the day, Monday through Friday) on a part-time basis at their own pace. The post-bac program does not bear a certificate, nor will it carry any other type of credential.

In order to be eligible for the post-bac program, applicants must:

- Be U.S. citizens or permanent residents
- Have earned at least a bachelor's degree with a non-natural science major from an accredited college or university; if an applicant already completed one or two graduate health professions prerequisites, depending on when the courses were completed – and the grades achieved – students may be advised to either repeat them or take one or two advanced-level science courses
- Have earned at least a 3.00/4.00 undergraduate cumulative GPA
- Be in good academic standing at previous institution(s) and be able to return
- Be career changers with little to no lab science background

Benefits of the post-bac program:

- Completion of courses at one's own pace on a part-time basis
- Customized pre-health advising from faculty and staff advisors
- Opportunity to have a committee letter of recommendation written (depending on professional school program of pursuit)
- Guidance on identifying and pursuing volunteering, shadowing, research, and leadership-building experiences
- Free tutoring at the CSH's Science and Math Learning Center and DePaul's Learning Commons
- Automatic registration for the CSH's Pre-Health Program: receive invitations to pre-professional workshops (i.e. personal statement writing, practice interviews, etc.), speaker engagements, student group events, and possible shadowing and volunteering opportunities
- Registration for classes before the general non-degree seeking population

## Student Resources

The College of Science and Health (CSH) provides a broad range of advising and student services to help undergraduate and graduate CSH students reach their academic and co-curricular goals and enhance their personal, intellectual and professional development. The CSH also provides specialized advising to students interested in pre-health and exploring research opportunities. Depending upon the extent of the student need, the CSH is also equipped to refer students to the expert department within the University to best address it.

## Academic Advising

### Undergraduate Advising

Academic advising is a valued component of the student experience within the College of Science and Health (CSH). It provides students with the opportunity to develop an academic plan that best fits their interests, strengths, and academic and career goals under the guidance of a knowledgeable and supportive professional staff advisor.

Upon declaring a major field of study in the CSH via Campus Connection, students are assigned to either a faculty academic advisor or staff advisor in the corresponding department or program. Students who have declared a major should meet regularly with their assigned advisor within their program in order to complete their courses in a timely and efficient manner, discuss internship or career opportunities, learn of research opportunities, and plan for pursuing graduate or professional school. Faculty advisors and staff advisors in departments collaborate closely with staff professional advisors in the CSH's Office of Advising and Student Services.
Taking courses without consulting an advisor may lead to credits that will not satisfy CSH requirements for graduation. Those students who have not yet declared a major are highly encouraged to meet with either a staff advisor in the CSH's Office of Advising and Student Services or a staff advisor in DePaul's Office for Academic Advising Support prior to registering for classes each quarter.

Pre-health Advising

The CSH provides pre-health advising to enrolled DePaul University students - regardless of their undergraduate major or graduate program of choice - who are interested in pursuing a pre-professional program. The CSH's Office of Advising and Student Services has a dedicated pre-health staff advisor who works in conjunction with the CSH's Pre-health Advising Committee (PAC), a committee comprised of CSH faculty and staff who mentor pre-health students in anticipation of completing and submitting their applications to professional schools upon graduation from DePaul. The PAC is also charged with writing committee letters of recommendation for students who are in the midst of applying to programs.

Research Advising

The CSH provides specialized advising to undergraduate students interested in exploring research opportunities. A dedicated staff advisor works directly with students to help them identify a research match with a faculty member, to coach them on presenting and publishing their research, and to assist them with navigating the graduate school application process.

Graduate Advising

Academic advising is an essential component of student success. Graduate program directors and other faculty work with graduate students not only on course selection and to monitor progress toward degree, but, more importantly, to serve as mentors and advocates through students’ programs of study and research.

Degree-seeking students can find the name of their advisor in Campus Connect. Non-degree seeking students should contact the CSH's Office of Advising and Student Services for advising support.

Office of Advising and Student Services

The Office of Advising and Student Services partners with faculty and staff in the College of Science and Health (CSH) to provide academic advising and student services to undergraduate and graduate CSH students. The office offers specialized advising to all DePaul University pre-health students, who are interested in pre-professional programs. Additionally, the office provides advising to undergraduate students seeking assistance with identifying and applying for internal and external research opportunities.

Advising and student services include, but are not limited to, pre-health advising, advising on research and internship opportunities, guiding new and continuing students on course selection and registration, providing consultation on academic policy interpretation, coordinating graduation, identifying study abroad opportunities, and providing other forms of academic and extracurricular support.

About SNL

Why We're Distinctive
The School for New Learning (SNL) provides a unique approach to learning for adults, with customized programs that build upon abilities and experiences, add knowledge, and develop skills to help achieve personal and professional goals.

A fundamental idea behind SNL is learning from experience. We believe mixing experiences and interpretations results in lasting knowledge.

SNL programs are designed to recognize and develop competency. Our students are assessed on their problem-solving knowledge.

SNL values individualized learning. Students move at their own pace with personalized guidance.

Mission

The DePaul University School for New Learning (SNL) is a college designed particularly for adults, who bring rich experience to their desire to advance, enhance, or change their careers and personal lives. Every element of the college, from curricula to support services, acknowledges the constant interaction of school, work, community and family, and empowers the student to reflect, so that experience becomes a source of knowledge and learning becomes a way of life. Rooted in Vincentian traditions of human dignity and social responsibility, SNL provides highly personalized opportunities and emphasizes the integrity, individuality, and responsibility of each student to develop competency and put learning to ever-new use.

The School for New Learning defines eight commitments as essential to its mission.

A Commitment to Learning as a Way of Life
For all of its learners SNL cares about the substance and process of learning — the knowledge, abilities and values they acquire, as well as the educational goals they attain. The School believes that adults learn deeply by reflecting, particularly on experience, drawing meaning and transferable knowledge from all they have done. When we are most successful, students refine their habits of learning, and experience the excitement of expanding their curiosity, of using formal inquiry, of developing as independent lifelong learners.

A Commitment to Competency
Curriculum design and assessment practices at SNL focus on the outcomes of learning — the student’s demonstrated knowledge and abilities, learned in a variety of ways. This focus on competency leads faculty to pursue excellence in curricular design, advising strategies, and teaching methods. It enables students to integrate classroom learning with learning from life and work, and to apply continuously what they are learning in other contexts.

A Commitment to Partnership with Students
In collaboration with learners, faculty and staff design, implement and assess individualized educational programs. This learning-centered partnership, based on mutual respect for each participant’s expertise, prior learning, and decision-making power, deepens and broadens learning.
A Commitment to Diversity

SNL faculty develop teaching, advising and assessment practices that value human differences in the broadest sense. SNL seeks, in particular, to present a welcoming environment for those who have historically been excluded from higher education, and to enable all to benefit from the richness that diversity brings to a learning community.

A Commitment to an Evolving, Developing Organization

SNL is a continuously evolving organization, open and responsive to the emerging educational needs of individuals and groups in a constantly changing world. SNL’s response includes ongoing research in effective teaching, mentoring, and assessment, resulting in imaginative design of programs, structures, systems, courses and materials.

A Commitment to Community in Service of Learning

SNL students, faculty, and staff work and learn in a community that fosters the mutual regard and support necessary for learning. Individuals creatively address challenges caused by multiple locations, asynchronicity, and varying areas and levels of knowledge. Members commit themselves to the Vincentian personal regard for the dignity of individuals, respectfully dealing with conflict, setting goals which benefit individuals as well as DePaul and its urban, and global communities, and celebrating achievements.

A Commitment to Social Justice

SNL deliberately works to shape a more just, livable world; to ensure that those who have historically been ignored, excluded, marginalized, oppressed and economically disenfranchised benefit from the many learning opportunities available through SNL and beyond. In its curriculum, its classroom environments, its assessment practices, its advising strategies, and its formal advocacy, SNL creates an intellectual and social milieu where a plurality of worldviews, cultures and value systems are respected, understood, encouraged and appreciated.

Commitment to Adult Learning

The active, reflective practice of established and emerging principles of adult learning is central to the School for New Learning. Faculty and staff, who come from many formal disciplines, enable and encourage colleagues to develop, apply, and disseminate knowledge in the practice of adult education—continuously.

The School for New Learning office is located in suite 1400 of the Daley Building at 14 E. Jackson Blvd. in Chicago. Website: http://snl.depaul.edu

Office hours are 8:30 am - 6 pm, Monday-Thursday, and 8:30 am - 5 pm on Friday. Telephone: 312-362-8001. Fax: 312-476-3220. General Email: snl@depaul.edu

Mailing Address: DePaul University, School for New Learning, 1 East Jackson Blvd., Chicago, IL 60604.

Academics

Founded in 1972, the School for New Learning (SNL) is an internationally recognized leader in education for adults.

The School for New Learning offers both Undergraduate and Graduate degrees.

Programs of Study

- Applied Behavioral Sciences (BA)
- Computing (BA)
- Decision Analytics (BA)
- General Business (BA)
- Individualized Focus Area (BA)
- Leadership Studies (BA)

The College of Education also offers a joint program with the School for New Learning:

- Early Childhood Education: SNL Joint Program (BA)
SNL Undergraduate Academic Student Handbook

All SNL undergraduate students assume responsibility to know and meet both the general and particular regulations, procedures, policies and deadlines set forth in these materials. In addition, all SNL undergraduate students are expected to adhere to the Student Code of Responsibility (available in the DePaul University Undergraduate Student Handbook) to follow the policies, procedures and regulations of the University. Failure to do so may be grounds for dismissal from the applicable degree program.

Additional program information and regulations applicable to specific programs can be found on the SNL website.

Competency Limits

In most four credit hour undergraduate courses at SNL, students may enroll for a maximum of two competencies. However, students may enroll in only one FX competency per course. Exceptions to this policy are

1. In travel courses, students can enroll in three or four competencies if two of them are L10 and L11 (Externship).
2. In courses offered in the Adult Bridge Program, which are a semester long, SNL students may register for three competencies.
3. Certain four-credit hour courses offer only one competency; these include Writing for Competence (L4), Critical Thinking (L5), and Quantitative Reasoning (L6).
4. Certain two-credit hour courses, including Guided Independent Studies, five-week courses, and December Term courses, may be taken for only one competency.
5. In University Internship Program courses offered for two FX competencies, students are enrolled for both FX competencies.

Dean's List, Honors and Honor Societies

SNL does not offer graduation designations such as “cum laude” or “magna cum laude” (with honors, with high honors) because of the great variety of student transfer learning. Recognition is offered to eligible students through invitation-only honor societies such as Alpha Sigma Lambda and Phil Kappa Phi. Students meeting the criteria may claim membership on the SNL Dean's List. Eligibility for the SNL Dean's List requires a GPA of 3.5 for the quarter based on a minimum of 8 graded credit hours in DePaul courses, excluding grades of Pass and W. Students who received IN, M, or R grades for the quarter are not eligible. The Dean’s List is not separately published.

Grades

Grades below C- in SNL and transfer courses do not satisfy competency and are not counted toward graduation. R grades can be submitted only for LL 250, LL 300, LL 390, FA 303/4, Guided Independent Studies, and SNL Study Abroad courses.

Grades are not changed because of a reassessment of course work, the submission of extra work or by the retaking of an examination. In very rare cases, an instructor may request to make a change of grade but it requires approval by the SNL Exceptions Committee.

The SNL Exceptions Committee will entertain grade change requests from instructors but only where either the student or the instructor has made a compelling case with adequate written supporting documentation that a grade change is warranted for equitable considerations. The mere fact that a student's IN or R grade has reverted to an F is not, in and of itself, sufficient grounds to warrant such an exception. If a grade change is deemed appropriate by the Exceptions Committee or through an Incomplete Contract, faculty enter the grade change directly in Campus Connect.

Pass/ Fail Grades

In most undergraduate courses at SNL, grades are assessed, by default, on the A/F grading scale, but students may request, instead, assessment on the Pass/Fail (PA/F) grading scale. In SNL undergraduate courses, grades of C- through A represent passing performance on the PA/F scale.

There are nine undergraduate courses at SNL in which grades are assessed, by default, on the PA/F grading scale, but students may request, instead, assessment on the A/F grading scale. These courses are: Independent Learning Seminar (course number LL 103; competency L-1); Writing for Competence (course number LL 260; competency L-4), Critical Thinking (course number LL 270; competency L-5), Research Seminar (course number
LL 300; competencies L-8 and L-9), Externship (course number LL 302; competencies L-10 and L-11), Writing Workshop (course number LL 140; competency H-3-J), Professional Portfolio Development (course number DCM 320), Capstone Planning (course number DCM 321), and Capstone Project (course number DCM 322).

A student who wants to request a change in grading scale, either to or from the Pass/Fail option, must make the request to the instructor in writing by the beginning of the third week of the quarter or, for courses fewer than ten weeks long in duration, by the beginning of the second week of the course. The grading basis may not be changed after these deadlines, with no exceptions.

There are three courses within SNL’s undergraduate curriculum that are always assessed on the PA/F grading scale: Foundations of Adult Learning (course number LL 250; competencies L-2 and F-1), Advanced Project (course number FA 303/304; competencies F-11 and F-12) and Summit Seminar (course number LL 390; competency L-12). These courses may not be taken for assessment on the A/F grading scale.

Competencies assessed in a course as Pass (PA) will earn credit hours toward degree completion but will not be included in computing students’ grade point averages. Attempted competency demonstration assessed within a course as Fail (F) will not only be recorded as credit hours attempted but will also be included in computing the student’s grade point average.

For SNL students, competencies awarded for Independent Learning Pursuits (ILPs) and courses in the Lifelong Learning Area do not count toward the university’s specification that only twenty credit hours may be earned through the PA/F grading option. All other courses do count toward the university limit of courses that can be taken PA/F.

**Independent Learning Pursuits**

An Independent Learning Pursuit (ILP) allows students to demonstrate evidence of a competency gained through college-level learning from life experience. Students who have activated their Academic Committees can submit an ILP assessment form, along with appropriate evidence of competency, to their Faculty Mentor. ILPs in the Focus Area are assessed by the Professional Advisor. Students pay a non-refundable assessment fee ($150) for each ILP.

A minimum of 25% of the School for New Learning undergraduate degree requirements must be earned through residential credit by taking courses at SNL (some programs may require more). A maximum of 75% of SNL undergraduate degree requirements may be met through transfer coursework, proficiencies, and ILPs. However, proficiencies and ILPs may not account for more than 25% of the total degree requirements.

Credits earned through ILPs and proficiencies are not eligible for Financial Aid, do not count for purposes of determining enrollment status, and they neither fulfill nor interrupt the residency requirements. While SNL will apply ILP and proficiency credit to SNL degrees, other DePaul colleges are under no obligation to do so.

**Repeating Courses**

SNL follows the general specifications of the University policy in this area.

A student may repeat an SNL class as long as the registration is for the same competency as in the original attempt. In this case, the University policy stipulates that the second attempt is the one which determines the cumulative credit and GPA.

A student may not repeat an SNL class if the registration is for a competency different from the original registration.

When SNL undergraduate students repeat competencies, all grades achieved are recorded on their academic records. Recalculations of the GPA will be made according to the following guidelines: (1) Upon the initial repeat, only the second grade will be used to calculate the GPA. (2) Upon further repeats, the second and all subsequent grades will be used to calculate the GPA. These guidelines apply whether students took the competences for pass/fail or A/F grades.

Because SNL undergraduate students may take and apply several of the same competencies to fulfill program requirements, GPA recalculations for repeated competencies are made on an ad-hoc basis only. Recalculations are initiated at the request of students, mentors, and advisors and performed by the SNL Student Records office.

**Residency Requirements**

Students must complete the following work in residence at DePaul University:

- Students pursuing the BA with an Individualized Focus Area, BA in Computing, BA in General Business, or BA in Early Childhood Development must complete competencies through SNL as described in the particular degree requirements.
- BA in Computing students must also complete 5 courses through the College of Computing and Digital
Media.

- BA in Early Childhood Education students must also complete 9 courses through the College of Education.
- Students pursuing the Degree Completion Major programs complete 93 credit hours at DePaul.
- BA in Decision Analytics students must complete 60 credit hours at DePaul.

**Active Duty Servicemembers, Reservists and National Guardsmen**

The School for New Learning is an active member of the Servicemembers Opportunity Colleges (SOC) Consortium and operates within the SOC policies and residence requirement parameters in its Individual Focus Area undergraduate degrees. Servicemembers can design degree programs in any area of interest and complete their requirements through a combination of on campus or online learning, documentation of relevant experience and independent study. Academic residency can be completed at any time while enrolled and does not exceed 25% of the academic requirements. SNL programs exempt from SOC participation include the BA in Computing, BA in General Business, BA in Early Childhood Development, and Degree Completion Majors in Applied Behavioral Sciences and Leadership.

**Transfer Coursework Process**

SNL accepts courses from other colleges as satisfying most competencies. Transfer courses must have a grade of C- or better, be 2 semester hours or 3 quarter hours, and must be from an accredited institution. SNL faculty have pre-assessed certain courses for particular competencies. Courses on these lists do not require completion of Transfer Coursework Assessment Forms for the pre-assessed competencies.

---

**Admission**

The School for New Learning offers adults (age 24 and above) customized and accelerated undergraduate degrees and unique, individualized graduate programs.

**Undergraduate Admission**

Candidates interested in admission to the School for New Learning should direct their inquiries to the Office of Admission, DePaul University, 1 E. Jackson Boulevard, Chicago, Illinois, 60604, admission@depaul.edu, or 312-362-8300.

Applicants must have a GPA of 2.0 from the last school attended. This requirement may be waived for a transcript more than three years old.

See further information and online application at: http://snl.depaul.edu/admission-and-aid/undergraduate/Pages/default.aspx

Graduate Admission

As indicated, the following process and components apply to all of the School for New Learning’s (SNL) graduate programs and certificates. See application and further information at: http://snl.depaul.edu/admission-and-aid/graduate/Pages/default.aspx

Application Steps

Step 1: Basic Information.

Applicant becomes knowledgeable about a particular SNL graduate program/certificate. Various options are available for this purpose, e.g., viewbooks, information sessions, advising appointments, etc.

Step 2: Application and Required Materials.

Applicant submits required application materials including:

- a completed Application form and Application fee* (*The application fee is waived for DePaul alumni);
- a current resume;
- an Application Essay* (writing sample) that addresses key questions pertinent to assessing the “fit” of the particular program to the student and vice versa (*Application Essay is waived for certificate applicants);
- and,
- official, sealed transcripts documenting all prior college/university coursework including demonstration of a completed undergraduate degree from a regionally accredited institution. A cumulative GPA of 3.0 is required for all prior coursework.

NOTE: Standardized test scores are not required; however, applicants who have taken tests such as the GRE, GMAT, Miller Analogies, etc., within the previous three years are encouraged to submit their scores.

International students are advised to consult the International Programs Office to learn of further University requirements that may apply.

Step 3: Interview.

Upon initial review of application materials, a representative of the SNL Graduate Admissions Committee invites qualified applicants to an admissions interview. The purpose of this interview is to enable both the particular program and the applicant to further ascertain the match or alignment between what the particular graduate program/certificate offers and what the applicant is seeking in terms of his/her graduate-learning or certificate-learning experience.

Step 4: Review.

Information gleaned from each applicant's materials and interview is reviewed and assessed by the SNL Graduate Admissions Committee in accordance with the particular program's admission considerations. See admissions considerations below.

Step 5: Decision.

An admission decision is rendered and communicated to the applicant in writing. As necessary, SNL Graduate Programs reserve the right to admit particular applicants conditionally. In such cases, the terms (conditions and timeline) of the conditional status are noted in the student's acceptance letter. Failure to satisfactorily adhere to or fulfill these terms may result in academic dismissal/withdrawal from the particular program.

Admission Considerations

The following areas are considered in making admission decisions:

- applicant’s professional background including, for graduate program applicants, his/her possession of at least three years of experience, or equivalent, relevant to the particular SNL graduate program/certificate under consideration;
- applicant’s possession of a practice-site (worksite or relevant application setting in which to apply learning from the particular SNL graduate/certificate program);
- applicant’s educational goals/objectives and the congruence between those goals and the
graduate/certificate program under consideration;
  • applicant's learning values and skills (willingness and ability to conduct self-managed/independent learning;
    participate positively in peer-group learning; engage in self-assessment; engage in reflection to increase
    understanding and improve practice; and, organize areas of knowledge and skill into themes and describe
    evidence in support of such);
  • applicant's access to, and ability to use, e-mail, the Internet, and necessary computer-based software; and,
  • applicant's undergraduate cumulative GPA of no less than 3.0.

NOTE: The School for New Learning/DePaul University considers students on the basis of individual merit and
without regard to race, color, religion, gender, sexual orientation, age, national or ethnic origin, handicap, or
other factors irrelevant to participation in its programs.

Admission Status

Students are to matriculate in the quarter for which they are admitted. Students failing to do so (and who later
wish to start) are responsible to update their admissions materials and, if necessary—depending on changes to
those materials—reapply. The Graduate Programs Office maintains an admission file/status for one year from the
date of admission.

After three consecutive quarters, excluding summer, of no registration activity (no credit hours or the
minimal Continuing Activity Status), the University deems graduate students to be discontinued. Once
discontinued, graduate students wishing to resume their graduate studies are required to reapply for admission
to their respective graduate programs and, upon readmission, proceed in accordance with program specifications
in place from that point forward, as well as any special directives provided at the point of readmission. These
contingencies of reapplication / readmission also apply to graduate students who are not able to complete their
graduate programs within the allotted six years from point of first enrollment.

International Admission

In addition to the Admissions Requirements above, International Students must also submit the following:

  • Proof of English Language Proficiency.
  • English Proficiency Test. Applicants educated outside of the U.S., at an institution where English is not the
    primary language, must present proof of English proficiency to be considered for admission. DePaul
    University accepts the TOEFL, IELTS, or Pearson Test of English. Most scores are valid for two years only.
    Expired test scores will not be accepted.

    The minimum scores considered for graduate admission to SNL are: 80 on the iBT of the TOEFL with
    an minimum score of 17 on each section
    550 on the paper-based TOEFL test
    213 on the computer-based TOEFL test
    6.5 on the IELTS test
    53 on the Pearson Test of English

  • Credential Evaluation. DePaul University requires that applicants educated outside of the U.S. submit
    official educational credentials and evaluation fee directly to one of the following companies:
    • One Earth International Credit Evaluation
    • Educational Credential Evaluators, Inc. (ECE)
    • Educational Perspectives (EP)

    Applicants must request a course by course evaluation. Please direct any questions about required
    credentials to the evaluation company. DePaul University will not accept evaluations from any
    evaluation company not listed here.

    Upon admission, regarding student visa information, please see http://international.depaul.edu.

Financial Aid

Information about applying for financial assistance is available on the SNL website: http://snl.depaul.edu.
Scholarships and Financial Aid

SNL has scholarship opportunities for undergraduate and graduate students. To be considered for SNL scholarships, please apply at DePaul Scholarship Connect. Please complete the Free Application for Federal Student Aid before applying for scholarships.

See also more information about financial aid.

Liberal Learning for Professionals

SNL awards a Certificate of Achievement in Liberal Learning for Professionals to graduate students who successfully complete the Liberal Learning portion (18 credit hours) per graduate program (MAAPS, MAEA, MSAT). This portion includes:

- LLS 410 PERSONAL EFFECTIVENESS
- LLS 420 INTERPERSONAL EFFECTIVENESS
- LLS 430 ORGANIZATIONAL EFFECTIVENESS
- LLS 440 VALUES EFFECTIVENESS
- LLS 450 INQUIRY EFFECTIVENESS

Educating Adults

SNL awards a Certificate of Achievement in Educating Adults to graduate students or non-degree-seeking professionals who successfully complete three core courses (12 credit hours) that relate directly to the effective design, implementation and assessment of learning programs in any setting. The three courses include:

- EA 516 DESIGNING EDUCATIONAL OFFERINGS
- EA 517 FACILITATING ADULT LEARNING
- EA 526 ASSESSING LEARNING AND EVALUATING PROGRAMS

About

The DePaul University School of Music prepares students to excel in a variety of professional careers. Located in one of the most vibrant musical cities in the world, the School of Music provides opportunities for students to study with working professionals who are committed to teaching excellence. In a supportive and collaborative atmosphere, students learn from distinguished faculty who are prominent conductors, composers, performers, recording engineers, teachers, and arts managers.
Through a highly selective admissions process, the School of Music selects undergraduate and graduate students for its seven undergraduate, four graduate programs, and two certificate programs. At DePaul, the faculty priority is on teaching, with a strong commitment to providing quality education. The School of Music embraces the diversity of Chicago's urban society, and draws upon the resources of the city in all its programs. In keeping with DePaul's Vincentian heritage, the School of Music is committed to service of others. We seek to enrich the lives of the members of the DePaul community and Chicago area through musical performances and outreach activities.

Three basic tenets are central to the School of Music's mission: nurture, engage, and elevate. The School strives to nurture students in a healthy learning environment, engage students in meaningful learning experiences, and elevate students onto successful career paths.

Majors

- Composition (BM)
- Jazz Studies (BM)
- Music (BA)
- Music Education (BM)
- Music Performance (BM)
- Performing Arts Management (BM)
- Sound Recording Technology (BS)

Minors

- Music Industry: Music Business (Minor)
- Music Industry: Music Recording (Minor)
- Music Studies (Minor)

Academic Policies

Performance Awards

All students who receive performance awards must participate in ensembles as needed. Failure to do so may result in the forfeiture of performance award dollars. Undergraduate performance awards are offered for a maximum of 12 quarters, except for music education majors (13 quarters) or double majors (15 quarters). Graduate performance awards are provided for a maximum of 6 quarters. Questions about the performance awards may be directed to Mr. Ross Beacraft, Director of Admission.

Curricular ensemble requirements may differ from performance award requirements. A student on a performance awards may be required to participate in ensembles different than or beyond their major's curricular requirements.

Supplemental Transfer Credits

Incoming undergraduate students: transfer credits

At the point of admission, non-music courses are reviewed and posted by the Transfer Credit Center. All music courses will be reviewed by the Associate Dean of Academic Affairs, and acceptable courses will be applied towards the degree program. The transfer of musicianship studies courses, i.e., theory, aural training, and group piano are contingent upon proficiency examination results.

Current undergraduate students: supplemental transfer credits

Once a student has enrolled at DePaul University School of Music, only liberal studies or elective courses are transferable; courses in the specialization are not. Students should consult the transfer website in order to determine the transferability and applicability of courses. If a current student wishes to transfer supplemental credits to DePaul from an institution not listed on the website, approval should be obtained from the Associate
Dean of Academic Affairs prior to enrolling. After successfully completing the course(s) students must submit an official transcript to the Office of the University Registrar and notify the College Office. It is important to note that supplemental transfer credits cannot be taken during the last 60 quarter hours of a degree, in accordance with the DePaul University residency requirement.

Academic Probation

Students who fail to make meaningful progress towards their degree may be placed on academic probation. Furthermore, students who do not maintain a 2.0 grade point average may be placed on academic probation. Any student who is placed on probation will be notified in writing and should meet with the Associate Dean.

Academic Dismissal

Students who fail to meet the academic standards of the University or School of Music may be dismissed. Any student who is dismissed will be notified in writing and should meet with the Associate Dean of Academic Affairs. Conditions for dismissal and procedures for re-application are detailed in the University Student Handbook.

Withdrawal

Any student who wishes to withdraw from the School of Music should first meet with his or her advisor and then the Associate Dean of Academic Affairs. If the student is receiving a performance award, s/he should also meet with the Director of Admissions. A student must submit a withdrawal/leave of absence form through Campus Connection, explaining the reasons for withdrawal. If a student withdraws in good standing, s/he may reapply within 3 quarters without re-auditioning or re-applying; if a student is away longer than 3 quarters, s/he must reapply and re-audition to the School of Music, and is subject to the requirements current at the time of their application.

Please refer to the School of Music Student Handbook for further information on policies and procedures.

Honors Program Alternative

Students pursuing a degree in the School of Music are to follow the Honors Program Requirements listed below:

Honors Core

- LSP 110 DISCOVER CHICAGO (in Honors section)
- HON 100 RHETORIC AND CRITICAL INQUIRY
- HON 101 WORLD LITERATURE
- HON 102 HISTORY IN GLOBAL CONTEXTS
- HON 104 RELIGIOUS WORLDVIEWS AND ETHICAL PERSPECTIVES
- HON 105 PHILOSOPHICAL INQUIRY
- Choose one from below
  - HON 180 DATA ANALYSIS AND STATISTICS (if indicated)
  - LSP 120 QUANTITATIVE REASONING & TECHNOLOGICAL LITERACY I (per placement test)
- HON 201 STATES, MARKETS, AND SOCIETIES
- HON 207 TOPICS IN COGNITIVE STUDIES

Science Requirement

- One course chosen from the university's Scientific Inquiry list.

Honors students in Music who do not have a calculus or statistics requirement for their major must complete HON 180, Data Analysis and Statistics, or LSP 120, Math and Technological Literacy I, before enrolling in HON 207 or the Scientific Inquiry requirement.

Junior Seminar

- HON 301 HONORS JUNIOR SEMINAR IN MULTICULTURALISM

The Honors Program is committed to developing students’ knowledge and cultural awareness so they may
respect and learn from difference. Honors students meet the multicultural requirement by completing HON 301, the Junior Seminar in Multiculturalism.

**Senior Capstone**

- Choose one from below
  - HON 350 HONORS SENIOR SEMINAR
  - HON 351 HONORS SENIOR SEMINAR IN SERVICE LEARNING
  - HON 395 HONORS SENIOR THESIS

Students who choose to complete an Honors Senior Thesis must have their project approved at least one term prior to executing the project. To gain approval for a senior thesis, students must first complete an application, including a project proposal signed by a faculty advisor. In keeping with the interdisciplinary nature of the program, the thesis should attempt to move outside the boundaries normally associated with one particular discipline and should be supervised by two readers from different academic fields. While the final product must be a substantial piece of work building on the student’s accumulated knowledge and new research, specific requirements for each thesis will depend on the nature of the project. See the Director or Associate Director for an application. Students may opt to also enroll in HON 300: Honors Research Seminar (a two-credit elective) to receive dedicated guidance as they prepare the thesis project.

**Honors Approved Electives**

Most Music majors in the Honors Program are allotted one Honors Approved Elective, a 200-300 level course outside of Music, selected in consultation with an Honors advisor in order to fulfill an academic or professional goal. SRT, PAM, and Music Education majors do not have an Honors Approved Elective requirement.

**Major Field Adjustments**

In addition, participation in the University Honors Program may affect the requirements for a student's major field. The following adjustments will occur:

**BA in Music majors:**

Honors students in the BA in Music program will have the following additions or changes to their Honors requirements:

- HON 180 DATA ANALYSIS AND STATISTICS *(Honors BA Music students cannot replace this requirement with LSP 120, although they may be required to take the course as a prerequisite to HON 180.)*
- Language Requirement: Honors BA in Music students complete three courses of intermediate or advanced language study. Students who meet the proficiency requirement by placing at the 200-level of a language may consult with an Honors advisor for an alternative 3-course option for fulfilling the language requirement.
- Science Requirement: In addition to the Scientific Inquiry course, Honors students pursuing a BA in Music will also complete HON 225 HONORS LAB SCIENCE TOPICS to fulfill the science requirement for the Honors Program.
- Fine Arts Elective: BA in Music students choose one applied, performance, or studio arts course outside of Music from the approved list.
- Honors Approved Electives: BA in Music students are allotted two 200-300 level electives outside of Music. These courses will be selected in consultation with an Honors advisor to fulfill academic or professional goals.
- BA in Music majors are required to fulfill the university’s Junior Year Experiential Learning requirement.

**Sound Recording Technology majors:**

Honors students in SRT have the following courses waived from the Honors curriculum because the requirements are fulfilled within the major:

- HON 180 DATA ANALYSIS AND STATISTICS
- Scientific Inquiry
- Honors Approved Elective

**Performing Arts Management majors:**

PAM majors in Honors will have the following course substitutions:

- HON 180 will be replaced by MAT 135
- Honors Approved Elective will be replaced by ECO 105

**Music Education majors:**

Music Education majors in Honors will have the following course substitutions:
HON 105 will be replaced by LSE 380
HON 207 will be replaced by SCU 207
Honors Approved Elective will be replaced by PSC 120

Grade Requirements
A grade of C- or higher in HON 110 or 111 is required to remain in the Honors Program.
A grade of C- or higher is required to pass the following courses: HON 100, HON 350, HON 351 and HON 395.

Music Teacher Licensure Program

Admission Requirements
Applicants to the DePaul music teacher licensure program must meet the following standards:

- Undergraduate degree in music
- Grade Point Average of 3.0 or higher
- Recommendations from two individuals familiar with the candidate’s potential as a teacher
- Register to take or show proof that the candidate is exempt from taking the Illinois State Test of Academic Proficiency (TAP)
- Performance audition

Program of Study
All teacher licensure students must meet the core requirements of the undergraduate students in music education. Teacher licensure students take courses in four basic areas: music, liberal studies, music education, and education. A transcript review will be done by the music education department, to determine any deficiencies in any of these areas of study. Substitutions will be determined by the Associate Dean for Academic Affairs where appropriate.

Music Courses
- Applied music study (2 years)
- Musicianship/music theory and history (2 years)
- Aural training (2 years)
- Keyboard skills (2 years)
- Conducting (1 course)
- Music Traditions (world music and jazz)
- Ensemble (4 years)

Liberal Studies
- Writing (8 credits)
- Math (4)
- Science, lab or quantitative (4)
- American government (4)
- American history (4)

Music Education (V=vocal specialization, I=instrumental specialization)
• MED 306 INTRODUCTION TO MUSIC EDUCATION
• MED 203 FOUNDATIONS OF MUSIC TEACHING AND LEARNING I
• MED 204 FOUNDATIONS OF MUSIC TEACHING AND LEARNING II
• MED 303 ELEMENTARY VOCAL-GENERAL METHODS & LAB
• MED 304 MIDDLE SCHOOL VOCAL METHODS AND LAB (V)
• MED 300 ELEMENTARY & MIDDLE SCHOOL INSTRUMENTAL METHODS & LAB
• MED 305 SECONDARY VOCAL METHODS AND LAB (V)
• MED 308 ACCOMPANYING FOR THE MUSIC EDUCATOR (V)
• MED 301 SECONDARY INSTRUMENTAL METHODS AND LAB (I)
• MED 310 MUSIC EDUCATION FOR THE EXCEPTIONAL CHILD
• MED 325 TECHNOLOGY FOR MUSIC EDUCATORS
• MED 340 CONDUCTING FOR THE MUSIC EDUCATOR
• MED 121 CLASS GUITAR
• MED 196 CLASS VOICE
• Instrumental techniques classes:
  o Vocal Specialization (4 credits from the list below)
    - MED 101 BRASS I or MED 102 BRASS II
    - MED 103 WOODWINDS I or MED 104 WOODWINDS I
    - MED 105 STRINGS I
    - MED 107 PERCUSSION I
  o Instrumental Specialization (8 credits from the list below)
    - MED 101 BRASS I
    - MED 102 BRASS II
    - MED 103 WOODWINDS I
    - MED 104 WOODWINDS II
    - MED 105 STRINGS I
    - MED 106 STRINGS II
    - MED 107 PERCUSSION I
    - MED 108 PERCUSSION II
• MED 313 CHORAL LITERATURE or
  o MED 316 LITERATURE FOR WIND ORGANIZATIONS
  o MED 307 ORCHESTRAL LITERATURE
• MED electives (4 for V, 6 for I)
• MED 95 CLINICAL EXPERIENCE WITH CHILDREN AND YOUTH
• MED 392 STUDENT TEACHING
• MED 393 STUDENT TEACHING SEMINAR

Professional Education

• SCU 207 SOCIAL AND HISTORICAL ISSUES IN EDUCATION
• SCU 336 ADOLESCENT AND ADULT GROWTH AND DEVELOPMENT
  or PSY 303 HUMAN DEVELOPMENT
• LSE 380 PHILOSOPHICAL ISSUES IN EDUCATION AND CULTURE
Certificate in Performance Program

Certificate In Performance

The purpose of the program is to provide an intensive post-master’s degree performance experience for a small number of highly accomplished performers. Entry into the program is based on evidence of ability to be successful in post-graduate level performance study. Other criteria include, but are not limited to:

- Completion of a Master of Music in performance degree or equivalent from an accredited institution.
- Three letters of recommendation.
- An entrance audition which demonstrates performance ability at the post-master’s level.
- Voice applicants must demonstrate competence in Italian, French and German diction by audition and written IPA exam.

Please check the School of Music Admission website for full requirements.

There are two primary components to the certificate in performance program. First, applied music (private instruction), and second, related studies. Related study will often consist of participation in the appropriate ensembles and additional academic classes in the School of Music. The course requirements for the certificate in performance appear below:

- Applied Music (24 credits)
- Related Study (12 credits)
- Recital (0 credits)

Gainful Employment Disclosure

This graduate certificate program is approved as a Gainful Employment Program through the US Department of Education and is, therefore, eligible for Federal Student Aid. Disclosure statements about occupations, on-time graduate rate, tuition and fees, and median loan debt for this program can be found at http://www.depaul.edu/gainful-employment-disclosure/Pages/default.aspx.

Admission and Aid

Undergraduate Admission

Admission as a degree-seeking student in the School of Music is contingent upon a superior high school record and successful completion of a performance audition. Entering freshman and transfer applicants are required to audition before March 4 for admission the following September and may be required to submit a pre-audition screening recording. Transfer students are required to validate credits earned in musicianship studies (theory, music history and literature, aural skills, and keyboard) through placement examinations prior to initial registration.

All students are required to audition regardless of their intended major and are encouraged to schedule their dates and times after October 15 for auditions to be held in February. For audition requirements and a list of scheduled audition dates, please visit our website, contact the Director of Admission, DePaul University School of Music, 804 West Belden Avenue, Chicago, IL 60614, or call (773) 325-7444.
Scholarship Opportunities

Undergraduate

Incoming freshmen majoring in music are automatically considered for music performance awards at the time of their entrance audition. The number and amount of these music awards vary each year. Please contact the School of Music for further information.

Financial Aid

Students may apply for financial assistance based on family need through the Office of Financial Aid, DePaul University.

Graduate Admission

Procedures for Admission

Applicants for graduate admission should submit an application online at http://www.depaul.edu/. The application deadline is December 1. Applicants should submit official college transcripts and three letters of recommendation to support their application. Applicants to the master's degree program for performance and jazz studies must take an entrance audition, usually held in February of each year. Some applicants may be required to submit a pre-audition screening recording. Audition requirements are specified at the following website: http://music.depaul.edu/Admissions/Auditions/AuditionsGraduateCertificate.asp. Applicants to the master's degree program for music education must interview with the Director of Music Education. Applicants to the master's degree program for composition must submit a composition portfolio of three pieces. A nonrefundable application fee is required of every student applying for admission to the University as a degree-seeking student. When admission has been approved, the applicant will be notified of the diagnostic examination schedule and new student orientation, which usually take place before the start of the academic year.

Certificate in Performance

The School of Music also offers a program leading to the Certificate in Performance. The Certificate in Performance is a post-master's program for classical or jazz musicians who intend to pursue careers as professional performers. Applicants should submit an application online at http://www.depaul.edu/. The application deadline is December 1. Applicants should submit official college transcripts and three letters of recommendation to support their application. Applicants must take an entrance audition, usually held in February of each year. Some applicants may be required to submit a pre-audition screening recording. Audition requirements are specified at the following website: http://music.depaul.edu/Admissions/Auditions/AuditionsGraduateCertificate.asp
Non-Degree Seeking Students

DePaul School of Music does not normally admit applicants as non-degree seeking students. A student who has earned a bachelor's degree or its equivalent from an accredited institution and does not intend to work for a master's degree may, on the written recommendation of the Associate Dean of Academic Affairs, be admitted as a non-degree seeking student. Only the first 12 quarter hours earned as a non-degree-seeking student at DePaul may subsequently be applied toward a degree when the student is accepted as a degree-seeking student.

Student-At-Large

A student completing a graduate program at another accredited institution may, on the written recommendation of the Associate Dean of Academic Affairs, be admitted as a student-at-large.

International Students

All international students and any student who has been educated outside of the United States should complete the application requirements for their desired program (see above), submit their educational credentials to a third-party organization for evaluation, and demonstrate a proficiency in English. The application deadline is December 1. Please see the following website for further information on applying to DePaul School of Music as an international graduate student:

To demonstrate English proficiency, international graduate music students must pass a TOEFL examination with a written score of 550 or an internet-based score of 80, with no section lower than 17. If a student has met all other music admissions criteria and taken a TOEFL examination, but not yet achieved a passing score, they may be considered for admission to the joint English Language Academy-School of Music program. (For further information on this program, students should contact the School of Music Admissions Office.) Those who request student visas also must show evidence of adequate financial support. A formal letter of admission and/or form 1-20 will be issued only after all admission requirements have been fulfilled.

Diagnostic Examinations

Students who have been admitted to the master's degree program for composition, performance, and music education must take a diagnostic examination in musicianship studies. These examinations, taken during new student orientation, will be used to guide course placement and identify areas for additional studies.

About

The Theatre School is the Midwest's oldest theatre conservatory. Founded as the Goodman School of Drama in 1925, the school carries on an 87-year history as a leading drama school in the United States. The conservatory format provides for an intensive, highly disciplined training program. The central core of the program is an extensive production-oriented approach. The School produces more than 150 public performances each season for an audience of more than 50,000 people, featuring students in every aspect of the production. Programs of study are offered in acting, scene design, costume design, lighting design, sound design, theatre technology, costume technology, stage management, playwriting, dramaturgy/criticism, theatre management, and theatre arts. Graduate programs are offered in acting, directing and arts leadership. The objectives of the professional curricula are to prepare the student for creative participation in any form of theatre requiring a high level of technical competence, to provide the student with the aesthetic and cultural background requisite to an understanding of his/her art and of the world in which he/she works, and to develop the specific skills and disciplines necessary for competence in the student's area of specialization. Theatre School students are not eligible for the Theatre Studies Minor.

Each Theatre School course builds and expands upon its predecessor. When the program is complete, the student will have been exposed to the necessary artistic tools and shown their proper usage in order to realize his or her goals. In addition, liberal education requirements are incorporated into all of the school's programs so that the student may practice his/her craft with an awareness of history, literature, philosophy, and current and past cultural and social events.
Advanced students in the Theatre Studies and Design and Technical programs enhance their training experience by completing internships at local and national organizations. Internships have been conducted at the Brooklyn Academy of Music, Metropolitan Opera, Seattle Opera, Goodman Theatre, Guthrie Theatre, Arena Stage, Playwrights Horizons, the David Letterman Show, Chicago Shakespeare Theater, Disney Theatricals, Alabama Shakespeare Festival, Fox Theatricals, Oregon Shakespeare Festival, Berkshire Theatre Festival, The Second City, and Steppenwolf Theatre Company, among numerous others.

Faculty and Staff

In keeping with the school's concept of the dual importance of theory and practice and of producing a superior quality of instruction, The Theatre School's faculty and staff are highly qualified, both professionally and academically. The faculty is regularly supplemented by accomplished working professionals.

In addition, visiting artists and professionals appear in our guest speaker series, CHICAGO LIVE: THE ARTS. Among them have been playwright David Mamet; actresses Celeste Holm, Florence Henderson, and Julie Harris; actors Rip Torn, Charles Durning, Ray Liotta, Jonathan Pryce, Brian Dennehy, and Laurence Fishburne; Chicago's nationally known Steppenwolf Ensemble including John Malkovich, Jeff Perry, and Gary Sinise; the late comedian Avery Schrieber; director JoAnne Akalaitis, Anne Bogart, Frank Galati, and Paul Sills; and alumni Gillian Anderson, Joe Mantegna, John C. Reilly, and Kevin Anderson, among scores of others.

Academics

The Theatre School is home to Undergraduate majors and minors and Graduate programs.

Students in Undergraduate programs at The Theatre School must achieve a grade of C- or better in major requirements to receive course credit. Any grade lower than a C- will require the student to repeat the course.

Students in the Graduate programs must achieve a grade of C or better in major requirements to receive course credit. Any grade lower than a C will require the student to repeat the course. If a Graduate student is taking an Undergraduate level course, to fulfill a major requirement, the student must receive a B- or better to receive course credit.
Majors

- Acting (BFA)
- Costume Design (BFA)
- Costume Technology (BFA)
- Dramaturgy/Criticism (BFA)
- Lighting Design (BFA)
- Playwriting (BFA)
- Scene Design (BFA)
- Sound Design (BFA)
- Stage Management (BFA)
- Theatre Arts (BFA)
- Theatre Management (BFA)
- Theatre Technology (BFA)

Minors

- Theatre Studies (Minor)

Admission and Retention

The Theatre School only admits students for entry into Autumn quarter each year. Enrollment in each area of concentration is limited by strict capacities. In all of The Theatre School's programs, students are evaluated annually by the faculty and formally invited to continue into the subsequent year. The evaluation, a professional and confidential process, is based on four key elements: discipline, collaboration, professional potential, and progress in the program.

Honors Program Alternative

Students pursuing degrees in the Theatre School are to follow the Honors Program Requirements listed below:

Honors Core

- HON 110 HONORS DISCOVER CHICAGO
  or HON 111 HONORS EXPLORE CHICAGO
- HON 100 RHETORIC AND CRITICAL INQUIRY
- HON 102 HISTORY IN GLOBAL CONTEXTS
- HON 104 RELIGIOUS WORLDVIEWS AND ETHICAL PERSPECTIVES
• HON 105 PHILOSOPHICAL INQUIRY
• HON 180 DATA ANALYSIS AND STATISTICS
  or LSP 120 QUANTITATIVE REASONING & TECHNOLOGICAL LITERACY I
• HON 201 STATES, MARKETS, AND SOCIETIES
• HON 207 TOPICS IN COGNITIVE STUDIES
  or a course chosen from the university's Scientific Inquiry list.

Theatre majors whose math placement indicates a need for LSP 120 may fulfill the Honors math requirement with this course in place of HON 180.

Junior Seminar

• HON 301 HONORS JUNIOR SEMINAR IN MULTICULTURALISM

The Honors Program is committed to developing students’ knowledge and cultural awareness so they may respect and learn from difference. Honors students meet the multicultural requirement by completing HON 301, the Junior Seminar in Multiculturalism.

Senior Capstone

• Choose one from below:
  o HON 350 HONORS SENIOR SEMINAR
  o HON 351 HONORS SENIOR SEMINAR IN SERVICE LEARNING
  o HON 395 HONORS SENIOR THESIS

Students who choose to complete an Honors Senior Thesis must have their project approved at least one term prior to executing the project. To gain approval for a senior thesis, students must complete an application, including a project proposal signed by a faculty advisor. In keeping with the interdisciplinary nature of the program, the thesis should attempt to move outside the boundaries normally associated with one particular discipline and should be supervised by two readers from different academic fields. While the final product must be a substantial piece of work building on the student’s accumulated knowledge and new research, specific requirements for each thesis will depend on the nature of the project. See the Director or Associate Director for an application. Students may opt to enroll in HON 300: Honors Research Seminar (a two-credit elective) to receive dedicated guidance as they prepare the thesis project.

Grade Requirements

A grade of C- or higher in HON 110 or 111 is required to remain in the Honors Program.

A grade of C- or higher is required to pass the following courses: HON 100, HON 350, HON 351, and HON 395.

Admission

Candidates interested in admission to any of the undergraduate or graduate programs of The Theatre School should contact The Theatre School Admissions Office at (773) 325-7999 or (800) 4DEPAUL (Extension 7999). The office will provide each candidate with detailed instructions for the application and audition/interview process.

Theatre applicants are responsible for scheduling their own audition (for acting) or interview (for all other majors), which can be done on The Theatre School's website. If, for any reason, an applicant is unable to reserve a slot online, he or she should contact The Theatre School Admissions Office directly.

The Theatre School only admits students for entry into Autumn quarter each year. Enrollment in each area of concentration is limited by strict capacities. In all of The Theatre School's programs, students are evaluated annually by the faculty and formally invited to continue into the subsequent year. The evaluation, a professional and confidential process, is based on four key elements: discipline, collaboration, professional potential, and progress in the program. For more information about the School's policies about admission, retention, evaluations of students, invitations to return, and related matters, please see The Theatre School website.
Course Descriptions

A&S 491
EFFECTIVE LEADERSHIP OF SCHOOLS
Graduate
This course introduces students to the research base of organizational theory, the politics of education, and foundations of building level instructional leadership. Multiple theories are examined in light of the students' experience in educational settings. This examination of theory in light of experience provides the students with a framework for analyzing both familiar educational institutions and the theories that support educational institutions. Through a study of administrative and organizational theory using those settings with which students are most familiar, students will become more reflective of the theoretical base that will inform their future practice as administrators.

Status as an Advanced Masters Education student or a Principal or Catholic School Principal (Licensure) student is a prerequisite for this class.

A&S 492
THE PRINCIPALSHIP
Graduate
This course provides students with the tools needed to enter into a Pre-K-12 school setting and function effectively. Topics included in this course include: scheduling; managing resources; technology; issues of working with students and teachers; maintaining a safe and effective learning environment.

Status as an Advanced Masters Education student or a Principal or Catholic School Principal (Licensure) student is a prerequisite for this class.

A&S 493
DATA DRIVEN DECISION MAKING
Graduate
This course provides future administrators with the tools they need to critically examine demographic, financial, personnel and testing data and to use the insights gained in making well informed administrative decisions.

Status as an Advanced Masters Education student or a Principal or Catholic School Principal (Licensure) student is a prerequisite for this class.

A&S 494
SCHOOL FINANCE
Graduate
Major consideration will be given to problems relating to the preparing of a school budget, procuring revenue, financial accounting, capital outlays, insurance on property, taking of inventory, and the social and political implications of how schools are financed.

Status as an Advanced Masters Education student or a Principal or Catholic School Principal (Licensure) student is a prerequisite for this class.

A&S 495
SCHOOL LAW
Graduate
Authority, powers and liability of school personnel; rights and status of students; character of districts and school board control of curriculum, school property, finances. Special emphasis on recent state and federal court decisions as they affect Illinois and neighboring states.

Status as an Advanced Masters Education student or a Principal or Catholic School Principal (Licensure) student is a prerequisite for this class.

A&S 496
STAKEHOLDER RELATIONSHIPS
Graduate
This course draws on the literature about constructive conflict resolution and partnership building to address the important, inevitable, and sometimes stormy relationships among various education stakeholders both inside and outside of the school building. Educational administrators cannot fire tenured teachers, angry parents, or zealous community organizers. Thus, they must learn the paradigms and tools to not only resolve the inevitable conflicts that arise with these stakeholders but also to be able to work with them as key strategic partners.

Status as an Advanced Masters Education student or a Principal or Catholic School Principal (Licensure) student is a prerequisite for this class.
A&S 498
INSTRUCTIONAL SUPERVISION AND SUPPORT
Graduate
Instructional Supervision is examined from the perspective of both student and teacher learning, dealing with issues such as motivation, responsibility and increased proficiency. This course deals with issues of teacher observation and evaluation; clinical supervision; and professional development programming.

Status as an Advanced Masters Education student or a Principal or Catholic School Principal (Licensure) student is a prerequisite for this class.

A&S 499
PLANNING FOR PROFESSIONAL DEVELOPMENT
Graduate
This course introduces students to the dynamics of adult learning and how to apply these learning theories to the development of meaningful professional development for teachers and adult staff that enhances student success. Goals: (1) Developing skills and developing a comprehensive plan for professional development, (2) Addressing the challenges of adult learners, (3) Developing mentoring and coaching skills, (4) Developing and understanding the importance of assessment and reflection.

A&S 570
HISTORICAL, PHILOSOPHICAL AND THEOLOGICAL FOUNDATIONS OF CATHOLIC SCHOOL LEADERSHIP
Graduate
A survey of the history of Catholic K-12 education in the United States and the foundational documents of Catholic Education. Students will examine the history and philosophical/theological foundation of Catholic Schools in the United States and will be asked to reflect on the nature and mission of Catholic education in the multicultural, multiethnic milieu of Twenty-first Century America.

Status as an Advanced Masters Education student or a Principal or Catholic School Principal (Licensure) student is a prerequisite for this class.

A&S 571
SPIRITUAL AND ADMINISTRATIVE LEADERSHIP IN CATHOLIC SCHOOLS
Graduate
Students will be asked to conceptualize leadership from the Transformational and Servant Leadership perspectives. Using these principles, students will examine the spirituality of Catholic School leadership, and its implications for them in their role as ministers and coordinators of ministries in the school setting. Students will then examine the unique administrative and managerial factors that impact Catholic schools from a leadership framework that is imbued with the spirituality of Servant Leadership.

Status as an Advanced Masters Education student or a Principal or Catholic School Principal (Licensure) student is a prerequisite for this class.

A&S 588
SERVICE LEARNING FOR HIGHER EDUCATION
Graduate
This class is a hands-on, minds-on engagement in the practice and theory of service learning - the integration of community service and related academic study. Students will assist a service-learning program with planning, implementation or evaluation and integrate this experience with study of current practice, theory and research. Students who plan careers in higher education will find this useful in light of the increased commitment to providing service-learning opportunities on campuses. Many student services and other higher education positions include the need to offer leadership to these programs.

A&S 590
ORGANIZATIONAL DEVELOPMENT
Graduate
A development approach used in combining theory, research, and applications for improving interpersonal effectiveness and to develop problem-solving capacity of the organization. The course is about change theory, people in organizations and the achievement of individual and organizational goals.

Status as a student in a College of Education Advanced Master's program is a prerequisite for this class.
A&S 591  
RESEARCH SEMINAR IN EDUCATIONAL LEADERSHIP  
Graduate  
This course is designed to help graduate students in Educational Leadership through the process of planning, organizing, drafting, and revising their Master's papers. Students will be expected to complete a literature review and to develop a strong proposal for an integrative paper as a prelude to selecting an advisor for their Master's papers.

Status as a student in a College of Education Advanced Master's program is a prerequisite for this class.

A&S 593  
PRACTICUM IN EDUCATIONAL LEADERSHIP  
Graduate  
The practicum provides opportunities for advanced students in administration and supervision to participate in and complete a research project in selected systems on a full-time or part-time basis. The experiences are intended to provide, under professional direction and supervision for (1) study for major factions, policies, and problems for administration and supervision, and (2) intensive study of certain critical administrative and supervisory practices.

Status as a student in a College of Education Advanced Master's program is a prerequisite for this class.

A&S 594  
INTERNSHIP IN EDUCATIONAL LEADERSHIP  
Graduate  
The internship provides supervised experiences in selected organizations on a full-time or part-time basis. The student intern is cooperatively assigned to an organization under the immediate supervision of organizational personnel. The experiences provided are designed to enrich the student's theoretical background with practical opportunities of participating in (1) overall contact with personnel and with the major functions and problems of certain critical administrative and/or supervisory activities, and (2) a detailed study and analysis of a particular administrative and/or supervisory function or activity.

Status as an Advanced Masters Education student or a Principal or Catholic School Principal (Licensure) student is a prerequisite for this class.

A&S 595  
WORKSHOP IN EDUCATIONAL LEADERSHIP  
Graduate  
Topics of particular interest and concern to administrators and supervisors will be presented in a high-involvement seminar format. Primary reliance will be on written materials; however, audio-visual and role-playing mechanisms may also be used.

Status as a student in a College of Education Advanced Master's program is a prerequisite for this class.

A&S 596  
HUMAN RESOURCE MANAGEMENT  
Graduate  
Theory, practice and relevant research in modern personnel administration. Recruitment, staff-development, interviewing, collective bargaining, conflict resolution and employee evaluation are emphasized. Human resource administration, induction programs, and in-service opportunities are touched upon.

Status as an Advanced Masters Education student or a Principal or Catholic School Principal (Licensure) student is a prerequisite for this class.

A&S 597  
POLITICS OF EDUCATION  
Graduate  
Policy development in education as a political process; community power, state and national politics in educational decision-making and the role of leadership and pressure groups in the shaping of educational policy at local, state and national levels.

Status as a student in a College of Education Advanced Master's program is a prerequisite for this class.
A&S 598
INDEPENDENT STUDY IN EDUCATIONAL LEADERSHIP
Graduate
Independent study: Permission of instructor, department chair and Associate Dean are required.

Status as a student in a College of Education Advanced Master's program is a prerequisite for this class.

A&S 599
THESIS SEMINAR IN EDUCATIONAL LEADERSHIP
Graduate
A student writing a thesis registers for this course for four quarter hours of credit. When the thesis research and the writing of the thesis itself are prolonged beyond the usual time, the program advisor may require the student to register for additional credit.

SCG 410, an approved thesis and status as an Advanced Master's student is a prerequisite for this class.

A&S 600
REGISTERED STUDENT IN GOOD STANDING
Graduate
Registration in this course is open to students who are not registered for any other courses but need to complete requirements/assignments for previously taken courses. It provides access to University facilities. Permission of advisor required (0 credit hours).

Status as a student in a College of Education Advanced Master's program is a prerequisite for this class.

A&S 602
PRINCIPAL LICENSURE INTERNSHIP I
Graduate
This internship experience immerses the student into the world of the instructional leader in the contemporary Pre K-8th school setting. The student is to complete at minimum 100 clock hours of instructional leadership experiences in the PreK-8 setting by participating and taking the lead in concrete sustained leadership experiences under the supervision of both the building's principal (mentor) and the faculty supervisor (2 credit hours).

Status as an Advanced Masters Education student or a Principal or Catholic School Principal (Licensure) student is a prerequisite for this class.

A&S 603
PRINCIPAL LICENSURE INTERNSHIP II
Graduate
This internship experience immerses the student into the world of the instructional leader in the contemporary 9-12 school setting. The student is to complete at minimum 100 clock hours of instructional leadership experiences in the 9-12 setting by participating and taking the lead in concrete sustained leadership experiences under the supervision of both the building's principal (mentor) and the faculty supervisor (2 credit hours).

Status as an Advanced Masters Education student or a Principal or Catholic School Principal (Licensure) student is a prerequisite for this class.

A&S 606
REVIEW OF LITERATURE
Graduate
This paper will give students the opportunity to develop and demonstrate written competence in a subfield of their disciplines and to enhance life-long learning. Specifically, they will broaden their knowledge base and inform themselves about a topic, issue, theory, etc., by reviewing and synthesizing existing literature. To do so, students will need a variety of bibliographic skills including searching databases. In other words, students will need to be able to ask and answer such questions as “What is known about? What are major issues and themes?” (0 credit hours)

A&S 607
INTEGRATIVE PAPER
Graduate
Students will observe and/or participate in the reciprocal interaction of theory and practice, by investigating actual practice in the field as it relates to theory. This might take the form of investigating how a particular theory is applied in the field, developing a practical application of a theory, or, conversely, developing/refining a theory based on investigations made in the field. In other words, as graduates encounter new theories and practices they will need to be able to investigate and evaluate them, asking and answering questions about “how theories work.” (0 credit hours)
Students who have completed the majority of the program will engage in an analysis of an urban school. Students will be given demographic, financial and testing data, a narrative of the school's history and recent past; photographs of the setting, and other pertinent data and artifacts. Using these artifacts, students will be asked to design their first year agenda as the chief administrator in the building. Using the ISLLC standards as a guideline, students will create a portfolio that clearly outlines, schedules, professional development plans, budgets, enrollment projections, and so forth.

(0 credit) Registration in this course is required of all students who are not enrolled in a course but are completing culminating projects for their program of study, including theses, papers, and final portfolios. It provides access to university facilities. Permission of advisor required. Registration limited to three terms.

Status as a student in a College of Education Advanced Master's program is a prerequisite for this class.

The course will include a discussion of the legal rights of students with disabilities and the corresponding responsibilities and obligations of schools and educational personnel for meeting their educational needs. The course will include specific legal components inherent with the identification and education of students with disabilities including adaptations of classroom instructional methodology for students with disabilities in the regular education classroom.

This course will examine the role and function of special education; special services within the school and community, including special classes for the mentally and/or physically handicapped; and various services, such as school psychology, school social work, speech correction, learning disabilities specialist, and others. The course includes specific models for administration of special education programs and procedures for supervision and evaluation of special education personnel.

This class is a hands-on, minds-on engagement in the practice and theory of service learning - the integration of community service and related academic study. Students will assist a service-learning program with planning, implementation or evaluation and integrate this experience with study of current practice, theory and research. Students who plan careers in higher education will find this useful in light of the increased commitment to providing service-learning opportunities on campuses. Many student services and other higher education positions include the need to offer leadership to these programs.

Major consideration will be given to problems relating to the preparation of a school budget, procuring revenue, financial accounting, capital outlays, insurance on property, taking of inventory, and the social, political, and ethical implications of how schools are financed.

Status as an EDD student with a declared concentration is a prerequisite for this class.

Authority, powers and liability of school personnel; rights and status of students; character of districts and school board control of curriculum, school property, finances. Special emphasis on recent state and federal court decisions as they affect Illinois and neighboring states.

Status as an EDD student with a declared concentration is a prerequisite for this class.
A&S 700  
REGISTERED DOCTORAL STUDENT IN GOOD STANDING  
Graduate  
Non-credit. This registration is required of all doctoral students who are not enrolled in a doctoral course, but are completing course requirements and/or dissertation research. It provides access to University facilities. Academic advisor approval required. After the third enrollment, dissertation chair approval required. (0 credit hours)  
Status as a EDD student with a declared concentration is a prerequisite for this class.

A&S 706  
CANDIDACY PAPER  
Graduate  
(0 credit) Registration in this course is required of all students who are not enrolled in a course but are completing a dissertation. It provides access to university facilities. Permission of advisor required. This registration indicates that a student has successfully completed the candidacy paper as specified in the Doctoral Student Handbook. (0 credit hours)  
Status as a EDD student with a declared concentration is a prerequisite for this class.

A&S 801  
LEADERSHIP: THEORY AND PRACTICE  
Graduate  
This course examines leadership theories from various social, psychological and philosophical perspectives both historical and contemporary. The student will also be called upon to reflect upon contemporary practice in K-16 educational leadership settings and evaluate the efficacy of the theoretical frameworks in light of practice.  
Status as a EDD student with a declared concentration is a prerequisite for this class.

A&S 803  
SCHOOL PROGRAMS, PLANT AND HUMAN RESOURCES  
Graduate  
The development of school programs, based on current research and school laws and regulations, will be explored. The focus will be on the core curriculum, Education and Secondary Education Act (ESEA), State Chapter I, Bilingual and Special Education mandates and opportunities as well as on other discretionary school programs. Responsibilities in relation to plant operation and management, staffing formulas for all staff, developing job descriptions, recruitment, and staff selection and evaluation are included.  
Status as an EDD-Educational Leadership student is a prerequisite for this class. Other EDD students may enroll with permission of instructor.

A&S 811  
ASSESSMENT AND ACCOUNTABILITY  
Graduate  
This course addresses the key role of leaders in educational systems for the development, articulation, implementation, and supervision of an assessment process that provides accountability for all stakeholders—students, parents, teachers, legislators, relevant communities, and governing authorities. Issues of philosophy, standards, outcomes, curricula, instrumentation, technology, and the interconnected nature of these factors are identified as they influence the leadership role in accountability compliance. Factors related to ethical practice and social justice anchor the philosophical and political parameters of the course.  
Status as a EDD student with a declared concentration is a prerequisite for this class.

A&S 823  
COMMUNITY AND CONSENSUS BUILDING FOR SCHOOL IMPROVEMENT  
Graduate  
Students will examine inclusive models for consensus building among school/community members that engage membership in processes and decision making through data collection, self-analysis, mission/vision development, goal setting and program planning, implementation and evaluation that leads to school and community improvement. Attention will be given to establishing linkages with local municipal, state, and federal resources, business and industrial resources, community services, and other community resources.  
Status as a EDD student with a declared concentration is a prerequisite for this class.
A&S 843
THE POLITICS OF SCHOOLING
Graduate
Students will engage in analyzing educational policy and the political processes related to problem identification, problem solving, decision making, the underlying political processes and their impact on the school/community, students, parents, educators, staff, and community members. The role of such entities as, school boards, unions, professional associations, businesses, university preparation programs, book and test publishers, and local, state, and national policy makers in the education political arena will be analyzed. Attention will be given to the means by which support for change is developed with special emphasis on collaborative dialogue and teamwork for political action. Strategies for coalition building, and individual and collective action will be informed by the use of theory from applied behavioral science and political science.

Status as a EDD student with a declared concentration is a prerequisite for this class.

A&S 849
SUPERVISED DISSERTATION PROPOSAL DEVELOPMENT
Graduate
Students register for this course for the quarter in which they defend their dissertation proposals. Permission of dissertation chair required.

A&S 859
INDEPENDENT DISSERTATION RESEARCH: EDUCATIONAL LEADERSHIP
Graduate
Students register for this course for the quarter in which they defend their dissertation. Permission of dissertation chair required.

A&S 873
CURRENT TRENDS IN BUDGETING AND FINANCE
Graduate
This course focuses on the priorities of school funding. Financial decisions undergird instructional programs and administrative decision making. Relating these to available money and funding, setting priorities and maximizing the impact on student achievement will be studied.

A&S 494 or equivalent and status as an EDD student are a prerequisite for this class.

A&S 883
SCHOOL LAW
Graduate
This course examines the current legal requirements of schools and how changes impact schools. Administrators make decisions that respond to many realities, including the rules and regulations at the local, state, and national levels. The administrator works within a constantly changing system. The duties and liabilities of school administrators as determined by federal rules and regulations, state school codes, the policies of boards of education, and case law will be examined.

A&S 495 and status as an EDD student are prerequisites for this course.

A&S 894
INTERNSHIP IN EDUCATIONAL LEADERSHIP
Graduate
(4-8 qh) The internship provides supervised experiences in selected organizations on a full-time or part-time basis. The student intern is cooperatively assigned to an organization under the immediate supervision of organizational personnel. The experiences provided are designed to enrich the student's theoretical background with practical opportunities of participating in (1) overall contact with personnel and with the major functions and problems of certain critical administrative and/or supervisory activities, and (2) a detailed study and analysis of a particular administrative and/or supervisory function or activity.

Status as a EDD student with a declared concentration is a prerequisite for this class.
A&S 899
SUPERINTENDENT INTERNSHIP
Graduate
This course is intended for those seeking the Illinois State Board of Education (ISBE) Superintendent Endorsement. The experiences provided are designed to enrich the students' theoretical background with practical opportunities to participate in major functions and critical duties at the district, regional and/or central office level. The student will be cooperatively assigned to site(s) and be supervised by the on-site superintendent and a DePaul faculty member.

Status as a EDD student with a declared concentration is a prerequisite for this class.

AAS 200
ASIAN AMERICAN HISTORY
Undergraduate
This course examines the creation of Asian America by first and second-generation Asian migrants to the Americans from the 1840s to World War II. The course provides a historical, legal, social and cultural framework for understanding the resurgence of Asian migration since the 1960s.

AAS 202
ASIAN AMERICAN LITERATURE
Undergraduate
This course will serve as an overview of Asian American literature in a socio-historical context. Special emphasis will be placed on tracing the various paradigms through which these works have been produced, from texts written prior to the movement towards self-determination during the 1960s; to works identified with the "cultural nationalism" promoted during the 1960s and 1970s; to the pluralism of the 1980s which explored how gender, sexual orientation, and class complicate earlier essentialist conceptions of racial identity; and finally to the transnational and diasporic interests of the 1990s. Texts covered will include primarily fiction (novels and short stories), but also critical essays, plays, movies, and poetry.

AAS 203
ASIAN AMERICAN ARTS AND CULTURE
Undergraduate
This course will examine Asian American arts and cultural productions in relation to the histories of people and groups with roots in Asia and the Pacific. The course will focus on contemporary visual arts from the emergence of Asian American movements in the 1960's and 1970's, to the multiculturalism of the 1980's and 1990's to our present transnational moment. Formerly AAS 201.

AAS 205
GLOBAL ASIA
Undergraduate
From ancient and modern perspectives, Global Asia introduces the artistic, cultural, economic, philosophical, political and religious transformation of Asian societies and peoples across space and time. A visual and multimedia approach complements literature on core ideas and practices. Creative and interactive learning methods are included.

AAS 210
ASIAN ART
Undergraduate
An introduction to major developments of art and architecture across Asian cultures including South Asia, Southeast Asia, the Himalayas, and East Asia and their counterparts in America. This course examines not only painting, sculpture, and architecture, but also gardens, ceramics, and prints. Special emphasis will be placed on religious arts of Buddhism and Hinduism, along with landscape and figural painting. Cross-listed with HAA 115.

AAS 211
BUDDHIST ART
Undergraduate
This course explores the traditional visual culture of the Buddhist world, examining art as a reflection of religious belief and practice. The works come from South Asia, Southeast Asia, East Asia, and America. An emphasis is placed on painting, sculpture, and architecture made for or related to Buddhist practice. Cross-listed with HAA 220.
AAS 214
JAPANESE ART
Undergraduate
This is a chronological survey of premodern Japanese art, from the prehistoric era to the Meiji period (1868-1911). Topics covered include painting, sculpture, and architecture, as well as decorative arts, prints, and garden design. Special attention is given to Buddhist and Shinto religious arts, along with screen painting and woodblock prints. Cross-listed with HAA 216.

AAS 215
INTERNATIONAL DEVELOPMENT AND REGIONAL INEQUALITY
Undergraduate
This course charts the political, social and economic transformation of the developing countries (Africa, Asia, Latin America, Caribbean, Pacific Islands) into a global economy dominated by the ‘developed’ countries (North America, Europe and Japan). This process, termed ‘GLOBALIZATION,’ results from the operation of the global market mechanism, the activities of Transnational Corporations (TNCs) and the programs of the International Financial Institutions (IFIs). Cross-listed with GEO 215.

AAS 216
CHINESE ART
Undergraduate
This is a chronological survey of premodern Chinese art from antiquity to the nineteenth century. Special attention is given to sculpture and painting, but architecture and ceramics are also covered. There is an emphasis on prehistoric bronze vessels, Buddhist sculpture, and landscape painting of the Song through Qing periods. Cross-listed with HAA 215.

AAS 217
ARTS OF INDIA AND THE HIMALAYAS
Undergraduate
This is a chronological survey of premodern arts of the subcontinent of South Asia and the Himalayas. We start with the Indus Valley Civilization and move through the nineteenth century, including Mughal arts. Special attention is given to the emergence of figural imagery in Buddhist and Hindu sculptural arts, and the development of religious architectural forms from early stupas and cave temples to later shrines. Cross-listed with HAA 217.

AAS 218
ARTS OF THE SILK ROAD
Undergraduate
This course will examine the visual history of the Silk Road, focusing on works of art and architecture created in Central Asia. We not only consider the prehistoric, ancient and medieval arts of this region, but we also investigate the modern development of a romanticized notion of the Silk Road and the imperial interest in acquiring treasures from the Silk Road. Today we frequently hear about the legacy of the Silk Road in promoting multicultural exchange. However, the Silk Road has long been affected by the expansionist agendas of empires. From the time of Alexander the Great (356-323 B.C.E.) through the period of Genghis Khan (1162-1227) and on, there have been military leaders who have led their armies into Silk Road lands seeking territory, riches, and glory. Cross-listed with HAA 218.

AAS 220
AMERICAN BUDDHISM
Undergraduate
This course critically analyzes the origins of Buddhism in the United States in order to fully understand how and why Buddhism has flourished in Asian and White American communities, and to understand the conflict and controversy surrounding the racial dynamics of religious choice. Cross-listed with AMS 220.

AAS 222
RELIGION AND POLITICAL CONFLICT: SOUTH ASIA
Undergraduate
An examination of the role of religions and religious movements in political conflicts. Particular sections will examine the relationship of religious violence and peacemaking in different areas of the world (in this case, South Asia).
AAS 223
TALES OF INDIA
Undergraduate
Before the modern nation-states of India and Pakistan came into being, the term "India" referred to the South Asian region, a region that has been and is the home of many cultures and societies. These cultures have also reached beyond the region to create rich and paradoxical diaspora experiences in Europe and the Americas. Tales of India will explore a variety of literatures, ancient and contemporary, that illuminate the worlds of South Asian peoples in their homelands and in the transnational life of the diaspora. Themes will include love, power, religious meaning/religious identity, and cultural difference.

AAS 224
HINDU THOUGHT AND CULTURE
Undergraduate
An exploration of Hinduism as a civilization whose key reference points are religious in the sense understood in the West (ritual and transcendence), yet which finds expression in a "high culture" of literary works, political and social theory, art and architecture, music and dance, and folk and popular stories, songs and plays. Cross-listed with REL 242.

AAS 225
RELIGION AND SOCIAL ENGAGEMENT: SOCIALLY ENGAGED BUDDHISM
Undergraduate
An investigation of the ways in which various religious traditions engage the social order. Traditions, persons and movements that form the focus of the course will vary from section to section (in this case the focus is on Buddhism). The course will integrate theory and practice in studying forms of religious engagement. All students will perform some service to a community or within a community organization or agency.

Sophomore standing is a prerequisite for this class.

AAS 226
ETHICAL WORLDS: MORAL ISSUES ACROSS CULTURES: ATOM BOMB DISCOURSE
Undergraduate
An exploration of religion and ethics from a comparative and international perspective. Ethical dimensions of diverse world traditions (in this case the development and use of atomic weaponry) will be investigated within their own particular historical and cultural contexts, and students will be asked to consider and evaluate their own ethical orientations in the light of these studies.

AAS 241
RELIGION IN CHINESE HISTORY, SOCIETY, AND CULTURE
Undergraduate
An exploration of the Chinese religious landscape, focusing on social and practical dimensions of Chinese religion, such as state rituals and private cults, liturgies and individual practices of Taoist priests and adepts, politico-religious ideas that inspired popular messianic movements throughout Chinese history, and interrelations of Buddhist and Taoist clergies and institutions in the state. Cross-listed with REL 241.

AAS 243
BUDDHIST THOUGHT IN CULTURAL CONTEXT
Undergraduate
An exploration of the Buddhist tradition, using original sources, from its beginnings in ancient India to a world religion with strong roots in the US. Students will discover how Buddhism interacts with cultures from Sri Lanka and Thailand to China, Japan and Tibet. Although this course is online, students in the region will have the opportunity to practice meditation at a Chicago zendo and tour the Buddhist art at the Chicago Art Institute. Cross-listed with REL 243.

AAS 244
TRADITIONS OF CHINESE POPULAR CULTURE
Undergraduate
Promotes an understanding of Chinese worldview and life in the perspective of the common Chinese people from ancient to modern times. Based on historical and modern texts in translation, some historical and ethnographic studies, as well as visual and aural materials, the course explores gender and generational relations and conflicts, ancestor veneration, the worlds of ghosts and gods, festivals, art, and entertainment, but also aspects of misery and social unrest. Although the course will draw largely on popular and entertaining sources, it will also pay attention to historical developments, the relationship between popular and elite traditions, as well as sociological and anthropological issues arising from these contexts. Cross-listed with REL 246.
AAS 245
RELIGION IN JAPANESE HISTORY, SOCIETY, AND CULTURE
Undergraduate
Explores the specific interplay between religion and culture in Japan. Taking historical and cultural factors into account, it considers prehistoric Japanese religion, ancient imperial myths, the assimilation of Buddhism, Confucianism, and continental (Chinese/Korean) culture, the religious and aesthetic worlds of the court nobility and the warrior class, popular mountain cults, the revival and systematization of Shinto, the impact of western culture, Japanese ultra-nationalism, and the religious situation in the post-war period. Cross-listed with REL 245.

AAS 246
ASIAN FOREIGN POLICY
Undergraduate
This course surveys the international relations of selected Asian countries. For each country, the course presents the basic historical background shaping foreign relations, introduces the external and domestic influences on foreign policy, and identifies emerging international challenges. It examines both the economic and military-security dimensions of Asian foreign relations. Cross-listed with PSC 246.

AAS 247
LITERATURE AND RELIGION IN JAPAN
Undergraduate
Focuses on the pervasive influence of religious thought and sentiment on Japanese literature from ancient to modern times and explores the intricate relationship between religion, aesthetics, and the arts in Japanese culture. Considers original works including ancient Japanese mythology and poetry, the memoirs of court ladies and Buddhist hermits, romance, epics, folktales and social satire, with attention to their historical, social, religious and social dimensions, as well as to the individual experience expressed in them. Cross-listed with REL 247.

AAS 248
CHINESE CALLIGRAPHY
Undergraduate
An introduction to the art of Chinese calligraphy. Hands-on practice as well as history and theory of the art. This course is open to students with no background in Chinese calligraphy, language, literature, or culture. Cross-listed with MOL 248.

AAS 251
SOUTH ASIA TO C. 900 C.E.: THE STONE AGE TO THE GOLDEN AGE
Undergraduate
The course follows the development of the history of the region from the earliest phases of human settlement, the first civilization in the Indus valley, and the formation of the Mauryan and Gupta empires. It will analyze the growth of different state structures from tribal/lineage based state to these great empires. It incorporates the rise of regional states and the growing importance of trade to linking South Asia with the West. It will also examine the development of different religious traditions from Vedic Brahmanism to Buddhism to Jainism and the very early days of Islam in the region. The central question of this course will be how to contextualize the relationship between structures like family, law, caste, community, state and the tumultuous changes in the subcontinent over this long period. Cross-listed with HST 151.

AAS 252
SOUTH ASIA, C. 900 TO 1707: SULTANS, MUGHALS, AND ISLAMIC EMPIRES
Undergraduate
The course begins with the transformation of society from the ‘ancient’ to the ‘medieval’, and compares this to developments in Europe in the feudal age. It then incorporates specific political, social, and cultural developments in South Asia that came about with the establishment of powerful Islamic states in a region where Muslims were a minority. These issues will inform the analysis of the Ghaznavid and Ghurid invasions, the Delhi Sultanate, the Vijayanagara empire and the Mughal empire. The course will end with the Marathas and the decline of the Mughal empire, and the rising influence of the British. The central themes concern how the state, economy, culture, and society developed in the period when Islam became firmly embedded in South Asia. Cross-listed with HST 152.

AAS 253
ASIAN POLITICS
Undergraduate
An introduction to contemporary government and politics in Asia, focusing on China and Japan, with comparative reference to other Asian and non-Asian political systems. Special attention will be made to the emerging political and economic role of the Pacific Rim. Cross-listed with PSC 253.
AAS 254
SOUTH ASIA, 1707 - 1947: RISE AND FALL OF THE BRITISH RAJ
Undergraduate
The course begins with the decline of the Mughal Empire, and then moves to examine the British empire, the nationalist movement and finally to independence and partition in 1947. The central questions of this course continue to be relevant in the post-colonial period: how we understand the distinctive form of modernity that has developed in South Asia. Taking a comparative approach as often as possible, the course examines the fundamental ways that Britain was as transformed by the development of its empire as was colonial India. The course constantly deconstructs easy binaries of self and others/ East and West by examining the differences within Indian and British society. Cross-listed with HST 153.

AAS 263
JAPAN TO C. 1200
Undergraduate
Follows the formation of a unified state in central Japan during the 5th and 6th centuries. Considers the influence of Korean immigrants and Chinese philosophy and statecraft on the unification of Japan in early antiquity. Explores rise of Japan's aristocratic court culture in Nara and Kyoto as well as powerful Buddhist institutions and the emergence of the warrior class in Eastern Japan. Cross-listed with HST 263.

AAS 264
JAPAN, CA. 1200-1800
Undergraduate
Follows the emergence of the warrior class and the system of dual political authority until the 14th century, with the imperial court in Kyoto and the samurai elite in Kamakura. Continues with an examination of the early modern processes of urbanization and the growth of a monetary economy, changes in social organization, major cultural innovations, and religious/intellectual movements. Cross-listed with HST 264.

AAS 265
JAPAN, C. 1800 - PRESENT
Undergraduate
Follows the radical transformation of Japanese politics, society, and economy with the commercialization of the countryside, the weakening of samurai rule, and increased, often hostile, contact with Western imperialist nations. Explores expansion of Japan as an imperialist nation from the middle of the 19th century and the lasting legacy of that expansion in the region. Explores WWII and postwar political, economic, social changes in contemporary Japan. Cross-listed with HST 265.

AAS 273
GLOBAL ASIAN LITERATURE
Undergraduate
Introduction to selected authors, genres, and topics in Asian American or Asian diasporic literature from the mid-nineteenth century to the present. Variable emphasis on different groups, genres, or historical periods. WRD 103 or HON 100 is recommended for this course. Cross-listed with ENG 273.

AAS 290
TOPICS IN ASIAN AMERICAN STUDIES
Undergraduate
This course, which varies from quarter to quarter, explores topics in Asian-American studies.

AAS 305
RELIGION AND CULTURE IN SOUTH ASIA
Undergraduate
This course examines the interplay between religion and society in pre-modern and contemporary South Asia. The course will use such materials as epic texts, poetry, novels, journalism, film, music and art to explore how religion, gender, social class and politics are experienced in the lives of people in India and Pakistan. Cross-listed with REL 305.

AAS 315
THE STATE & ECONOMIC GROWTH IN EAST ASIA
Undergraduate
A survey course focused upon key geographical factors contributing to the emergence of Japan as an international economic leader, and the rapid development of the People's Republic of China, Taiwan, Hong Kong, and South Korea, among others, as global economic players. Cross-listed with GEO 315.
AAS 320
MODERN JAPANESE LITERATURE
Undergraduate
Covers modern Japanese literature in English translation from the Meiji era to the present. Themes for study include tradition and modernization, the individual and society, gender, and nostalgia. In addition, beginning with excerpts from Tsubouchi Shoyo's 1886 essay “The Essence of the Novel,” students will trace the development of the novel in modern Japan. Cross-listed with MOL 320.

AAS 325
QUEER JAPAN
Undergraduate
This course surveys representations of same-sex sexuality from the 14th century to the present day in Japan. We will explore the intersection of history, politics, art, and culture through historiography, literature, film, photography, music, cartoons, and animation, examining “traditional” male-male sexuality, the emergence of the modern era of texts reflecting female-female sexuality, as well as the formation of new consciousness and subjectivities throughout the 20th century and into the 21st. Cross-listed with MOL 325.

AAS 337
ASIAN AMERICAN MEDIA REPRESENTATION
Undergraduate
This course examines the ways in which Americans of Asian descent are portrayed in popular media such as television, film, newspapers, and advertisement.

AAS 338
ASIAN CULTURE AND COMMUNICATION
Undergraduate
Reviews major Asian philosophical and religious traditions such as Hinduism, Confucianism, Taoism, and Buddhism and examines how these traditions influence and affect Asian cultures and communication behaviors, particularly communication among Indians, Chinese, Japanese, Koreans, and Asian Americans in various contexts. Cross-listed with INTC 338.

AAS 341
ZEN MIND
Undergraduate
A study of the thought and practice of Zen Buddhism, focusing on the role of Zen in shaping ideas, ethics and the arts in Japan and America. Cross-listed with REL 342.

AAS 342
ASIAN POLITICAL ECONOMY
Undergraduate
This course offers an overview of the geopolitics, culture and history behind the "East Asian Miracle." It provides students with the tools to analyze the core theories, actors, and current and historical events in the study of the international relations, business, politics, and economy of Asia. Cross-listed with PSC 343.

AAS 343
JAPANESE AMERICAN HISTORY IN THE US/CHICAGO
Undergraduate
The second course in a sequence of three content-based courses designed for advanced high learners and native speakers of Japanese to discuss authentic cultural, historical, or literary materials. Topics vary with offering: see current schedule for details. Recommended for students who have completed JPN 201-202-203 and JPN 311-312-313, or have equivalent proficiency in Japanese.

AAS 344
YOGA AND TANTRA
Undergraduate
An examination of the history, philosophy and cultural meaning of body-oriented liberative techniques as they developed on the Indian subcontinent and Himalayan region in Hinduism and Buddhism. Students registering for this course are expected to have studied one or both of these traditions in courses such as REL 142, 143, 242, or 243, or in other courses. Background in theory is also useful. Cross-listed with REL 344.
AAS 350
ETHNIC MINORITY YOUTH: ADAPTATION, IDENTITY AND DEVELOPMENT
Undergraduate
Utilizing an ecological systems perspective, this course examines the challenges and resiliencies faced and acquired by ethnic minority youth. This course will closely examine developmental issues during adolescence that are complicated by being an ethnic minority, or child of immigrant parents. Issues examining the intersection of socio-political power dynamics, with acculturation/cultural adaptation, ethnic identity formation, and intergenerational family conflict will particularly be examined.

AAS 351
JAPANESE POLITICS
Undergraduate
This course examines the meeting of the ancient and the modern in the context of 21st century politics in Japan. Exploring political, economic, and cultural practices and institutions, this class provides an in-depth understanding of Japan's political system from its origins in samurai traditions to current challenges facing Japan's democracy and economy. Cross-listed with PSC 350.

AAS 352
CHINESE POLITICS
Undergraduate
This course examines the political system of China and the major domestic issues in contemporary Chinese politics. The course explores the rise and early governance of the Chinese Communist Party, the economic and political developments since the start of the reform (post 1978) era, and the main political challenges facing Chinese society today. Cross-listed with PSC 352.

AAS 367
LITERATURE OF THE VIETNAM WAR
Undergraduate
This course examines novels, short stories, and essays on the Vietnam war and its aftermath, Vietnamese society, literature of the Vietnam Era.

AAS 373
KYOTO (WORLD CITIES)
Undergraduate
Explores the art, architecture, and urban plan of Kyoto, the ancient capital of Japan. Kyoto became the seat of government and the home of the imperial court in 794, and it continued to serve as the cultural and religious center of the land until the nineteenth century. This course considers major artistic developments as they relate to main sites in Kyoto, especially palaces, temples, and shrines. The eras covered extend from the Heian to the Meiji period.

AAS 395
INDEPENDENT STUDY IN GLOBAL ASIAN STUDIES
Undergraduate
Independent study. Variable credit.

ABD 100
INTRODUCTION TO AFRICAN AND BLACK DIASPORA STUDIES
Undergraduate
This interdisciplinary introductory course examines the many ways in which African and diasporic peoples have created robust lives for themselves and contributed to the creation of the modern world. Our investigation will pay special attention to how social, economic, and political institutions, geographical factors, and the cultural forces of modernity have influenced African contributions to the modern world.

ABD 144
AFRICAN RELIGIOUS EXPERIENCE
Undergraduate
A survey of the varieties of African religious practice and thought.
ABD 200
AFRICA: PEOPLES, CULTURES, IDEAS AND MOVEMENTS
Undergraduate
This is an introductory survey course on African politics. The organizing topic and focus of the course will be Africa's experience with
democratic governance, especially its continuing vigor and popular appeal on the continent despite its elusive character. Our goal in this
course is to gain a deeper understanding and appreciation of Africa: its rich political tradition, incredible diversity, its contradictions,
achievements and failings. The objective is to be able to ask better questions, and develop some insights about why democracy, self-
sustaining economic growth, equity and social justice have been so difficult to accomplish and sustain in the region.

ABD 202
AFRICA, 1750-1900
Undergraduate
The Age of Conquest. The origins of Afro-European relations and the political, economic and military causes of the European partition and
occupation of the continent. Cross-listed with HST 132.

ABD 203
AFRICA, 1900-PRESENT
Undergraduate
The workings of the colonial system, the rise and course of independence movements, and the history of individual African states since
independence. Cross-listed with HST 133.

ABD 206
AFRO-CARIBBEAN AND AFRO-LATIN AMERICA: PEOPLES, CULTURES, IDEAS AND MOVEMENTS
Undergraduate
This course introduces students to the study of peoples of African descent in the Caribbean and Latin America through lenses of history,
politics, and culture. Students will learn how racial identities are constructed and interpreted in the Americas and the ways these identities
have shaped Latin American and Caribbean cultures, politics, and societies. This course will explore broad patterns, changes, and continuities
in the history of the African Diaspora in the hemisphere through an analysis of various topics such as conquest, colonization, slavery,
independence struggles, nation-building, imperialism, neo-colonialism, revolution, violence, social movements, and inter-American relations.

ABD 208
AFRICAN AMERICA: PEOPLES, CULTURES, IDEAS AND MOVEMENTS
Undergraduate
This course is intended to acquaint the student with a range of texts that illustrate some of the major themes in African American studies
while emphasizing the development of students' critical reading, writing, and analytical skills. The course will serve as an introduction to
African American historical, literary, political, and cultural study. This course is meant to introduce students to some of the issues, debates,
and questions that have shaped the study and development of Black Americans in the United States and the broader world.

ABD 209
RACE AND RACISM
Undergraduate
Although it is common for us to talk about race, very few of us have an understanding of what the term means, much less how it came to
signify human diversity. Race is not an objective scientific category that reliably conveys information about people or groups of people; it is a
set of ideologies and practices that originated in modern Europe and has a traceable intellectual history. In this course we will study the origin
of race as an intellectual and scientific project designed to organize humanity into discrete and hierarchical groups, and the implications of
racial thinking, i.e. racial discrimination perpetuated by rhetorical and pictorial stereotypes, discriminatory behavior and institutional practices.
We will utilize racial formation theory which links race and racism by showing the dynamic connections between stereotypes, prejudice,
discrimination and privilege.

ABD 210
AFRICA ON FILM
Undergraduate
Africa is a continent with a rich and growing repertoire of film. This course explores this repertoire, focusing primarily on films made about
Africa by filmmakers of African descent. This class will feature fiction and non-fiction films (full-length and shorts) by well-known filmmakers
of African descent. In addition to screenings, students will read essays that illuminate the background necessary to intelligently interpret and
critique film. Topics for discussion include the funding, distribution, and presentation of African Films as well as modes of criticism
appropriate to film made by Africans and the relation of filmmaking to history. Film directors include Souleymane Cisse, Bassek ba Kobbio,
Jean-Marie Teno, Djibril Dio Mambety, Mohamad Camara, and Ousmane Sembene.
ABD 211
AFRICA TO 1800: AGE OF EMPIRES
Undergraduate
A study of African history from earliest times, concentrating on the political, social and religious aspects of major African states and empires. Cross-listed with HST 131.

ABD 214
ARCHAEOLOGY OF THE AFRICAN DIASPORA
Undergraduate
Africans have been on the move since the dawn of humanity. Archaeology is one discipline that can inform us about the presence and influence of Africans throughout the world, beginning with our hominid ancestors and continuing through the 20th century. Prior experience with archaeology is not required. Topics include: the evolution and development of our species; migrations within the African continent and abroad; and the cultural insights to be gained from the rapidly-growing field of African-American archaeology.

ABD 215
THE AFRICAN AMERICAN RELIGIOUS EXPERIENCE
Undergraduate
This course will examine the religious experience of African Americans and its African precursors through historical and literary resources, reflecting African Americans' distinctive past and interaction with other elements of American culture. Cross-listed with REL 115.

ABD 218
AFRICAN AMERICAN POLITICS
Undergraduate
This course explores the evolution of African-American political participation from the mid-1800's to the present. Topical areas include black political leadership and involvement in social movements (including abolitionism, nationalism, civil rights and the black power movements), electoral politics, political parties, urban politics, public policies, political culture, and as elected officials. Special attention will also be given to the influence of laws and the courts on African-Americans' political participation.

ABD 220
BLACKS AND LOVE
Undergraduate
This course employs cultural criticism, race and ethnic studies, and women's and gender studies to examine the visual representations of blacks and love in art, film, and literature. The course begins by examining the construction of race in eighteenth, nineteenth, and early twentieth-century European and American philosophy and body politic and with an examination of art, art history, film, and literature. Section two explores the definition of love; it examines Christian definitions of love as well as secular definitions from black intellectuals, cultural critics, and scholars. Section three examines a range of genres in search of progressive, transformative, positive images that depict blacks in loving relationships, rediscovering what it means to love oneself and others in spite of/because of our human differences (in race/ethnicity, gender, class, sexuality).

ABD 221
ROMANCE, GENDER, AND RACE
Undergraduate
This course examines how writers represent gender and race in the romance genre. The course begins with a study of the literary elements that comprise popular romance novels. It also examines the design elements for their covers used primarily to attract women readers from varied racial/ethnic backgrounds, who, as major consumers of this genre, generate over a billion dollars in revenue annually. Next, attention will be devoted specifically to examining women writers and black readers of romance novels, who make up 25% of the billion dollar publishing industry. Questions to be addressed include: How does a writer's gender and racial/ethnic identity shape the representations of race and gender in romance fiction and cover design? How have writers complicated the popular romance plot to address the issues of gender, race, class, and age? How do writers utilize the romance novel during specific historical periods to address social, political, and health issues? The course concludes by examining how the internet has transformed the writing, publishing, purchasing, and reading practices for the writers, publishers, and readers of romance novels with black characters.
Stereotypical representations of people of African descent have pervaded Western culture throughout the modern era. These images were disseminated along the trade routes of colonialism, from Africa to Europe, the Americas and Asia. Stereotypes of people of African descent have been a part of popular culture, commercial advertising, and scientific literature. This course will examine the origin and dissemination of the dehumanized image of "the Black body". We will discuss the perpetuation of Black stereotypes and how these images have shaped Black identity in the post colonial world.

A philosophical inquiry into the history of the concept of race. Cross-listed with PHL 231.

The 1967 Supreme Court decision in the case of Loving vs. the State of Virginia overturned laws that prohibited individuals from different racial backgrounds from marrying. Since then, people from mixed racial and ethnic backgrounds have advocated for legal recognition of their status as members of more than one racial group. This course explores the transformation of these "interracial intimacies" from a cultural taboo to a source of personal identity. By placing their lives and experiences in the appropriate historical and cultural context, we will explore how people who identify as "mixed" negotiate the rigid boundaries of race in the United States.

This survey course examines the philosophical and critical thought from African American, Caribbean, and African philosophers, feminists, political, and radical intellectuals. The thinkers to be studied include, but are not limited to, Du Bois, Garvey, James, Lamming, Williams, Senghor, Fanon, Hodge, Wynter, Lorde, Soyinka, hooks, Emecheta, and Conde.

This survey course examines the history of the aesthetic thought that has emerged from the minds of Black creative intellectuals in the United States and globally. Figures to be examined might include: Du Bois, Locke, Hughes, Johnson, Hurston, James, Baraka, Piper, hooks, Julien, Mercer, and Wallace.

This interdisciplinary course will examine the diasporic literary and cultural movements known as the Harlem (or New Negro) Renaissance and the Negritude Movement. Through close attention to the essays, novels, and poetry from these movements, students will explore the connections between these two multifaceted cultural movements and their contributions to the growth of a global Black political and cultural consciousness. Authors to be studied include: Du Bois, Hughes, Locke, McKay, Cesaire and Senghor, among others.

A study of the patterns of philosophical thinking from the African continent. Cross-listed with PHL 239.
ABD 241
RELIGIOUS DIMENSIONS OF THE AFRICAN DIASPORA
Undergraduate
This course explores the dynamics of African religions throughout the Diaspora and the Atlantic world. It will pay particular attention to the variety of historical experiences and sacred institutions of those of African descent. Questions of the course include: how were these religions and their communities created?; how have they survived?; and how are African-based traditions perpetuated through ritual, song, dance, drumming, and healing practices? Specific attention will be given to one or more of the following: Yoruba religion and its New World offspring, Santeria, Voodoo and Candomble; Africanisms in American religion; gospel music; Islam; urban religions; and/or Vodun and Voodoo.

ABD 244
AFRICAN WOMEN WRITERS
Undergraduate
This course examines fiction and criticism with the purpose of studying how African women configure themselves in literature and how they (re)define feminist theory. Authors to be studied include: El Saadawi, Emecheta, Alkali, Nzapa, Head, Ngcobo, Lessing, Gordimer, Aidoo, Ba, and Joyce.

ABD 245
RACE AND ETHNICITY IN LITERARY STUDIES
Undergraduate
This course examines various ways in which race is constructed and, concurrently, how race as a “fiction” operates in literary studies. Literature presents and explores the ways in which the world is viewed and experienced by individuals in a particular society or social group. Since literature provides unique insights into different historical and cultural movements, studying how race is understood and deployed (explicitly and implicitly) in a text provides a powerful way to examine the fluidity of race and to compare how it is understood in different parts of the Black diaspora.

ABD 246
PRINCIPLES OF AFRICAN ART
Undergraduate
This introductory-level course surveys the arts of select cultures from west and central Africa. The course will focus on the arts of royalty as a means by which to introduce basic concepts and larger issues within the field. The arts of groups who borrow from royal iconography, such as diviners, religious cults, societies of elders, and others, will also be investigated. Themes pertinent throughout the course include issues of gender, colonialism, cultural interaction, and historical change in both visual art and the nature of kingship. Cross-listed as HAA 101.

ABD 247
ANCIENT AFRICAN ART: PREHISTORIC TO THE EUROPEAN ENCOUNTER
Undergraduate
This course surveys a selection of artistic traditions from across the African continent beginning with the earliest attempts by humanity to visually represent complex thought until the Portuguese began trading along the coast of West Africa in the mid-fifteenth century. Emphasis is placed on demonstrating connectedness with a larger cultural environment, while also suggesting connections to future artistic traditions. Cross-listed with HAA 201.

ABD 248
MODERN AFRICAN ART: EUROPEAN ENCOUNTER TO INDEPENDENCE
Undergraduate
This course surveys a selection of artistic traditions from across the African continent beginning with the arrival of the Portuguese along the coast of West Africa in the mid-fifteenth century until the age of African independence in the 1960s. While the impact of a European presence helps define the boundaries of this course, artistic response to that presence is but one theme. Interactions between African cultures and the impact of Islam are equally important considerations. Cross-listed as HAA 202.

ABD 249
JAZZ AND THE DIASPORA IMAGINATION
Undergraduate
This course will examine the role jazz has played in the cultural imagination of people across the African Diaspora. What does jazz symbolize for authors and artists, and how have they adapted jazz to fit their own aesthetic, ideological, and political needs? How has it been used in literature, visual art, politics, sociology (among others)? What are the different ways in which ‘jazz’ (itself a multifaceted idea) has been imagined, presented, and manipulated? Figures to be examined include: Amiri Baraka, Sonia Sanchez, Romare Bearden, Langston Hughes, Jackson Pollock, Billie Holiday, Ralph Ellison, Dizzy Gillespie, John Coltrane, among others.
ABD 251
WORLD REFUGEE CRISIS
Undergraduate
This is a survey of global refugee crisis and internal displacement between 1945 and the present. The course will focus on the following issues and challenges: human rights, definitions and causes of crisis, internal/external displacements, 'environmental' refugees, protection and integration, refugee children, and conflict resolutions in post-war societies. Cross-listed with HST 241.

ABD 252
CONTEMPORARY AFRICAN ART: INDEPENDENCE TO THE PRESENT
Undergraduate
This course surveys African art from the age of African independence in the 1960s until the present day. The meaning of the term contemporary as it applies to African art is questioned in this course. The position of the artist between African artistic tradition and the global art market is also of vital importance. Cross-listed with HAA 203.

ABD 254
AFRICAN POLITICS
Undergraduate
An introduction to African politics. The course will focus on the basic concepts, issues, and theoretical models used in studies of the dynamics of government and politics in Africa from the pre-colonial era to the contemporary period.

ABD 256
AFRICAN-AMERICAN HISTORY TO 1800
Undergraduate
West African culture, the middle passage, development of the Slave trade, introduction of slavery into the American colonies, African-Americans in the Revolutionary War and the Constitution. Cross-listed as HST 246.

ABD 257
AFRICAN-AMERICAN HISTORY, 1800-1900
Undergraduate

ABD 258
AFRICAN AMERICAN HISTORY, 1900 TO PRESENT
Undergraduate
W. E. B. Dubois and Booker T. Washington debates; Marcus Garvey and the Harlem Renaissance, the Great Migration, Civil Rights to Black Power. Cross-listed as HST 248.

ABD 259
MOVIN' UP: BLACK MIGRATION TO THE NORTH, 1877 - 1941
Undergraduate
This course examines African American migration in an era that also saw mass European and Asian emigration and immigration. It discusses the relationship between migration and citizenship for African Americans during what became known as the Great Migration. We will explore the social, cultural, economic and intellectual motivations for migration in order to understand the development of an African American identity.

ABD 260
DIMENSIONS OF BLACK FAMILY LIFE
Undergraduate
This course will introduce students to the study of Black family life in Africa and its Diaspora. Special attention will be given to the ways in which values and patterns of living and thought are communicated across generations (time) and transported across geography (space).
ABD 272
MUSLIM WOMEN IN TEXTS
Undergraduate
This course aims to examine texts written on Muslim women by themselves, by non-Muslim women and by Muslim men. Several questions are raised by the subject itself. One such question focuses on what is intrinsically Islamic with respect to ideas about women and gender. Another question centers on what is the model Muslim woman given the diversity of cultural manifestations of Islam. This course emerges from these questions and others exploring who is writing what about Muslim women, for what audience.

ABD 274
WOMEN IN AFRICAN RELIGION AND CULTURE
Undergraduate
A study of the role of religion and culture in the lives of women in Africa, introducing students to an “emic” (insider) interpretation of beliefs and practices of the triple religious heritage (Indigenous religions, Christianity and Islam), and critically evaluating their implications for women.

ABD 275
BLACK FEMINIST THEORIES IN A U.S. CONTEXT
Undergraduate
This course surveys the major figures, statements, and movements that shape Black feminist thinking, writing and activism in the United States. Figures examined include: bell hooks, Ida B. Wells Barnett, Mary Church Terrell, Angela Davis, Michelle Wallace, Audre Lorde, and Mark Anthony Neal, among others. Cross-listed with WGS 275.

ABD 285
AFRO-HISPANIC LITERATURE IN TRANSLATION
Undergraduate
This course explores how race, class, politics and culture find expression in Afro-Hispanic literature. We will read works that have been translated into English from their original Spanish versions and analyze how the use of language, imagery and narrative voice reflect the experience of people of African descent in the Spanish-speaking world.

ABD 290
SPECIAL TOPICS
Undergraduate
This course explores various issues stemming from African and Black peoples being gendered and racialized subjects. Specific topics may vary.

ABD 300
AFRICAN ISLAM: ISLAMIC ART & ARCHITECTURE IN SUB-SAHARAN AFRICA
Undergraduate
Focused study of the impact of Islam on the artistic traditions of sub-Saharan Africa. Rather than necessarily replacing previous art forms, this course investigates in what circumstances preexisting visual culture might be integrated with the requirements and needs of Islam. This approach necessitates an understanding that neither Islam nor African art are monolithic entities, but rather their interactions represent a wide variety of negotiations across the continent. Likewise, this course will consider specific historical circumstances to which Islamic art in sub-Saharan Africa has responded in terms of form and content. Cross-listed with HAA 302.

ABD 301
AFRICAN ARCHITECTURE
Undergraduate
This course examines a wide variety of issues pertinent to the study of architecture in Africa, highlighting above all else the diversity of traditions across the continent. Weekly themes are defined at times by materials, technology, type, geographical region, culture, or specific architectural elements. Examples of subjects studied include: earthen mosques of Mali; subterranean residences in Burkina Faso; nomadic tents; impluvial and courtyard traditions of Nigeria and Senegal; mural painting in Burkina Faso, Nigeria, and South Africa; Ethiopian rock cut churches; imperialist exploitation of Great Zimbabwe's legacy; and coral architecture of the Swahili Coast. Art history and related disciplines. Cross-listed with HAA 301.
ABD 302
MODEL ARAB LEAGUE
Undergraduate
This course is centered around students' participation in the Model Arab League as delegates from member-states. Students engage with each other from universities in the Mid-West region on the most important social, economic, environmental, cultural and political issues facing Arab leaders and ordinary citizens. The course also focuses on parliamentary procedures of African states represented. Cross-listed with IWS 202.

ABD 303
THEMES IN AFRICAN DIASPORA STUDIES
Undergraduate
Recent scholarship argues that Africa is not limited to geography, but is found in the traditions and identities of many peoples around the world. This course will examine different major themes in the study of the African and Black diaspora. Specific topics may vary.

ABD 305
PAN-AFRICANISM
Undergraduate
The course will examine the often ambivalent place of Africa in the imaginations, cultures and politics of people in the African diaspora. Students will explore the contributions of African, African-American and Caribbean intellectuals in the formation of diasporic movements and Pan-African thought. We will ask, to what degree was the ideology of Pan-Africanism and the iconography of Africa employed to mobilize masses of black people around local and domestic issues? How important has a consciousness of Africa been to the construction of cultural identities in the diaspora, and how have class, gender, and race shaped or constrained those identities? Our goal is to develop further insights into how people of the African diaspora have continually reinvented and imagined the home of their ancestors, in turn reinventing and imagining themselves.

ABD 320
AFRICAN AMERICAN SCIENCE FICTION
Undergraduate
This course studies the science fiction by Black writers as well as critical responses to these novels and writers. The course explores the treatment of gender, oppression and empowerment, historical implications (past, present, future) of the middle passage, chattel slavery, and the struggle for freedom.

ABD 336
AFRICAN AMERICAN POLITICAL THOUGHT
Undergraduate
Considers black political thought through a variety of ideological, political, legal and historical perspectives. First explores early efforts by blacks to challenge the racialized limitations of America's core principles of liberty, equality and democracy in the contexts of abolitionism, the women's suffrage movements, Manifest Destiny, and American industrialism. Then concentrates on the evolution of contemporary black political thought, with an emphasis on both conceptual diversity and continuity over time. Cross-listed with PSC 336.

ABD 345
THE LITERATURE OF IDENTITY
Undergraduate
Cross-Cultural Study of self-discovery and identity as manifested in the literatures of self-awareness and self-definition. Authors to be studied include: Michael Anthony, Frantz Fanon, Jamaica Kincaid, George Lamming, V. S. Naipaul, and Jane Rhys.

ABD 348
RELIGIONS IN AFRICA AND THE DIASPORA
Undergraduate
An advanced examination of the indigenous religions of Africa as they encounter other religious traditions throughout the world.

ABD 351
RECONSTRUCTION AND THE RISE OF JIM CROW
Undergraduate
Covers the problems of reunion between the North and the South after the Civil War, including the struggle for African-Americans' civil and political rights, the transition to a free labor economy in the South, and the eventual end of reconstruction and establishment of racial segregation in the South and the nation. Cross-listed with HST 379.

ABD 208 or consent of the instructor is a prerequisite for this course.
This course explores the struggles of African Americans and women, as individuals who were excluded from the franchise on the basis of their being an African American, a woman, or both, to gain access to the ballot. The relation of women and African Americans to the ballot is worthy of investigation for two reasons. First, with the exception of 18 year olds, women and Black Americans are the two groups who have required amendments to the Constitution to secure their right to vote. Second, they share a history, often contentious, of political struggle. In addition, the course will investigate what this history of political struggle can tell us about American law, politics, and society.

This course engages the research and analyses in the field of public law - how do political scientists, public policy analysts and others develop informed public policy and law. Topics vary from year to year.

An exploration of women's experience as a primary resource and norm for theology, focusing on themes of inclusion, exclusion, representation and liberation in particular social, political and historical contexts.

Survey of Black poetry and drama from 1865 to the present.

African-American Poetry 1940 - 1960

This course looks at the intersection between political and artistic movements of the Black Power and Black Arts Movements. We will survey the aesthetic and political aspects of this era, including poetry, novels, drama, music, visual arts and film.

A media analysis course that will analyze media coverage of African Americans from the 19th century to the present. Through lectures, guest speakers, readings and research, students will probe the ways in which the media has influenced and dictated the perceptions and destinies of African Americans, as well as its impact on America's ongoing challenge, as W.E.B. DuBois put it more than a century ago, to "conquer the color line."
ABD 379
BLACK FEMINIST THEORY
Undergraduate
This course engages with the multiple versions of woman-centered theory and practice developed in the writings; activism, and other creative work of Black, particularly African American women, from the mid-nineteenth century to the twenty-first. While not all of these theorists would use the word feminist; all have in common the aim of empowering women's lives, advocating for women for equal economic, political, and cultural access.

ABD 380
TOPICS IN AFRICAN AMERICAN STUDIES
Undergraduate
This course examines figures, texts, cultures or issues in African American studies. Specific topics may vary by term.

ABD 382
TOPICS IN AFRICAN DIASPORA STUDIES
Undergraduate
Topics vary. See schedule for titles and department website for specific descriptions.

ABD 386
BLACK WOMEN’S LIVES
Undergraduate
This course is a variable topics course directed to the examination of topics such as black women's cultural criticism, Black women in the arts, Black lesbian rights, Black women’s participation in social movements, representation in the media, etc. Cross-listed with WGS 386.

ABD 390
TOPICS IN POPULAR CULTURE IN THE BLACK DIASPORA
Undergraduate
This course explores various topics in popular culture studies through the lens of the African Diaspora, including music, film, television, popular literature and subcultural practices. Specific topics may vary by quarter.

ABD 391
CAPSTONE
Undergraduate
This senior seminar engages students in a synthesis of what they have learned through coursework. The capstone course will involve reading, writing, discussion, as well as the preparation by students of a substantive piece of work (e.g., a senior thesis, a research paper, or a creative work.)

ABD 398
FRENCHNESS (RE) DEFINED: RACE & GENDER IN MODERN FRANCE
Undergraduate
The goal of this course, which will be taught in English, is to introduce to you the history of France in the late modern period (1789-present) through the critical lens of race and gender. We will also develop the tools for thinking critically about gender and race as categories of analysis.

FCH 101 and FCH 102 are a prerequisite for this class.

ABD 399
INDEPENDENT STUDY
Undergraduate
Independent study. Variable credit.
ACC 100
PRINCIPLES OF ACCOUNTING LAB
Undergraduate
This course is a mandatory lab component of ACC 101 Introduction to Accounting I and emphasizes supplementary material to reinforce accounting principles concepts. This course is graded on an audit basis and carries no credit hours.

ACC 101 is a corequisite for this class.

ACC 101
INTRODUCTION TO ACCOUNTING I
Undergraduate
Introduction to Accounting I provides an introduction to financial accounting as the means of recording, storing and summarizing economic events of the business enterprise to meet external reporting needs. Emphasis is placed on the preparation and analysis of financial statements and other financial reports to the public based on the accounting equation, accrual accounting concepts, and data gathering techniques. Topics include corporate accounting for current and long term assets and current liabilities, and the corporate income statement. ACC 100 is a mandatory lab component of ACC 101, except for Summer and Accountancy Honors sections.

MAT 130 is a prerequisite for this class.

ACC 102
INTRODUCTION TO ACCOUNTING II
Undergraduate
Introduction to Accounting II, a companion and sequel course to Accounting 101, continues to explore basic accounting fundamentals and concepts. The course provides an introduction to managerial accounting and internal reporting. Topics include financial accounting for long-term liabilities, the components of stockholders equity, the statement of cash flows, financial statement analysis, budgeting and variance analysis, job costing for the service sector and cost analysis for decision-making.

ACC 101 is a prerequisite for this class.

ACC 250
CAREER MANAGEMENT FOR ACCOUNTANTS
Undergraduate
This course is designed to explore and manage the professional expectations and career potential of an accountancy major. Students will participate in hands-on resume building activities, practice interviews and apply research and evaluation skills to execute job search and career management strategies. Students will learn about Career Center resources and internship opportunities as ways to prepare for successful job searches and to maximize their potential for long term professional growth. (2 quarter hours)

ACC 102 is a prerequisite for this class.

ACC 303
COST & MANAGERIAL ACCOUNTING
Undergraduate
Managerial Accounting provides a thorough grounding in manufacturing accounting, cost allocation techniques, and the evaluation of management control systems. Students will examine manufacturing cost systems including job order costing, process costing, and activity-based costing. Tools for management control systems will be covered to enable the student to evaluate and compare various systems.

ACC 102 is a prerequisite for this class.

ACC 304
FINANCIAL REPORTING I
Undergraduate
Financial Reporting I includes a study of U.S. and international accounting standards, the concepts of accounting and basic financial statements. Accounting for cash, receivables, inventories, depreciable assets and current liabilities will also be examined.

ACC 102 is a prerequisite for this class.
**ACC 305**  
**FINANCIAL REPORTING II**  
Undergraduate  
Financial Reporting II focuses on researching accounting issues, revenue recognition and financial statement analysis. The course also provides an understanding of complex issues such as accounting for investments, long term liabilities, derivatives, contributed capital, retained earnings and earnings per share.  

(ACC 304 or ACC 307) and MIS 140 are prerequisites for this class.

**ACC 306**  
**FINANCIAL REPORTING III**  
Undergraduate  
The third course in the financial accounting sequence, this course studies deferred taxes, pensions and other post-retirement benefits, leases, accounting changes and error analysis, statement of cashflows (advanced), and full disclosure, if time permits. Selected spreadsheet applications will be introduced through homework assignments.  

ACC 305 or ACC 309 is a prerequisite for this class.

**ACC 307**  
**FINANCIAL REPORTING I FOR FINANCE HONORS STUDENTS**  
Undergraduate  
Financial Reporting I includes a study of U.S. and international accounting standards, the concepts of accounting and basic financial statements. Accounting for cash, receivables, inventories, depreciable assets and investments will also be examined. This course takes a user of financial statements, rather than a preparer of financial statements, point of view.  

ACC 101, ACC 102 and status as a Finance Honors student are a prerequisite for this class.

**ACC 308**  
**ADVANCED FINANCIAL ACCOUNTING**  
Undergraduate  
Advanced Financial Accounting focuses on accounting for multi-corporate entities and acquisitions, accounting for state and local governments, accounting for non-profit organizations, foreign operations, partnership accounting, and segment reporting. Selected spreadsheet applications will be introduced through homework assignments.  

ACC 305 or ACC 309 is a prerequisite for this class.

**ACC 309**  
**FINANCIAL REPORTING II FOR FINANCE HONORS STUDENTS**  
Undergraduate  
Financial Reporting II focuses on researching accounting issues, revenue recognition and financial statement analysis. The course also provides an understanding of complex issues such as accounting for investments, long term liabilities, derivatives, contributed capital, retained earnings and earnings per share.  

ACC 307 and status as a Finance Honors student are a prerequisite for this class.

**ACC 350**  
**INFORMATION FOR DECISION MAKING**  
Undergraduate  
Information for Decision-Making is typically the final course in the curriculum in Accountancy. It is the course in the program that most emphasizes research using the FASB Accounting Standards Codification and documenting research results. There is also a focus on written and oral communication as well as teamwork. More specifically, the course addresses the standard setting process in financial accounting as well as the role that the Securities and Exchange Commission fills in that process. In addition, current financial accounting topics are covered including revenue recognition, fair value measurement and disclosures, and earnings quality. The course also provides an introduction to International Financial Reporting Standards.  

(ACC 305 or ACC 309) and ACC 380 are a prerequisite for this class.
ACC 370
PROFESSIONAL RESPONSIBILITIES & BUSINESS LAW
Undergraduate
This course covers the aspects of the legal environment of special concern to accounting practitioners, including: the ethical standards of accounting practice, legal liability of accountants, contract law, property law, tort law, commercial paper, the laws of agency, sales laws, banking, agency, partnerships, corporations, trusts and wills, suretyships, secured transactions, bankruptcy, employment law, securities regulation, antitrust, and public regulation and disclosure laws.

ACC 102 is a prerequisite for this class.

ACC 372
AUDITING I
Undergraduate
Auditing I provides a conceptual introduction to the nature and value of financial statement audits. The course emphasizes the professional skepticism required of auditors in a changing ethical and legal environment including the Professional Ethics Rules and U.S. Securities laws. The course focuses on Generally Accepted Auditing Standards (GAAS) that address engagement planning and execution including systems of internal control, audit procedures, evidence, and reporting.

ACC 305 or ACC 309 is a prerequisite for this class.

ACC 374
AUDITING II
Undergraduate
Auditing II is a sequel to Auditing I (ACC 372). Auditing II builds upon the understanding and application of the Generally Accepted Auditing Standards (GAAS) Standards of Fieldwork to both analyze and evaluate audit procedures chosen and evidence obtained regarding classes of transactions and account balances. The course highlights common tools and techniques for planning and conducting audits including the use of sampling and data analysis when performing tests of controls and substantive tests.

ACC 372 is a prerequisite for this class.

ACC 375
FRAUD EXAMINATION & FORENSIC AUDITING
Undergraduate
This course covers various aspects of fraud prevention and detection, including elements of fraud, costs of fraud, use of controls to prevent fraud, and methods of fraud detection. Guest speakers with expertise in fraud examination/forensic auditing will share their knowledge and experiences with the class.

ACC 304 or ACC 307 is a prerequisite for this class.

ACC 376
INTERNAL AUDITING
Undergraduate
This course covers a risk-based, process and controls-focused internal audit approach. Topics include internal audit standards, internal control, corporate governance, risk assessment, evidence and documentation, fraud risks and auditing techniques including sampling and the use of systems-based audit techniques. Professional ethics, emerging issues are discussed.

ACC 102 is a prerequisite for this class.

ACC 380
TAX TREATMENT OF INDIVIDUALS AND PROPERTY
Undergraduate
Tax Treatment of Individuals and Property covers the basic provisions of the Internal Revenue Code as they relate to the taxation of individuals. It focuses on concepts of gross income, exclusions, deductions, exemptions, and credits, as well as property transactions. It also includes tax research.

ACC 304 or ACC 307 is a prerequisite for this class.
ACC 383
TAX TREATMENT OF CORPORATIONS AND PARTNERSHIPS
Undergraduate
Tax Treatment of Corporations and Partnerships is a continuation of Accounting 380. The course covers the tax aspects of corporations and partnerships, including formation, operations, and distributions, as well as specially taxed corporations, ethics in tax practice, and an introduction to estate and gift taxation.

ACC 380 is a prerequisite for this class.

ACC 393
INTERNSHIP IN ACCOUNTANCY
Undergraduate
This course is designed for students who already have or will soon have a position in an accounting or accounting-related field. Internship in Accountancy provides students with academically supervised work experiences, improving linkages between classroom efforts and the business world. Students obtain valuable professional experience and begin the process of networking with area businesses and professionals.

ACC 102 is a prerequisite for this class.

ACC 398
SPECIAL TOPICS
Undergraduate
Special Topics courses provide in-depth study of current issues in accountancy. Content and format of this course is variable. Subject matter will be indicated in class schedule.

ACC 399
INDEPENDENT STUDY
Undergraduate
Independent Study is available to students of demonstrated capability for intensive independent work in accountancy. (variable credit)

ACC 500
FINANCIAL ACCOUNTING
Graduate
This introduction to financial accounting provides both a theoretical foundation and an opportunity to apply accounting logic in increasingly complex situations. The accounting model and information processing cycle are developed. The content of the income statement, balance sheet, and statement of cash flows are studied in detail and analyzed.

MS in Taxation and MACC students are restricted from registering for this class.

ACC 505
LANGUAGE AND BUSINESS CULTURE
Graduate
The objective of this course is to develop an understanding of how to be successful in the U.S., both academically and professionally. The course covers the concepts, methods and tools necessary to face the challenges of studying and working in the U.S. Students will improve their skills in oral communication, practical business writing, and delivering presentations. Students will also gain knowledge of the career search process. Recommended to be taken concurrently with ACC 500. Prerequisite: Approval of college office or department

ACC 535
PRINCIPLES OF ACCOUNTING INFORMATION SYSTEMS
Graduate
Today's business person requires a fundamental knowledge of computer-based information systems and their role in accounting functions and financial decision-making. This course will enable the student to interface with accounting systems, and to participate in their design and audit. It will focus on the nature and flows of accounting information in organizations, security and internal controls and the use of information technology in accounting information systems and decision-making.

ACC 500 is a prerequisite for this course.
ACC 541
FINANCIAL ACCOUNTING THEORY & PRACTICE I
Graduate
Intermediate theory and preparation of financial statements; review of accounting concepts and development of accounting models; methods and problems in valuation and reporting; with emphasis on current assets and liabilities, property, plant and equipment, and intangibles, review of relevant authoritative literature.

ACC 500 is a prerequisite for this class. This class is not available for MACC students.

ACC 542
COST AND MANAGERIAL ACCOUNTING
Graduate
Introduction to cost and managerial concepts and techniques. Topics include cost accumulation (job, process, standard costing, and activity-based costing), cost behavior, breakeven analysis, budgeting, contribution approach to income measurement, joint and by-product costing, cost allocation methods, and their relevance for decision-making.

ACC 500 is a prerequisite for this class. This class is not available for MACC students.

ACC 543
FINANCIAL ACCOUNTING THEORY & PRACTICE II
Graduate
Continuation of intermediate theory and financial statement preparation with emphasis on the components of stockholder's equity; special problems such as earnings per share, accounting changes, income taxes, derivatives, and statement of cash flows; review of relevant authoritative literature and interpretation of financial statements.

ACC 541 is a prerequisite for this class.

ACC 545
ADVANCED TOPICS IN ACCOUNTING THEORY
Graduate
This course is designed to provide comprehensive coverage of the following: consolidations, partnership accounting, foreign operations and not-for-profit accounting. Coverage of the topics emphasizes both theory and practice. Mastery of the material is obtained through problem-solving situations.

ACC 543 is a prerequisite for this class.

ACC 547
AUDIT AND REGULATION OF CORPORATE FINANCIAL REPORTING
Graduate
This course covers the theory of the auditing function. Topics covered include generally accepted auditing standards; the profession's ethical and legal dimensions; audit planning; the internal control structure; audit evidence; and auditor's reports. The development of the professional judgment needed to apply generally accepted auditing standards is emphasized.

ACC 500, or equivalent, is a prerequisite for this course

ACC 548
TAX TREATMENT OF INDIVIDUALS AND PROPERTY TRANSACTIONS
Graduate
This course provides detailed coverage of the federal income tax treatment of individual taxpayers. It includes coverage of inclusions, exclusions, deductions, credits, rates of taxation, special tax computations and the tax aspects of property transactions. It also includes tax research.

ACC 541 is a prerequisite for this class.
ACC 550
ADVANCED TOPICS IN AUDITING
Graduate
Advanced Topics in Auditing, a companion and sequel to Accounting 547, emphasizes the implementation and application of generally accepted auditing standards to transaction cycles and classes of transactions. It includes the study of sampling techniques used in tests of controls and tests of details, internal control in computer-based systems, and introduces the use of Computer Assisted Audit Tools and Techniques. The role of internal auditors is also covered.

ACC 547 is a prerequisite for this class.

ACC 551
TAX TREATMENT OF CORPORATIONS AND PARTNERSHIPS
Graduate
This course covers the federal income tax treatment of corporations and partnerships. It includes ethics in tax practice and an exposure to estate and gift taxation.

ACC 548 is a prerequisite for this class.

ACC 552
BUSINESS LAW FOR ACCOUNTANTS
Graduate
This course covers the aspects of the legal environment of special concern to accounting practitioners, including: the ethical standards of accounting practice, legal liability of accountants, contract law, property law, tort law, commercial paper, the laws of agency, sales laws, banking, agency, partnerships, corporations, trusts and wills, suretyships, secured transactions, bankruptcy, employment law, securities regulation, antitrust, and public regulation and disclosure laws. Formerly "Legal and Ethical Environment of Accounting Practice".

Not Available to MST Students

ACC 554
MANAGEMENT ACCOUNTING AND CONTROL
Graduate
This course provides students with a conceptual understanding of basic cost management and managerial accounting knowledge and skills. Topics include cost behavior, cost-volume-profit analysis, cost accounting systems, budgeting and control, responsibility accounting, the basics of strategic performance measurement systems and analyzing performance. Emphasis is on the interpretation & use of accounting information rather than its creation & accumulation. (2 quarter hours)

ACC 500 is a prerequisite for this class. This class is not available for MACC students.

ACC 555
MANAGEMENT ACCOUNTING FOR DECISION-MAKING
Graduate
This course addresses the financial, nonfinancial & ethical dimensions of decision-making. It provides students with a conceptual understanding of cost management and managerial accounting skills. Topics include cost behavior, cost-volume-profit analysis, cost systems, budgeting and control and decision-making. Emphasis is on the interpretation & use of accounting information rather than its creation & accumulation.

ACC 500 is a prerequisite for this class. This class is not available for MACC students.

ACC 557
GLOBAL STRATEGIC FINANCIAL ANALYSIS
Graduate
This course concentrates on each student's own career goals by focusing on cases of well-known financial successes and failures in the global business world. It enables students to become intelligent users (readers) of financial reporting in a global environment. Students will learn to identify key relationships in the statements to strategy of high performance companies and to make critical judgments underlying the elements and valuations in the financial statements. Students will study integrated reporting, corporate governance, and sustainability accounting. The course is a useful elective for MSA, MACC and MBA programs.

ACC 500, or equivalent, is a prerequisite for this course.
ACC 558
TAX RESEARCH
Graduate
Tax research methods are taught in the classroom. The course begins with a study of the history of the body of tax law. A 'walk through" technique is employed to give the student firsthand experience in the use of a tax research service.

ACC 551 is a prerequisite for this class.

ACC 559
TOPICS IN INDIVIDUAL AND CORPORATE TAXATION
Graduate
This course deals with a variety of topics which are important in tax practice, such as alternative minimum tax, passive losses, interest limitations, the at-risk rules, hobby losses, use of a home, net operating losses. Depreciation and capital recovery including related credits, unearned income of a minor child, uniform capitalization rules and time value of money concepts are also covered. NOTE: This is a M.S.T. course.

ACC 551 is a prerequisite for this class.

ACC 560
TAXATION OF CORPORATIONS AND SHAREHOLDERS
Graduate
Emphasis is on the federal income taxation of distributions to corporate shareholders, including nonliquidating distributions and distributions in connection with liquidations. Collapsible corporations and the tax consequences of transfers of property to a corporation are also covered. NOTE: This is a M.S.T. course.

ACC 558 is a prerequisite for this class.

ACC 561
CORPORATE REORGANIZATIONS
Graduate
Federal income tax implications of transfers of stock, securities and property in connection with corporate acquisitions, combinations and separations. This course is mainly concerned with the tax consequences to corporate parties, to reorganizations and to their shareholders. Emphasis is given to determining the taxability of transactions and asserting the availability of tax attributes to successors in interest. NOTE: This is a M.S.T. course.

ACC 558 and ACC 560 are prerequisites for this class.

ACC 562
CONSOLIDATED RETURNS
Graduate
This course deals with the principles and mechanics of tax consolidations including eligibility, intercompany transactions, inventory adjustments, basis of property, net operating losses, earnings and profits and separate return limitations. NOTE: This is a M.S.T. course.

ACC 560 is a prerequisite for this class.

ACC 563
PARTNERSHIPS
Graduate
An in-depth analysis of the federal income tax rules governing partners and partnerships. This course includes study of the aggregate and entity theories, partnership distributions and liquidations, dispositions of partnership interests, transactions concerning unrealized receivables and substantially appreciated inventory items and special basis adjustments. NOTE: This is a M.S. T. course.

ACC 551 and ACC 558 are prerequisites for this class.
ACC 564
TRANSACTIONS IN PROPERTY
Graduate
This course is concerned mainly with the federal income tax implications of gains and losses derived from sales and other dispositions of property. Emphasis will be given to the determination and recognition of gain or loss, character of gain or loss (capital or ordinary), basis and holding period. NOTE: This is a M.S.T. course.

ACC 551 and ACC 558 are prerequisites for this class.

ACC 565
TAX ACCOUNTING, PERIODS, AND METHODS
Graduate
This course deals with federal income tax planning as to determination of the proper periods for reporting income and deductions, overall methods of tax accounting and special elections available to taxpayers. Topics include the installment method, accounting method changes, accrual method, cash method, FIFO, LIFO and accounting periods. NOTE: This is a M.S.T. course.

ACC 551 is a prerequisite for this class.

ACC 566
FEDERAL INCOME TAX PROCEDURES
Graduate
A study of the procedures which must be followed when dealing with the Internal Revenue Service and possible alternative courses of action. Included are such topics as the organization of the Internal Revenue Service, filing requirements, refund claims, closing agreements, examination procedures, protests, assessment, payment and collection of tax, statute of limitations, interest and penalties. NOTE: This is a M.S.T. course.

ACC 551 is a prerequisite for this class.

ACC 567
INTERNATIONAL ASPECTS OF U.S. TAXATION
Graduate
This course covers the federal income taxation of United States persons investing or doing business outside the United States and nonresident aliens and foreign corporations having nexus with the United States. Topics covered include, among others, the foreign tax credit, Subpart F income, controlled foreign corporations, sourcing rules and expatriate taxation. NOTE: This is a M.S.T. course.

ACC 551 and ACC 558 are prerequisites for this class.

ACC 568
TAXATION OF CLOSELY HELD CORPORATIONS
Graduate
This course deals with federal income tax planning in connection with the accumulated earnings tax, personal holding companies, S corporations, multiple corporations, transactions between related parties and small business corporation stock. NOTE: This is a M.S.T. course.

ACC 558 is a prerequisite for this class.

ACC 569
CONCEPTS OF DEFERRED COMPENSATION
Graduate
The nature, purpose and operation of the various forms of deferred compensation are examined and evaluated: employee pension; profit sharing and stock bonus plans, stock options; executive compensation plans; retirement plans for self-employed individuals; other plans. NOTE: This is a M.S.T. course.

ACC 551 and ACC 558 are prerequisites for this class.
ACC 570
STATE AND LOCAL INCOME AND FRANCHISE TAXATION
Graduate
This course identifies and examines the types of income and capital stock taxes imposed on corporations and pass-through entities by state governments. Topics include nexus and the impact of P.L. 86-272, conformity to the Internal Revenue Code, business and nonbusiness income, methods of reporting, and allocation and apportionment. NOTE: This is a M.S.T. course.

ACC 551 and ACC 558 are prerequisites for this class.

ACC 571
ESTATE AND GIFT TAXATION
Graduate
This course consists of a detailed review of the federal estate and gift tax laws. In the area of estate taxation, assets included and deductions allowed are reviewed in detail by reference to law, regulations and cases. Recognition of gifts and gift tax deductions and exclusions are also covered. NOTE: This is a M.S.T. course.

ACC 551 and ACC 558 are prerequisites for this class.

ACC 572
CONCEPTS OF STATE PROPERTY AND TRANSACTION TAXATION
Graduate
This course focuses on concepts of property and sales taxation, but will survey other state and local transaction taxes, including excise taxes, utility taxes, fuel taxes and escheat statutes. Property tax concepts include distinctions between real and personal property and valuation approaches. NOTE: This is a M.S.T. course.

ACC 573
INCOME TAXATION OF ESTATES, TRUSTS AND DECEDENTS
Graduate
This course deals with federal income taxation of estates, trusts and decedents with special emphasis on such concepts as income in respect of a decedent and estate and trust distributions. Also, included are such topics as the income and deductions included in the decedent's final return, death of a partnership member, the income and deductions of estate and trusts, the throwback rule, grantor trusts and the tax ramifications of the use of other special trusts. NOTE: This is a M.S.T. course.

ACC 548 and ACC 571 are prerequisites for this class.

ACC 574
ESTATE PLANNING
Graduate
This course will deal primarily with how to avoid and minimize federal estate taxes and estate administration expenses upon the subsequent demise of the client. Therefore, the student must have taken the estate and gift taxation, the use of outright gifts, the use of trusts. Generation skipping transfers and charitable gifts will also be considered. NOTE: This is a M.S.T. course.

ACC 571 is a prerequisite for this class.

ACC 576
FEDERAL TAX VALUATION
Graduate
Fair market value is referenced hundreds of times in the Internal Revenue Code, and many more times in the Regulations. In the initial part of this course the procedures and methods applicable to tax valuation are reviewed to heighten practitioner awareness of the range of potential valuation outcomes, and the reasons therefore. Tax cases are used extensively to achieve this objective. In the second part of the course presentations and discussions address more specific topics such as built-in gains, determination of carryover of net operating losses, valuation aspects of charitable giving, conservation easements, ESOPs, family limited partnerships, reasonable compensation. S-corporations, special use properties, and transfer pricing.
ACC 580  
ACCOUNTING FOR INCOME TAXES  
Graduate  
Covers the financial accounting and reporting standards for the effects of income taxes that result from corporate activities. Topics include computation of current and deferred tax expense or benefit, temporary differences, carry-forwards, computation of deferred tax assets and liabilities, valuation allowances, business combinations, investments in subsidiaries and equity method investments, tax allocations, presentation and disclosure, and implementation of accounting for uncertainty in income taxes under FIN 48.

ACC 551 or admission to the MST or MACC programs are prerequisites for this course.

ACC 581  
TAXATION OF REAL ESTATE  
Graduate  
An in-depth study of federal income taxation as it relates to real estate, including current issues and planning possibilities. Topics include consequences of acquisition and disposition, real estate development, leasing, mortgages and other financing devices and forms of ownership of real estate. NOTE: This is a M.S.T. course.

ACC 563 is a prerequisite for this class.

ACC 582  
ADVANCED CONCEPTS IN INTERNATIONAL TAXATION  
Graduate  
This advanced course is a companion offering to the introductory international taxation course (Accountancy 567). In this course, planning issues and tax savings opportunities are emphasized in complex areas, including source of income considerations, foreign tax credit matters, Subpart F issues and the tax matters of foreign corporations. In addition, tax treaty matters, international bribes and boycott sanctions and foreign currency translation issues are addressed. NOTE: This is a M.S.T. course.

ACC 587 is a prerequisite for this class.

ACC 584  
INCOME TAX AND BUSINESS DECISIONS  
Graduate  
The study of the impact of federal income taxation on business decisions with emphasis on such areas as choice of business organization, acquisition planning, executive compensation & accounting for income taxes. This course is intended for students in the M.B.A. program and restricted to those who have not had undergraduate credit for ACC 548 or ACC 551 or their equivalents. (MSA students may not take this class)

Not Available to MST Students

ACC 591  
TAX EXEMPT ORGANIZATIONS  
Graduate  
Tax treatment of public charities and private foundations. The way exempt status is secured and retained, qualified exemptions, unrelated business income, the loss of exemption, prohibited transactions, deductibility of contributions and required reporting and auditing.

ACC 558 is a prerequisite for this class.

ACC 592  
OVERVIEW OF FEDERAL INCOME TAX FOR INDIVIDUALS  
Graduate  
This course introduces students to an overview of the Federal income tax system from a financial planning perspective. This course covers a review of the inclusions and exclusions from gross income, deductions therefrom in arriving at taxable income, and the characterization of transactions as capital or ordinary. The course will focus primarily on the taxation on individuals, with an emphasis on the impact of investments in the financial planning process.

Status as an MS-Taxation student is a prerequisite for this class.
ACC 593
OVERVIEW OF TRANSFER PLANNING FOR WEALTH MANAGEMENT
Graduate
This course introduces students to an overview of the transfer tax system from a financial planning perspective. The course will be divided into four areas of concentration: (1) transfer tax, (2) property law, (3) estate planning, and (4) insurance, charitable and retirement topics. The objective of the course is to analyze how each of the above areas of concentration impact the financial planning process.

ACC 500 is a prerequisite for this course.

ACC 594
FAMILY OFFICE AND MULTIGENERATIONAL PLANNING
Graduate
This course will involve a survey of the planning and structuring issues that high net worth families address when managing wealth for multiple generations. The course will be facilitated by one or two instructors who will direct eight different expert guest lecturers in the wealth management field. The topics include: introduction and review of federal wealth transfer tax concepts; generation-skipping transfer tax and structuring dynastic entities; charitable gifts and foundations utilized in large families; management and dispositions of family business and closely held entities; asset protection planning: domestic and international; international estate planning: offshore trusts and entities; creating and administering a family office; family governance, wealth education and private trust companies.

ACC 592 and ACC 593 are prerequisites for this class.

ACC 598
SEMINAR ON CURRENT PROBLEMS IN TAXATION
Graduate
Covers recent significant developments in the future of legislation, regulations, administrative rulings and case law on federal income, estate and gift taxation. Emphasis is placed on specific tax planning in light of these current developments. Topics are discussed against background of leading Supreme Court cases. Recommended as final tax course in M.S.T. program. Required course for all candidates for Master of Science in Taxation degree.

ACC 560, ACC 565 and ACC 566 and completion of 32 units of credit are prerequisites for this class.

ACC 635
PRINCIPLES OF FORENSIC ACCOUNTING
Graduate
This course will focus on fraud principles that relate to asset misappropriations, corruption and fraudulent financial statements. Emphasis will be on examination and review of major fraud schemes, investigative strategies and controls used to detect and prevent the impact fraud has on an organization.

ACC 636
INTERNAL AUDITING, CORPORATE GOVERNANCE AND INTERNAL CONTROL
Graduate
This course addresses the overall role that internal audit plays as a critical part of an organization's control and governance structure. The content of the course includes a case that incorporates the complete internal audit process for a hypothetical company, including identification of risk, planning, execution of fieldwork and reporting using CCH TeamMate software. This course covers the strategic role and operations of an internal audit function from three key perspectives; the Chief Audit Executive, who is responsible for the functions, the chair of the audit committee, who oversees the function, and the CEO or CFO who is responsible for the function within the organization. (Formerly ACC 536)

ACC 500 is a prerequisite for this course.

ACC 637
DATA MINING AND ANALYTICS
Graduate
The course will cover basic concepts, terminology, models and methods in the field of data mining. The auditing profession seeks to move toward CAATs, continuous auditing and continuous monitoring, which cover all or a large population of transactions rather than very limited sample sizes. The skills taught include data mining techniques such as traditional statistical analysis and machine learning. This course will illustrate the knowledge discovery process and how the technology works with sample applications of data mining. Students will analyze large datasets and develop modeling solutions to support decision making in accounting.

ACC 535 is a prerequisite for this course.
ACC 638
ADVANCED IT AUDITING
Graduate
This course prepares students to understand the sources of these risks and conduct IT audits by examining the key principles behind the auditing of IT processes, with a focus on gaining hands-on experience on analyzing and assessing IT risks and controls. The effective management of Information Technology (IT) assets in order to meet business objectives and of IT-related business risks is of critical importance to organizations today. The application of the COBIT framework and other professional IT audit standards is emphasized. In addition, this course aids in the preparation for the Certified Information Systems Auditor (CISA) exam.

ACC 500 is a prerequisite for this course.

ACC 639
ACCOUNTING INFORMATION SYSTEMS AND AUDITING
Graduate
This course builds on foundational knowledge of accounting information systems and internal auditing in order to develop advanced skills in these fields. In particular, heavy emphasis is placed on the use of hands-on projects and assignments that involve the learning and application of technologies and approaches similar to those used in professional practice. The course also introduces students to advanced and current topics at the intersection of accounting information systems and internal auditing.

ACC 535 is a prerequisite for this course.

ACC 640
ACCOUNTING THEORY AND POLICY FORMULATION
Graduate
A study of the process by which accounting policies are formulated. The students are asked to make critical evaluations of basic issues such as income determination and current issues such as FASB agenda items in light of their theoretical, empirical, practical and political aspects. Students are expected to demonstrate an ability to use the accounting research literature. Students should plan to take this capstone course at the end of their degree program. This course is intended to be taken toward the end of the MSA program.

ACC 545 and ACC 550, or MACC status are prerequisites for this class.

ACC 645
FORENSIC AND INVESTIGATIVE ACCOUNTING
Graduate
This course focuses on skills used to detect and investigate accounting-based fraud. The course covers interpersonal skills such as interviewing, reading people, handwriting analysis, discourse analysis and team building. It also includes technical skills such as recognizing the red flags of fraud in context, net worth analysis, and how the elements of fraud combine in an actual fraud. The course is delivered using hands-on experience in a case-based setting.

ACC 635 is a prerequisite for this course.

ACC 646
FORENSIC ACCOUNTING AND VALUATION
Graduate
This course focuses on financial statement fraud. Skills taught in this course include using financial statement analysis to detect fraud in financial statements, and valuation skills that can be used to value both public and private firms in cases of shareholder and partnership disputes, divorce cases etc. Finally, students are given a chance to use their skills to detect and investigate fraud within a company's financial statements.

ACC 635 is a prerequisite for this course.

ACC 690
GRADUATE INTERNSHIP
Graduate
Technical knowledge acquired in the classroom is applied in an actual business environment through varied assignments under supervision in industry, government or public accounting. Offered variably.
ACC 798
SPECIAL TOPICS
Graduate
Content and format of this course are variable. An in-depth study of current issues in accountancy. Subject matter will be indicated in class schedule. Offered variably.

ACC 799
INDEPENDENT STUDY
Graduate
Available for graduate students of demonstrated capability for intensive independent work in accountancy.

AHT 310
DIAGNOSTIC NUCLEAR IMAGING CLINICAL PRACTICUM I
Undergraduate
Supervised clinical education that gives the student the opportunity to perform a variety of patient procedures on both SPECT, SPECT/CT, PET and PET/CT imaging systems for all diagnostic, therapeutic, non-imaging in-vivo and in-vitro procedures. Clinical competencies developed in patient care, positioning techniques, analyzing images, and the selection of imaging parameters and collimators. Knowledge of integrated computer systems designed for use with clinical gamma cameras, Single Photon Emission Computed Tomography (SPECT), SPECT/CT, Positron Emission Tomography (PET), and PET/CT images. The clinical practicum is designed to promote independent critical thinking, balanced responsibility, organization and accountability in the student. Students will demonstrate competence in all procedures presented.

AHT 311
DIAGNOSTIC NUCLEAR IMAGING CLINICAL PRACTICUM II
Undergraduate
Supervised clinical education that gives the student the opportunity to perform a variety of patient procedures on both SPECT, SPECT/CT, PET and PET/CT imaging systems for all diagnostic, therapeutic, non-imaging in-vivo and in-vitro procedures. Clinical competencies developed in patient care, positioning techniques, analyzing images, and the selection of imaging parameters and collimators. Knowledge of integrated computer systems designed for use with clinical gamma cameras, Single Photon Emission Computed Tomography (SPECT), SPECT/CT, Positron Emission Tomography (PET), and PET/CT images. The clinical practicum is designed to promote independent critical thinking, balanced responsibility, organization and accountability in the student. Students will demonstrate competence in all procedures presented.

AHT 312
CLINICAL NUCLEAR MEDICINE PROCEDURES I
Undergraduate
Emphasis on theory and techniques of clinical procedures used in nuclear medicine imaging. Areas emphasized include patient care, developing acquisition parameters, imaging techniques, radionuclide identification, energies, half-lives, and principles of radionuclides in imaging and non-imaging procedures. Students will continue to develop an increased degree of competence in their performance of the skills related to critical thinking and problem solving.

AHT 313
CLINICAL NUCLEAR MEDICINE PROCEDURES II
Undergraduate
Emphasis on theory and techniques of clinical procedures used in nuclear medicine imaging. Areas emphasized include patient care, developing acquisition parameters, imaging techniques, radionuclide identification, energies, half-lives, and principles of radionuclides in imaging and non-imaging procedures. Students will continue to develop an increased degree of competence in their performance of the skills related to critical thinking and problem solving.

AHT 314
MANAGEMENT AND METHODS OF PATIENT CARE I
Undergraduate
Skills in problem solving, critical-thinking, and decision-making are developed as well as oral and written communication skills. Career skills are enhanced through the interview process, resume writing, and administrative duties including; budgeting, medical and legal considerations and political issues affecting health care. Special emphasis is placed on research methods, medical law and ethics, and scheduling guidelines. Focus on basic measures necessary to provide quality patient care. Basic principles of record keeping and maintaining confidentiality of information are explained.
AHT 315
MANAGEMENT AND METHODS OF PATIENT CARE II
Undergraduate
Skills in problem solving, critical-thinking, and decision-making are developed as well as oral and written communication skills. Career skills are enhanced through the interview process, resume writing, and administrative duties including budgeting, medical and legal considerations and political issues affecting health care. Special emphasis is placed on research methods, medical law and ethics, and scheduling guidelines. Focus on basic measures necessary to provide quality patient care. Basic principles of record keeping and maintaining confidentiality of information are explained. (2 quarter hours)

AHT 316
RADIATION BIOLOGY
Undergraduate
Knowledge of cell structure and function as a basis for understanding cellular and organ responses to the effects of ionizing radiation, radionuclides and radiation oncology. Understanding units of exposure, organ dose calculation and body distribution. (1 quarter hour)

AHT 317
MEDICAL TERMINOLOGY
Undergraduate
The medical terminology course consists of a study of root words, prefixes, and suffixes of medical vocabulary. Also included are medical abbreviations and applicable symbols. A combination of learning exercises and chapter quizzes are utilized. Emphasis is on application of terminology through the use of chapter objectives, learning exercises, and critical thinking exercises. As an independent study, students may choose to progress more rapidly than the assignment schedule outlines. (1 quarter hour)

AHT 321
MANAGEMENT AND METHODS PATIENT CARE
Undergraduate
Content is designed to provide the student with foundational concepts and competencies in assessment and evaluation of the patient for service delivery. Psychological and physical needs and factors affecting treatment outcome will be presented and examined. Students will also get a better understanding of how race, gender, physical ability, sexual orientation, spirituality, healing and dying, and age play a role in cultural competence. Routine and emergency care procedures will be presented. Course will also include an orientation to hyperthermia, chemotherapy, body mechanics, nutrition for cancer patients, and an overview of radiation therapy patient side effects. (2 quarter hours)

AHT 322
QUALITY MANAGEMENT
Undergraduate
Content is designed to focus on the evolution of quality management (QM) programs and continuing quality improvement in radiation oncology. Topics will include the need for quality assurance (QA) checks; QA of the clinical aspects and chart checks, film checks; the various types of evaluations and tests performed on simulators, megavoltage therapy equipment, and therapy planning units; the role of radiation therapists in quality management programs; legal and regulatory implications for maintaining appropriate guidelines; and the role computers and information systems serve within the radiation oncology department. (2 quarter hours)

AHT 323
CLINICAL PRACTICUM I
Undergraduate
The overall objective of this course is to aid the student in achieving basic level technical skills through supervised practice of radiation therapy procedures on actual patients. Students will be required to complete some ARRT required clinical competency examinations during this course. (2 quarter hours)

AHT 324
CLINICAL PRACTICUM II
Undergraduate
The overall objective of this course is to aid the student in achieving basic level technical skills through supervised practice of radiation therapy procedures on actual patients. This is a continuation of Clinical Practicum I. Students will be required to complete all remaining ARRT required clinical competency examinations during this course. (2 quarter hours)
AHT 325
INTRODUCTION TO RADIOLOGIC SCIENCES
Undergraduate
This course provides the student therapist with the technical aspects of radiography equipment. Discussion will include orientation to the function and operation of radiography equipment. (2 quarter hours)

AHT 326
RADIATION BIOLOGY
Undergraduate
This course introduces the student to the effects of ionizing radiation and chemotherapeutic agents on living tissue. Emphasis is placed on the concept of the therapeutic ratio and the manipulation of influencing factors in order to affect patient treatment outcomes. (3 quarter hours)

AHT 327
RADIATION SAFETY AND PROTECTION
Undergraduate
The purpose of this course is to educate students regarding institutional, state and federal regulations controlling the safe use and disposal of radiation-producing equipment and sources. Emphasis is placed on ALARA principles to define the health professional's legal and ethical responsibility to minimize radiation dose to co-workers and patients, and oneself. (3 quarter hours)

AHT 329
PATHOLOGY
Undergraduate
This course introduces the student to the field of pathology with an emphasis on the oncologic disease processes. Topics range from discussion of pathology from the cellular level through various organ systems. Students are introduced to terminology related to the field of pathology as a whole and to the subspecialty of oncology specifically. (3 quarter hours)

AHT 330
RADIATION SAFETY AND PROTECTION
Undergraduate
Supervised practice and procedures for the receipt, handling, transporting, storage, usage, record keeping, disposal and decontamination of radioactive materials. Emphasis on licensing and regulations set forth by local, state and federal agencies. Academic and clinical instruction to provide the student with radiation safety techniques to minimize exposure to the patient, public, fellow workers and themselves. Regulations regarding therapeutic dosages and follow-up procedures. Focus on practical mathematics in nuclear medicine including radiation unit conversion, dose conversion, dose calculation, determination of specific activity, decay, and half-life calculation, counting efficiency, and statistics. (3 quarter hours)

AHT 331
RADIATION DETECTION AND INSTRUMENTATION
Undergraduate
Evaluation, maintenance and function of instrumentation used in imaging and in the laboratory. Principles and theory of PET/CT and scintillation camera operation and performance. Radiation measurement, event counting activity, pulse height spectra, detection efficiency, resolving time and statistics. Flood field and bar phantom use for assessing camera uniformity, relative sensitivity, spatial linearity and resolution testing. Quality assurance procedures for the PET scanner include radial, tangential and axial resolution, sensitivity, linearity, uniformity, attenuation accuracy, scatter determination and dead time corrections. Knowledge of the operations and maintenance of computer hardware and software. Emphasis on data collection, analysis and processing used in clinical imaging. Application of computer devices and memory usage. Emphasis on SPECT, SPECT/CT, PET and PET/CT quality control procedures. (3 quarter hours)

AHT 332
RADIATION PHYSICS AND INSTRUMENTATION
Undergraduate
Theory and physical principles associated with atomic structure, nuclear and quantum physics related to radioactive decay. Properties of the elements and the production of characteristic x and gamma rays, anger electrons and Bremsstrahlung. Instruction on the modes of decay, radiation dosimetry, and interaction of ionizing radiation with matter. Basic physics, instrumentation, and radiochemistry of SPECT (Single Photon Emission Computed Tomography), SPECT/CT, Positron Emission Tomography (PET), and PET/CT. (3 quarter hours)
AHT 333
RADIONUCLIDE CHEMISTRY AND RADIOPHARMACY
Undergraduate
The chemical, physical and biological properties of radiopharmaceuticals used in diagnosis and therapy. Emphasis is given to the preparation, calculation, identification, administration, and disposal of radiopharmaceuticals. Performance of all radionuclide quality control and quality assurance procedures. Principles of decay and half-life, tissue localization, chemical impurities, generator systems, dose preparation and techniques of good laboratory practices and cell labeling. (3 quarter hours)

AHT 334
CLINICAL CORRELATION - PATHOLOGY
Undergraduate
Focus on the study of the structure and function of human cells, tissues, organs and systems. Clinical interpretation of organ systems with emphasis on immunology, and anatomy and physiology, which will provide a basis for understanding abnormal or pathological conditions as applied to nuclear medicine. Causes, symptoms, and treatments of disease are discussed as well as their effect on the images. In addition, the student is scheduled to observe the interpretation of images with the physician staff. (3 quarter hours)

AHT 335
COMPUTED TOMOGRAPHY AND CROSS-SECTIONAL ANATOMY
Undergraduate
Introduction to the fundamental concepts and principles of computed technology and its role in medical imaging. Specific topics include physics & instrumentation of CT scanning, image production, and cross-sectional anatomy of the head, neck, thorax, abdomen, and pelvis. Emphasis placed on patient considerations, patient safety, and radiation protection. (3 quarter hours)

AHT 341
RADIATION PHYSICS I
Undergraduate
Students are introduced to the principles and practice of applying ionizing radiation to the human body. Topics include discussion of radiation therapy equipment, including treatment units and computer planning systems with an emphasis on how this equipment is used to produce proper treatment planning and dose calculations, according to the radiation oncologist's prescription. Topics also include fundamental concepts of general physics and radiation physics, including the production of x-rays interactions with matter. (3 quarter hours)

AHT 342
RADIATION PHYSICS II
Undergraduate
Students are introduced to the principles and practice of applying ionizing radiation to the human body. Topics include discussion of radiation therapy equipment, including treatment units and computer planning systems with an emphasis on how this equipment is used to produce proper treatment planning and dose calculations, according to the radiation oncologist's prescription. Radiation protection and quality assurance will also be covered. This course is a continuation of Radiation Therapy Physics I. (3 quarter hours)

AHT 343
MEDICAL IMAGING AND PROCESSING
Undergraduate
Procedure for imaging human structure and their relevance to radiation therapy: topographical anatomy, radiographic and cross sectional anatomy. Identification of anatomic structures as demonstrated through various imaging modalities. (2 quarter hours)

AHT 344
OPERATION ISSUES IN RADIATION THERAPY
Undergraduate
Content is designed to focus on various allied health operational issues. Continuing Quality Improvement (CQI) project development, evaluation, and assessment techniques will be emphasized. Human resource issues and regulations impacting the radiation therapist will be examined. Accreditation agencies and the licensed practitioner's role in the accreditation process will be presented. Billing and reimbursement issues will be covered. (3 quarter hours)
AHT 345  
PRINCIPLES AND PRACTICE OF RADIATION THERAPY  
Undergraduate  
Content is designed to provide an overview of cancer and the specialty of radiation therapy. The medical, biological, and pathological aspect, as well as the physical and technical aspects, will be discussed. This course will also include content designed to provide the student with fundamental concepts, theories, and application of healthcare laws and ethical standards implemented and practiced in quality management for radiation therapy. Analysis of legal terminology, sources of law and the litigation process as applied to health professionals will be evaluated. (2 quarter hours)

AHT 346  
PRINCIPLE AND PRACTICE OF RADIATION THERAPY II  
Undergraduate  
This course is a continuation of principles and practice of radiation therapy I. Critical thinking and the basics of ethical and clinical decision making are fostered in the student. The epidemiology, etiology, detection, diagnosis, patient condition, treatment, and prognosis of neoplastic disease will be presented, discussed, and evaluated in the relationship to histology, anatomical site, and patterns of spread. The radiation therapist’s responsibility in the management of neoplastic disease will be examined and linked to the skills required to analyze complex issues and make informed decisions while appreciating the character of the profession. (2 quarter hours)

AHT 347  
TECHNICAL RADIATION ONCOLOGY  
Undergraduate  
This course provides the student therapist with the technical aspects of radiation therapy. Discussion will include orientation to the function and operation of radiation therapy equipment. The clinical lab component of this course provides a hands-on, sequential application, and clinical integration of concepts and theories in the radiation therapy clinic and the didactic portion of this course. Concepts of team practice, patient-centered and clinical practice will also be discussed. (2 quarter hours)

AHT 348  
TECHNICAL RADIATION ONCOLOGY  
Undergraduate  
This course is designed to focus on discussions of various treatment and simulation procedures of different pathologies. The lab component will continue to provide a hands-on, sequential application, and clinical integration of concepts and theories in the radiation therapy clinic. (3 quarter hours)

AI 102  
CORPORATIONS, RESPONSIBILITY, AND THE HOLIDAYS  
Undergraduate  
American corporations often promote large scale relief efforts for their communities around the time of the December holidays. What motivates these efforts? Who benefits? Are corporations really responsible for the communities in which they do business? How can individuals participate in these efforts? In this course, students will examine contemporary theories of social ethics, and will apply them to the corporations we create, staff, and support. Students will also consider their individual roles in community relief efforts. (2 quarter hours)

AI 103  
LEADERSHIP AND APPLIED ETHICS  
Undergraduate  
This course explores a range of ethical issues that students will face in their ministries and the moral principles they can apply to those issues. It will examine the ethical responsibilities and challenges of good professional practice for those serving in ministry today. It will discuss ethical issues that arise in the leadership or management of congregations, communities and organizations. It will examine areas of social ethics that are particularly relevant to their African context. In this course, students will study the distinctive assumptions, methods and applications of different ethical systems drawn from traditions such as Christianity, Islam, and African traditional religion. Each student will design and complete an independent learning project for their Focus Area in which they will address an ethical issue they are likely to face in their future ministry. Through this course, therefore, students will develop and demonstrate their competence to analyze a problem using two different ethical systems and to apply the skills of ethical analysis to ministry. (2-4 quarter hours)
AI 104
LEADERSHIP AND CREATIVITY
Undergraduate
Creative leaders recognize and express dimensions of the world and society that are often overlooked by others. They are able to respond effectively to new challenges and opportunities in their personal lives and in society. Artists, performers and creators have an essential vocation that enriches the whole community. In this course, students will expand their appreciation for the importance of creativity. They will look at how the arts provide a unique way to understand and interact with culture. They will study the arts in an African context. They will engage in creative activity or performance and reflect on these experiences. They will also explore ways in which they can be more creative in their lives and ministries. Through this course, therefore, students will develop and demonstrate their competence to define and analyze a creative process and to create an original work of art, explore its relationship to artistic form, and reflect on the creative process. (2-4 quarter hours)

AI 105
VISUAL LITERACY AND CHICAGO'S MUSEUM OF CONTEMPORARY ART
Undergraduate
Have you ever been confused by the intentions of an artist or at a loss for words when trying to describe a work of art? How many times have you walked through a museum and while looking at a work of art said to yourself, "I could do that?" This course will introduce a series of skills ranging from simple identification to complex interpretation that will help us read both images and text and find meaning in a variety of contemporary art forms, from painting to sculpture, and photography to installation. The course will focus on the cultural, moral, and aesthetic value of art exhibited in Chicago's Museum of Contemporary Art (MCA) present and past exhibitions. Art making activities will occur throughout the course to help us explore visual literacy through expressing thoughts and ideas in visual form. Throughout the course students will maintain a visual journal based upon some of the following activities: museum visits, classroom discussions, outside observations, and art making experiences. A culminating project will investigate a specific cultural, aesthetic, or moral topic that has been addressed by a contemporary artist. (2 quarter hours)

AI 106
THE RESISTERS: LATINA QUEST FOR JUSTICE
Undergraduate
This course will introduce students to the issues of violence, oppression and abuse in the lives of U.S. Latinas, here after referred to as Latinas, and in Latin American women's lives with, for comparison purpose, consideration of the same issues as regards non-Latina women in the U.S. The course will look at the different types of violence, oppression and abuse these women experience as well as the factors that contribute to the situation, such as harmful traditions, discrimination, religion, politics, sexism and war. These factors will be reviewed and analyzed in order to have a better understanding of how they directly affect their lives and contribute to the violence, abuse and oppression they endure. Students will become familiar with the many ways of resistance expressed by Latinas and Latin American women. Because defiance has been demonstrated in various forms, students will therefore be introduced to Latina and Latin American female writers, journalists, artists and activist, who have resisted violence, abuse and oppression and, in their own way, have changed the culture that perpetrates the hostile behavior. Students will learn about women such as Guatemalan Noble Peace Prize winner Rigoberta Menchu, Mexican journalist Lydia Cacho, and Latina writers Gloria Anzaldúa and Cheri Moraga, just to name a few. Students will be introduced to local resisters, as well. Students will also be encouraged to draw connections between their own experiences and that of the women about whom they will be studying. Finally, students will have an opportunity to compare and contrast methods of resistance that exists between these women and women in the U.S. who do not identify as Latinas. (2 quarter hours)

AI 107
INTRODUCTION TO BUDDHIST MINDFULNESS MEDITATION
Undergraduate
In this course, you will be introduced to theories and practices of mindfulness meditation from the Buddhist tradition. We will explore in particular how mindfulness meditation can enhance creativity, address the ethical challenges of contemporary life, and foster collaborative learning. Class sessions will involve extensive practice in mindfulness meditation, listening and dialogue. You will be expected to maintain and reflect on a daily mindfulness meditation practice for the duration of the course. While the approach to mindfulness meditation we will use in this class is rooted in Buddhist philosophies of the mind, it does not require religious or spiritual interpretations.
Today, world politics is making an unpredictable turn and undergoing an historical transition. International relations in the 21st century are more complex and facing more pressing global challenges than the previous century. While the Western nations have enjoyed unparalleled prosperity in recent years, developing nations, mired in debt, burdened in poverty, riddled with diseases ranging from malaria to AIDS, plagued by wars and genocide, are struggling to overcome crisis. This course will examine the role of nation-states, international organizations like the United Nations, international law, international crimes court, treaties, and root causes and functions of war and peace in the making of foreign policies that have shaped and reshaped the relationships among nations. We will also focus on ethics in the context of a number of issues and practices in international relations ranging from global inequality, the promotion of human rights, foreign aid, immigration/forced deportation, humanitarian intervention, to terrorism, genocide, war crimes, and the use of torture. Bridge Course. Can be taken for up to 3 competences. (2-6 quarter hours)

Students will examine issues of discrimination and bias as we analyze several contemporary essays, speeches, short works of fiction, non-fiction, film, music and art. Among others, students will review some of the works of Martin Luther King, Jr., Abraham Lincoln, Cesar Chavez, Harvey Milk, Gloria Steinem, Malcolm X and Ernesto “Che” Guevara as a means to understand how certain groups attain power over other groups and how/why inequalities and injustice begin and persist. Students will work on several small group and collaborative assignments that will help them explore their own biases and those of others, and propose solutions. In addition, this course will give students the opportunity to learn about and practice several types of writing including journals, essays and a short research paper. These assignments will also help students develop critical reading and analysis skills. This class assumes a basic understanding of grammar and composition. Students should expect to write and rewrite extensively. Can be taken for up to 3 competences. (2-6 quarter hours)

During this course, we will read about and listen to this musical heritage of Black Americans; this will include the origins of Blues in African music, the development of Blues in the US, and the fusion of Blues with various musics of Asia. We will hear musical examples from the text, as well as musical examples from the instructor's personal library which will enhance our understanding of the importance of Blues and its culture in our present society. (2 quarter hours)

Nations across the globe provide their citizens with subsidized health care. In the contemporary political climate, many people are clamoring for the United States to do the same. What are the issues that define this decision? Does national health care work? Do we deserve subsidized health care? Who benefits? Who doesn't? What will it cost? In this course, students will examine the notions of providing health care from philosophical, financial and social perspectives. Students should expect to walk away from this experience with facts, figures, and ideas that will help them make up their own minds about the American health care dilemma. Can only be taken for one competence. (2 quarter hours)

This is a course of active learning that requires a student to speak basic Chinese, explore the origin of Chinese characters, paint with brushes, and meditate in motion through Tai Chi. It introduces the fundamental structure of Chinese pronunciation and explores methods and techniques for English speakers to memorize the sound of Chinese words. By introducing students to the pictographic nature of Chinese characters, it engages students in a process of learning through visualizing the “image” of Chinese characters. In addition to language and culture exploration, students will be introduced to the Chinese philosophy of Yin Yang balance and apply it through their practice of Tai Chi, an ancient form of Chinese martial art for strengthening and relaxation of both body and mind. Can only be taken for one competence. (2 quarter hours)
AI 113
URBAN COMMUNITY ETHICS
Undergraduate
Students will explore the ethical choices made by individuals, institutions, and communities as they make crucial decisions about who is and is not included in the new communities resulting from urban development. Issues of race, age, gender, national origin, religion, social class and other power relations or forms of exclusion are explicit and implicit considerations in the community development planning process. Particular emphasis will be placed on the values and visions of persons living in urban neighborhoods and how their values compare to the values of government agencies or private firms involved in planning the fate and future of neighborhoods. (2 quarter hours)

AI 115
THE CULTURE OF CHRISTMAS
Undergraduate
This course will use examples of contemporary writing and popular art as our windows into the changes to 19th century Christmas Culture. We look at the influx of immigrant Christmas tradition (both in terms of religious and national origin practices that provided the rich selection of cultural choices. We look at the social setting of the wealthy vs. the poor and the urban dweller vs. the settler to see how these affected Christmas practices. (2 quarter hours)

AI 116
BEING THERE: ADULT EXPERIENCE IN COMMUNITY ENGAGEMENT
Undergraduate
What are the various ways of becoming engaged in one's wider community, and how can we examine this experience fully? How can we use ethical systems to approach the human community through service, and what are the possible outcomes (known and unknown)? Students in this course develop a plan for active engagement with one or more areas of social life, and articulate a set of experiential outcomes to foster the shape of this commitment. Classroom and experiential, ?hands-on? learning are combined to provide a multi-layered ground for reflective thinking. Using writing and other forms of documentation, we work to connect past and present learning in this area. Special focus on models of human development to assist us in learning how to create a future securely rooted in engagement with diverse areas of the human community. (2 quarter hours)

AI 117
FAST FICTION WRITING WORKSHOP
Undergraduate
Ursula LeGuin, the award winning author of Steering the Craft, begins her first chapter with this sentence: ?The sound of the language is where it all begins and what it all comes back to? (19). In this course, students will learn how listen to each other?s creative writing with a discerning, and respectful, ear. Following a standard workshop guide developed by Victoria Hudson, and drawing from exercises by LeGuin and Robert Olen Butler, we?ll journey with each other as we ?craft our fiction.? This creative writing course is ideal for students who already have creative writing (short, flash fiction, or excerpts from longer work) to workshop; for students who have completed a month of fiction writing and want to start polishing that work; and, for those who are seasoned in and appreciate the collaborative writing environment a short fiction-writing workshop can offer. At the end of the course, students will create Digication portfolios to showcase their revised work. (2 quarter hours)

AI 121
ART AND MEMORY: SCRAPBOOKING
Undergraduate
Art is appreciated in various forms. In homes all over America, dining room tables are filled with tiny metal hearts, pictures of adorable toddlers, bags of stickers, and 500 varieties of lettering. Scrapbooking is one of the nation's fastest growing artistic leisure time activities. Millions of dollars are invested in this peculiar pastime that focuses on not only recording family events, but making them pretty as well. Most of us do not consider ourselves artists, but give us a pair of scissors and some fancy paper and we will create an artistic masterpiece! Students in this experience will learn about the history of scrapbooks and will begin the process of decoding the relationships of creativity, art, and craft in this pursuit that is sweeping the nation. Topics will include the definition of scrapbooking and its development in American culture; the ways in which art and craft intersect in the scrapbook; how to get started with a scrapbook; the nature of creativity and its impact in scrapbooking; and the construction of meaningful works of art and craft. This course will meet on campus and online via D2L. (2-4 quarter hours)
AI 142
**IMAGES OF ETHNICITY: FAMILY STORIES AND PUBLIC PERCEPTIONS**
*Undergraduate*
Students will examine the history of their own family against the backdrop of their ethnic and social identities as they understand it and how those identities are viewed by others. To do this we will gather genealogical information, visual images (family photographs, newspaper or magazine articles, possibly drawings), oral history (interviews with family members) which reflect both the particulars of your family and the forces behind cultural preservation and the pressures to assimilate. Personal investigations will be integrated with original research from local ethnic museums and institutions, the Chicago History Museum and other web-based archives. Access to Ancestry.com's vast database will be included with this class. This research will provide context for your tribe's experiences in Chicago, called "the most ethnically aware city in America." (2 quarter hours)

AI 143
**ROOTED IN THE CITY: WRITERS & WRITING IN CHICAGO**
*Undergraduate*
Who are the writers rooted in Chicago? What were and are their concerns, themes, styles? How can they teach us about the city, but also about writing? In this class, students will read, discuss and write about work written by such Chicago writers as Nelson Algren, Gwendolyn Brooks, Stuart Dybek, Sandra Cisneros, Studs Terkel, Marc Smith, and Mike Royko. We will consider the nature of civic engagement and creativity in the literary arts, as well as pay close attention to the formal elements of the poems, short stories, and essays read in this class. We'll also explore how these texts compel us to think about power and its circulation in cultural as well as social contexts. (2-4 quarter hours)

AI 144
**INTRODUCTION TO AMERICAN ART AND ARCHITECTURE**
*Undergraduate*
This course will introduce students to the cultural heritage of a nation built on ethnic diversity. From its early European roots to a nation known as a leader in the contemporary art world, this course will examine significant works that have established themselves as representatives of the various periods in American art and culture. Selected works from the Colonial Period, Federal Period, Early Modernist and Postwar Modernist Periods will be introduced. Artists such as Samuel F.B. Morse, John Singleton Copley, John Singer Sargent and Jackson Pollock as well as architects such as Frank Lloyd Wright and Luis Sullivan will be introduced. (2-4 quarter hours)

AI 145
**DOCUMENTARY FILM**
*Undergraduate*
Since the invention of the camera, people have used it to document and preserve a moment in history, and to reveal the tragedies and delights of the world around us. Enthusiasm for documentaries has grown tremendously in recent years, achieving a relevancy and popularity that would have been hard to imagine not long ago. This course is intended as an introduction to the documentary form while exploring its relationship to society. Each class session consists of lecture, film screenings, and discussion. Works screened survey the history and range of documentary expression including the classics, as well as examples of challenging work by independent film and videomakers. Along with a consideration of their artistic style, structure and subject content, we will explore the social and political relevance of the films and attempt to assess their historical impact. This course challenges students to develop a critical eye, and to deepen their appreciation of the documentary vision. (2-4 quarter hours)

AI 146
**IMAGISM AND POETIC VISION IN PLAYWRITING**
*Undergraduate*
In this course, students will be inspired to write from within, from the depth of their core. The course will take students on a journey into a world where they will comprehend the incomprehensible, and hear the inaudible. Students will present their intellectual and emotional complexities through words. The result of the journey is a liberation from the limitations of time and space. Through introspective exercises, students will gain an aesthetic appreciation of life. The course will focus on the intensive writing and reading of plays. (2-4 quarter hours)

AI 147
**ETHICS: HOW GOOD PEOPLE MAKE TOUGH CHOICES**
*Undergraduate*
Through life's many lessons, we have learned how to make a decision between what is the right thing to do and what is simply wrong. We can differentiate between good and evil, truth and lies, etc. However, most of our dilemmas do not stem from deciding the correct path, when we are faced with right and wrong decisions. What most often puts us into a quandary is deciding between what is right and what is right. In other words when good people are faced with tough choices, on what basis do they make their decisions? In an era of perceived ethical incertitude and moral skepticism, students will examine how decisions are made based on one of many ethical systems. Students will learn about various ethical systems, and ethicists, such as utilitarianism, deontology, Kant, Aristotle, and Gillian, just to name a few. By the end of the course students should be able to apply their knowledge of moral, ethical and social issues, and have a better understanding of how the tough decisions they make could impact others. (2-4 quarter hours)
AI 148  HOW TO BE A CULTURAL ACTIVIST  
Undergraduate  
Freedom of expression vs. censorship. The artist as agent of change or entertainer of the privileged. Intellectual property vs. freeware. The Slow Food movement vs. Globalization. Teaching evolution or creationism. Public education vs. home schooling. These are just a few of the controversies that swirl around the arena of American culture. There are many groups working to preserve the widest access to the arts, culture and means of expression. This course has a definite point of view: which is that creativity is an essential component of a vital democracy. If you believe that creativity should be a national value and national priority - then this course will show you several ways to translate your concern into meaningful action. During this course students will be given an introduction to community organizing strategies and tactics and will be exposed to a number of cultural policy controversies and the key players who are working to make a difference in those areas. We will hear firsthand from cultural activists and learn how to be effective organizers for cultural democracy. This class will combine readings, class exploration and an out-of-class research project where students will pick a cultural cause that is meaningful to them and organize a small event or action around that issue. (2-4 quarter hours)

AI 149  CHINA/TIBET: VANISHING CULTURES  
Undergraduate  
China is the world's fastest growing economy. While economic benefits of its rapid development are clear, what risks are involved in such rapid cultural change? What happens when ancient traditional cultures are devastated by hasty development? What is the human cost of such losses? This course asks students to consider these questions as they encounter regions in China that recent economic development has not yet completely altered from their traditional state. Students will gain valuable understandings of religion, art, history and culture by engaging with present day China while unraveling its rich and complex past. Through visits to cultural centers and interactions with local people, we will experience ethnic minorities in the Kunming area of Yunnan Province, attend a major cultural festival in Ulan Bator, Mongolia, and end the journey with a train ride on the Trans Siberian Railway across the Great Wall into Beijing. (2-4 quarter hours)

AI 150  IRANIAN WOMEN WRITERS AND FILMMAKERS  
Undergraduate  
In this course, students will read the fiction of Iranian women authors and watch films by women directors, who have confronted the censorship, by creating new ways of resistance. Students will respond to these works and research, discuss and reflect upon the social, political and gender context. They will be required to give an oral report on an author or a film of choice, or a written essay. (2-4 quarter hours)

AI 151  EXPERIMENTAL PLAYWRITING  
Undergraduate  
The art of seeing has to be learned. In this course, students will explore the possibilities of looking at things differently. By the new way of seeing, they will have a chance to root and challenge BODY, DREAMS, and DEATH in order to find freedom, joy and life. The new language will be born by listening to the mysterious language and music of our body and dreams. The course will focus our body and our desires, and journeying into the origin of words, in order to challenge the old for the new. Students will write many exercises, read works by playwrights such as Helene Cixous and Marguerite Duras, and compose short dramatic pieces of their own. (2-4 quarter hours)

AI 152  EXPLORING THE ART MUSEUM  
Undergraduate  
Museums have been a respected and trusted measurement of artistic accomplishment. In this course, the student will examine the museum's role as collector, conservator and educator. The student will investigate the traditional role of the art museum, its collection, practices and programs as well as its efforts to integrate new media into its collection. The course also investigates repatriation, which is the ownership of ancient and cultural heritage and other issues that affect the museum such as censorship and funding. Finally it will look at how we value art as a commercial commodity. (2-4 quarter hours)

AI 153  THE ART OF SPEECHMAKING  
Undergraduate  
In our class, students will use tools based in the imagination, principles of design, and standard dramatic practice to create a unique, personal experience for an audience. The criteria for success is established through an examination of and critique of the content goals. (2-4 quarter hours)Speech, whether we call it dramatic or declamatory, has the potential to move the masses. In this course, our students will discover their personal approaches and attributes, and construct effective presentations that harness the power of their voice and body.
AI 154
BANKS AS PATRONS OF THE ARTS
Undergraduate
In Banks as Patrons of the Arts, students will consider the larger role of banks and other corporation with respect to community, especially as provider, preserver, and procurator of the visual arts. Throughout history, banks have led the way in the commissioning, procurement, and dissemination of works of art. Money, power, spirituality and aesthetics have been important elements in the preservation of art in various cultures. The focus of this course is this dilemma. Who creates visual images? Who preserves them? How does the public come to know of them and appreciate them? Where does the corporation fit in this puzzle? How has this question been handled in history? Must commerce and aesthetics be opposed? Do powerful organizations such as banks have a responsibility to develop and protect our visual heritage? Is there a middle ground where beauty and profit can coexist? (2-74 quarter hours)

AI 155
ANALYZING LEADERSHIP
Undergraduate
This course provides a framework from which to identify and analyze 'leadership. Leadership occurs in all aspects of life, including: business, politics, sports, society, religion, family, education, and culture. But what is leadership? The Merriam-Webster on-line dictionary defines leadership as "the act or an instance of leading," which provides us with little insight. On further investigation, however, the dictionary defines "lead" as [guide] on a way especially by going in advance. Where there is a leader, then, someone or something must follow. This course first explores the interrelationship between a leader and his or her followers and looks at the effect they have on each other. "Good" leadership traits (i.e., effective) and "bad" leadership traits (i.e., ineffective) are then studied from the perspectives of the leaders, the followers, and outsiders. Finally, this course takes a look at leadership from an international perspective. (2-4 quarter hours)

AI 156
FILM COMEDY, AMERICAN STYLE
Undergraduate
Since the beginning of cinema, movies have made audiences laugh, and comedy is still the most prevalent film genre around the world. What were the earliest movie comedies like, and has film comedy gotten more "sophisticated"? Is comedy universal (does everyone laugh at the same things)? What lies beneath laughter? What does it mean for something to be funny? What forms of comedy lend themselves particularly well to movies? Do great movie clowns (e.g. Charlie Chaplin, Mae West, and Jim Carrey) or great comedy directors have anything in common? This course investigates film comedy from these various perspectives, based on American films ranging historically over the 20th century, and on readings from film critics, psychologists, and philosophers. Students who complete this course will have a good working knowledge of American film comedy-its history, its status as a genre, its social and psychological functions, and some of its landmark films and creators. Through readings, writing assignments, and lecture-discussions, students will also become conversant in a few key theories of comedy, and begin to consider them in the context of films. (2-4 quarter hours)

AI 157
ENGLAND: CATHEDRALS, A Pilgrimage
Undergraduate
The inspiration and faith which combined to produce the magnificent cathedrals in England are worthy subjects of study for students of art, history, architecture and religion. This Spring Break study abroad course brings students to some of the most important cathedrals in the world to provide opportunities for such important study. On this program, participants will gain valuable understandings of religion, art, and culture as they simultaneously engage with present day British culture and attempt to unravel its rich and complex past. SNL Students must register for three to four competencies between the two quarters. For more information, please visit the study abroad website or contact the instructor. (2-6 quarter hours)

AI 158
A HISTORY OF PHOTOGRAPHY: CULTURAL RECORDS AND ARTISTIC EXPRESSIONS
Undergraduate
Photography is used for documentation, communication, persuasion and industry. We will pursue three goals. First, we will become familiar with the technical history of photography. Second, we will become acquainted with those photographs deemed most important. Third, we will come to know the major players, the photographers and their critics. We will show progress in reaching these goals mainly through analyses of the individual photographs found in the Image Reading Assignments (the IRAs). Assigned readings in the required text, course packet and books placed on reserve will supply the concepts, background information, examples of photographs (and of critical writing methodologies). The readings will be discussed in class and further examples (slide examples) will be provided. This class will present chronologically the development of the photograph, the technology and how we came to use it, and how it consumes us. We will study the great "cannon" of images enshrined in historical archives and art museums. We will also examine our dependency on pictures made with cameras. True projections of the world should be regarded given how their placement with words and how they are sequenced can alter their meaning. Long before the manipulations of Adobe PhotoShop people could lie with photographs. But they can also express metaphorically many truths, reinforced or new to the viewer, beyond the physical light that entered the lens. Is photography also an art? If it is what makes it so? The juncture of art, industry, persuasion, and record making is complicated, their boundaries overlap. For A2D students, this will be investigated through making original photographs as well. (2-4 quarter hours)
AI 159
UNDERSTANDING THE WORLD'S GREAT MOVIES
Undergraduate
Cinema is a communication mode that warrants our attention. Through examination of great international artists and their films, much can be learned about cultures with which we are not familiar. Since our experience of film is mediated by our own experience and by our own curiosity about its creator, during this course our attention will focus not only on film as an artistic expression, but on the experiences of the director, and the circumstances that caused her/his films to be created. Most class time will be spent on viewing and discussing a film; preparation for each class will necessitate background knowledge and film analysis by the learner. Throughout this course the learner will become familiar with internationally known film directors, their works, and the historical background that inspired them to produce their art. (2-4 quarter hours)

AI 160
IT'S ONLY ROCK AND ROLL: MAKING MUSIC THE OLD FASHIONED WAY
Undergraduate
For many, music is an integral part of everyday life. It is also deeply ingrained in most cultures. Music is used by individuals, businesses and societies to entertain, soothe, excite, and arouse. Music is basically a series or combination of pleasing sounds but how is music made? How do we know what is pleasing and what is not? The answers to these questions and others demonstrate that music is also a field where science and art meet. In this class, we will explore how sound is physically created and how specific sounds have been turned into music over the centuries. Through experimentation, we will examine the physical and mathematical properties of sound and musical instruments. We will also create simple musical instruments and share the experience of creating musical pieces. No musical experience is needed to take this class. (2-4 quarter hours)

AI 161
EXPLORING THE CULTURE OF ADOLESCENT MUSIC
Undergraduate
Adolescents have chosen their own music to listen to for many generations, and those decisions have affected their own children's and grandchildren's musical choices. Teenagers often listen to the same music as their peers, but why? And is this always the case? In this course we will explore, compare, and differentiate social and other factors that mold teenagers' musical decisions. What are their thought processes when they choose music? Are they always trying to be rebellious toward their parents or society in general? Are they simply seeking individuality? Is 21st century adolescents' music any more distasteful than adolescents' music from earlier decades? How has technology and the social media impacted teenagers' music choices and enabled greater musical autonomy? Through listening exercises, discussions, and readings, we will describe and analyze our own musical tastes in the context of our own adolescence in an attempt to better understand teenagers' choices in music from various time periods and what choices might look like for future adolescents. We will develop a broader perspective on how and why various cultures appeal to adolescents. In a final project you will analyze and present on an aspect of adolescent music culture which will include a creative component such as a mix of audio samples illustrating your analysis. (2-4 quarter hours)

AI 162
THE GOSPEL OF LUKE
Undergraduate
What is the role of compassion and of justice in American society? How can the New Testament help Americans to interpret their responsibilities in an economy that is marked by increasing inequalities of reward and risk? Hundreds of millions of Christians hear readings from the Gospel of Luke when they go to church on Sundays. Other Christians attempt individually and in small groups to relate Luke's Gospel to the social, economic, political, and spiritual realities of their lives. This five-session course will provide conceptual tools for understanding this Gospel and for applying its message to today's challenges. Can only be taken for one competence. (2-4 quarter hours)

AI 163
BEYOND THE PEARLY GATES: FACING DEATH IN THE MODERN WORLD
Undergraduate
As part of being an adult we encounter death all around us. It is one of the only guarantees in life after taxes. How to accept it or deny it is what this course will address. One view that we will explore is one which comes out of our religious belief systems. The other view we will look at comes out of our need, as humans living in an economy driven western world, to measure the cost benefits of choosing life over death. By exploring issues of great debate such as abortion, mercy killing, self defense, just war, and others, we will use the topic of death to identify and analyze how we make ethical decisions in life. Five session course. May only be taken for one competence. (2-4 quarter hours)

AI 164
CREATIVITY
Undergraduate
What is creativity? Where does it come from? Do we all have it? Can we cultivate it? These questions and more will be explored as we define the concept of creativity; identify, analyze, and describe the components of a creative process in varied fields; and, explain how engaging in a creative process affects our perception of the world. (2-4 quarter hours)
AI 165
PRAIRIE CHRISTMAS
Undergraduate
This class will feature a participative look back at Christmas in America in the 19th century (primarily) in the Chicago area. Five three-block class hours will lead students through a discussion of 19th century Christmas tradition. The class will be channeled through some lecture and discussion, though the focus will be on making Christmas decorations and gifts of the period. The class will decorate a communal tree, create a Christmas annual and make small gifts. The annual will be comprised of short Christmas writings from class participants. The course will examine how traditions are changed over time. May be taken for only one competence. (2 quarter hours)

AI 166
PRODUCING THE LIVE PERFORMING ARTS EVENT
Undergraduate
This class will transform itself into a mini-production unit and actually produce a live event for the general public. The class will learn the basics of producing a live event, including planning, casting, production logistics, publicity, sponsorship, and audience development. The class will choose what it wants to produce, and then it's nine weeks to opening night! (2-4 quarter hours)

AI 167
DIGITAL PHOTOGRAPHY
Undergraduate
Students learn in this course to take artistic digital photos. They will analyze photos they have taken prior to the course and discuss if they fulfill criteria to be seen as art. Several theories of artistic expression will be discussed. Rules of composition, light, exposure, colors, etc. will be reflected upon. In a second step the students will develop the competence to alter their digital photos with a program like "Photoshop Elements". They will be able to change the expression of their photos and combine different shots, creating their personal piece of art. As a final product, students will create a portfolio with about 5 photos including detailed descriptions of their work. (2-4 quarter hours)

AI 168
ART AND MEMORY SCRAPBOOKING II: THE ART JOURNAL
Undergraduate
This is the second course on the art and craft of scrapbooking offered in the SNL curriculum. This course focuses on a specific aspect of the scrapbooker's art, the production of embellished personal diaries. Throughout this experience, students will critically examine the artistic aspects of journaling and collage artwork, investigate movements in the art world, chronicle events in their lives through photographs and narrative, and create works of art and craft that illustrate the experience. This is a hands on art making course. While faculty will discuss various techniques and information about assessing works of art and putting them in the context of art movements, students should expect to be introduced to art making materials and use them during class time. (2-4 quarter hours)

AI 169
ETHICS, LAW AND JUSTICE
Undergraduate
We will first assess and discuss two Platonic dialogues in a collective effort to familiarize ourselves with the interplay between reason and ethical questions. We will pay particular attention to Plato's method of reaching conclusions to questions raised in the dialogues, whether and how those conclusions are ethical in nature, and the relative success Plato has in supporting his conclusions. Concepts discussed include the attainment of virtue, whether virtue or knowledge is teachable, the use of persuasion, and statesmanship. We will then apply our familiarity with logical inquiry to a group of United States legal cases, and focus our attention on understanding the reasoning that underpins decisions encompassing Fourteenth Amendment due process and equal protection issues. We will look particularly at how our Supreme Court Justices employ reasoning to reach conclusions of law that many view as de facto moral issues. In addition, during the course of the class, we will assess a variety of historical, political, and literary readings with the hope that they may enhance our understanding of the concepts of liberty and equality. (2-4 quarter hours)

AI 170
CREATIVITY AND ENTREPRENEURSHIP
Undergraduate
IPads. Smart Phones. The automobile. These inventions, once unknown and now taken for granted, required years of imagining, experimentation and innovative thinking. While we value the end product, we are often uncomfortable with the creative/creating process. This process of imagining, conceptualizing and articulating the new? requires skills we often label "creative". This class will explore the role of creativity in the development of entrepreneurial skills and the entrepreneurial personality. Creativity in this course will be seen both as a learned skill and as an exploration of our intuition. Contemporary ideas about creativity are often tied to images of the past - from mad scientists to mystical muses. But modern science tells us something else about the creative mind. This course will explore contemporary approaches to the creative process based on the human capacity to imagine, to explore and, ultimately, to create. These are core skills for anyone pursuing a career as an entrepreneur or simply in search of ways to explore innovation. (2-4 quarter hours)
AI 171
EXPLORATIONS IN INTERNATIONAL CINEMA: ISSUES OF CULTURE AND DIVERSITY
Undergraduate
This class offers students a chance to examine and critique outstanding films from a wide variety of cultures. The learning experience and critique will focus on acting, design and direction in addition to the cultural and social issues explored in the films. Students will be asked to enhance each other’s knowledge about the artistic and technical aspects of the films as well as the themes in global culture they examine. (2-4 quarter hours)

AI 172
MAKING POEMS: AN INTRODUCTION TO VERSE
Undergraduate
Making poems will be a creative writing offering that teaches metrics and verse forms, poetry the old-fashioned way. Topics will include metric feet, rhyme, lines, and verse forms. For example, students will learn about the iambic foot, write some iambic lines of various lengths, and finally use the iambic line to write a sonnet. Rap poetry with its structured rhythms and elaborate rhyming is another possibility. This “formalist” approach promotes a kind of creativity that is strongly infused with craft and discipline in contrast to the “spoken word” or confessional approaches to making poems. This class involves making audio recordings of your poems; students will be required to purchase a headset/microphone and download and install free software. (2-4 quarter hours)

AI 173
WESTERN FILMS
Undergraduate
Interested in learning to write about film? The Western is a particularly creative and powerful medium for exploring dynamic social and cultural issues. It is particularly open to examining the nature of creative expression, social and historical contexts, and power relations among different groups. The Western provides wonderful and exciting topics for learning about the arts of analyzing and writing about film. We are going to saddle up and ride out, approaching the Western from viewpoints of how one can write about film, exploring various rich issues of creativity, society, history and power. Possible examples of films are High Noon (1952), Shane (1953), Sergeant Rutledge (1960), Cheyenne Autumn (1964), Valdez is Coming (1971), Pale Horse, Pale Rider (1985), Unforgiven (1992). (2-4 quarter hours)

AI 174
WORLD LITERATURE
Undergraduate
In this team-taught Bridge course, we will examine masterpieces of world literature, including principal works from selected literary periods and traditions. The first half of the course meets at Truman College and the second half at the Loop Campus and lasts a total of approximately 15 weeks. You may register for up to three competencies for this course. (2-4 quarter hours)

AI 175
PLATO ON LOVE AND JUSTICE
Undergraduate
This seminar is devoted to the analysis of the great dialogues written by Socrates’ famous student, Plato. In these works lie many of the keys to understanding the western world. They also illuminate much about ancient Greek culture. An appreciation for these great dialogues and their cultural significance is an essential part of higher education. The next time someone mentions Plato’s Cave, you’ll be in-the-know! (2-4 quarter hours)

AI 176
CREATIVE WRITING
Undergraduate
Designed to help you explore the art of writing stories, either stories that are "made-up" or stories based on lived experience. You will be required to complete six fiction-writing exercises, and either one short story, one autobiographical story, or one story based on an oral history collected by the you. In addition, you write a final essay in which you reflect on your learning and experience in the course. (2-4 quarter hours)
AI 177
DREAMS DEFERRED: LAW AND SOCIAL JUSTICE IN AMERICAN THEATER
Undergraduate
Drama is an ideal vehicle for portraying conflict. And the courtroom is often the place where such conflicts come to a head. In this course, we will read various courtroom and law-related contemporary American plays and use them as a lens for exploring issues of law, justice, fairness and the distribution of power in American society (H4). We will also explore how the playwright's creative process makes these works exciting theatrical pieces and analyze how the various design elements (lights, set, costumes, music) bring each work to life (A5). Students who register for A2B will perform scenes and monologues from these plays. The class will attend various live theatrical performances in the Chicago area. Plays under consideration include: Twelve Angry Men, A Raisin in the Sun, The Laramie Project, The Execution of Justice, Permanent Collection, To Kill A Mockingbird, and Twilight, Los Angeles: 1992. (2-4 quarter hours)

AI 178
THE ART OF LIVING
Undergraduate
We are living in an environment where change often seems to be the only constant. And, as the forces of change grow in intensity, complexity and take on a global scope, the task of coping can be daunting. Given today's world of constant change, this course is designed to help you gain a deeper understanding of the change and transition process and discover new ways to address planned and unplanned career and lifestyle changes and opportunities. Special attention will be given to methods for achieving personal and career fulfillment during a myriad of transitional periods in life. Both in class sessions and in your reading assignments you will be exposed to the distinctive worldviews of a wide range of philosophers, spiritual leaders, artists and sages throughout history who have been wrestling with life enhancement issues. During the course you will become familiar with a number of prominent contemporary writers and thinkers who are addressing the complexities of the change and transition process in turbulent times. Educational activities are multi-media and include small and large group discussions, collaborative learning exercises and presentations, research, journaling, weekly writing assignments and a final paper. After completing this course, you will be able to: Identify and articulate the difference between change and transition and develop and/or strengthen your coping skills. Develop new ways to find greater fulfillment during life's most difficult transitions. Articulate and apply collaborative learning techniques in your personal and professional life. An overarching goal of this course is to be an enriching, rewarding experience where you will have the opportunity to share ideas in a safe environment. (2-4 quarter hours)

AI 179
LEADERSHIP LESSONS IN LITERATURE AND CREATIVE MEDIA
Undergraduate
In this Bridge course, students will examine issues of leadership and self-leadership as we analyze several short works of fiction and non-fiction, and other creative media including film, plays and music. Students will study authors of various genres along with contemporary political and 20th century historical figures who exhibit leadership qualities that are worth exemplifying. In so doing, students will learn the structure and concepts of the academic research paper. For the research paper, students will select a topic that is personally or professionally relevant. The course assumes a basic understanding of grammar and the structure of academic papers. Students should expect to write and rewrite extensively. (2-4 quarter hours)

AI 180
BACK TO THE FUTURES: A BRIEF HISTORY OF FUTURES TRADING IN CHICAGO
Undergraduate
This class will examine the futures industry in Chicago from mid-19th century to the present. We will examine how the fledgling city provided fertile soil for the growth of futures trading and continues to support trading today. Commodity futures trading has a long history throughout the civilized world, with products from rice to wheat to tulips having been "forward priced" for centuries; however, it wasn't until the middle of the 19th century that futures or derivatives trading as we know it begin in Chicago. We will look at contemporary news accounts and literary portrayals of the marketplaces. In particular, we will read works by Frank Norris, an early critic of the industry and of late 19th century capitalism in general. The class will be organized around a schedule of lecture, discussion, and small group work. A series of readings will be assigned each week, and these will be discussed in detail. We will also see a few short films and have visits by guest speakers. (2-4 quarter hours)

AI 181
CREATING ORIGINAL DIGITAL ART
Undergraduate
The course will focus on electronic visual art, and because of the amount of material to be covered, will not include audio or animation art. Students will look at what constitutes "art," then look at how original art could be created using technological tools, such as Microsoft Paint, Pixel-based art, such as Microsoft Graphics in PowerPoint; Digital Photography and PhotoShop; digital short-movies, and Digital Animation using Freeware GIF Animation software. (2-4 quarter hours)
**AI 182**  
**TALKING BACK TO MEDICINE: WRITERS AND THE POLITICS OF HEALTH**  
*Undergraduate*  
It is no secret that health care in the United States is in crisis. President Obama has pledged to work with the nation to rehabilitate our health care system. In this course, we will examine how fiction and non-fiction writers challenge such systems to rethink the notion of health as well as the politics of sickness. The writers we will study take on issues like access to health care, models of illness and healing, medicine and social justice, and others. In this course, readings, podcasts, wikis, and discussion board posts will help us explore the responsibilities of medicine as well as those of the community in which medicine is practiced, for a socially just and comprehensive understanding of illness, health and healing in the United States. (2-4 quarter hours)

**AI 183**  
**THE 1960S**  
*Undergraduate*  
The decade of the 1960s was a watershed period in the social, cultural, and political history of the United States. This course will examine the era from a variety of viewpoints in order to promote student understanding and analysis of key movement, episodes and personalities. The course will include investigation of John F. Kennedy's "New Frontier", The Cold War, The Space Race, the Civil Rights and Women's Liberation movements, Lyndon Johnson's "Great Society", the Vietnam War, popular culture, literature, student unrest, and the realignment of traditional political voting blocks. In addition, the course will demonstrate how the decade's music mirrored the changing times. (2-4 quarter hours)

**AI 184**  
**WORDPLAY: DEMYSTIFYING POETRY**  
*Undergraduate*  
This course sets out to demystify most forms of poetry with particular concentration on poetry composed to be read aloud or performed on a stage, and to allow the student to actually enjoy poetry! The student will be exposed to a great deal of popular poetry and will, perhaps, be a little surprised to find poetry to be accessible. The Oral Tradition, Folk Poetry, Open Mike, performance poetry, poetry read or performed with music or poetry just read aloud, Slam Poetry, rap, song lyrics - all of these often overlapping categories of poetry could be grouped under the title of Spoken Word, and probably, all would be considered popular poetry. The students will be exposed to much of this poetry; Slam Poetry in the home of the National Poetry Slam, The Green Mill, and performance poetry at the Guild Complex and at the Higher Ground Poets. Students will engage in a poetry workshop that is at once sage, gentle, and generous. The workshop will take place in the classroom. Known and not-so-well-known poets will visit the class to read or perform their poetry and students will become poets and read their works in class. (2-4 quarter hours)

**AI 185**  
**THE BEATLES AND THE CREATIVE PROCESS**  
*Undergraduate*  
The Beatles are significant in many ways: they were an unprecedented show business phenomenon; they were leaders of Sixties cultural rebellion; and they stand, for many, as a signal instance of popular entertainment attaining the status of high art. This course will examine the musical craftsmanship of the Beatles, focusing on their work as songwriters and record makers. Recent audio and print releases documenting the group's performing and recording history provide a unique and detailed glimpse of the Beatles' creative process. We will utilize these materials to closely trace the development of the group's work while using other resources to place it in a larger historical and cultural context. The goal is to shed critical light on this recent chapter in cultural history. That discussion will, in turn, highlight questions about creativity in a modern context where commerce vies with art, technology redefines performance and an emerging global village culture transforms concepts of originality and tradition. (2-4 quarter hours)

**AI 186**  
**SOCIAL RELATIONSHIPS FROM AN AFRICAN-CENTERED PERSPECTIVE**  
*Undergraduate*  
This course will utilize an African-centered framework to examine the nature of social interactions within the African-American community. The following topics will be emphasized: female-male relationships, parenting, teacher-student relationships and the role of elders in the family. Students will examine the role of traditional and contemporary culture, racism and oppression in the historical development of these social relationships. Strengths, tensions and possible solutions to alleviate tensions experienced within the examined relationships will be identified and discussed. (2-4 quarter hours)

**AI 187**  
**CAREERS IN THE HELPING PROFESSIONS**  
*Undergraduate*  
This course will help you, the learner, identify which career path best fits your strengths, skills, and interests, as you pursue your desire "to help people". It will also better prepare you for graduate and/or professional training by familiarizing you with the admissions process for various schools in the helping professions (e.g. social work, psychology, counseling, etc.) (2-4 quarter hours)
AI 188
MAKING DIFFICULT DECISIONS: MORAL LIFE IN A MODERN CULTURE
Undergraduate
"It's not illegal." Is this statement a sufficient basis for moral decision-making? Do people have one set of values for their "private life" and another set of values for getting by at work? Is there a "public" morality? If yes, what is its basis? "Making Difficult Decisions" provides a window into the ways that people make some of the most difficult choices in their lives (for example, having an abortion, volunteering for military service or declaring conscientious objection, requesting "Do Not Resuscitate" orders for an ill and aged parent, etc.). The course readings, written exercises, and classroom activities will provide students with a framework that will help them to better understand their own moral decision-making. This framework will also help students to better understand the decisions that other people make. A major focus of the course will be the different moral languages that influence the decision-making of most modern Americans, but which many of us are not able to sort out. The course will also emphasize the role that social institutions play in our decision-making processes. (2-4 quarter hours)

AI 189
SOCIAL CONFLICTS OF THE KENNEDY YEARS
Undergraduate
Popular images of the Sixties, think, say, of hippies, Black Panthers, soldiers fighting in Vietnam, protesters working en masse to stop the war--actually correspond to a span of years that stretches roughly from 1964 (when, for instance, the Beatles arrived in the US) to 1974 (when President Nixon resigned from office). This course will look closely at the lead-up to this period, concentrating on American political and cultural history from the late fifties moment through the assassination of President Kennedy in November 1963. We will examine selected events, movements and figures from this period who are key to understanding what came later. Topics to be studied include the Cold War, anti-communism and the atomic bomb; the Cuban revolution; the civil rights movement and Dr. Martin Luther King; the rise of protest singers and soul music; the administration and assassination of President Kennedy; and the beginnings of the USs full-fledged military incursion into Vietnam. We will read essays and excerpts by authors such as Howard Zinn, Frank Meyer, Dr. King, Bettie Friedan, and Barbara Ehrenreich. We will use a variety of learning tools, including lectures, discussions, journal reflections, and film screenings. (2-4 quarter hours)

AI 190
AFRICAN AMERICANS IN THE ARTS
Undergraduate
The arts provide a lens through which we can more completely see, hear and understand the magic, mystery and challenge of the human experience. The story of African Americans in this country is one of perseverance and transformation. In this course, students will explore how the social, political, historical and cultural journey of African Americans is reflected in the production of art. African Americans have a specific perspective on the American national experience. Where would America be without the artistic contributions of the African American cultural community? Furthermore, how does art make our lives better? Does it? In this course, learners will research, analyze, and define African American art and arts and assess their impact on culture. Arts such as theatre, literature, music, and visual and media arts will be discussed. Students should expect to attend several cultural/artistic events throughout the term. These might include poetry readings, musical concerts, theatre, gallery visits, and other local events. (2-4 quarter hours)

AI 191
HOW THE WORLD DOESN'T END: SPECULATIVE MEDIA ABOUT DISASTER
Undergraduate
In this hybrid course, students will examine the ways depictions of disaster in art and literature influence the presentation of gender. We will explore these depictions through a combination of analytical and creative activities. Our readings will include Senseless Acts of Random Violence by Jack Womack and selected poems and creative writings by Adrienne Rich, Anne Waldman, Amiri Baraka, Quentin Crisp. Our readings of creative work will be supplemented with readings of cultural theory and philosophy including excerpts from Maurice Blanchot, Georges Bataille, Donna Haraway and Simone Weil. Students will also examine these issues as we analyze other contemporary media, including film, art and music. This course will give students the opportunity to learn about and practice several types of writing, including journals, essays and a short research paper. These assignments will also help students develop critical reading and analysis skills. Students will work online and in small groups on a collaborative project, which will help them explore and propose solutions for biases in their own and those of others. (2-4 quarter hours)

AI 192
IMPROVISATION
Undergraduate
Students will learn the games that form a context with which, or from which, to improvise. Then they will improvise; they will play in their own and in each others' improvised sketches. They will learn to solve problems, find metaphors and examine improvisation as an excellent tool with which to monitor the process of learning. From the engagement in games and their analysis will come the most important outcome: the growth of confidence. (2-4 quarter hours)
AI 193
LANGUAGE AND POLITICS
Undergraduate
The language that individuals and groups use to tell their stories creates their identities. This multi-disciplinary course examines how post-modern language, especially language in media, frames national and global politics and its underlying power relationships. Issues addressed include the politicization of language in the U.S. immigration debate and the role that English as global lingua franca plays in spreading American culture as well as the subsequent effects on self-expression in English among native speakers via political correctness, forbidden speech and code words. Other topics include gender roles, intellectual property rights, and even the overall need for virtually ceaseless verbal stimulation in a media/image driven world. Students will utilize intercultural communication theories to reflect upon their self-identity and its role in defining their relationship to their communities and institutions and will expand outward to understand national and ethnic identities from a global perspective. Students examine current events in the media and the ethical implications language-related biases impose upon discourse while using the Internet to create their own presentation about the topic. (2-4 quarter hours)

AI 194
DOCUMENTARY PHOTOGRAPHY
Undergraduate
Documentary photography emerged in the middle of the 19th century as a means of defining, directing and/or transforming social opinion. From that time forward, photographs have been commissioned with the intention of building consensus for profound social change. Public and private agencies alike have used photographs to make the larger society aware of new thinking about problems such as immigration, poverty, war, political, ethnic or gender injustice. This course will examine the photographic images spawned by various social issues and movements that have affected American social thinking and guided social activism from the Civil War forward. Please note that no prior knowledge of the history of photography or of 19th or 20th century American history is expected nor is a working knowledge of any art-making discipline assumed. (2-4 quarter hours)

AI 195
GENDER AND SEXUALITY IN BUSINESS AND ORGANIZATIONS
Undergraduate
Sexuality, Gender, Power and Organizations: these concepts and their interrelationships are the general focus of this course. Gender and gender relations and their relationship to power have long been deemed to be absent or relatively unimportant with in the study of organizations. The gendered nature of organizations and their management has not been part of dominate mainstream traditions of theorizing on organizational and business activity. Focusing on issues that are well known in our everyday life and work this course deconstructs issues such as affirmative action, gender discrimination, sexual harassment and violence in the workplace and ancillary organizations. (2-4 quarter hours)

AI 196
WRITENOW: SNL WRITING MARATHON
Undergraduate
Anne Lamott said that the most important ingredient for writing is the act of "sitting". In this course, students will focus on this seemingly simple act of the creative process. The focus of the course is on the generation of written material: the quantity rather than the quality. As such, students choose their own fiction or nonfiction writing topic(s) and project, and may use the material they create in a later effort (ILP, AP, etc.) To kick off one session, a group of professional writer panelists will reflect on their own creative processes as they have developed their latest works. (2-4 quarter hours)

AI 197
WHAT WAS GOD THINKING WHEN HE INVENTED THE UNIVERSE
Undergraduate
We are all made of star dust. Find out how and why in this course. The moon is made up fragments of earth. Learn how we depend on each other. All life has been wiped out at least 6 times on this planet. Find out if God really likes us. We humans have only been around for 100,000 years, but we are rearranging our planet big time. Figure out if we know what we are doing. (2-4 quarter hours)

AI 198
GREAT AMERICAN SHORT FICTION
Undergraduate
The short story is often thought of as the novel's poor stepchild. Descriptions of the former typically allude to its brevity as proof of its lesser literary value. This course will try to prove that great fiction is not judged by the number of words it comprises, but by its effect on the reader. Evidence will come in the form of short stories selected according to author Richard Ford for their creators' ability to "spell out so well for us where daring starts and where it leads, and exactly why it is the pure and indispensable and thrilling call that brings us all to stories." (2-4 quarter hours)
AI 199  
**ELECTRONIC LANGUAGE**  
**Undergraduate**  
Shakespeare changed the English language. So did Winston Churchill, Mickey Mouse, and Ice T. Radio and television have certainly contributed. Some of these changes took years; some materialized over night. The most recent changes in how we communicate, and perhaps the greatest have come from the internet. Email, emotions, and texting have all influenced our ability to say what we mean, and to comprehend what others are trying to tell us. In this course, students will examine the ways in which these new technologies are provoking alterations in our day to day speech. Spelling is certainly changing. Remember when we wrote through instead of thru? And who writes letters anymore? Through critical analysis of internet speak, learners will acquire skills for assessing the impact of electronic communication on literature. Looking at creativity and creative uses of technology, students will learn how to use electronic means of producing their own written work. Furthermore, students will examine how electronic communication has influenced our ability to be heard in the workplace. (2-4 quarter hours)

AI 200  
**GUIDED INDEPENDENT STUDY: ARTS AND IDEAS**  
**Undergraduate**  
Guided Independent Study: Arts and Ideas (2 quarter hours)

LL 250 is a prerequisite for this class.

AI 201  
**DYING AND DEATH: FACING MORTALITY, CELEBRATING LIFE**  
**Undergraduate**  
Description: We live in an aging American society that is both death-denying and death-defying. Few are prepared for death. This course offers a unique opportunity to directly reflect upon life's end at and individual and personal level. Doing so allows us to be most full present as we live and with others when dying and death touch their lives, as well as when either touches our own. While this exploration can be challenging, it can also be enlightening, enriching, uplifting, and even liberating. Most of all, the amazing adventure of facing mortality has significant implications for the choices we make today. Competences: A4, A3C, H3F, S3B. (2-4 quarter hours)

AI 202  
**LONDON ALIVE: IN THEATERS, MARKETS AND MUSEUMS**  
**Undergraduate**  
Join SNL in London for a course about performance and representation. Theater, live performance, museum collections and street markets are integral parts of English cultural history; they also represent Britain's international heritage. London theaters celebrate English history, culture and language, and carry the banner of the English artistic imagination into the future. London's museums make it one of the most visited cities in the world for the range of its collected artifacts and images. Outside the theater and museum doors, markets teem with life, creating a magical intersection of past with present and future, of art with life and politics, of cultural stasis with social change. (2-6 quarter hours)

AI 203  
**MEDITATION FOR INNER GUIDANCE AND GROWTH**  
**Undergraduate**  
How do we stop the treadmill and recreate a space and pace that gives us more balance in our lives? It is a challenge to live in a world that stresses productivity to the point that it often overrules personal and family needs. Societal and workplace expectations are negatively impacting our health, our personal relationships, and our communities at-large. This course will discuss and explore alternative ways of responding to these challenges, ways that seek to return us to a healthy balance between work and life. Students will learn to use meditation, journaling, and other practices that allow individuals to slow down and to explore their own inner spirituality and personal direction for their lives. We will discuss theories and philosophies that address work-life balance issues. A final product will be a personal "work-life" balance plan that would detail ways to practice balance between work, family, and self-care and re-creation on a regular basis. Students will also develop a written code of ethics which explains their philosophy of self-family-work balance. (2-4 quarter hours)
AI 204
CREATIVE ENTREPRENEURSHIP
Undergraduate
I-Pads. Smart Phones. The automobile. These are inventions, once unknown and now taken for granted, required years of imagining, experimentation and unconventional thinking. While we value the end of the process (the product), we are often uncomfortable with the creative/creating process. The process of imagining, conceptualizing and articulating this new requires skills we often label 'creative'. This class will explore the role of creativity in the development of entrepreneurial skills and the entrepreneurial personality. Creativity in this course will be seen both as a learned skill and as an exploration of our intuition. Contemporary ideas about creativity are often tied to images of the past - from mad scientists to mystical muses. But modern science tells us something else about the creative mind. This course will explore contemporary approaches to the creative process based the human capacity to imagine, to explore and ultimately, to create. These are core skills for anyone in pursuing a career as an entrepreneur, or simply in search of ways to explore innovation. In this course, we will examine the ideas of three major thinkers form the world of creativity, disruption and entrepreneurship. We will then explore where these ideas converge on topics including, risk, the random, intuition and innovation. (2-4 quarter hours)

AI 205
LEADERSHIP LESSONS IN LITERATURE AND CREATIVE MEDIA
Undergraduate
In this course students will examine issues of leadership and self-leadership as we analyze several short works of fiction and non-fiction, and other creative media including film, plays and music. Students will study authors or various genres along with contemporary political and 20th century historical figures who exhibit leadership qualities that are worth exemplifying. In so doing, students will learn the structure and concepts of the academic research paper. For the research paper students will select a topic that is personally or professionally relevant. The course assumes a basic understanding of grammar and the structure of academic papers. Because students will practice writing and revising academic papers, the course can serve as a gateway to other SNL courses. (2-4 quarter hours)

AI 206
EXECUTIVE & MANAGERIAL ETHICS IN CORPORATE AMERICA
Undergraduate
This class will prepare students who are entering or enhance the skills of those already in the complicated and confusing world of corporate America. The course will look at some of the most historical ethical issues in the world of business and provide students with the tools they will need to become an ethical and successful manager or executive. (2-4 quarter hours)

AI 207
THE LITERATURE OF INCARCERATION
Undergraduate
The United States is the largest incarcerator in the world. Is this because we have more crime? More criminals? In this course we will explore questions about the prison industrial complex and the justice system through the words of incarcerated and formerly-incarcerated writers. We will be looking at poetry, short stories, essays, and memoirs. Employing a mix of discussion, guest speakers, film, class team reports, and close readings of the literary texts, this course will take us on an imaginative journey into a world most of us have few reasons to understand. We will explore questions about the prison industrial complex and the justice system through the words of incarcerated and formerly-incarcerated writers.

AI 208
STORYTELLING: EXPLORING THE ORAL TRADITION IN OUR LIVES
Undergraduate
Everyday we use stories to communicate. This course provides students with an overview of the art and practice of storytelling. Throughout the learning experience, students are encouraged to nurture their voices as writers and storytellers. Students will create and adapt tales focusing on both personal experience and traditional folklore. Storytelling is an oral art form. Students will learn by actively participating in storytelling and critique of story performance. The creative experience in this course will enable students to further their skills in: Oral presentation, story construction, performance, artistic critique and analysis. Students will develop and perform stories from at least three distinct areas, including personal experience, folklore, and history. This class will enhance the work of business professionals, teachers, artists and anyone who is interested in how stories communicate ideas. (2-4 quarter hours)

AI 209
ETHICS AND IDENTITY: THE PRESSURE OF INSTITUTIONS ON INDIVIDUALS
Undergraduate
This course explores the tension between the individual and the institution in theory (through books and films) and practice (through participation in collaborative groups) and offers the student real tools for working with integrity inside the corporate culture. Using current events as a modern morality play upon which to turn the lens of historical and contemporary analysis, we will ask of ourselves what it means to be a good and ethical citizen. This course will enable students to recognize the inherited belief systems and their contradictions which have fueled the moral crisis of the last decade. (2-4 quarter hours)
AI 210
THE MINDSET OF INNOVATION: BUILDING YOUR CREATIVITY COMPETENCES
Undergraduate
More than ever we hear that creativity and innovation are essential: to save the U.S. economy, to adapt to a greater speed of change, to advance our own careers. In the 21st century we indeed need to raise a different IQ: Our Innovation Quotient. In this course we'll do just that by drawing water from three wells: 1. Psychological research on individual and collaborative creativity, 2. Organizational innovation case studies and practices, 3. Experiential challenges and personal creative development. Students will explore three key creativity competencies: fluency, flexibility and originality and gain insight into the mindset and practice of innovation required to take on the challenges and uncertainties facing us right now, both personally and professionally. (2-4 quarter hours)

AI 211
ANALYZING AUSTEN'S PRIDE AND PREJUDICE
Undergraduate
Jane Austen must have known something about universal truths. Her novel, Pride and Prejudice, which begins with the sentence quoted above, was first published in 1813. Still in print today, it has also been made into at least eleven movies, four of which were released since 2000, including a Mormon and a Bollywood version. In this class, we will read the novel in the context of the gender and class norms at the time Austen wrote her book and then consider how Austen's exploration of universal truths is reinterpreted in more contemporary film versions of this novel. In exploring Austen's creation and the many reinterpretations of her work, we will use both analytic and creative writing assignments as well as class discussion to examine how context informs creativity and how creativity informs analysis. You most definitely do not need to be a creative writer to take this class. (2-4 quarter hours)

AI 212
GLOBALIZATION OF MODERN BRAZIL IN ART, LITERATURE AND MUSIC
Undergraduate
This course will study globalization in Modern Brazil through the representation of race, culture and religion in the arts of Brazil. Particular attention will be paid to indigenous cultures and the influence of Africa on Brazil. Can be taken for up to 3 competences. (2-6 quarter hours)

AI 213
CULTURAL BRIDGES: ART BEYOND THE WEST
Undergraduate
This course is intended to provide students with an overview of the visual arts and architecture of the people of China, Japan, Africa, India, the Americas and Oceania. Emphasis will not be placed on learning names, dates and titles, but instead, on understanding how each culture reflects the religious beliefs, myths and creative expressions of the people with the sole purpose of building bridges to cultural understanding. The course will include illustrated lectures, research, discussions and visits to museums and galleries in the Chicago area which house non-European works of art. (2-4 quarter hours)

AI 214
LEARNING IN MUSEUMS: ARCHITECTURE, ART, HISTORY, SCIENCE
Undergraduate
A museum is a place of many windows—windows that frame looking to learn about past, present, future, people, places, and ideas. You can experience science, history, art, and architecture in a museum in ways of knowing that are three-dimensional learning opportunities. Join this course to gain insights into people, places, events, and ideas. Each student will choose an area to develop, so the course includes options for different credits. The class sessions will include visits to five different Chicago museums and classroom activities in which students design their own exhibits—which can be displays or virtual? computer-based explanations of topics. The final session will include a collaborative exhibit that students make to explain what they’ve learned about the area in which they specialized during the course. (2-4 quarter hours)

AI 215
FILM NOIR
Undergraduate
In this course we will screen and discuss select noir films and develop skills of viewing and analyzing them closely. Highlighted topics will include the concept of genre in film; the relationship of genre codes to creativity; the dynamics of form and content; the tension between commerce and art; the auteur theory; psychologies of the divided self; representations of masculinity and femininity; and the question of what these films say about American society, post-World War II. (2-4 quarter hours)
AI 216
PHOTOGRAPHY AS ART IN THE MODERNIST ERA
Undergraduate
Why is it that certain 20th century photographs from amateur, commercial, documentary or news sources are now studied and have become collectable as art? In most cases their makers did not see themselves artists. The ones who did often struggled to define what their machine-made picture medium uniquely had to contribute to a changing and increasingly mechanized secular world. Their answers and those of later arbiters reads like a chronicle of Modernist thought. Indeed this class might be termed a history of Modernism as expressed through five distinct periods (or themes) within 20th century art photography. Abstraction, a 20th century invention in the visual arts, does have a component in art photography. These we will study. But most photography we would call creative including those from the time period 1918-1977 is solidly connect to realistic presentations from life and provide their viewers a lens for societal interpretation. They will be our main area of study. Although primarily a study of 20th century Modernist photography, the class will also examine the logic of an earlier artistic model from the Pictorialist Era. Likewise in the final weeks, we will examine some recent works and re-readings of older photographs using criteria of Postmodernism. Two field trips will be scheduled: The Art Institute of Chicago and The Museum of Contemporary Photography (Columbia College). (2-4 quarter hours)

AI 217
MINDFULNESS MEDITATION
Undergraduate
Mindfulness meditation provides many different ways to broaden our awareness of the world around us, heighten our powers of concentration, and deep our understanding of our experience, and cultivate creative and transformative ways of being in the world. Many approaches to meditation draw on ancient religious and spiritual traditions from around the world. So mindfulness meditation is compatible with and can enhance whatever religious or spiritual commitments you may have. But mindfulness meditation does not require religious or spiritual interpretations. It can be practiced as a very powerful path to becoming a creative, healthy and effective adult. In this course, you will learn what mindfulness meditation is and various ways in which it can be practiced. We will explore in particular how mindfulness meditation can enhance creativity, address the ethical challenges of contemporary life, and foster collaborative learning. Class sessions will involve extensive practice in mindfulness meditation, listening and dialogue. You will be expected to maintain and reflect on a daily mindfulness meditation practice for the duration of the course. (2-4 quarter hours)

AI 218
ORGANIZING AND DEVELOPING EMERGENCY TRAINING & SERVICE STRATEGIES: "LESSONS-LEARNED" FROM KATRINA
Undergraduate
This course is woven around the service aspects of studying lessons learned from the Katrina hurricane to provide insights into productive and anticipatory emergency training and service Strategies using a 'Lessons-Learned' Model from the experiences learned from the Katrina hurricane in New Orleans. There are some interesting parallels to New Orleans in Chicago: they are both close to big water outlets, they are both port cities, they have very diverse populations with low socioeconomic populations and they both have rich cultural histories. This course interweaves aspects of service work with the study of both cities' histories, looks at their populations' spirituality, and service commitments to see how Chicago could benefit from the lessons learned from Katrina. Catholic Charities and the St. Vincent DePaul Society have played an integral part of serving the underserved in New Orleans for over a hundred years. The history of the survival of New Orleans has been intimately tied to the commitment of both to providing for those who are left homeless and helpless in times of emergency and disaster; this course will look at factors that have helped New Orleans survive that could also be used for emergency training in Chicago for service work organizations. This course will look at how one person's service work can make a difference in the lives of thousands of others because, while the example will be New Orleans, the lessons learned from the course will be transferable to any city and life of one who is willing to serve others. (2-4 quarter hours)

AI 219
SPACE, SPIRITUALITY, AND HUMAN IDENTITY
Undergraduate
The course will examine the architecture and context of the sacred spaces of the ancient and medieval world. Different perspectives will be used to study the spaces, including art historical, historical, anthropological and religious. This class will look at how sacred spaces are affected by a variety of factors in each society. These include the religious and social beliefs of the society, the availability of materials, the technical skills of the artists and builders and the world view of the people. Students will also consider how these issues are manifested in our own culture and how they are seen and experienced in their individual lives. The class will use multimedia resources to experience the monuments more fully. (2-4 quarter hours)

AI 220
THE POWER OF THOUGHT & EMOTION IN PERSONAL EXPERIENCE
Undergraduate
This course addresses the question, "What is the role of thought and emotion in personal experience?" and attempts to answer it through a series of experiments in creative writing, observation and self-reflection. Drawing upon a wide range of controlled studies, like the ones described below that suggest the possibility of a causative function in emotions and their correlative belief systems, students will examine their own inner and outer worlds and find where they meet. (2-4 quarter hours)
AI 221
COLOMBIA: CULTURAL IMPLICATIONS OF LEISURE
Undergraduate
This pioneering course will provide SNL students with the first opportunity to travel and study in South America. Cartagena, Colombia is the destination. Cartagena is one of the most visited cities in Colombia and a must see city in South America. Considered by many as one of the world's most beautiful, fascinating and romantic cities, Cartagena offers a rich sense of history, beautiful beaches, excellent food, cultural events, competitive sports, superior natural areas, and a vibrant nightlife. Its heterogeneous ethnic and racial make-up is unmatched in the world making it a perfect environment to study and experience leisure. You will be immerse in the culture, history, and leisure practices of Colombia enabling you to develop a greater understanding of the role of leisure in improving and protecting our global community. (2-6 quarter hours)

AI 222
DISCOVERING THE LEADER WITHIN: EXPLORING TRANSFORMATIONAL LEADERSHIP
Undergraduate
We are living in a world of constant change, a world in which change is often viewed as the only constant. When we think about change we typically are talking about incremental change. This course will explore a much more difficult change process: the process of deep change. The primary focus of this course will be to examine the values, goals, and operating methods of the internally-driven leaders engaged in the process of deep change: the transformational leaders. The course is designed to give students a practical understanding of the ways in which transformational leaders are having a lasting impact on a wide array of organizations ranging from major corporations, to nonprofits, to international institutions. In the process, students will learn leadership lessons that can contribute to their personal and professional growth and development. The principles of deep change can apply to people at every level of an organization regardless of its size. The class is interactive and will include case studies as well as movies portraying transformation leaders who have pursued the vision of deep change. Multimedia activities will include small and large group discussions and presentations, research, report writing, and video and audio tape presentations. (2-4 quarter hours)

AI 223
LITERATURE OF RESISTANCE
Undergraduate
The pen is mightier than the sword. Why do authors take the time to write down their objections to society's conflicting ideas about life? What impact can words, rather than arms, actually have? In this course, students will examine the work of various authors who have felt the need to express their opposition in writing. As well as the work of those who have emerged as leaders because of their historical opposition to the status quo. What has inspired resistance movements? Much has been written about independence movements of the early to middle Twentieth Century, their significance in providing both spark and fodder for resistance movements all over the globe, including the Black Power Movement and the Feminist/Womanist Movement here in the United States. This course will offer students the basic knowledge and tools to understand the historical contexts for many political, economic, and social justice issues affecting people, especially women in the Twenty-First Century. Students will be able to identify and distinguish various forms of political resistance and societal oppression, and will acquire the vocabulary to discuss these moments and their impact on contemporary politics. (2-4 quarter hours)

AI 224
WHAT IS JUST?
Undergraduate
Is it fair that our tax dollars support the uninsured? Should we punish those with limited capabilities who hurt us? Is it just that my colleague is rewarded for my work? In this class, we look at these questions (and more) of justice in ancient and modern literature and philosophy. Our readings will include: the Code of Hammurabi, The Bible, Aeschylus' Oresteia, Sophocles' Philoctetes, selections from Plato's Republic, Dostoevsky's Crime and Punishment, Euripides' Medea, Toni Morrison's Beloved, selections from Jonathan Swift's Gulliver's Travels, Margaret Atwood's The Handmaid's Tale and various handouts (Rawls, Kant and others) from the instructors. May be taken for a maximum of three (3) competencies. (2-4 quarter hours)

AI 225
GREAT MUSIC IN CHICAGO
Undergraduate
The course introduces people to three of the most exciting and rewarding institutions in Chicago music: the world-famous Chicago Symphony Orchestra at Symphony Center downtown; the fabulous training orchestra of the Chicago Symphony Orchestra, known as the Civic Orchestra, also downtown; and live top-name jazz at the Jazz Showcase. We learn the background of these institutions, the nature of the arts they perform, and the terms used to describe and appreciate those forms. Most importantly, we experience, in person, the great music that they play! (2-4 quarter hours)
AI 226
ECOLOGY, THE GIFT ECONOMY, AND OUR SEARCH FOR A LIVABLE WORLD
Undergraduate
In this course we will focus on different economic, cultural, and ethical paradigms of ‘nature’ and ‘economic relations’. We will place the notion of a ‘gift economy’ at its center, comparing it with the predominant notion of the ‘exchange economy’. The logic of ‘gift giving’ implies distributing goods and services according to needs, placing a high social value on carework and on the ethics of care. The logic of exchange transforms giving as a direct response to needs into giving in order to receive its equivalent in return. By exploring the many ways the ‘exchange paradigm’ dominates our thinking, acting, and relating to each other and to the natural world, this course will investigate how the ‘gift paradigm’ has been practiced by different populations and different cultures in the past, where it is still alive today, and what it teaches us about creating a livable world, one that is guided by an ethics of care and environmental justice. (2-4 quarter hours)

AI 227
VALUES BASED LEADERSHIP
Undergraduate
Who are values based leaders? How can we differentiate who a values based leader is and who is not? How can we explore what our personal values are and how these values influence the leaders we are or can be? Values based leadership includes both process and outcomes. Although in this course we will study various historic and modern day leaders, such as Moses, Jesus, Gandhi, Martin Luther King, Evita, Richard Daley and others, the most important work we will do in this course is learn that it is people showing leadership in everyday tasks of everyday life that in the long run will make the world a better place to live. We will learn that moral values and leadership come from within, therefore if we want to make an impact on the environment that we live in we must have a better understanding of who we are and what we believe in. In this course we will use various texts, videos, engage in small and large group discussions and spend some time in self reflection in order to explore values based leadership and the leadership potential within all of us. (2-4 quarter hours)

AI 228
FOOD AND IDENTITY
Undergraduate
Food is a component of individual identity. In this course, students reflect on and research their personal food histories from multiple perspectives. Students explore the connection to family and the impact of ethnicity, nationality, race and socioeconomic status on food selection, preparation and consumption; the connection of foods to socialization, holidays and gender roles; and the connection between food trends such as shifting definitions of “healthy eating” and the influence of corporate agriculture with the choices individuals make to cultivate tradition or redefine their food legacy. As a result of participating in this course, students gain insight into their own food experiences and appreciation for those of people from different backgrounds; document a personal food history; and understand the influences on their own food choices. (2-4 quarter hours)

AI 229
CONFLICT, COLONIALISM AND COMMERCE: ENCOUNTERING THAILAND AND ITS NEIGHBORS
Undergraduate
Drawing on local resources, students will gain valuable understanding of some of the minority cultures in the region and their tenuous relationship to the dominant ‘host’ culture. By engaging with present-day Thailand, participants will also gain insight into its rich and complex past. Through visits to cultural centers and interactions with local people, participants will experience life among ethnic groups in the Chiang Mai province such as the ‘Long-Necked’ sub-group of the Karen people, as well as in the border regions of Cambodia and Burma (Myanmar). In Bangkok, we will experience its modern and ancient faces culminating in cultural activities with DePaul alumni living in Thailand. (2-6 quarter hours)

AI 230
MEMOIRS: A JOURNEY FROM THE INSIDE OUT
Undergraduate
Socrates famously said, “The unexamined life is not worth living for a human being.” Join Carolyn and Caralyn, who believe there is nothing more compelling than the well-told story of a person’s life, to examine a portion of yours. In this class, as a community of learners, we will explore the creative process, consider principles of memoir-writing styles, and assess how human experience and transformative events drive the construction of a personal philosophy. Course prerequisite: curiosity. Class sessions will revolve around reading, writing, and telling. We will read and discuss excerpts from full-book memoirs to understand how everyone has a sense of being “other” in the world, while still being connected to the greater human experience. We will write in a structured format, both in-class and individually, to learn how to focus the lens of memory onto specific life experiences. Peer editing, using guided techniques to give constructive feedback, will enable all students, regardless of their starting point, to become better writers. At the end of the course, we will tell the stories that have been written as we partner our small learning community with a larger community organization. The final take-away of sharing will be a class memoir in the form of an e-book to which everyone contributes. (2-4 quarter hours)
AI 231
THE MEANING OF WORK
Undergraduate
What is work? Does our work alone give us happiness? How is creativity connected to our work? Why do we make things? How is our self-worth tied to our work and to the things we produce? This course examines these questions and the tensions between work and leisure activities, between craft and technology in modern times, between mass production and handmade articles, and between techniques and materials. It is a hands-on lab class that emphasizes techniques and materials which enrich our understanding of work and its production; it also focuses on creativity in the 21st century and the tensions between mass production and handmade materials. Can be taken for up to 3 competences. (2-6 quarter hours)

AI 232
THEATER IMPROVISATION
Undergraduate
In this course we will play on the classroom stage as we might have played on the playground as kids. The difference between these forms of play is one of degree rather than one of kind. A theater game provides a structure in which we can play spontaneously. In other words, we improvise. Improvisation aids in the developing of public speaking skills and comfort and confidence as well as other social and theatrical skills. May be taken for only one competence. (2-4 quarter hours)

AI 233
GAIA: THE EARTH MYTH
Undergraduate
Among the world's great myths are many which embody cultural wisdom about the relationship of humanity to the planet it inhabits. This class examines a number of exemplary myths in order to compare and contrast visions of human/natural interaction. Myths from Japan, Ireland, Native America, Africa and classical Greece will be among those studied. Students will be asked to compare one to the foundational myth of their own culture. (2-4 quarter hours)

AI 234
VISUALIZING LATIN AMERICA
Undergraduate
This course is an introduction to modern Latin American visual arts, literature, music, philosophy, and other performing arts through the study of selected works. This course also introduces methods of engagement with different forms of informational literacy, including digital discourse. In the context of learning about modern Latin American humanities, you will also develop skills in new modes of digital communication and research; this includes some techniques of digital humanities such as data visualization, data mining, elemental GPS mapping, creating simple webpages, and remote reading. (2-4 quarter hours)

AI 235
THE DRAMA OF THE COURTROOM
Undergraduate
Trials are often the apex of legal proceedings, the dramatic moment where justice and truth hopefully come together. They are also fraught with a significance that often goes beyond the facts of the particular case being decided and reflect the hopes, fears, dreams and divisions of the broader community involved. The Rodney King and O.J. Simpson trials are two such modern examples. We will begin by discussing the various meanings attributed to trials throughout history. However, the major focus of the course will be to read plays in which trials occupy a central place. Possible titles include "Twelve Angry Men", "To Kill A Mockingbird" and "The Crucible". Depending on the competence for which you are registered, you will analyze and evaluate the system of justice portrayed in each play, the protection afforded the accused and the playwright's creative process in bringing the particular trial to life. We will accomplish these tasks through essays, class discussions and reading scenes. We will also go to a couple of Chicago theaters, view some plays and discuss what we have seen in light of what we have studied in class. (2-4 quarter hours)

AI 236
ONE WORLD: GLOBALIZATION IN HISTORICAL, LITERARY, AND PHILOSOPHICAL PERSPECTIVE
Undergraduate
In this course we will review the history of the idea of a united, confederated, or culturally interconnected world-community - tracing it from its earliest beginnings in myth, prophecy, and imaginative literature to its current practical incarnation in the form of the world as we know it today (a world of free-trade treaties, international corporations, instant communication, increasing cultural homogeneity, rapid transportation, and an edgy, suspicious opposition between traditional cultures, each anxious about preserving its identity in the new global order.). The course will conclude with a modest attempt to glimpse and assess the likely future path and consequences of globalization while maintaining a primary focus on the moral, economic, and political issues at stake. (2-4 quarter hours)
AI 237
MULTICULTURAL DISCOURSE: THE RHETORIC OF OUR COMMUNITIES
Undergraduate
In this 10-week course, students will identify, analyze, compare, and write rhetorical works that demonstrate cultural values in different communities. The course will also have a foundation in community-based learning, wherein students will spend time outside of class working with a community partner to focus on cultural development, awareness, and support in Chicagoland. (2-4 quarter hours)

AI 238
CREATIVE THINKING AND BUSINESS INNOVATION
Undergraduate
This is a survey course that introduces students to how humans think and process information. From this foundation, students will explore the various cognitive techniques that foster creative thinking. The aim of creative thinking is to stimulate curiosity and promote divergent thinking. The elements of creative thinking that will be covered in the class are the exploring of ideas, generating multiple possibilities, developing multiple hypotheses, cross fertilization of ideas and innovation. Innovation is the measure by which creative ideas, products, processes are measured as being valued and successful. Creativity is not just measured as something different or unique. True creativity results in something that is valued, validated, and implemented by society. Each student will be challenged to identify some unmet need in society and create a new product or service that addresses this need. (2-4 quarter hours)

AI 239
DANCE AS EXPRESSION OF CULTURE: SALSA DANCING
Undergraduate
Ever since the foundational work of Margaret Meade in the 1950s, cultural anthropologists prefer to leave the library and go into the field to experience a new culture by engaging with its language, arts, and/ or customs. People who travel to new places and respond to the local art in its natural setting know the power of experiential engagement with another culture. This course offers students a similar opportunity to embrace and express the values of other culture in an enjoyable way but without the need of a passport. Since the beginning of recorded history and almost certainly before, cultural groups around the world have produced some sort of rhythmically structured physical movement, often but not always set to music, in order to express essential things about themselves and their values. Dance is one of the oldest of art forms. As an eternal and universal mode of expression, dance is one of the most powerful conduits for cultural values. In this class students will be exposed to forms of the art of salsa dancing and the Latin American cultural contexts that produced those forms. They will study and also express the values of the cultures that gave us salsa as they participate in culture infused medium of dance.(2-4 quarter hours)

AI 240
ITALIAN AMERICANS IN FILM AND LITERATURE
Undergraduate
This course will address the roles Italian Americans have played in the cultural development of the United States from the mass immigration of the end of last century to the present, and the subsequent friction between Italian American lifestyles and the values of the dominant American culture. Students will read and analyze fiction by Italian American writers from a range of materials including the well known works of Mario Puzo and Gay Talese, and the less commonly appreciated short stories of Helen Barolini. Films which deal with Italian American issues and modes of living will also be discussed. Film discussion topics include immigration, assimilation, religion and society, and the concept of home among Italians and Italian Americans. Students will examine how history shapes culture, and how ancient ideas influence our ability to analyze problems in the new world. (2-4 quarter hours)

AI 241
WRITING MOJO
Undergraduate
Blending critical thinking with creative thinking is where the Mojo happens in writing. The goal of this class is to help students produce works of creative nonfiction that are academically sound as well as reflective and captivating. It integrates research, personal/social relevance, and creative expression. This course could be taken as a companion to Advanced Elective, Advanced Project, Externship or Research Seminar, since the final product can be designed to comprise all or part of the written component of those courses. (2-4 quarter hours)

AI 242
THE FILMS OF WOODY ALLEN
Undergraduate
This course uses the films of Woody Allen to explore the distinctive aspects of the filmmaker's world view, his attitudes about women, and his influence by and upon American popular culture since the 1970s. The class features weekly film screenings, discussion, and projects.(2-4 quarter hours)
AI 243
LAUGHING MATTERS  
Undergraduate  
Humor, in this course, students will trace Humor types, effects and styles, and how they can enrich, strengthen, and heal. We will review various Humor concepts and models, including early instructional/educational, bio-psychological, birth order, special talents, and socio/community-based theories. We will profile various types and timing of identifiable Humorists (such as Billy Crystal, Bob Newhart, Steve Allen, Bernie Mac, Lucille Ball, Charley Chaplin, Richard Pryor, Lily Tomlin, Steve Martin, Chris Rock, David Letterman, Whoopie Goldberg, Carol Burnett, Jonathon Winters, Judi Drench and others). (2-4 quarter hours)

AI 244
CATHOLIC SOCIAL ETHICS  
Undergraduate  
Students in this course will learn about ethics by examining the shifts in Catholic ethics during the twentieth century and by comparing and contrasting Catholic social thought with conventional wisdom. Students will study what church leaders and theologians are saying today about human dignity and human rights, about the common good and our individual and collective moral responsibility and this will be contrasted with Catholic teaching a century ago as well as with the conventional order (the dominant ethical perspective on social issues today). We will consider the dynamics of power and justice in America from the critical perspective of the tradition of Catholic social justice, examining the tradition of Catholic social teaching emergent late in the 19th century and spanning the 20th century: labor rights (trade unions, just wages, safe working conditions), religious freedom, racism, a consistent ethic of life, liberation theology, war and peace, economic justice, sexism, ecology. We will discuss Catholic social teaching in the context of the religious pluralism and American public life. You may register for only one competence. (2 quarter hours)

AI 245
PERFECT WORLDS: UTOPIAS IN LIFE AND ART  
Undergraduate  
What would the world be like if you could do a full makeover? How would you like life to be for you personally and what would you like to see institutionally? How should the world be governed? Who should care for children? How should housing be arranged? How should work be structured and valued? What is the role of religion and spirituality? Utopias? are attempts to create in a unified vision the ?perfect? answer to these questions. They have been written about and attempted for centuries. But no two have been the same. We will examine how others have envisioned a perfect world and reflect upon our own preferences. We will look first through the lens of Utopian literature commencing with Sir Thomas Mores’ Utopia (1515) and then at the landscape of several Utopian experiments. We will discuss the merging of scientific and philosophical analysis in the 19th and 20th centuries that led to a revived and animated focus on the potential perfectibility of human societies from Saint Simon to Marx. And then we will look at the great Utopian experiments of the 19th Century, the Transcendentalists, Owenites, Mormons and Shakers. We will look at the concepts and pitfalls of Utopias as a set of philosophical questions about shaping the future of human societies. Utopian thought helps as to focus on the critical and often unarticulated issues at stake in social planning. It raises provocative questions for those involved in civic professions, as well as for armchair philosophers and futurists. (2-4 quarter hours)

AI 246
CLOTHING, FLESH AND BONE: THE HUMAN BODY ABOVE AND BELOW THE SKIN  
Undergraduate  
This course examines the human body in all its aspects. Topics include: the religious body, the body in medicine and science, the cyber body and other technologies, the presentation of self/class/gender/culture/race through the body, the body as art and the images of the body in art. We devote 25% of the class to hands-on project work in the art studio and another 25% spent at the Art Institute, the Field Museum, and the Museum of Science and Industry. (2-6 quarter hours)

AI 247
STAGE IMPROVISATION AND GAME PLAYING  
Undergraduate  
Improvisational comedy is social commentary or personal expression made immediate by spontaneous dramatization. Students will learn the games that form a context with which, or from which, to improvise. Then, they will improvise; they will play in their own and in each others’ improvised sketches. They will learn to solve problems, find metaphors and examine improvisation as an excellent tool with which to monitor the process of learning. Additionally, students will acquaint themselves with the history of this freest of forms. From the engagement in the games and their analysis will come the most important outcome: the growth of confidence. (2-4 quarter hours)
AI 248
BOB DYLAN'S BACK PAGES
Undergraduate
During the 1960s, Bob Dylan produced a body of work that has, for forty-odd years, been widely regarded as extraordinary. Dylan made his mark as a new kind of songwriter, one who eschewed Tin Pan Alley professionalism in favor of rootsy grit and rhapsodic versifying; as a singing star who made a virtue out of not having a "good voice" or a pretty face; and as a performer who, in both live and studio settings, could charm, inspire and outrage audiences (sometimes all within the span of the same few minutes). In addition, Dylan's sixties music was adopted by political activists and bohemian youth as the soundtrack of social change, such that, in the words of critic John Rockwell, "his albums. . .defined a community." Meanwhile, Dylan cheekily described himself as just "a song and dance man" and soon traded the role of generational spokesperson for a series of enigmatic personae that called into question many of the assumptions informing popular, high and mass-media culture of the period. In this course we will examine Dylan's sixties output closely and in cultural context. Moreover, we will use it as a lens to focus on questions such as: What is 'folk' music and can it exist in a consumer culture? When we call certain musical sounds, gestures or textures 'authentic', what do we mean? Can popular music be a vehicle for politics? Are rock lyrics poetry? Can you tell the truth through a mask? Along the way, we will encounter thinkers, poets and pickers such as Woody Guthrie, Oscar Wilde, Hieronymus Bosch and Blind Lemon Jefferson. We have Bob Dylan to thank for making a syllabus like that possible. (2-4 quarter hours)

AI 249
ALL THE CITY’S A STAGE: THEATER AND COMMUNITY IN CHICAGO
Undergraduate
In this course students will read, view and discuss dramatic works that reflect the vibrancy and diversity of Chicago’s communities and neighborhoods. This will help them understand how a common theme can be explored in different ways, depending on the creative process of the author/playwright. Works may include "A Raisin in the Sun," "Clybourne Park" and the musical "Chicago." Students will also be asked to attend a theatrical production currently being performed in Chicago to gain a sense of the richness and variety of the Chicago theater scene (2-4 quarter hours)

AI 250
CHINA: CHANGING ROLES OF INDIVIDUALS
Undergraduate
For two millenniums, the philosophy of Confucius (551-449 BCE) had provided the moral and intellectual basis for the roles of individuals and the educational system in Chinese society. In the formative years of the current Communist regime, a serious attempt was made to rid China of its cultural foundation, which was exemplified in Mao’s Cultural Revolution (1966-1976). With the recent economic development in modern China, the study of Confucius School is back in vogue, with the full backing of the current government. This course will introduce the students to the basic teachings of Confucius and evaluate how they define individuals and their roles in society for more than 2000 years. A flavor of China, the study of Confucius School is back in vogue, with the full backing of the current government. This course will introduce the students to the basic teachings of Confucius and evaluate how they define individuals and their roles in society for more than 2000 years. A flavor of the Chinese Cultural Revolution and how individuals were treated during that period of political persecution and chaos will be obtained through readings and video clippings. The course will also examine the comeback of Confucius ideology to the mainstream and compare the current Chinese educational system with our American system. Through class discussions, students are encouraged to explore the function of education in preparing the roles of individuals in society and how globalization today is changing them both in China and the U.S. (2-4 quarter hours)

AI 251
F.A.I.L.: FUNDAMENTALLY, ABSOLUTELY, INTEGRAL TO LEARNING
Undergraduate
Do you ever feel as though “FAIL” is a four-letter word? Is “FAIL” one of those bad words that you were taught never to say? Is it a word you dare not experience? Do you go through life trying to avoid this four-letter word at all costs? If so, is there a dream, a value or a vision for your life that your fear of failure has prevented you from achieving? If you answered yes to any of the above questions, then this is the course for you. As John Maxwell notes in his book Failing Forward, we are not properly taught to effectively fail. In most circumstances the only thing we learn about failure is that it is something that must be avoided. And yet success, in most occasions, cannot be attained without experiencing failure along the way. Instead of offering more ways to avoid failure, in this class you will learn to see and use failure as a stepping stone, rather than a roadblock, to success. (2-4 quarter hours)

AI 252
TODAY’S SUCCESSFUL BUSINESS MANAGER
Undergraduate
This course will provide students with a foundation that will help them deal with ethical issues arising in business today. It will first provide an overview of where ethics fits within philosophy, examine some of the important ethical frameworks, and describe how to apply them. It will then describe best practices? for how companies and managers can excel in today’s business climate, and illustrate them via relevant corporate examples. All of this will provide students with the skills they need to deal with ethical issues as managers. (2-4 quarter hours)
AI 253  
DIGITAL STORYTELLING  
Undergraduate  
Students analyze examples of digital storytelling on the web and discuss the role digital forms of storytelling play in historical, social, political, educational, professional, and personal change and memory. Students explore storytelling first through writing and then through use of image, audio, and/or video. They will learn the creative process of digital storytelling, which involves planning, story development, audio/visual/textual design, editing, and presentation on the web. This course does not require prior knowledge of audio/visual/video/web editing software or html. (2-4 quarter hours)

AI 254  
RESISTANCE DURING THE HOLOCAUST AND WORLD WAR II  
Undergraduate  
This course explores the history of the Holocaust in the context of the Second World War (1939-1945) with a central focus on examples of resistance to discrimination, fascism and oppression. We will explore varied forms of opposition including armed resistance, spiritual resistance, resistance through writing and identity preservation. We will read autobiographies, view documentary and dramatic films, and use museum resources to develop our understanding of resistance. Required activities include a visit to the Illinois Holocaust Museum and Education Center (Skokie, IL). We will also consider the implications of this history for making ethical choices in our world today. (2-4 quarter hours)

AI 255  
SELF EXPLORATION: INSIDE OURSELVES, OUTSIDE WITH OTHERS  
Undergraduate  
Exploring the self can be a very personal and satisfying experience, but can also provide clues as to how you interact with others, accomplish daily tasks and become a more happy, productive and respected individual. This course guides you through a self reflection process in a collaborative learning mode where you will learn about yourself, share the process with a learning partner and observe the trends and conclusions of the class. This course will operate in a unique blended format with three required meetings which will link students in the classroom to other students taking the course online in a synchronis chat format. You will have the option to attend either on campus or online for the scheduled meetings. (2-4 quarter hours)

AI 256  
WORKPLACE AND PROFESSIONAL ETHICS  
Undergraduate  
This hybrid-learning course is open to all DePaul undergraduates. It provides a thorough grounding in the theoretical and applied nature of work-based ethical decision-making. We engage the tenets and assumptions of four major ethical perspectives, using them to examine the meanings and implications of morality in professional life. Using the tools of reason, we investigate obstacles to ethical decision-making in one’s and others’ professional behavior, and apply our learning in the writing of a personal ethical code. (2-4 quarter hours)

AI 257  
ENGAGE FOR CHANGE: GET INFORMED, INVOLVED AND CONNECTED  
Undergraduate  
Name your cause. Whether it is the death penalty, reproductive rights, cancer advocacy, heart disease, homelessness, social security, welfare reform, marriage equality or the environment most people would like to see the world change in some way. The reality is that not everybody has found a way to engage in their community and make their voice heard. Students will engage in personal and collective reflection to explore their own learning styles and the experiential learning process. They will learn how everyday citizens can organize to make sure the issues that matter to them can be addressed at city, state, and national levels. The course will utilize speakers, discussion, learning journals, readings, action assignments and small group exercises to provide an environment where students can explore their own beliefs and perspectives on social change, democracy, citizenship and the process of government in the United States. (2-4 quarter hours)

AI 258  
GLOBAL MOVEMENTS IN THEATRE: MODERN, AVANT-GARDE, POSTMODERN AND CONTEMPORARY TRENDS  
Undergraduate  
This Bridge course explores theatre practice and theory from 1850 to the present. Topics include the rise of independent theatre, play censorship, popular entertainment, avant-garde theatre and contemporary theatre. Through readings of dramatic literature, viewing of video and attendance at live performances, this course examines eclectic forms of global theatre, linking current practice and theory with enduring theatre traditions. Reading and in class videos encompass a diverse selection of eastern and western plays. Included in this course are engaging field trips to local theatres to view live theatre performances. Can be taken for up to 3 competences. Faculty: Patrizia Acerra (2-4 quarter hours)
AI 259
CHICAGO SPACES AND PLACES: WHY DESIGN MATTERS
Undergraduate

In the 1830s, Chicago's emerging city government adopted the motto "Urbs in Horto", or "City in a Garden," envisioning Chicago as a lush oasis of commerce and design along the shores of Lake Michigan. Nearly a century later, Daniel Burnham's Plan of 1909 called for expanding Chicago's forest preserves, preserving the lakefront, and creating a system of tree-lined boulevards. How well does the Chicago of today match these visions? This course introduces students to the history of landscape design by visiting parks and gardens in the Chicago area. By studying sites like the 606, Garfield Park, and the Alfred Caldwell Lily pool, participants will learn the key features of design movements like modernism, the prairie school, and new urbanism. The course will also study the social aspects of urban space: Who uses parks, and for what purposes? What makes an urban space work well? How are class and race played out in Chicago's green spaces? How does access to green space map along economic lines? What is at stake when green space is created or lost? Site visits will allow course participants a first-hand experience of these unique landscapes, and a series of short written assignments will address these issues through the lens of disciplines like design history, sociology, and urban ecology. In a culminating project students will apply what they have learned by generating a design, performance, or other creative project of their own, inspired by their experience of Chicago's landscape. (2-4 quarter hours)

AI 260
CREATIVITY AND THE WRITER'S TOOLBOX
Undergraduate

For writers, no matter how new or experienced they may be, there?s always a need to ?self-renew.? Every blank page is an invitation to enhance one?s writing asset, for with each blank page or new assignment the writing process begins again. What, then, are the tools successful writers use to enhance their writing abilities, sustain their momentum, refresh their creativity and renew their resolve? What writing tools are better suited for creative writing, business writing, journaling, or memoir? What tools do we already have that may only need repurposing or remembering?(2-4 quarter hours)

AI 261
PERMEABLE BORDERS: REPRESENTATIONS OF GENDER IN THE 20TH CENTURY
Undergraduate

In this Bridge course we will examine the ways depictions of gender in art and literature are indicative of changes in the way we perceive gender. We will explore these depictions through a combination of analytical and creative activities. Our readings will include Orlando by Virginia Woolf, selected poems and creative writings by Gertrude Stein, Langston Hughes, T. S. Eliot, Quentin Crisp. Our readings of creative work will be supplemented with readings of cultural theory and philosophy including excerpts from Lyotard's Libidinal Economies, Deleuze and Guattari's Anti-Oedipus and Judith Halberstam?s In a Queer Time and Place. This course will give students the opportunity to practice several types of writing, including journals, essays, research papers and creative writing (including flash fiction and poetry.) The class assumes a basic understanding of English grammar and composition. Students can register for up to 3 competences. (2-4 quarter hours)

AI 262
GLOBALIZATION AND THE IMPACT OF TECHNOLOGY
Undergraduate

This course focuses on current affairs regarding globalization as a world system of operation in society. The course aims to clarify our notion and understanding of globalization by looking at the impact that technology has had in the way we conduct our lives. Throughout this course students are asked to read and reflect upon different technologies that we have been seeing the way in which people communicate. The central idea to broaden our perspective about globalization is that one the most important and significant activities that we do as humans is to communicate. Therefore, our focus of study will be centered around communication technologies widely used in the world, potentially continuing to change our lives even more (2-4 quarter hours)

AI 263
THEIR EYES WERE WATCHING GOD: THE LIFE AND WORK OF ZORA NEALE HURSTON
Undergraduate

Zora Neale Hurston, adult learner, writer, folklorist, playwright, and storyteller, was an amazingly gifted woman. Her novel, Their Eyes Were Watching God, is a recognized classic. A legend in her own right who Alice Walker ranks with Bessie Smith and Billy Holiday, Zora Neale Hurston has been a beacon for students interested in learning about Black life and culture. Students in this class will immerse themselves in the literature by and about Zora Neale Hurston and will create research projects that connect their learning with their own scholarly interests. (2-4 quarter hours)
PASSING ON TRADITIONS
Undergraduate
In this course, we will investigate our perceptions, understandings and feelings about the world. We will reveal connections to the past by emphasizing non-traditional ways of knowing and learning. Students will examine how traditions or collections of beliefs are passed on by researching an individual or groups of people from the past or present. Working individually or in groups, students will create an oral presentation and research paper. Source material can include diaries, journals, or historical books. This experience will help students to reflect on the traditions in their lives in order to come to terms with past and present realities. (2-4 quarter hours)

MORALITY OF MONEY
Undergraduate
Is the love of money, the root of all evil? Why is so much of the world's population living in poverty? What is the difference between ethics and morality? What do the world religions say on the acquisition and use of money? Are Capitalism and free markets in conflict with moral business practices? (2-4 quarter hours) In this class, we will explore all the above issues and related topics, such as the treatment of the poor in every country. Students will be encouraged to suggest research topics within the scope of the class. Our concentration will be on United States and Western Europe's monetary practices and the effects that they have on social and governmental policies. Since we live in a global world, the influence of other countries on our monetary system and economy will be examined. The wars in Iraq and Afghanistan, as well as the European debt crisis of the PIIGS (Portugal, Italy, Ireland, Greece and Spain), clearly show how our stock markets react to problems in Europe. The Middle East conflicts affect the price of our oil. All of these activities are driven by the lack of or acquisition and choice in spending money. The definition of just what is morality will be our starting point. This class is a combination of philosophy of money as well as the practical application of its use.

ETHICAL DECISION MAKING
Undergraduate
Ethical decisions are often difficult to make, not because there are no right choices, but because there may be several right choices. This course will go beyond WHAT is right or wrong to examine WHY we say something is right or wrong. In the first part of the course, students will gain the intellectual tools and insights to lay bare their own reasoning processes and those of others. In the second part of the course, students will apply these tools to a consideration of the ethical issues raised by the high technology of current health care. (2-4 quarter hours)

THE EXAMINED LIFE: A QUESTION OF PHILOSOPHY
Undergraduate
"The unexamined Life is not worth living," exclaimed the Greek philosopher Socrates, setting the tone for philosophical quests that have shaped out thought and civilizations. "Neither is the examined one," retorted German philosopher Schopenhaurer 2,300 years later after surveying the prospects of the modern world. This course will outline the philosophical tradition of rational thought that stretches in between these thinkers. Students will focus on how the great thinkers and traditions East and West considered ethical, metaphysical, epistemological, political, and aesthetic problems. And they will engage in a philosophical examination of their own life and beliefs. (2-4 quarter hours)

CHICAGO AUTHORS
Undergraduate
Chicago has earned a varied international reputation for its gangsters, architecture, railroads, political machines, stockyards and industries. But for many around the world, Chicago is best known for its writers and literature. By the turn of the 20th century, Chicago was heralded as the "literary capital of the United States" and it is still home for great writers. Students will read two novels or books of poetry to explore Chicago's history, characters, problems, and images. The class will trace literary movements and explore elements of structure, character, plot and style in fiction and poetry. (2-4 quarter hours)

MAKING THE SCENE
Undergraduate
This course is designed to engage students in the art of playwrighting in order to discover the essential nature of drama on stage and in life. By reading and viewing plays, students will be encouraged to reflect on the apparent contradiction between "universal truth" and individual experience. In addition to appreciating the structure and method of drama, students will learn to identify the "why" behind any play and to use drama as a means of creating and telling stories. (2-4 quarter hours)
DESIGN FOR LIVING
Undergraduate

The purpose of this course is to develop an awareness, understanding and analysis of the Chicago-area built environment. Architectural, public art, urban design and urban planning elements, techniques and issues will be presented with downtown Chicago as the primary study area. Specific architectural and development plans will be analyzed from various perspectives, such as: historical, social, technical, functional, aesthetic and symbolic. The development of Chicago's commercial architecture, and its contribution to modern architectural theory and practice, will receive special emphasis. (2-4 quarter hours)

THE ART OF PAPERMAKING
Undergraduate

Paper is everywhere. We use it to read about the latest news, to wrap birthday presents, and to leave ourselves little sticky reminders. You can find paper almost anywhere and chances are, you have a lot of it lying around your house, lurking in drawers and clogging up your recycling bin. It is one of those commodities that we take for granted. Can paper be art? Can it be the result of creative thinking? Can it be beautiful? Learners in this experience will learn about paper and its history, and will participate in the ancient art of papermaking. While examining the definitions of art and creativity, students will experiment with papermaking techniques, and will create their own works of paper art. The Art of Papermaking focuses on creative processes and art making. This will be, necessarily, an experiential process. Most of the class time will be taken up with experimenting with art materials and with employing the roles of color and design in works of art. Students should prepare by wearing old clothes to class and should expect to get their hands dirty. (2-4 quarter hours)

SUPREME COURT DECISIONS
Undergraduate

In this course, students will be challenged to research the factors contributing to major Supreme Court decisions. This will include a study of the ethical systems which run throughout the court's history which we categorize as a liberal or conservative court. In looking at our government structure and the three branches of government, most people select the presidency as the most powerful branch. This class will allow students to see the effects that Supreme Court Decisions have on society for many generations and even centuries. One needs only to think of Brown vs. The Board of Education and Roe vs. Wade to realize the huge amount of power resting in the Supreme Court. Supreme Court judges are appointed for life. Their influence can span many decades. They are not accountable to the average citizen. They retire at their will and have tremendous power. After this class students will have a different outlook on which branch of the government affects society the most. The course will include a study of the structure of our judicial system leading up to the Supreme Court. We will begin with local courts in cities or counties, progress to state courts and then federal district courts culminating in the Supreme Court. Students will have a much better understanding of this branch of our government. At a macro level, the students will be able to trace ethical systems back to our founding fathers and explain how the systems and values have changed since then. (2-4 quarter hours)

JUSTICE AND POLITICS: THE TRADITIONS OF POLITICAL PHILOSOPHY
Undergraduate

Are politics ever just? Should they be? What is justice? Throughout the ages, philosophers and statesmen have provided different answers to these fundamental questions. This course will explore the role of justice in politics, using as a guide the best known works of two great thinkers in the tradition of political philosophy. Plato's Republic and Machiavelli's The Prince appear to offer two very different answers to the questions of justice, and politics. By exploring their works, students will grapple with these questions, probe Plato's and Machiavelli's differing approaches to the role of justice in politics, explore their own conceptions of these critical issues and wrestle with the role of justice in current political events. Students will also gain an introduction to the tradition of western political philosophy as reflected by two of its most influential thinkers. (2-4 quarter hours)

WRESTLING WITH THE ANGEL: GOD, SEX, AND THE GUILTY CONSCIENCE IN LITERATURE
Undergraduate

Humans have always had an impulse to worship a God (or Gods). Humans have always been irresistibly drawn to sexual self-expression. Pervasive throughout history is this fascinating paradox: the God whom we worship condemns the sex we crave. Guilt is our link between the sacred and the profane. The triangulation of religion, sexual desire, and guilt has long been the concern of artists and writers. This course examines this phenomenon in such literary masterpieces as Nathaniel Hawthorne's The Scarlet Letter, Tony Kushner's Angels in America (Parts 1 and 2), and William Shakespeare's Measure for Measure. We will also study poetry, literary criticism, and relevant excerpts from sociological, theological, and psychological texts. In addition to participating in class discussions and presentations, students will be required to submit a final paper and a ten-entry journal. (2-4 quarter hours)
AI 275
INTRODUCTION TO CREATION SPIRITUALITY
Undergraduate
This course provides an overview of Creation Spirituality, a movement that draws on ancient spiritual traditions and contemporary science to awaken authentic mysticism, revitalize Christianity and Western culture, and promote social and ecological justice. Creation Spirituality teaches that God permeates all things and that humanity is an original blessing to the earth. In this paradigm, Christ is God’s liberating and reconciling energy, transforming individuals and society’s structures into conduits of compassion. As we embody God’s love, we become the Creation that God intends. Topics to be explored include differences with fall-redemption attitudes, relationships to post-modern world views, and applying insights to personal life and work dynamics. (2-4 quarter hours)

AI 276
CREATIVE INK: THE ART OF WRITING
Undergraduate
This course will carry students through a series of creative writing experiments aimed at stimulating their imaginations and discovering their literate voices. Students will be exposed to a variety of techniques for story writing, poetry, and avant garde experiments. The course will combine in-class group writing and critical sessions, and individual consultation with the instructor for personal development. Students will also learn how to find outlets for their completed creative work. (2-4 quarter hours)

AI 277
THE UNDERGROUND RAILROAD
Undergraduate
This course will draw from national and regional resources to explore ways of knowing in the liberal arts about the Underground Railroad. The learning experience will include a field trip to a local museum, virtual field trips, films, museum catalogs and other readings, collaborative learning projects, and guest presentations. Students will create poster presentations or other visual products to illustrate their learning about Underground Railroad and write interpretative papers to accompany them (2-4 quarter hours)

AI 278
THE LITERATURE OF INCARCERATION
Undergraduate
The U.S. incarcerates well over 2 million people. Proportionally, no other democratic country in the world comes close to this level. Locked away, out of sight and hearing from most of us, this population of women and men is represented by the media in lurid, predatory images. The writing that has emerged from prisoners paints an altogether different picture, however. In this class, we will study several literary texts—short stories, essays, poems—written by women and men who have been or are currently incarcerated. The class will be offered for one competence only and will meet the first five weeks of the quarter. (2 quarter hours)

AI 279
EXPLORING WORLD LITERATURE: THE INTERNAL HISTORY OF HUMAN EXPERIENCE
Undergraduate
This course is about exploration, about discovery, about meaning. Together we will explore remarkable stories of world literature, and together we will discover remarkable worlds that open our lives with meaning. By means of consummate storytelling and remarkable language, respected masters and new and emerging writers, chosen for their literary excellence, will transport us to South America and to the Caribbean; to North America; Europe; and Russia; to the African Diaspora; to the South Pacific; to Mexico; Central America and to the Middle East; to Mississippi and to Harlem; to South Asia and to East Asia. The course will also include short stories from acclaimed Native American writer, Sherman Alexie, who also wrote the screenplay for the academy award-winning movie, Smoke Signals. This course's chosen classic and contemporary masterpieces of short fiction will reflect thematic, aesthetic, and cultural variety: different styles, points of view, and rich diversity of cultural, historical, and gender perspectives. The stories draw us in by powerful images garnered not only from our own backyard, but from the many yards across the globe. Competencies: L7, A1X, A5, H3X, FX. Faculty: Susan F. Field (2-4 quarter hours)

AI 280
TRADITIONS AND TRANSITIONS: PROFILES IN ADULT LEARNING
Undergraduate
This course is designed to assist learners in investigating the perceptions, understandings and feelings about their lives and the contexts in which they are lived. It will help to reveal connections to the past and conditions shaping the future with special emphasis on non-traditional ways of knowing and learning. Students will choose persons from the past or present and examine how a family and/or cultural tradition is passed on through time, including forces shaping its future form. (2-4 quarter hours)
AI 281
**RITUAL AND EVERYDAY LIFE**
*Undergraduate*
This class will delve into ritual as an experiential, expressive performance of self, culture, spirituality, and ethics. We will be reading, viewing and discussing various examples of ritual forms, both religious and secular, Euro-American and non-Western, and looking at works about ritual performance by anthropologists and performance theorists like Ronald Grimes, Richard Schechner, and Victor Turner. We will also be experimenting with the role of ritual in our daily lives, creating our own rituals and ritual performances. This process will highlight what it means to endow everyday objects and events with sacred significance, and how such an expression of self establishes an essential relationship with community. (2-4 quarter hours)

AI 282
**LEISURE FOR WELL-BEING**
*Undergraduate*
The pursuit of happiness for most people is an important aim in life. A personal feeling of well-being includes "emotional happiness" and the rational satisfaction with one's own life. In this course you will attempt to define the term "well-being" and discover its relationship with other concepts such as mental health and life satisfaction. How does physical exercise influence well-being? How do positive and negative life events influence well-being? Do good social relationships guarantee happiness? Do the expectations one has in life with regard to income influence well-being? Is it important to set goals to achieve a high level of well-being? These and other questions will be addressed in this course. You will try to define some of things a person can do to increase his or her level of well-being. Others' ideas serve as common course content, as presented in the material assigned to this course. You will be asked to participate actively and critically, to work individually and in study groups, using your own experience as a field of analysis and reflection. Active group participation will foster a harmonic, interactive environment, which might increase positive relationships among students and foster a feeling of well-being throughout this course. (2-4 quarter hours)

AI 283
**MEXICO: A PILGRIM'S JOURNEY TO THE CULTURES OF MEXICO**
*Undergraduate*
Participants in this program will travel to one of the most significant centers of Catholic pilgrimage in the Americas: the Basilica of Our Lady of Guadalupe, the most visited Catholic shrine in the world. They will join countless numbers of other pilgrims from all over the world who come to Mexico City around December 12th for the festival of Our Lady of Guadalupe. In addition, the group will tour other major sites of this great world city such as El Zocalo, the Metropolitan Cathedral, and the Dolores Olmedo art gallery. In the Templo Mayor and National Archaeological museums, students will learn to recognize and interpret symbolism in these collections of the most important works of Pre-Hispanic Art and artifacts in the world. To provide immediate context for the variety of sites visited, expert guides will accompany the group to introduce students to the historical and cultural context of what they have seen. Added to this rich immersion into Catholic Mexico's religion, culture, and history will be an exploration of the cultures of much older residents of this region: the mighty Aztecs and their mysterious predecessors, the civilization known only as "the Elders" that built and used the famous pyramids of Teotihuacan ("The Land of the Gods"). Our modern pilgrimage to Mexican culture past and present will culminate in a visit to the Fiesta de la Virgen de Guadalupe. The combination of experiential learning and history, of homestays and pilgrimage, makes this program a brief but rich encounter with some of the great cultures of central Mexico, past and present. At the conclusion of the program, students will be invited to reflect on the rise and fall of civilizations, on vibrant living communicates, and on the search for meaning in all its manifestations. The group will be hosted by faculty and staff at Mexico City's Universidad de Panamerica, and accompanied by SNL faculty member. (2-6 quarter hours)

AI 284
**THE BRAVE NEW WORLD OF MARKETING COMMUNICATIONS**
*Undergraduate*
This course will help students understand and successfully navigate through the brave new world of marketing communications and advertising: a world of segmented audiences, fragmented media channels, technology and interactivity, online communities, and on-demand media, where brand building has emerged as a business imperative. Students will learn which principles of traditional marketing communications are in, which are out, and the new ones that have emerged. We will read books and articles and examine the internet, e-commerce, experiential marketing, consumer-generated content, branded entertainment, search, music and mobile channels. Through the process of creating marketing communications programs utilizing these channels, students will also gain skills in collaborative learning and creativity. Competencies Offered: A5, H2G, S3F, FX (2-4 quarter hours)
AI 285
WORK, PLAY AND REST: INTEGRATING THE FRAGMENTS
Undergraduate
Life has become fragmented. In our modern lives, we strive to maintain work, play and rest in separate realms, within which we work hard, play hard, and even rest hard, all in the hope of finding balance. But when work invades play, and rest is sacrificed for either one, it might be time to shift the paradigm of separateness we have sought to maintain. This course will explore ways we can integrate the fragments of our lives in order to find more fulfillment, balance, satisfaction, and consequently relief both within these three arenas and in the “gray areas” in between. Learning will occur in two modalities, each of which will enhance the other: experientially-based guided movement, storytelling and vocal activities from the improvisational practice of InterPlay?, and the study of literature (articles, books, websites and videos) concerning mind-body awareness. Through the in-class practices of InterPlay?, students will explore how stressors are held in the body, and define for themselves which aspects of creative expression help to release what no longer serves. Basic movement, storytelling and vocal activities will be introduced in an incremental way, with no prior experience necessary. The focus will be on both individual expression and collaborative possibilities, and personal as well as community and organizational applications will be explored. In our study of the science behind mind-body awareness through class discussions and written assignments, students will explore the application of concepts in conjunction with the experiential model offered by the InterPlay? practice. Part practical activities, part reflection, and part synthesis of defined concepts and models, students will be asked to come to this class as willing participants and identify what methods and systems are applicable to their own lives, and what? from their unique vantage point? could constitute elements toward a new model of health and wholeness. (2-4 quarter hours)

AI 286
NEW ORLEANS IN SONG, STORY & STRUGGLE
Undergraduate
The tapestry of New Orleans culture is tremendously rich and varied. This course will concentrate on two strands in that tapestry music from New Orleans and fiction about it. Students will learn about music forms which originated in the city or its environs and which have gone on to dazzle the world, including jazz, r&b, zydeco and funk. We will situate these art forms in social and historical context and examine the complex creative processes which have shaped them. We will become familiar with innovators and icons such as Louis Armstrong, Professor Longhair, Clifton Chenier, the Neville Brothers and Dr. J John. We will also read works by literary artists who have a background in and/or fascination with New Orleans, including The Awakening by Kate Chopin; A Streetcar Named Desire by Tennessee Williams; and Mumbo Jumbo by Ishmael Reed. Moreover, we will consider the role played in American history and imagination by New Orleans as well as the role played by images and fantasies of New Orleans in struggles for social justice at the local and national level. (2-4 quarter hours)

AI 287
THE PRACTICE AND SPIRIT OF CREATIVE WRITING
Undergraduate
When I teach writing, I often interchange the word “writing” with the word “life.” Writing is life. But many have forgotten. Author Georgia Heard writes in her book Writing Toward Home, “There are many times when I’ve felt that I had nothing valuable to say. That real writers were other people. It has taken me a while to believe that the way I feel each day, and the way others speak when we’re least self-conscious, is where writing comes from. When we speak in a language that is ours and tell our own stories and truths — this is where writing comes from.” Yet still many have forgotten. Poet Marge Piercy’s words resonate to all of us when she writes: She must learn again to speak/starting with I /starting with We . . . . There is an ancient Chinese proverb: A bird doesn’t sing because it has an answer, it sings because it has a song. Writing is natural, like a bird’s song. But many have forgotten. When it comes to writing, it was American writer Robert Frost who believed that if one was open, one might even realize “with initial delight that you are expressing thoughts that you didn’t know that you already knew.” This course will involve the student in the practice and spirit of creative writing. Very importantly, it will involve through a re-awakening and a re-discovery of the creative potential that lies inside, waiting to speak again. Our course follow the lead from the great essayist E.B. White who defines writing as communication, and creative writing as the self coming into the open. Indeed, writes author Christina Baldwin in her essay on the writing life: “There comes a journey, And there comes the urge to write it down, to bear witness to our experience, to share our questions and the insights that come from questioning.” In a supportive, sharing learning environment, each class session will be presented in an exploratory workshop format that integrates content and spontaneity. Students will be inspired to risk, to explore, to bring to consciousness, to nurture, to trust and to honor the originality of their own emerging personal voice. Students will also gain awareness of and understanding into the wonders of the creative process itself. The flexible course structure is intended to accommodate individual needs and writing exploration and to encourage individual creative writing development. Students are asked bring to class a few belongings as one writer suggests: A nugget of personal truth, still buried; a bit of history under the skin, ready to be transformed. And let me add that students bring some more belongings: an open mind with a dash of wonder; a pocketful of dreams; the courage (it may be shy) to create; and a heart filled with blind faith. Competencies: L-7, A-2-A, A-5, F-X. Faculty: Susan F. Field. (2-4 quarter hours)
AI 288
POWER AND LEADERSHIP IN PUBLIC SPEAKING: MANAGERIAL COMMUNICATIONS
Undergraduate
When you are trying to sell an idea or product, your presentation must be specific and detailed, convincing and authoritative. This course will teach students to develop and deliver exciting and effective presentations. Through numerous individual short presentations and one final major presentation, students will learn how to overcome such speaking problems as nervousness, eye contact, understanding the audience and its culture, questions and answers, effective use of graphics, distractions, time control and how to handle troublemakers. Through the use of flip charts, overheads and computer-generated graphics and videos, students will learn to effectively organize their material to communicate their subject material to the audience. Students will need a basic understanding of computer software such as PowerPoint, database spreadsheets and access to the Internet for research. Students will develop an appreciation of the complexity of the communication process and the choices facing the communicator. (2-4 quarter hours)

AI 289
ACTION FILMS: HONG KONG AND HOLLYWOOD
Undergraduate
In this course students will compare and contrast action films completed in Hong Kong and Hollywood. (2-4 quarter hours)

AI 290
MEN AND MASCULINITY
Undergraduate
This class is an introduction to the history, roles, and social expectations of masculinity in the United States. Its starting point is the social construction of gender, and the origins of ideas about “masculine” and “feminine” behaviors. We look deeply into the social, economic, political and cultural forces that shape views of gender. The class draws upon a wide array of literature, poetry and perspectives on boys, men, social roles and masculinity. Just as the feminist movement showed girls and women the vast array of possibilities in a “feminine” world, so, too, does this course consider the possibilities of the “masculine” world. We will particularly explore research that addresses the experience of contemporary boys; their struggles and the painful issues they must face on their journey to manhood in American society. (2-4 quarter hours)

AI 291
TRAINING DEVELOPMENT
Undergraduate
This five week course will address the development of instructional methods and materials consistent with the purpose, audience, and context of a specific training need. Students will learn how characteristics of adult learning and adult learners can converge with principles of instructional design to create effective and dynamic training materials. Students will demonstrate competence through the design of training methods and materials. * Successful completion of Training Design is required prior to registration. Students may register for only one competence (2 quarter hours)

AI 292
EONS AND ARTS II: MANIFESTATIONS OF CULTURE
Undergraduate
This course will connect specific historical eras in Western culture with representative art forms so students can gain cultural insights. Particular attention will be paid to artifacts in the Chicago area. Students will analyze the relationship between popular art and movements in history through lecture, readings and discussion. We will also address contemporary cultural issues, including how later peoples will judge our values based on our arts. (2-4 quarter hours)

AI 293
THE HORROR FILM
Undergraduate
The horror film has introduced and popularized many of the cinema's most unique stylistic innovations, especially in the areas of camerawork, lighting, color, sound, point-of-view, and editing. The genre also helps us to understand how filmmakers construct surprise and suspense to maximize the viewer's emotional involvement and response to film narratives. This course introduces students to the language of film analysis by studying a number of representative films in the horror genre. We will also examine the social and cultural dimensions of the "fear" response that horror films exploit so strategically. We will read exciting theoretical work discussing the reasons for the genre's widespread appeal. Weekly in-class film screenings include the following: Psycho (Hitchcock version), The Texas Chainsaw Massacre, Halloween, Scream, The Cabinet of Dr. Caligari, and Suspiria. Students will give class presentations and write papers on topics tailored to their interest in the genre. (2-4 quarter hours)
AI 294
THE PRACTICE OF PEACE
Undergraduate
In the midst of war, what does it mean to practice peace? How might you and I work to practice peace? We will explore some of the principles, practitioners and practices of nonviolent peacemaking, allowing for debate and discussion. We will explore personal, interpersonal and political peacemaking. We will examine power relationships and dynamics inherently at tension in the practice of peace. We will read the works of contemporary peacemakers, such as Marea Corrigan Maguire, Jodi Williams, and Thich Nhat Hanh, as well as seminal figures in the peace movement, such as Martin Luther King, Jr., Mahatma Gandhi and Dorothy Day. We will have guest lectures from local and international peace practitioners and discuss various ways of practicing peace on personal, local and global levels. (2-4 quarter hours)

AI 295
SHADES OF GRAY: MORALITY AND ETHICS IN FILM
Undergraduate
In the early days of movies, people flocked to the theater to see the good guys (white hats) triumph over the bad guys (black hats). As the art of cinema evolved, the characters and the ethical issues they faced became more challenging and complex. Through in-class screenings and related readings, this course will examine films whose themes strongly concern the depiction of ethical and moral choice. We will discuss the ways in which the film makers create meaningful ethical dilemmas; how the characters' choices are portrayed; and how these portrayals may influence our own formulation of value systems and ethical choices. (2-4 quarter hours)

AI 296
STAGE PLAY(ING)
Undergraduate
The plays the thing... A play is action, play, conflict, resolution, motion, emotion, live now. A play is crafted for the stage, not for the page. What we find on the page is a script, a guide to the play, not the play itself. The course will explore the play (and playing) in as many of its dimensions as we can discover. Students will read about reading scripts, and then read them to see the play as it could come to be. We will put together scenes, sketches, stories, and/or short plays; as well as improvise, role play, and act in our own work as well as in the work of established playwrights. Students will take the study to the theater to see what works and what doesn't work on the stage. The class will work and play together and apart and let the creative imagination take us where it will.

AI 297
WOMEN'S WISDOM AND THE POWER OF PERSUASION
Undergraduate
In this course of fulfilling our private and public lives, we draw on combinations of our knowledge and experience (wisdom) and capacities to be persuasive. The alliance of wisdom and persuasion goes back to early Greek philosophers who formulated them as subjects for men, but not for women. More contemporary perspectives suggest that men and women may bring differing palettes to the artistry which weaves persuasion and practical wisdom. This course will examine emerging theories on the stages of *knowing,* and their philosophical roots, and the application of this developing knowledge to many facets of professional and personal life. Students will utilize case studies, discussions, readings, self-explorations and other activities to analyze systems of thought regarding the development of values, knowledge, and persuasive skills with a particular emphasis on women's perspective and experiences. The role of media shaping attitudes, motivation, and decision-making processes will be explored through the images and metaphors conveyed to and about women. The course will offer and opportunity for understanding the roots of many of our values and perspectives on women's approaches to knowledge and persuasion. (2-4 quarter hours)

AI 298
THE ITALIAN RENAISSANCE
Undergraduate
From the thirteenth to the sixteenth centuries, the Italian peninsula was the center of a new age of human discovery and expression. With the unfolding of ancient philosophies, the Catholic Church's temporal and spiritual control over Western Europe faltered. This age changed the meaning of political power, art, literature, science, and religious life. New perspectives lifted the horizons of thought and artistic expression. What meaning and value do these issues have for the contemporary person? By exploring the richness of Renaissance culture, this course attempts to answer the following questions: What happened on the Italian peninsula during the Renaissance? Who were the principal players? How did this period influence western civilization, particularly with respect to learning? What does the Renaissance mean today? Why, indeed, does it play such a major role in contemporary consciousness of the arts, literature, politics, and science? While the general focus of the material is the Renaissance in the Italian city states, the course concentrates on the rise and fall of the Medici family in Florence. Cosimo, Lorenzo, Piero and Giovanni de' Medici (Pope Leo X) were instrumental in the development of this spectacular age in Western Civilization. Learners will also confront our own time with respect to issues raised in the Italian Renaissance. (2-4 quarter hours)
AI 299
ETHICAL ISSUES IN BIOMEDICINE AND HEALTH
Undergraduate
Should parents be allowed to genetically engineer designer babies? Given the rapid pace of developments in genetic engineering, this capacity is eminent. Emerging technological capacities in a variety of arenas are creating a host of social questions and potential ethical implications: What are the ethical issues associated with accelerating accumulation of health data? Do pharmaceutical companies have a moral obligation to expand global access to life-saving AIDS drugs? Given our ever-unfolding understanding of the human brain, what regulatory concerns ought to accompany the rollout of new, powerful brain-based biotechnologies? Which methods and approaches are needed to make sense of the impact of science and technology on people's lives worldwide? This course is both an introduction to bioethics, -- an area concerned with moral questions related to health, medicine and society -- as well as a reflection upon the ethical and social implications of rapidly emerging technological and scientific capacities. In this course, learners will learn and use ethical theories to consider and analyze general bioethical issues with special attention paid to the unique challenges that emerge as a result of rapid advancements in scientific and technological knowledge. While this course is housed in the School for New Learning (SNL), it is also cross-listed with DePaul University's department of public health. For graduate students taking this course for credit, there is an additional assessment required, specified in the syllabus section below. This course will also require students to deploy and hone critical thinking skills, writing-related capacities as well as reasoning skills. (2-4 quarter hours)

AI 300
ETHICS IN THE PROFESSIONS
Undergraduate
This course offers a thorough review and critical assessment of at least two major philosophical perspectives in the field of ethics. Work includes the study of various ethical frameworks and their value in addressing some of the moral dilemmas common to business and professional life. Special attention is given to the Vincentian focus on questions of social and individual justice. (2-4 quarter hours)

AI 313
RACE AND IDENTITY IN AMERICAN THEATER
Undergraduate
This course will explore issues of race and racial identity in American society through the medium of theater. Students will examine a diverse range of theatrical pieces and consider the social and political context for each work as well as the impact each has had on American culture. The class will also view a play on these themes at a Chicago theater. (2-4 quarter hours)

AI 314
ART: INSIGHTS FROM THE INSIDE
Undergraduate
Understanding art and artists is the result of gaining insight into the artist and his/her relationship to the society in which he/she lives, as well as the process of artistic creation itself. The production of contemporary Western art is the result of over three thousand years of evolution within a framework which can be traced to the ancient Greeks. This course will trace that evolution and engage the student in opportunities to experiment with various media to provide insights into artist's work. With the help of a series of videotapes, students will be taken on a "journey" from the earliest Greek monuments to the art of the present day to explore artistic styles, forms, and subjects as they have changed through the ages. Students will do hands-on creating with pen and ink, water colors, and clay as a means of experiencing the role of media and the decisions which artists have to face in the course of their work. (2-4 quarter hours)

AI 315
CREATIVITY AND IMAGINATION
Undergraduate
Is there a specific mental procedure that gives rise to the making of new inventions, new scientific and mathematical discoveries, new philosophical systems, and new works of art? If so, it remains as mysterious today as a thousand years ago. In this course we will compare and critically evaluate a range of theories about human invention and creativity, both classic and modern - from ancient conceptions of divine inspiration and "creative madness" to recent hypotheses in the fields of evolutionary psychology, cognitive science, and artificial intelligence. We will test these theories by (a) applying them to our own past experience with creative endeavors and (b) by determining to what extent the theories can adequately explain the emergence of particular inventions, scientific or mathematical breakthroughs, or works of art. The course will introduce the thought of a range of important theorists on the creative process - from Plato to Freud - and also weigh the contributions and examples of prominent artists, scientists, and inventors, including Archimedes, Newton, Mozart, Milton, Poe, Van Gogh, Poincari, Edison, Einstein, and others. (2-4 quarter hours)
AI 316
SPIRITUALITY AND HOMELESSNESS
Undergraduate
This course will examine the broad issue of homelessness by providing students the opportunity to reflect upon a service learning experience at a community-based organization that serves the homeless population in Chicago. Students will explore what can be learned about themselves as reflective practitioners, service learners, and spiritual human beings when reflecting upon this experiential learning process. Through the class discussions, assigned readings, invited speakers, and journal assignments, students will reflect on their own beliefs and perceptions of homelessness and analyze the history, causes, and policy associated with this societal problem.
LL 302 is a prerequisite for this class.

AI 317
EONS AND ARTS I: MANIFESTATIONS OF CULTURE
Undergraduate
This course will connect specific historical eras in Western culture with representative art forms so students can gain cultural insights. Particular attention will be paid to artifacts in the Chicago area. Students will analyze the relationship between popular art and movements in history through lecture, readings and discussion. We will also address contemporary cultural issues, including how later peoples will judge our values based on our arts. (2-4 quarter hours)

AI 318
ZOMBIES: MODERN MYTHS, RACE, AND CAPITALISM
Undergraduate
The figure of the zombie entered US popular culture from Haitian spiritual practice bringing with it concerns of power and race. As the zombie mythology developed in the United States, it has been adapted to address issues as varied as gender and capitalism. Zombie mythology has become so prominent that the philosophers Gilles Deleuze and Felix Guattari asserted that the zombie was the only unique myth of the twentieth century. This class will examine the development of the zombie myth as a reflection of US societal concerns while using the lenses of Post-Colonial and Post-Marxist theory. Specifically, we will use these lenses to explore Halperin?S film White Zombie, Romero?S films Night of the Living Dead and Dawn of the Dead, Kirkman?S comic books The Walking Dead, and Boyle?S 28 Days Later. (2-4 quarter hours)

AI 319
UNDERSTANDING SOCIAL RELATIONSHIPS FROM AN AFRICAN-CENTERED PERSPECTIVE
Undergraduate
This course will utilize an African-centered framework to examine the nature of social interactions within the African-American community, with a focus on female-male relationships, parenting, and the place of elders in the family. Students will examine the role of culture and racism in the historical development of these social relationships while identifying possible solutions to alleviate tensions experienced within the examined relationships. Guest lecturers, readings, discussions and written assignments, a learning journal, and individual paper or project will comprise the learning experience. (2-4 quarter hours)

AI 320
NONFICTION WRITING: THE MEMOIR
Undergraduate
Your own memories and experiences can be the basis of the nonfiction memoir, but to be effective such writing must do more than just recite facts or label feelings. How do you create a vivid, exciting piece of writing from the events of your life? This class explores the nonfiction memoir, with special emphasis on the spiritual autobiography. Students will read selections from contemporary memoirs as well as a full-length book of their choosing; the final project is a short personal memoir. (2-4 quarter hours)

AI 321
AMERICAN WRITERS AND TECHNOLOGY
Undergraduate
This course will examine American attitudes toward nature, industrialization, technology, our character as a people, and our national destiny, especially as reflected in recent films, science fiction, and classic literature like Walden and Leaves of Grass. In addition to the views of popular fiction writers (e.g. Twain and Vonnegut), students will also sample the responses of American poets and painters to a remarkable series of cultural innovations and technical breakthroughs - from the first railroad and telecommunications networks to the development of computers and nuclear arms. (2-4 quarter hours)
**AI 322**
PROBLEMS AND ISSUES IN CONTEMPORARY ETHICS
Undergraduate
An introduction to moral philosophy with emphasis on the conflict between "moral relativism" (or "subjective" ethics) on the one hand and "moral realism" (or "objective" ethics) on the other. During the course you will be introduced to classic theories and leading figures in the history of ethics, from Plato and Aristotle to Kant and Nietzsche. Course content will focus on issues (e.g., poverty, drug use, capital punishment, sexual behavior, euthanasia, biomedical research, animal rights, political violence) at the center of contemporary ethical debate in the United States and throughout the world. (2-4 quarter hours)

**AI 323**
ART AND PERSONAL TRANSFORMATION
Undergraduate
Adults often go through periods of profound transition. Many of us search for answers, models, or mentors to help us make sense of the changes. This course deals with ways in which art can be a means of personal transformation, a vehicle for helping us understand the deeper dimensions of our life journeys. Through exposure to artistic representations of significant turning points in human experience, and by studying perspectives on change drawn from various disciplines, we will explore ways in which art both mirrors and facilitates the process of transformation. Students will approach selected works of art (literature, music and visual art) to explore ways artists have represented themes of transformation. In addition to developing competence in art analysis, we will investigate whether our own personal values are reflected in the works studied, and what role art plays in our lives. Students will keep learning journals recording their impressions and reflections about class readings, discussion and multi-media presentations. (2-4 quarter hours)

**AI 324**
CREATORS AND CREATIVITY
Undergraduate
Creative energy, application and results are prized and sought in our culture, yet are rarely understood clearly or analyzed systematically. In this course, students will explore various creativity concepts and models, including early instructional and educational, bio-psychological and socio / community-based theories. We will analyze creativity conditions in the expressive domains of art, architecture, music, literature, science, and invention. We will profile identifiable creators such as Picasso, Frank Lloyd Wright, Mozart, Virginia Woolf and Einstein, along with contemporary geniuses such as novelist Toni Morrison, activist Barry Commoner, sculptor Nina Holton, playwright Arthur Miller, and astrophysicist Subrahmanyan Chandrasekhar, and review their creativity over successive life stages. As a result, students will gain creative insight and develop strategies to incorporate creativity in their academic, occupational, and personal lives. (2-4 quarter hours)

**AI 325**
"MAKE 'EM LAUGH!": HOLLYWOOD FILM COMEDY
Undergraduate
This class delves deeply into the history of Hollywood comedy as well as theories of comedy, and is divided into two parts. Part one explores theories of comedy, both formal/aesthetic (the elements of artistic form) and socio-cultural (philosophical and psycho-social theories of comedy). The second part of the course explores historical developments in Hollywood comedy in terms of the development of artistic form (performance, verbal and visual gags, narrative structure, visual style), the film industry, and questions of socio-historical impact. Students can also opt to learn how to write a comedic screenplay. Films and artists to be discussed include the Marx Brothers, Mae West, Mel Brooks, Blazing Saddles, The Royal Tenenbaums, The Seven Year Itch, Charlie Chaplin, Buster Keaton, The Philadelphia Story, Hairspray, and There's Something About Mary. (2-4 quarter hours)

**AI 326**
LIVING FROM THE INSIDE OUT
Undergraduate
In this course, students design practices to create space in their busy lives through leisure, spirituality, and creativity. It helps the adult growth and development that occurs as people change throughout adulthood. This course makes time to think in order to experience how our outer and inner worlds interact to help us make meaning for our lives. Students will use a combination of reading, practices, small group work, guided imagery, journaling, and reflection papers to articulate and demonstrate understanding of the competences. (2-4 quarter hours)

**AI 327**
MYTHS, SIGNS AND SYMBOLS
Undergraduate
Students will be encouraged to understand their own relationship to myths, signs and symbols and to see how these have shaped their lives in the past and how they can be sources of empowerment for the future. Topics will include: archetypes and private symbols; language as symbolic action; myths of creation and fall; the hero's quest; myths of death and resurrection; myths and the process of individuation, that is, the integration of the self. Students will have assigned readings, keep a journal, and create a final project. (2-4 quarter hours)
AI 331
LEARNING TO LOOK THROUGH DRAWING AND DISCUSSION
Undergraduate
The purpose of the class is to connect the making of art with the study of art history, so that an understanding of the elements, concepts and vocabulary of art connect directly to the student's experience as he or she learns to draw. Students will learn basic skills of drawing and become familiar with a range of drawing media. They will gain an experiential understanding of the elements of line, form, value, color, and composition. Students will also examine drawings and paintings of artists working in France between 1800 and 1930, covering the art movements of Romanticism, Realism, Impressionism, Post Impressionism, and Fauvism. Each student will choose two artists to research, and will write a paper comparing biographical and historical issues of those artists' work. (2-4 quarter hours)

AI 333
ARTISTIC ISSUES IN INSTANT IMAGE PHOTOGRAPHY
Undergraduate
The aesthetic, cultural, intellectual, historical, and technical issues that animate contemporary photography will be explored through the use of Polaroid pictures created by class members using their own Polaroid cameras. Photographic ideas will be presented, discussed, and addressed in classroom critiques of the images created. Personal artistic visions will be explored, encouraged and revealed. Students will learn a language for discussing these pictures and develop the necessary personal and intellectual distance from their own artistic creations in order to critically analyze them. (2-4 quarter hours)

AI 334
WORLD ART AND CULTURE: A MUSEUM BASED EXPLORATION
Undergraduate
Most people who visit the art museum gravitate to those galleries where the art is familiar and in some ways comfortable, like the Impressionists or the Renaissance. Yet, the art museum can be a repository for so much more, if only we knew where to look and what to look for. This course is designed to introduce students to the art and cultures of societies outside of western civilization using the resources of such institutions as The Art Institute of Chicago, the Field Museum, the Mexican Fine Arts Center Museum and others. Students will be introduced to objects from China, Japan, Africa, India and the Middle East, as well as Native America. In a world which continues to grow increasingly smaller because of technology, one of the best ways to understand it people is to study their art and their culture. Student will demonstrate competence through reading and writing assignments and are required to attend field trips. (2-4 quarter hours)

AI 335
MIDSUMMER RITUALS: SCIENCE AND MYTH
Undergraduate
Using the language of cultural anthropology, this course explores the diverse myths, rituals and festivals of the ancient world that begin with the tilling of soil in early spring and end with the great harvest in late fall. Of particular interest will be the lingering manifestations of these old rites as they have endured into contemporary life and the meaning they still hold in the modern psyche. We will be looking very closely at the long history of metaphoric, personified depictions of the life-force of planet Earth, including its most recent incarnation from scientist James Lovelock in the guise of "the Gaia Hypothesis". The class will address itself to the following questions: 1. In what ways does the natural world influence the narrative structure of meaning? 2. How does the scientific description of reality shift mythic metaphor? 3. How does scientific "meaning" differ from religious "meaning"? 4. What is the function of these seasonal celebrations the psychic maintenance and renewal of society? 5. What is the pedagogical and psychological function of these types of celebrations to the individual within society? 6. How has science impacted the ability of the community to sustain its mythic, religious and ethnic holiday traditions? Can only be taken for one competence. (2-4 quarter hours)

AI 336
CONTEMPORARY MUSIC AND ART IN AMERICA
Undergraduate
The artist stands between the world in which she/he lives and the product of his/her work - while using a particular medium to grasp and communicate an image and vision of that world. This course will survey and compare seminal ideas and trends that have taken place in music and the visual arts during the past forty years. Emphasis will be on how these two art forms responded to the same set of social circumstances and how artists in different media realized both parallel and divergent concerns. Some of the artists that will be compared and John Cage and Robert Rauschenberg, Earlie Brown and Alexander Calder, and Philip Glass and Donald Judd. Wherever possible illustrations will be drawn from film, literature, dance, and te other arts. Students will develop the tools and confidence to compare works in different media in order to gain insights into how artists, through similar formal concerns, arrive at results which are appropriate to their media. The course will try to develop the student's awareness of artist's social concerns primarily through their own perceptions and inferences and, secondarily, through reading artists' statements and writings. (2-4 quarter hours)
AI 337
FROM REVERENCE TO RAPE: THE DEPICTION OF WOMEN IN AMERICAN FILM
Undergraduate
This film course will examine the portrayal of women in Hollywood films from early silent films to the present and will attempt to understand those roles against the norms of society at the time. It will begin with the virgins, vamps, and flappers of the silent era as played by Lilian Gish, Mary Pickford, Theda Bara, Gloria Swanson, Greta Garbo; transition to the strong roles of the 1930s and 1940s as played by Bette Davis, Katherine Hepburn, Joan Crawford, and Barbara Stanwyck; continue with the 1950s and 60s contrast between sex kittens and external virgins; show the breakdown of the Production Code in the 1960s and 70s; and watch the resurgence of strong women in the 80s as exemplified by Sally Field, Jessica Lange, Jane Fonda, Meryl Streep. Close attention will be played to the conflict between box office and censorship and the struggle for women - actresses, writers, directors, and producers to gain control of the screen. (2-4 quarter hours)

AI 338
RACE, RACE RELATIONS, RACISM: BREAKING BARRIERS AND BUILDING BRIDGES
Undergraduate
How do we as an ethnically and racially diverse country go about the business of understanding and healing the wounds of racism and building bridges that will allow the gift of diversity to flourish in the United States? Further, what are the connections among U.S. racism and other forms of racism such as ethnic cleansing and “pacification programs” aimed at indigenous people around the world? In this course, we will explore the historical, economic and political roots of racism globally and nationally. In addition, we will look at the changes brought about by the civil rights movement, and ongoing work in the nation and in Chicago aimed at bridging the gaps caused by racism. Through discussion, readings, films, debate, guest panels, and field excursions, students will study a variety of topics. Because the course will focus not only on analysis, but on building bridges, the instructors hope to enroll an ethnically and racially diverse class membership. (2-4 quarter hours)

AI 339
A HISTORY OF PHOTOGRAPHY
Undergraduate
This course uses photography since its invention in 1839 to give form to the social and historical ideas that have shaped our time. By discussing large picture-making areas like portraiture, images of war, the natural or constructed landscapes, scientific documentation and personal expression, the class will examine those ideas and technologies that have shaped photography and, conversely, events shaped by their depiction as photographs. Students will study and actually enjoy the history of the medium via slide and textbook. The class, as a group, will visit gallery and/or museum exhibitions to enhance classroom work. The photographs will be linked to the social, political and intellectual currents of the time and place that surround the art to give that work added meaning and enhanced viewer understanding. Through the art seen in this course and the historical facts gained from the lecture and text, the student will refine and advance their understandings and interpretations of past and recent global history. No prior formal or academic knowledge of 19th or 20th century history, the history of photography or painting is necessary nor is a working knowledge of any art-making discipline assumed. (2-4 quarter hours)

AI 340
FROM SOUNDS TO SCIENCE: CLASSICAL MUSIC THROUGH THE AGES
Undergraduate
The history of music is a history of changing values and patterns. What values societies foster are directly correlated to preceivable uses of melody, rhythm, and timbre. This course will survey and compare major periods of Euro-American music, beginning with Gregorian Chant ending with John Cage. Historical documents and readings in aesthetics will supplement musical examples presented in class. Students will be presented with a listener's guide to major works of the most prominent composers, as well as a bibliography for further reading. Students will also be informed of relevant concerts in the Chicago area. Through listening, background reading, and discussion, students will learn to “read” music. Pattern perception is a skill in its own right. Statement, variation, and contrast are means of structuring the physical, verbal, and temporal world around us. Students will develop pattern perception in music in order to translate this skill into life's other media. (2-4 quarter hours)

AI 341
ETHICS AND ARGUMENTS
Undergraduate
This course introduces the main traditions in ethical thinking and provides students with moral reasoning skills to take and defend ethical positions on concrete issues. Students will examine various traditional bases for morality, among them virtue, duty, rights, contract, utility, and religion. They will learn to distinguish ethical from other values, and be able to justify the distinction. But in a world of action, merely knowing what is ethical is not enough. Students will select current ethical issues of personal interest, developing theory-based strategies for addressing those issues in a morally responsible way. (2-4 quarter hours)
AMS 150
PERSPECTIVES ON AMERICA
Undergraduate
This course explores a variety of perspectives on what it means to be an American in the modern world, looking through polarities such as: urban and suburban life, localism and globalism, high culture and mass culture, corporate society and populism. Considerations of various media such as television, movies, and newspapers, as well as study of artifacts.

AMS 200
INTRODUCTION TO AMERICAN SOCIAL HISTORY AND CULTURE
Undergraduate
This course will provide an overview of American History designed to provide a one-quarter overview of American history and culture. It will provide an overview of the central themes of American History from the colonial period to the present with a focus on social, popular, and cultural history.

AMS 201
INTRODUCTION TO CRITICAL AMERICAN STUDIES
Undergraduate
Using a range of interdisciplinary theories and methods, this course introduces students to critical American Studies as a field of scholarship that challenges the idea of the United States as socially and politically exceptional. Required course for AMS majors and minors.

AMS 211
AMERICAN EXPERIENCE: EARLY AMERICA TO 1860
Undergraduate
This course focuses on America before the Civil War. Students will engage in project-based work that will examine a variety of texts, as well as material and visual culture in order to examine the competing themes and diverse voices that form American experience during this era. AMS 200 or HST 181 recommended, but not required prior to enrolling in this course.

AMS 213
AMERICAN EXPERIENCE: FROM 1860 TO 1941
Undergraduate
This course focuses on America between the Civil War and World War II. Students will engage in project-based work that will examine both visual culture and literature in order to examine the competing themes and diverse voices that form American experience during this era. AMS 200 or HST 182 recommended, but not required prior to enrolling in this course.

AMS 215
AMERICAN EXPERIENCE : FROM 1941 TO PRESENT
Undergraduate
This course focuses on America from World War II to the present. The course engages students in project-based works that utilizes multiple methodologies, primary sources, a range of texts, and material and visual culture. AMS 200 or HST 183 recommended, but not required prior to enrolling in this course.

AMS 220
AMERICAN BUDDHISMS: RACE AND RELIGIOUS DIVERSITY
Undergraduate
This course critically analyzes the origins of Buddhism in the United States in order to fully understand how and why Buddhism has flourished in Asian and White American communities, and to understand the conflict and controversy surrounding the racial dynamics of religious choice.

AMS 230
ASIAN AMERICAN HISTORIES
Undergraduate
This course introduces the pre-1965 comparative histories of people of Chinese, Japanese, Korean, Indian, Filipino, and Southeast Asian ancestry from their arrival in significant numbers in the United States beginning in the 19th century. Two questions orient this course: 1) whether there is an historical validity to the category of Asian American, and if so, the extent to which the category is relevant today in light of differences across gender, sexuality, class, ethnicity, and religion, among others; and 2) how the Asian Pacific American experience challenges and redefines American race relations to provide a more complex understanding of existing structures of power. Cross-listed with AAS 200.
AMS 250
IN THEIR OWN VOICES: AMERICAN AUTOBIOGRAPHY
Undergraduate
This course presents a range of American autobiographies, from different places and from times ranging from Colonial to modern. The selected authors represent varying backgrounds and races.

AMS 261
AMERICAN ETHNICITIES 1800-1945
Undergraduate
This course will be an exploration of the development of American ethnic communities and identities in the 19th and early 20th centuries. Students will examine the American experience through the lens of ethnic groups and racialized ethnic populations and consider how ethnicity has shaped and influenced American history. We will study the experiences of American ethnic groups based on historical, social, and political factors such as immigration and citizenship, slavery and racialization, gender and patriarchy, religion and family, and the relationships between and among ethnic groups.

AMS 265
PACIFIC WORLD: NORTH AMERICA AND THE PACIFIC, 1776 - 1945
Undergraduate
This course will examine the nature of American identity in the west. Hawai‘i and California represent the extreme edge of the American frontier. The focus will be on the shifting meanings of “native” and “stranger.” How did the status of indigenous peoples foster a sense of identity and place for migrants? How did immigrants understand their role in the political economy? How did racial discourses on the frontier shape the shifting definitions of citizenship? How did race affect America’s ambivalent approach to imperialism?

AMS 275
HISTORY OF SEX IN AMERICA 1: COLONIAL TO LATE NINETEENTH CENTURY
Undergraduate
This course will provide an overview of the history of American sexuality from the colonial period to the late 19th century.

AMS 276
HISTORY OF SEX IN AMERICA 2: LATE VICTORIANS TO THE PRESENT
Undergraduate
This course will provide an overview of the history of American sexuality from the late nineteenth century to the present. Cross-listed with HST 276.

AMS 280
POLITICS AND HISTORY OF THE VIETNAM WAR
Undergraduate
This course examines both the history of American involvement in Vietnam and the lasting effect on American politics and culture.

AMS 290
AMERICAN VOICES I: TO 1860
Undergraduate
Part one of a two course sequence, this course provides an integrated, multidisciplinary view of American culture and ideas, addressing the questions: “What is America? What does it mean to be an American?” The courses are focused on primary sources, mostly first person narratives and fiction, developing methods for analyzing and interpreting these sources. Students write a series of papers on the narratives; students taking the two course sequence substitute a research paper for some of the narratives papers in the second course, American Voices II.

AMS 291
AMERICAN VOICES II: FROM 1860
Undergraduate
Part two of a two course sequence, this course continues the approach and method of American Voices I.

WRD 104 or HON 100 or HON 101 is a prerequisite for this class.
AMS 292
TOPICS IN AMERICAN STUDIES THEORIES AND METHODS
Undergraduate
Variable topics that will prepare you to integrate a range of disciplinary understandings and methods into your written and oral analyses of American culture. Consult course schedule for current listings.

AMS 293
TOPICS IN AMERICAN MATERIAL CULTURE AND THE BUILT ENVIRONMENT
Undergraduate
Variable topics. Consult course schedule for current listings.

AMS 294
TOPICS IN AMERICAN POLITICS, INSTITUTIONS, AND VALUES
Undergraduate
Variable topics. Consult course schedule for current listings.

AMS 295
SPECIAL TOPICS IN AMERICAN STUDIES
Undergraduate
Special Topics in American Studies. Consult schedule for topic.

AMS 296
TOPICS IN AMERICAN POPULAR CULTURE AND MEDIA
Undergraduate
Variable topics. Consult course schedule for current listings.

AMS 297
TOPICS IN AMERICAN RACE AND ETHNIC STUDIES
Undergraduate
Variable topics. Consult course schedule for current listings.

AMS 298
TOPICS IN AMERICAN SOCIAL AND LITERARY MOVEMENTS
Undergraduate
Variable topics. Consult course schedule for current listings.

AMS 301
SENIOR SEMINAR
Undergraduate
The Senior Seminar is an integrative course conducted primarily as a colloquium. Emphasis will be placed on discussion and independent research and writing.
AMS 211, AMS 213 and AMS 215 are prerequisites for this class.

AMS 340
AMERICAN POPULAR CULTURE
Undergraduate
This course will focus on the industrial developments, cultural significance and social effects of American Popular Culture institutions and products at the dawn of the 20th century, including the rise of corporate nationalism in live performances such as vaudeville and radio, as well as the development of mass media industries including sheet music, advertising, records, and film. Discussions will include attention to industrial practices, textual properties, and audience reception of these cultural products.
AMS 360
AMERICAN FILM
Undergraduate
Analyzes cultural and cinematic histories and film as a social practice circulating cultural values as well as critiquing ideologies. Students will gain understanding of major critical and theoretical approaches and engage in research, critical thinking, and writing on topic areas. Variable specific topics. E.g. assimilation narratives, war in film, sports in film, Asian American film.

AMS 370
THE MATERIAL CULTURE OF MODERN AMERICA
Undergraduate
AMS 370 combines historical archaeology and material culture studies to examine how material goods both shape and reflect American identity in the nineteenth and twentieth centuries.

AMS 371
MATERIAL CULTURE OF EARLY AMERICA
Undergraduate
Combines historical archaeology and material culture studies to examine how material goods both shape and reflect American identity in the colonial period and early nineteenth century.

AMS 380
TELEVISION AND AMERICAN IDENTITY
Undergraduate
This course is about how television represents Americans and how Americans have responded to these representations. The course engages in close textual analysis of several television texts, to familiarize students with television industry narrative structures and strategies, examines several specific representational struggles, and surveys and discusses the many ways in which television viewers and fans engage with the text.

AMS 386
ADVANCED TOPICS IN AMERICAN POPULAR CULTURE AND MEDIA
Undergraduate
Variable topics. Consult course schedule for current listings.

AMS 388
ADVANCED TOPICS IN AMERICAN SOCIAL AND LITERARY MOVEMENTS
Undergraduate
Variable topics. Consult course schedule for current listings.

AMS 392
INTERNSHIP
Undergraduate
Internship. Majors and minors only. Variable credit.
An American Studies major or minor is a prerequisite for this class.

AMS 393
ADVANCED TOPICS IN AMERICAN MATERIAL CULTURE AND THE BUILT ENVIRONMENT
Undergraduate
Variable topics. Consult course schedule for current listings.

AMS 394
ADVANCED TOPICS IN AMERICAN POLITICS, INSTITUTIONS, AND VALUES
Undergraduate
Variable topics. Consult course schedule for current listings.
AMS 395
TOPICS IN AMERICAN STUDIES
Undergraduate
Topics in American Studies.

AMS 396
AMERICAN STUDIES COLLOQUIUM
Undergraduate
These courses involve participation in events and/or conferences on selected topics related to American culture studies. Class participants attend and participate in events, keep a reflective journal connecting the events, do related readings, and write a reflective summary on the colloquium as a whole. Variable credit.

AMS 397
ADVANCED TOPICS IN AMERICAN RACE AND ETHNIC STUDIES
Undergraduate
Variable topics. Consult course schedule for current listings.

AMS 398
STUDY TOUR
Undergraduate
An on-site overview of the historical, political, social and economic connections between the United States and a foreign country. Credit variable.

AMS 399
INDEPENDENT STUDY
Undergraduate
Independent Study. Majors only. Variable credit.

An American Studies Major is a prerequisite for this class.

ANI 101
ANIMATION FOR NON-MAJORS
Undergraduate
Course introduces a variety of basic animation techniques for cinema and gaming, such as hand-drawn, cutout, stop-motion and (very basic) 3D, with an emphasis on the use of computer technology. Examples of diverse animation genres and styles (experimental, cartoon, anime, special effects, computer games) from different cultures will be screened and discussed. Students will explore the unique qualities of the medium through a series of hands-on projects that can be adapted to their own personal interests. They will learn about professional animation process (storyboard and animatic) during the production of a final project that encourages them to consider the role and potential of animation in our society.

ANI 105
MOTION GRAPHICS FOUNDATIONS
Undergraduate
This course introduces the basic principles of composition, color, light, and motion as applied to cinema and animation. Design for screen, staging, effective use of text, graphical elements, video, and motion are covered. These skills will be applied in projects that stress conceptual and technical development.

ANI 150
AFTER EFFECTS WORKSHOP
Undergraduate
This class will introduce students to the fundamentals of After Effects, including key-framing, compositing and rendering. Topics and techniques covered during lectures will be reinforced through in-class exercises and projects. (2 quarter hours)
ANI 151
FLASH ANIMATION WORKSHOP
Undergraduate
This class will introduce students to the fundamentals of creating animation using Flash, including tweening and frame-by-frame drawn animation. This class does not cover Action Script programming. Topics and techniques covered during lectures will be reinforced through in-class exercises and projects. (2 quarter hours)

ANI 152
TVPAINT WORKSHOP
Undergraduate
This workshop course offers a complete basic knowledge of using TVPaint animation software to produce hand-drawn animation. Topics and techniques covered during lectures will be reinforced through in-class exercises and projects. Prerequisite(s): none (2 quarter hours)

ANI 201
ANIMATION I
Undergraduate
This course is an introduction to the art and practice of animation. It is a studio-based class, which will emphasize learning through process, experimentation and creation. Students will explore the limitless possibilities of animated motion in the context of cinema, computer games and the Internet. All genres and styles are within the scope of this class, including Anime, cartoons, computer game art, experimental art and special effects. In addition to how, we will also explore and discuss why, as well as the role and potential of animation in our society and its place in other cultures. This course is designed for the student who wishes to pursue further study in the field, and provides intensive practice of the basic skills and methods through production. PREREQUISITE(S): ANI 105 or GPH 211 or ART 105 or GD 105

ANI 206
HISTORY OF ANIMATION
Undergraduate
This course is an introduction to the history and development of the field of animation. We will explore this subject from various perspectives: by chronology, from its prehistory before the invention of film to the present day; by form, including method and medium; by culture, comparing the US to Japan, Russia, Europe and others; by subject; and by personality, concentrating on the figures who have shaped the art form and continue to influence it through their example. Students are expected to bring an enthusiastic interest in the medium, and to devote serious effort to reading about, viewing, researching and discussing animation and the artists who have created it.

ANI 207
ANIME HISTORY
Undergraduate
This course is an Introduction to the history, development and cultural significance of Japanese animation. We will explore how historical and cultural concepts of Japan have translated to the screen, as well as the influence of economic forces and changing technology. Students will gain an insight into anime's origins and cultural influences through an examination of the World War II, post-war, mid- and late-twentieth-century historical periods of Japan. This class will analyze particular examples of anime and anime artists in their historical context, emphasizing the use of primary sources.

ANI 220
STORYBOARDING AND NARRATIVE DEVELOPMENT
Undergraduate
This class will focus primarily on storyboarding and the aesthetic and practical uses of research, treatments, drawings, and found images as tools in the production of animations, films and game cinematics. Students will complete a series of assignments that will utilize different methods of finding inspiration to make a cohesive, narrative work. Various methods used in both commercial and independent productions will be presented as examples, and pre-production work from both live action and animated films will be viewed throughout the quarter. Students will create several storyboards for short films, write treatments, and research design options. PREREQUISITE(S): ANI 101, ANI 201 or DC 110

ANI 222
ILLUSTRATION FOUNDATIONS
Undergraduate
This course will focus on improving the basic skills needed for creating concept art and storyboards for animation and games. Areas of focus include practical perspective, technical rendering, observational drawing and color theory. These skills will be applied in basic prototyping projects. PREREQUISITE(S): GD 105 or ANI 105
ANI 225  
**MAKING COMICS**  
*Undergraduate*

This course introduces students to the components of graphic narrative, including superhero and alternative comics, comic strips, manga, and graphic novels. Students will learn fundamental materials and techniques, including penciling and inking, digital painting and coloring, and publishing, and create their own graphic narratives. The course will also provide an overview of the history of comics and graphic storytelling, and their relation and importance to the art of animation. **PREREQUISITE(S): ART 106**

ANI 230  
**3D DESIGN & MODELING**  
*Undergraduate*

Students will use computer modeling to explore the principles of 3-dimensional design. Projects involving object, character and architectural modeling will emphasize the aesthetic concepts of spatial proportion (scale, angle and position), silhouette, negative space, rhythm, balance, light/shadow and texture. Students will emerge with the ability to create well designed 3D models, and be familiar with the basics of polygonal modeling, texturing, lighting and rendering for animation, computer games and cinema. **PREREQUISITE(S): None**

ANI 231  
**3D ANIMATION**  
*Undergraduate*

In this course, students will be introduced to animation in 3D through the use of traditional animation principles. Topics will include: animation fundamentals, keyframing, splining, animated cameras, rendering, and an introduction to rigging basic characters. Emphasis will be placed on using the computer as a tool to create animation for film and games. **PREREQUISITE(S): ANI 230**

ANI 240  
**ANIMATION PRODUCTION I**  
*Undergraduate*

This course will concentrate on facilitating the student's production of animation projects. The topics of idea generation, experimentation, problem solving, planning and time management, and the process of critical analysis will be applied to the student's work, with the choice of animation technique, content and form left to the individual. Students will learn the importance of bringing projects to completion. **PREREQUISITE(S): ANI101 or ANI201 AND sophomore standing**

ANI 260  
**MOTION GRAPHICS**  
*Undergraduate*

This course will introduce the student to effective communication using motion graphics, including its application in the areas of film titles, broadcast and commercial design, interactive media, and gaming. The combination of music, visuals and typography will be explored following the basic theories of kinetic composition and aesthetics. Students will study the history of the field, including the work of pioneers such as Norman McLaren, Saul Bass and Len Lye. **PREREQUISITE(S): Sophomore Standing and one of the following: ANI 105, ANI 101, GD 105, ART 105, GPH 211, DC 205**

ANI 300  
**3D CHARACTER ANIMATION**  
*Undergraduate*

This course explores the art and techniques for character performance in 3D. Students will study and employ fundamental principles for character animation beginning with the essentials of blocking and inbetweening, and continuing with core mechanics including walk cycles, expressions, and lip sync. Students are required to animate weekly shots culminating in a final lip synced character performance. **PREREQUISITE(S): ANI 231**

ANI 301  
**ADVANCED 3D CHARACTER ANIMATION**  
*Undergraduate*

This course introduces advanced concepts in 3D character animation that are necessary for achieving professional quality results. Students will hone their skills through the study of advanced techniques for animating multiple characters, creating continuity, and building character through performance. An emphasis will be placed on the exploration of movement for developing personal style. **PREREQUISITE(S): ANI 300**
ANI 310
MOTION CAPTURE
Undergraduate
This course is a workshop focusing on realistic character motion obtained through motion capture. Students will learn the motion capture pipeline, including character skinning and mapping, planning and directing motion capture sessions, applying motion to a character and motion editing. PREREQUISITE(S): ANI 231 or GPH 338

ANI 315
AUDIO FOR ANIMATION
Undergraduate
This class will explore concepts and practical techniques students need in order to address many of the unique challenges associated with creating audio for animated films. Students will begin with an introduction to audio production before moving on to build practical skills for both field and studio recording. Lectures, readings, and hands on projects will give students a working knowledge of how to approach and create the immense range of styles of audio for animated films, from classic cartoon soundtracks to the live action style mixes of many of today's animated Hollywood blockbusters. Students will complete several audio projects including a multi-track mix for an animated short. PREREQUISITE(S): ANI 240

ANI 320
HAND-DRAWN ANIMATION
Undergraduate
This course is devoted to the complex aspects and techniques of classical drawn animation required to create convincing movement, frame to frame consistency, and character acting. Beginning with a review of the fundamentals and progressing to more complicated techniques, students will learn how to create unique and technically accomplished drawn animation as well as methods for its eventual clean-up, inking and coloring. Contemporary uses of digital technology to enhance production will be emphasized. PREREQUISITE(S): ANI 201 (or ANI 101) and ART 106

ANI 321
ANIMATION MECHANICS
Undergraduate
Students in this course will rigorously investigate the foundational aspects of animation through traditional and digital methods. Basic principles, including timing, spacing and the abstraction of movement, will be analyzed and questioned through experimentation. Students will experience how the process of making work can be used to generate emergent ideas, and be challenged to push the art form beyond the accepted conventions. PREREQUISITE(S): None

ANI 322
ANIMATION STYLES & TECHNIQUES
Undergraduate
The history of animation is explored with a focus on inspiring the students' own work. Students will be involved in an intense study of animation throughout history and around the world, and are required to view a large amount of work outside of class. Animations will be grouped by time period, theme, and/or technique. Through writing and group discussions they will examine the significance of the technique and subject matter. They will put this study into practice by creating short animated films based on their reactions to the films. PREREQUISITE(S): ANI 240

ANI 324
STORY DEVELOPMENT
Undergraduate
Students will elaborate on the skills from ANI 220 to create sophisticated pre-production for their own films, game cinematics and animations. Emphasis is placed on advanced story development, professional artistry and pre-visualization techniques such as converting a script to visual story reels or animatics. Students will complete the course with a fully-developed animatic for the story of their choosing. PREREQUISITE(S): ANI 220

ANI 325
VISUAL STORYTELLING
Undergraduate
This class focuses on storyboarding and animations as key pre-production tools for animation, film, and game development projects. Areas of focus include narrative development, drawing, performance, and editing. Students will apply these techniques to create an animatic: a comprehensive time-based draft for a short film. PREREQUISITE(S): ANI 240
ANI 326
VISUAL CONCEPT DEVELOPMENT
Undergraduate
This course focuses on visual development and style guides for animation, cinema and game projects. Coursework involves character design, environmental design, prop design, lighting, color, texture and layout. Students will practice visual research, drawing and an array of digital tools to build the skills necessary to create an immersive world with a cohesive look and feel. PREREQUISITE(S): ILL 200 and ANI 230

ANI 327
HAND-DRAWN CHARACTER ANIMATION
Undergraduate
In this course, students will be introduced to the traditional art of hand-drawn character performance. Topics covered will include acting, body mechanics, volume, weight, walk cycles, dialogue and facial expression. PREREQUISITE(S): ANI 321

ANI 330
3D CHARACTER MODELING
Undergraduate
This course will instruct students in the process of 3D polygonal based character modeling. Students will learn professional techniques for building quad-based polygon meshes with an extra emphasis on proper topology to help prepare their model for rigging. Students will learn complete UV unwrapping for the entire figure as well as effective techniques for advanced texturing. PREREQUISITE(S): ANI 230 or GPH 250

ANI 332
3D RIGGING
Undergraduate
Students will study the processes and techniques for creating professional quality character rigs. Following a professional production workflow, students will create character skeletons, learn aesthetic and technical considerations for skinning, learn techniques for optimal parameterization, and learn to construct character animation controls. PREREQUISITE(S): ANI 231

ANI 333
ADVANCED 3D RIGGING
Undergraduate
This course will teach students inorganic rigging of vehicles and machines as well as advanced techniques for characters such as blend shape facial expression setups and squash and stretch. Additional topics will include quadruped rigging and 3D scripting for creating user interfaces and automating complex processes. PREREQUISITE(S): ANI 230 and ANI 231

ANI 336
3D MODELING STUDIO
Undergraduate
Students in this course will broaden and improve their overall skill set by learning a range of modeling techniques. Students will complete several smaller projects that cover topics including speed modeling, efficient low-poly modeling, hard surface modeling, projection texturing, and advanced UV unwrapping techniques. The course will culminate in a final project in which the student will propose and complete an advanced model of their own design. PREREQUISITE(S): ANI 230 or GPH 250

ANI 337
ENVIRONMENT MODELING
Undergraduate
This course covers the planning, production and implementation of environment models for games. The term "environment model" includes landscape, exterior architecture, interior architecture, and both organic and man-made props. Topics include visual art direction, setting mood, developing narrative and cinematic lighting strategies. After creating assets in a modeling program, students will implement them in a game engine editor to learn about game engine requirements, limitations and pipeline. Prerequisite: ANI 230

ANI 338
3D ORGANIC MODELING
Undergraduate
In this course students will learn to create highly detailed creatures, characters, and props for both film and games. Students will learn a variety of techniques for working with high density polygon meshes and 3D painting in order to generate detailed texture and normal maps. This course will combine a traditional approach to sculpting and a foundation in human anatomy for quick generation of concepts for 3D models. An emphasis will be placed on developing efficient pipelines to streamline the entire process from modeling to rendering. PREREQUISITE(S): ANI 230
ANI 339
3D TEXTURING AND LIGHTING
Undergraduate
Students will study the processes and techniques for texturing and lighting in 3D. Procedures including preparing models for texturing, creating and manipulating shading networks, laying out UV's, and painting textures will be explored. Topics in lighting will be approached from the foundation of traditional cinematography with a focus on driving both mood and story. Students will utilize complimentary skills in lighting and texturing to create high quality renders for both still and moving images. PREREQUISITE(S): ANI 230 or GPH 250

ANI 340
ANIMATION PRODUCTION II
Undergraduate
Students will build on the skills learned in Animation II, and produce more ambitious projects. They will be expected to exhibit sophisticated technique, storytelling and content, and work to develop as creative artists through self-critique. The successful planning and completion of projects on time is essential. PREREQUISITE(S): ANI 220 and ANI 240 and junior standing

ANI 341
ANIMATION PRODUCTION III
Undergraduate
This course asks students to create a short animated film. Students are expected to demonstrate a high level of technical skill with animation and to exhibit maturity in concept development and storytelling. Successful planning and project management is critical. PREREQUISITE(S): ANI 340

ANI 344
VISUAL DESIGN FOR GAMES
Undergraduate
The stages of development in the visual direction of a video game will be identified and detailed, and students will participate in the creation of the visual art direction of a product, giving special attention to the design of 3D models and animation. Visual Design for Games topics include: creating visual direction, concepting, art bibles, art production, and post-production strategies. Students will create proposals, create concepts, iteratively create artwork, and analyze competitive products. PREREQUISITE(S): ANI 105, GD 105, GPH 211 or ART 105 (or equivalent 2D design experience)

ANI 345
CHARACTER DESIGN
Undergraduate
Students will be introduced to various methods of creating interesting and original character designs for animated films and games, and then put these approaches into practical use. Methods of creative concepting will include drawing, collage, sculpture and 3D mock-ups. Fundamental visual design and color principles will be stressed, along with the basics of caricature. Students will utilize their character designs in an animated short. PREREQUISITE(S): ANI 230

ANI 350
ANIMATION PRODUCTION STUDIO
Undergraduate
This course uses the animation studio model to create a group project from start to finish. Students learn about the division of labor needed to produce larger projects as they experience working with others on a team. PREREQUISITE(S): ANI 240

ANI 351
ADVANCED MOTION CAPTURE STUDIO
Undergraduate
This course will enable students with motion capture experience to advance their technical skills and gain experience with practical application in the motion capture studio. Emphasis will be placed on advanced skinning and mapping techniques as well as complex motion capture sessions involving sets, props, and multiple actors. Students will be required to plan, arrange, and direct their own sessions in the motion capture studio. PREREQUISITE(S): ANI 310 or ANI 450
ANI 352
3D SCRIPTING
Undergraduate
This is an introductory course in scripting for a 3D production environment. Students will learn and apply basic programming concepts in order to improve the productivity of animators and modelers. Using script, we will automate repetitive tasks, customize the interface, and create new tools. Students will gain a fundamental understanding of how a 3D animation package functions behind the interface. PREREQUISITE(S): ANI 230 and ANI 231

ANI 353
ADVANCED 3D SCRIPTING
Undergraduate
In this course, artists and game designers will learn to use scripting to develop advanced tools and to automate complex processes for animation, modeling, and pipeline development. Through weekly projects students will learn to read, modify, and author scripts in order to bridge the artistic and technical features of a high end 3D software package. PREREQUISITE(S): ANI 352

ANI 355
STOP MOTION ANIMATION
Undergraduate
The principles of stop motion character animation in real space are the emphasis of this intermediate level course. Students are introduced to basic armature building, lighting and scene composition, and the designing and fabrication of characters with a variety of materials. Contemporary uses of digital technology to enhance stop motion production will be explored. PREREQUISITE(S): ANI 201 (or ANI 101)

ANI 356
EXPERIMENTAL ANIMATION
Undergraduate
This course introduces strategies for an experimental approach to animation. Students will study how experimentation relates to both concept and technique, and examine the work of classic experimental animators. This is a production class that requires students to produce a series of short animations in a variety of processes and styles. PREREQUISITE(S): ANI 201 or ANI 101

ANI 357
HYBRID ANIMATION
Undergraduate
This production course focuses on combining multiple animation techniques. Students will complete the assignments and final project using mixed media with the choice of animation techniques, content and form left to the individual or group. Topics include pixilation, rotoscoping, and creative use of green screen, among others. PREREQUISITE(S): ANI 201 or ANI 101

ANI 360
ADVANCED MOTION GRAPHICS
Undergraduate
This course builds on motion graphics fundamentals covered in ANI 260 Motion Graphics. In Advanced Motion Graphics, students will work to develop a better understanding of how to develop a distinct visual style in both personal work and in work for clients. The course also focuses on gaining familiarity with contemporary styles and trends in professional motion graphics, and an awareness of Chicago-based motion graphics production. PREREQUISITE(S): ANI 260

ANI 362
TITLES FOR CINEMA AND ANIMATION
Undergraduate
This course explores concepts and techniques involved in creating movie titles, TV openings, and supporting graphics for video and animation. The use of alluring sound and imagery is essential to a successful and professional-looking film. A conceptual understanding of the role time and motion have in the presentation of visual content is explored through lectures and projects. Students will gain an appreciation and skill for producing time-based media that will add value, clarity, and sophistication to cinema and animation projects. Students are encouraged to enter the course with projects in need of titles and graphics. PREREQUISITE(S): ANI 101 or ANI 201 or VFX 200
ANI 364
ANIMATION RESEARCH SEMINAR
Undergraduate
This seminar introduces students to animation in the context of interdisciplinary thinking and creativity. Students will discuss their learning experiences across disciplines in the University, and practice making connections between this learning and their study of animation. PREREQUISITE(S): None

ANI 365
CINEMA, ANIMATION, AND ART
Undergraduate
This seminar course focuses on animation and cinema from the standpoint of Modern and Contemporary art. Students study the major styles and themes of historical experimental film and video, and relate these topics to contemporary animation and independent cinema practices. Emphasis is placed on theory and criticism, and how it informs experimental work. Students are expected to discuss work and theory in a seminar setting, and to engage the class material in several research papers. PREREQUISITE(S): DC 233

ANI 366
3D MOVIE PRODUCTION
Undergraduate
This course provides an introduction to stereoscopy which is the creation of a 3D effect in still images and movies. The course covers the history of stereoscopy, the perceptual theories that make 3D images possible, and the technologies that can be used to create the effect of stereoscopic depth. Designed for both animators and live-action filmmakers, students taking this course will get hands-on experience producing stereoscopic images and movies using a variety of tools. PREREQUISITE(S): ANI 230 or DC 275

ANI 370
ACTING FOR ANIMATORS
Undergraduate
This is acting training designed specifically for the needs of animators, as opposed to stage actors. Utilizing lecture/discussion, examination/deconstruction of animated and live-action film clips, home assignments and a few simple in-class improvisations, this course provides the animator with the skills necessary to deliver dynamic animated character performance. Assessment measures include oral and written reflective analysis, short animated character sketches and class participation. PREREQUISITE(S): ANI 240

ANI 375
DEMO REEL AND PORTFOLIO WORKSHOP
Undergraduate
Students review previous course projects and prepare a final portfolio/demo reel and a resume in preparation for job interviews and/or graduate school. Students will also learn presentational techniques and methods for career development. PREREQUISITE(S): ANI 340 or DC 310 or GAM 392 (2 quarter hours)

ANI 376
POST-PRODUCTION WORKSHOP
Undergraduate
This 2 credit course guides students through the final stages of post-production and completes the Animation Capstone sequence. Students will work closely with faculty to meet the needs specific to their Capstone projects. This workshop will also focus on distribution for completed films, including film festivals, online forums, and gallery exhibition. PREREQUISITE(S): ANI 395 (2 quarter hours)

ANI 378
3D DYNAMICS
Undergraduate
This course will provide an introduction to dynamic simulation and effects in 3D animation. Topics to be covered include hair & fur, fluid dynamics, smoke & fire, particles and cloth. An emphasis will be placed on how these effects can enhance an idea or narrative, establish mood, or even be used as a basis for experimental animation. Students will use traditional animation and visual design principles as a basis for creating several small projects. PREREQUISITE(S): ANI 230 and ANI 231
ANI 379  
3D COMPOSITING  
Undergraduate  
This course is designed to allow advanced compositors and animators to merge the 2D, 3D and/or live-action video worlds, drawing from a combination of techniques such as motion tracking, compositing, rotoscoping, hand-drawn, cut-out and 3D animation. The goals are to go beyond simply achieving technical proficiency, as we will also focus on learning principles of good animation in preparation for both artistic and commercial endeavors. PREREQUISITE(S): ANI 231

ANI 380  
ANIMATION PROJECT BLUELIGHT  
Undergraduate  
Production of an animated digital motion picture written by students or faculty within the School of Cinematic Arts. Students will work as crew under supervision of faculty members heading each of the various production areas. The goal is to work towards a completed animated digital motion picture suitable for festivals or distribution.

ANI 390  
TOPICS IN ANIMATION  
Undergraduate  
Advanced study in animation focusing on a specific area each quarter. May be repeated for credit. PREREQUISITE(S): ANI 101 or ANI 201 or consent of the instructor.

ANI 393  
TOPICS IN 3D ANIMATION  
Undergraduate  
Advanced study in 3D animation focusing on a specific area each quarter. May be repeated for credit. PREREQUISITE(S): ANI 230 or consent of the instructor.

ANI 394  
ANIMATION PROJECT I  
Undergraduate  
This production-based course is the first half of a two-course sequence that provides the student with an Animation capstone experience. These courses connect the student's Animation coursework with their overall Liberal Studies coursework through three components: class lectures and discussions, independent analysis and reflection, and the creation of a significant animation project. Students will employ the knowledge they have learned and the skills they have acquired in all their Animation courses to date to produce a significant animation project. The course sequence is designed to be taken in two consecutive quarters. PREREQUISITE(S): ANI 340 and Senior standing

ANI 395  
ANIMATION PROJECT II  
Undergraduate  
Continuation of ANI 394. This production-based course is the second half of a two-course sequence that provides the student with an Animation capstone experience. These courses connect the student's Animation coursework with their overall Liberal Studies coursework through three components: class lectures and discussions, independent analysis and reflection, and the creation of a significant animation project. Students will employ the knowledge they have learned and the skills they have acquired in all their Animation courses to date to produce a significant animation project. The course sequence is designed to be taken in two consecutive quarters. PREREQUISITE(S): ANI 394

ANI 399  
INDEPENDENT STUDY  
Undergraduate  
Independent study form and consent of instructor required. PREREQUISITE(S): Consent of dean. (Variable credit)

ANI 420  
HAND-DRAWN ANIMATION  
Graduate  
This course is devoted to the complex aspects and techniques of classical drawn animation required to create convincing movement, frame to frame consistency, and character acting. Beginning with a review of the fundamentals and progressing to more complicated techniques, students will learn how to create unique and technically accomplished drawn animation as well as methods for its eventual clean-up, inking and coloring. Contemporary uses of digital technology to enhance production will be emphasized. PREREQUISITE(S): ANI 201 (or ANI 101)
ANI 421
ANIMATION MECHANICS
Graduate
Students in this course will rigorously investigate the foundational aspects of animation through traditional and digital methods. Basic principles, including timing, spacing and the abstraction of movement, will be analyzed and questioned through experimentation. Students will experience how the process of making work can be used to generate emergent ideas, and be challenged to push the art form beyond the accepted conventions. PREREQUISITE(S): None

ANI 422
ANIMATION STYLES & TECHNIQUES
Graduate
The history of animation is explored with a focus on inspiring the students' own work. Students will be involved in an intense study of animation throughout history and around the world, and are required to view a large amount of work outside of class. Animations will be grouped by time period, theme, and/or technique. Through writing and group discussions they will examine the significance of the technique and subject matter. They will put this study into practice by creating short animated films based on their reactions to the films. PREREQUISITE(S): ANI 421

ANI 423
3D ANIMATION SURVEY
Graduate
This course is intended as an intensive overview for graduate students with NO prior 3D experience. Topics include polygonal modeling tools, texturing, principles of 3D animation, basic rigging, camera, lighting and rendering. Animation graduate students with proof of previous 3D experience should consult their advisor to substitute any Major Elective for this course. PREREQUISITE(S): None

ANI 425
VISUAL STORYTELLING
Graduate
This class focuses on storyboarding and animatics as key pre-production tools for animation, film, and game development projects. Areas of focus include narrative development, drawing, performance, and editing. Students will apply these techniques to create an animatic: a comprehensive time-based draft for a short film. PREREQUISITE(S): None

ANI 427
HAND-DRAWN CHARACTER ANIMATION
Graduate
In this course, students will be introduced to the traditional art of hand-drawn character performance. Topics covered will include acting, body mechanics, volume, weight, walk cycles, dialogue and facial expression. PREREQUISITE(S): ANI 421

ANI 430
3D CHARACTER ANIMATION
Graduate
This course explores the art and techniques for character performance in 3D. Students will study and employ fundamental principles for character animation beginning with the essentials of blocking and inbetweening, and continuing with core mechanics including walk cycles, expressions, and lip sync. Students are required to animate weekly shots culminating in a final lip synced character performance. PREREQUISITE(S): ANI 423

ANI 431
ADVANCED 3D CHARACTER ANIMATION
Graduate
This course introduces advanced concepts in 3D character animation that are necessary for achieving professional quality results. Students will hone their skills through the study of advanced techniques for animating multiple characters, creating continuity, and building character through performance. An emphasis will be placed on the exploration of movement for developing personal style. PREREQUISITE(S): ANI 300 or ANI 430
ANI 432
3D RIGGING
Graduate
Students will study the processes and techniques for creating professional quality character rigs. Following a professional production workflow, students will create character skeletons, learn aesthetic and technical considerations for skinning, learn techniques for optimal parametrization, and learn to construct character animation controls. PREREQUISITE(S): ANI 231 or ANI 405

ANI 433
ADVANCED 3D RIGGING
Graduate
This course will teach students to rig organic and inorganic objects. Students will learn to rig a "stretchy spine" along with a more detailed facial set up for a character. Other topics will include inorganic object rigging, quadruped rigging and the use of 3D scripting in rigging. PREREQUISITE(S): ANI 230 and ANI 231

ANI 435
3D CHARACTER MODELING
Graduate
This course will instruct students in the process of 3D polygonal based character modeling. Students will learn professional techniques for building quad-based polygon meshes with an extra emphasis on proper topology to help prepare their model for rigging. Students will learn complete UV unwrapping for the entire figure as well as effective techniques for advanced texturing. PREREQUISITE(S): ANI 230 or ANI 405 or GPH 250

ANI 436
3D MODELING STUDIO
Graduate
Students in this course will broaden and improve their overall skill set by learning a range of modeling techniques. Students will complete several smaller projects that cover topics including speed modeling, efficient low-poly modeling, hard surface modeling, projection texturing, and advanced UV unwrapping techniques. The course will culminate in a final project in which the student will propose and complete an advanced model of their own design. PREREQUISITE(S): ANI 230 or ANI 405 or GPH 250

ANI 437
ENVIRONMENT MODELING
Graduate
This course covers the planning, production and implementation of environment models for games. The term "environment model" includes landscape, exterior architecture, interior architecture, and both organic and man-made props. Topics include visual art direction, setting mood, developing narrative and cinematic lighting strategies. After creating assets in a modeling program, students will implement them in a game engine editor to learn about game engine requirements, limitations and pipeline. Prerequisite: ANI 230 or ANI 405

ANI 438
3D ORGANIC MODELING
Graduate
In this course students learn a variety of modeling tools specially geared toward creating highly detailed and complex organic models for games or films. Various sculpting and texturing techniques available in organic modeling will be discussed as well as proper UV and polygon modeling methods. Students will also gain an understanding of how to build proper human anatomy structures. Students will learn how to create a proper art pipeline between modeling, sculpting, texturing and rendering software packages. PREREQUISITE(S): ANI 230 or ANI 405

ANI 439
3D TEXTURING AND LIGHTING
Graduate
Students will study the processes and techniques for creating shaders and lighting setups for both cinematic and gaming environments. Techniques in UV mapping and projection mapping will be explored for both environments and character creation. Lighting will be approached from the foundation of traditional cinematography. Additional topics, including negative lighting and global illumination, will also be covered. PREREQUISITE(S): ANI 230 or ANI 405 or GPH 250
ANI 440
COLLABORATIVE SHORT ANIMATED FILM
Graduate
Students will work in small groups to produce short animated films from concept to completion using the media of their choice. Emphasis is placed on a collaborative environment for pitching ideas, visual development and creative problem-solving during production. Different studio methodologies and techniques will be discussed. Each team will face various technical and aesthetic challenges to complete a finished film. PREREQUISITE(S): ANI 421 or ANI 453

ANI 444
VISUAL DESIGN FOR GAMES
Graduate
The stages of development in the visual direction of a video game will be identified and detailed, and students will participate in the creation of the visual art direction of a product, giving special attention to the design of 3D models and animation. Visual Design for Games topics include: creating visual direction, concepting, art bibles, art production, and post-production strategies. Students will create proposals, create concepts, iteratively create artwork, and analyze competitive products. PREREQUISITE(S): ANI 446, ANI 425, ANI 105, GD 105, GPH 211 or ART 105 (or equivalent 2D design experience)

ANI 445
CHARACTER DESIGN
Graduate
Students will be introduced to various methods of creating interesting and original character designs for animated films and games, and then put these approaches into practical use. Methods of creative concepting will include drawing, collage, sculpture and 3D mock-ups. Fundamental visual design and color principles will be stressed, along with the basics of caricature. Students will utilize their character designs in an animated short. PREREQUISITE(S): ANI 230 or ANI 405

ANI 446
GAME ART PIPELINE
Graduate
This course is an introduction to the game technical artist's job. Students learn how to design, engineer, and troubleshoot the game art production pipeline. They study good practices and successful strategies for streamlining at different stages of production process. Projects include analyzing problems and then spec'ing out solutions, creating a workflow for producing and exporting assets to several platforms/engines, and creating instructional documentation. PREREQUISITE(S): (ANI 230 or ANI 405) and (ANI 231 or ANI 405)

ANI 450
MOTION CAPTURE
Graduate
This course is a workshop focusing on realistic character motion obtained through motion capture. Students will learn the motion capture pipeline, including character skinning and mapping, planning and directing motion capture sessions, applying motion to a character and motion editing. PREREQUISITE(S): ANI 231 or ANI 405 or GPH 438.

ANI 451
ADVANCED MOTION CAPTURE STUDIO
Graduate
This course will enable students with motion capture experience to advance their technical skills and gain experience with practical application in the motion capture studio. Emphasis will be placed on advanced skinning and mapping techniques as well as complex motion capture sessions involving sets, props, and multiple actors. Students will be required to plan, arrange, and direct their own sessions in the motion capture studio. PREREQUISITE(S): ANI 310 or ANI 450

ANI 452
3D SCRIPTING
Graduate
This is an introductory course in scripting for a 3D production environment. Students will learn and apply basic programming concepts in order to improve the productivity of animators and modelers. Using script, we will automate repetitive tasks, customize the interface, and create new tools. Students will gain a fundamental understanding of how a 3D animation package functions behind the interface. PREREQUISITE(S): (ANI 230 or ANI 405) and (ANI 231 or ANI 405)
ANI 453
ADVANCED 3D SCRIPTING
Graduate
This is an intermediate course in scripting for a 3D production environment. Students will go beyond the introductory course to learn more advanced scripting techniques and practices. Students will learn how to assess a problem/opportunity in the production pipeline, spec out tools, build an effective tool and produce simple interfaces. PREREQUISITE(S): ANI 452

ANI 455
STOP MOTION ANIMATION
Graduate
The principles of stop motion character animation in real space are the emphasis of this intermediate level course. Students are introduced to basic armature building, lighting and scene composition, and the designing and fabrication of characters with a variety of materials. Contemporary uses of digital technology to enhance stop motion production will be explored. PREREQUISITE(S): ANI 201 (or ANI 101)

ANI 456
EXPERIMENTAL ANIMATION
Graduate
This course introduces strategies for an experimental approach to animation. Students will study how experimentation relates to both concept and technique, and examine the work of classic experimental animators. This is a production class that requires students to produce a series of short animations in a variety of processes and styles. PREREQUISITE(S): ANI 201 or ANI 101

ANI 457
HYBRID ANIMATION
Graduate
This production course focuses on combining multiple animation techniques. Students will complete the assignments and final project using mixed media with the choice of animation techniques, content and form left to the individual or group. Topics include pixilation, rotoscoping, and creative use of green screen, among others. PREREQUISITE(S): ANI 421

ANI 460
ANIMATION GRADUATE SEMINAR
Graduate
This seminar will explore the animator's role in contemporary culture, including careers in entertainment, art, game development and education. A combination of guest speakers, critical readings, animation analysis and group discussion will help students lay a foundation for their graduate study in the field.

ANI 461
MOTION GRAPHICS
Graduate
This course introduces effective communication using motion graphics; including its application in the areas of film titles, broadcast and commercial design, interactive media, and gaming. The combination of music, animation, graphic design and typography will be explored following the basic theories of dynamic composition and aesthetics. A focus and analysis on Motion Graphics History, including abstract film, modernist television, computer art, synesthesia, and film title design, will be coupled with animation and design exercises, and simulated concept "pitch" presentations. An emphasis is placed on gaining familiarity with contemporary styles and trends in professional motion graphics, as well as state-of-the-art software and tools. Readings and responses will be due each week in addition to practical projects. Projects will include: 3 short fundamental exercises, a concept development and pitch presentation, a film title design project, and a 7-10 page research paper.

ANI 466
CINEMA, ANIMATION AND ART
Graduate
This seminar course focuses on animation and cinema from the standpoint of Modern and Contemporary art. Students study the major styles and themes of historical experimental film and video, and relate these topics to contemporary animation and independent cinema practices. Emphasis is placed on theory and criticism, and how it informs experimental work. Students are expected to discuss work and theory in a seminar setting, and to engage the class material in several research papers.
ANI 470
ACTING FOR ANIMATORS
Graduate
This is acting training designed specifically for the needs of animators, as opposed to stage actors. Utilizing lecture/discussion, examination/deconstruction of animated and live-action film clips, home assignments and a few simple in-class improvisations, this course provides the animator with the skills necessary to deliver dynamic animated character performance. Assessment measures include oral and written reflective analysis, short animated character sketches and class participation. PREREQUISITE(S): 421

ANI 478
3D DYNAMICS
Graduate
This course will provide an introduction to dynamic simulation and effects in 3D animation. Topics to be covered include hair and fur, fluid dynamics, smoke and fire, particles, and cloth. An emphasis will be placed on how these effects can enhance an idea or narrative, establish mood, or even be used as a basis for experimental animation. Students will use traditional animation and visual design principles as a basis for creating several small projects. PREREQUISITE(S): (ANI 230 or ANI 405) and (ANI 231 or ANI 405)

ANI 479
3D COMPOSITING
Graduate
This course is designed to allow advanced compositors and animators to merge the 2D, 3D and/or live-action video worlds, drawing from a combination of techniques such as motion tracking, compositing, rotoscoping, hand-drawn, cut-out and 3D animation. The goals are to go beyond simply achieving technical proficiency, as we will also focus on learning principles of good animation in preparation for both artistic and commercial endeavors. PREREQUISITE(S): ANI 231 or ANI 405

ANI 480
ANIMATION PROJECT BLUELIGHT
Graduate
Production of an animated digital motion picture written by students or faculty within the School of Cinematic Arts. Students will work as crew under supervision of faculty members heading each of the various production areas. The goal is to work towards a completed animated digital motion picture suitable for festivals or distribution.

ANI 481
AUDIO FOR ANIMATION
Graduate
This class will explore concepts and practical techniques students need in order to address many of the unique challenges associated with creating audio for animated films. Students will begin with an introduction to audio production before moving on to build practical skills for both field and studio recording. Lectures, readings, and hands on projects will give students a working knowledge of how to approach and create the immense range of styles of audio for animated films, from classic cartoon soundtracks to the live action style mixes of many of today's animated Hollywood blockbusters. Students will complete several audio projects including a multi-track mix for an animated short. PREREQUISITE: None

ANI 490
TOPICS IN ANIMATION
Graduate
Advanced study in animation focusing on a specific area each quarter. May be repeated for credit. PREREQUISITE(S): ANI 101 or ANI 201 or consent of the instructor.

ANI 493
TOPICS IN 3D ANIMATION
Graduate
Advanced study in 3D animation focusing on a specific area each quarter. May be repeated for credit. PREREQUISITE(S): ANI 230 or ANI 405 or consent of the instructor.
ANI 540
ANIMATED SHORT FILM PART I
Graduate
This course and its continuation, ANI 541, will concentrate on facilitating the graduate students' production of a short, independently animated project. The topics of idea generation, experimentation, problem solving, planning and time management, and the process of critical analysis will be applied to the students work, with the choice of animation technique, content and form left to the individual. We will have technical demonstrations on an as-needed basis, depending on the nature of your animations. This course must be taken consecutively with ANI 541 Animated Short Film Part II. PREREQUISITE(S): ANI 440 (2 quarter hours)

ANI 541
ANIMATED SHORT FILM PART II
Graduate
This course is a continuation of ANI 540 Animated Short Film Part I. Throughout the quarter students will continue working on their films, meeting with the instructor for advising, and other students for group critiques. Students will also learn effective post-production strategies as they near completion of their first film. This course must be taken consecutively with ANI 540. PREREQUISITE(S): ANI 540 (2 quarter hours)

ANI 560
GRADUATE TEACHING SEMINAR
Graduate
This seminar exposes students to effective methods and professional practices of teaching undergraduate and graduate students. A variety of approaches to course materials and projects will be introduced and discussed in detail. In addition to work in class, students will work closely with a faculty member in order to gain first-hand knowledge, including class observation, of practical aspects of creative and academic instruction. PREREQUISITE(S): none

ANI 599
INDEPENDENT STUDY
Graduate
Independent study form. PREREQUISITE(S): Consent of dean and consent of instructor required. (Variable credit)

ANI 639
MFA PRE-THESIS
Graduate
In this course the MFA student will develop the concept and pre-production of their thesis animation through workshops, critiques and assignments. Students will create inspiration and concept art, write a treatment, create a storyboard and animatic as well as research design options to be used on their final film project in ANI 640 MFA Thesis Animation. PREREQUISITE(S): ANI 442

ANI 640
MFA THESIS ANIMATION
Graduate
This course is a three quarter class that will concentrate on the graduate students' production, post-production and completion of their final thesis project. Students will have regular critique sessions with their three Thesis Advisors from the animation faculty. The student's project will be presented to the committee upon completion. PREREQUISITE(S): ANI 639 (1 quarter hour)

ANT 102
CULTURAL ANTHROPOLOGY
Undergraduate
An introduction to current anthropological theories and methods for understanding human cultures from a comparative perspective; includes an analysis of human institutions such as religion, politics, and kinship, and the forces that change them in a variety of societies, small and large scale.

ANT 103
ARCHAEOLOGY
Undergraduate
An exploration of the science of archaeology, the study of past human behavior through material remains. Examines the ways archaeologists gather data and the methods used to analyze and interpret these data to learn about the past and how human societies evolved.
ANT 104
INTRODUCTION TO BIOLOGICAL ANTHROPOLOGY
Undergraduate
This course will examine the biological history of the human species culminating with an exploration of human biological variation in the modern world. Principles of evolutionary theory and genetics will first be presented to provide a framework for the study of human evolutionary biology. The fossil evidence for human evolution will then be considered using comparative data from nonhuman primate ecology to help reconstruct prehistoric lives. Finally, features of biological modernity will be discussed. Particular attention will be given to how human populations utilized biological and behavioral mechanisms to adapt to their environments throughout evolutionary history. The course includes labs.

ANT 105
ANTHROPOLOGY THROUGH FILM
Undergraduate
This course is an introduction to cultural anthropology, the sub-discipline of anthropology concerned with contemporary human cultures, through film. The aim is to convey the anthropological perspective on behaviors and systems that people create. The course will emphasize fundamental concepts, methods, and theories used to study culture.

ANT 106
LANGUAGE AND CULTURE
Undergraduate
Definitions and features of language and communication, and their relationship to thought and culture. Topics include the classification of languages, language acquisition, linguistic variation, language communities, multilingualism, performance, and variability of language use.

ANT 107
THE CULTURE OF BUSINESS
Undergraduate
This course asks what role culture plays in business. We will explore the ways in which culture influences consumer decision-making, global business practices, marketing strategies, corporate ethics, and business education and training. By the end of the course, you will be familiar with the ideas, values, and concerns that underpin business practices and be able to apply your understanding of culture to the way you interact with the business world.

ANT 109
FOOD AND CULTURE
Undergraduate
Explores the concept of culture by focusing on people's knowledge of food; it examines the local sameness and global peculiarity of people's food preferences, considering tastes and environmental impacts, health implications, dietary restrictions, and other social impacts.

ANT 120
SCIENCE OF ARCHAEOLOGY
Undergraduate
Archaeology spans the academic worlds of the physical sciences and the social sciences. In this course, the physical science qualities of the discipline are introduced. Students explore the various ways archaeologists use model building, statistical inference, and evidence analysis to reconstruct past human experiences. The course includes two hour of lab and two hours of lecture/discussion per week.

ANT 201
ETHNOGRAPHIC RESEARCH METHODS
Undergraduate
This course focuses on practicing data collection techniques used by qualitative researchers in the social sciences. Under the supervision of the instructor, students will design and implement a collaborative research project. The techniques to be used may include (but are not limited to) observation, structured and semi-structured interviewing, network analysis, and focused group interviewing. The experience gained in this course prepares students for research activities in future course work, graduate school and professional life. In addition to the practical hands-on training, the course also addresses issues of the relationship of theory to method, ethical concerns in research with human subjects, reflexivity and inter-subjectivity in qualitative research.
ANT 202
ARCHAEOLOGICAL FIELD METHODS
Undergraduate
This course introduces students to the basic field and laboratory methods used in archaeological research through hands on experience. Students will receive intensive field training in archaeological field methods including excavation, survey, mapping, record keeping, and illustration. The course introduces basic laboratory techniques such as artifact processing, identification, and curation. The methodological training will be integrated through emphases on the place of data collection in the archaeological research process, and the relationship between archaeological data and questions of historical and anthropological importance. This course will provide students with the essential basic field training in archaeology required for both applied work in cultural resource management and continued education in archaeology.

ANT 203
PROFESSIONALISM AND ETHICS IN ANTHROPOLOGY
Undergraduate
This class explores the many dimensions of what it means to be a professional anthropologist in both applied and academic areas. Students will learn about specialized resources for anthropologists (web resources, library resources, funding resources, career resources), and become familiar with the professional structure of the discipline. A large portion of the course will be devoted to the debate/discussion/exploration of ethical issues that challenge anthropologists through the use of real cases that have confronted researchers in the field, and through an evaluation of the ethical codes of conduct adopted by the primary professional organizations in anthropology.

ANT 204
LINEAGES OF CULTURE THEORY
Undergraduate
This course provides the student with a history of the culture concept tracing the lineages of thought about culture from the nineteenth century to the present. Readings and seminar discussions will present an explicit discussion of how ideas and understanding about culture have changed over time and will introduce students to the main branches of cultural theory. Students will develop the skills and confidence to work with the abstractions and concepts that underlie anthropological research. The course is reading and writing intensive.

ANT 206
WORLD PREHISTORY
Undergraduate
Placing an emphasis on both theory and the latest archaeological and multidisciplinary approaches this overview of world prehistory will look at a series of interesting problems and case studies that provide a taste of the richness of human creativity. Topics include the evolution from foraging lifestyles, through the increased control of nature by early farmers, to the rise of states and empires: this is an examination of the deep and tangled roots of today's societies.

ANT 210
AFRICAN CULTURES
Undergraduate
Survey of the people and cultures of Africa. Analysis of beliefs, customs, and social organization of traditional African cultures, and the forces of sociocultural change that have affected traditional patterns of life and are necessary to understand contemporary African societies. Formerly SOC 300.

ANT 220
CULTURES OF EUROPE
Undergraduate
Explores the cultural features of the European experience using ethnographic sources. Focuses on European life at the local level, examines the implications of European Community integration on peoples' lives in various countries, and explores causes of conflict within and between national boundaries. (formerly SOC 300 Regional Ethnology: Peoples of Europe).

ANT 230
CULTURES OF THE PACIFIC
Undergraduate
Explores traditional and contemporary cultures of the Pacific. A survey of Oceanic cultures from Australia, Melanesia, Micronesia, and Polynesia; consideration of the geography and geology of Pacific islands; and analysis of the history of contact between Pacific island peoples with Westerners and the consequences for life in the contemporary Pacific. (formerly SOC 300 Regional Ethnology: The Pacific Islands).
ANT 240
CULTURES OF THE MIDDLE EAST
Undergraduate
Explores the cultures and societies of the contemporary Middle East. Focuses on everyday life and practices, such as religion, social organization, art and popular culture. Uses ethnographic sources to examine the historical influence of various civilizations and religions on contemporary Middle Eastern societies from North Africa to Iran.

ANT 250
MATERIAL CULTURE OF MODERN AMERICA
Undergraduate
This course combines historical archaeology and material culture studies to examine how material goods both shape and reflect American identity. The course will take an historical approach beginning in the 17th century when most Americans wore homespun clothing and produced their own food, and continue to the 21st century and a time when Americans wear the national colors of Tommy Hilfiger and eat fast food lunches. Often such changes in material culture are characterized as the process of "modernization," and as such, the course will be centered on the relationship between material culture, American identity and conceptions of modernity. Cross-listed with AMS 370.

ANT 252
MATERIAL CULTURE AND DOMESTIC LIFE
Undergraduate
This course explores the social, and economic dynamics of households through material culture. Specifically, this course looks at how material goods structure domestic life, reflect values surrounding family and kinship, and mediate the relationship between individual households and broader levels of social organization such as community, society, and culture.

ANT 254
HISTORICAL ARCHAEOLOGY OF CHICAGO
Undergraduate
Students will be participating in an archaeological research project focusing on Chicago's past. The course will include an introduction to the concept of an archaeological research design. Students will engage in historical research using primary documents and analyze archaeological data to address specific research questions about Chicago's recent past.

ANT 202 is a prerequisite for this course.

ANT 256
MATERIAL CULTURE OF THE OLD WORLD
Undergraduate
This course combines archaeology and material culture studies to examine how material goods both shape and reflect human experience in Asia, Africa and Europe. The course will be centered on the relationship between material culture, technology, subsistence patterns and societal complexity. The rise of cities and states in the old world will also be examined.

ANT 270
HUMAN EVOLUTION
Undergraduate
Principles of evolutionary theory and genetics will first be presented to provide a framework for the study of human evolutionary biology. Beginning with the earliest fossil evidence, the course will trace human evolution. Particular attention will be given to the forces of environment and sexual selection at work at various points in time. Data from nonhuman primate ecology will be used to help reconstruct prehistoric lives.

ANT 272
INTRODUCTION TO MEDICAL ANTHROPOLOGY
Undergraduate
This course explores the interrelationships between culture and human health for the purposes of understanding the biosocial origins of disease, systems of treatment, and the global inequalities that shape disease patterns and access to health care resources.

ANT 274
FORENSIC ANTHROPOLOGY
Undergraduate
This course separates fact from media fantasy in the application of anthropological knowledge to determining the cause of death. Specific case studies are presented that show the range of situations confronted by anthropologists who consult with law enforcement agencies.
ANT 280
ARCHAEOLOGICAL FIELDWORK
Undergraduate
This course introduces students to the basic field and laboratory methods used in archaeological research through hands on experience. Students will receive intensive field training in archaeological field methods including excavation, survey, mapping, record keeping, and illustration. The course introduces basic laboratory techniques such as artifact processing, identification, and curation. The methodological training will be integrated through emphases on the place of data collection in the archaeological research process, and the relationship between archaeological data and questions of historical and anthropological importance. This course will provide students with the essential basic field training in archaeology required for both applied work in cultural resource management and continued graduate education in archaeology.

ANT 290
SPECIAL TOPICS IN REGIONAL ETHNOLOGY
Undergraduate
Compares the patterns of sociocultural life in different societies within a particular geographic region in order to gain a general understanding of cultural themes, trends, and historical developments. Check current schedule of courses for specific topic. Course may be repeated for credit when title and content change.

ANT 314
ANTHROPOLOGY OF GENDER
Undergraduate
This course exposes students to a variety of topics that address gender cross-culturally and from an anthropological perspective. We shall explore the cultural processes that shape the lives of men, women and transgendered people across time and space.

ANT 317
LANGUAGE, POWER AND IDENTITY
Undergraduate
Explores how communication patterns vary cross-culturally. Examines how the language people speak shapes their worldview and their ways of interacting with each other. Students learn basic techniques of analyzing conversations.

ANT 320
HUMAN VARIATION
Undergraduate
Explores the interrelationships between culture, biology, and the environment in the shaping of social life, including human evolution, sexual differences, skin color, “race,” body shape, and other aspects of human variation.

ANT 322
COMMUNITY-BASED APPLIED PRACTICE
Undergraduate
This laboratory course in the applied anthropology sequence introduces students to the range of anthropological practice in the public and not-for-profit sector. Students will learn about the ways that anthropology has been and can be applied to initiate practical change in communities. In addition to learning the professional and ethical responsibilities of practicing anthropologists, students will also gain a practical experience working on an applied project. Human Subjects Research certification and an ethnographic methods is required for this class. ANT 201, ANT 203 and senior standing are a prerequisite for this class.

ANT 324
COLONIALISM TO GLOBAL SOCIETY
Undergraduate
This course examines long-term trends in the development of capitalist society in terms of both material and social organization from the 15th century to the present. Modeled on the core text, Europe and the People without History by Eric Wolfe, the course seeks to ground students in long-term processes of cultural development and change. These issues will be explored through a combination of archaeological and ethnographic perspectives and evidence.
ANT 326
TRANSNATIONAL CULTURES
Undergraduate
This course examines the emergence of transnational culture in the modern world. The focus is on relationships and processes that link communities, such as trade, migration, and tourism, and the local experience of these global processes. While classroom discussion will be structured around critical readings of texts, self reflection and value consciousness will be encouraged. To this end, assignments will combine critical readings and guided experiential activities. Students will be tutored in techniques for giving professional style presentations. The course may vary according to faculty interest. Possible foci include labor migration, media, tourism, and/or global consumption.

ANT 328
INTERNATIONAL APPLIED PRACTICE
Undergraduate
Examines various processes of sociocultural change, with emphasis on peoples undergoing or emerging from cultural, political, or economic oppression.

ANT 330
CLIENT-BASED APPLIED PRACTICE
Undergraduate
This laboratory course introduces students to the use of anthropological methods and theories in the private, for-profit sector. Students will learn about the type of work anthropologists are performing in the corporate world such as design and marketing research, product usability studies, and cultural resource management. In addition to learning the professional and ethical responsibilities of practicing anthropologists, students will also gain a practical experience working on an applied project. Formerly ANT 316.

ANT 342
ANTHROPOLOGY OF FOOD MOVEMENTS AND PRACTICES
Undergraduate
The meaning we attach to the foods we eat changes with the shifts in markets, governmental regulation and commitments to particular diets. This course provides ethnographic observational field studies of these changing movements and practices, leading the student to insights into cultural processes generally, and dietary practices in particular. The field site varies with the instructor and campus.

ANT 346
URBAN ANTHROPOLOGY
Undergraduate
Theories and methods of contemporary anthropology and other fields are used to analyze cities and urban life. Cross-culturally explores the processes of urbanization, urbanism (urban culture, subcultures, and ethnic lifestyles), and the notion of images of cities. Recommended for sophomore level or above.

ANT 356
URBAN ETHNOGRAPHY
Undergraduate
Examines the city as a type of human settlement, focusing on the different forms, functions, images, and ideological perceptions of cities over time and across a number of different cultures. Formerly SOC 356.

ANT 358
ARCHAEOLOGY OF CITIES
Undergraduate
This class provides a general overview of the archaeology of urban settlements. We will begin by asking the question “What is a city?” and look at the different theories that address the nature and origins of early urban settlements. To further examine this question we will focus on Cahokia, the largest prehistoric settlement in North America north of Mexico, and the city of Chicago, a well established urban, industrial center. The second portion of the class will take an even broader comparative approach towards the archeology of cities by applying the theories and insights gained in the first portion of the course to different world areas. Through these comparisons students will gain a deeper understanding of the diversity of urban forms across time and space, and consider the possibilities of cross-cultural similarities among prehistoric and early historic urban populations.
ANT 360
ISSUES IN GLOBAL HEALTH
Undergraduate
This course focuses on a specific health issue or set of issues in our world. The interrelationships between culture and health in this issue are examined.

ANT 361
GLOBAL ISSUES IN WOMEN’S HEALTH
Undergraduate
This course provides an overview of several critical issues in international women's health that illustrate the tension between biological/cultural and environmental explanations. We begin the semester by asking the question, “What does it mean to think anthropologically about women's health?” The course has an emphasis on how women themselves define, confront, manage and develop capacity to organize for better health in the face of societal pressures, structural violence and unequal access to resources. Students are also introduced to basic knowledge of epidemiological transitions, evolutionary medicine and situate Western medicine within the medical systems that have formed in the broader story of human history.

ANT 362
GLOBAL HISTORY OF HEALTH
Undergraduate
This course investigates the impact of infectious disease on human societies from the Paleolithic through the present day. Using the framework of the three epidemiological transitions, it examines the changes in human health associated with the origins of agriculture, the development of industrialization, and the processes of globalization. Throughout this vast sweep of human history, emphasis is placed on the influence of both biological and social factors on the manifestations of human disease.

ANT 374
ANTHROPOLOGY AND MUSEUMS
Undergraduate
The course examines the evolving relationships between anthropology and museums. From functional, historical, material and aesthetic perspectives, the relationships between the cultural contexts of objects and museums will be explored. Case studies, guest lectures and site visits (virtual and real) will be used to demonstrate evolving theory, practice, law and ethical implications of collecting objects. Many of the logistical aspects of the museum including the laws and mission statements will also be examined.

ANT 378
MUSEUM EDUCATION
Undergraduate
The specialized role of museum education is integral to developing and strengthening the museum's purpose as a public institution. This course explores the role of education in museums, emphasizing theory and practice. The class will examine concepts such as; the history and development of museum education, current issues, learning theories, techniques, creation of didactic materials, types of outreach, management policy, working with volunteers, and program evaluation.

ANT 380
INTERNSHIP IN ANTHROPOLOGY
Undergraduate
This course affords credit toward graduation for students involved in department approved internships.

ANT 382
HERITAGE DISPLAYS AND MUSEUMS
Undergraduate
This course examines the production and display of “culture” and “heritage” in public places worldwide, including tourist destinations, museums, and historic and commemorative sites. We will focus on the social and political implications of these processes and their relationship to anthropology. Museums were an early locus of anthropology and continue to be key sites for its public expression. In this course we will investigate “culture” on the loose and consider what studying the museum, tourism, and heritage industries can teach us about anthropology. Students will gain a deeper understanding of the concept of culture in anthropology. We will divide our time between reading, field trips to local museums and historic sites, and a hands-on class project.
ANT 384
ARCHAEOLOGICAL ANALYSIS
Undergraduate
The course is an introduction to the analysis of archaeological data, the interplay between the knowledge people have of the world and the remains and traces of their actions in it. We review the relevant culture theory needed to draw distinctions between analytical stances. We examine how the rhetoric of the research report changes as different analytical stances are selected.

ANT 386
CULTURAL ANALYSIS
Undergraduate
Introduction to cultural analysis, the interplay between the knowledge people have of the world and their actions in it; explores the rudiments of culture theory needed to draw distinctions between analytical stances; examines how the rhetoric of the research report changes as different analytical stances are selected. Cross-listed with INT 204.

ANT 388
PROFESSIONAL RESEARCH TUTORIAL
Undergraduate
This course helps anthropology majors prepare for professional presentations at conferences, research exposition, publications and theses. It uses data collected in another class. The student focuses on developing the communication techniques necessary to meet a professional standard. Honors program students complete the honors program in anthropology with this course. The course is registered using the independent study procedure on Campus Connect. The course is taken normally for 2 credits. Students writing an honors program thesis can take the course for 4 credits.

ANT 390
SPECIAL TOPICS IN ANTHROPOLOGY
Undergraduate
Variable topics in anthropology intended for advanced students. Explores special aspects or areas of anthropology based on particular interests and expertise of the instructor; course content and title will vary with the instructor. Check current schedule of courses for specific topic. Course may be repeated for credit when title and content change.

ANT 395
SEMINAR IN ANTHROPOLOGY
Undergraduate
In-depth examination of selected topics in sociocultural anthropology, based either on a geographic area or theoretical theme. Check current schedule of courses for specific topic. Course may be repeated for credit when title and content change.

ANT 102 is a prerequisite for this course.

ANT 396
SENIOR CAPSTONE SEMINAR
Undergraduate
A course for senior anthropology majors, which satisfies the Senior Year Capstone requirement of the Liberal Studies Program. Objectives of the course are: to afford students the opportunity to reflect on the influences in their lives (both in and outside of academics) that directed them toward anthropology as a field of study; to formulate ideas regarding the affect anthropology has on their way of viewing themselves in the world around them; and to pursue research on an anthropologist or anthropological topic.

ANT 397
TRAVEL/STUDY
Undergraduate
Foreign study tours with lectures and research by special arrangement with sponsoring programs. May be taken for multiple credit when courses are not duplicated.

ANT 399
INDEPENDENT STUDY
Undergraduate
Independent Study.
This seminar explores the aims of graduate education with particular focus on the program of study leading to the Master of Arts in Applied Professional Studies?its purpose, scope, philosophy, key roles, and processes. Special emphasis is placed on developing a working draft of the Graduate Learning Plan for the individualized portion of the Program (i.e., Focus Area), attaining a fuller understanding of individual fields of professional study, and applying concepts, perspectives and skills of liberal learning in professional practice. In addition, the process is initiated for establishing each student?s guidance committee ("Academic Committee") consisting of the Student, the Faculty Mentor, and a Professional Advisor (i.e., an established practitioner in the student?s Focus Area).

Status as a MAAPS student or departmental permission is a prerequisite for this class.

Through this review process, students finalize their Graduate Learning Plans, convene their Academic Committees (comprised of themselves, their Professional Advisors, and their Faculty Mentors) to review their Learning Plans, and eventually submit their Learning Plans to the Graduate Student Program Review Committee (GSPRC) for final approval. (2 quarter hours)

Status as a MAAPS student or departmental permission is a prerequisite for this class.

This MAAPS/MSAT foundational course provides participants with skills in collecting, analyzing and synthesizing literature and resources in their respective area(s) of practice. Among these skills are: searching and accessing various sources; discerning credibility of sources; storing and retrieving information for oneself; constructing thematic literature reviews; and, citing sources using APA style. (2 quarter hours)

Status as a MAAPS or MSAT student is a prerequisite for this class.

Through this competence area, students address knowledge and understanding of theories, models and/or theoretical frameworks?including implications for practice?relevant to their individualized areas of focus. In areas where theories are not well established (e.g., in emerging fields of study or in unique combinations of fields), this area includes exploration of theories in related fields. (2 quarter hours)

Status as a MAAPS student or departmental permission is a prerequisite for this class.

Through this competence area, students address the systematic gathering of data and interpretation of findings as practiced within their areas of focus or related fields. (2 quarter hours)

Status as a MAAPS student or departmental permission is a prerequisite for this class.

Scheduled at intervals across the MAAPS Program, Assessment and Integration Sessions provide opportunity for students to meet with their faculty mentors for purposes of ongoing assessment and integration regarding all aspects of the program. (.5 quarter hour)

Status as a MAAPS student or departmental permission is a prerequisite for this class.
AP 530
SPECIALIZED SKILLS
Graduate
Through this competence area, students identify, develop and demonstrate skills that are particular to their areas of focus and the context(s) in which these skills are applied. (2 quarter hours)
Status as a MAAPS student or departmental permission is a prerequisite for this class.

AP 540
COMMUNICATION MODES
Graduate
Through this competence area, students identify, develop and demonstrate facility with communication modes relevant to their areas of focus. (2 quarter hours)
Status as a MAAPS student or departmental permission is a prerequisite for this class.

AP 548
ASSESSMENT AND INTEGRATION SEMINAR II
Graduate
Scheduled at intervals across the MAAPS Program, Assessment and Integration Sessions provide opportunity for students to meet with their faculty mentors for purposes of ongoing assessment and integration regarding all aspects of the program. (.5 quarter hour)
Status as a MAAPS student or departmental permission is a prerequisite for this class.

AP 550
ORGANIZATIONAL AND/ OR INTERPERSONAL DYNAMICS
Graduate
Through this competence area, students address the human and structural issues relevant to professional practice in their areas of focus. This includes exploration regarding how professional practice per area of focus is affected by systems, technology, structure and other people. (2 quarter hours)
Status as a MAAPS student or departmental permission is a prerequisite for this class.

AP 558
ASSESSMENT AND INTEGRATION SEMINAR III
Graduate
Scheduled at intervals across the MAAPS Program, Assessment and Integration Sessions provide opportunity for students to meet with their faculty mentors for purposes of ongoing assessment and integration regarding all aspects of the program. (.5 quarter hour)
Status as a MAAPS student or departmental permission is a prerequisite for this class.

AP 560
CHALLENGES FROM LARGER CONTEXTS
Graduate
Through this competence area, students address the ability to situate their areas of focus (including their issues and problems) within one of the following contexts: the temporal context (historical development and future direction of the area of focus); the social/cultural context (relationship of the area of focus to its societal context); or, the international context (the state of the area of focus globally). (2 quarter hours)
Status as a MAAPS student or departmental permission is a prerequisite for this class.

AP 570
ETHICAL ISSUES
Graduate
Through this competence area, students address the relationship between beliefs and assumptions regarding humanity, good/evil, right/wrong, etc., and behavioral outcomes (including areas of conflict) relevant to their areas of focus. (2 quarter hours)
Status as a MAAPS student or departmental permission is a prerequisite for this class.
AP 574
REFLECTION IN N/ON PRACTICE
Graduate
Through this competence area, students address the interplay between thinking, doing and reflecting in order to generate new ways of mentally organizing ideas and identifying new possibilities to inform future practice their areas of focus. (2 quarter hours)

Status as a MAAPS student or departmental permission is a prerequisite for this class.

AP 578
ASSESSMENT AND INTEGRATION SEMINAR IV
Graduate
Scheduled at intervals across the MAAPS Program, Assessment and Integration Sessions provide opportunity for students to meet with their faculty mentors for purposes of ongoing assessment and integration regarding all aspects of the program.

Status as a MAAPS student or departmental permission is a prerequisite for this class.

AP 585
SUPPLEMENTAL COMPETENCE I
Graduate
Through this competence area, students identify an additional area from among Theories, Research Methods, Specialized Skills, Communication Modes, Organizational/Interpersonal Dynamics, Larger Contexts, Ethical Issues and Reflection in/on Practice regarding which to develop and demonstrate competence. (2 quarter hours)

Status as a MAAPS student or departmental permission is a prerequisite for this class.

AP 586
SUPPLEMENTAL COMPETENCE II
Graduate
Through this competence area, students identify an additional area from among Theories, Research Methods, Specialized Skills, Communication Modes, Organizational/Interpersonal Dynamics, Larger Contexts, Ethical Issues and Reflection in/on Practice regarding which to develop and demonstrate competence. (AP-586, AP-587, AP-588 and AP-589 collectively serve as a culmination option for the MAAPS degree.) (2 quarter hours)

Status as a MAAPS student or departmental permission is a prerequisite for this class.

AP 587
SUPPLEMENTAL COMPETENCE III
Graduate
Through this competence area, students identify an additional area from among Theories, Research Methods, Specialized Skills, Communication Modes, Organizational/Interpersonal Dynamics, Larger Contexts, Ethical Issues and Reflection in/on Practice regarding which to develop and demonstrate competence. (AP-586, AP-587, AP-588 and AP-589 collectively serve as a culmination option for the MAAPS degree.) (2 quarter hours)

Status as a MAAPS student or departmental permission is a prerequisite for this class.

AP 588
SUPPLEMENTAL COMPETENCE IV
Graduate
Through this competence area, students identify an additional area from among Theories, Research Methods, Specialized Skills, Communication Modes, Organizational/Interpersonal Dynamics, Larger Contexts, Ethical Issues and Reflection in/on Practice regarding which to develop and demonstrate competence. (AP-586, AP-587, AP-588 and AP-589 collectively serve as a culmination option for the MAAPS degree.) (2 quarter hours)

Status as a MAAPS student or departmental permission is a prerequisite for this class.
AP 589  
SUPPLEMENTAL COMPETENCE V  
Graduate  
Through this competence area, students identify an additional area from among Theories, Research Methods, Specialized Skills, Communication Modes, Organizational/Interpersonal Dynamics, Larger Contexts, Ethical Issues and Reflection in/on Practice regarding which to develop and demonstrate competence. (AP-586, AP-587, AP-588 and AP-589 collectively serve as a culmination option for the MAAPS degree.) (2 quarter hours)  
Status as a MAAPS student or departmental permission is a prerequisite for this class.

AP 590  
PROF COMPETENCE: SPECIAL SUPPLEMENTAL  
Graduate  
As an option to the Integrating Project, student may elect to develop and demonstrate an additional four areas of professional competence from among Theories, Research, Skills, Communication Modes, Organizational/Interpersonal Dynamics, Larger Contexts, Ethical Issues, and Reflection on Practice. (1 quarter hour)

AP 591  
INTEGRATING PROJECT PROPOSAL  
Graduate  
Students develop and submit concise, well-honed documents proposing the nature and scope of their Final Integrating Projects. Topics being proposed are to be supported by relevant professional/scholarly literature and to include the use of appropriate method(s) of inquiry. (AP-591 and AP-592 serve as a culmination option for the MAAPS degree.) (2 quarter hours)  
Status as a MAAPS student or departmental permission is a prerequisite for this class.

AP 592  
FINAL INTEGRATING PROJECT  
Graduate  
In fulfillment of the approved Integrating Project Proposal (AP-591), students develop and submit an original, independently-conducted project that provides a significant contribution to their areas of focus. Such projects incorporate elements of theory and practice and demonstrate integration of liberal learning and focus area competencies from across the MAAPS Program. (AP-591 and AP-592 serve as a culmination option for the MAAPS degree.) (6 quarter hours)  
Status as a MAAPS student or departmental permission is a prerequisite for this class.

APB 110  
EUPHONIUM  
Undergraduate  
Advanced individual instruction in euphonium performance at the undergraduate level. Undergraduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 48 credits of applied lessons over their entire course of study.  
Status as an Undergraduate Music student is a prerequisite for this class.

APB 130  
FRENCH HORN  
Undergraduate  
Advanced individual instruction in french horn performance at the undergraduate level. Undergraduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 48 credits of applied lessons over their entire course of study.  
Status as an Undergraduate Music student is a prerequisite for this class.

APB 165  
TROMBONE  
Undergraduate  
Advanced individual instruction in trombone performance at the undergraduate level. Undergraduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 48 credits of applied lessons over their entire course of study.  
Status as an Undergraduate Music student is a prerequisite for this class.
APB 170
TRUMPET
Undergraduate
Advanced individual instruction in trumpet performance at the undergraduate level. Undergraduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 48 credits of applied lessons over their entire course of study.

Status as an Undergraduate Music student is a prerequisite for this class.

APB 175
TUBA
Undergraduate
Advanced individual instruction in tuba performance at the undergraduate level. Undergraduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 48 credits of applied lessons over their entire course of study.

Status as an Undergraduate Music student is a prerequisite for this class.

APB 410
EUPHONIUM
Graduate
Advanced individual instruction in euphonium performance at the graduate level. Graduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 24 credits of applied lessons over their entire course of study.

Status as a Graduate Music student is a prerequisite for this class.

APB 430
FRENCH HORN
Graduate
Advanced individual instruction in french horn performance at the graduate level. Graduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 24 credits of applied lessons over their entire course of study.

Status as a Graduate Music student is a prerequisite for this class.

APB 465
TROMBONE
Graduate
Advanced individual instruction in trombone performance at the graduate level. Graduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 24 credits of applied lessons over their entire course of study.

Status as a Graduate Music student is a prerequisite for this class.

APB 470
TRUMPET
Graduate
Advanced individual instruction in trumpet performance at the graduate level. Graduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 24 credits of applied lessons over their entire course of study.

Status as a Graduate Music student is a prerequisite for this class.

APB 475
TUBA
Graduate
Advanced individual instruction in tuba performance at the graduate level. Graduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 24 credits of applied lessons over their entire course of study.

Status as a Graduate Music student is a prerequisite for this class.
APK 150
PIANO
Undergraduate
Advanced individual instruction in piano performance at the undergraduate level. Undergraduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 48 credits of applied lessons over their entire course of study.

Status as an Undergraduate Music student is a prerequisite for this class.

APK 160
HARPSICHORD
Undergraduate
Advanced individual instruction in harpsichord performance at the undergraduate level. Undergraduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 48 credits of applied lessons over their entire course of study.

Status as an Undergraduate Music student is a prerequisite for this class.

APK 450
PIANO
Graduate
Advanced individual instruction in piano performance at the graduate level. Graduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 24 credits of applied lessons over their entire course of study.

Status as a Graduate Music student is a prerequisite for this class.

APK 460
HARPSICHORD
Graduate
Advanced individual instruction in harpsichord performance at the graduate level. Graduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 24 credits of applied lessons over their entire course of study.

Status as a Graduate Music student is a prerequisite for this class.

APM 125
ITALIAN DICTION I
Undergraduate
Beginning level Italian and English diction for singers, and an introduction to the international phonetic alphabet. (0 quarter hours)

APV 100 is a corequisite for this class.

APM 126
GERMAN DICTION I
Undergraduate
Beginning level German diction for singers. (0 quarter hours)

APM 125 is a prerequisite and APV 100 is a co-requisite for this class.

APM 127
FRENCH DICTION I
Undergraduate
Beginning level French diction for singers. (0 quarter hours)

APM 126 is a prerequisite and APV 100 is a co-requisite for this class.
APM 160  
LATIN ACCESSORIES TECHNIQUES  
Undergraduate  
Class playing techniques for bongos, congas, and other Latin accessories. (2 quarter hours)  
Status as an Undergraduate Music student is a prerequisite for this class.

APM 170  
PERCUSSION CONCERT ACCESSORIES TECHNIQUES CLASS  
Undergraduate  
Class playing technique for cymbals, triangle, tambourine, and other percussion accessories. (2 quarter hours)  
Status as an Undergraduate Music student is a prerequisite for this class.

APM 201  
INTRODUCTION TO BRASS PLAYING  
Undergraduate  
This course is designed to introduce basic playing techniques for all brass instruments. (2 quarter hours)  
Status as an Undergraduate Music student is a prerequisite for this class.

APM 204  
VOCAL COACHING I  
Undergraduate  
The musical and dramatic performance of select vocal repertoire with special regard to recital material, integrating stylistic considerations, ornamentation, and cadenzas. (1 quarter hour)  
An undergraduate vocal performance major and a completed petition to major is a prerequisite for this class.

APM 205  
JUNIOR RECITAL  
Undergraduate  
A short, 30-60 minute, public recital performance of solo and/or chamber repertoire to be completed in the Junior year. (0 quarter hours)  
APB 110, APB 130, APB 165, APB 170, APB 175, APK 150, APK 160, APP 100, APS 127, APS 160, APS 180, APS 185, APS 190, APW 115, APW 120, APW 125, APW 135, or APV 100 is a corequisite for this class.

APM 225  
ITALIAN DICTION II  
Undergraduate  
Intermediate level Italian diction for singers. (1 quarter hour)  
APM 125 is a prerequisite for this class.

APM 226  
GERMAN DICTION II  
Undergraduate  
Intermediate level German diction for singers. (1 quarter hour)  
APM 126 is a prerequisite for this class.

APM 227  
FRENCH DICTION II  
Undergraduate  
Intermediate level French diction for singers. (1 quarter hour)  
APM 127 is a prerequisite for this class.
APM 242  
ACCOMPANYING CLASS I  
Undergraduate  
An introduction to the role of the piano accompanist in vocal repertoire, and development of basic vocal coaching skills. A year-long sequence of courses. (2 quarter hours)  
Status as an Undergraduate Keyboard student who has passed the petition to major is a prerequisite and APK 150 and APM 300 is a corequisite for this class.

APM 244  
ACCOMPANYING CLASS II  
Undergraduate  
An introduction to the role of the piano accompanist in wind instrumental repertoire, and development of basic vocal coaching skills. A year-long sequence of courses. (2 quarter hours)  
Status as an Undergraduate Keyboard student who has passed the petition to major is a prerequisite and APK 150 and APM 301 is a corequisite for this class.

APM 245  
ACCOMPANYING CLASS III  
Undergraduate  
An introduction to the role of the piano accompanist in string instrumental repertoire, and development of basic vocal coaching skills. A year-long sequence of courses. (2 quarter hours)  
Status as an Undergraduate Keyboard student who has passed the petition to major is a prerequisite and APK 150 and APM 302 is a corequisite for this class.

APM 253  
INTRODUCTION TO ACTING FOR SINGERS  
Undergraduate  
An introductory course in stage terminology and methods of preparation for stage performance. Class activities include reading assignments, discussions, and performances such as singing, spoken monologues and poems, and improvisation. (2 quarter hours)  
Status as an Undergraduate Music student is a prerequisite for this class.

APM 254  
INTRODUCTION TO ACTING FOR SINGERS II  
Undergraduate  
A course in stage terminology and methods of preparation for stage performance. Class activities include reading assignments, discussions, and performances such as singing, spoken monologues and poems, and improvisation. (2 quarter hours)  
Status as an Undergraduate Music student is a prerequisite for this class.

APM 300  
ACCOMPANYING PRACTICUM FOR PIANISTS I: VOICE  
Undergraduate  
An exploration of different styles of vocal repertoire, and the practice of accompanying vocalists in both studio and performance formats. (1 quarter hour)  
Status as an Undergraduate Keyboard student who has passed the petition to major is a prerequisite and APK 150 and APM 242 is a corequisite for this class.

APM 301  
ACCOMPANYING PRACTICUM FOR PIANISTS II: WINDS  
Undergraduate  
An exploration of different styles of wind repertoire, and the practice of accompanying wind players in both studio and performance formats. (1 quarter hour)  
Status as an Undergraduate Keyboard student who has passed the petition to major is a prerequisite and APK 150 and APM 244 is a corequisite for this class.
APM 302
ACCOMPANYING PRACTICUM FOR PIANISTS III: STRINGS
Undergraduate
An exploration of different styles of string repertoire, and the practice of accompanying string players in both studio and performance formats. (1 quarter hour)

Status as an Undergraduate Keyboard student who has passed the petition to major is a prerequisite and APK 150 and APM 245 is a corequisite for this class.

APM 303
MUSICAL COACHING FOR SINGERS
Undergraduate
Students meet in a masterclass format for musical and diction coaching in their current repertoire. (2 quarter hours)

APV 100 is a corequisite for this class. Students must have passed petition to major.

APM 304
VOCAL COACHING II
Undergraduate
The musical and dramatic performance of select vocal repertoire with special regard to recital material, integrating stylistic considerations, ornamentation, and cadenzas. (1 quarter hour)

An undergraduate vocal performance major and a completed petition to major is a prerequisite for this class.

APM 305
SENIOR RECITAL
Undergraduate
A full 60 minute, public recital performance of solo and/or chamber repertoire to be completed in the Senior year. This recital is required as partial fulfillment of the degree of Bachelor of Music in Performance. (0 quarter hours)

APB 110, APB 130, APB 165, APB 170, APB 175, APK 150, APK 160, APP 100, APS 127, APS 160, APS 180, APS 185, APS 190, APW 115, APW 120, APW 125, APW 135, or APV 100 is a corequisite for this class.

APM 306
HARPSICHORD PERFORMANCE PRACTICE
Undergraduate
A practical introduction for pianists to the harpsichord, harpsichord repertoire from the late Renaissance to early Classical eras, and relevant performance practice and stylistic considerations. (2 quarter hours)

Status as an Undergraduate Music student is a prerequisite for this class.

APM 308
BAROQUE PERFORMANCE PRACTICE-INSTRUMENTAL
Undergraduate
This course focuses on the interpretation and performance of music from the Baroque era, concentrating primarily on 18th century literature. Open to all instrumentalists, students will study Baroque performance practice based on the treatises and various writings of the time, as well as current scholarly research of early music specialists. (2 quarter hours)

Status as an Undergraduate Music student is a prerequisite for this class.
APM 309
MUSIC ENTREPRENEURSHIP
Undergraduate
Through opportunity creation, case study, discussion and peer evaluation, this course analyzes and simulates the professional performing arts marketplace, providing collaborative hands-on experience for performers and arts managers-in-training. In this course, performers will hone their musical point-of-view and create an original, self-produced performance opportunity in the DePaul community, with marketing materials and a business structure to support their project. Arts Management students will collaborate with performers on these projects, providing support to their colleagues in a way that models their future professional activities. Each student will also be responsible for analyzing a current successful model, identifying keys to success. This course is intended to bridge the transition from college to career, providing the artistic, career development and entrepreneurship training that have become essential in today's professional environment. Crosslisted with PAM 309. (2 quarter hours)

Status as an Undergraduate Music student is a prerequisite for this class.

APM 311
WOODWIND PEDAGOGY
Undergraduate
This course is designed to provide students with an overview of the important aspects of woodwind pedagogy. Students will gain the necessary knowledge and skills to teach woodwind students of all ages and ability levels. (2 quarter hours)

Status as a Undergraduate Woodwind student who has passed the petition to major is a prerequisite for this class.

APM 315
THE BUSINESS OF MUSIC FROM THE PERFORMER'S PERSPECTIVE
Undergraduate
Explorations of the business aspects of the performing musician. Topics will include unions, networking, freelancing, audition preparation, taxes, and ethics. (2 quarter hours)

Status as an Undergraduate Music student is a prerequisite for this class.

APM 328
ORCHESTRAL REPETTOIRE FOR WOODWINDS I: LITERATURE PERFORMANCE
Undergraduate
Detailed study of significant woodwind orchestral literature, with special emphasis on improving ensemble skills. Each week will feature new repertoire to be rehearsed and performed during the class. (2 quarter hours)

Status as a Undergraduate Woodwind student who has passed the petition to major is a prerequisite for this class.

APM 329
WOODWIND ORCHESTRAL REPETTOIRE II: AUDITION PREPARATION
Undergraduate
An overview of orchestral woodwind audition repertoire with special emphasis on audition preparation and audition practice. Students will take several mock auditions over the course of the quarter to improve their understanding of the audition experience. (2 quarter hours)

Status as a Undergraduate Woodwind student who has passed the petition to major is a prerequisite for this class.

APM 332
PIANO PEDAGOGY I
Undergraduate
Introduction to the field of piano teaching at the beginning through advanced elementary levels, with an emphasis on learning theories, instructional techniques, curriculum planning, studio organization and teaching materials. The first of a two course sequence. (2 quarter hours)

Status as an Undergraduate Keyboard student who has passed the petition to major is a prerequisite for this class.
APM 333
PIANO PEDAGOGY II
Undergraduate
An exploration of all aspects of intermediate level piano study, with emphasis on long/short term goals for musical/technical development, instructional techniques, teaching of functional and musicianship skills, survey of intermediate level teaching materials, grading and repertoire selection. The second of a two course sequence. (2 quarter hours)

Status as an Undergraduate Keyboard student who has passed the petition to major is a prerequisite for this class.

APM 336
VOICE PEDAGOGY
Undergraduate
An introduction to basic concepts of vocal pedagogy and the physiology of the singing voice. Through listening, evaluation, study, discussion, observation, and teaching, students will gain a better understanding of how to approach teaching beginning through advanced vocal students. (2 quarter hours)

An undergraduate vocal performance major and a completed petition to major is a prerequisite for this class.

APM 337
ALEXANDER TECHNIQUE
Undergraduate
Introduction to the Alexander Technique as applied to musical performance. (1 quarter hour)

Status as an Undergraduate Music student is a prerequisite for this class.

APM 340
ORCHESTRAL REPERTOIRE FOR STRINGS I
Undergraduate
Study of standard orchestral repertoire for string instruments. A year-long sequence of courses. (2 quarter hours)

Status as a Undergraduate String Performance student who has passed the petition to major is a prerequisite for this class.

APM 341
ORCHESTRAL REPERTOIRE FOR STRINGS II
Undergraduate
Study of standard orchestral repertoire for string instruments. A year-long sequence of courses. (2 quarter hours)

Status as an Undergraduate String Performance Major and APM 340 are a prerequisite for this class.

APM 342
ORCHESTRAL REPERTOIRE FOR STRINGS III
Undergraduate
Study of standard orchestral repertoire in homogeneous instrument classes: 20th and 21st Century. A year-long sequence of courses. (2 quarter hours)

Status as an Undergraduate String Performance Major and APM 341 are a prerequisite for this class.

APM 343
ORCHESTRAL REPERTOIRE FOR STRING BASS
Undergraduate
Study of standard orchestral repertoire for string basses. (2 quarter hours)

Status as a String Bass student is a prerequisite for this class.
APM 346
PERCUSSION PEDAGOGY
Undergraduate
This course presents teaching techniques of all the major percussion instruments, for students of beginning through advanced levels of proficiency. The course includes an in-depth examination of pertinent published teaching materials, e.g. as method books and collections, as well as an exploration of techniques for motivating young students. (2 quarter hours)

An Undergraduate Percussion Performance major and a completed petition to major is a prerequisite for this class.

APM 347
ORCHESTRAL REPERTOIRE FOR PERCUSSION
Undergraduate
Study of standard orchestral repertoire for percussion instruments. (2 quarter hours)

An Undergraduate Percussion Performance major and a completed petition to major is a prerequisite for this class.

APM 350
INTERPRETATION OF VOCAL LITERATURE I
Undergraduate
Study and demonstration of performance practices (16th-century to present), with a focus on vocal literature in German. (2 quarter hours)

An undergraduate vocal performance major and a completed petition to major is a prerequisite for this class.

APM 351
INTERPRETATION OF VOCAL LITERATURE II
Undergraduate
Study and demonstration of performance practices (16th-century to present), with a focus on vocal literature in French. (2 quarter hours)

Status as an Undergraduate Vocal Performance major and APM 350 is a prerequisite for this class.

APM 352
INTERPRETATION OF VOCAL LITERATURE III
Undergraduate
Study and demonstration of performance practices (16th-century to present), with a focus on vocal literature in Italian and English. (2 quarter hours)

Status as an Undergraduate Vocal Performance major and APM 351 are a prerequisite for this class.

APM 353
TECHNIQUES OF THE MUSIC STAGE I
Undergraduate
Study, coaching, rehearsal and performance of music drama and opera. (2 quarter hours)

An undergraduate vocal performance major and a completed petition to major is a prerequisite for this class.

APM 354
TECHNIQUES OF THE MUSIC STAGE II
Undergraduate
Study, coaching, rehearsal and performance of music drama and opera. (2 quarter hours)

APM 353 is a prerequisite for this class.

APM 356
OPERA WORKSHOP
Undergraduate
An advanced course in opera repertoire; scenes of operas will be presented for public performance. (2 quarter hours)

APM 354 is a prerequisite for this class.
APM 360
TOPICS IN PERFORMANCE
Undergraduate
Indepth investigation of a topic in performance studies. (2 quarter hours)
Status as an Undergraduate Music student is a prerequisite for this class.

APM 361
PIANO LITERATURE I: RENAISSANCE, BAROQUE & CLASSICAL
Undergraduate
An in-depth study of the long-established tradition of pianists and pianism, from Liszt and his disciples in the 19th century through Rachmaninoff, Horowitz and the great pianists of the 20th century, and how the role of the pianist has evolved to the present day. (2 quarter hours)
Status as a piano performance student who has passed the petition to major or permission from the instructor is a prerequisite for this class.

APM 362
PIANO LITERATURE II: ROMANTICISM
Undergraduate
The purpose of this course is to give piano majors an in-depth look at the role that the piano has played throughout history, not only as a solo instrument but also as a crucial element of any collaborative music making. (2 quarter hours)
Status as a piano performance student who has passed the petition to major or permission from the instructor is a prerequisite for this class.

APM 363
PIANO LITERATURE III: LATE 19TH - 21ST CENTURY
Undergraduate
The purpose of this course is to give piano majors an in-depth look at the role that the piano has played throughout history, not only as a solo instrument but also as a crucial element of any collaborative music making. (2 quarter hours)
Status as a piano performance student who has passed the petition to major or permission from the instructor is a prerequisite for this class.

APM 372
ORCHESTRAL REPERTOIRE FOR BRASS
Undergraduate
Study of standard orchestral repertoire for brass instruments. (2 quarter hours)
An undergraduate brass performance major and a completed petition to major is a prerequisite for this class.

APM 373
BRASS CONCEPTS
Undergraduate
A study of brass literature, performance, and pedagogy. An introduction to professional career responsibilities and opportunities. (2 quarter hours)
An undergraduate brass performance major and a completed petition to major is a prerequisite for this class.

APM 374
BRASS INSTRUMENT PERFORMANCE STYLE
Undergraduate
Survey of solo and orchestral performance styles through the principal composers of the 19th and 20th centuries. Analysis of new demands placed on performers in the 21st century. Study of stylistic concepts based on historical, technical, national, and aesthetic considerations. (2 quarter hours)
A petition to major is a prerequisite for this class.
APM 377
GUITAR HISTORY AND LITERATURE I
Undergraduate
Analytical and historical survey of the literature for plucked instruments from the sixteenth through the twentieth centuries. A year-long sequence of courses. (2 quarter hours)

Status as an Undergraduate Guitar Performance student who has passed the petition to major a prerequisite for this class.

APM 378
GUITAR HISTORY AND LITERATURE II
Undergraduate
Analytical and historical survey of the literature for plucked instruments from the sixteenth through the twentieth centuries. A year-long sequence of courses. (2 quarter hours)

Status as a Guitar Performance Major and APM 377 are prerequisites for this class.

APM 379
GUITAR HISTORY AND LITERATURE III
Undergraduate
Analytical and historical survey of the literature for plucked instruments from the sixteenth through the twentieth centuries. A year-long sequence of courses. (2 quarter hours)

Status as a Guitar Performance Major and APM 378 are prerequisites for this class.

APM 384
STRING PEDAGOGY I
Undergraduate
An introduction to the field of string teaching at the beginning through advanced levels, with an emphasis on traditional and Suzuki pedagogical approaches. A year-long sequence of courses. (2 quarter hours)

Status as a String Performance, Guitar Performance, or Music Education Major is a prerequisite for this class.

APM 385
STRING PEDAGOGY II
Undergraduate
An introduction to the field of string teaching at the beginning through advanced levels, with an emphasis on traditional and Suzuki pedagogical approaches. A year-long sequence of courses. (2 quarter hours)

Status as a String Performance, Guitar Performance, or Music Education Major and APM 384 is a prerequisite for this class.

APM 386
STRING PEDAGOGY III
Undergraduate
An introduction to the field of string teaching at the beginning through advanced levels, with an emphasis on traditional and Suzuki pedagogical approaches. A year-long sequence of courses. (2 quarter hours)

Status as a String Performance, Guitar or Music Education Major and APM 385 is a prerequisite for this class.

APM 387
STUDIO TEACHING AS A PROFESSION
Undergraduate
Strategies and techniques for the professional studio teacher. (2 quarter hours)

A petition to major is a prerequisite for this class.
APM 398
INDEPENDENT STUDY
Undergraduate
An in-depth study of an applied music topic under the supervision of a faculty member. (Departmental permission required). (variable credit)
Status as a Music student is a prerequisite for this class.

APM 400
OPERA WORKSHOP
Graduate
An advanced course in opera repertoire; scenes of operas will be presented for public performance. (2 quarter hours)
Status as a Graduate Music student is a prerequisite for this class.

APM 403
MUSICAL COACHING FOR SINGERS
Graduate
Students meet in a masterclass format for musical and diction coaching in their current repertoire. (2 quarter hours)
APV 100 or APV 400 is a corequisite for this class.

APM 405
GRADUATE RECITAL
Graduate
A full 60 minute, public recital performance of solo and/or chamber repertoire to be completed during the graduate residence. This recital is required as partial fulfillment of the degree of Master of Music in Performance and for the post-Masters Certificate in Performance. (0 quarter hours)
APB 410, APB 430, APB 465, APB 470, APB 475, APK 450, APK 460, APP 400, APS 427, APS 460, APS 480, APS 485, APS 490, APW 415, APW 420, APW 425, APW 435, APW 455, or APV 400 is a co-requisite for this class.

APM 406
HARPSICHORD PERFORMANCE PRACTICE
Graduate
A practical introduction for pianists to the harpsichord, harpsichord repertoire from the late Renaissance to early Classical eras, and relevant performance practice and stylistic considerations. (2 quarter hours)
Status as a Graduate Music student is a prerequisite for this class.

APM 408
BAROQUE PERFORMANCE PRACTICE-INSTRUMENTAL
Graduate
This course focuses on the interpretation and performance of music from the Baroque era, concentrating primarily on 18th century literature. Open to all instrumentalists, students will study Baroque performance practice based on the treatises and various writings of the time, as well as current scholarly research of early music specialists. (2 quarter hours)
Status as a Graduate Music student is a prerequisite for this class.

APM 409
MUSIC ENTERPRENEURSHIP
Graduate
Through opportunity creation, case study, discussion and peer evaluation, this course analyzes and simulates the professional performing arts marketplace, providing collaborative hands-on experience for performers and arts managers-in-training. In this course, performers will hone their musical point-of-view and create an original, self-produced performance opportunity in the DePaul community, with marketing materials and a business structure to support their project. Arts Management students will collaborate with performers on these projects, providing support to their colleagues in a way that models their future professional activities. Each student will also be responsible for analyzing a current successful model, identifying keys to success. This course is intended to bridge the transition from college to career, providing the artistic, career development and entrepreneurship training that have become essential in today's professional environment. (2 quarter hours)
Status as a Graduate Music student is a prerequisite for this class.
APM 411
WOODWIND PEDAGOGY
Graduate
This course is designed to provide students with an overview of the important aspects of woodwind pedagogy. Students will gain the necessary knowledge and skills to teach woodwind students of all ages and ability levels. (2 quarter hours)

Status as a Graduate Music student is a prerequisite for this class.

APM 414
THE BUSINESS OF MUSIC FROM THE PERFORMER’S PERSPECTIVE
Graduate
Explorations of the business aspects of the performing musician. Topics will include unions, networking, freelancing, audition preparation, taxes, and ethics. Seminar format. (2 quarter hours)

Status as a Graduate Music student is a prerequisite for this class.

APM 415
ITALIAN DICTION/LANGUAGE LAB
Graduate
This course is offered in conjunction with the first year of graduate vocal study, with an emphasis on the translation, pronunciation, grammatical understanding, and interpretation of Italian texts. (0 quarter hours)

Status as a Graduate Voice Performance student is a prerequisite for this class.

APM 416
GERMAN DICTION/LANGUAGE LAB FOR GRADUATE STUDENTS
Graduate
This course is offered in conjunction with the first year of graduate vocal study, with an emphasis on the translation, pronunciation, grammatical understanding, and interpretation of German texts. (0 quarter hours)

Status as a Graduate Voice Performance student is a prerequisite for this class.

APM 417
FRENCH DICTION/LANGUAGE LAB FOR GRADUATE STUDENTS
Graduate
This course is offered in conjunction with the first year of graduate vocal study, with an emphasis on the translation, pronunciation, grammatical understanding, and interpretation of French texts. (0 quarter hours)

Status as a Graduate Voice Performance student is a prerequisite for this class.

APM 428
ORCHESTRAL REPERTOIRE FOR WOODWINDS I: LITERATURE PERFORMANCE
Graduate
Detailed study of significant woodwind orchestral literature, with special emphasis on improving ensemble skills. Each week will feature new repertoire to be rehearsed and performed during the class. (2 quarter hours)

Status as a Woodwinds Performance student is a prerequisite for this class.

APM 429
ORCHESTRAL REPERTOIRE FOR STRINGS
Graduate
Study of standard orchestral repertoire for string instruments. (1 quarter hour)

Status as a Graduate String Performance student is a prerequisite for this class.
APM 432
ORCHESTRAL REPERTOIRE FOR STRING BASS
Graduate
Study of standard orchestral repertoire for string instruments. (1 quarter hour)

Status as a Graduate String Bass Performance student or Music Performance certificate student is a prerequisite for this class.

APM 433
WOODWIND ORCHESTRAL REPERTOIRE II: AUDITION PREPARATION
Graduate
An overview of orchestral woodwind audition repertoire with special emphasis on audition preparation and audition practice. Students will take several mock auditions over the course of the quarter to improve their understanding of the audition experience. (2 quarter hours)

Status as a Woodwinds Performance student is a prerequisite for this class.

APM 437
ALEXANDER TECHNIQUE
Graduate
Introduction to the Alexander Technique as applied to musical performance. (1 quarter hour)

Status as a Graduate Music student is a prerequisite for this class.

APM 441
ACCOMPANYING PRACTICUM
Graduate
A practical examination of different styles of instrumental repertoire, and the art of accompanying vocalists (Fall Quarter) and instrumentalists (Winter and Spring Quarters) in both studio and performance formats. (1 quarter hour)

Status as a Graduate Piano student or Music Performance certificate student is a prerequisite for this class.

APM 442
ACCOMPANYING CLASS
Graduate
An in-depth study of the development of the specific skills necessary to effectively accompany vocal (Fall Quarter) and instrumental repertoire (Winter and Spring Quarters). (2 quarter hours)

Status as a Graduate Piano student or Music Performance certificate student is a prerequisite for this class.

APM 446
PERCUSSION PEDAGOGY
Graduate
This course presents teaching techniques of all the major percussion instruments, for students of beginning through advanced levels of proficiency. The course includes an in-depth examination of pertinent published teaching materials, e.g. as method books and collections, as well as an exploration of techniques for motivating young students. (2 quarter hours)

Status as a Graduate Music student is a prerequisite for this class.

APM 447
ORCHESTRAL REPERTOIRE: PERCUSSION
Graduate
Study of standard orchestral repertoire. (1 quarter hour)

Status as a Graduate Percussion student is a prerequisite for this class.
APM 453
ADVANCED TECHNIQUES OF THE MUSIC STAGE
Graduate
Study, coaching, rehearsal, and performance of music and opera. (2 quarter hours)
Status as a Graduate Voice Performance student is a prerequisite for this class.

APM 460
TOPICS IN PERFORMANCE
Graduate
An in depth investigation of a topic in performance studies. (2 quarter hours)
Status as a Graduate Music student is a prerequisite for this class.

APM 461
PIANO LITERATURE
Graduate
An in-depth study of the long-established tradition of pianists and pianism, from Liszt and his disciples in the 19th century through Rachmaninoff, Horowitz and the great pianists of the 20th century, and how the role of the pianist has evolved to the present day. (2 quarter hours)
Status as a Graduate Piano student or Music Performance certificate student is a prerequisite for this class.

APM 471
BRASS CONCEPTS
Graduate
A study of brass literature, performance, and pedagogy. An introduction to professional career responsibilities and opportunities. (2 quarter hours)
Status as a Graduate Brass student is a prerequisite for this class.

APM 472
ORCHESTRAL REPERTOIRE FOR BRASS
Graduate
Study of standard orchestral repertoire for brass instruments. (1 quarter hour)
Status as a Graduate Brass student is a prerequisite for this class.

APM 474
BRASS INSTRUMENT PERFORMANCE STYLE
Graduate
Survey of solo and orchestral performance styles through the principal composers of the 19th and 20th centuries. Analysis of new demands placed on performers in the 21st century. Study of stylistic concepts based on historical, technical, national, and aesthetic considerations. (1 quarter hour)
Status as a Graduate Music student is a prerequisite for this class.

APM 477
GUITAR HISTORY AND LITERATURE I
Graduate
Analytical and historical survey of the literature for plucked instruments from the sixteenth through the twentieth centuries. A year-long sequence of courses. (2 quarter hours)
APM 478
GUITAR HISTORY AND LITERATURE II
Graduate
Guitar History and Literature II. Analytical and historical survey of the literature for plucked instruments from the sixteenth through the twentieth centuries. A year-long sequence of courses. (2 quarter hours)

APM 477 or permission of instructor is a prerequisite for this class.

APM 479
GUITAR HISTORY AND LITERATURE III
Graduate
Analytical and historical survey of the literature for plucked instruments from the sixteenth through the twentieth centuries. A year-long sequence of courses. (2 quarter hours)

APM 478 or permission of instructor is a prerequisite for this class.

APM 486
STRING PEDAGOGY
Graduate
A study of the concepts and philosophies of teaching string instruments for beginners through advanced levels. In addition, approaches to coaching chamber music will be reviewed. (2 quarter hours)

Status as a Graduate Music student is a prerequisite for this class.

APM 488
STUDIO TEACHING AS A PROFESSION
Graduate
Strategies and techniques for the professional studio teacher. (2 quarter hours)

Status as a Graduate Music student is a prerequisite for this class.

APM 496
VOICE PEDAGOGY
Graduate
An introduction to basic concepts of vocal pedagogy and the physiology of the singing voice. Through listening, evaluation, study, discussion, observation, and teaching, students will gain a better understanding of how to approach teaching beginning through advanced vocal students. (2 quarter hours)

Status as a Voice graduate student is a prerequisite for this class.

APM 498
INDEPENDENT STUDY
Graduate
An in-depth study of an applied music topic under the supervision of a faculty member. (variable credit)

Status as a Graduate Music student is a prerequisite for this class.

APP 100
PERCUSSION
Undergraduate
Advanced individual instruction in percussion performance at the undergraduate level. Undergraduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 48 credits of applied lessons over their entire course of study.

Status as an Undergraduate Music student is a prerequisite for this class.
APP 400
PERCUSSION
Graduate
Advanced individual instruction in percussion performance at the graduate level. Graduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 24 credits of applied lessons over their entire course of study.

Status as a Graduate Music student is a prerequisite for this class.

APS 127
GUITAR
Undergraduate
Advanced individual instruction in guitar performance at the undergraduate level. Undergraduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 48 credits of applied lessons over their entire course of study.

Status as an Undergraduate Music student is a prerequisite for this class.

APS 160
STRING BASS
Undergraduate
Advanced individual instruction in string bass performance at the undergraduate level. Undergraduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 48 credits of applied lessons over their entire course of study.

Status as an Undergraduate Music student is a prerequisite for this class.

APS 180
VIOLA
Undergraduate
Advanced individual instruction in viola performance at the undergraduate level. Undergraduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 48 credits of applied lessons over their entire course of study.

Status as an Undergraduate Music student is a prerequisite for this class.

APS 185
VIOLIN
Undergraduate
Advanced individual instruction in violin performance at the undergraduate level. Undergraduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 48 credits of applied lessons over their entire course of study.

Status as an Undergraduate Music student is a prerequisite for this class.

APS 190
VIOLONCELLO
Undergraduate
Advanced individual instruction in violoncello performance at the undergraduate level. Undergraduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 48 credits of applied lessons over their entire course of study.

Status as an Undergraduate Music student is a prerequisite for this class.

APS 427
GUITAR
Graduate
Advanced individual instruction in guitar performance at the graduate level. Graduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 24 credits of applied lessons over their entire course of study.

Status as a Graduate Music student is a prerequisite for this class.
APS 460
STRING BASS
Graduate
Advanced individual instruction in string bass performance at the graduate level. Graduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 24 credits of applied lessons over their entire course of study.

Status as a Graduate Music student is a prerequisite for this class.

APS 480
VIOLA
Graduate
Advanced individual instruction in viola performance at the graduate level. Graduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 24 credits of applied lessons over their entire course of study.

Status as a Graduate Music student is a prerequisite for this class.

APS 485
VIOLIN
Graduate
Advanced individual instruction in violin performance at the graduate level. Graduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 24 credits of applied lessons over their entire course of study.

Status as a Graduate Music student is a prerequisite for this class.

APS 490
VIOLONCELLO
Graduate
Advanced individual instruction in violoncello performance at the graduate level. Graduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 24 credits of applied lessons over their entire course of study.

Status as a Graduate Music student is a prerequisite for this class.

APV 100
VOICE-STUDIO
Undergraduate
Advanced individual instruction in voice performance at the undergraduate level. Undergraduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 48 credits of applied lessons over their entire course of study.

Status as an Undergraduate Music student is a prerequisite for this class.

APV 400
VOICE-STUDIO
Graduate
Advanced individual instruction in voice performance at the graduate level. Graduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 24 credits of applied lessons over their entire course of study.

Status as a Graduate Music student is a prerequisite for this class.

APW 115
BASSOON
Undergraduate
Advanced individual instruction in bassoon performance at the undergraduate level. Undergraduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 48 credits of applied lessons over their entire course of study.

Status as an Undergraduate Music student is a prerequisite for this class.
APW 120
CLARINET
Undergraduate
Advanced individual instruction in clarinet performance at the undergraduate level. Undergraduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 48 credits of applied lessons over their entire course of study.
Status as an Undergraduate Music student is a prerequisite for this class.

APW 125
FLUTE
Undergraduate
Advanced individual instruction in flute performance at the undergraduate level. Undergraduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 48 credits of applied lessons over their entire course of study.
Status as an Undergraduate Music student is a prerequisite for this class.

APW 135
OBOE
Undergraduate
Advanced individual instruction in oboe performance at the undergraduate level. Undergraduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 48 credits of applied lessons over their entire course of study.
Status as an Undergraduate Music student is a prerequisite for this class.

APW 155
SAXOPHONE
Undergraduate
Advanced individual instruction in saxophone performance at the undergraduate level. Undergraduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 48 credits of applied lessons over their entire course of study.
Status as an Undergraduate Music student is a prerequisite for this class.

APW 415
BASSOON
Graduate
Advanced individual instruction in bassoon performance at the graduate level. Graduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 24 credits of applied lessons over their entire course of study.
Status as a Graduate Music student is a prerequisite for this class.

APW 420
CLARINET
Graduate
Advanced individual instruction in clarinet performance at the graduate level. Graduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 24 credits of applied lessons over their entire course of study.
Status as a Graduate Music student is a prerequisite for this class.

APW 425
FLUTE
Graduate
Advanced individual instruction in flute performance at the graduate level. Graduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 24 credits of applied lessons over their entire course of study.
Status as a Graduate Music student is a prerequisite for this class.
APW 435
OBOE
Graduate
Advanced individual instruction in oboe performance at the graduate level. Graduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 24 credits of applied lessons over their entire course of study.
Status as a Graduate Music student is a prerequisite for this class.

APW 455
SAXOPHONE
Graduate
Advanced individual instruction in saxophone performance at the graduate level. Graduate music students are limited to 4 credits of applied lessons in any given quarter, and may not exceed a total of 24 credits of applied lessons over their entire course of study.
Status as a Graduate Music student is a prerequisite for this class.

ARB 101
BASIC ARABIC I
Undergraduate
Arabic 101 is the first in a series of Arabic courses taught at DePaul. Students will be taught the basic skills needed to communicate in Arabic including comprehension, speaking, reading, and writing. Basic grammar will be introduced to facilitate communication. Students will be exposed to authentic Arabic materials from different Arab countries according to the students' language skills and interests.

ARB 102
BASIC ARABIC II
Undergraduate
Arabic 102 is the second in a series of Arabic courses taught at DePaul. Students learn the basic skills needed to communicate in Arabic including comprehension, speaking, reading, and writing. Instruction will build on skills taught in Arabic 101. The main focus of the course will continue to be communicative skills, and grammar will be introduced to facilitate communication. The course will be taught mainly in Arabic using Modern Standard Arabic.

ARB 103
BASIC ARABIC III
Undergraduate
Arabic 103 is the third in a series of Arabic courses taught at DePaul. Students learn the basic skills needed to communicate in Arabic including comprehension, speaking, reading, and writing. Instruction will build on skills taught in Arabic 101 & 102. The main focus of the course will continue to be communicative skills, and grammar will be introduced to facilitate communication. The course will be taught mainly in Arabic using Modern Standard Arabic.

ARB 104
INTERMEDIATE ARABIC I
Undergraduate
Intermediate Arabic I is the first course of three intermediate Arabic courses that focus on taking students to the advanced level of proficiency by expanding their knowledge of Arab culture, building their vocabulary, and developing their grammar skills. Intermediate Arabic will focus on broadening students' knowledge of the Arabic language beyond the daily life topics. Students will be introduced to examples of authentic materials of Arabic Literature that include topics of general and professional interests, in order to increase students' comprehension skills and prepare them to understand the literary and cultural context of the Arabic language. In addition, this course will emphasize two main points: (1) how mastering grammar concepts is crucial for understanding Arabic texts as well as for communicating clearly in speech and writing; and (2) how the derivation system is key for developing vocabulary. ARB 103 or equivalent, including placement test or permission of instructor, is recommended.
ARB 105
INTERMEDIATE ARABIC II
Undergraduate
Intermediate Arabic II is the second course of three intermediate Arabic courses that focus on taking students to the advanced level of proficiency by expanding their knowledge of Arab culture, building their vocabulary, and developing their grammar skills. Intermediate Arabic will focus on broadening students' knowledge of the Arabic language beyond the daily life topics. Students will be introduced to examples of authentic materials of Arabic Literature that include topics of general and professional interests, in order to increase students' comprehension skills and prepare them to understand the literary and cultural context of the Arabic language. In addition, this course will emphasize two main points: (1) how mastering grammar concepts is crucial for understanding Arabic texts as well as for communicating clearly in speech and writing; and (2) how the derivation system is key for developing vocabulary. ARB 104 or equivalent, including placement test or permission of instructor, is recommended.

ARB 106
INTERMEDIATE ARABIC III
Undergraduate
Intermediate Arabic III is the third course of three intermediate Arabic courses. The course will focus on using the skills the students developed to effectively communicate in Modern Standard Arabic orally and in writing. Students will be introduced to authentic Arabic text and audio material from different Arab countries. Instruction will be provided mainly in Arabic using Modern Standard Arabic. Students are expected to speak and respond to questions in Arabic. This is an effective approach to language learning that emphasizes communicative abilities and helps to successfully transition students into upper level Arabic courses. ARB 105 or equivalent, including placement test or permission of instructor, is recommended.

ARB 130
MOLILSAP STUDY ABROAD
Undergraduate
This course is specially designed to complement the Modern Language Introductory Languages Study Abroad programs, linked to the third quarter of the first year language program. The course will be taught abroad.

ARB 197
SPECIAL TOPICS IN ARABIC
Undergraduate
See schedule for current offerings.

ARB 198
STUDY ABROAD
Undergraduate
Variable credit.

ARB 199
INDEPENDENT STUDY
Undergraduate
Variable credit.

ARB 201
ADVANCED ARABIC I
Undergraduate
Advanced reading and comprehension, with emphasis on recognizing and understanding the perspectives and patterns of Arabic culture. ARB 106 or equivalent, including placement test or permission of instructor, is recommended.

ARB 202
ADVANCED ARABIC II
Undergraduate
Advanced practice in writing and composition, with emphasis on grammatical accuracy, text development skills, and vocabulary expansion. ARB 106 or equivalent, including placement test or permission of instructor, is recommended.
ARB 203  
ADVANCED ARABIC III  
Undergraduate  
Advanced practice of oral skills in both formal and informal usage, with emphasis on correct pronunciation, sentence structure, appropriate vocabulary, and cultural context. ARB 106 or equivalent, including placement test or permission of instructor, is recommended.

ARB 297  
SPECIAL TOPICS IN ARABIC  
Undergraduate  
See schedule for current offerings.

ARB 298  
STUDY ABROAD  
Undergraduate  
Variable credit.

ARB 299  
INDEPENDENT STUDY  
Undergraduate  
Variable credit.

ARB 300  
ARABIC GRAMMAR  
Undergraduate  
A comprehensive review of Arabic grammar with focus on its application to the development of communicative competence. ARB 106 or equivalent, including placement test or permission of instructor, is recommended.

ARB 301  
ARAB BROADCAST MEDIA  
Undergraduate  
This course improves students' competence in listening, reading comprehension, writing, and presentation skills in the content of Arab media. The main language of instruction will be Modern Standard Arabic (MSA), the language of Arab news. Both instructor and students will be using MSA as the main language for communication. Classroom instruction will assist students in acquiring and using Arabic vocabulary needed for understanding and analyzing authentic Arabic media material. The course will focus on five main topics: (1) Meetings and Conferences, (2) Demonstrations, (3) Elections, (4) Courts and Trials, and (5) Finance and Business. In addition to topics and vocabulary covered in the required textbooks, students will listen to and discuss authentic news items. They will also be exposed to Egyptian dialect. ARB 106 or equivalent, including placement test or permission of instructor, is recommended.

ARB 302  
ARABIC PRINT MEDIA  
Undergraduate  
This course consists of intensive exposure to vocabulary and expressions characteristic of language used in Arab media. The course will rely on newspaper articles and authentic material in addition to the Media Arabic textbook. The focus of the course will be on enforcing vocabulary learned in ARB 301 that will assist students in understanding the content of Arab print Media and translating texts into English. Presentations and discussions will be used to enforce meaning and increase vocabulary retention and proper use. ARB 106 or equivalent, including placement test or permission of instructor, is recommended.

ARB 311  
ARABIC SHORT STORIES  
Undergraduate  
A survey of the history and development of short stories in Arabic literature from various Arab countries with focus on language, content analysis, forms, and cultural content relevant to major elements of Arab culture. ARB 106 or the equivalent, including placement test or permission of instructor, is recommended.
ARB 313
ARABIC FILM
Undergraduate
Survey of the development of Arabic films in the Arab world with examination of sample works from various periods that allow reflection on Arab culture and the social, political, and religious issues that define that culture. ARB 106 or the equivalent, including placement test or permission of instructor, is recommended.

ARB 320
BUSINESS ARABIC
Undergraduate
Content-based instruction with focus on business vocabulary, syntax, and basic linguistic skills necessary for functioning in an Arab business context. ARB 106 or the equivalent, including placement test or permission of instructor, is recommended.

ARB 330
ARABIC TRANSLATION
Undergraduate
Focuses on the thorough introduction to translation (including theory) and the latest technologies available to translators: web-based dictionaries, thesauruses, etc. Introduces students to various translation techniques and emphasizes the need for technical knowledge as required by specific fields. ARB 106 or the equivalent, including placement test or permission of instructor, is recommended.

ARB 350
ARABIC LITERATURE
Undergraduate
This course introduces the students to Modern Arabic Literature in form, language, and content. It will focus on various genres, including poetry, drama, the novel, and short stories. Works by major Arab writers and poets representing various regions and content will be examined and analyzed to develop an appreciation for Arab literature and a deeper understanding of their portrayal of Arab culture. ARB 106 or the equivalent, including placement test or permission of instructor, is recommended.

ARB 392
INTERNSHIP
Undergraduate
Variable credit. Includes readings, weekly reflections, and a final report.

ARB 395
FOREIGN LANGUAGES ACROSS THE CURRICULUM
Undergraduate
The two credit FLAC course allows students to enrich their experience in the co-required course through added reading, writing, listening and speaking activities in Arabic. Students must have the equivalent of 106 or higher ability in Arabic to take this two credit component. Please contact the Department of Modern Languages if you have questions about this courses or about language placement.

ARB 397
SPECIAL TOPICS IN ARABIC
Undergraduate
See schedule for current offerings.

ARB 398
STUDY ABROAD
Undergraduate
Variable credit.

ARB 399
INDEPENDENT STUDY
Undergraduate
Variable credit.
ARB 400
ARABIC GRAMMAR
Graduate
A comprehensive review of Arabic grammar with focus on its application to the development of communicative competence. Cross-listed with ARB 300.

ARB 401
ARAB BROADCAST MEDIA
Graduate
This course improves students' competence in listening, reading comprehension, writing, and presentation skills in the content of Arab media. The main language of instruction will be Modern Standard Arabic (MSA), the language of Arab news. Both instructor and students will be using MSA as the main language for communication. Classroom instruction will assist students in acquiring and using Arabic vocabulary needed for understanding and analyzing authentic Arabic media material. The course will focus on five main topics: (1) Meetings and Conferences, (2) Demonstrations, (3) Elections, (4) Courts and Trials, and (5) Finance and Business. In addition to topics and vocabulary covered in the required textbooks, students will listen to and discuss authentic news items. They will also be exposed to Egyptian dialect.

ARB 402
ARABIC PRINT MEDIA
Graduate
This course consists of intensive exposure to vocabulary and expressions characteristic of language used in Arab media. The course will rely on newspaper articles and authentic material in addition to the Media Arabic textbook. The focus of the course will be on enforcing vocabulary learned in ARB 301 that will assist students in understanding the content of Arab print Media and translating text into English. Presentations and discussions will be used to enforce meaning and increase vocabulary retention and proper use.

ARB 411
ARABIC SHORT STORIES
Graduate
A survey of the history and development of short stories in Arabic literature from various Arab countries with focus on language, content analysis, forms, and cultural content relevant to major elements of Arab culture. Cross-listed with ARB 311.

ARB 413
ARABIC FILM
Graduate
Survey of the development of Arabic films in the Arab world with examination of sample works from various periods that allow reflection on Arab culture and the social, political, and religious issues that define that culture. Cross-listed with ARB 313.

ARB 420
BUSINESS ARABIC
Graduate
Content-based instruction with focus on business vocabulary, syntax, and basic linguistic skills necessary for functioning in an Arab business context. Cross-listed with ARB 320.

ARB 430
ARABIC TRANSLATION
Graduate
Focuses on the thorough introduction to translation (including theory) and the latest technologies available to translators: web-based dictionaries, thesauruses, etc. Introduces students to various translation techniques and emphasizes the need for technical knowledge as required by specific fields. Cross-listed with ARB 330.

ARB 450
ARABIC LITERATURE
Graduate
This course introduces the students to Modern Arabic Literature in form, language, and content. It will focus on various genres including poetry, drama, the novel, and short stories. Work by major Arab writers and poets representing various regions and content will be examined and analyzed to develop an appreciation for Arab literature and a deeper understanding of their portrayal of Arab culture.
ARB 496
PRACTICUM IN ARABIC INSTRUCTION
Graduate
Supervised practice in language instruction, paired with a mentor instructor in a beginning or intermediate language course. Students observe a class, teach a lesson or lessons, assist in assessment and lesson planning, and complete individualized assignments to develop their skills as classroom language instructors. Repeatable.

ARB 497
SPECIAL TOPICS IN ARABIC
Graduate
See schedule for current offerings.

ARB 498
STUDY ABROAD
Graduate
Variable credit.

ARB 499
INDEPENDENT STUDY
Graduate
Variable credit.

ART 101
DIGITAL TOOLS FOR VISUAL THINKERS
Undergraduate
As digital media become a requisite aspect of the artist and designer's professional preparation, this foundation level course focuses on building basic skills in the most common digital imaging tools. The course will cover two applications, one pixel-based imaging (Photoshop), and one vector-based imaging (Illustrator). It is designed to give students an introduction to how these applications can be used as ideational tools for exploring visual problems, possibilities and solutions, how they can be used to create digital images for output and how they can be integrated with traditional analog media and tools.

ART 104
CREATING ART
Undergraduate
A studio course that uses visual problems and critical discussions to develop creative and perceptual abilities; relates these abilities to the principles of art in cultural and historic contexts (non-art majors).

ART 105
TWO-DIMENSIONAL FOUNDATIONS
Undergraduate
Development of perceptual ability through the analysis of two dimensional concepts of line, shape, value, texture, color, space and organization.

ART 106
BEGINNING DRAWING
Undergraduate
Introduction to composition, line and rendering in black and white drawing media. Basic techniques for descriptive and expressive use of drawing media.

ART 107
THEATRE DRAWING I
Undergraduate
The first in a three quarter sequence of general drawing courses exclusively for students enrolled in the Theater School.
ART 108
THEATRE DRAWING II
Undergraduate
ART 107 and a student in the Theatre School or consent of instructor is a prerequisite for this course.

ART 109
THEATRE DRAWING III
Undergraduate
ART 110
BEGINNING PAINTING
Undergraduate
An introduction to basic organizational and technical concepts in painting. The preparation and proper use of materials is also stressed.

ART 107 or consent of instructor is a prerequisite for this class.

ART 113
THREE DIMENSIONAL FOUNDATIONS
Undergraduate
Development of perceptual ability through the analysis of three-dimensional concepts of line, shape, material, light, movement, and organization.

ART 114
FOUR DIMENSIONAL FOUNDATIONS
Undergraduate
This course will introduce students to the fundamentals of three major time-based art forms: performance art, video art and interactive art. Each of these unique art forms incorporates the presence and manipulation of time as an essential element. Students will produce one finalized studio assignment for each of the three art forms covered, and learn the basic production techniques, project planning, and theories integral to time-based media. Each assignment will incorporate lectures, reading, writing, critique and discussion to promote the understanding of the process, form, history and content that are specific to these particular art forms.

ART 115
BEGINNING SCULPTURE
Undergraduate
An introduction to traditional and contemporary approaches to sculpture with an emphasis on clay modeling, plaster casting and carving. Studio core course.

ART 118
THINKING PHOTOGRAPHY
Undergraduate
This is a required course for Media Arts majors taking a critical and historical look at "the arts of mechanical reproduction" and lens-based image making. As a lecture class, it may include some very basic shooting exercises assigned that could easily be carried out by "snapshot" or disposable cameras - either film or digital.

ART 200
ART & ARTISTS IN CONTEMPORARY CULTURE
Undergraduate
This course will use a mixed lecture/discussion format and thematic approach to consider works on art and design produced in the last 30 years as a means of contextualizing recent works of art. The primary approach to this material will be from the perspective of the artmaker (artist or designer), for whom art theory, criticism and history are crucial tools for developing effective and meaningful work. For that reason, this class will be taught by studio faculty. The class will make extensive use of the city's contemporary museums, galleries, exhibitions and works of public art to emphasize the social, economic and political context from which works of art and design emerge as indicators or signposts of contemporary cultural concerns. Students cannot receive credit for both ART 200 and ART 222.

ART 204
VISUAL COMMUNICATION
Undergraduate
A studio course applying visual principles of communication to written presentations using the most common PC graphics programs, mainly Photoshop and Illustrator.
ART 205
COLOR THEORY AND APPLICATION
Undergraduate
Explorations into the use of color in both paint and computer applications.

ART 105 or ANI 105 or GD 105 or permission of instructor is a prerequisite for this class.

ART 206
INTERMEDIATE DRAWING
Undergraduate
Continued development and exploration into the rendering of space with an introduction to a wider range of drawing media and contemporary art applications in drawing.

ART 106 or consent of instructor is a prerequisite for this class.

ART 209
DRAWING SPECIAL TOPICS
Undergraduate
This course focuses on specialties and techniques in drawing not encompassed by the general art curriculum.

ART 206 or ART 218 or permission of instructor is a prerequisite for this class.

ART 210
INTERMEDIATE PAINTING I
Undergraduate
A development of skills and concepts beyond the basic level. Problems that stress advanced concepts of theme, color and spatial design are studied.

ART 105 and 110 or consent of instructor are a prerequisite for this class.

ART 211
INTERMEDIATE PAINTING II
Undergraduate
Intermediate Painting II.

ART 105, ART 106 and ART 110 or consent of instructor is a prerequisite for this class.

ART 212
WATERCOLOR PAINTING
Undergraduate
The investigation of aqueous medium in thin transparent washes, using a variety of subjects. Spontaneity of medium is stressed in order to capture the nuance of color and light.

ART 105 or ART 106 or instructor permission is a prerequisite for this course.

ART 213
SPACE DESIGN
Undergraduate
Application of three-dimensional principles to basic issues of space and object design. Introduction to professional presentation techniques.

ART 113 and ART 115 or consent of instructor is a prerequisite for this class.

ART 214
CERAMIC SCULPTURE
Undergraduate
An exploration of ceramic techniques for constructing and firing expressive sculptural forms.

ART 113 or consent of instructor is a prerequisite for this class.
ART 215  
INTERMEDIATE SCULPTURE  
Undergraduate
Introduction to basic wood and metal working techniques for producing constructed sculpture. Focuses on modern and contemporary issues in sculpture.

ART 115 or consent of instructor is a prerequisite for this class.

ART 217  
ADVANCED THREE-DIMENSIONAL DESIGN  
Undergraduate
Advanced investigation of three dimensional design concepts. Course is a sequel to ART 213.

ART 113, ART 115 and ART 213 or consent of instructor is a prerequisite for this class.

ART 218  
FIGURE DRAWING  
Undergraduate
A study of the human figure through an exploration of anatomy combined with various drawing processes.

ART 106 or consent of instructor is a prerequisite for this class.

ART 219  
BEGINNING FIGURE SCULPTURE  
Undergraduate
This course provides opportunities for learning how to represent the dynamic human figure in three dimensions and welcomes students with no experience in figure studies as a first introduction to the figure. All class work will be done from a nude model. Home assignments will consist of figure drawings either from departmental Open Studio Figure Drawing sessions or from assigned figure drawings of great masters. Students will be taught basic technical and eye/hand coordination skills necessary to depict the human figure three dimensionally as well as basic understanding of the proportions of the human figure and ability to implement them. This course will also introduce to students the concept of the human figure as a dynamic three dimensional entity. Students will have an opportunity to work from a nude model for nine weeks, examining human anatomy, body proportions and different gesture poses.

ART 106 or ART 115 or instructor permission is a prerequisite for this course.

ART 223  
LIGHT, COLOR, AND PHOTOGRAPHY  
Undergraduate
Principles of image making with lenses, mirrors and photographic processes. Discusses the physical properties of light and color including those used in laser and holography.

LSP 120 or HON 180 or (MAT 130 or above) or consent of instructor is a prerequisite for this course.

ART 224  
BEGINNING DIGITAL PHOTOGRAPHY  
Undergraduate
This course introduces students to the digital camera (DSLR) and editing platforms as tools for creative and expressive use of the photographic medium. Proper use of camera functions and file management will be learned in tandem with editing strategies using adobe software. Lighting strategies and inkjet printing will be introduced in a fully equipped Mac lab. This course emphasizes the concepts, theory, and history of the photographic medium within the context of contemporary art. Students will produce their own photographs by digital means and engage in discussion and critical analysis of images and image aesthetics. Suggested prior course: Art 101: Digital Tools for Visual Thinkers.
ART 225
BEGINNING PHOTOGRAPHY
Undergraduate
This course is an introduction to the aesthetics, processes, and theory of black & white film photography. Techniques of chemical-based film development, darkroom printing, and image editing will be introduced. Strategies of exposure, framing and lighting will be explored as means for developing a meaningful photographic language. Emphasis will be given to understanding and using the camera as a tool for personal inquiry and experimentation. Additionally, this course will focus on the role and impact of the photographic image in both historical and contemporary contexts. Suggested prior course: Art 105: 2D Foundations.

ART 226
VIDEO ART
Undergraduate
An introductory level course designed to familiarize students with the uses of video in a variety of artistic practices. These encompass non-narrative treatments in a multiple forms including single and multi-use of monitors and projection, installation, and performance. Students will learn to use PremiereCS6, an industry-standard video editing program, in this class. The department provides video and audio equipment.

ART 227
DIGITAL ART
Undergraduate
Students will develop dexterity and finesse for digital imaging within the context of contemporary art. The primary focus will be on analytic problem solving and developing students' abilities to create complex images, illustrations and icons that effectively convey content and create context. Coursework will utilize Adobe Photshop and Adobe Illustrator to support and enhance a student's artistic vision; this course encourages a variety of artistic production.

ART 101 or consent of instructor is a prerequisite for this class.

ART 228
COMPUTER APPLICATIONS FOR DESIGN II
Undergraduate
This course will introduce students to professional layout techniques including page templates, formatting and preparing files per industry-specific guidelines for spot and process color offset printing. Students will design complex, multi-page documents utilizing intermediary layout, typographic and illustration skills. A broad range of conceptual layout principles and additional procedural preparations and "pre-flighting" expectations will be examined. Adobe InDesign will be the layout software utilized. ART 260 is highly recommended.

ART 101, ART 105, ART 227, and ART 264 or consent of instructor is a prerequisite for this class.

ART 229
BEGINNING PRINTMAKING
Undergraduate
Training in the artistic possibilities of a variety of techniques, including wood-cut, intaglio and mono-print, used in the production of limited edition prints.

ART 105 and ART 106 or consent of instructor is a prerequisite for this class.

ART 230
ISSUES IN ENVIRONMENTAL DESIGN
Undergraduate
Issues in Environmental Design is an introductory course that will examine concepts, theories and practices across multiple scales of design, including graphic, product, architecture, landscape architecture and urban design. We will explore the history and practice of eco-design as well as sustainable design in modern cultures. The environmental impact of design will be examined in relation to everyday products, as well as the consumer culture that feeds their mass production. Examples of excellence will be explored through the examination of case studies; local demonstrations will illustrate the theme of restorative design; and artists' projects that address environmental issues will also be studied. The underlying theme is the connection between culture and nature, and how we must reduce our negative impact on systems that support all life while building positive systems that support all life.

ART 231
SCREEN PRINTING
Undergraduate
A beginning level course designed to teach students the essential equipment, materials, and processes, for screen printing artworks. Printing methods utilize hand-cut stencils, screen filler, and photo-emulsion techniques. ART 101 or ART 105 recommended.
ART 245  
PAINTING: MIXOLOGY  
Undergraduate  

This is an intermediate course utilizing varied 2D media and processes including digital imaging. This will allow students to explore contemporary means and sensibilities through media that reflect a broader range of visual, material and conceptual interests. This will give students a larger repertoire to choose from when making images. Building on the knowledge of oil painting materials and techniques that students gain in the ART 110 Beginning Painting course, ART 245 will also utilize water-based painting materials such as watercolor, gouache, acrylic polymers and gel media. Students will explore techniques such as collage, frottage, stamping, stenciling, relief printing, found image transfer and digital print output in combination with painting and drawing media.

ART 105, ART 106 and ART 110 or consent of instructor is a prerequisite for this class.

ART 260  
INTERMEDIA STUDIO  
Undergraduate  

This course introduces the practices of Intermedia in a social and historical context. Students will learn to articulate concepts through the production of artworks that span a variety of media. The goals are to explore formal structures and research methods with emphasis on the role of analysis, historical and conceptual thinking as essential skills of a multi-media or Intermedia artist. The course includes basic time-based software instruction.

(ART 101 and ART 105) or ANI 105 or consent of instructor is a prerequisite for this class.

ART 264  
TEXT IN THE VISUAL ARTS  
Undergraduate  

Students are introduced to the fundamentals of text including layout, hierarchy and the basic characteristics of letter-forms and type families; in addition to conceptually driven experimentation with typographic form in relation to the fine and media arts, including painting, drawing, photography (digital and analog), photomontage as well as video and time-based arts. Projects employ both handwork and computer technology and address the two-dimensional surface as well as type in three-dimensional space and time-based art.

(ART 101 and ART 105) or ANI 105 or consent of instructor is a prerequisite for this class.

ART 289  
EXPERIMENTAL VIDEO ART  
Undergraduate  

This course is designed to investigate avant-garde film and video theory, and studio practices. Class will be devoted to the viewing and study of film and video work from Europe, Asia, and the US. Students will learn to use PremiereCS6, an industry-standard video editing program, in this class. The department provides video and audio equipment.

ART 290  
STUDIO WORKSHOP  
Undergraduate  

Off campus training in specific studio processes by noted Chicago artists in ceramics or wood working. May be repeated up to 8 hours credit.

ART 291  
MURAL PAINTING  
Undergraduate  

This class has a central focus on the art of mural making. Students will have hands on experience as they design and execute a mural at a predetermined site. The mural will be executed as a small scale illustration board piece in the classroom during the last part of the quarter and installed at a real venue. The students will also learn the strategy and design factors of planning a mural piece of their own. The class functions as a studio class as it meets for 6 hours weekly. A minimum of 25 service hours is required. Drawing or painting experience at the collegiate level is highly recommended for this class. This class is certified for cbSL and JYEL credit.
ART 292
COMMUNITY VIDEO PRODUCTION
Undergraduate
The heavy emphasis on experiential learning of this course will combine classroom instruction on documentary video production with student fieldwork. Over the course of the term, students will plan, produce and substantially complete a videotape project for a community client. Through the production of a video project specifically designed for a community organization, students will be able to practice production techniques that they learn in the classroom while gaining insight about how video can bring attention to community needs and thus make an impact on communities (outside the classroom). Our goal for this course is to bring students to the point of understanding and mastering the technical elements of video production and understanding these processes within an experiential and service learning context, such that through working on documentary projects, students will come to a point of understanding the history and contemporary needs of a particular community group and how the creation of a finished video can address some of those needs. Students will work to produce projects that are thoughtful, important and technically polished. This class is certified for cbSL and JYEL credit.

ART 293
CHINA IN TRANSITION: SOCIAL PERSPECTIVES IN FILM & PHOTOGRAPHY IN CONTEMPORARY CHINA
Undergraduate
The course content will engage a wide range of issues such as the tension and history of the women's rights movement, the reconstruction of values in gender and sexuality, and the ever-changing urban infrastructures in the economically driven culture. Film and photography are the rising new media for documenting and responding to social issues by scholars, filmmakers and artists expressing the Chinese experience. The methodology of this class will deconstruct and decode three common cultural stereotypes: American representations of China, Chinese official representations of itself, and universal representations of one's experiences as a traveler. Through dialogue and cross-reading materials, we compare films, photography, sites/field trips, interviews and journalistic materials to search for the reality and social issues beneath the visual representation. This course emphasizes the aesthetic, the theory and the hands-on experience of using video and photography during the trip (including a brief lecture on composition, framing and digital photography and/or possible video shooting techniques). We will share finished assignments in group critiques and reading discussions - in both cases, they will be the primary means of evaluation in class. In a critique, students will present their work for response and analysis in relation to the given assignment through a class discussion. This dialogue is intended to be evaluative, to provide constructive criticism and to develop critical thinking skills.

ART 294
GENIUS LOCI: ROMAN ARCHETYPES OF PLACE IN VISUAL CULTURE
Undergraduate
This is a semester long study trip to Rome that offers a thematic studio/art history experience concerned with the role that Rome has played in shaping our understanding of place as expressed in visual culture. This course will include such topics as: the influence of Roman approaches to urban organization and development; the influence of national academies in Rome on Western developments in art and architecture, Piranesi and the articulation of utopic and dystopic models derived from Roman culture; the spatial collage of Roman architectural enveloping and fragmentation; illusion and perspective as perceptual puzzle and ideological signifier; and Pasquino and the expression of vox populi in public space. The unique circumstance of urban Rome, where 2500 years of building activity are embedded in the fabric of contemporary life, offers an opportunity to involve students in an interdisciplinary examination of how human needs and desires shape our built environment and are shaped by it.

ART 302
TOPICS IN THE HISTORY OF CINEMA
Undergraduate
Courses on the history of cinema that explore the form, content and historical significance of the media. Taught in the College of Communication with cross-list in Art.

ART 304
THE PHOTOGRAPHIC BOOK
Undergraduate
Since the inception of the photographic process in the early 19th century, one of the primary ways photographers have disseminated their work is through the book form. In this course we will consider the history, examples and practice of the photobook. Students will be expected to photograph a major subject over the course of the term, edit and sequence your photographs and layout and produce a finished, bound photobook through blurb.com, the online publisher. In addition to the history of the photobook, processes of organization and editing will be explored through basic shooting and sequencing exercises. Both film and digital cameras may be used for the course.

ART 224 or ART 225 or permission of instructor is a prerequisite for this class.
ART 306
ADVANCED DRAWING
Undergraduate
An advanced course in historical and contemporary approaches to issues and techniques of drawing.

ART 206 or ART 218 or instructor consent is a prerequisite for this class.

ART 309
DIGITAL SCULPTURE
Undergraduate
The methods and materials of desktop 3D printing technology will be integrated with traditional and contemporary sculpture, such as woodworking, casting, assemblage, and installation. This “hybrid” approach will provide students the opportunity to develop and explore new tools and skills, while maintaining a focus on the development of meaningful content in their artwork.

ART 113 or ART 115 or consent of instructor is a prerequisite for this class.

ART 310
ADVANCED PAINTING I
Undergraduate
Development of advanced skills in painting with work in a more independent approach to concepts and techniques.

ART 105, ART 106, ART 110 and ART 210 or consent of instructor is a prerequisite for this class.

ART 311
ADVANCED PAINTING II
Undergraduate
Advanced Painting II.

ART 105, ART 106, ART 110, ART 210 and ART 310 or consent of instructor is a prerequisite for this class.

ART 312
FIGURE PAINTING
Undergraduate
An introduction to the study of the painted figure in environmental settings. Light, color and spatial illusion are stressed.

ART 105 and ART 106 or consent of instructor is a prerequisite for this class.

ART 313
PERFORMANCE/INSTALLATION ART
Undergraduate
In this upper level course students will utilize their previously acquired skills and background from their respective areas of specialty (painting, drawing, sculpture, photo, video, sound, web and computer application etc) in a new conceptual and spatial context by creating specific environments (installation) and using their bodies in those environments (performance). These hybrid art projects will be presented in a real space and live performance format. Additionally using video and photo documentation as sources, students will create another project in digital format. Students will have the option to concentrate on only one aspect of the course; either installation or performance using either digital or non digital (or combined) formats for their projects.

One 200-level studio course or instructor permission is a prerequisite for this course.

ART 315
ADVANCED SCULPTURE
Undergraduate
Exploration of advanced sculptural themes and techniques determined by the student in consultation with the instructor.

ART 106, ART 115 and ART 215 or consent of instructor is a prerequisite for this class.
ART 316  
ADVANCED SCULPTURE II  
Undergraduate  
Sequel course to ART 315 to allow the completion of extensive projects.

ART 106, ART 113, ART 115, ART 215 and ART 315 or consent of instructor is a prerequisite for this class.

ART 317  
ADVANCED FIGURE SCULPTURE  
Undergraduate  
This course will provide an expansion and enrichment of skills in modeling the human figure for students with a basic background in the figure. All class work will be done from a nude model. Home assignments will consist of figure drawings either from departmental Open Studio Figure Drawing sessions or from assigned figure drawings of great masters. Students in this course will further develop their technical and eye/hand coordination skills necessary to depict the human figure three dimensionally in a more professional manner as well as full understanding of the proportions of the human figure and the ability to implement them freely in a dynamic human figure. Course will also point towards the potential possibility of the exploration, conceptualization and interpretation of the human figure within the contemporary art context or other applications related to the students' interests.

ART 215 or ART 218 or ART 219 or instructor permission is a prerequisite for this course.

ART 318  
ADVANCED FIGURE DRAWING  
Undergraduate  
Encourages the application of perceptual and media skills gained in figure drawing to more advanced and personal works on paper.

ART 106 and ART 218 or consent of instructor is a prerequisite for this class.

ART 321  
INTERMEDIATE DIGITAL PHOTOGRAPHY  
Undergraduate  
This course builds on Art 224, further emphasizing the aesthetic and conceptual possibilities of digital photography. Through project-based experimentation, students deepen their critical engagement with photographic tools while producing conceptually driven bodies of work. Refined use of the DSLR camera and editing tools takes place through hands-on image production and process-oriented critique. Additionally, this course explores historically established uses of the photographic medium and their relation in the digital context.

ART 224 or instructor permission is a prerequisite for this course.

ART 323  
INTERMEDIATE PHOTOGRAPHY  
Undergraduate  
This course continues the aesthetic development and processes of film-based, black & white photography through a refinement of techniques and conceptual practices. Large and medium-format cameras are introduced along with fiber-based printing, additional lighting and exposure strategies, and darkroom print finishing techniques. Emphasis is on developing and enhancing critical approaches to subject matter through project-based, hands-on experimentation and critical discussion.

ART 225 or consent of instructor is a prerequisite for this class.

ART 324  
INTERMEDIATE PRINTMAKING I  
Undergraduate  
An advanced course designed for students who have had previous technical experience with the various printmaking media. The goal of this course is to enable students to investigate personal concerns and objectives through an ambitious and concentrated body of work. An emphasis is placed on the development of personal imagery and aesthetic goals.

ART 229 or instructor permission is a prerequisite for this course.
ART 325
ADVANCED PHOTOGRAPHY PROJECTS
Undergraduate
Advanced Photography Projects is a course emphasizing individual artistic practice through project-driven approaches to photography. Students will generate conceptually challenging and visually refined photographs using analog and/or digital means. Coursework incorporates student presentations of their artwork, critical discussion and analysis, and the creation of a refined, edited and complete body of work or portfolio. Additional forms such as the photographic book, large-scale printing, and hybrid film/digital approaches may be explored.

Two photography courses, at least one of which at the 300 level or instructor permission are prerequisites for this course.

ART 326
SPECIAL TOPICS IN EXPERIMENTAL VIDEO ART
Undergraduate
Advanced explorations of video as a form of artistic expression. Each course will have a unique focus, such as installation art, video and performance, experimental narrative or experimental documentary. This course may be repeated for credit assuming a change in topic. HD Digital cameras will be provided by the art department. Hands-on skills will be developed and projects will be edited in Final Cut Express.

ART 226 or instructor permission is a prerequisite for this course.

ART 327
ADVANCED COMPUTER GRAPHICS
Undergraduate
Builds on skills learned in ART 227. Explores specific areas of graphics and design; exposes students to advanced software including Director 5, Painter 4, Illustrator 6.0, Morph 2.5, and Claris Home Page.

ART 227 is a prerequisite for this class.

ART 328
DOCUMENTARY PHOTOGRAPHY
Undergraduate
Exploration of photographic concepts and techniques used in artistic, journalistic and sociological documentation.

ART 225 or consent of instructor is a prerequisite for this class.

ART 329
ADVANCED DIGITAL PHOTOGRAPHY
Undergraduate
Advanced Digital Photography focuses on artistic practice through inventive use of the photographic medium and refined engagement with digital tools. Students will focus on self-directed, in depth projects culminating in a high quality portfolio. Additionally, students will be engaging in large-scale inkjet printing and advanced digital workflow. This course also encourages experimentation with unconventional approaches to the photographic object. Students in this course should be prepared to work with their chosen topic independently, create thesis projects for presentations, and participate in group discussions and critiques.

ART 224 and ART 321 or instructor consent are prerequisites for this class.

ART 330
INTERMEDIATE PRINTMAKING II
Undergraduate
An introduction to the various methods and techniques in the century old process of etching, with an emphasis on both traditional and modern approaches.

ART 105 and ART 106 or consent of instructor is a prerequisite for this class.

ART 331
INTERMEDIATE PRINTMAKING III
Undergraduate
A beginning level course designed to teach the student the basic screen printing techniques, materials and equipment and their proper usage.

ART 105 and ART 106 or consent of instructor is a prerequisite for this class.
ART 332
TOPICS IN PHOTOGRAPHIC PRACTICE
Undergraduate
Focused investigations of specific aesthetic, technical or conceptual issues in the practice of photography.

ART 224 or ART 225 or consent of instructor is a prerequisite for this class.

ART 333
COMPUTER APPLICATIONS FOR DESIGN: PRE-PRESS
Undergraduate
Builds on skills learned in ART 228. Explores specific areas of graphics and design focusing on pre-press, and exposes students to advanced software. It is highly recommended students take ART 358 before taking this class.

ART 227, ART 228, ART 260, and ART 264 or consent of instructor is a prerequisite for this class.

ART 334
PORTFOLIO
Undergraduate
In this course students review previous course projects and prepare a final portfolio of their own artistic identity and presentation in preparation for artistic practice, graduate study, and related career opportunities. Visiting professionals will present their work to the class and share their experiences in the field. Students will also learn presentational techniques and methods for career development.

ART 227, ART 228, ART 260, ART 264, and ART 358 or consent of instructor is a prerequisite for this class.

ART 345
ADVANCED MIXED MEDIA
Undergraduate
This course is the sequel to ART 245 Mixed Media Painting and as such is a content driven course with emphasis on understanding medium and material as symbol and idea. The course will offer students a more in-depth understanding of materials and techniques studied in ART 245 as well as prepare them for more conceptually advanced work in painting.

ART 105, ART 106, ART 110 and ART 245 or consent of instructor is a prerequisite for this class.

ART 348
GRAPHIC ART IN THE PUBLIC REALM
Undergraduate
This course enables students to research varied communities, complex information systems, processes, tools, and materials involved in visual communications. Students establish working relationships as individuals and in teams that utilize their skills to effectively communicate to an audience beyond the classroom. Objectives of the course include: creating awareness of current local community social issues, supporting students' development of independent and collaborative work habits, examining issues of social responsibility of the artist, integrating research-based learning and production skills, and assessing the social impact of a completed project. This is a JYEL accredited course.

(ART 101 and ART 105) or ANI 105 or GD 105 or consent of instructor is a prerequisite for this class.

ART 358
GRAPHIC ART
Undergraduate
This course explores word and image within the realm of visual art, including analysis of meaning and structure, layout and composition, and format and production. Students are introduced to theory, history and analysis of graphic art through studio projects, readings, writing and critiques.

(ART 101 and ART 105) or ANI 105 or GD 105 or consent of instructor is a prerequisite for this class.
ART 359
PRINT MEDIA
Undergraduate
Students are introduced to concepts of layout, composition, printing and production of multi-page documents including magazines, artists' books, posters and various other forms of printed matter. Emphasis is placed on research methodology, critical thinking and visual communication.

ART 227, ART 228, ART 260, and ART 264 are a prerequisite for this class.

ART 360
ILLUSTRATION
Undergraduate
Investigation of black-and-white and color media and introduction to the techniques, imagery, and functions of illustration in graphic design.

ART 101, ART 105, ART 106 and ART 227 are prerequisites for this class.

ART 361
PACKAGE DESIGN
Undergraduate
Focuses on current design trends with projects utilizing properties of materials such as paper, plastics, and glass.

ART 101, ART 105, ART 227, ART 260, ART 264 and ART 358 are prerequisites for this class.

ART 363
ADVERTISING DESIGN
Undergraduate
Explores the function and practice of design in advertising in both social and art historical contexts. It is highly recommended students take ART 358 before taking this class.

ART 227, ART 260 and ART 264 or consent of instructor is a prerequisite for this class.

ART 364
COMPUTER APPLICATIONS IN ART
Undergraduate
Use of Photoshop and Illustrator in the design and execution of paintings, drawings, and prints.

ART 101, ART 105, ART 106 and ART 110 or consent of instructor is a prerequisite for this class.

ART 369
TYPOGRAPHY II
Undergraduate
Advanced investigation into typography and text for verbal and visual expression.

ART 227, ART 260, ART 264 and ART 358 or consent of instructor is a prerequisite for this class.

ART 377
PHOTOJOURNALISM
Undergraduate
Introduction to the theoretical and technical foundations of photography with exploration of the medium's aesthetic, documentary and narrative purposes within the context of photojournalism. Cross-listed as JOUR 276.
ART 382
STUDENTS TEACHING ART IN THE ELEMENTARY CLASSROOM
Undergraduate
This course brings DePaul students into a Chicago grade school to incorporate art into the curriculum. It is a hybrid course that involves some Independent Study in which the students organize their schedule in conjunction with a grade school classroom teacher, and some required classes that they must attend on campus at a prescribed time and day. Students are off campus for approximately 10 class sessions. At the start of the quarter, students are given a theoretical background in community-based art education, ethical issues, and social engagement. Working in teams, students will observe in the classrooms to gain a sense of the grade school community and the existing curriculum. DePaul students will then develop and teach a specific lesson plan in collaboration with the classroom teacher. The objective will be to produce a creative learning experience that co-mingles art and a core subject such as science or social studies. Teaching this art integrated lesson will be an essential aspect of the learning experience. Students will meet back at the DePaul classroom at designated intervals for information, reflection, and the analysis of their experience and their impact on the grade school community, in relation to the theoretical examples from the beginning of the course. These reflections take varied forms: discussion, role-playing exercises, presentations, and papers. Approved for JYEL and cbsL credit. Formerly ART 283.

ART 383
SERVICE LEARNING IN THE ARTS INTERNSHIP
Undergraduate
Each student will be matched with a not-for-profit art-related organization, based on the student's interests and abilities in the visual arts as well as the organization's needs, which will provide the student with a practical and career-centered experience. An interview with the instructor at least one week prior to the beginning of the quarter is required (email the instructor).

ART 384
ART-RELATED INTERNSHIPS WITH FOR-PROFIT ORGANIZATIONS
Undergraduate
This is a four credit hour supervision class for any Art major or minor that has arranged for an internship with a For-Profit organization to do art-related activity. The class would be viewed as Independent Study, and the students do many of the same activities as in Art 383. This class can be taken for JYEL credit.

ART 385
WEB ART & DESIGN I
Undergraduate
This course is an introduction to web-based art through a series of studio projects utilizing Adobe Dreamweaver. Students learn the basic skills and processes needed to develop functional multimedia web pages that combine image, time, motion and sound to produce conceptual and experimental works of art that can only exist online.
ART 114 or ART 224 or consent of instructor is a prerequisite for this class.

ART 386
WEB ART & DESIGN II
Undergraduate
Students will analyze and produce web art projects with an emphasis on the psychological, social and cultural framework of a web based environment. Students will develop focused and independent research methods and technical skills specific to their web art practice that will expand on the fundamental principals of user interaction and an integration of image, time, motion and sound.
ART 227, ART 228, ART 264 and ART 385 or consent of instructor is a prerequisite for this class.

ART 387
MULTIMEDIA DESIGN
Undergraduate
The course introduces students to a grounding in the design and execution of intensive multimedia project using Macromedia Director. Students will learn to combine text, images, and sound within a 4D environment.
ART 101, ART 105, ART 227, ART 228 and ART 264 are prerequisites for this class.
ART 390
ADVANCED STUDIO PROBLEMS
Undergraduate
Intensive studio experience for students who have completed the requirements in their media specialty.
Jr. or Sr. standing and status as an Art, Media and Design major or Art minor or consent of instructor is a prerequisite for this class.

ART 392
SENIOR STUDIO SEMINAR
Undergraduate
An intensive capstone seminar of contemporary art theory and studio practice in the student's area of concentration. Required for graduation in Studio Art and in Media Arts.
Sr. standing and status as an Art, Media and Design major or Art Minor are a prerequisite for this class. Juniors may attend with instructor's consent.

ART 393
SENIOR PROJECT STUDIO
Undergraduate
Students work on advanced self-directed project(s) with an emphasis on developing a cohesive research methodology, artist statement and refined finalized works ready for presentation. Juniors may attend with instructor's consent.
Sr. standing and declared Art, Media and Design Major or Art Minor are prerequisites for this course.

ART 394
PROFESSIONAL PRACTICE IN THE STUDIO
Undergraduate
An intensive capstone experience in the professional, business, and legal skills needed to manage a career in Studio Art or Media Arts. Required for graduation with a Studio Art or a Media Arts concentration.
Sr. standing and status as an Art, Media and Design major or Art Minor are a prerequisite for this class. Juniors may attend with instructor's consent.

ART 395
SPECIAL TOPICS IN STUDIO PRACTICE
Undergraduate
Focuses on studio specialties and techniques not encompassed by the general art curriculum.

ART 396
INTERNSHIP
Undergraduate
Arranges fieldwork or employment in the student's field of study. Utilizes the extensive professional studios and art institutions of Chicago and other international art facilities as well. Up to 12 hours of credit.
Jr. or Sr. standing and status as an Art, Media and Design major or Art minor or consent of instructor is a prerequisite for this class.

ART 399
INDEPENDENT STUDY
Undergraduate
Independent work in the student's field of study under faculty supervision. Available only to upper-level students with demonstrated capacity for self-motivated study.

ART 405
ADVANCED ART STUDIO
Graduate
Advanced projects in Studio Art, Media Art, and Graphic Art.
ART 105 or consent of instructor is a prerequisite for this class.
ART 406
GRADUATE DRAWING
Graduate
An advanced and rigorous approach to historical and contemporary issues, applications and techniques of drawing.
ART 306 (or equivalent) and ART 318 (or equivalent) or portfolio or instructor consent are prerequisites for this course.

ART 418
GRADUATE FIGURE DRAWING
Graduate
Encourages the application of perceptual and media skills gained in figure drawing to more advanced and ambitious works on paper.
ART 306 (or equivalent) and ART 318 (or equivalent) or portfolio or instructor consent are prerequisites for this course.

ART 427
DIGITAL ART
Graduate
Digital art applications in Studio Art and Media Arts
ART 101 and ART 105 or consent of instructor is a prerequisite for this class.

ART 460
WEB ART AND DESIGN
Graduate
Web Art and Design study and explorations.
ART 101 and ART 105 or consent of instructor is a prerequisite for this class.

ART 461
PHOTOGRAPHY AND MEDIA ART
Graduate
Selected Topics in Art and Photography.

ART 489
VIDEO ART
Graduate
An advanced level course designed to introduce students to the uses of video within a variety of artistic practices including installation, projection and performance as well as linear, single-channel non-narrative, non-documentary pieces. This course will take a "theory/practice" approach. Instruction will combine a study of the historical uses of video in the art world as well as the theoretical and critical perspectives on the practices of a wide range of artists who use video. Hands-on application of these concepts will be applied to the students' own work, culminating in a finished project by the end of the term which will be edited in the computer applications Dreamweaver, Flash and Fireworks. Basic literacy with Macintosh platform is required.

ART 490
ADVANCED TOPICS IN ART, MEDIA AND DESIGN
Graduate
Intensive studio art experience in the student's media of choice. May be taken for variable credit.

ASL 101
AMERICAN SIGN LANGUAGE I
Undergraduate
This course is a basic introduction to American Sign Language (ASL), the language used by Deaf people in the United States and most of Canada. This course will help students develop their expressive and receptive ASL skills. Students will also learn about Deaf culture since a language cannot be separated from its culture.
ASL 101S
AMERICAN SIGN LANGUAGE I FOR SUMMER
Undergraduate
(Covers the equivalent of ASL 101 and the first half of ASL 102.) The first half of beginning American Sign Language (ASL), the language used by Deaf people in the United States and most of Canada. This course will help students develop their expressive and receptive ASL skills. Students will also learn about Deaf culture since a language cannot be separated from its culture.

ASL 102
AMERICAN SIGN LANGUAGE II
Undergraduate
This is the second Basic American Sign Language course in a series of ASL courses. Students will develop expressive and receptive ASL skills through discussions of topics such as living situations, family and occupations, and daily routines or activities. In addition, students will develop storytelling skills. Throughout the session, readings about Deaf culture will also be incorporated since a language cannot be separated from its culture.

ASL 103
AMERICAN SIGN LANGUAGE III
Undergraduate
This is the third Basic American Sign Language course in a series of ASL courses. Students will develop expressive and receptive ASL skills through discussions of such topics as giving directions, describing others, making requests, talking about family and occupations, attributing qualities to others, and talking about routines. Students will also learn about Deaf culture, since a language cannot be separated from its culture.

ASL 103S
AMERICAN SIGN LANGUAGE III FOR SUMMER
Undergraduate
(Covers the equivalent of the second half of ASL 102 and all of ASL 103.) The second half of beginning American Sign Language. Students will develop expressive and receptive ASL skills through discussions of such topics as giving directions, describing others, making requests, talking about family and occupations, attributing qualities to others, and talking about routines. Students will also learn about Deaf culture, since a language cannot be separated from its culture.

ASL 104
INTERMEDIATE AMERICAN SIGN LANGUAGE I
Undergraduate
Intensive practice in the use of American Sign Language, expanding from beginners' skills acquired in Basic American Sign Language (ASL) courses. The course involves intensive practice in the use of American Sign Language, and continued enhancement of the cultural awareness intrinsic to those skills. ASL 103 or equivalent, including placement test or permission of instructor, is recommended.

ASL 105
INTERMEDIATE AMERICAN SIGN LANGUAGE II
Undergraduate
This course is a continuation of American Sign Language (ASL), Level Two. It includes vocabulary-building and mastery of grammar through rigorous receptive and expressive language activities. Topics discussed in ASL include exchanges of personal information or life events, description of abstract objects, and continued enhancement of the cultural awareness intrinsic to those skills. ASL 104 or equivalent, including placement test or permission of instructor, is recommended.

ASL 106
INTERMEDIATE SIGN LANGUAGE III
Undergraduate
Intensive practice in the use of American Sign Language, and continued enhancement of the cultural awareness intrinsic to those skills. Continuation of ASL 105. ASL 105 or equivalent, including placement test or permission of instructor, is recommended.

ASL 199
INDEPENDENT STUDY
Undergraduate
Variable credit.
ASL 201
ADVANCED COMMUNICATION I
Undergraduate
Advanced level intensive practice in the use of American Sign Language, and continued enhancement of the cultural awareness intrinsic to those skills. ASL 106 or equivalent, including placement test or permission of instructor, is recommended.

ASL 202
ADVANCED COMMUNICATION II
Undergraduate
Advanced level intensive practice in the use of American Sign Language, and continued enhancement of the cultural awareness intrinsic to those skills. Continuation of ASL 201. ASL 106 or equivalent, including placement test or permission of instructor, is recommended.

ASL 203
ADVANCED COMMUNICATION III
Undergraduate
Advanced level intensive practice in the use of American Sign Language, and continued enhancement of the cultural awareness intrinsic to those skills. Continuation of ASL 202. ASL 106 or equivalent, including placement test or permission of instructor, is recommended.

ASL 299
INDEPENDENT STUDY
Undergraduate
Variable credit.

ASL 305
AMERICAN SIGN LANGUAGE LITERATURE
Undergraduate
This course will focus on selected ASL videotapes and films ranging from the early 1900's to the present. It shares similar elements and functions with any literature in any language. Students will study the historical background of deaf actors and actresses in silent films, analyze the content of stories, discuss grammatical features in ASL or ASL expressions signed by deaf people, and discuss the various signing registers and styles revealed in these contents. ASL 106 or equivalent, including placement test or permission of instructor, is recommended.

ASL 306
ARTS IN THE DEAF COMMUNITY
Undergraduate
A study of arts in the deaf community including the history and movement of De'VIA. Students will develop awareness and recognition of Deaf professional artists and the respective meaning behind their work. ASL 106 or equivalent, including placement test or permission of instructor, is recommended.

ASL 310
DEAF CULTURE
Undergraduate
This course is an introduction to concepts and issues in Deaf culture and the Deaf community. This course emphasizes the Deaf community as a linguistic and American cultural minority, the importance of language and education of the deaf people, as well as values, traditions, political activism and diversity in this group. ASL 106 or equivalent, including placement test or permission of instructor, is recommended.

ASL 311
DEAF-BLIND COMMUNITY
Undergraduate
An introduction to various aspects of the deaf-blind community including cultural norms and modes of communication used with deaf-blind communities. Students will develop an understanding of the role of Support Service Provider (SSP) or sighted guide. Opportunities for hands-on experience and interaction with the deaf-blind community will be provided. This course will be open to students who may or may not have had prior experiences with the deaf-blind community. ASL 106 or equivalent, including placement test or permission of instructor, is recommended.
ASL 321
ART OF TRANSLATION
Undergraduate
This course focuses on development of written English translations from ASL and verbal translation from ASL into English. This course will train students to focus on the meaning expressed in ASL concepts and provide proper translations. ASL 106 or equivalent, including placement test or permission of instructor, is recommended.

ASL 352
ASL LINGUISTICS
Undergraduate
This course will help students understand the basic concepts of linguistics as they think critically about ASL structure, including the fundamental areas of phonology, morphology, syntax, semantics, and language in use. Also, it will help students compare and contrast ASL and English structures. Additionally, it will provide students with the ability to understand how people can communicate through different kinds of systems, including languages which have several features. ASL 106 or equivalent, including placement test or permission of instructor, is recommended.

ASL 353
FINGERSPELLING
Undergraduate
This course will teach the theory behind fingerspelling and will train students on how to process serial information. Students will be able to identify invisible allophones and improve their receptive fingerspelling skills. ASL 106 or equivalent, including placement test or permission of instructor, is recommended.

ASL 354
SOCIO LINGUISTICS FOR THE DEAF COMMUNITY
Undergraduate
This course focuses on issues affecting the Deaf community and studies the use of ASL in society, along with policies created for and attitudes towards the Deaf community. Students will broaden their understanding of the Deaf community by engaging in discourse analysis as well as interacting with the different populations in the Deaf community. ASL 106 or equivalent, including placement test or permission of instructor, is recommended.

ASL 395
FOREIGN LANGUAGES ACROSS CURRICULUM
Undergraduate
The two credit FLAC course allows students to enrich their experience in the co-required course through added reading, writing, and signing activities in ASL. Students must have the equivalent of 106 or higher ability in ASL to take this two credit component. Please contact the Department of Modern Languages if you have questions about this course or about language placement.

ASL 399
INDEPENDENT STUDY
Undergraduate
Variable credit.

ASL 499
INDEPENDENT STUDY
Graduate
Variable credit.

AT 580
INTRODUCTION TO APPLIED TECHNOLOGY
Graduate
Through various learning processes (individual research and study, interactive sessions, individualized meetings with faculty, etc.), this seminar explores the aims of graduate education within the program of study leading to the Master of Science in Applied Technology?its purpose, scope, philosophy, key roles and processes. Special emphasis is placed on developing a baseline context for graduate study including a literature-based initial exploration into one?fs specialized MSAT track. (2 quarter hours)

Status as an MSAT student or departmental permission is a prerequisite for this class.
AT 587
INDEPENDENT WORK-BASED PROJECT
Graduate
In fulfillment of the approved project proposal, this project enables students to enhance and demonstrate their ability to investigate and contribute to (and/or problem-solve regarding) a work-based challenge applicable to their professional practice and MSAT track. In so doing, students deepen their self-managed inquiry, resourcefulness, initiative-taking and disciplined follow-through as advanced professionals. [Each student is advised to delay registering for AT-587 until after his/her project proposal is officially approved. Thereafter, as a graduate culmination project, there are no class-sessions associated with AT-587. Each student is to follow directives outlined in the official project approval material and initiate sessions with faculty as needed.]

Status as an MSAT student or departmental permission is a prerequisite for this class.

AT 589
INDEPENDENT REFLECTIVE PRACTICE PROJECT
Graduate
In fulfillment of the approved project proposal, this project enables students to engage and expand their professional practice as reflective practitioners. Students enhance their ability to describe and analyze a particular method or process of reflection and apply it or they describe and analyze a particular aspect of their professional practice and demonstrate improved functioning through focused/applied reflection. In so doing, students deepen their self-managed inquiry, resourcefulness, initiative-taking and disciplined follow-through as advanced professionals. [Each student is advised to delay registering for AT-589 until after his/her project proposal is officially approved. Thereafter, as a graduate culmination project, there are no class-sessions associated with AT-589. Each student is to follow directives outlined in the official project approval material and initiate sessions with faculty as needed.]

Status as an MSAT student or departmental permission is a prerequisite for this class.

AT 598
CURRENT TOPICS IN APPLIED TECHNOLOGY
Graduate
Current Topics in Applied Technology
Status as an MSAT student or departmental permission is a prerequisite for this class.

BBE 96
100 FIELD EXPERIENCE HOURS IN ESL / BE DOCUMENTED
Undergraduate
Required of all Bilingual Bicultural students. Observations and participatory experience with children and youth in a school or agency. The observation hours are a prerequisite for student teaching and related professional courses. (0 credit hours)

BBE 97
100 FIELD EXPERIENCE HOURS IN ESL / BE DOCUMENTED
Graduate
Required of all Bilingual Bicultural students. Observations and participatory experience with children and youth in a school or agency. The observation hours are a prerequisite for student teaching and related professional courses. (0 credit hours)

BBE 300
TEACHING ELEMENTARY ENGLISH LANGUAGE LEARNERS: THEORY, POLICY AND PRACTICE
Undergraduate
This introductory course offers candidates a foundation in the critical elements in the education of English Language Learners (ELL) in the Elementary grades: second language acquisition, consequences of additive and subtractive bilingualism, culture and diversity, policies and law, ELL family involvement, language development standards, advocacy, and assessment. The course analyzes factors that influence the acquisition of the first and second language. Emphasis is given to the linguistic process in an individual's acquisition of two languages and the context in which both languages are developed alongside academic attainment. Multicultural perspectives and approaches are examined in relation to culturally and linguistically diverse students' background and experiences. Teaching practices, curriculum development, appropriate instructional materials and assessments are examined. Family/community relations and partnerships, as well as engagement of advocacy are also explored. Current federal and state policies related to ELLs are addressed. This course covers the Illinois Professional Teaching Standards related to addressing the academic, linguistic, and socio-emotional needs of ELLs.
BBE 301
TEACHING ADOLESCENT ENGLISH LANGUAGE LEARNERS AND DIALECT SPEAKERS ACROSS THE CURRICULUM
Undergraduate
This course provides educators across disciplinary content areas foundational knowledge for teaching and assessing adolescent English language learners (ELLs) and speakers of non-dominant varieties of English. Special focus is placed on identifying and augmenting students' various (oral and written) proficiencies and inter- and intra-linguistic varieties of English toward increased academic English proficiency. This course also engages educators in realizing in curriculum and instruction the multifaceted aspects of fostering academic proficiency among adolescent ELLs and speakers of non-dominant varieties of English, such as theories of first, second, and heritage language sociolinguistics; language policy and planning; cross-disciplinary collaboration; parental/family language practices; family and community participation and involvement; informed decision making and advocacy; school/community discourses; learner accommodations; WIDA and Common Core standards; and culturally and linguistically appropriate assessment.

SEC 364 and Advanced Teacher Candidate Standing are prerequisites for this class.

BBE 302
BILINGUAL-BICULTURAL PROGRAM DESIGN AND CURRICULUM DEVELOPMENT
Undergraduate
Reviews theory and application of curriculum development to bilingual instructional programs, such as design, organizational patterns, materials and media, teacher training, parent and community involvement, and evaluation. Principal bilingual education program models are examined and analyzed. Includes a review of multiethnic literature and literacy that advocates for students' self-concept, acceptance, and sense of identity (includes 15 clinical hour requirement).

BBE 304
LANGUAGE, LITERACY AND CULTURE
Undergraduate
This course examines the linguistic, cultural, and social contexts in which culturally and linguistically diverse communities operate and their relation to educational practices. The class addresses sociolinguistic and multicultural perspectives on language and cultural diversity within and outside the U.S. Case studies examined in class readings provide the conceptual framework for multicultural education in the context of language and literacy development. This course is designed to assist future and current teachers in attaining an expanded understanding on the linguistic, cultural, and sociocultural theoretical frameworks that are at the core of educational transformation and social justice in the US. The course also aims to examine educators' roles in creating culturally and linguistically responsive curricula for diverse students. Topics include language and ethnicity, language and identity, language and social class, literacy practices, language standardization, language discrimination, dialects, language loss, and heritage languages.

BBE 305
THEORETICAL FOUNDATIONS IN BILINGUAL EARLY CHILDHOOD DEVELOPMENT
Undergraduate
This course is designed to equip bilingual childhood teachers with the knowledge and philosophy to work effectively in the education of early childhood language minority students in the context of bilingual/ESL programs. The course will explore the historical, socio-political and legal foundations of bilingual education programs in the United States. It will examine different models of language education programs: immersion, ESL pullout, transitional bilingual education, maintenance bilingual, enrichment or dual language. It will also address psycholinguistic and sociolinguistic principles upon which they are based.

BBE 306
FOUNDATIONS OF ENGLISH AS SECOND LANGUAGE INSTRUCTION IN EARLY CHILDHOOD EDUCATION
Undergraduate
Candidates explore English as a Second Language (ESL), theory and practice as it applies to young children and their families. Candidates also study the sociocultural, pedagogical, linguistic, and political issues underlying current models of education for non-English speaking children, as well as models for ESL instruction in early childhood settings. Critical emphasis is placed upon theories that support young learners in second language acquisition.

BBE 307
EQUITY ISSUES IN ASSESSMENT OF LANGUAGE LEARNERS
Undergraduate
Examines assessment procedures, including standardized and performance-based, as well as ethical standards and practices used in the assessment of culturally and linguistically diverse students. Equity and legal issues related to assessment practices, research, first and second language acquisition, bilingualism, cultural and sociopolitical issues related to assessment are discussed. Emphasizes existing biases in assessment and non-discriminatory assessment practices and policies. National, state, and local assessment policies are examined (includes 15 clinical hour requirement).
BBE 310  
**SPECIAL TOPICS IN LANGUAGE EDUCATION AND CULTURE**  
*Undergraduate*  
This course is designed to explore a specific area of study in the field of linguistics, such as sociolinguistics, psycholinguistics, applied linguistics, language planning and policy, and cognitive bilingualism, among other related topics. The particular focus of study will vary and change as the course is offered.

BBE 311  
**FUNDAMENTALS OF ENGLISH LANGUAGE LEARNER EDUCATION**  
*Undergraduate*  
This introductory course offers candidates a foundation in the critical elements in the education of ELLs: second language acquisition, consequences of additive and subtractive bilingualism, culture and diversity, policies and law, ELL family involvement, language development standards, advocacy, and assessment. The course analyzes factors that influence the acquisition of the first and second language. Teaching practices, curriculum development, selection of instructional materials, use of appropriate language and content assessments are examined. This course covers the Illinois Professional Teaching Standards related to addressing the academic, linguistic, and socio-emotional needs of ELLs.

BBE 316  
**SOCIOCULTURAL AND HISTORICAL PERSPECTIVES IN BILINGUAL EDUCATION**  
*Undergraduate*  
Presents theoretical constructs of bilingual schooling in the U.S. and other multilingual societies from historical, theoretical and sociocultural perspectives. Emphasizes issues in bilingual education related to the sociocultural and legal aspects of language policy and bilingual education in the U.S. The historical trajectory of language policy and bilingual education in the U.S. is discussed in reference to Native American languages and early European settlers' language schooling practices. The focus shifts to 20th and 21st century bilingual education and immigration policies that have influenced both the advocacy for and opposition to bilingual education as well as the movement to make English the official language in the U.S.

BBE 320  
**ANALYZING RESEARCH ON IDENTITY, CULTURE & LANGUAGE EDUCATION**  
*Undergraduate*  
Introduces students to, and engages them in reading, research design within the context of bilingual-bicultural education and second language learning and instruction. Students will consider important linguistic and sociocultural issues in language education as examined with various research methods, including quantitative, qualitative, and mixed methods. Students will conduct and present a mini-action research project about their own learning and development, and will write a cogent review of literature about a personally meaningful topic, problem, or issue related to language and culture education. (Includes 15 clinical hour requirement.)

BBE 324  
**METHODS OF TEACHING ENGLISH AS A SECOND LANGUAGE**  
*Undergraduate*  
This course introduces instructional methods, approaches, strategies and materials for teaching English language learners. Particular importance is placed on the relationship of reading and writing development to second language acquisition, teaching language and content, and fostering cognitive development through the four domains of reading, writing, speaking and listening.

BBE 325  
**BILITERACY PRACTICES IN BILINGUAL EDUCATION AND ESL**  
*Undergraduate*  
Analyzes and evaluates methods and materials used in bilingual education and ESL programs. Stresses effective instructional strategies and best practices in first and second language literacy development and content learning. Reviews language teaching approaches and cooperative models of learning relating to development of reading and writing in the first and second language. Presents the acquiring language through content learning versus learning language programs. Investigates appropriate first language usage in bilingual classrooms, focusing on the different content areas, appropriate terminology for native language instruction, and the study of language distribution issues (includes 15 clinical hour requirement).
BBE 326  
THEORETICAL FOUNDATIONS OF TEACHING ESL AND WLE  
Undergraduate  
This course introduces key foundational theories of English as a second language and world language education that form the basis of our development as language education practitioners and professionals. The course explores theories of language, theories of learning and learners, and theory-driven teaching, as well as the philosophical paradigms that inform them. Foundational theories are introduced as problem-solving tools that provide interdisciplinary perspectives of English as a second language and world language education, and as frameworks for critically reading literature on language education theory, research, and methods.

BBE 330  
LATINOS AND EDUCATION  
Undergraduate  
This course examines historical and current issues related to the education of Latinos in the US that includes PK-12 and higher education. The course explores the sociolinguistic, theoretical, historical, sociocultural, legal, and political contexts that shape the educational experience of Latinos in the US. Demographic trends and data are examined in light of the various characteristics that make up the diverse Latino population. The course also analyzes the theoretical, historical, and political constructs of bilingual schooling and the underlying assumptions and implications for Latino students. Current research conducted by prominent scholars in the field are presented and examined. The course considers factors that influence, positively or negatively, the educational attainment of Latino students. The readings and class discussions emphasize how power relations in the wider society influence patterns in Latino education outcomes and policy-making. The course also examines arguments, assumptions, and interpretations of current and past legislation in regards to the education of Latinos in the US.

BBE 350  
ENGLISH LANGUAGE LEARNERS IN THE MIDDLE GRADES  
Undergraduate  
Presents an introduction to the field of English as a second language, with attention to fundamental concepts of second language acquisition in various language learning contexts. The course analyzes possible factors that influence the acquisition of the first and second language, including linguistic, cognitive, social, and affective dimensions. Emphasis is given not only to the linguistic process in individuals’ acquisition of two languages, but also the social, cultural, political, and educational context in which both languages are developed alongside academic attainment. Discusses interdisciplinary perspectives of second language acquisition and their application to classroom practices. This introductory course is designed for mainstream educators and covers the Illinois Professional Teaching Standards related to addressing the academic, linguistic, and socio-emotional needs of ELLs. ***This course counts toward ESL endorsement. Co-requisites for this course are MGE 301 and MGE 311. In this course, students will: 1. Describe language, language acquisition, language development, and second language learning. 2. Recognize the value of students’ native languages and cultures as the foundation for developing academic language proficiency. 3. Relate language to the core curriculum content areas such as language arts, mathematics, science, and social studies in the middle grades context. 4. Explain the importance of culture and the diversity of learners, cultural groups, and cultural identity as it influences learners in the middle school classroom. 5. Consider the social and intercultural aspects of language development. 6. Design and deliver appropriate instruction for standards-based English-language teaching that addresses language and content learning for second-language learners and an effective learning environment. 7. Access a variety of valuable resources and tools for instructional support, materials design, and overall creation and maintenance of a nurturing, effective classroom. 8. Summarize the issues of assessing and evaluating language learners in the middle school classroom. 9. Access a wide range of instruments and methods used to test for language-level proficiency and content-area progress.

MGE 300 and Junior standing are prerequisites for this class.

BBE 355  
HOW ENGLISH WORKS: ENGLISH SYNTAX FOR ESL AND BILINGUAL EDUCATION TEACHERS  
Undergraduate  
This course examines the structure of English from a descriptive linguistic framework. It addresses the inner workings of the English language through objective investigation of the lexical, phrasal, and clausal structures of the language to provide ESL and bilingual education teachers the syntactic foundation of the language they will teach. Topics include parts of speech, constituency, phrase structure, clause types, complements versus adjuncts, question formation, tense, negation, and the grammar of dialects. Additionally, this course will provide special emphasis on how these areas of English grammar interface with Common Core and WIDA standards for ELLs.
BBE 360
SECOND, WORLD AND HERITAGE LANGUAGE ACQUISITION K-12
Undergraduate
This course is an introduction to the theoretical study of second, world and heritage language acquisition (SLA) from a generative and psycholinguistic perspective at the K-12 levels. The content of the class is founded on the major concepts and issues of language acquisition, including UG-access, L1-transfer, age effects, and the acquisition of form vs. meaning. The course pays particular attention to empirical second and world language studies at the syntax/semantics interface. Course readings and discussion examine the complexities of the processes involved in acquiring a world language that includes the relation between first and SLA; contrastive and error analysis; interlanguage; the social and cultural influences on SLA; learner variability; learning strategies; and classroom interaction analysis. Issues surrounding second and world language acquisition are discussed and deliberated through university classroom experiences as well as required field experiences (20/15 hours; level 2).

BBE 366
FIRST AND SECOND LANGUAGE ACQUISITION
Undergraduate
This course examines principles, processes, theories, and research in first and second language acquisition and bilingualism with implications for language teaching. The course provides an introduction to the fields of first and second language acquisition (SLA) that include universal, individual, and social features and dimensions of the second language learning process that determine the nature and path of acquisition. These features include age and critical periods; cross-linguistic influences; role of the environment; cognitive contributions; interlanguage variability; linguistic features; motivation; and affect. Socio-cultural and sociopolitical aspects of second language acquisition and bilingualism are also discussed. Includes clinical hour requirement.

BBE 370
SECOND & WORLD LANGUAGE LITERACIES AND CULTURES
Undergraduate
This course examines the interdisciplinary study of first, second and world languages and multiple L1 and L2 literacies in their cultural, social, and political contexts, with emphasis on issues of ethnicity, identity, social class, gender, power, and other related topics relative to ideologies of reading and writing the world through reading and writing the word. Special focus is placed on these topics as they pertain to the extant research on language, literacy, and culture represented in the WLE certification language communities, as well as in the literature, art, music, and popular culture of those communities as a means of advocating students' sense of identity as global citizens (20/15 hours; level 1).

BBE 400
TEACHING ELEMENTARY ENGLISH LANGUAGE LEARNERS: THEORY, POLICY AND PRACTICE
Graduate
This introductory course offers candidates a foundation in the critical elements in the education of English Language Learners (ELL) in the Elementary grades: second language acquisition, consequences of additive and subtractive bilingualism, culture and diversity, policies and law, ELL family involvement, language development standards, advocacy, and assessment. The course analyzes factors that influence the acquisition of the first and second language. Emphasis is given to the linguistic process in an individuals' acquisition of two languages and the context in which both languages are developed alongside academic attainment. Multicultural perspectives and approaches are examined in relation to culturally and linguistically diverse students' background and experiences. Teaching practices, curriculum development, appropriate instructional materials and assessments are examined. Family/community relations and partnerships, as well engagement of advocacy are also explored. Current federal and state policies related to ELLs are addressed. This course covers the Illinois Professional Teaching Standards related to addressing the academic, linguistic, and socio-emotional needs of ELLs.

BBE 402
BILINGUAL-BICULTURAL PROGRAM DESIGN AND CURRICULUM DEVELOPMENT
Graduate
Reviews theory and application of curriculum development to bilingual instructional programs, such as design, organizational patterns, materials and media, teacher training, parent and community involvement, and evaluation. Principal bilingual education program models are examined and analyzed. Includes a review of multiethnic literature and literacy that advocates for students' self-concept, acceptance, and sense of identity. Includes clinical hour requirement.
BBE 404
LANGUAGE, LITERACY AND CULTURE
Graduate
This course examines the linguistic, cultural, and social contexts in which culturally and linguistically diverse communities operate and their relation to educational practices. The class addresses sociolinguistic and multicultural perspectives on language and cultural diversity within and outside the U.S. Case studies examined in class readings provide the conceptual framework for multicultural education in the context of language and literacy development. This course is designed to assist future and current teachers in attaining an expanded understanding on the linguistic, cultural, and sociocultural theoretical frameworks that are at the core of educational transformation and social justice in the US. The course also aims to examine educators' roles in creating culturally and linguistically responsive curricula for diverse students. Topics include language and ethnicity, language and identity, language and social class, literacy practices, language standardization, language discrimination, dialects, language loss, and heritage languages.

BBE 406
SOCIOCULTURAL AND HISTORICAL PERSPECTIVES IN BILINGUAL EDUCATION
Graduate
Presents theoretical constructs of bilingual schooling in the U.S. and other multilingual societies from historical, theoretical and sociocultural perspectives. Emphasizes issues in bilingual education related to the sociocultural and legal aspects of language policy and bilingual education in the U.S. The historical trajectory of language policy and bilingual education in the U.S. is discussed in reference to Native American languages and early European settlers' language schooling practices. The focus shifts to 20th and 21st century bilingual education and immigration policies that have influenced both the advocacy for and opposition to bilingual education as well as the movement to make English the official language in the U.S.

BBE 407
EQUITY ISSUES IN ASSESSMENT OF LANGUAGE LEARNERS
Graduate
Examines assessment procedures, including standardized and performance-based, as well as ethical standards and practices used in the assessment of culturally and linguistically diverse students. Equity and legal issues related to assessment practices, research, first and second language acquisition, bilingualism, and cultural and sociopolitical issues related to assessment are discussed. Emphasizes existing biases in assessment and non-discriminatory assessment practices and policies. National, state, and local assessment policies are examined. Includes clinical hour requirement.

BBE 408
BILINGUAL EARLY CHILDHOOD DEVELOPMENT THEORETICAL FOUNDATIONS
Graduate
This course is designed to equip bilingual and second language teachers with the knowledge and philosophy to work effectively in the education of early childhood language minority students in the context of bilingual/ESL programs. The course will explore the historical, political and legal foundations of bilingual education programs in the United States. It will examine different models of bilingual programs and the psycholinguistic and sociolinguistic principles upon which they are based.

BBE 409
ENGLISH AS A SECOND LANGUAGE INSTRUCTIONAL FOUNDATIONS IN EARLY CHILDHOOD SETTING
Graduate
Candidates explore English as a Second Language (ESL), theory, and practice as it applies to young children and their families. Candidates also study the socio-cultural, pedagogical, linguistic, and political issues underlying current models of education for non-English speaking children, as well as models for ESL instruction in early childhood settings. Critical emphasis is placed upon theories that support young learners in second language acquisition.

BBE 411
FUNDAMENTALS OF ENGLISH LANGUAGE LEARNER EDUCATION
Graduate
This introductory course offers candidates a foundation in the critical elements in the education of English Language Learners (ELL): second language acquisition, consequences of additive and subtractive bilingualism, culture and diversity, policies and law, ELL family involvement, language development standards, advocacy, and assessment. The course analyzes factors that influence the acquisition of the first and second language. Emphasis is given to the linguistic process in an individuals' acquisition of two languages and the context in which both languages are developed alongside academic attainment. Multicultural perspectives and approaches are examined in relation to culturally and linguistically diverse students' background and experiences. Teaching practices, curriculum development, selection of instructional materials, use of appropriate language and content assessments are examined. Family/community relations and partnerships, as well engagement of advocacy are also explored. Current federal and state policies related to ELLs are also addressed. This course covers the Illinois Professional Teaching Standards related to addressing the academic, linguistic, and socio-emotional needs of ELLs.

Status as a Graduate Education student is a prerequisite for this class.
BBE 425
BILITERACY PRACTICES IN BILINGUAL EDUCATION AND ESL
Graduate
Analyzees and evaluates methods and materials used in bilingual education and ESL programs. Stresses effective instructional strategies and best practices in first and second language literacy development and content learning. Reviews language teaching approaches and cooperative models of learning relating to development of reading and writing in the first and second language. Presents the acquiring language through content learning versus learning language programs. Investigates appropriate first language usage in bilingual classrooms, focusing on the different content areas, appropriate terminology for native language instruction, and the study of language distribution issues. Includes clinical hour requirement.

BBE 450
ENGLISH LANGUAGE LEARNERS IN THE MIDDLE GRADES
Graduate
Presents an introduction to the field of English as a second language, with attention to fundamental concepts of second language acquisition in various language learning contexts. The course analyzes possible factors that influence the acquisition of the first and second language, including linguistic, cognitive, social, and affective dimensions. Emphasis is given not only to the linguistic process in individuals' acquisition of two languages, but also the social, cultural, political, and educational context in which both languages are developed alongside academic attainment. Discusses interdisciplinary perspectives of second language acquisition and their application to classroom practices. This introductory course is designed for mainstream educators and covers the Illinois Professional Teaching Standards related to addressing the academic, linguistic, and socio-emotional needs of ELLs. ***This course counts toward ESL endorsement. Co-requisites for this course are MGE 401 and MGE 411. In this course, students will: 1. Describe language, language acquisition, language development, and second language learning. 2. Recognize the value of students native languages and cultures as the foundation for developing academic language proficiency. 3. Relate language to the core curriculum content areas such as language arts, mathematics, science, and social studies in the middle grades context. 4. Explain the importance of culture and the diversity of learners, cultural groups, and cultural identity as it influences learners in the middle school classroom. 5. Consider the social and intercultural aspects of language development. 6. Design and deliver appropriate instruction for standards-based English-language teaching that addresses language and content learning for second-language learners and an effective learning environment. 7. Access a variety of valuable resources and tools for instructional support, materials design, and overall creation and maintenance of a nurturing, effective classroom. 8. Summarize the issues of assessing and evaluating language learners in the middle school classroom. 9. Access a wide range of instruments and methods used to test for language-level proficiency and content-area progress.

MGE 400 is a prerequisite for this class.

BBE 466
FIRST AND SECOND LANGUAGE ACQUISITION
Graduate
This course examines principles, processes, theories, and research in first and second language acquisition and bilingualism with implications for language teaching. The course provides an introduction to the fields of first and second language acquisition (SLA) that include universal, individual, and social features and dimensions of the second language learning process that determine the nature and path of acquisition. These features include age and critical periods; cross-linguistic influences; role of the environment; cognitive contributions; interlanguage variability; linguistic features; motivation; and affect. Socio-cultural and sociopolitical aspects of second language acquisition and bilingualism are also discussed. Includes clinical hour requirement.

BBE 474
READING AND ELLS
Graduate
This course examines current theories of second language acquisition, literacy teaching and learning for English language learners (ELLs), and explores the relationships between the first and second language as it relates to the approach to teaching for transfer with ELLs. This course links theory and practice by examining pedagogical approaches that most effectively promote ELLs reading and writing development. Multicultural and multilingual characteristics of ELLs are also discussed as they relate to their literacy development. Other factors that impact the academic achievement of ELLs in relation to literacy include sociocultural, sociolinguistic, and sociopolitical dimensions of teaching ELLs. This course is designed to assist teachers with a specialization in reading to develop expanded understandings of theoretical and pedagogical perspectives related to the literacy and language processes of students learning English as a new language. In addition, literacy assessment in the first and second language represented by standardized testing as well as authentic performance-based evaluations are also presented.
BBE 476
BILINGUAL PRACTICES: SECONDARY/ADULT
Graduate
Analyzes and evaluates current research and pedagogical approaches used in second language programs in relation to literacy instruction in the secondary and adult classroom settings. The course focuses on effective instructional strategies and best practices in first and second language literacy development. Special attention is given to content area learning in relation to acquiring literacy skills in a second language for secondary students. The course reviews language and literacy instructional approaches and cooperative models of learning related to the development of reading and writing in the first and second language. Discussions center on issues of acquiring language and literacy skills through content instruction as well as authentic and performance-based assessment. Investigates appropriate first and second language development in bilingual, ESL and foreign language classrooms, focusing on the different aspects of literacy and subject matter learning (includes 15 clinical hour requirement).

BBE 490
MULTICULTURAL AND MULTILINGUAL CHILDREN’S LITERATURE
Graduate
This course will use multicultural and multilingual children's books to survey pluralism and linguistic diversity. Students will analyze folk and modern literature, including application of literary and culturally responsive criteria to these selections. Students will explore means of teaching using multicultural literature to encourage diverse learners and learning styles. Students will evaluate literature for its literary value as well as cultural acceptability. Students will read a broad variety of current multicultural literature for children and young adults. Students interested in specializing in one specific age group or grade level may focus their literature selections on literature appropriate for specific ages. Genres of children's and young adult literature will be examined and criteria for selection and renewing collections for school and public libraries will be discussed. Notable authors, poets, and illustrators of children's and young adult literature will be studied with an emphasis on those who contribute to bilingual, multilingual, and multicultural, and multiethnic collections. The use of children's and young adult literature to develop literacy, particularly for ELLs will be studied and the use of children's and young adult literature in meeting national, state, and district standards will be discussed. Children's and young adult literature will be examined from diverse perspectives in particular literature reflecting African American, Asian, Latino, and Native American cultures. However, students will read literature from all cultural groups including traditional children's and young adult literature.

BBE 501
TEACHING ADOLESCENT ENGLISH LANGUAGE LEARNERS AND DIALECT SPEAKERS ACROSS THE CURRICULUM
Graduate
This course provides educators across disciplinary content areas foundational knowledge for teaching and assessing adolescent English language learners (ELLs) and speakers of non-dominant varieties of English. Especial focus is placed on identifying and augmenting students' various (oral and written) proficiencies and inter- and intra-linguistic varieties of English toward increased academic English proficiency. This course also engages educators in realizing in curriculum and instruction the multifaceted aspects of fostering academic proficiency among adolescent ELLs and speakers of non-dominant varieties of English, such as theories of first, second, and heritage language sociolinguistics; language policy and planning; cross-disciplinary collaboration; parental/family language practices; family and community participation and involvement; informed decision making and advocacy; school/community discourses; learner accommodations; WIDA and Common Core standards; and culturally and linguistically appropriate assessment.

T&L 425 and Advanced Teacher Candidate Standing or status as a TEACH student are prerequisites for this class.

BBE 510
SPECIAL TOPICS IN LANGUAGE EDUCATION AND CULTURE
Graduate
This course is designed to explore a specific area of study in the field of linguistics, such as sociolinguistics, psycholinguistics, applied linguistics, language planning and policy, and cognitive bilingualism, among other related topics. The particular focus of study will vary and change as the course is offered. Includes clinical hour requirement.

BBE 520
ANALYZING RESEARCH ON IDENTITY, CULTURE & LANGUAGE EDUCATION
Graduate
Introduces students to, and engages them in reading, research designed within the context of bilingual-bicultural education and second language learning and instruction. Students will consider important linguistic and sociocultural issues in language education as examined with various research methods, including quantitative, qualitative, and mixed methods. Students will conduct and present a mini-action research project about their own learning and development, and will write a cogent review of literature about a personally meaningful topic, problem, or issue related to language and culture education. For many students, this paper forms the beginning stages of their BBE Masters thesis or M.Ed. paper. (Includes 15 clinical hour requirement.)

SCG 410 or SCG 610 and at least 5 BBE courses (or equivalent) is a prerequisite for this class.
BBE 524
METHODS OF TEACHING ENGLISH AS A SECOND LANGUAGE
Graduate
This course introduces instructional methods, approaches, strategies and materials for teaching English language learners. Particular importance is placed on the relationship of reading and writing development to second language acquisition, teaching language and content, and fostering cognitive development through the four domains of reading, writing, speaking and listening.

BBE 526
THEORETICAL FOUNDATIONS OF TEACHING ESL AND WLE
Graduate
This course introduces key foundational theories of English as a second language and world language education that form the basis of our development as language education practitioners and professionals. The course explores theories of language, theories of learning and learners, and theory-driven teaching, as well as the philosophical paradigms that inform them. Foundational theories are introduced as problem-solving tools that provide interdisciplinary perspectives of English as a second language and world language education, and as frameworks for critically reading literature on language education theory, research, and methods.

BBE 530
LATINOS AND EDUCATION
Graduate
This course examines historical and current issues related to the education of Latinos in the US that includes PK-12 and higher education. The course explores the sociolinguistic, theoretical, historical, sociocultural, legal, and political contexts that shape the educational experience of Latinos in the US. Demographic trends and data are examined in light of the various characteristics that make up the diverse Latino population. The course also analyses the theoretical, historical, and political constructs of bilingual schooling and the underlying assumptions and implications for Latino students. Current research conducted by prominent scholars in the field are presented and examined. The course considers factors that influence, positively or negatively, the educational attainment of Latino students. The readings and class discussions emphasize how power relations in the wider society influence patterns in Latino education outcomes and policy-making. The course also examines arguments, assumptions, and interpretations of current and past legislation in regards to the education of Latinos in the US.

BBE 554
METHODS OF TEACHING ESL: ELEMENTARY
Graduate
The course provides an in-depth study of instructional approaches and curricular designs for the second language elementary classroom setting. Presents reviews and critiques specific methods and strategies for teaching second language learners, as well as comparative methods of learning the first and second language. Emphasizes methods for implementing constructivist strategies such as cooperative learning, thematic approach, flexible grouping, and sheltered instruction. The course provides guidelines for planning effective lessons using both thematic units and content-based subject matter. A critical focus of this course is on teaching and learning ESL through the content areas for elementary students (includes 15 clinical hour requirement).

BBE 555
HOW ENGLISH WORKS: ENGLISH SYNTAX FOR ESL AND BILINGUAL EDUCATION TEACHERS
Graduate
This course examines the structure of English from a descriptive linguistic framework. It addresses the inner workings of the English language through objective investigation of the lexical, phrasal, and clausal structures of the language to provide ESL and bilingual education teachers the syntactic foundation of the language they will teach. Topics include parts of speech, constituency, phrase structure, clause types, complements versus adjuncts, question formation, tense, negation, and the grammar of dialects. Additionally, this course will provide special emphasis on how these areas of English grammar interface with Common Core and WIDA standards for ELLs.

BBE 556
METHODS OF TEACHING ESL: SECONDARY/ADULT
Graduate
The course explores the theoretical underpinnings and the applications of second-language theories and cultural knowledge to ESL teaching methodology and curriculum design in secondary and adult classroom settings. In addition, various approaches to second language teaching and learning as well as methods for modifying lessons to suit the needs of second-language learners to enhance their acquisition and use of English are presented. Concentrates on assisting educators in the development of appropriate strategies for teaching speaking, listening, reading, writing, and grammar in ESL environments. A major focus of this course is on teaching and learning ESL within the content areas through effective lesson planning using both thematic units and content-based subject matter. The course explores constructivist approaches such as sheltered language instruction (includes 15 clinical hour requirement).
BBE 560
SECOND, WORLD AND HERITAGE LANGUAGE ACQUISITION K-12
Graduate
This course is an introduction to the theoretical study of second, world and heritage language acquisition (SLA) from a generative and psycholinguistic perspective at the K-12 levels. The content of the class is founded on the major concepts and issues of language acquisition, including UG-access, L1-transfer, age effects, and the acquisition of form vs. meaning. The course pays particular attention to empirical second and world language studies at the syntax/semantics interface. Course readings and discussion examine the complexities of the processes involved in acquiring a world language that includes the relation between first and SLA; contrastive and error analysis; interlanguage; the social and cultural influences on SLA; learner variability; learning strategies; and classroom interaction analysis. Issues surrounding second and world language acquisition are discussed and deliberated through university classroom experiences as well as required field experiences (20/15 hours; level 2).

BBE 570
SECOND & WORLD LANGUAGE LITERACIES AND CULTURES
Graduate
This course examines the interdisciplinary study of first, second and world languages and multiple L1 and L2 literacies in their cultural, social, and political contexts, with emphasis on issues of ethnicity, identity, social class, gender, power, and other related topics relative to ideologies of reading and writing the world. Special focus is placed on these topics as they pertain to the extant research on language, literacy, and culture represented in the WLE certification language communities, as well as in the literature, art, music, and popular culture of those communities as a means of advocating students' sense of identity as global citizens (20/15 hours; level 1).

BBE 588
INDEPENDENT STUDY IN BILINGUAL BI CULTURAL EDUCATION
Graduate
Permission required. (1 credit hour)

BBE 589
THESIS RESEARCH IN BILINGUAL-BICULTURAL EDUCATION
Graduate
A student writing a thesis registers for this course for four quarter hours of credit. When the thesis research and writing of the thesis are prolonged beyond the usual time, the program advisor may require the student to register for additional credit.

BBE 599
LEADERSHIP IN EDUCATING LINGUISTICALLY DIVERSE LEARNERS
Graduate
The course is designed for educators who currently are or will be serving in a leadership capacity involving linguistically and culturally diverse learners. The purpose of this course is to develop foundational knowledge of the theories, research, policies, and practices related to the education of English language learners. The aim is to support current and future education leaders in constructing a well-informed basis of the critical elements of ELL education that include: second language acquisition, culture and diversity, policies and law, ELL family involvement, language development standards, advocacy, and assessment. The course examines various pedagogical and assessment constructs related to teaching ELLs, including state mandated standards and assessments such as ACCESS and WIDA standards.

BBE 600
REGISTERED STUDENT IN GOOD STANDING
Graduate
Registration in this course is open to students who are not registered for any other courses but need to complete requirements/assignments for previously taken courses. It provides access to University facilities. Permission of advisor required. (0 credit hours)

BBE 608
CAPSTONE IN BILINGUAL-BICULTURAL EDUCATION
Graduate
Culminating experience(s) that help(s) students acquire the qualities of professionalism and leadership needed to play a significant role in one's professional education community. Students are expected to situate and understand educational issues in a larger context; keep current in and be able to organize and present a body of research on an education-related question; connect research with practical, professional activity; demonstrate mastery of a sub-field of a discipline; write in a format that meets accepted scholarly criteria and participate in an ongoing professional conversation. A final product such as master's paper(s), comprehensive exam, or collection of professional work products is required. (0 credit hours)
BBE 625
CANDIDACY CULMINATING PROJECT (STUDENT IN GOOD STANDING)
Graduate
Registration in this course is required of all students who are not enrolled in a course but are completing culminating projects for their program of study, including theses, papers, and final portfolios. It provides access to university facilities. Permission of advisor required. Registration limited to three terms. (0 credit hours)

Status as a student in a College of Education Advanced Master's program is a prerequisite for this class.

BIO 104
EVOLUTION AND SOCIETY
Undergraduate
In this course you will learn to identify questions that can or cannot be answered by science, the assumptions made by science, how evidence is connected to predictions, and evaluate the role of communication and peer-review to promote scientific progress. It also includes current and foundational issues in evolution starting with Darwin's voyage of the Beagle, the Darwinian Natural Selection Theory, and the impact of evolution on disease and society.

BIO 115
INTRODUCTION TO BIOLOGY
Undergraduate
Deals with the scientific method, biological chemistry, structure, function, and heredity of cells and organisms, evolution and ecology. Cannot receive credit for both BIO 115 and BIO 155. No credit for Biology majors or minors.

BIO 118
MARINE BIOLOGY
Undergraduate
Study of marine diversity, marine ecosystems, and connections between oceans and humans. Student cannot receive credit for both BIO 118 and 160. No credit for Biology majors or minors.

LSP 120 is a prerequisite for this class.

BIO 120
THE SCIENCE AND ART OF VISION
Undergraduate
This Science as a Way of Knowing course will survey how our understanding of visual system function and our perception of the visual arts has developed through scientific inquiry. We will examine hypotheses about the evolution of human vision and the nature of visual anomalies, and will discuss creative efforts to evaluate these hypotheses. We will review questions that remain unresolved, and identify related technical and/or ethical constraints. Basic knowledge of visual processing will be applied to explore how artists employ techniques that interface with the visual system to create specific impressions.

BIO 121
INFECTIOUS DISEASES AND IMMUNITY
Undergraduate
This course is designed to introduce students to the world of microorganisms, especially those which cause infectious diseases and to explain how the immune system protects the body against these organisms. Cannot receive credit for both BIO 121 and BIO 161. No credit for Biology majors or minors.

BIO 122
INTRODUCTION TO PALEOBIOLOGY
Undergraduate
This course focuses on the concepts and practices of paleobiology, the scientific study of the biology of extinct organisms preserved as fossils. No credit for Biology majors or minors.
BIO 123
INHERITANCE IN HUMANS
Undergraduate
An examination of genetics in the human species, including the inheritance of ordinary traits, genetic diseases, and those complex attributes to which inheritance contributes, such as behavior and intelligence. Formerly BIO 203. No credit for Biology majors or minors

BIO 124
VERTEBRATES: DIVERSITY AND EVOLUTION
Undergraduate
Examines vertebrate diversity and the interrelationships among vertebrate groups including humans. The quantitative component will include several data processing exercises that address: 1) how vertebrates are related and how those relationships are determined using phylogenetic trees, 2) species descriptions and analyzing morphological differences among species and 3) graphical interpretations. Formerly BIO 204.

BIO 126
BRAIN AND BEHAVIOR
Undergraduate
Examines basic concepts in neurobiology. Specifically how the brain is organized, how it sends messages throughout the body, and how these messages turn into daily activities such as seeing, eating, and walking. How these behaviors are altered due to disease or injury of the brain is also discussed. Cannot receive credit for both BIO 126 and BIO 162. Formerly BIO 206. No credit for Biology majors or minors

BIO 128
STRESS, HORMONES AND THE NERVOUS SYSTEM
Undergraduate
A study and discussion of the basic concepts of stress and stressors, and their effects on the functioning of the Nervous System, the Endocrine System and the Immune System; the feedback influence of hormones and neurochemicals on cerebral processing, and the relation of these phenomena to health and behavioral medicine. Formerly BIO 208. No credit for Biology majors or minors

BIO 132
MEDICAL TESTS AND TRIALS
Undergraduate
Is fiber good for you? Are cell phones bad? Participants in this course will learn how to analyze popular health claims and medical studies using a computer spreadsheet (Excel). Topics include: design of health studies, data collection, statistical analysis, common biases and errors, and sources of health data on the World Wide Web. Formerly BIO 212. No credit for Biology majors or minors
LSP 120 is a prerequisite for this class.

BIO 134
HOW THE HUMAN BODY WORKS
Undergraduate
Fundamentals of human body functions through an examination of organs and organ systems. The quantitative component of this course will explore the concepts of scientific discovery through structured out-of-class projects. Cannot receive credit for both BIO 202 and BIO 134. Formerly BIO 224. No credit for Biology majors or minors

BIO 155
INTRODUCTION TO BIOLOGY WITH LABORATORY
Undergraduate
This lecture-laboratory course deals with the scientific method, biological chemistry, structure and function of cells, organs, and organ systems, heredity, evolution and ecology. Course includes a laboratory experience involving biological concepts discussed in class. Cannot receive credit for both BIO 115 and BIO 155. No credit for Biology majors or minors.

BIO 156
FOOD, FUEL FOR LIFE
Undergraduate
Food from a biological perspective: defined at the chemical and biochemical level and as it fuels life through metabolism and nutrition. Other topics include improving foods by traditional breeding and new genetic engineering technology, food production, sustainable agriculture; food safety issues, and feeding world populations. No credit for Biology majors or minors
**BIO 160**  
**MARINE BIOLOGY WITH LAB**  
*Undergraduate*  
Study of marine diversity; marine ecosystems; and connections between oceans, the atmosphere, and humans. Lecture-Laboratory. Cannot receive credit for both BIO 118 and BIO 160. No credit for Biology majors or minors

LSP 120 is a prerequisite for this class.

**BIO 161**  
**INFECTIOUS DISEASES AND IMMUNITY WITH LABORATORY**  
*Undergraduate*  
This course is designed to introduce students to the world of microorganisms with particular emphasis on how microorganisms cause disease and the actions of the human body in fighting disease. This course includes a laboratory experience to reinforce concepts and introduce students to practical aspects of disease causing microorganisms. Cannot receive credit for both BIO 121 and BIO 161. No credit for Biology majors or minors

**BIO 162**  
**THE BRAIN: BIOLOGY AND BEHAVIOR**  
*Undergraduate*  
Explores basic concepts in neurobiology, including the organization and evolution of the vertebrate system, how the nervous system sends messages through the body and how these messages are translated into the variety of human behaviors. Alterations in behavior due to brain disease or injury is also discussed. The laboratory elaborates on lecture material and provides insight into how scientific reasoning and testing can help to discover how the brain works. Cannot receive credit for both BIO 126 and BIO 162. Formerly BIO 239. No credit for Biology majors or minors.

**BIO 163**  
**PRINCIPLES OF BIOLOGY**  
*Undergraduate*  
The course is designed to introduce the student to several important principles of Biology, including aspects of cell biology, genetics, ecology, development, and evolution. The course will involve labs on each of these topics as they are addressed, requiring the student to accumulate and analyze data and to be involved in summarizing and presenting this data to the class. Formerly BIO 256. No credit for Biology majors or minors.

**BIO 164**  
**AVIAN BIOLOGY**  
*Undergraduate*  
A foundation in the study, knowledge, and appreciation of birds. Use of field techniques to monitor and measure free-ranging bird populations in an experiential learning situation. Contributes to understanding of interaction and interdependency of nature through study of avian life. No credit for Biology majors or minors.

Junior or Senior standing is a prerequisite for this class.

**BIO 166**  
**INTRODUCTION TO PLANT BIOLOGY WITH LAB**  
*Undergraduate*  
This course deals with the characteristic features of higher plants, plant products that are beneficial to humans, structure, physiology and ecology of cultivated plants, and modern horticultural and genetic approaches to the improvement of plants and plant productivity. No credit for Biology majors or minors

**BIO 191**  
**GENERAL BIOLOGY I FOR SCIENCE MAJORS**  
*Undergraduate*  
Focuses on the unity of life: its biochemical and cellular makeup and functions, the acquisition and utilization of energy, and the storage and utilization of genetic information. Lecture-laboratory. CHE 130 and CHE 131 are recommended as corequisites.

MAT 130 is a prerequisite for this class.
BIO 192
GENERAL BIOLOGY II FOR SCIENCE MAJORS
Undergraduate
Introduction to evolution, ecology, organismal development and diversity. Lecture-laboratory.

A grade of C- or higher in BIO 191 is a prerequisite for this class.

BIO 193
GENERAL BIOLOGY III FOR SCIENCE MAJORS
Undergraduate
Deals primarily with diversity and development within the plant and animal kingdoms including basic principles of physiology. Lecture-laboratory.

A grade of C- or higher in BIO 192 is a prerequisite for this class.

BIO 201
HUMAN ANATOMY
Undergraduate
Structure of the human body with an emphasis on gross anatomy. Lecture-laboratory. Lecture covers human anatomy; laboratory emphasis on feline dissection.

At least Sophomore Standing is a prerequisite for this course.

BIO 202
HUMAN PHYSIOLOGY
Undergraduate
Introduction to concepts and mechanisms of human organ system function including respiratory, cardiovascular, renal, muscular, nervous, endocrine and digestive systems. Lecture-laboratory. Primarily for Health Science majors. No credit for Biology majors or minors. Cannot receive credit for both BIO 202 and BIO 134.

At least Sophomore Standing is a prerequisite for this course.

BIO 206
BIOSTATISTICS
Undergraduate
A survey of a variety of statistical methods used to analyze biological data.

BIO 193 or instructor consent is a prerequisite for this class.

BIO 209
PLANT BIOLOGY
Undergraduate
A study of plant evolution, diversity, reproduction, developmental plant anatomy, regulation of plant growth and development, and plant physiology.

BIO 193 is a prerequisite for this class.

BIO 210
MICROBIOLOGY
Undergraduate
Biology of microorganisms with emphasis on viruses, bacteria, fungi, and protozoa. Lecture-laboratory.

A grade of C- or better in BIO 193 is a prerequisite for this class.
BIO 215
ECOLOGY
Undergraduate
Study of organismal interactions; responses of individuals, populations and natural communities to their external environment. Lecture-laboratory.

BIO 193 is a prerequisite for this class.

BIO 220
PRINCIPLES OF BIOTECHNOLOGY
Undergraduate
This course will address aspects of the research and methodologies used in Modern Biotechnology, and place the field in the context of current societal and ethical concerns. Lecture-laboratory.

BIO 210 and BIO 250 or consent of instructor are a prerequisite for this class.

BIO 230
EPIDEMIOLOGY
Undergraduate
This course will involve the study of the frequency and distribution of human disease. Students will learn how the health of a population is measured, and how medical interventions are quantitatively evaluated. Students will analyze data from historical and modern health studies, including population surveys, case-control studies, cohort studies, and clinical trials for prevention and treatment.

BIO 206 is a prerequisite for this class.

BIO 235
EVOLUTION
Undergraduate
This lecture/laboratory course will examine basic selection, population genetics, development, speciation, extinction, systematics, and the history of evolution. In the lab, students will learn some of the modern research methods used in the study of evolution.

BIO 193 is a prerequisite for this class.

BIO 250
CELL BIOLOGY
Undergraduate
Fundamentals of cell form and function studied at the molecular and organelle level, including basic cellular biochemistry, ultrastructure and physiology. Lecture-laboratory.

BIO 193 and (CHE 134 or CHE 138 or CHE 144) are prerequisites for this class.

BIO 260
GENETICS
Undergraduate
Transmission of heritable traits, nature of genetic material, manner of its expression, its mutability, and its significance with respect to organismal and species variation. Lecture-laboratory.

BIO 191 and BIO 193 are a prerequisite for this class.

BIO 270
COMPARATIVE VERTEBRATE ANATOMY
Undergraduate
This lecture-laboratory course explores the diversity, anatomy, and evolution of vertebrates. The laboratory portion includes dissection and observation of various vertebrates.

BIO 192 and BIO 193 are a prerequisite for this class.
BIO 290
TOPICS IN BIOLOGY
Undergraduate
Occasional courses offered at intermediate levels. See the schedule of classes for current offerings. 2 or 4 quarter hours.

Sophomore standing is a prerequisite for this class.

BIO 301
ANIMAL BEHAVIOR
Undergraduate
An exploration of the types of animal behavior and modifiers of behavior as based on neuroendocrine function, with special emphasis on Felids. Lecture - Field Studies. Laboratory required.

BIO 191, BIO 192, BIO 193, BIO 206 and (BIO 215 or BIO 235) are a prerequisite for this class.

BIO 302
STUDENT LABORATORY INSTRUCTION
Undergraduate
Student Laboratory Instruction. Completion of course requires student to serve as teaching assistant for biology laboratory course in the following quarter.

BIO 303
INTRODUCTION TO SCIENTIFIC RESEARCH
Undergraduate
Introduction to Scientific Research. Course requires that student has had (or currently having) experience in scientific research.

BIO 304
FIELD METHODS FOR BIOLOGISTS
Undergraduate
The course will focus on the methods needed to initiate and undertake observations on Midwest ecosystems. Students will learn methods and put into practice the tools required to begin a site inventory and to assess population characteristics. The data gathered by the class will be archived and used as a starting point for subsequent studies. Each student will have an original research project involving extensive field work in nature.

Junior Standing or above is a prerequisite for this class.

BIO 309
PLANT PHYSIOLOGY
Undergraduate
A study of the functional and developmental aspects of flowering plants. Lecture-laboratory.

BIO 250 or instructor consent is a prerequisite for this class.

BIO 310
VERTEBRATE PHYSIOLOGY
Undergraduate
Functions and regulatory mechanisms of vertebrate cells, organs and organ systems with special emphasis on mammals. Lecture-Laboratory.

BIO 250 or instructor consent is a prerequisite for this class.

BIO 311
HISTOLOGY
Undergraduate
A Lecture/Laboratory course covering the microscopic structure of the tissues that make up animal organs. The development of these tissues as well as their relationship to the principles of gross anatomy, physiology, cell biology and molecular biology is stressed.

BIO 250 is a prerequisite for this class.
**BIO 312**
**TOPICS IN EXERCISE PHYSIOLOGY**
*Undergraduate*

This course provides an introduction to exercise physiology to enable exploration of current research topics in the field. Weekly discussion and presentation of articles from peer-reviewed journals will reinforce and elaborate on concepts covered in lecture. Topics include: muscle structure and bioenergetics, cardiovascular and respiratory responses to exercise, human evolution and endurance, training and adaptation, nutrition and ergogenic aids, and the relationships between exercise, health, and longevity.

BIO 250 or instructor consent is a prerequisite for this class.

**BIO 315**
**TOPICS IN ECOLOGY**
*Undergraduate*

The focus of this course is to read and critique classic papers in ecology and to connect their foundational ideas with modern research and understanding.

BIO 191, BIO 192, BIO 193 and BIO 215 are a prerequisite for this class.

**BIO 316**
**PHYCOLOGY**
*Undergraduate*

Introduction to algae with emphasis on taxonomy, morphology, ultrastructure, physiology, life histories of freshwater and marine species. Lecture-laboratory. Cross-listed as BIO 416.

BIO 193 is a prerequisite for this class.

**BIO 317**
**AQUATIC BIOLOGY**
*Undergraduate*

The study of biological, physical and chemical phenomena in freshwater environments. Emphasis on organisms and their ecology. Lecture-laboratory.

BIO 191, BIO 192, BIO 193 and BIO 215 are a prerequisite for this class.

**BIO 318**
**FIELD STUDIES IN MARINE AND ESTUARINE BIOLOGY**
*Undergraduate*

This course is designed for science majors with an interest in marine and estuarine biology and will examine this subject from an ecological perspective. The primary objectives of the course are: 1) to explore the diversity of marine and estuarine life; 2) to understand the manner in which physical and biological factors influence biological diversity in marine systems; 3) to understand the role that humans play in shaping these dynamics; and 4) to develop professional connections and gain real-life experiences in marine science.

BIO 191, BIO 192, BIO 193 and (BIO 215 or BIO 235) or instructor consent are a prerequisite for this class.

**BIO 320**
**MICROBIAL ECOLOGY**
*Undergraduate*

This course will explore key roles that microorganisms play in life on earth. This course will also address how these microorganisms are being used in current areas of research in microbiology. This is a lab course, which will enable students to study processes used in the enrichment, isolation, and identification of microorganisms from various environments.

BIO 210 and Junior standing are a prerequisite for this class.

**BIO 321**
**MOLECULAR METHODS IN ECOLOGY AND EVOLUTION**
*Undergraduate*

This course will provide hands-on experience in methods of detecting and analyzing molecular variation in nature. By the end of the course, students should be competent employing molecular markers to answer a wide variety of basic questions in ecology and evolution.

BIO 215 or BIO 235 is a prerequisite for this class.
BIO 325
PALEOBIOLOGY
Undergraduate
This lecture/laboratory course will introduce students to various principles of paleobiology and to provide a broad survey of important taxonomic groups. This course will cover topics such as: the concept of geologic time, evolution, extinction, morphology, taxonomic classification, fossilization, paleoecology, biogeography, and biostratigraphy. The laboratory portion of the course will reinforce the lecture topics and offer an opportunity to examine fossil specimens and compare them with modern forms.

BIO 192, BIO 193 and (BIO 215 or BIO 335) or instructor's consent are a prerequisite for this class.

BIO 330
DEVELOPMENTAL BIOLOGY
Undergraduate
A survey of developmental phenomena in animals from fertilization to sexual maturity. Students will gain a current understanding of the genetic, cellular, and environmental mechanisms that shape the body and its major organs.

BIO 250 and BIO 260 are a prerequisite for this class.

BIO 331
TOPICS IN DEVELOPMENTAL BIOLOGY
Undergraduate
This seminar course examines the current embryological literature using both evolutionary and molecular perspectives. Previous student-led topics include: how early embryos are organized, the signals controlling left-right asymmetry, the evolutionary origin of feathers and the development of the retina.

BIO 330 or 360 is a prerequisite for this class.

BIO 333
MYCOLOGY
Undergraduate
This course provides an opportunity for students to integrate their knowledge of cell biology, genetics, ecology and physiology at the organismal level by focusing on fungi. Students will gain an appreciation of the biological diversity within the major groups of fungi and their role in the environment, research and biotechnology. Lecture-laboratory.

BIO 215, BIO 250, and BIO 260 are a prerequisite for this class.

BIO 335
CONCEPTS IN EVOLUTION
Undergraduate
Study of evolution and diversity in the living world. Lecture only.

BIO 235 or (BIO 215 and BIO 260) are a prerequisite for this class.

BIO 339
CELLULAR NEUROBIOLOGY
Undergraduate
This course examines the cellular and molecular mechanisms of neuronal function and the changes that occur in processes such as learning and memory. Emphasis on electrophysiology, synaptic communication, and cellular signaling. Cross-listed as BIO439, NEU339, NEU439.

BIO 250 (or PSY 377 or HLTH 301) is a prerequisite for this class.

BIO 340
BEHAVIORAL NEUROSCIENCE
Undergraduate
Explores the organization of the nervous system on a gross anatomical level and based on functional units. The emphasis is on understanding how individual behaviors are produced by different neural systems and how these individual behaviors integrate into the activities of whole organisms. Formerly Systems Neurobiology. Cross-listed as BIO 440.

BIO 339 or BIO 310 or PSY 377 is a prerequisite for this class.
BIO 341
TOPICS IN NEUROBIOLOGY
Undergraduate
A seminar course examining current topics in neurobiology. Original readings will include both current review and classic neuroscience articles.

BIO 340 or BIO 339 or PSY 377 is a prerequisite for this class.

BIO 342
COGNITIVE NEUROSCIENCE
Undergraduate
This course explores the neuroscience of human behaviors such as emotions, attention, executive function, language, learning, memory, and social interaction by exploring both the underlying biological mechanisms and the psychological theories behind these behaviors. Cognitive Neuroscience is an emerging field of study that attempts to help one gain an understanding of the interdisciplinary nature of the human mind.

BIO 339 or BIO 340 or BIO 341 or PSY 377 is a prerequisite for this class.

BIO 345
TOPICS IN PALEOBIOLOGY
Undergraduate
A seminar course examining various topics in paleobiology (the study of ancient life) including morphological concepts, macroevolutionary processes, extinction events, phylogenetic systematics, paleocology, paleoebiogeography, and the adequacy of the fossil record. Readings include classic and recent articles in the fields of paleobiology.

BIO 192, BIO 193 and (BIO 215 or BIO 235) or instructor's consent are a prerequisite for this class.

BIO 347
TOPICS IN MEDICAL BACTERIOLOGY
Undergraduate
This course will address current topics of concern and research in medical bacteriology. Students participating in this course will explore key concepts used in bacterial pathogenesis and learn how to critically appraise recent research papers in the field.

BIO 210, BIO 250 and Junior/Senior Biology standing are prerequisites for this class.

BIO 348
THE BIOLOGY OF INFECTION
Undergraduate
This course will provide students with detailed knowledge of medically important bacteria. The course will first examine common events in infections and the body's responses to infection. We will highlight in these studies the changes in both hosts and pathogens as strategies of infection and immunity evolve relative to one another. Within this framework we will examine a spectrum of infectious diseases in detail.

BIO 210 and BIO 370 are a prerequisite for this class.

BIO 349
TOPICS IN MICROBIOLOGY AND BIOTECHNOLOGY
Undergraduate
This course will address current topics of concern and research in microbiology and biotechnology. Students participating in this course will explore fundamental concepts being used and new discoveries and emerging technologies in microbiology and biotechnology. Students will learn how to critically appraise recent research papers in these fields.

BIO 210 or BIO 220 is a prerequisite for this class.

BIO 350
ANIMAL ADAPTATIONS
Undergraduate
An introduction to the ecological concept of adaptation. Adaptation is defined and illustrated using specific animal examples. Discussion will focus on how these specializations in structure and function equip the animal for survival.

Status as a Biology major with Junior or Senior standing or consent of the instructor is a prerequisite for this class.
BIO 352  
ADVANCED COMPARATIVE PHYSIOLOGY  
Undergraduate  
Comparative and environmental approach to the functions and mechanisms of vertebrate organ systems. Selected topics will be addressed using a lecture/discussion/seminar format. Cross-listed as BIO 452.

BIO 310 or instructor consent is a prerequisite for this class.

BIO 354  
PROBLEMS IN CELL MOTILITY  
Undergraduate  
Analysis of contemporary problems in cellular movements, with emphasis on the biochemistry, biophysics and regulation of cell and organelle movements. Lecture, seminar, discussion.

BIO 250, (PHY 152 or PHY 172 or PHY 156) and (MAT 149 or MAT 152 or MAT 162 or MAT 172) are a prerequisite for this class.

BIO 355  
GENETIC TOXICOLOGY  
Undergraduate  
This course will deal with the study of agents that damage the genome or alter the proper functioning of the genome that can lead to disease in humans. Topics covered will include basic spectrum of genetic damage and chromosomal effects, mechanisms of mutations, DNA repair, genetic assays used for evaluation of genetic toxicology, health consequences of genetic damage, including cancer and inheritable mutations, and the current position of US government and global regulatory agencies on the issues of genetic toxicology.

BIO 260 is a prerequisite for this class.

BIO 360  
MOLECULAR BIOLOGY  
Undergraduate  
Study of biology at the molecular level, focusing on the regulation of gene expression and the principles of genetic engineering. Lecture-laboratory.

BIO 250, BIO 260, and (CHE 234 or CHE 238) are a prerequisite for this class.

BIO 361  
TOPICS IN MOLECULAR BIOLOGY  
Undergraduate  
Discussion and seminars in selected areas of molecular biology. Cross-listed as CHE 461.

BIO 360 is a prerequisite for this class.

BIO 362  
BIOINFORMATICS FOR BENCH SCIENTISTS  
Undergraduate  
Study how high-throughput technologies like whole-genome sequencing have changed biological research, and learn to use computers in real research tasks such as primer design, DNA sequencing, homology searches, sequence alignment, and more. Cross-listed with BIO 462.

BIO 191, BIO 192, BIO 193 and BIO 260 are a prerequisite for this class.

BIO 365  
PRINCIPLES OF TOXICOLOGY  
Undergraduate  
A study of the adverse effects of chemicals on living organisms, including the chemical natures, kinetics, dose-response relationships, metabolism, and mechanisms of action of various toxins and toxicants.

BIO 193 and (CHE 234 or CHE 238) are a prerequisite for this class.
**BIO 370**  
**IMMUNOBIOLOGY**  
**Undergraduate**  
Basic factors governing immune phenomena and antigen-antibody reactions. Lecture-laboratory. Cross-listed as BIO 471.

BIO 250 or BIO 260 is a prerequisite for this class.

**BIO 375**  
**INTRODUCTION TO PHARMACOLOGY**  
**Undergraduate**  
Introduction to Pharmacology will explore the relationships between an organism and its response to an administered drug. This will include:
1) How drugs are administered to the body  
2) What is their fate once in the body, i.e. Pharmacokinetics  
3) What their mechanisms actions are - i.e. Pharmacodynamics, and  
4) Adverse reactions to drugs.  
We will explore these relationships in different physiological systems of the human body including (but not limited to) the nervous system, circulatory system, digestive system and endocrine system. Lastly, this course will provide an understanding of the pharmaceutical system by providing a framework to explore how drugs are discovered, produced, tested, and regulated.

BIO 250 and 310 or instructor consent is a prerequisite for this class.

**BIO 380**  
**CANCER BIOLOGY**  
**Undergraduate**  
This course will explore the cellular and molecular aspects of cancer. Topics will include the pathology and epidemiology of cancer, the origin and spread of cancer, hereditary and familial cancers, cancer associated genes and strategies of cancer therapy.

BIO 250 and BIO 260 are a prerequisite for this class.

**BIO 381**  
**TOPICS IN CANCER**  
**Undergraduate**  
This course is a seminar based course that discusses current topics in the field of cancer biology from a cellular and molecular perspective. This course demonstrates the recent advances made in the most common cancers in the western world, toward etiology, diagnosis, therapy and prevention. Scientific articles taken from peer-reviewed scientific journals will illustrate available and potential chemotherapeutic approaches towards achieving a treatment for the most common cancers.

BIO 250 is a prerequisite for this class.

**BIO 385**  
**MAMMALIAN REPRODUCTION**  
**Undergraduate**  
Molecular, cellular, physiological, and behavioral aspects of mammalian reproduction. Mechanisms and strategies used by mammals in reproductive processes including sexual differentiation, gamete production, puberty, reproductive hormone cyclicity, neuroendocrine control mechanisms, pregnancy, parturition, and reproductive behavior. Cross-listed with BIO 485.

BIO 250 and BIO 310 or instructor consent are a prerequisite for this class.

**BIO 386**  
**INTRODUCTION TO ENDOCRINOLOGY**  
**Undergraduate**  
A study of hormones as chemical regulators of development, growth, metabolism, homeostasis, reproduction, response to stress, and behavior; as well as hormone synthesis, chemistry, mechanisms of action, and endocrine gland structure.

BIO 250, BIO 260 and BIO 310 are a prerequisite for this class.
BIO 389
RESEARCH IN FIELD BIOLOGY
Undergraduate
BIO 389/489 is a research-intensive course designed for science majors and graduate students that will focus on developing skills of collaborative field-based research. Throughout the course, students (working in groups of 2 or 3) will utilize the scientific method to develop and carry out an original research project. Students will utilize the primary literature to learn the current state of research in an area that interests them, then use that knowledge to develop a novel question they can test with a field-based experiment. Data collected will be analyzed and results compiled into a "publication quality" paper. Students will then present their study to their peers in the form of an oral or poster presentation.

BIO 206 and BIO 215 (or BIO 235 or BIO 310) are prerequisites for this class.

BIO 390
SPECIAL TOPICS
Undergraduate
Occasional courses offered at an advanced level. See the schedule of classes for current offerings. Cross-listed as BIO 490.

Junior or Senior standing is a prerequisite for this class.

BIO 392
EXTRAMURAL INTERNSHIP
Undergraduate
An opportunity for students to integrate their academic experience with real-world work situations; supervision is provided by a member of the DePaul Faculty in the Biological Sciences and the private or public enterprise. 0-4 credit hours.

At least Sophomore standing and a declared Biological Sciences major, or by arrangement with the Biology internship director or department permission are prerequisites for this class.

BIO 395
BIOLOGY CAPSTONE SEMINAR
Undergraduate
The aim of this course is to integrate current biological view(s) of humanity with the perspectives of the liberal studies curriculum. Students will develop and debate topics that demonstrate mastery of the biology core curriculum (cell biology, genetics, physiology and ecology) while touching on history, philosophy, ethics and the law.

BIO 399
INDEPENDENT STUDY
Undergraduate
independent Study. 1-4 quarter hours.

BIO 400
DEVELOPMENT OF TOPICS FOR RESEARCH
Graduate
The purpose of this course is to help graduate students in formulating research questions and design methods while improving written expression and oral presentation skills. Students will, with the guidance of a faculty member, undertake a detailed investigation of a topic, formulate a potential research project in that area, and present their proposal orally to the faculty at the end of the quarter.

BIO 401
INDEPENDENT STUDY
Graduate
Two or four quarter hours. Experimental and/or Library study of selected topics in the life sciences. A-Cell Biology, B-Immunobiology, C-Developmental Biology, D-Physiology, E-Endocrinology, F-Genetics, G-Structural Biology, H-Ecology, I-Molecular Biology, J-Neurobiology. Offered in the Autumn, Winter, Spring and Summer quarters. Two or four quarter hours.
BIO 402
INTRODUCTION TO GRADUATE STUDIES
Graduate
Presents the biology faculty and facilities. Various research and teaching methods in biology will be explored. Required of all graduate students. Formerly BIO 495

BIO 403
DEVELOPMENT OF TOPICS FOR RESEARCH
Graduate
The purpose of this course is to help graduate students in formulating research questions and design methods while improving written expression and oral presentation skills. Students will, with the guidance of a faculty member, undertake a detailed investigation of a topic, formulate a potential research project in that area, and present their proposal orally to the faculty at the end of the quarter. Formerly BIO 400

BIO 409
PLANT PHYSIOLOGY
Graduate

BIO 412
TOPICS IN EXERCISE PHYSIOLOGY
Graduate
This course provides an introduction to exercise physiology to enable exploration of current research topics in the field. Weekly discussion and presentation of articles from peer-reviewed journals will reinforce and elaborate on concepts covered in lecture. Topics include: muscle structure and bioenergetics, cardiovascular and respiratory responses to exercise, human evolution and endurance, training and adaptation, nutrition and ergogenic aids, and the relationships between exercise, health, and longevity.

BIO 415
TOPICS IN ECOLOGY
Graduate
The focus of this course is to read and critique classic papers in ecology and to connect their foundational ideas with modern research and understanding.

BIO 416
PHYCOLOGY
Graduate
Introduction to algae with emphasis on taxonomy, morphology, ultrastructure, physiology, life histories of freshwater and marine species. Lecture-laboratory.

BIO 417
AQUATIC BIOLOGY
Graduate
The study of biological, physical and chemical phenomena in fresh water and marine environments. Emphasis on organisms and their interactions. Lecture-laboratory.

BIO 420
MICROBIAL ECOLOGY
Graduate
This course will explore key roles that microorganisms play in life on earth and how they are being used in biotechnology. This is a lab course, which will enable students to study processes used in the enrichment, isolation, and identification of microorganisms from various environments.
BIO 421
MOLECULAR METHODS IN ECOLOGY AND EVOLUTION
Graduate
This course will provide hands-on experience in methods of detecting and analyzing molecular variation in nature. By the end of the course, students should be competent employing molecular markers to answer a wide variety of basic questions in ecology and evolution. Cross-listed with BIO 321.

BIO 425
CELLULAR EVENTS IN THE IMMUNE RESPONSE
Graduate
Analysis of cellular and subcellular interactions in the immune response. Lecture, seminar, discussion. BIO 470 recommended.

BIO 430
DEVELOPMENTAL BIOLOGY
Graduate
A survey of developmental phenomena in animals from fertilization to sexual maturity. Topics include gametogenesis, early cell divisions, organ formation, metamorphosis, regeneration, birth defects, stem cells, reproductive technology and mammalian cloning. Lecture-laboratory.

BIO 431
TOPICS IN DEVELOPMENTAL BIOLOGY
Graduate
This seminar course examines the current embryological literature using both evolutionary and molecular perspectives. Previous student-led topics include: how early embryos are organized, the signals controlling left-right asymmetry, the evolutionary origin of feathers and the development of the retina. BIO 430 or BIO 460 recommended.

BIO 433
MYCOLOGY
Graduate
This course provides an opportunity for students to integrate their knowledge of cell biology, genetics, ecology and physiology at the organismal level by focusing on fungi. Students will gain an appreciation of the biological diversity within the major groups of fungi and their role in the environment, research and biotechnology. Lecture-laboratory.

BIO 435
CONCEPTS IN EVOLUTION
Graduate
Study of evolution and diversity in the living world. Lecture only.

BIO 439
CELLULAR NEUROBIOLOGY
Graduate
This course examines the cellular and molecular mechanisms of neuronal function and the changes that occur in processes such as learning and memory. Emphasis on electrophysiology, synaptic communication, and cellular signaling. Cross-listed as BIO439, NEU339, NEU439.

BIO 440
BEHAVIORAL NEUROSCIENCE
Graduate
An examination of the ways in which neural systems underpin behavior with an emphasis on vertebrates. In this course, behavior is understood in its broadest sense, from the functioning of organs and organ systems to the activities of whole organisms. Formerly Systems Neurobiology. Lecture-Laboratory.

BIO 441
TOPICS IN NEUROBIOLOGY
Graduate
A seminar course examining current topics in neurobiology. Original readings will include both current review and classic articles in the fields of neurobiology, neuroethology and the related neurosciences. BIO 439 or BIO 440 is recommended.
BIO 442
COGNITIVE NEUROSCIENCE
Graduate
This course explores the neuroscience of human behaviors such as emotions, attention, executive function, language, learning, memory, and social interaction by exploring both the underlying biological mechanisms and the psychological theories behind these behaviors. Cognitive Neuroscience is an emerging field of study that attempts to help one gain an understanding of the interdisciplinary nature of the human mind.

BIO 445
TOPICS IN PALEOBIOLOGY
Graduate
A seminar course examining various topics in paleobiology (the study of ancient life) including morphological concepts, macroevolutionary processes, extinction events, phylogenetic systematics, paleoecology, paleobiogeography, and the adequacy of the fossil record. Readings include classic and recent articles in the fields of paleobiology.

BIO 447
TOPICS IN MEDICAL BACTERIOLOGY
Graduate
This course will address current topics of concern and research in medical bacteriology. Students participating in this course will explore key concepts used in bacterial pathogenesis and learn how to critically appraise recent research papers in the field.

BIO 448
THE BIOLOGY OF INFECTION
Graduate
This course will provide students with detailed knowledge of medically important bacteria. The course will first examine common events in infections and the body's responses to infection. We will highlight in these studies the changes in both hosts and pathogens as strategies of infection and immunity evolve relative to one another. Within this framework we will examine a spectrum of infectious diseases in detail. BIO 470 is recommended.

BIO 449
TOPICS IN MICROBIOLOGY AND BIOTECHNOLOGY
Graduate
This course will address current topics of concern and research in microbiology and biotechnology. Students participating in this course will explore fundamental concepts being used and new discoveries and emerging technologies in microbiology and biotechnology. Students will learn how to critically appraise recent research papers in these fields.

BIO 450
PROBLEMS IN CELL MOTILITY
Graduate
Analysis of contemporary problems in cellular movements, with emphasis on the biochemistry, biophysics and regulation of cell and organelle movements. Lecture, seminar, discussion.

BIO 452
ADVANCED COMPARATIVE PHYSIOLOGY
Graduate
Comparative and environmental approach to the function and mechanisms of vertebrate organ systems. Selected topics in comparative physiology will be addressed using a lecture/discussion/seminar format.

BIO 455
GENETIC TOXICOLOGY
Graduate
This course will deal with the study of agents that damage the genome or alter the proper functioning of the genome that can lead to disease in humans. Topics covered will include basic spectrum of genetic damage and chromosomal effects, mechanisms of mutations, DNA repair, genetic assays used for evaluation of genetic toxicology, health consequences of genetic damage, including cancer and inheritable mutations, and the current position of US government and global regulatory agencies on the issues of genetic toxicology.

BIO 260 is a prerequisite for this class.
BIO 460
MOLECULAR BIOLOGY
Graduate
Study of biology at the molecular level, focusing on the regulation of gene expression and the principles of genetic engineering. Lecture-laboratory. Cross-listed as BIO 360.

BIO 461
TOPICS IN MOLECULAR BIOLOGY
Graduate
Discussion and seminars in selected areas of molecular biology.

BIO 462
BIOINFORMATICS FOR BENCH SCIENTISTS
Graduate
Study how high-throughput technologies like whole-genome sequencing have changed biological research, and learn to use computers in real research tasks such as primer design, DNA sequencing, homology searches, sequence alignment, and more. Cross-listed with BIO 362.

BIO 465
PRINCIPLES OF TOXICOLOGY
Graduate
A study of the adverse effects of chemicals on living organisms, including the chemical natures, kinetics, dose-response relationships, metabolism, and mechanisms of action of various toxins and toxicants.

BIO 471
IMMUNOBIOLOGY
Graduate
Basic factors governing immune phenomena and antigen antibody reactions. Lecture-laboratory.

BIO 475
INTRODUCTION TO PHARMACOLOGY
Graduate
Introduction to Pharmacology will explore the relationships between an organism and its response to an administered drug. This will include: 1) How drugs are administered to the body 2) What is their fate once in the body, i.e. Pharmacokinetics 3) What their mechanisms actions are - i.e. Pharmacodynamics, and 4) Adverse reactions to drugs. We will explore these relationships in different physiological systems of the human body including (but not limited to) the nervous system, circulatory system, digestive system and endocrine system. Lastly, this course will provide an understanding of the pharmaceutical system by providing a framework to explore how drugs are discovered, produced, tested, and regulated. Cross-listed with BIO 375.

BIO 480
CANCER BIOLOGY
Graduate
This course will explore the cellular and molecular aspects of cancer. Topics will include the pathology and epidemiology of cancer, the origin and spread of cancer, hereditary and familial cancers, cancer associated genes and strategies of cancer therapy.

BIO 481
TOPICS IN CANCER
Graduate
This course is a seminar based course that discusses current topics in the field of cancer biology from a cellular and molecular perspective. This course demonstrates the recent advances made in the most common cancers in the western world, toward etiology, diagnosis, therapy and prevention. Scientific articles taken from peer-reviewed scientific journals will illustrate available and potential chemotherapeutic approaches towards achieving a treatment for the most common cancers.
MAMMALIAN REPRODUCTION
Graduate
Molecular, cellular, physiological, and behavioral aspects of mammalian reproduction. Mechanisms and strategies used by mammals in reproductive processes including sexual differentiation, gamete production, puberty, reproductive hormone cyclicity, neuroendocrine control mechanisms, pregnancy, parturition, and reproductive behavior. Cross-listed with BIO 385.

INTRODUCTION TO ENDOCRINOLOGY
Graduate
A study of hormones as chemical regulators of development, growth, metabolism, homeostasis, reproduction, response to stress, and behavior; as well as hormone synthesis, chemistry, mechanisms of action, and endocrine gland structure.

ADVANCED ENDOCRINOLOGY
Graduate
Analysis of non-hypothalamic-hypophyseal pathways for hormonal regulation of the structure, function and biochemistry of hard tissues, calcium metabolism, and regulation of glucose metabolism. Lecture-seminar. BIO 486 is recommended.

RESEARCH IN FIELD BIOLOGY
Graduate
BIO 389/489 is a research-intensive course designed for science majors and graduate students that will focus on developing skills of collaborative field-based research. Throughout the course, students (working in groups of 2 or 3) will utilize the scientific method to develop and carry out an original research project. Students will utilize the primary literature to learn the current state of research in an area that interests them, then use that knowledge to develop a novel question they can test with a field-based experiment. Data collected will be analyzed and results compiled into a publication quality paper. Students will then present their study to their peers in the form of an oral or poster presentation.

SPECIAL TOPICS
Graduate
Occasional courses offered at the graduate level. See schedule for current offerings.

MASTER OF ARTS SEMINAR
Graduate
A seminar course dealing with current readings in the biological sciences. Students will evaluate and interpret these readings both orally and in writing.

COMMUNICATING SCIENCE
Graduate
Students will refine their oral and written presentation skills using their own research as the subject. The components of an effective research talk, poster presentation, and formal thesis will be examined. Students will have several opportunities to present their research and to receive and participate in peer review. This course is required for second year Biology MS students.

INTRODUCTION TO GRADUATE STUDY
Graduate
Presents the biology faculty and facilities. Various research and teaching methods in biology will be explored. Required of all graduate students.
**BIO 496**
*Research*
*Graduate*
Experimental work in selected areas of biology. These studies do not necessarily relate to a thesis. Autumn, Winter, Spring, Summer. Laboratory. Two or four quarter hours.

**BIO 498**
*Research for Master's Thesis*
*Graduate*
Original study of a specific biological problem leading to a thesis.

**BIO 499**
*Thesis Research*
*Graduate*
Original study of a specific biological problem leading to a thesis. Formerly BIO 496, BIO 498.

**BIO 500**
*Seminar*
*Graduate*
Non-credit. Presentation, throughout the academic year, of their research by practicing scientists from a variety of institutions. Required of first year graduate students.

**BIO 501**
*Seminar Continuation*
*Graduate*
Non-credit. Presentation, throughout the academic year, of their research by practicing scientists from a variety of institutions. Required of second year graduate students.

**BIO 502**
*Candidacy Continuation*
*Graduate*
Students who have completed their coursework but who must take extra time to complete the requirements for the Master's thesis (MS), or final project (MA), must enroll in candidacy continuation each quarter of the academic year until the Master's requirement has been completed. This course carries part-time student status. Non-credit.

**BIO 503**
*Candidacy Maintenance*
*Graduate*
Placeholder course for students NOT actively working on their thesis. This course is meant only to maintain university student status, it will not give the student full- or part-time student status and will not permit deferment of student loans. Non-credit.

**BLW 201**
*Legal & Ethical Aspects in the Business Environment*
*Undergraduate*
Legal and Ethical Aspects in the Business Environment. Study of the nature and philosophy of law including ethical perspectives and fundamental concepts and legal principles of sales contracts, product liability, business organizations, and employment law including ethical and social responsibilities in the managerial process.

Sophomore standing is a prerequisite for this class.
BLW 202
COMMERCIAL PAPER AND SALES
Undergraduate
History of negotiable instruments and sales law from the days of the Law Merchant through Articles II and III of the Uniform Commercial Code; discussions of promissory notes, drafts, sales, bulk sales, and recent trends.

BLW 201 or ACC 370 is a prerequisite for this class.

BLW 203
BUSINESS ORGANIZATIONS
Undergraduate
Types of business organizations; emphasis on Partnership and Corporation. Relations of parties to one another, and to third parties; comparisons between the two types and mechanics of forming and operating each.

BLW 201 or ACC 370 is a prerequisite for this class.

BLW 398
SPECIAL TOPICS
Undergraduate
Content and format of this course are variable. An in-depth study of current issues in legal studies. Subject matter and prerequisites will be indicated in class schedule.

BLW 201 is a prerequisite for this class.

BLW 399
INDEPENDENT STUDY
Undergraduate
Independent Study. Available to students of demonstrated capability for intensive independent work in business law. (variable credit)

Junior standing with at least 88 cumulative units is a prerequisite for this class.

BLW 500
LEGAL AND ETHICAL ENVIRONMENT
Graduate
This is an introduction to the nature and sources of law, including an analysis of ethical perspectives present in the judicial process. Students will learn how legal and ethical issues influence the decision-making process of managers. Students will explore the relationship between personal values and business decisions, and whether there exists a social responsibility of managers. This course will cover legal concepts relevant to business including basic concepts of public law (constitutional and administrative law) and private laws (sales and product liability). Students will examine business organizations and issues in employment law.

MS in Taxation and MACC students are restricted from registering for this class.

BLW 508
LEGAL ASPECTS OF BUSINESS-TOTAL PERSPECTIVE FOR THE EXECUTIVE
Graduate
Personal and professional legal liability of officers and directors has received considerable attention in recent years, thus highlighting the need for a view of the totality of his or her legal environment. It demands an integrated understanding and planning of the reciprocal aspects of his or her legal, social and ethical responsibilities and rights encountered in his or her office, outside and at home. From the end of the spectrum focusing on possible criminal and civil liabilities to the personal responsibilities of proper estate planning; the “socio-legal world of the executive” is presented. Successful completion of BLW 500 is recommended prior to registration for this course.

BLW 798
SPECIAL TOPICS
Graduate
Content and format of this course are variable. Subject matter will be indicated in class schedule.
BLW 799
INDEPENDENT STUDY
Graduate
Available to graduate students of demonstrated capability for intensive independent work in business law.

CCA 121
ART AND MEMORY: SCRAPBOOKING
Undergraduate
Art is appreciated in various forms. In homes all over America, dining room tables are filled with tiny metal hearts, pictures of adorable toddlers, bags of stickers, and 500 varieties of lettering. Scrapbooking is one of the nation's fastest growing artistic leisure time activities. Millions of dollars are invested in this peculiar pastime that focuses on not only recording family events, but making them pretty as well. Most of us do not consider ourselves artists, but give us a pair of scissors and some fancy paper and we will create an artistic masterpiece! Students in this experience will learn about the history of scrapbooks and will begin the process of decoding the relationships of creativity, art, and craft in this pursuit that is sweeping the nation. Topics will include the definition of scrapbooking and its development in American culture; the ways in which art and craft intersect in the scrapbook; how to get started with a scrapbook; the nature of creativity and its impact in scrapbooking; and the construction of meaningful works of art and craft. This course will meet on campus and online via D2L. (2 quarter hours)

Status as a Decision Analytics or Degree Completion student is a prerequisite for this class.

CCA 143
ROOTED IN THE CITY: WRITERS & WRITING IN CHICAGO
Undergraduate
Who are the writers rooted in Chicago? What were and are their concerns, themes, styles? How can they teach us about the city, but also about writing? In this class, students will read, discuss and write about work written by such Chicago writers as Nelson Algren, Gwendolyn Brooks, Stuart Dybek, Sandra Cisneros, Studs Terkel, Marc Smith, and Mike Royko. We will consider the nature of civic engagement and creativity in the literary arts, as well as pay close attention to the formal elements of the poems, short stories, and essays read in this class. We'll also explore how these texts compel us to think about power and its circulation in cultural as well as social contexts.

Status as a Decision Analytics or Degree Completion student is a prerequisite for this class.

CCA 153
THE ART OF SPEECHMAKING
Undergraduate
In our class, students will use tools based in the imagination, principles of design, and standard dramatic practice to create a unique, personal experience for an audience. The criteria for success is established through an examination of and critique of the content goals. (2 quarter hours) Speech, whether we call it dramatic or declamatory, has the potential to move the masses. In this course, our students will discover their personal approaches and attributes, and construct effective presentations that harness the power of their voice and body.

Status as a Decision Analytics or Degree Completion student is a prerequisite for this class.

CCA 168
ART AND MEMORY SCRAPBOOKING II: THE ART JOURNAL
Undergraduate
This is the second course on the art and craft of scrapbooking offered in the SNL curriculum. This course focuses on a specific aspect of the scrapbooker’s art, the production of embellished personal diaries. Throughout this experience, students will critically examine the artistic aspects of journaling and collage artwork, investigate movements in the art world, chronicle events in their lives through photographs and narrative, and create works of art and craft that illustrate the experience. This is a hands on art making course. While faculty will discuss various techniques and information about assessing works of art and putting them in the context of art movements, students should expect to be introduced to art making materials and to use them during class time. (2 quarter hours)

Status as a Decision Analytics or Degree Completion student is a prerequisite for this class.
CCA 170
CREATIVITY AND ENTREPRENEURSHIP
Undergraduate
IPads. Smart Phones. The automobile. These inventions, once unknown and now taken for granted, required years of imagining, experimentation and innovative thinking. While we value the end product, we are often uncomfortable with the creative/creating process. This process of imagining, conceptualizing and articulating the new requires skills we often label `creative?. This class will explore the role of creativity in the development of entrepreneurial skills and the entrepreneurial personality. Creativity in this course will be seen both as a learned skill and as an exploration of our intuition. Contemporary ideas about creativity are often tied to images of the past - from mad scientists to mystical muses. But modern science tells us something else about the creative mind. This course will explore contemporary approaches to the creative process based on the human capacity to imagine, to explore and, ultimately, to create. These are core skills for anyone pursuing a career as an entrepreneur or simply in search of ways to explore innovation. (2 quarter hours)

Status as a Decision Analytics or Degree Completion student is a prerequisite for this class.

CCA 172
MAKING POEMS: AN INTRODUCTION TO VERSE
Undergraduate
Making poems will be a creative writing offering that teaches metrics and verse forms, poetry the old-fashioned way. Topics will include metric feet, rhyme, lines, and verse forms. For example, students will learn about the iambic foot, write some iambic lines of various lengths, and finally use the iambic line to write a sonnet. Rap poetry with its structured rhythms and elaborate rhyming is another possibility. This "formalist" approach promotes a kind of creativity that is strongly infused with craft and discipline in contrast to the "spoken word" or confessional approaches to making poems. This class involves making audio recordings of your poems; students will be required to purchase a headset/microphone and download and install free software.

Status as a Decision Analytics or Degree Completion student is a prerequisite for this class.

CCA 181
CREATING ORIGINAL DIGITAL ART
Undergraduate
The course will focus on electronic visual art, and because of the amount of material to be covered, will not include audio or animation art. Student will look at what constitutes "art", then look at how original art could be created using technological tools, such as Microsoft Paint, Pixel-based art, such as Microsoft Graphics in PowerPoint; Digital Photography and PhotoShop; digital short-movies, and Digital Animation using Freeware GIF Animation software.

Status as a Decision Analytics or Degree Completion student is a prerequisite for this class.

CCA 185
THE BEATLES AND THE CREATIVE PROCESS
Undergraduate
The Beatles are significant in many ways: they were an unprecedented show business phenomenon; they were leaders of Sixties cultural rebellion; and they stand, for many, as a signal instance of popular entertainment attaining the status of high art. This course will examine the musical craftsmanship of the Beatles, focusing on their work as songwriters and record makers. Recent audio and print releases documenting the group's performing and recording history provide a unique and detailed glimpse of the Beatles' creative process. We will utilize these materials to closely trace the development of the group's work while using other resources to place it in a larger historical and cultural context. The goal is to shed critical light on this recent chapter in cultural history. That discussion will, in turn, highlight questions about creativity in a modern context where commerce vies with art, technology redefines performance and an emerging global village culture transforms concepts of originality and tradition.

Status as a Decision Analytics or Degree Completion student is a prerequisite for this class.

CCA 196
WRITENOW: SNL WRITING MARATHON
Undergraduate
Anne Lamott said that the most important ingredient for writing is the act of "sitting". In this course, students will focus on this seemingly simple act of the creative process. The focus of the course is on the generation of written material: the quantity rather than the quality. As such, students choose their own fiction or nonfiction writing topic(s) and project, and may use the material they create in a later effort (ILP, AP, etc.) To kick off one session, a group of professional writer panelists will reflect on their own creative processes as they have developed their latest works. (2 quarter hours)

Status as a Decision Analytics or Degree Completion student is a prerequisite for this class.
CCA 215
FILM NOIR
Undergraduate
In this course we will screen and discuss select noir films and develop skills of viewing and analyzing them closely. Highlighted topics will include the concept of genre in film; the relationship of genre codes to creativity; the dynamics of form and content; the tension between commerce and art; the auteur theory; psychologies of the divided self; representations of masculinity and femininity; and the question of what these films say about American society, post-World War II. (2 quarter hours)

Status as a Decision Analytics or Degree Completion student is a prerequisite for this class.

CCA 219
SPACE, SPIRITUALITY, AND HUMAN IDENTITY
Undergraduate
The course will examine the architecture and context of the sacred spaces of the ancient and medieval world. Different perspectives will be used to study the spaces, including art historical, historical, anthropological and religious. This class will look at how sacred spaces are affected by a variety of factors in each society. These include the religious and social beliefs of the society, the availability of materials, the technical skills of the artists and builders and the world view of the people. Students will also consider how these issues are manifested in our own culture and how they are seen and experienced in their individual lives. The class will use multimedia resources to experience the monuments more fully.

Status as a Decision Analytics or Degree Completion student is a prerequisite for this class.

CCA 225
GREAT MUSIC IN CHICAGO
Undergraduate
The course introduces people to three of the most exciting and rewarding institutions in Chicago music: the world-famous Chicago Symphony Orchestra at Symphony Center downtown; the fabulous training orchestra of the Chicago Symphony Orchestra, known as the Civic Orchestra, also downtown; and live top-name jazz at the Jazz Showcase. We learn the background of these institutions, the nature of the arts they perform, and the terms used to describe and appreciate those forms. Most importantly, we experience, in person, the great music that they play!

Status as a Decision Analytics or Degree Completion student is a prerequisite for this class.

CCA 230
MEMOIRS: A JOURNEY FROM THE INSIDE OUT
Undergraduate
Socrates famously said, "The unexamined life is not worth living for a human being." Join Carolyn and Caralyn, who believe there is nothing more compelling than the well-told story of a person's life, to examine a portion of yours. In this class, as a community of learners, we will explore the creative process, consider principles of memoir-writing styles, and assess how human experience and transformative events drive the construction of a personal philosophy. Course prerequisite: curiosity. Class sessions will revolve around reading, writing, and telling. We will read and discuss excerpts from full-book memoirs to understand how everyone has a sense of being "other" in the world, while still being connected to the greater human experience. We will write in a structured format, both in-class and individually, to learn how to focus the lens of memory onto specific life experiences. Peer editing, using guided techniques to give constructive feedback, will enable all students, regardless of their starting point, to become better writers. At the end of the course, we will tell the stories that have been written as we partner our small learning community with a larger community organization. The final take-away of sharing will be a class memoir in the form of an e-book to which everyone contributes.

Status as a Decision Analytics or Degree Completion student is a prerequisite for this class.

CCA 254
RESISTANCE DURING THE HOLOCAUST AND WORLD WAR II
Undergraduate
This course explores the history of the Holocaust in the context of the Second World War (1939-1945) with a central focus on examples of resistance to discrimination, fascism and oppression. We will explore varied forms of opposition including armed resistance, spiritual resistance, resistance through writing and identity preservation. We will read autobiographies, view documentary and dramatic films, and use museum resources to develop our understanding of resistance. Required activities include a visit to the Illinois Holocaust Museum and Education Center (Skokie, IL). We will also consider the implications of this history for making ethical choices in our world today.

Status as a Decision Analytics or Degree Completion student is a prerequisite for this class.
CCA 260
CREATIVITY AND THE WRITER’S TOOLBOX
Undergraduate
For writers, no matter how new or experienced they may be, there's always a need to 'self-renew'. Every blank page is an invitation to enhance one's writing asset, for with each blank page or new assignment the writing process begins again. What, then, are the tools successful writers use to enhance their writing abilities, sustain their momentum, refresh their creativity and renew their resolve? What writing tools are better suited for creative writing, business writing, journaling, or memoir? What tools do we already have that may only need repurposing or remembering?

Status as a Decision Analytics or Degree Completion student is a prerequisite for this class.

CCA 271
THE ART OF PAPERMAKING
Undergraduate
Paper is everywhere. We use it to read about the latest news, to wrap birthday presents, and to leave ourselves little sticky reminders. You can find paper almost anywhere and chances are, you have a lot of it lying around your house, lurking in drawers and clogging up your recycling bin. It is one of those commodities that we take for granted. Can paper be art? Can it be the result of creative thinking? Can it be beautiful? Learners in this experience will learn about paper and its history, and will participate in the ancient art of papermaking. While examining the definitions of art and creativity, students will experiment with papermaking techniques, and will create their own works of paper art. The Art of Papermaking focuses on creative processes and art making. This will be, necessarily, an experiential process. Most of the class time will be taken up with experimenting with art materials and with employing the roles of color and design in works of art. Students should prepare by wearing old clothes to class and should expect to get their hands dirty. (2 quarter hours)

Status as a Decision Analytics or Degree Completion student is a prerequisite for this class.

CCA 299
ETHICAL ISSUES IN BIOMEDICINE AND HEALTH
Undergraduate
Should parents be allowed to genetically 'engineer' designer babies? Given the rapid pace of developments in genetic engineering, this capacity is eminent. Emerging technological capacities in a variety of arenas are creating a host of social questions and potential ethical implications: What are the ethical issues associated with accelerating accumulation of health data? Do pharmaceutical companies have a moral obligation to expand global access to life-saving AIDS drugs? Given our ever-unfolding understanding of the human brain, what regulatory concerns ought to accompany the rollout of new, powerful brain-based biotechnologies? Which methods and approaches are needed to make sense of the impact of science and technology on people's lives worldwide? This course is both an introduction to bioethics, -- an area concerned with moral questions related to health, medicine and society -- as well as a reflection upon the ethical and social implications of rapidly emerging technological and scientific capacities. In this course, learners will learn and use ethical theories to consider and analyze general bioethical issues with special attention paid to the unique challenges that emerge as a result of rapid advancements in scientific and technological knowledge. While this course is housed in the School for New Learning (SNL), it is also cross-listed with DePaul University's department of public health. For graduate students taking this course for credit, there is an additional assessment required, specified in the syllabus section below. This course will also require students to deploy and hone critical thinking skills, writing-related capacities as well as reasoning skills.

Status as a Decision Analytics or Degree Completion student is a prerequisite for this class.

CCA 366
EXPRESSING YOURSELF THROUGH PAINT
Undergraduate
This course will focus on painting as a form of visual expressions and provide opportunities to explore the media of painting and the aesthetics behind why people paint. Students will study the history of painting through selected works, learn how to analyze and critique a painting and use watercolors and acrylic paints to explore the media. A field trip to the Art Institute of Chicago is required.

Status as a Decision Analytics or Degree Completion student is a prerequisite for this class.
CCA 367
EXPRESSIVE ARTS THERAPY
Undergraduate
This course offers a multi-arts approach in which different art modalities are woven into the therapeutic process as appropriate to a client's situation. It is grounded not in any particular techniques or media but in the capacity of the arts to respond to human suffering. Various arts--poetry, movement, drawing, painting, journaling, improvisation, music, and sculpture--are used in a supportive setting to facilitate growth and healing. Expressive arts processes have been used successfully in almost all psychotherapeutic contexts, ranging from work with the severely ill to the facilitation of human growth and potential. There is a growing use of the arts in health education, hospice work, and in community art projects especially after catastrophic events. The class will be conducted in a workshop format in which theoretical content will be combined with experiential learning. Lecture, discussion, audio-visual presentation, experiential exercise, guest speakers, and field trips comprise the structure of the class.

Status as a Decision Analytics or Degree Completion student is a prerequisite for this class.

CCA 396
INTRODUCTION TO ART THERAPY
Undergraduate
This experiential class in will introduce students to concepts of art therapy and other expressive arts. It will address the therapeutic use of art making by people who experience illness, trauma, or challenges in living, as well as by people who seek personal development and general well being. By participating in expressive arts activities and reflecting on the products and processes, students will learn how art therapy can help people increase awareness of self and others, cope with symptoms, stress, and traumatic experiences; enhance cognitive abilities; and enjoy the life-affirming pleasures of making art.

Status as a Decision Analytics or Degree Completion student is a prerequisite for this class.

CCH 112
EXPLORING SUCCESS TECHNIQUES FOR ENHANCING CAREER SKILLS
Undergraduate
This course will address challenges that individuals encounter as they seek to advance in the job market as well as the problems faced within the workplace. The purpose of the course is to refresh and increase your effectiveness and preparation as a job seeker in your chosen field. The course will cover areas such as resume and cover letter writing, interviewing techniques, and effective job searches. Meets first five weeks of the quarter. May only be taken for one competence. (2 quarter hours)

Status as a Decision Analytics or Degree Completion student is a prerequisite for this class.

CCH 116
PSYCHOLOGY OF MALE DEVELOPMENT
Undergraduate
This course focuses on the development of boys from infancy through adulthood within socio-cultural context. We therefore address in addition to gender, the impact of race, ethnicity, class and related issues of societal/governmental failures when it comes to non-voting children. We cover why boys have more trouble at school, more problems with anger, and more incarcerations than girls or boys of higher social class, but our focus will be on their capacities and how those in power can help them thrive rather than present obstacles in their path from birth onwards. In my work in Chicago schools from Englewood to Rogers Park, I found young boys and teens very capable of caring and empathy but not reinforced by adults to develop these skills. This course suggests ways to change that and help teachers, parents and society not stereotype boys or give up on them so early in life. We will focus on how boys can develop fully as men of character and care, who can succeed in relationships, as parents, at work and in their community. We will learn of advocacy work to convince society to improve the conditions in which boys live. We draw upon the work of the Search Institute, the book ?The men they will become? by Eli Newberger (free online) and other current research. We will view workshops including feminist Judith Jordan's "Raising competent and connected boys" and learn of local and national efforts to support young boys development.

Status as a Decision Analytics or Degree Completion student is a prerequisite for this class.
Effective coaching has long been recognized as a key element of success in the world of sports. More recently, a new breed of coaches has emerged to help people transform their personal and professional lives. In this course, we will explore the theories, concepts, and techniques of personal life and business coaching. Students will learn about the history of coaching, its uses in personal and professional development and practical applications. Working individually, in pairs, and in small groups, students will practice coaching skills and keep a detailed learning journal. This course will be highly experiential and collaborative in nature. Students will learn concepts of coaching for personal development and professional effectiveness. (2 quarter hours)

Status as a Decision Analytics or Degree Completion student is a prerequisite for this class.

This course provides students with the opportunity to apply a wide range of theories about family communication to an experience common to all-family life. Through this course, students will gain an understanding of how communication functions to develop, maintain, enrich, or limit family relationships across a wide range of family structures and cultural backgrounds. Among the family relationship issues considered in this course are patterns of intimacy, power, decision-making, roles, rituals and conflict. Factors involved in forming family patterns (e.g. gender, ethnicity, family diversity and family stories) will also be covered.

Status as a Decision Analytics or Degree Completion student is a prerequisite for this class.

What is organizational culture? Culture is the way things are done in the organization, a system of shared symbols and a variable that focuses on causality. In this course, you will examine what organizational culture is and how knowledge of culture provides a way for gathering information to help leaders/managers improve organizational performances. This course provides a hands-on approach to learning to "read" organizational cultures and using that cultural knowledge in symbolic management, training, organizational change, building effective teams, supporting diversity, and unleashing creativity. In terms of cultural analysis, through this course, you will be introduced to qualitative research methods, field observation, interviewing, qualitative surveys, content analysis, and other methods of textual analysis. The textbook is an applied workbook to supplement and apply organizational theory. It answers two central questions: How to understand the intangible culture that is so important to working in an organization, and how to use this cultural information. Finally, you will have a chance to transform theories into practice.

Status as a Decision Analytics or Degree Completion student is a prerequisite for this class.

In this course, we will learn about the concepts of race, class and gender and how these intersect to shape Chicago Latinos' experiences. While we will learn about the inequities that Latinos have experienced, we will also explore this community's struggle for social justice and its efforts to create a voice for itself in Chicago. We will conclude this course by exploring how Latinos/as are building new political, theoretical, economic, artistic, and spiritual pathways toward wholeness and justice. For example, we will explore some of the cultural and political projects of this community and the many groups that comprise it. We will learn about these themes and address questions through readings, class lectures and discussions, guest lectures, documentary films and field trips. Field trips to Latino Chicago communities such as Pilsen and Humboldt Park will take place during class time.

Status as a Decision Analytics or Degree Completion student is a prerequisite for this class.
CCH 190
**LAW IN AMERICA: ITS HISTORY AND RELEVANCE IN TODAY’S WORLD**
*Undergraduate*

This course is designed to enhance students’ awareness of how critical American law is for their personal, professional, and community life. The purpose is to help students achieve a better grasp of current realities through understanding of the history, the structure, and inherent problems of the American legal system. The course will discuss the role of lawyers and the public in the legal process (e.g. the role of civil rights groups and lobbyists in forming laws). It will begin with the colonial underpinnings and the essentially Western and British foundations of the American legal institutions. There will be some discussion of alternative legal systems. It will then review the American Constitution, the nature of a federal system, and specific topics in American law. These topics will include the basic rights in our system, and the law as it has evolved in dealing with race (“the strange career of Jim Crow”), speech (free and otherwise), labor (its rough course), criminality and its outcomes, religion (how religious is the law), and business regulation (how much can we trust antitrust). The course will be relevant for students interested in the law as a career, the law in the workplace, the law in not-for-profit settings, and those generally interested in the law in business contexts, as well as those seeking to understand the role of the law in our social and cultural context. We will use one major textbook, as well as selected readings on topics. Students will be asked to bring their own experiences with the American legal system into our discussions and to share their perspectives of the various topics.

Status as a Decision Analytics or Degree Completion student is a prerequisite for this class.

CCH 192
**HOW, WHAT AND WHY WE EAT: THE ART, SCIENCE AND PSYCHOLOGY OF FOOD**
*Undergraduate*

We have many connections to food. Food sustains us but it has meaning that extends far beyond basic nutrition. Eating is an individual pleasure and comfort, a tool for creating and sustaining social bonds, and a way to express one's cultural identity. Food is tied to many aspects of life including culture, politics, agriculture and the environment. Americans have become disconnected from both the production of our food and from the joy of eating it and suffer from food related health problems such as diabetes, obesity and eating disorders. In this class we will explore the myriad of food-related habits and choices, that determine how what and why we eat. This experiential class moves beyond specific dietary guidelines by presenting concepts and skills that will help you reframe your connections with food. We will explore the multiple dimensions of food and eating from an individual, community and national level. We will explore the true meaning of nourishment. Topics include: identifying personal eating styles, mindful eating exercises, the slow food movement, locating Chicago food deserts, a field trip to a popular Chicago organic garden/restaurant, guest speaker from a Chicago restaurant mural artist, examining types of hunger and nourishment, and issues involving food and ritual, food and story, food and psychology, food and art. We will combine art, film clips, lectures, field trip, research, and mindful eating skills.

Status as a Decision Analytics or Degree Completion student is a prerequisite for this class.

CCH 217
**HIP HOP AND THE POLITICS OF DIFFERENCE**
*Undergraduate*

This course is a study of gender and contemporary popular culture. Few can deny the influence hip hop exerts; however, what began as party music in the late 1970s has matured into a global cultural enterprise. Embedded in this enterprise is evidence of an emerging political discourse that upends the compulsory scripts ascribed to black masculinity. Hip hop puts forward a set of sophisticated counter-narratives that repurpose the anger borne out of the systematic alienation of black men from attaining the full promise of American masculinity. The course will investigate the ways commercial hip hop facilitates the (re)production and dissemination of black American masculinity post-1965. Students will examine the sociohistorical and socioeconomic conditions from which rap emerges and continues to derive inspiration. Students will be guided through a careful reading of Judith Butler’s *Performative Acts* and will use the work to wrestle with the ways commercial hip hop’s consensual relationship with global capital complicates the project of black humanity fomenting a politics of difference.

Status as a Decision Analytics or Degree Completion student is a prerequisite for this class.
CCH 221
PUBLIC SPEAKING: HOW TO CHANGE YOUR LIFE
Undergraduate
Public speaking is the #1 fear in humans. Mastery of this skill is critical to one's professional and personal advancement. Being able to confidently, effectively and enthusiastically deliver your thoughts and ideas to a group of individuals is a skill that separates leaders from followers. We will explore creative ways to significantly enhance our comfort level speaking effectively in front of groups. In an open, friendly, fun, enthusiastic and supportive environment, participants will be introduced to a variety of methods to become much more confident with public speaking. Since fear of speaking is the most significant roadblock to giving effective presentations, this will be a focus of the class. We learned to feel this fear from our conditioning, which gave us disempowering values, beliefs and thoughts about this activity. These values, beliefs and thoughts, which we subconsciously inherited and adopted as our own, are likewise responsible for everything else that is or is not working in our lives. Understanding this power of our minds and our ability to implement new, more empowering values, beliefs and thoughts, is critical to creating the life we desire. This public speaking course will use Personal Development as the instrument to improve our ability to speak in front of a group as well as identify shortcomings in our personal and/or professional lives and develop a plan for empowerment to make significant changes in these areas. Student will have an opportunity to speak at each class as there will be 3 short prepared speeches and impromptu speaking during other sessions.

Status as a Decision Analytics or Degree Completion student is a prerequisite for this class.

CCH 222
FACILITATIVE DIALOGUE
Undergraduate
Verbal communication is an essential component in virtually every aspect of our interpersonal lives. The focus of this course is to study those situations and settings where we need to facilitate appropriate dialogue in order to arrive at a solution in the face of potentially emotional volatility. As examples, these conversations can include: confronting an uncooperative coworker, assessing alleged wrongdoing by a student, addressing resistance in a patient, or meeting the needs of a disgruntled customer. In these situations, our own behavioral and verbal actions are important determinants in the direction, duration, and consequences of the interaction. Given the potential for us to be verbally accosted, hostilely confronted, and/or be inappropriately blamed, we often have to manage our own emotions in addition to trying to engage in facilitative dialogue. Students will examine the processes involved in emotionally volatile situations including how our emotional and physiological state work in these situations. Students will learn a framework to more effectively manage the situation in order to arrive at an acceptable outcome. This course is appropriate for those in human resources, patient- and service-oriented industries, counseling, education, leadership development, and other settings where facilitative dialogue is necessary.

Status as a Decision Analytics or Degree Completion student is a prerequisite for this class.

CCH 228
WOMEN IN CHINA: IMAGES AND ROLES
Undergraduate
Through the introduction of images and roles of Chinese women in the past and present, this course will examine the evolving position of women in the Chinese society, the challenges that they still face, and the impact of globalization and economic developments on them today. Still photos, paintings, videos, and films will be used. (2 quarter hours)

Status as a Decision Analytics or Degree Completion student is a prerequisite for this class.

CCH 237
CONFLICT MANAGEMENT, NEGOTIATION, AND CLIENT RELATIONS
Undergraduate
This course will introduce students to a variety of strategies for conflict management and negotiation. Students will engage in a number of hands-on activities to develop skills that will benefit them in and beyond the workplace.

Status as a Decision Analytics or Degree Completion student is a prerequisite for this class.

CCH 257
PARTICIPATION AND DEMOCRACY IN AMERICA
Undergraduate
Why don't more Americans vote? How do education, income, and age impact voting trends? Why are some Americans more interested in politics than others? How is inequality reflected in other forms of political participation, such as donating money? Do recent trends in voter ID laws help to safeguard the democratic process, or restrict it? In summary, how democratic or representative are American elections? The course begins with some famous arguments about why participation matters. Trends in voter turnout then become the primary object of study, but we also consider other forms of participation including writing members of Congress, attending political meetings and contributing money. We explore recent discoveries in behavioral psychology that are changing the strategies of modern campaigns. After taking this course, you will understand the fundamental role of participation in democracy.

Status as a Decision Analytics or Degree Completion student is a prerequisite for this class.
CCH 274
THE BILL OF RIGHTS IN CONTEMPORARY LIFE AND WORK
Undergraduate
This course will be organized around a series of central questions: What is a law? Who has the authority to make one? What are the various sources of law? What is or should be the relationship between law, ethics and morality, between law and religion? What is the difference between legislative law and constitutional law? What are the legal, historical, philosophical and political sources of American constitutional law? What sort of society did the Framers of the Bill of Rights have in mind and are their ideas still applicable in 21st century America? How does the Bill of Rights fit into our constitutional framework and what rights does it guarantee? What is the relationship between the states and the federal government in guaranteeing those rights? What is the relationship between our legal system and our political system generally? What criteria do judges use to interpret laws? How does our own legal system differ from those of other countries and cultures? Are there any universal rights worth protecting? What role does or should science play in upholding our rights under the Bill of Rights? Possible areas to be covered are freedom of speech, religion, establishment of church and state, the right to privacy, the 4th, 5th and 6th Amendments? protections for criminal defendants and the death penalty.

Status as a Decision Analytics or Degree Completion student is a prerequisite for this class.

CCH 283
GLOBAL PERSPECTIVES BALANCING WORK & FAMILY
Undergraduate
How have people balanced the demands of work and family? What role has politics played in this history? This course develops students' understanding of issues in the history of gender, family, and work through historical and contemporary accounts from Europe and the United States. We will take a close look at issues such as the gender division of labor, child labor, government policies on maternity, social and political movements. Course materials include historical documents, lectures, films, and varied readings. Assignments will include essays, reflection journals, discussion, and a research project on work-life balance.

Status as a Decision Analytics or Degree Completion student is a prerequisite for this class.

CCH 286
NEW ORLEANS IN SONG, STORY & STRUGGLE
Undergraduate
The tapestry of New Orleans culture is tremendously rich and varied. This course will concentrate on two strands in that tapestry music from New Orleans and fiction about it. Students will learn about music forms which originated in the city or its environs and which have gone on to dazzle the world, including jazz, r&B, zydeco and funk. We will situate these art forms in social and historical context and examine the complex creative processes which have shaped them. We will become familiar with innovators and icons such as Louis Armstrong, Professor Longhair, Clifton Chenier, the Neville Brothers and Dr. John. We will also read works by literary artists who have a background in and/or fascination with New Orleans, including The Awakening by Kate Chopin; A Streetcar Named Desire by Tennessee Williams; and Mumbo Jumbo by Ishmael Reed. Moreover, we will consider the role played in American history and imagination by New Orleans as well as the role played by images and fantasies of New Orleans in struggles for social justice at the local and national level.

Status as a Decision Analytics or Degree Completion student is a prerequisite for this class.

CCH 289
PSYCHOLOGY FROM AN AFRICAN-CENTERED PERSPECTIVE
Undergraduate
This course utilizes an African-centered theoretical framework to examine salient themes pertinent to the psychology of people of African descent, including child development, family functioning, identity, education, racial oppression, spirituality, and healing. It takes an historical and topical approach to foster greater understanding about the course content. Through this examination, the learner will become more knowledgeable about the psychological experiences of people of African descent, the role of history and culture in human development, and the subjectivity of research in the social and natural sciences. They will also reflect on the relevance of the course material to their personal lives.

Status as a Decision Analytics or Degree Completion student is a prerequisite for this class.
CCH 293
COURT STRUCTURE & COMMON LAW - EXPLORING THE RIGHTS OF EMPLOYERS AND EMPLOYEES
Undergraduate
This course will examine the interrelationships between our economy, business and the practice of law. It will also examine contemporary legal issues in the world of work. Students will examine the structures of the legal community and the impact it has on how business is conducted, and on the economic system in which we live and work. Through readings, discussion, and group projects, students will investigate the interfaces of law, with an emphasis on torts and employment law, as well as current issues which have evolved as the practice of law has become a big business itself. Students will develop and evaluate plans individually or through group interaction for applying new insights to affecting change in their own working environments.

Status as a Decision Analytics or Degree Completion student is a prerequisite for this class.

CCH 299
ASSESSING AND MANAGING CONFLICT
Undergraduate
Our usual method for presenting, analyzing, and resolving conflicts has centered around legalistic argument; the goal being to discover the "right" answer and suppress the "wrong" ones. However, the multiple worldviews operating in the world today make such an approach to conflict less viable. Reflecting this reality, ways of communicating about and resolving conflict have arisen that go beyond enforcement of rules or legal determinations of right and wrong. In this course, we will look at various methods for handling conflict and consider how we might apply them to personal, work, community and literary conflicts through lecture, small group work, role playing, reading, various written projects, and discussion.

Status as a Decision Analytics or Degree Completion student is a prerequisite for this class.

CCH 325
CONNECTING THOUGHT AND BEHAVIOR IN THE WORKPLACE, THE COMMUNITY, AND IN YOUR PERSONAL LIFE
Undergraduate
This course introduces students to practical concepts of Cognitive Behavioral Psychology and offers them new perspectives on how to observe and understand the interaction between thoughts and behaviors in their daily lives. Students will evaluate the tendencies and correlations between what a person "thinks" and what that person "does" through observation and interpretation of their own experiences. A report will be generated that will include an analysis of the student's own cognitive behavioral tendencies and a plan for personal development.

Status as a Decision Analytics or Degree Completion student is a prerequisite for this class.

CCH 334
THE BUSINESS OF US HEALTH CARE IN A CHANGING ENVIRONMENT
Undergraduate
This course will provide students with a foundation on the various dimensions of today's health care system to include how it operates and is managed. This course will examine the interactions between insurance companies, the U.S. government and health providers to the delivery of quality care to the individual. The overview will include the structure of health care system segments, demographics and context of differentiation in the delivery of medical care. Students will improve their knowledge and skills in thinking critically through healthcare-related issues, successfully understand the concepts presented and discuss the ethical contexts of the decisions that businesses, government agencies and decision-makers consider when addressing health care. Key activities will entail research, analysis, and identification of best practices. Students will analyze the financial and economic health care decisions at a national, community and business level.

Status as a Decision Analytics or Degree Completion student is a prerequisite for this class.

CCH 344
INTERNATIONAL RELATIONS: A CROSS-CULTURAL PERSPECTIVE
Undergraduate
In this course, students will examine how cultural attributes shared by a society's members affect international affairs. Those attributes include ways of thinking and reasoning, styles of behavior and communication, and fundamental assumptions and values. The course is organized into three parts: an examination of American cultural patterns; an examination of cultural influences on human thought processes; and an examination of the cultural dimension of international negotiation through a comparison of Asian, European, Central American and the U.S. methods of reaching agreements.

Status as a Decision Analytics or Degree Completion student is a prerequisite for this class.
CCH 362
POVERTY, POLICY AND THE ECONOMY: POOR IN THE USA
Undergraduate
This course will explore the history of efforts to help the poor in the United States. The impact of the economy and foreign policy upon support for government funded programs to assist low income persons will be evaluated. Students will engage in first hand learning by researching resources available to help those in need.

Status as a Decision Analytics or Degree Completion student is a prerequisite for this class.

CCH 367
LEISURE, RECREATION, AND HEALTH
Undergraduate
This course will stimulate your thinking about the meaning of leisure in your life. Leisure today and historically has been central to the human experience. It is an elemental experience, essential to the total well-being of every person; it is a reflection and expression of the cultural values of a society; it is an important vehicle for treatment. Leisure and recreation services are also essential for healthy communities in terms of social climate, environmental quality, and economic stability. Leisure services comprise one of the largest and fastest growing industries in the world, whether measured in dollars spent, persons served, hours of time devoted, or resources used. The study of leisure and recreation is a broad discipline, combining diverse fields of study and professional practice. This course will (1) illustrate the importance of leisure to you and your loved ones, (2) contribute to your ability to become an informed consumer of leisure, (3) question the binary relationship of work and leisure and, (4) teach you how to use leisure to increase emotional and physical health, resulting in a higher quality of life. The course will be interactive and participatory.

Status as a Decision Analytics or Degree Completion student is a prerequisite for this class.

CCH 383
PROMOTING HEALTHY COMMUNITIES
Undergraduate
How can we organize our communities and design programs to improve rates of asthma, HIV and obesity? This course will explore a variety of methods that organizations in Chicago use including the identification of community assets that can mobilize to improve health. Students will read about and analyze the reasons that health inequality is linked to income, race, national origin and age, and learn experientially by developing their own project with an organization in Humboldt Park called the Community of Wellness that was launched as a community wide effort to promote a healthier community.

Status as a Decision Analytics or Degree Completion student is a prerequisite for this class.

CCS 152
STRESS REDUCTION USING HUMOR AND SPIRITUALITY
Undergraduate
Stress affects the body in dramatic ways, and is a major contributing factor in chronic and degenerative diseases. We will understand/describe the physiology and biochemistry of stress and, more importantly, apply effective methods to reduce and manage it. Effective stress reduction and burnout prevention then become important health, wellness, productivity and disease prevention strategies for individuals, schools, businesses, the medical industry and the culture. The effective stress reduction techniques include breathing, biofeedback, humor, spiritual exploration, connection and inspiration. The holistic paradigm of body, mind and spirit supports our informed search for meaning, connection, calm productivity and enhanced health (2 quarter hours)

Status as a Decision Analytics or Degree Completion student is a prerequisite for this class.

CCS 153
SCIENCE FOR CITIZENS
Undergraduate
Students will learn basic knowledge of science as they engage in activities that are connected to their everyday life. They will explore their natural ecosystem and be able to describe various functions. They will engage in the scientific method through observations, hypotheses, data collection and basic data analysis. Students will apply their critical thinking based on the scientific method to local environmental or science related issues/events. (2 quarter hours)

Status as a Decision Analytics or Degree Completion student is a prerequisite for this class.
CCS 204
URBAN GROWTH AROUND THE GLOBE
Undergraduate
This course will analyze the interrelationships among population, the environment, and economics. Past, current, and potential future policies relative to these issues will be evaluated.

Status as a Decision Analytics or Degree Completion student is a prerequisite for this class.

CCS 219
THE AGING (OR REENGAGING) BRAIN?
Undergraduate
In this course, we will examine the latest research on the aging process and, specifically, its relationship to the brain. We will cover a mix of material from psychological and, especially, neuroscientific fields. Students will also be introduced to the field of neuroplasticity, which is revolutionizing the way we understand the functioning power of the brain. Neuroplasticity, in simple terms, is the brain's ability to rearrange its connections and, therefore, its functions based on experiences. In other words, the brain has the capacity to literally change itself, based on experiences, to achieve positive results. The goals of this course are to understand how the brain works, examine its impact on our daily actions, study how aging impacts brain functioning, discover the learning and adjustment potential of the brain, and apply the principles of the 3 P's. We will use numerous examples to understand the brain, including health, work, relational, and personal settings. Students will ultimately answer the question of whether they will have an aging or reengaging brain.

Status as a Decision Analytics or Degree Completion student is a prerequisite for this class.

CCS 231
URBAN DIRT
Undergraduate
This is a course designed for the student who desires to know the difference, complexity, and the diversity between soil and dirt. The benefit of learning about soil is multi-fold: understanding the Earth, understanding how and where your food grows, gardening, impact on water quality, and most of all understanding your role in improving overall environmental quality and sustainability. In addition, this class will offer introductory knowledge of soil and its dynamism. Although learning about soil can be very scientific, there are several social and artistic views of soil. If you ever wanted to know why soils are various colors and fertility, and home to various organisms, as well as the uses and mapping of soils, then this is the course to take. Understanding the complexities of soil will aid in understanding Earth and its intricacy.

Status as a Decision Analytics or Degree Completion student is a prerequisite for this class.

CCS 251
UNDERSTANDING GLOBAL HEALTH CONCEPTS AND PRACTICES
Undergraduate
Many of the greatest challenges in public health are global. This course uses a multidisciplinary approach to discuss the major underlying determinants of poor health and the relationship between health and political, social and economic development. Drawing upon the sciences, social sciences and humanities, learners will be introduced to the evolution of modern approaches to the setting of global health priorities, the functions and roles of health systems, an overview of current global health practices, and the major institutional players in global health. We will explore the factors shaping the global distribution of disease and their connection with issues of social, economic and political development, as reflected in the Millennium Development Goals. We will also consider the impacts of globalization on health risks and availability of health resources. By engaging in critical assessment and proposing innovative solution ideas, we will develop all four competences offered for this course.

Status as a Decision Analytics or Degree Completion student is a prerequisite for this class.

CCS 256
EVERYDAY ECOLOGY
Undergraduate
Every week, we learn of typhoons and landslides, floods and hurricanes, droughts and other natural catastrophes. Scientists now agree that the major cause of climate shift is man-made, specifically our use and abuse of global energy resources. In Everyday Ecology we will analyze our energy use patterns and explore practical alternatives. The word "ecology" originates from the meshing of two Greek words meaning "the study of homes." Although the main focus of this course is the individual household, another "household" we must take into account is the economy. Ecological economics examines how both disciplines need to look toward the other to be viable long term. We will examine options to bring the earth household (ecology) and the human household (economy) together for the benefit of both. This course observes how "man is connected to the world around him. It allows us to see our options in response to growing concern over global climate change. Through readings, field trips, activities, discussions and an analysis of our personal use of energy, this course enables us to become increasingly aware of ecological issues. You will learn to evaluate the effect of personal choices on the earth and be introduced to alternative, 'greener' options.

Status as a Decision Analytics or Degree Completion student is a prerequisite for this class.
**CCS 275**  
**BODY, MIND, SPIRIT: YOGA AND MEDITATION**  
**Undergraduate**

Why are 20 million Americans practicing yoga? This course answers that question with an introduction to yoga and meditation techniques and the underlying scientific and philosophical principles of the system of yoga. The first half of each class will be experiential, conducted as a yoga and meditation class for beginners, providing tools to reduce stress, focus the mind, and cultivate inner peace. This first hour and a half will use yoga postures, breathing exercises, and meditation techniques. The second half of each class will use readings, reflection, and discussion to examine the scientific and philosophical knowledge of yoga as a way to ease stress, strengthen the bone and muscle structures, lower blood pressure, increase flexibility and strength, improve mind functioning, and provide spiritual sustenance. We will read Yoga Mind Body and Spirit: A Return to Wholeness by Donna Farhi, and the The Yoga Sutras of Patanjali, research articles on the scientific studies of yoga's benefits from journals and websites, etc. Students will keep weekly reflection journal observations on the changes(s) they notice in themselves. This course will refresh, relax, rejuvenate. Yoga mats and other props will be provided. Bring/wear comfortable clothes (no jeans, belts, dresses). This is a Gentle Yoga class for beginners. Yoga means to unite or yoke so course will explore the ways to unite body, mind, spirit. This course is designed to 1) help establish good health and well-being; 2) gain scientific knowledge and understanding of the various systems of the human body; and 3) explore the spiritual benefits of meditation.

Status as a Decision Analytics or Degree Completion student is a prerequisite for this class.

**CCS 282**  
**NUTRITION BASICS AND BEYOND**  
**Undergraduate**

This introductory course will provide a framework for understanding the fundamentals of nutrition, vitamins and minerals, nutrition and disease prevention, food labeling, nutrition through the life cycle, weight management and more. Each class will build upon the basics by exploring current issues and research related to specific topics. Throughout the course, students will begin to separate information from misinformation as well as gain practical knowledge to incorporate into day to day life.

Status as a Decision Analytics or Degree Completion student is a prerequisite for this class.

**CCS 328**  
**CHALLENGES IN GLOBAL HEALTH**  
**Undergraduate**

In 1967 the United States Surgeon General announced that it was “time to close the book on infectious disease”. Antibiotics had been introduced in the 1940’s, there was an ever-lengthening list of diseases for which immunization was available, and many world health officials imagined a future free of infectious diseases. Yet, as we begin the twenty-first century, infectious diseases are still the leading cause of death in the world. Why? How do we begin to understand the emergence of AIDS, Ebola virus, Lyme disease or Hantavirus? How can we explain the worldwide reemergence of tuberculosis, a disease that had come close to being relegated to history books? In this online course we will seek answers as we study the nature of microbes and the complex, often interrelated factors that contribute to their ability to challenge us even as we pit our science and technologies against them. We will examine such factors as population growth, urbanization, ecological disruption, human migration and antibiotic misuse. In 1996 the Director-General of the World Health Organization announced, “We stand on the brink of a global crisis in infectious diseases.” Clearly the book on infectious disease is still wide open, and we will read some of its pages.

Status as a Decision Analytics or Degree Completion student is a prerequisite for this class.

**CCS 337**  
**THE HUMAN GENOME AND ITS IMPACT**  
**Undergraduate**

This course will address the principles of genetics with an emphasis on the genetic code of the human genome. In this course we will examine: how the genetic code is stored, how it is used, how it is evolving, how it is passed from one generation to the next, the consequences of genetic code errors, the medical, technological, legal and ethical issues associated with the human genome. We will discuss how we can, and how we should, use the information on the human genome.

Status as a Decision Analytics or Degree Completion student is a prerequisite for this class.
CCS 360
SOCIETY AND INFORMATION TECHNOLOGIES
Undergraduate
Humans have a long line of technological advances that includes tools, weapons, transportation, mechanical, industrial, and medical advances. On one hand, the computer is just another invention that is part of this long line of technological advances. On the other hand, the ability to program the computer makes it different with an incredible diversity of uses. Computer technology has made large impacts in diverse areas such as sports management, health care, employment, manufacturing, education, defense, and automobiles and many other areas. This course explores how computing technologies such as computer software and hardware, and networking has affected our society. We will examine the basics of how these technologies work and how they have affected areas of human endeavors. We will examine how these technologies changed, improved, simplified and complicated society.

CCS 365
ADDICTION STUDIES
Undergraduate
This is an introductory course in the field of addiction studies. In this course we will examine the relationship between drugs and behavior, the personal and social concerns of drug-taking behavior and how drugs work in the body and mind. Legal and legally restricted drugs as well as medical drugs will be discussed. We will also cover issues of prevention, treatment and education. By the end of this course students will understand (1) the differences between use, abuse and addiction to drugs; (2) the extent of substance abuse in the United States today; (3) the legal, social and cultural ramifications of substance abuse; (4) methods of treatment and prevention of substance abuse; (5) major classifications of addictive substances; and (6) how drugs work in mind and body. This course will be a mix of lecture, discussion, videos and other supplemental materials. In addition to their competence papers, students will work in small groups on projects related to addiction and will present their group's findings to the class.

CES 400
CRITICAL SOCIAL THEORY
Graduate
Social movements are collective efforts that spring up from within communities that are not connected to organizations or power entities. At times a leader springs forth from the movement as it gather steam, but in other cases the movement continues to have a collective leadership, and in diverse regions. Examples in the US, the abolitionist movement, the women's suffrage movement, the civil rights movement, anti-war movements, the feminist and gay rights movements, the environmental movement, social justice and immigrant rights movements, the Tea Party movement, and the "occupy" and "we are the 99%" movement. Globally, such movements take on longstanding hegemonic systems, such as the "Arab spring" of 2011, and the movement by indigenous people in Bolivia that eventually brought Evo Morales to the presidency, for the first time since European arrival in the continent. In the US, movements tend to pursue social justice causes, rather than removing hegemonic power. Cross-listed with INT 401.

CES 401
CRITICAL ETHNIC STUDIES
Graduate
This core seminar will serve as an introduction to key issues and methods in the comparative study of ethnicity and race. The course highlights an interdisciplinary approach to the studies of systematic oppression in the United States, and the global implication of these structures. We will consider how Ethnic Studies presents a progressive intellectual challenge to global and local configurations of power in the name of global justice. Among our methods will be an intersectional theoretical analysis of the identities of race, gender, class, nation, sexuality, ability and religion. Readings will cover Kimberle Crenshaw's and others theories of intersectionality, black feminist standpoint epistemology, postcolonial theory, mestiza feminism and other critical mixed race theories, queer critical theory, settler racism and state violence, as well as creative and political movements of resistance and social change.

CES 402
MOBILITY AND THE STATE
Graduate
In this course we explore the history, culture, and politics of migration along with an examination of the expanding borders of the United States. We analyze the varied mythology of the border as a danger zone, an intermediary zone, and a place of contact and conflict. We also look to the theorizations of the border as a site of cultural exchanges, resistance and critical negotiation; interchanges that impact the construction of race, ethnicity, sexuality and gender from both sides of the border. We examine issues relating to U.S. policies of immigration and labor movements as well as the economic and political consequences of globalization along the border region. Finally, we examine how the U.S. border has shifted and changed over time, critically challenging issues of political, cultural, and legal belonging.
CES 403
CITIES AND RACIAL FORMATION
Graduate
One of the required courses for the MA in Critical Ethnic Studies is in the area of Cities and Racial Formation. The group of courses in this area would cover urban issues, whether related to Chicago or other city/cities, or issues of race and ethnicity. These courses might cover topics on space, planning, and history of cities; or labor, work, and employment in urban contexts; or racial identity formation. As the majority of people living in the world today inhabit cities, this category of courses considers the many factors that transform racial make-up of urban areas. Courses might ask such questions as: What is the effect of rapid economic change on different races and their jobs in cities? What environmental features of cities affect race relations? What processes involving resource and energy consumption concern racial groups in different ways?

CES 404
BORDERS AND MIGRATION
Graduate
This course examines the integral role that different processes of mobility play in shaping today's world: emigration, immigration, displacement, refugee and internally displaced persons flows. Students study the causes and effects of population movements including push-pull factors, demographic, economic, and political variables. Students also look at the role of state and non-state actors and organizations. Cross-listed with INT 404 "Migration and Forced Migration."

CES 410
SPECIAL TOPICS IN CRITICAL ETHNIC STUDIES
Graduate
Open elective for Critical Ethnic Studies. Topics vary. See schedule for current offerings.

CES 412
FINAL PROJECT INDEPENDENT RESEARCH
Graduate
This course involves individual investigation and research (toward completion of the Master's thesis, project, internship, or portfolio) under the supervision of a faculty member. A minimum of 4 credit hours required. Course can be repeated for a total of 8 credit hours.

CES 413
CANDIDACY CONTINUATION
Graduate
Students who must take extra time to complete the requirements for the Master's thesis, project, or portfolio must enroll in candidacy continuation each quarter of the academic year until this Master's requirement has been completed. Non-credit.

CES 414
CANDIDACY MAINTENANCE
Graduate
Masters candidates who are not actively working on their thesis, project, internship, or portfolio during a given quarter but who want to maintain active university status can register for this course by permission of the graduate director. This course does not maintain student status for purposes of student loans. Non-credit.

CES 499
INDEPENDENT STUDY
Graduate
Individually supervised learning experience, usually involving extensive research and writing.

CHE 100
OUR CHEMICAL WORLD
Undergraduate
A course for non-science majors that develops the essential concepts of chemistry with some focus on applications of these methods and ideas toward a particular aspect of human activity or condition. Only one of series 100-102 may be taken for credit.
CHE 101
EXPLORING MATTER
Undergraduate
A course for non-science majors that develops the fundamental concepts of chemistry with experimental exploration to complement the methods and ideas encountered in reading and discussion in class. Only one of series 100-102 may be taken for credit.

CHE 102
ATOMS AND MOLECULES
Undergraduate
A course for non-science majors that develops the basic concepts of chemistry with discussion of some applications of chemical methods to the study of nature and the modification of the circumstances of human beings. The course may include a quantitative special project to enhance understanding of a particular application of chemistry. Only one of series 100-102 may be taken for credit.

CHE 103
ENVIRONMENTAL CHEMISTRY
Undergraduate
A discussion and laboratory exploration of the technological origins, effects, and control of environmental pollutants.

CHE 104
CHEMICALS, DRUGS AND LIVING SYSTEMS
Undergraduate
A discussion of the molecular basis of the interaction of specific chemical compounds (chiefly pharmaceuticals and drugs) with living organisms.

CHE 105
EXPLORING NUTRIENTS/SCIENCE OF NUTRITION
Undergraduate
A discussion and laboratory exploration of the chemical molecules which supply nutrients for living organisms. This course also includes a quantitative project, applicable to the individual student, to enhance the understanding of the principles of nutrition.

CHE 106
GEOCHEMISTRY
Undergraduate
This course for non-science majors that introduces students to basic chemical and geological concepts through a discussion of the chemical principles and scientific laws governing the composition and chemical transformation of the components making up the Earth. Major topics include the scientific method, reporting and treatment of quantitative data, introduction to the basic principles of matter, chemical reactivity, and radioactive decay.

CHE 107
PROTEINS AND THEIR GENES
Undergraduate
A discussion and laboratory introduction to many aspects of proteins: their chemical structures, biological functions, how genes store the information to make them, and how changes in genes can lead to changes in proteins, and to cancer and other diseases.

CHE 109
FORENSIC CHEMISTRY
Undergraduate
Discussion and laboratory exploration of the application of modern science to problems in criminology, evidence, art, and archaeology.

CHE 128
BASIC CHEMICAL CONCEPTS
Undergraduate
This course develops the fundamental concepts of chemistry and basic quantitative reasoning. This course is suitable to prepare students to take General Chemistry I (CHE130 or CHE 136). (3 quarter hours)

CHE 129 and MAT 130 or higher are a corequisite for this class.
CHE 129
BASIC CHEMICAL CONCEPTS LABORATORY
Undergraduate
Laboratory course to be taken in conjunction with CHE128. (1 quarter hour)

CHE 128 and MAT 130 or higher are a corequisite for this class

CHE 130
GENERAL CHEMISTRY I
Undergraduate
This introductory course for science majors emphasizes the composition of matter, atomic and molecular structure, bonding and chemical reactions. It is the first in the three-course sequence of General Chemistry. This course meets for three hours of lecture and one hour of discussion per week. Students must coregister for CHE 131, the laboratory course. (3 quarter hours)

MAT 130 or higher and a grade of C- or higher in {CHE 128 and CHE 129} or successful completion of {FYSC 128 and FYSC 129} or placement by Chemistry Assessment exam) are prerequisites for this class.

CHE 131
GENERAL CHEMISTRY I LABORATORY
Undergraduate
Laboratory course to be taken in conjunction with CHE 130. The course meets weekly for three hours. The experimental techniques provide hands-on experience with the course material in CHE130. CO-REQUISITE(S): CHE130. (1 quarter hour)

MAT 130 or higher and a grade of C- or higher in {CHE 128 and CHE 129} or successful completion of {FYSC 128 and FYSC 129} or placement by Chemistry Assessment exam) are prerequisites for this class.

CHE 132
GENERAL CHEMISTRY II
Undergraduate
Second course of three in the General Chemistry series. Topics discussed include: common states of matter, phase transitions, properties of solutions, kinetics and equilibrium. This course meets for three hours of lecture and one hour of discussion per week. (3 quarter hours)

A minimum grade of C- in CHE 130 and CHE 131 is a prerequisite for this class. CHE 133 is a corequisite for this class.

CHE 133
GENERAL CHEMISTRY LABORATORY II
Undergraduate
Laboratory to be taken in conjunction with CHE 132. The Course meets weekly for three hours. The experimental techniques learned in lab provide hands-on experience with the course material in CHE 132. (1 quarter hour)

A minimum grade of C- in CHE 130 and CHE 131 is a prerequisite for this class. CHE 132 is a corequisite for this class.

CHE 134
GENERAL CHEMISTRY III
Undergraduate
Third of three courses in the General Chemistry sequence. Topics included in lecture: chemical equilibrium in aqueous solution (acids and bases, solubility, complex ion formation), Thermodynamics (entropy and free energy), electrochemistry, chemistry of d-block elements and descriptive chemistry. (3 quarter hours)

A minimum grade of C- in CHE 132 and CHE 133 is a prerequisite for this class and CHE 135 is a corequisite for this class.

CHE 135
GENERAL CHEMISTRY LABORATORY III
Undergraduate
Laboratory to be taken in conjunction with CHE 134. The Course meets weekly for three hours. The experimental techniques provide hands-on experience with the course material in CHE 134. (1 quarter hour)

A minimum grade of C- in CHE 132 and CHE 133 is a prerequisite for this class and CHE 134 is a corequisite for this class.
CHE 136  
**GENERAL CHEMISTRY I**  
*Undergraduate*

This course is a rigorous introductory course in general chemistry covering topics such as composition of matter, atomic and molecular structure, bonding and chemical reactions, common states of matter, properties of solutions, phase transitions. Students must coregister for CHE 137, the laboratory course. (5 quarter hours)

MAT 130 or higher and a grade of C- or higher in (CHE 128 and CHE 129) or successful completion of {FYSC 128 and FYSC 129} or placement by Chemistry Assessment exam) are prerequisites for this class.

---

CHE 137  
**GENERAL CHEMISTRY I LABORATORY**  
*Undergraduate*

Laboratory course to be taken in conjunction with CHE 136. This laboratory course introduces students to basic chemical laboratory techniques. (1 quarter hour)

MAT 130 or higher and a grade of C- or higher in (CHE 128 and CHE 129) or successful completion of {FYSC 128 and FYSC 129} or placement by Chemistry Assessment exam) are prerequisites for this class.

---

CHE 138  
**GENERAL CHEMISTRY II**  
*Undergraduate*

This course is a continuation of CHE 136 covering topics including kinetics, chemical equilibrium in aqueous solution (acids and bases, solubility, complex ion formation), thermodynamics (entropy and free energy), electrochemistry, chemistry of d-block elements and descriptive chemistry. Students must coregister for CHE 139, the laboratory course. (5 quarter hours)

A minimum grade of C- in CHE 136 and CHE 137 is a prerequisite for this class.

---

CHE 139  
**GENERAL CHEMISTRY II LABORATORY**  
*Undergraduate*

This laboratory course is a continuation of CHE 137, emphasizing additional quantitative and qualitative laboratory techniques to coincide with CHE 138 content. (1 quarter hour)

A minimum grade of C- in CHE 136 and CHE 137 is a prerequisite for this class.

---

CHE 140  
**UNIVERSITY CHEMISTRY I**  
*Undergraduate*

The subject matter and sequence of topics are similar to that of the General Chemistry sequence (CHE 130-132-134), however this course is designed for students who are prepared for a more thorough and systematic study of chemistry including increased emphasis on the connection between chemical and physical topics. This is the first of a three-course sequence of University Chemistry. This course meets for three hours of lecture and one hour of discussion per week. Students must co-register for the laboratory companion course, CHE 141. (3 quarter hours)

MAT 131 and completion of the Chemistry Assessment Examination is a prerequisite of this class.

---

CHE 141  
**UNIVERSITY CHEMISTRY LABORATORY I**  
*Undergraduate*

Laboratory course to be taken in conjunction with CHE 140. This course meets weekly for three hours. The experimental techniques provide hands-on experience with the course material in CHE 140. Students must co-register for the lecture companion course, CHE 140. (1 quarter hour)

MAT 131 and completion of the Chemistry Assessment Examination is a prerequisite of this class.
CHE 142
UNIVERSITY CHEMISTRY II
Undergraduate
Second course of three in the University Chemistry sequence. This course meets for three hours of lecture and one hour of discussion per week. Students must co-register for the laboratory companion course, CHE 143. (3 quarter hours)

A grade of C- or higher in CHE 140 and CHE 141 is a prerequisite for this class.

CHE 143
UNIVERSITY CHEMISTRY LABORATORY II
Undergraduate
Laboratory course to be taken in conjunction with CHE 142. The course meets weekly for three hours. The experimental techniques provide hands-on experience with the course material in CHE 142. Students must co-register for the lecture companion course, CHE142. (1 quarter hour)

A grade of C- or higher in CHE 140 and CHE 141 is a prerequisite for this class.

CHE 144
UNIVERSITY CHEMISTRY III
Undergraduate
Third course of three in the University Chemistry sequence. This course meets for three hours of lecture and one hour of discussion per week. Students must co-register for the laboratory companion course, CHE 145. (3 quarter hours)

A grade of C- or higher in CHE 142 and CHE 143 is a prerequisite for this class.

CHE 145
UNIVERSITY CHEMISTRY LABORATORY III
Undergraduate
Laboratory course to be taken in conjunction with CHE 144. The course meets weekly for three hours. The experimental techniques provide hands-on experience with the course material in CHE 144. Students must co-register for the lecture companion course, CHE144. (1 quarter hour)

A grade of C- or higher in CHE 142 and CHE 143 is a prerequisite for this class.

CHE 202
APPLIED PROBABILITY AND STATISTICS
Undergraduate
This is a lecture course that introduces students to concepts related to the statistical analysis of experimental data, covering material from uncertainty, significant figures, and propagation of error through least squares fitting to descriptions and applications of several statistical distributions. (2 quarter hours)

A grade of C- or better in (CHE 134 and CHE 135) or (CHE 138 and CHE 139) or (CHE 144 and CHE 145) is a prerequisite and CHE 204 is a co-requisite for this class.

CHE 204
ANALYTICAL CHEMISTRY
Undergraduate
Use of equilibrium chemistry to solve problems of chemical analysis in acid-base, solubility, metal-ligand complex, and electrochemical systems. CO-REQUISITE(S): CHE 202 and CHE 205. (3 quarter hours)

A grade of C- or better in (CHE 134 and CHE 135) or (CHE 138 and CHE 139) or (CHE 144 and CHE 145) is a prerequisite for this class.

CHE 205
ANALYTICAL CHEMISTRY LABORATORY
Undergraduate
Laboratory to be taken in conjunction with CHE 204. Methods include wet chemistry and instrumental techniques of analysis. CO-REQUISITE(S): CHE 204. (1 quarter hour)

A grade of C- or better in (CHE 134 and CHE 135) or (CHE 138 and CHE 139) or (CHE 144 and CHE 145) is a prerequisite for this class.
CHE 228
SURVEY OF ORGANIC CHEMISTRY
Undergraduate
This one-quarter course gives students an overview of the fundamentals of organic chemistry and its applications in health and environmental sciences. This is a survey course meant for students who do not need to learn a full year of organic chemistry. Emphasis is on the structure, function, and reactivity of the major classes of organic compounds. This course meets for six hours per week: three hours of traditional lecture and three hours of lab. The course is suitable for nursing and environmental science students; it does not substitute for any traditional organic chemistry course. CO-REQUISITE(S): CHE 229. (3 quarter hours)

(CHE132 and 133) or (138 and 139) are prerequisites for this course.

CHE 229
SURVEY OF ORGANIC CHEMISTRY LABORATORY
Undergraduate
Laboratory to be taken in conjunction with CHE 229. CO-REQUISITE(S): CHE 228. (1 quarter hour)

(CHE132 and 133) or (138 and 139) are prerequisites for this course.

CHE 230
ORGANIC CHEMISTRY I
Undergraduate
First in a sequence of courses designed to investigate what organic chemistry is and how it works, by emphasizing the relationship between structure and function of organic molecule and the language and fundamental concepts of organic chemistry, including: structure and bonding; acid-base reactions; functional groups; thermodynamics and kinetics of organic reactions; stereochemistry; substitution and elimination reactions of alkyl halides. (3 quarter hours)

A minimum grade of C- in ((CHE 134 and CHE 135) or (CHE 138 and CHE 139) or (CHE 144 and CHE 145)) is a prerequisite for this class.

CHE 231
ORGANIC CHEMISTRY LABORATORY I
Undergraduate
Laboratory to be taken in conjunction with CHE 230. (1 quarter hour)

A minimum grade of C- in ((CHE 134 and CHE 135) or (CHE 138 and CHE 139) or (CHE 144 and CHE 145)) is a prerequisite for this class. CHE 230 is a corequisite for this class.

CHE 232
ORGANIC CHEMISTRY II
Undergraduate
Second in a sequence of courses designed to investigate what organic chemistry is and how it works, by emphasizing the relationship between structure and function of organic molecules. Specific topics investigated include the reactivity and synthesis of alcohols, ethers, epoxides, alkenes, alkynes, alkanes, conjugated, and aromatic compounds. To be taken in conjunction with CHE 233. (3 quarter hours)

A minimum grade of C- in CHE 230 and CHE 231 is a prerequisite for this class. CHE 232 is a corequisite for this class.

CHE 233
ORGANIC CHEMISTRY LABORATORY II
Undergraduate
Laboratory to be taken in conjunction with CHE 232. (1 quarter hour)

A minimum grade of C- in CHE 230 and CHE 231 is a prerequisite for this class. CHE 233 is a corequisite for this class.

CHE 234
ORGANIC CHEMISTRY III
Undergraduate
Third in a sequence of courses designed to investigate what organic chemistry is and how it works, by emphasizing the relationship between structure and function of organic molecules. Specific topics investigated include the reactivity and synthesis of carbonyl compounds; amines; and bio-molecules. To be taken in conjunction with CHE 235. (3 quarter hours)

A minimum grade of C- in CHE 232 and CHE 233 is a prerequisite for this class. CHE 235 is a corequisite for this class.
Laboratory to be taken in conjunction with CHE 234. (1 quarter hour)

A minimum grade of C- in CHE 232 and CHE 233 is a prerequisite for this class. CHE 234 is a corequisite for this class.

CHE 236
ORGANIC CHEMISTRY I
Undergraduate
First in a sequence of courses designed to investigate what organic chemistry is and how it works, by emphasizing the relationship between structure and function of organic molecules, and the language and fundamental concepts of organic chemistry. Specific topics that are covered include the following: structure and bonding; acids and bases; functional groups; thermodynamics and kinetics of organic reactions; alkanes; stereochemistry; alkyl halides and nucleophilic substitution; elimination reactions; alcohols, ethers and epoxides; alkenes; alkynes; oxidation and reduction. CO-REQUISITE(S): CHE 237. (5 quarter hours)

(CHE 134 and CHE 135) or (CHE 138 and CHE 139) are a prerequisite for this class.

CHE 237
ORGANIC CHEMISTRY I LABORATORY
Undergraduate
Laboratory to be taken in conjunction with CHE 236. CO-REQUISITE(S): CHE 236. (1 quarter hour)

(CHE 134 and CHE 135) or (CHE 138 and CHE 139) are a prerequisite and CHE 236 is a corequisite for this class.

CHE 238
ORGANIC CHEMISTRY II
Undergraduate
Second in a sequence of courses designed to investigate what organic chemistry is and how it works, by emphasizing the relationship between structure and function of organic molecules, and the language and fundamental concepts of organic chemistry. Specific topics that are covered include the following: conjugation, resonance, and dienes; benzene and aromatic compounds; electrophilic aromatic substitution; carboxylic acids; organometallic reagents; carbonyl substitution and addition reactions; aldehydes and ketones; carbonyl condensation reactions; amines; bio-molecules. To be taken in conjunction with CHE 239. (5 quarter hours)

A minimum grade of C- in CHE 236 and CHE 237 is a prerequisite for this course.

CHE 239
ORGANIC CHEMISTRY II LABORATORY
Undergraduate
Laboratory to be taken in conjunction with CHE 238. (1 quarter hour)

A minimum grade of C- in CHE 236 and CHE 237 is a prerequisite for this course.

CHE 264
ATMOSPHERIC CHEMISTRY
Undergraduate
Atmospheric chemistry with a focus on physical and chemical processes in the troposphere and stratosphere. CO-REQUISITE(S): CHE 265. (3 quarter hours)

CHE 204 and CHE 205 are prerequisites for this course.

CHE 265
ATMOSPHERIC CHEMISTRY LABORATORY
Undergraduate
Laboratory to be taken in conjunction with CHE 264, with emphasis placed on gas phase and particulate measurements. CO-REQUISITE(S): CHE 264. (1 quarter hour)

CHE 204 and CHE 205 are a prerequisite for this class.
CHE 268
SOLID WASTE CHEMISTRY
Undergraduate
Fundamental chemical processes involved in the processing of solid wastes. CO-REQUISITE(S): CHE 269. (3 quarter hours)
CHE 204 and CHE 205 are prerequisites for this course.

CHE 269
SOLID WASTE CHEMISTRY LABORATORY
Undergraduate
Laboratory to be taken in conjunction with CHE 268. CO-REQUISITE(S): CHE 268. (1 quarter hour)
CHE 204 and CHE 205 are prerequisites for this course.

CHE 302
QUANTUM CHEMISTRY
Undergraduate
This is the first course in a three-quarter long physical chemistry sequence. This course focuses on quantum mechanics: a theoretical description of matter at the microscopic level. The energy levels of atoms and molecules will be derived; spectroscopic applications will be explored. Students must co-register for the laboratory companion course, CHE 303. (3 quarter hours)
CHE 204 and CHE 205 and (MAT 149 or MAT 152 or MAT 162 or MAT 172) and PHY 172 are prerequisites for this class.

CHE 303
EXPERIMENTAL PHYSICAL CHEMISTRY I
Undergraduate
Laboratory to be taken in conjunction with CHE 302. Introduction to essential skills and techniques of experimental physical chemistry. Topics include the use of data analysis software, computational methods, basic spectroscopy, and technical writing. CO-REQUISITE(S): CHE 302. (1 quarter hour)
CHE 204 and CHE 205 and (MAT 149 or MAT 152 or MAT 162 or MAT 172) and PHY 172 are prerequisites for this course.

CHE 304
THERMOCHEMISTRY
Undergraduate
This is the second course in a three-quarter long physical chemistry sequence. This course explores the molecular-scale effects of quantum mechanics and thermodynamics. The understanding of quantum mechanics gained during CHE 302 is extended into the molecular regime, with a focus on bonding. The basic principles of thermodynamics are explored in detail. These principles are then applied to build up a detailed understanding of chemical equilibria and the properties of various states of matter. Students must co-register for the laboratory companion course, CHE 305. (3 quarter hours)
CHE 302 and CHE 303 are a prerequisite for this class.

CHE 305
EXPERIMENTAL PHYSICAL CHEMISTRY II
Undergraduate
Laboratory to be taken in conjunction with CHE 304. The goal of this laboratory course is to teach students essential skills and techniques of physical chemistry. Experimental work will focus on electronic spectroscopy and thermodynamics. CO-REQUISITE(S): CHE 304. (1 quarter hour)
CHE 302 and CHE 303 are a prerequisite for this class.

CHE 306
KINETICS AND MOLECULAR DYNAMICS
Undergraduate
This is the third course in a three-quarter long physical chemistry sequence. This course focuses on the connection between quantum mechanics and thermodynamics, as well as chemical kinetics. Topics discussed may include: kinetics, molecular dynamics, statistical mechanics, and transport properties. Students must co-register for the laboratory companion course, CHE 307. (3 quarter hours)
CHE 302 and CHE 303 are a prerequisite for this class.
CHE 307
EXPERIMENTAL PHYSICAL CHEMISTRY III
Undergraduate
Laboratory to be taken in conjunction with CHE 306. The goal of this laboratory course is to teach students essential skills and techniques of physical chemistry. Experimental work will focus on thermodynamics at the outset and then kinetics for the final two experiments of the quarter. Formerly CHE 211LAB. CO-REQUISITE(S): CHE 306. (1 quarter hour)

CHE 302 and CHE 303 are a prerequisite for this class.

CHE 310
NUCLEAR CHEMISTRY
Undergraduate
This is a course for advanced undergraduates and graduate students. The course emphasizes the theory of radioactive decay, nuclear properties, mass-energy systematics, and nuclear applications.

CHE 202 and PHY 152 or PHY 172 are prerequisites for this class.

CHE 318
BIOPHYSICAL CHEMISTRY
Undergraduate
This course is designed for advanced undergraduate students with an interest in the interdisciplinary field of biophysics. The course will focus on several subfields of biophysical chemistry, including: fluorescence as a tool in biophysics; protein folding; biophysical applications of single molecule fluorescence, atomic force microscopy, X-ray crystallography, mass spectrometry, and NMR spectroscopy. Additional topics will be selected by students from a list of possible choices.

CHE 302 or CHE 340 is a prerequisite for this course.

CHE 320
INTERMEDIATE INORGANIC CHEMISTRY
Undergraduate
Lecture course emphasizing synthesis, structure and reactions of metal ligand compounds of general and biological interest. CO-REQUISITE(S): CHE 321. (3 quarter hours)

(CHE 234 and CHE 235) or (CHE 238 and CHE 239) are a prerequisite for this class.

CHE 321
INTERMEDIATE INORGANIC CHEMISTRY LABORATORY
Undergraduate
Laboratory to be taken in conjunction with CHE 320. CO-REQUISITE(S): CHE 320. (1 quarter hour)

(CHE 234 and CHE 235) or (CHE 238 and CHE 239) are a prerequisite for this class.

CHE 326
ORGANOMETALLIC CHEMISTRY
Undergraduate
Organometallic chemistry is the study of compounds that contain a metal-carbon bond, and thus unites the fields of organic and inorganic chemistry. Organometallic compounds are commonly employed throughout various chemical sub-industries for the synthesis of pharmaceuticals, liquid crystals, polymer precursors, fragrances, hormones and more. This course will provide an introduction to the fundamental structure and bonding of organometallic complexes, while offering an in depth study of the unique reaction mechanisms by which metals, particularly transition metals, react with organic molecules. Applications of these compounds and reactions to real-world industrial processes will also be presented to highlight the tremendous utility of this chemistry. Students must co-register for the laboratory companion course, CHE 327. (3 quarter hours)

(CHE234 and CHE235) or (CHE238 and CHE239) are prerequisites for this course.
CHE 327
ORGANOMETALLIC CHEMISTRY LABORATORY
Undergraduate
Laboratory to be taken in conjunction with CHE 326. This course is designed to provide the student with a thorough introduction to the experimental techniques utilized by practicing chemists in the synthesis, isolation, and characterization of organic compounds. CO-REQUISITE(S): CHE 326. (1 quarter hour)

(CHE234 and CHE235) or (CHE238 and CHE239) are prerequisites for this course.

CHE 330
SENIOR CAPSTONE IN THE PHYSICAL SCIENCES
Undergraduate
Capstone in the Physical Sciences. A course for graduating chemistry and physics majors to integrate physical science experience with non-scientific fields.

CHE 340
BIOCHEMISTRY I
Undergraduate
First in a three-course sequence, directed at those who wish an in-depth exploration of modern biochemistry. This course covers the structures and functions of the four major macromolecules, concentrating on enzyme kinetics and regulation. CO-REQUISITE(S): CHE 341. The general biology sequence is strongly recommended. (3 quarter hours)

A grade of C- or better in (CHE234 and CHE 235) or (CHE 238 and CHE 239) is a prerequisite for this course.

CHE 341
EXPERIMENTAL BIOCHEMISTRY I
Undergraduate
Laboratory to be taken in conjunction with CHE 340. This course will introduce classic and modern techniques for isolating and characterizing biological molecules. Topics covered will include buffer preparation; amino acid analysis; detection, quantification, and purification of proteins; enzyme kinetics; purification, amplification, and analysis of DNA; protein stabilization; and molecular interaction analysis. CO-REQUISITE(S): CHE 340. (1 quarter hour)

A grade of C- or better in (CHE234 and CHE 235) or (CHE 238 and CHE 239) is a prerequisite for this course.

CHE 342
BIOCHEMISTRY II
Undergraduate
Second in a three-course sequence, directed at those who wish an in-depth exploration of modern biochemistry. This course covers energy metabolism and biosynthetic pathways, with emphasis on their coordinated regulation. CO-REQUISITE(S): CHE 343. (3 quarter hours)

CHE 340 and CHE 341 are a prerequisite for this class.

CHE 343
EXPERIMENTAL BIOCHEMISTRY II
Undergraduate
Laboratory to be taken in conjunction with CHE 342. Applications of basic techniques from CHE 341: DNA cloning and transformation; protein expression, purification, and characterization; and advanced biophysical methods. CO-REQUISITE(S): CHE 342. (1 quarter hour)

CHE 340 and CHE 341 are a prerequisite for this class.

CHE 344
BIOCHEMISTRY III
Undergraduate
Third in a three-course sequence, directed at those who wish an in-depth exploration of modern biochemistry. This course covers metabolism, nucleic acid structure and replication, transcription and translation. Also included are methods of biotechnology and an introduction to reading the primary literature. CO-REQUISITE(S): CHE 345. (3 quarter hours)

CHE 342 and CHE 343 are a prerequisite for this class.
CHE 345
EXPERIMENTAL BIOCHEMISTRY III
Undergraduate
Laboratory to be taken in conjunction with CHE 344. This course will introduce students to bioinformatics methods including protein function prediction and structure analysis, DNA/protein sequence analysis and alignment, and special topics laboratory techniques. CO-REQUISITE(S): CHE 344. (1 quarter hour)

CHE 342 and CHE 343 are a prerequisite for this class.

CHE 346
PRINCIPLES OF BIOCHEMISTRY
Undergraduate
This course covers the key topics in biochemistry. These include non-covalent interactions, acid/base chemistry, chemical and three-dimensional structures of proteins/nucleic acids/lipids, hemoglobin oxygen binding, cytoskeletal and motor proteins, enzyme mechanisms/kinetics, membrane and membrane proteins/transport, signaling, energy metabolism and biosynthesis. Formerly CHE 240.

CHE 232 or CHE 238 is a prerequisite for this class.

CHE 348
CHEMICAL BIOLOGY
Undergraduate
This course introduces students to a new discipline spanning the fields of chemistry and biology in which chemical techniques and tools, often compounds produced through synthetic chemistry are used to study and manipulate biological systems in an effort to unravel biological problems and systems. The course will take a case study approach. Techniques encountered in the case study will be studied in depth. Primary literature will be used extensively in the in depth case study.

CHE 344 is a prerequisite for this course.

CHE 360
MEDICINAL CHEMISTRY
Undergraduate
This course emphasizes organic chemical principles and reactions vital to drug design and drug action in the human body. Medicinal chemists design molecules that alter phenomena operating at the overlap of chemistry, biochemistry, cell biology, and pharmacology. This course introduces the conceptual frameworks and methods employed in drug development using case histories and mechanisms of clinically important drugs as illustrative examples.

CHE 234 or CHE 238 are prerequisites for this course.

CHE 362
DRUGS AND TOXICOLOGY
Undergraduate
This course covers the chemical and biological analysis of the metabolism and distribution of drugs, toxins and chemicals in animals and humans, and the mechanism by which they cause therapeutic and toxic responses. Metabolism and toxicity as a basis for drug development, metabolic polymorphisms and biomarkers of exposure are also covered.

CHE 234 or CHE 238 is a prerequisite for this class.

CHE 364
NUTRITION
Undergraduate
This is a one-quarter course focused on the advanced chemical aspects of human nutrition. The topics include the nutritive and toxic content of foods and health effects, a review of basic metabolic processes, nutrient transport and storage systems, cell signaling and regulation, and hormonal regulation and fuel utilization.

CHE 234 or CHE 238 and CHE 340 are a prerequisite for this class.
CHE 376
COMPUTATIONAL CHEMISTRY
Undergraduate
This course is designed to provide an accessible and practical introduction to computational chemistry. The course provides an overview of different methods commonly used in the field ranging from classical to quantum mechanical ab initio and density functional methods. PREREQUISITE(S): CHE302.

CHE 378
APPLIED SPECTROSCOPY
Undergraduate
Organic structure determination through the interpretation of spectral information.

(CHE234 and CHE235) or (CHE238 and CHE239) are prerequisites for this course.

CHE 392
INTERNSHIP
Undergraduate
Experiential learning experience in a government agency, industrial firm, business, or non-profit organization. (variable credit)

CHE 394
SEMINAR
Undergraduate
This course is required for all chemistry majors. This course is designed to enhance your ability to: critically read and summarize scientific literature, thoughtfully listen to a scientific seminar, articulate questions regarding a scientific seminar, and orally present a scientific paper. (2 quarter hours)

(CHE 234 and CHE 235) or (CHE 238 and CHE 239) and at least Junior year standing) or instructor permission is a prerequisite for this course.

CHE 397
RESEARCH
Undergraduate
This course allows a student to work with a faculty member on a research project. Faculty consent and research contract are required to register for the course. This course is typically completed in one to four quarters at the discretion of the research advisor. The student is expected to gain skills in laboratory techniques and procedures in pursuing answers to a research project. (variable credit)

Junior standing is a prerequisite for this class.

CHE 398
CHEMISTRY THESIS
Undergraduate
This course requires faculty-guided experimental exploration of a research topic and both written (thesis) and oral (seminar and defense) presentation of results. This course is typically completed in two or three quarters (though it may be completed in one quarter at the discretion of the research advisor). The student is expected to gain skills in laboratory techniques and procedures in pursuing answers to a research project. The student will choose a faculty mentor and a project. The project may be based on lab or field research. The grade for the thesis will be based on the written document as well as on the oral seminar and defense presented to the Chemistry students and faculty and the student will graduate “with honors” from the department. This course may be taken more than one time for credit. (variable credit)

Junior standing is a prerequisite for this class.

CHE 399
INDEPENDENT STUDY
Undergraduate
Independent study of chemistry on an informal basis by an individual in consultation with a department faculty member. Department consent required. (variable credit)
CHE 422
INORGANIC STRUCTURE AND REACTIVITY
Graduate
One of two courses in inorganic chemistry for advanced undergraduates and graduate students in the M.S. program. The course emphasis is variable, but topics covered will include the structure of inorganic compounds and inorganic reaction chemistry.

CHE 424
GROUP THEORY
Graduate
One of two courses in inorganic chemistry for advanced undergraduates and graduate students in the M.S. program. The course emphasis is variable, but the primary topics will be group theory and its application to inorganic compounds.

CHE 430
POLYMER SYNTHESIS
Graduate
This course focuses on the key synthetic organic chemistry methods for making polymers and coatings. A detailed consideration is given to the three types of polymerization reactions: step, chain, and ring-opening polymerizations. Practical application of polymer chemistry in society is a theme throughout the course.

CHE 431
POLYMER SYNTHESIS LABORATORY
Graduate
The goal of this lab course is to expose students to experimental polymer chemistry. This course focuses on the key synthetic methods for making polymers and basic structural characterization techniques. Practical application of polymer chemistry in society is a theme throughout the course. (2 quarter hours)

CHE 432
PHYSICAL CHEMISTRY OF POLYMERS
Graduate
This course looks at the broad subject of the physical chemistry of polymers and coatings. A detailed consideration is given to the role of molecular conformation and configuration in determining the physical behavior of polymers. Practical application of physical polymer chemistry in society is a theme throughout the course.

CHE 434
POLYMER CHARACTERIZATION
Graduate
This course looks at the broad subject of polymer characterization. A detailed consideration is given to major methods of analysis of chemical structure, molecular weight, morphology, and rheology. Practical application of polymer characterization in society is a theme throughout the course.

CHE 435
POLYMER CHARACTERIZATION LABORATORY
Graduate
The goal of this lab course is to expose students to hands-on polymer characterization techniques. This course will focus on the basic characterization techniques for determining structure and physical properties of polymers. Practical application of polymer characterization is a theme throughout the course. (2 quarter hours)

CHE 436
POLYMER TECHNOLOGY
Graduate
This course looks at the broad subject of the polymer and coatings technology. A detailed consideration is given to polymerization processes, and polymer and coatings processing. Practical application of polymer and coatings technology in society is a theme throughout the course.
CHE 438
MATERIAL SCIENCE
Graduate
This course looks at the broad subject of the materials science with emphasis on theory and applications of metals, ceramics, polymers, coatings and composites from atomic and macroscopic points of view. Practical application of materials science is a theme throughout the course.

CHE 442
PROTEIN STRUCTURE AND FUNCTION
Graduate
One of two courses in biochemistry for advance undergraduates and graduate students in the M.S. program. An in-depth exploration of protein structure and function, this course surveys the common experimental and bioinformatics methods used by modern biochemists to study protein structure, folding, evolution, engineering, conformational dynamics, and enzymatic reactivity. Students will gain experience with and working knowledge of online databases and tools used by biochemists to formulate and test hypotheses related to the topics of the course.

CHE 444
ADVANCED TOPICS IN PROTEIN BIOCHEMISTRY
Graduate
One of two courses in biochemistry for advanced undergraduates and graduate students in the M.S. program. Discussion and seminars in selected areas.

CHE 450
ADVANCED MECHANISTIC ORGANIC CHEMISTRY
Graduate
One of two courses in organic chemistry for advanced undergraduates and graduate students in the M.S. program. This course emphasizes physical organic chemical models and experimental methods that are used to understand, predict, and control the outcomes of reactions in organic chemistry.

CHE 452
ADVANCED SYNTHETIC ORGANIC CHEMISTRY
Graduate
One of two courses in organic chemistry for advanced undergraduates and graduate student in the M.S. program. This course emphasized classic and modern synthetic methods.

CHE 464
COATINGS SCIENCE AND TECHNOLOGY
Graduate
This course will provide a concise review of the current scientific understanding in the field of polymer and coatings science with numerous practical applications to produce a basic understanding of polymers and coatings technology.

CHE 466
COATINGS PROPERTIES AND APPLICATIONS
Graduate
This course will provide a concise review of basic principles involved in the characterization, properties, applications, and performance of coatings.

CHE 470
STATISTICAL THERMODYNAMICS
Graduate
One of three courses in physical chemistry for advanced undergraduates and graduate students in the M.S. program. CHE470 is a course designed to provide an in-depth presentation of thermodynamics from a molecular perspective. The course builds upon foundations given in undergraduate courses on quantum chemistry, and thermochemistry. Starting with some basic principles of probability and probability distribution, it proceeds to the Boltzmann distribution law, and an introduction to microcanonical ensembles; then using the expressions of the quantum energy levels of some simple models, a systematic exploration of the proper formulation, evaluation, and application of partition functions is given. In short, this course develops a methodology to compute thermodynamic properties of macroscopic systems from knowledge of the quantized energies of individual molecules.
CHE 472
MOLECULAR DYNAMICS
Graduate
One of three courses in physical chemistry for advanced undergraduates and graduate students in the M.S. program. CHE472 builds upon topics covered in a typical undergraduate-level course on chemical kinetics. Here, focus is placed on kinetics at the molecular level with an aim to understand how a reaction system behaves as it passes over a potential energy surface. Depending on time and student interest, specific topics in this course may include reaction rate theory, scattering theory, and surface interactions. Computer simulations may also be incorporated in this course.

CHE 474
ADVANCED QUANTUM CHEMISTRY
Graduate
One of three courses in physical chemistry for advanced undergraduates and graduate students in the M.S. program. CHE474 is focused on quantum mechanics and will build on fundamental principles introduced in undergraduate quantum chemistry, including an examination of the particle-in-a-box, rigid rotor, and harmonic oscillator models. More advanced quantum mechanical topics such as the Dirac representation, wave packet motion, and time-dependent perturbation theory may also be explored. These topics can be used to understand phenomena such as coherent control of reactions, vibrational energy redistribution, and electronic energy transfer. The primary goals of this course are to: 1) increase students' understanding of quantum mechanical principles; 2) apply quantum mechanics to spectroscopic problems; and 3) expose students to modern literature related to quantum mechanics.

CHE 480
SPECIAL TOPICS IN ANALYTICAL CHEMISTRY
Graduate
This course may be any topic related to chemical analysis, such as mass spectroscopy, electrochemical analysis, principles of chromatography, polymer properties, coatings, sampling methods, design of experiments, etc. This course may be repeated if the topics are different. (2 quarter hours)

CHE 482
SPECIAL TOPICS IN BIOCHEMISTRY
Graduate
This course may cover any topic related to biochemistry or medicinal chemistry. This course may be repeated if the topics are different. (2 quarter hours)

CHE 484
SPECIAL TOPICS IN INORGANIC CHEMISTRY
Graduate
This course may cover any topic related to inorganic chemistry. This course may be repeated if the topics are different. (2 quarter hours)

CHE 486
SPECIAL TOPICS IN ORGANIC CHEMISTRY
Graduate
This course may cover any topic related to organic chemistry. This course may be repeated if the topics are different. (2 quarter hours)

CHE 488
SPECIAL TOPICS IN PHYSICAL CHEMISTRY
Graduate
This course covers specific topics in the area of physical chemistry. Examples of topics include single molecule techniques, molecular electronic spectroscopy, interaction of electromagnetic radiation with particulate matter, and hydrogen bonding. This course may be repeated if the topics are different. (2 quarter hours)

CHE 490
ADVANCED PROBABILITY AND STATISTICS
Graduate
This course introduces students to statistical methods that can be used in error analysis of experimental data. Computers are used to apply concepts discussed in lecture to actual data sets. Offered: Winter of even-numbered years. Familiarity with Excel or a modern programming language is strongly recommended.
CHE 494  
**SCIENCE WRITING AND COMMUNICATION**  
*Graduate*

The goal of this course is to prepare students to be effective writers and communicators in academic and industrial settings. The course is organized around learning how to write a scientific argument via modules that cover the nature of scientific fact, different genres of scientific writing (e.g., reports and proposals), writing collaboratively and presenting a scientific argument to a stakeholder audience.

CHE 497  
**RESEARCH**  
*Graduate*

This course requires independent experimental exploration under the supervision of a faculty member. Thesis students must write a thesis based on their research project and successfully complete a two-part oral exam. The first part of the examination consists of the thesis presentation and defense; the second part is an oral examination concerning the student's general knowledge of chemistry. (variable credit)

CHE 502  
**CANDIDACY CONTINUATION**  
*Graduate*

Required of all students who are not registered for regular courses but who occasionally utilize university facilities during completion of course requirements and/or research. This course carries no credit.

CHN 101  
**BASIC CHINESE I**  
*Undergraduate*

This course is an introduction to the study of standard modern Chinese, often referred to as Mandarin. It adopts the modern Chinese phonetic system, hanyupinyin, using simplified characters. This course aims at functional proficiency by developing the four aspects of communicative capabilities -- listening, speaking, reading, and writing -- through intensive practice. It also strives to improve students' structural accuracy, which in turn will increase functional proficiency, by dealing with the grammatical rules in such a way that students can internalize them. As language and culture interact with each other, this course will also help students gain insights into the Chinese people, their life, culture, customs and habits.

CHN 101S  
**BASIC CHINESE I FOR SUMMER**  
*Undergraduate*

(Covers the equivalent of CHN 101 and the first half of CHN 102.) The first half of beginning Chinese (Mandarin). Listening to, speaking, reading, and writing Chinese in a cultural context for the beginning student.

CHN 102  
**BASIC CHINESE II**  
*Undergraduate*

This course is the second part of the three-quarter sequence on Basic Chinese. It helps students develop basic conversation skills as well as modern Chinese literacy. The dialect to be taught in the course is Mandarin. Simplified Chinese characters are mainly used in reading and writing although students are also exposed to the traditional form of Chinese characters throughout the course.

CHN 103  
**BASIC CHINESE III**  
*Undergraduate*

This course continues to broaden and strengthen the foundation of Chinese language in both written and spoken formats. Based on knowledge gained in Basic Chinese I and II in terms of the origin and the elements of Chinese characters, the course expands students' collection of Chinese words and phrases to apply in both reading and writing. With the understanding of the phonetic systems of spoken Chinese as well as the structure of Chinese characters, students will continue to reflect on their learning and will share methods used to retain what they have learned in the class. The course combines language study with the exploration of Chinese culture and history.
CHN 103S  
BASIC CHINESE III FOR SUMMER  
Undergraduate  
(Covers the equivalent of the second half of CHN 102 and all of CHN 103.) The second half of beginning Chinese (Mandarin). Further work on the basic elements of the Chinese language, spoken as well as written, with due regard to the cultural context of Chinese expression. CHN 101S or equivalent is recommended.

CHN 104  
INTERMEDIATE CHINESE I  
Undergraduate  
This course is the first part of the three-quarter course in Intermediate Chinese. It is offered to help students develop higher-level conversation skills as well as modern Chinese literacy. The dialect to be taught in the course is Mandarin. Simplified Chinese characters are mainly used in reading and writing, although students are also exposed to the traditional form of Chinese characters throughout the course. CHN 103 or equivalent, including placement test or permission of instructor, is recommended.

CHN 105  
INTERMEDIATE CHINESE II  
Undergraduate  
This course is the second part of the three-quarter course in Intermediate Chinese. It is offered to help students develop higher-level conversation skills as well as modern Chinese literacy. The dialect to be taught in the course is Mandarin Chinese. Simplified Chinese characters are mainly used in reading and writing, although students are also exposed to the traditional form of Chinese characters throughout the course. CHN 104 or equivalent, including placement test or permission of instructor, is recommended.

CHN 106  
INTERMEDIATE CHINESE III  
Undergraduate  
This course is the third part of the three-quarter course in Intermediate Chinese. It is offered to help students develop higher-level conversation skills as well as modern Chinese literacy. The dialect to be taught in the course is Mandarin. Simplified Chinese characters are mainly used in reading and writing, although students are also exposed to the traditional form of Chinese characters throughout the course. CHN 105 or equivalent, including placement test or permission of instructor, is recommended.

CHN 110  
INTENSIVE BASIC CHINESE I (FOR PARTICIPANTS IN STARTALK PROGRAM)  
Undergraduate  
An intensive introduction to reading, writing, and speaking Mandarin in a cultural context for the beginning student. For participants in the STARTALK PROGRAM.

CHN 111  
INTENSIVE BASIC CHINESE II (FOR PARTICIPANTS IN STARTALK PROGRAM)  
Undergraduate  
An intensive introduction to reading, writing, and speaking Mandarin in a cultural context for the beginning student; continues CHN 110. For participants in the STARTALK Program.

CHN 117  
INTENSIVE BASIC CHINESE I  
Undergraduate  
This is part I of a two-course sequence of hybrid Basic Chinese which is equivalent to the 1st-year sequence CHN101-102-103. The hybrid course is offered in two modules: Online Learning Module (OLM) in which students learn the online content on our course website and finish on-line assignments during the weekdays and the Face-to-Face Module (FtFM) in which you take tests and have conversational practices in a weekly class meeting every Friday afternoon. The class will focus on developing students' basic conversational and literary proficiency in Mandarin Chinese.
CHN 118
INTENSIVE BASIC CHINESE II
Undergraduate
This is part II of a two-course sequence of hybrid Basic Chinese which is equivalent to the 1st-year sequence CHN101-102-103. The hybrid course is offered in two modules: Online Learning Module (OLM) in which students learn the online content on the course website and finish on-line assignments during the weekdays and the Face-to-Face Module (FtFM) in which you take tests and have conversational practices in a weekly class meeting. The class will focus on developing students’ basic conversational and literary proficiency in Mandarin Chinese. CHN 117 or equivalent, including placement test or permission of instructor, is recommended.

CHN 130
MOLILSAP STUDY ABROAD
Undergraduate
This course is specially designed to complement the Modern Language Introductory Languages Study Abroad programs, linked to the third quarter of the first year language program. The course will be taught abroad.

CHN 141
INTENSIVE CHINESE
Undergraduate
Students will be encouraged to engage in primary research and field work, visiting local Asian American communities and community-based organizations. While the course will provide students with an introduction to issues linked to community-rooted research in Chicago, it will also enhance an awareness of the challenges of integrating: media or popular representations with reality; theory with practice, and "objective" research with social advocacy. Gaining new perspectives, students will be empowered to apply such knowledge and research skills in conducting a study of any community, particularly those that are least understood, such as the Asian American communities. Through such studies, students will take active roles in bringing such communities from the margins to the center of investigation, contributing to academic and popular interests.

CHN 197
SPECIAL TOPICS IN CHINESE
Undergraduate
See schedule for current offerings.

CHN 198
STUDY ABROAD
Undergraduate
Variable credit.

CHN 199
INDEPENDENT STUDY
Undergraduate
Variable credit.

CHN 201
ADVANCED CHINESE I
Undergraduate
This is the first course of third-year Chinese. Students will improve their communicative competence in all four areas of listening, speaking, reading, and writing. Emphasis will be on expansion of vocabulary, the mastery of more complex structural patterns and grammatical concepts, as well as the students' ability to apply in actual communication what they have learned in the classroom. CHN 106 or equivalent, including placement test or permission of instructor, is recommended.

CHN 202
ADVANCED CHINESE II
Undergraduate
This course is offered to help students develop higher-level conversation skills as well as modern Chinese literacy. The dialect to be taught in the course is Mandarin. Simplified Chinese characters are mainly used in reading and writing, although students are also exposed to the traditional form of Chinese characters throughout the course. CHN 106 or equivalent, including placement test or permission of instructor, is recommended.
CHN 203
ADVANCED CHINESE III
Undergraduate
This course is the third part of the three-quarter sequence in Advanced Chinese. It is offered to help students develop higher-level conversation skills as well as modern Chinese literacy. The dialect to be taught in the course is Mandarin. Simplified Chinese characters are mainly used in reading and writing, although students are also exposed to the traditional form of Chinese characters throughout the course. CHN 106 or equivalent, including placement test or permission of instructor, is recommended.

CHN 211
LANGUAGE AND SOCIETY IN MODERN CHINA
Undergraduate
This course explores contemporary society and culture through readings and discussions about the features and history of languages spoken in Mainland China, Taiwan, and Hong Kong. The course explores the mutual influence between language and cultural traditions including, social practices and values; the recent economic boom, the Internet; and English. The course is designed as a companion course to the intensive Chinese language study in the Chinese Summer Abroad program in Shanghai. The pre-travel portion of the course helps prepare students for their stay in Shanghai by introducing them to the general features of the society, culture and history. The on-site and post-travel portions will engage students in reflection, analysis and understanding of the experience. CHN 106 or equivalent, including placement test or permission of instructor, is recommended.

CHN 252
INTRODUCTION TO COMMERCIAL CHINESE
Undergraduate
This course will help students develop basic interpretive, presentational, and interactive skills that are needed in business-related Chinese social contexts. Students will learn pertinent vocabulary, idiomatic expressions, cultural information and etiquette in four conversational contexts as presented in four units in this course. Mandarin Chinese is used in the majority of instruction, although English is also employed to explain certain cultural information and relevant business etiquette. CHN 106 or equivalent, including placement test or permission of instructor, is recommended.

CHN 297
SPECIAL TOPICS IN CHINESE
Undergraduate
See schedule for current offerings.

CHN 298
STUDY ABROAD
Undergraduate
Variable credit.

CHN 299
INDEPENDENT STUDY
Undergraduate
Variable credit.

CHN 301
ADVANCED SPEAKING
Undergraduate
This course is designed to help post-intermediate students of Chinese develop advanced-level Mandarin speaking skills. Students will acquire new vocabulary, structural patterns and language registers that will allow students to comprehend and discuss issues in Chinese in various social contexts. As this is an advanced level course, Chinese is the medium of instruction and is the focus of all class activities. Minimal English is expected in class communication. CHN 106 or equivalent, including placement test or permission of instructor, is recommended.

CHN 302
ADVANCED READING
Undergraduate
This course is designed to help post-intermediate students of Chinese to develop reading and writing skills in standard (Mandarin) Chinese, dealing with intermediate to advanced texts with carefully designed exercises to guide comprehension and strengthen reading and writing strategies. As this is an advanced level course, Chinese is the medium of instruction and is the focus of all class activities. Minimal English is expected in class communication. CHN 106 or equivalent, including placement test or permission of instructor, is recommended.
CHN 303
ADVANCED WRITING
Undergraduate
This course is the third section of the fourth-year Chinese sequence with the aim of helping students develop advanced-level reading and writing skills in standard (Mandarin) Chinese. This course will focus on developing students' writing skills on formal and abstract topics. Students will also be exposed to various genres of written Chinese such as newspaper, magazines, and contemporary novels. As this is an advanced level course, Chinese is the medium of instruction and is the focus of all class activities. Minimal English is expected in class communication. CHN 106 or equivalent, including placement test or permission of instructor, is recommended.

CHN 305
TANG DYNASTY LITERATURE AND CULTURE
Undergraduate
This is an introductory course to the history, art and interpretation of Tang Poetry, the zenith of classical Chinese poetry. Introductory readings are in English, and original poems in simplified and traditional Chinese will be selected for reading and discussion. Attention will also be given to the rewriting of Chinese literature in the age of globalization. CHN 106 or equivalent, including placement test or permission of instructor, is recommended.

CHN 319
CONTEMPORARY CHINESE LITERATURE
Undergraduate
This is a survey course of Chinese literary history of the past seven decades in the contexts of Chinese historical and cultural circumstances. Students will examine representative works of the major literary genres such as poetry, novel (in excerpt,) short story, drama (in excerpt ), and the most recent online forms, such as blog essay. CHN 106 or equivalent, including placement test or permission of instructor, is recommended.

CHN 320
CHINESE FOR BUSINESS
Undergraduate
This course aims to develop advanced-level oral and literary skills that are needed in business-related Chinese social contexts. Cultural information will be covered as an integral part of business communication. CHN 106 or equivalent, including placement test or permission of instructor, is recommended.

CHN 321
TRANSLATION
Undergraduate
Boosted by globalization and the Internet, the demand for translators is on the rise. This demand creates career opportunities for people with the knowledge of a second language. Chinese 321 - Translation Practice and Theories - is designed to help Chinese-language students grasp the skills and theories needed to render Chinese-to-English and English-to-Chinese translations. Through hands-on practice, a survey of major theories of translation, group and class discussions, and lectures, this course will teach students how to comprehend source texts accurately and deeply from both linguistic and cultural perspectives; how to express faithfully, fully, and coherently in the target language the idea of a source text; how to apply grammatical rules, rhetorical devices, diction, etc. in translation; how to use editing skills to enhance translation results; and how to use different language styles to render different materials. CHN 106 or equivalent, including placement test or permission of instructor, is recommended.

CHN 330
MODERN CHINESE LITERATURE: 1919 - 1949
Undergraduate
This course studies some of the highlights of modern Chinese literature since the May 4th Movement in 1919 to the pre-Mao era in 1949--literature produced during a period of unprecedented historical upheavals and that itself has been an arena for political, cultural, and aesthetic conflicts. Through a close study of some of the significant fiction, drama, and poetry students will not only gain a keen understanding of the central themes of modern Chinese but also a better understanding of modern Chinese society. CHN 106 or equivalent, including placement test or permission of instructor, is recommended.
CHN 360
CHINESE POPULAR CULTURE AND SOCIAL MEDIA
Undergraduate
The course aims to survey contemporary Chinese pop culture in city life as well as social, cultural, and political dynamics shaped by and reflected in Chinese social media. Print and online media reports, excerpts from popular TV shows, films, documentaries, and literature will be used as reading and class discussion materials. Language use in various media genres will be discussed as well. Students are expected to use Mandarin Chinese as the primary language in the classroom. CHN 106 or equivalent, including placement test or permission of instructor, is recommended.

CHN 370
CHINESE CULTURE THROUGH FILM
Undergraduate
This course is a survey course in which a selection of films from the internationally acclaimed "new Chinese cinema" are used to help students better understand the history, politics, society and economy of China in different decades of the twentieth century. Students will place each film in its historical context, considering both its aesthetic form and sociopolitical content. Although both English and Mandarin will be used in class, students need to have good command of the Chinese language to understand and discuss sociolinguistic issues in certain films. CHN 106 or equivalent, including placement test or permission of instructor, is recommended.

CHN 395
FOREIGN LANGUAGES ACROSS THE CURRICULUM
Undergraduate
The two credit FLAC course allows students to enrich their experience in the co-required course through added reading, writing, listening and speaking activities in Chinese. Students must have the equivalent of 106 or higher ability in Chinese to take this two credit component. Please contact the Department of Modern Languages if you have questions about this course or about language placement.

CHN 397
SPECIAL TOPICS IN CHINESE
Undergraduate
See schedule for current offerings.

CHN 398
STUDY ABROAD
Undergraduate
Variable credit.

CHN 399
INDEPENDENT STUDY
Undergraduate
Variable credit.

CHN 401
ADVANCED SPEAKING
Graduate
Advanced practice of speaking skills in Mandarin, focusing on expanding vocabulary and information needed for the discussion of topics in the target language. Three years of college study or equivalent knowledge recommended.

CHN 402
ADVANCED READING
Graduate
Advanced practice of reading skills in Mandarin, focusing on increasing vocabulary and reinforcement of grammatical knowledge, using textual clues to find the meanings of unknown words.
CHN 403
ADVANCED WRITING
Graduate
Advanced practice of writing skills in Mandarin, focusing on standardized formal writing practices ranging from the writing of letters to the writing of essays, including both descriptive and expository styles. Students in this course will develop vocabulary, expressions, and reading and writing strategies through working with historical texts. They are also expected to develop deeper understanding of the content, as well as the special historical and cultural contexts, of the selected texts. All assignments will be submitted in Mandarin Chinese.

CHN 405
TANG DYNASTY LITERATURE AND CULTURE
Graduate
This is an introductory course to the history, art and interpretation of Tang Poetry, the zenith of classical Chinese poetry. All the introductory readings are in English, and original poems in simplified and traditional Chinese will be selected for reading and discussion. Attention will also be given to the rewriting of Chinese literature in the age of globalization.

CHN 419
CONTEMPORARY CHINESE LITERATURE
Graduate
This is a survey course to the Chinese literary history of the past seven decades in the contexts of Chinese historical and cultural circumstances. Students will examine representative works of the major literary genres such as poetry, novel, short story, drama, and the most recent online forms, such as blog essay.

CHN 420
CHINESE FOR BUSINESS
Graduate
This course aims to develop advanced-level oral and literary skills that are needed in business-related Chinese social contexts. Cultural information will be covered as an integral part of business communication.

CHN 421
TRANSLATION
Graduate
Boosted by globalization and the Internet, the demand for translators is on the rise. This demand creates career opportunities for people with the knowledge of a second language. Chinese 421 - Translation Practice and Theories - is designed to help Chinese-language students grasp the skills and theories needed to render Chinese-to-English and English-to-Chinese translations. Through hands-on practice, a survey of major theories of translation, group and class discussions, and lectures, this course will teach students how to comprehend source texts accurately and deeply from both linguistic and cultural perspectives; how to express faithfully, fully, and coherently in the target language the idea of a source text; how to apply grammatical rules, rhetorical devices, diction, etc. in translation; how to use editing skills to enhance translation results; and how to use different language styles to render different materials.

CHN 430
MODERN CHINESE LITERATURE: 1919 - 1949
Graduate
This course studies some of the highlights of modern Chinese literature since the May 4th Movement in 1919 to the pre-Mao era in 1949--literature produced during a period of unprecedented historical upheavals and that itself has been an arena for political, cultural, and aesthetic conflicts. Through a close study of some of the significant fiction, drama, and poetry, students will not only gain a keen understanding of the central themes of modern Chinese but also a better understanding of modern Chinese society.

CHN 454
INTRODUCTION TO CHINESE LINGUISTICS
Graduate
This course introduces students to modern Mandarin Chinese linguistics. Students will explore the historical evolution of Chinese and understand the basic characteristics of Mandarin.
CHN 460
CHINESE POPULAR CULTURE AND SOCIAL MEDIA
Graduate
The course aims to survey contemporary Chinese pop culture in city life as well as social, cultural, and political dynamics shaped by and reflected in Chinese social media. Print and online media reports, excerpts from popular TV shows, films, documentaries, and literature will be used as reading and class discussion materials. Language use in various media genres will be discussed as well. Students are expected to use Mandarin Chinese as the primary language in the classroom.

CHN 470
CHINESE CULTURE THROUGH FILM
Graduate
Survey of major twentieth-century Chinese films illustrating the history, politics, society and economy of modern China, with special attention to the continuity between tradition and modernity.

CHN 496
PRACTICUM IN CHINESE INSTRUCTION
Graduate
Supervised practice in language instruction, paired with a mentor instructor in a beginning or intermediate language course. Students observe a class, teach a lesson or lessons, assist in assessment and lesson planning, and complete individualized assignments to develop their skills as classroom language instructors. Repeatable.

Variable credit.

CHN 499
INDEPENDENT STUDY
Graduate
Variable credit.

CMN 101
INTRODUCTION TO HUMAN COMMUNICATION
Undergraduate
This course provides an introduction to the field of relational, group and organizational communication. Students become acquainted with the basic terms, concepts and theoretical perspectives used to examine communication in dyadic, group and organizational contexts.

CMN 102
INTRODUCTION TO MASS COMMUNICATION
Undergraduate
This course offers students a broad overview of the mass media (print, film, video, recorded music, radio, television and the internet) with a particular focus on how these media impact our everyday lives. Students will develop critical frameworks for understanding how power operates across the media spheres of production, circulation, representation and reception. Attention is placed on how the social categories of race, class, gender, sexuality, ethnicity, age and nationality inform each of these media spheres. The course also considers how recent developments in digital technologies, media convergence and globalization have transformed our media culture.
CMN 103
INTERCULTURAL COMMUNICATION
Undergraduate
Examines the role culture plays in interethnic and international communication. Explores differences and similarities in cultural values and communication behaviors between and among diverse cultures and develops intercultural competence. Critiques stereotypes and increases cultural sensitivity.

CMN 104
PUBLIC SPEAKING
Undergraduate
Introduction to the effective communication skills required for public speaking in organizational and public settings. The course stresses the important role public speaking plays in a democratic society and encourages students to address topics of a political and/or social nature. The course emphasizes the process of researching, preparing and presenting a variety of speeches. Additionally, it includes units on delivery and performance skills, effective use of language for the spoken word, clear organization of messages, critical listening and thinking skills, and tailoring messages to a variety of audiences in a diverse society. (FORMERLY INTC 220)

CMN 294
IDENTIFYING YOUR MARKETABLE SKILLS
Undergraduate
In this 2-credit course, you will learn how your academic studies, as well as your work and campus activities, will transfer to the workplace. By the end of the course, you will know how to articulate both your academic accomplishments and relevant skills in a way that will impress potential employers.

CMN 394
COMMUNICATION INTERNSHIP
Undergraduate
This course is for communication majors and minors who meet eligibility requirements. Students will learn career planning skills, explore the organizations in which they work, gain an understanding of how they contribute to their organizations, and discuss societal and world issues as they affect their workplaces. The final project is a career e-portfolio.

CMN 395
COMMUNICATION INTERNSHIP SPECIAL TOPICS
Undergraduate
Using their internship site as a source of information, students will identify transferable skills and hone personal and professional traits that will keep them gainfully employed regardless of the state of the economy.

CMN 396
CAPSTONE IN COMMUNICATION
Undergraduate
Making a difference: Communication Senior Capstone. Exploration of student skills, knowledge and interests, as well as how these might have a concrete contribution to contemporary society. Students cannot earn credit for both CMN396 and PRAD396.

Status as a College of Communication major with senior standing is a prerequisite for this class.

CMN 398
STUDY ABROAD
Undergraduate
Expand international learning opportunities that effectively prepare students to be successful, innovative leaders and community members in a diverse global society. NOTE: CMN 398 meets the Junior Year Experiential learning requirement. To count for MCS credit, topic of Study Abroad must be approved by program director to count for History/Criticism elective.

CMN 399
INDEPENDENT STUDY
Undergraduate
PREREQUISITE(S): Written permission of supervising faculty member and of the departmental chair is necessary before registration. (variable credit)
CMN 591
INTERNSHIP
Graduate
Using their internship site as a source of information, students will identify transferable skills and hone personal and professional traits that will keep them gainfully employed regardless of the state of the economy.

Status as a Graduate Communications student is a prerequisite for this class

CMN 598
STUDY ABROAD
Graduate
Expand international learning opportunities that effectively prepare students to be successful, innovative leaders and community members in a diverse global society.

CMNS 205
COMMUNICATION, CULTURE AND COMMUNITY
Undergraduate
Examines the relationships among culture, communication, institutions, and public and private life. Students explore the possibilities and problems of contemporary forms of community through service in community organizations. The course also fulfills the junior year experiential learning requirement through community based service learning. (Formerly INTC 205)

CMNS 206
COMMUNICATING MULTICULTURAL IDENTITIES
Undergraduate
This course examines identity from a critical/poststructuralist position, approaching the notion of identity as a performative and discursive production within complex systems of power, privilege, and oppression. Together, the class will examine the ways in which discourse influences our performances of personal identity as well as the ways that it constructs our ideas about other identities (gender, race, sexuality, etc.). Through reading, discussion, and reflection, we will interrogate how individual and group identities are theorized, constructed, negotiated, and transformed; how identity is shaped by rhetorical discursive and non-discursive practices; and how identity construction is situated in historical/social/political/ideological contexts. (Formerly INTC 206)

CMNS 211
INTERPERSONAL COMMUNICATION
Undergraduate
An introduction to the factors that shape communication between two people. Topics include self-concept formation, perception, message formation, verbal and nonverbal communication, active listening, and defensiveness. (Formerly RELC 211)

CMNS 230
PERFORMANCE: COMMUNICATION, CREATIVITY AND THE BODY
Undergraduate
Introduction to performance studies, examining the persuasive, cultural, and artistic dimensions of embodied communication. Through "on our feet" engagement, students will study the role of identity, aesthetics, space, genre, and literary form in their experience with cultural texts, including poetry, prose, and narratives. Involves critical and creative analyses of texts in preparation and reflection of live performance. The course explores the how the body, voice, and movement are central to artistry and meaning. (Formerly INTC 230)

CMNS 290
COMMUNICATION WORKSHOP (VARIABLE TOPICS)
Undergraduate
This course allows students to sample a range of hands on, practical offerings in communication that can enhance their knowledge and expertise. Topics offered include survey design and focus groups. (2 quarter hours)
CMNS 291
RESEARCH METHODS
Undergraduate
This course is an introduction to the study of communication through the observation and analysis of empirical (i.e. aspects of the observable world) data. It will stress how to form appropriate questions from the theories (or hunches, dreams etc.) and rigorously test these propositions (quantitatively and qualitatively) to see how well they correspond to the world outside ourselves. An added benefit of the course will be to show how to be a more informed judge of the claims of others. The format of the course is lecture/discussion. Students cannot earn credit for both CMNS 291 and PRAD 291.

CMNS 304
COMMUNICATION AND ENTREPRENEURSHIP
Undergraduate
This seminar provides an overview of how theories and concepts of relational communication have and can be used to create business models. This course will also explore how entrepreneurial processes and frameworks can be used to create business models using a lean startup approach. (Formerly RELC 304)

CMNS 305
PERFORMANCE STUDIES
Undergraduate
The course traces the shift from the field of Oral Interpretation to the emergence of Performance Studies as a discipline, with particular attention to the primary theorists and practitioners who have set the foundation and scope of the field of Performance. Taking an historical approach to the development of the field, the course will explore performance epistemologies, performative methodologies, and performative theories, offering students the opportunity to study and engage contemporary approaches to performance research.

CMNS 306
TOPICS IN PRESENTATION
Undergraduate
Courses offer advanced analysis of presentational forms. Students will enact presentational theories in relational, small group, or public communication contexts.

CMNS 307
TOPICS IN POLITICAL AND SOCIAL COMMUNICATION
Undergraduate
Examines intensively one or more issues in the Culture and Communication Track. The topics differ each term focusing on a particular area of discourse such as environmental communication, political communication, and sexuality and communication. (Formerly INTC 307)

CMNS 308
TOPICS IN INTERCULTURAL COMMUNICATION
Undergraduate
Examination of the application of linguistic and rhetorical theories to various specializations in cultural discourse. The course focuses each term on one particular area such as semiotics, language acquisition, or language and power. (Formerly INTC 308)

CMNS 309
INTERNATIONAL/GLOBAL COMMUNICATION
Undergraduate
Focuses on the world of international/global news flow and media systems in a comparative manner. Emphasizes changes that have followed the modernization of the media, the impact of globalization on individual countries, attempts to preserve the cultural character of domestic media content in the face of increased amounts of imported products, and the effects of new communication technologies, particularly the Internet. (Formerly INTC 309)

CMNS 310
DISCOURSE ANALYSIS
Undergraduate
An analytical examination of the ways in which people locate meaning, cooperate, coordinate, and find coherency in conversations and in other forms of discourse, both spoken and written. The class will analyze and disclose meanings hidden in public discourse. (Formerly INTC 310)
CMNS 311
TOPICS IN RELATIONAL COMMUNICATION
Undergraduate
Explores specialized topic within the field of interpersonal communication. Past topics have included: emotions & communication, gender & its relation to interaction, the "social construction" of interpersonal realities, etc.  (Formerly RELC 311)

CMNS 312
EVOLUTION AND COMMUNICATION
Undergraduate
This seminar explores how communication, across a variety of topics, can be understood with respect to the theory of evolution. Specifically, this course examines how millions of years of human evolution influences how people interact in their personal and social relationships. (Formerly RELC 312)

CMNS 313
NONVERBAL COMMUNICATION
Undergraduate
This course surveys various conceptual areas generally subsumed under the broad rubric of nonverbal communication. Topics include: physical appearances, gestures, face and eye behavior, vocalics, proxemics, touch, time, environmental contexts as well as application of nonverbal behaviors to specific interpersonal communication contexts. (Relational, Group, Organizational) (Formerly RELC 313)

CMNS 314
FAMILY COMMUNICATION
Undergraduate
This course surveys topics relevant to understanding communication phenomena in the setting of the family. Topics include: family systems, patterns, meaning, themes, roles and types, family life cycles, stressors and conflict, changing family forms and contexts. (Relational, Group, Organizational)  (Formerly RELC 314)

CMNS 315
HEALTH COMMUNICATION
Undergraduate
This survey course examines communication as the principle means by which health care is delivered, understood, and experienced. The course surveys the theory and practice of communication as it relates to health in a range of contexts (e.g. interpersonal, small group, organizational, public and/or mediated contexts) with a particular emphasis on critical thinking.

CMNS 318
CLOSE RELATIONSHIPS
Undergraduate
This course examines the role of communication in the development, maintenance, and deterioration of romantic attachments. Topics include attraction, intimacy and self-disclosure, attachment beliefs, jealousy, satisfaction, commitment, trust, betrayal, conflict, autonomy, interdependence, etc.  (Relational)  (Formerly RELC 318)

CMNS 319
THE DARK SIDE OF PERSONAL RELATIONSHIPS
Undergraduate
This course explores the "dark side" of interpersonal communication by examining the growing literature on the troubling or problematic aspects of close relationships. Topics covered include relational dilemmas, relational control and dominance, hurtful messages, paradoxical communication, social predicaments, relational transgressions, privacy violations, physical abuse, verbal aggression, etc.  (Formerly RELC 319)

CMNS 320
DECEPTIVE COMMUNICATION
Undergraduate
Explores the use of deceptive communication in social and personal relationships from a range of theoretical perspectives including ethics, evolutionary biology, linguistics, social and developmental psychology and jurisprudence.  (Formerly RELC 320)
CMNS 321
CULTURAL AND SYMBOLIC CRITICISM
Undergraduate
Introduction to the critical methodologies of rhetorical analysis. Students are instructed in ways to become more reflective consumers of discourse by examining how rhetoric instructs reality, shapes the social and political agenda and engages questions of ethics, power and persuasion. The course promotes a critical awareness of the role symbols play in influencing human perception, attitude, and action in a diverse culture. (Formerly INTC 321)

CMNS 323
SOCIAL MOVEMENTS
Undergraduate
This course examines the rhetoric of social movements throughout American History. As a rhetoric class, the focus is primarily on the symbolic creation of movements in order to provide background of the political and social events that gave rise to the movement. Using readings from a variety of sources, we will investigate the discursive construction of power as it relates to society and politics. The class will take a case-study approach to examining social movement rhetoric, exploring the discourse that has served to resist oppressive, or perceptively oppressive, systems. (Formerly INTC 323)

CMNS 324
CULTURE OF CONSUMPTION
Undergraduate
Introduces students to the critique of our consumer culture. Teaches students how to be critical consumers and understand how to be critical consumers and understand how we consume lifestyles, images, aesthetics, and desire through our shopping patterns. Provides theoretical, observational, and critical tools that allow students to critique patterns of consumption, the production of culture through consumption, and how consumption is a means of communication. (Formerly INTC 324)

CMNS 325
PROMOTING SUSTAINABLE PRACTICES
Undergraduate
Provides a foundation in the communication skills necessary for achieving conservation goals. Introduces communication approaches such as social marketing, citizen participation, public campaigns, and environmental interpretation that have proven effective in the work of conservation professionals. (Formerly INTC 325)

CMNS 326
ENVIRONMENTAL POLITICS AND RHETORIC
Undergraduate
Rhetorical perspective on environmental public discourse. Course also explores the relationship between rhetorically constituted ideas about nature and the development of political and social ideas, institutions, and practices that inform our understanding of the human place in the environment. (Formerly INTC 326)

CMNS 327
RESEARCHING RELATIONSHIPS
Undergraduate
Researching Relationships provides an overview of the concepts, methods and tools by which interpersonal/relational research is designed, conducted, interpreted, and critically evaluated. Quantitative, qualitative, and critical interpersonal/relational research will be examined. The primary goals of the course are to help students become knowledgeable consumers and producers of relational communication research by developing skills in gathering, organizing, interpreting and presenting research information using informed, competent, and ethical methods.

CMNS 328
HISTORY OF RHETORIC AND COMMUNICATION
Undergraduate
Offers an overview of historical foundations of the communication field. Examines how the formulations of rhetoric by various thinkers derived from cultural, religious, and political contexts shape human consciousness and communication patterns. Students read primary and secondary materials on classical rhetoric and rhetoric of diverse cultures. The course promotes an understanding and appreciation of antiquity and development of ideas over time in relation to current cultural and communicative patterns. (Formerly INTC 328)
CMNS 329
PERSUASION
Undergraduate
Explores major theoretical assumptions of current persuasion research. Examines causes and effects of effective and ineffective persuasion. Analyzes persuasive skills and strategies for a variety of persuasion applications, e.g. political, interpersonal, intercultural, and advertising. (Formerly RELC 329)

CMNS 330
TOPICS IN PERFORMANCE
Undergraduate
Advanced study in performance focusing on a specific genre each quarter such as: Poetry, Fiction, Nonfiction, Drama or Chamber Theater. Other possibilities include: performing autobiography; life performances; ritual, ceremony, and storytelling; and radio and television performances. (Formerly INTC 330)

CMNS 331
COMMUNICATION FIELDWORK
Undergraduate
Provides students with experience conducting qualitative research, including data collection techniques, data coding and analysis, as well as interpretation of data and writing ethnographic reports. In addition to providing practical hands-on training in ethnographic research, this course serves to explore the theory, ethics, and politics behind various research methodologies. (Formerly INTC 331)

CMNS 332
TOPICS IN INTERCULTURAL COMMUNICATION METHODOLOGY
Undergraduate
Courses explore a range of qualitative and quantitative research strategies. Topics may include more specialized modes of gathering and assessing data, using new data technologies and software programs, and conducting communication studies. (Formerly INTC 332)

CMNS 333
CULTURAL WAYS OF SPEAKING
Undergraduate
Explores how speakers reveal culture through their everyday interactions. This course focuses on speaking as an activity through which individuals identify themselves with communities of discourse, within the United States as well as across cultural groups. It provides students with experience in discovering diverse “ways of speaking” and “codes” concerning what it means to be a person, how people relate to each other, and how they view the world. (Formerly INTC 333)

CMNS 334
URBAN COMMUNICATION
Undergraduate
Examines relationships between material features of the city and symbolic representations of urban life (e.g., photography, film, songs, public discourse) with the goal of understanding the city as a site of communication. Special attention is paid to expressions of hope for and fear of the city. (Formerly INTC 334)

CMNS 335
LATINO COMMUNICATION, CULTURE, & COMMUNITY
Undergraduate
Examines the relationships among Latino cultures, communication, institutions, and public and private life. Students explore the possibilities and problems of contemporary forms of community through service in Latino community organizations. The course also fulfills the junior year experiential learning requirement through community based service learning. (Formerly INTC 335)

CMNS 336
STORYTELLING: COMMUNICATION AS NARRATIVE
Undergraduate
Scholars suggest that the oldest form of communication is storytelling. Narrative theories and methodologies form a substantive core throughout the history of human communication praxis. This course responds to the contemporary resurgence of narrative and highlights its communicative aspects. Rooted in both the oral and literary traditions, this course builds and enhances skills for those who would like to use storytelling in various ways including: 1) storytelling as a teaching tool, 2) giving structure to personal narratives, 3) developing a repertoire of stories, and 4) improving general presentation skills.
CMNS 337
ASIAN-AMERICAN MEDIA REPRESENTATIONS
Undergraduate
The course takes an interdisciplinary approach in the analysis of the media images and explores issues of power, identity, race, gender, class, sexual orientation and the interaction of these factors in the representation of Asian Americans. (Formerly INTC 337)

CMNS 338
ASIAN CULTURE AND COMMUNICATION
Undergraduate
Reviews major Asian philosophical and religious traditions such as Hinduism, Confucianism, Taoism, and Buddhism and examines how these traditions influence and affect Asian cultures and communication behaviors, particularly communication among Indians, Chinese, Japanese, Koreans, and Asian Americans in various contexts. (Formerly INTC 338)

CMNS 339
PERFORMANCE OF GENDER & SEXUALITY
Undergraduate
This course is designed to give students an opportunity to experiment, explore, and reflect upon the performative dimensions of gender and sexuality. Using aesthetic performance as a point of entry, students will view, analyze, and generate performance work that interrogates the communicative, political, and transformative potentials of embodied actions. With an emphasis on the intersections of gender and sexuality, the course will move through three units of reading, discussion, viewing, and performance creation. (Formerly INTC 329)

CMNS 340
COMMUNICATING & DATING
Undergraduate
The goal of this course is provide students with a research-based understanding of the role of communication within dating relationships. Accordingly, this course traces the life-cycle of a dating relationship. Specifically, this course begins by examining initial interactions that are potentially romantic and could turn into dating interactions. Next, the course focuses on how people engage in dating relationships and the factors that influence relationships. Finally, the course concludes with what happens after dating (i.e., long term commitment/marriage, relational termination, or the death of a partner). (Formerly RELC 340)

CMNS 341
COMMUNICATION NETWORKS IN A DIGITAL AGE
Undergraduate
This course will cover theoretical explanations of processes of computer-mediated communication (CMC). In particular, students will explore explanations related to the production of online identity performance and the formation and maintenance of networked relationship connections. Students will analyze current arguments regarding social media use and apply theory and research regarding CMC to real world situations.

CMNS 342
LIVING ONLINE
Undergraduate
An overview of how people use communication technology in their everyday life. Examines a variety of communication technology in interpersonal and organizational contexts. Focus is on the appropriate and effective use of mediated communication and surveys issues including trust, privacy, identity, and relational communication.

CMNS 355
CONFLICT MANAGEMENT
Undergraduate
Examines the theory and process of conflict in interpersonal and organizational contexts. Focuses upon the causes, types, and theories of conflicts as well as upon practical approaches to dispute resolution. Topics include: social-psychological as well as process perspectives of conflict; personal conflict style/s; conflict sources; destructive versus constructive interaction cycles; impression management; conflict escalation or diminishment; and resolution strategies. (Formerly CMNS 355)
CMNS 360
RELATIONAL, GROUP, AND ORGANIZATIONAL THEORY
Undergraduate
This course surveys relevant theoretical developments in the field of communication. While exploring the major theoretical paradigms that inform and guide the study of human communication, students receive insight into the significance and meaning of their own day-to-day communication activities and discover how theories provide complementary and viable explanations for analyzing as well as assessing the impact of communication in relational, group and organizational contexts.

CMNS 361
GENDER AND COMMUNICATION
Undergraduate
A review of the differences in communication patterns between women and men. Topics covered include language and language usage differences, interaction patterns, gender social movements, and perceptions of the sexes generated through language and communication. (Formerly INTC 361)

CMNS 365
ARGUMENTATION, ADVOCACY, AND DELIBERATION
Undergraduate
The primary purpose of this course is to equip students with a heightened capacity for reasoning so that they will be better prepared to participate in argumentation, advocacy, and deliberation in a number of contexts (academic, work place, public life). This course focuses on critical thinking, effective argumentation, and civil dialogue. Students in the class will develop and evaluate reasoned arguments; practice the skills of critical thinking; and deliver class presentations.

CMNS 366
COMMUNICATION, TECHNOLOGY AND SOCIETY
Undergraduate
Survey of a variety of contemporary and historical issues related to the introduction and diffusion of communication technologies in society. Especially examines how new technologies, particularly the Internet, are transforming the communication landscape. Emphasis on issues of intellectual property, surveillance, privacy, regulation, message construction, and access will be central to this course.

CMNS 367
PERFORMANCE FOR SOCIAL CHANGE
Undergraduate
This is an experiential field experience that examines the role of performance in social activism. Student projects will identify a social issue of critical concern and devise a performative response. (Formerly INTC 367)

CMNS 369
PERFORMANCE OF HUMOR
Undergraduate
This course provides a critical and performative exploration into the role of humor and comedy in our social world. Often layered, complex, and contested, the communicative and critical workings of humor mark an ongoing site of cultural struggle, cultural tension, and heated debate. This course engages humor from a performative lens, which calls for us to consider the embodied, contextual, relational, historical, and political dimensions of comedy. The first unit in the course offers a broad theoretical framework to discuss the doings of humor, as well as providing a foundational class vocabulary in the concepts of satire, irony, parody, ideology, performance, performativity, and the absurd. The second section looks to the construction of the ironic persona as a site of humor and a tool for cultural criticism, reflection, and parody. The third unit, coinciding with the November election, looks to political satire as a tool for questioning, challenging, and complicating sedimented cultural systems, performances, and beliefs. Finally, the last unit broadens out our understanding of comedy to explore the notion of harmony, looking to humor as a space for disrupting hierarchies of power and building alternative forms of community.

CMNS 382
QUANTITATIVE RESEARCH METHODS IN COMMUNICATION STUDIES
Undergraduate
In this course, students apply quantitative research methods to answer questions about human communication. Working in research teams, student pose hypotheses and research questions, select and design quantitative measures, collect quantitative data, conduct statistical analysis, and interpret results.

LSP 121 (or MAT 137 or MAT 242 or PSY 240 or SOC 279) is a prerequisite for this course.
**CMNS 392**  
INDEPENDENT STUDY  
Undergraduate  
Independent Study. (variable credit)

**CMNS 393**  
COMMUNICATION STUDIES PRACTICUM  
Undergraduate  
Structured and supervised student participation in group presentations for various audiences. Includes practical experience in research, rehearsal and performance. Students may take a maximum of 2 credit hours in one quarter, 4 credit hours in the major, and 8 total credit hours. Written permission of supervising faculty member and of the departmental chair is necessary before registration.

**CMNS 500**  
FOUNDATIONS IN GRADUATE COMMUNICATION STUDIES  
Graduate  
This course provides an orientation and introduction to the studies of Communication and Media (Health, Relational, Organizational, Multicultural, and Media and Cinema Studies) in the College of Communication. The course provides an orientation into graduate program policies, program faculty, DePaul resources, the broader academic discipline of Communication and Media and potential career opportunities for graduates and resources in the field. In addition, the course provides a survey of research paradigms and methodologies, while offering students an introduction to areas of faculty specialization. Students will develop a personalized study plan and a literature review related to their area of research interest. This class will be primarily lecture/discussion based, emphasizing student participation, active learning, and diverse disciplinary perspectives. The course will take the form of several guest lectures, critical reading and reflection of research, and discussion. Students will be required to participate in small group discussions, and submit papers and other written assignments.  
Status as a Graduate Communication student, Health Communication student, or Relational Communication student is a prerequisite for this class.

**CMNS 501**  
COMMUNICATION IN CULTURAL CONTEXTS  
Graduate  
Analyzes theories of the interaction between culture and communication. Investigates the facets of culture that influence communication in a variety of settings, ranging from corporate and educational realms to social and familial domains, particularly among people from different cultures. Examines how communication can serve to bridge gaps in a multicultural setting. Formerly CMN 501.  
Status as a College of Communication graduate student or Experience Design student or department consent is a prerequisite for this class.

**CMNS 504**  
LANGUAGE, THOUGHT AND CULTURE  
Graduate  
This course examines the interrelationship among language, thought, and culture. Reviews and critiques theories and research of how language or the use of symbols reflects culture and shapes reality for certain cultural/ethnic groups and organizations. Explores how language influences thought and action of the collective and of individuals in social, political and organizational settings.  
Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

**CMNS 509**  
SPECIAL TOPICS IN MULTICULTURAL COMMUNICATION  
Graduate  
Course covers a variety of topics that address theories about multicultural communication such as culture, gender, sexual orientation, race, and ethnicity.  
Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

**CMNS 522**  
COMMUNICATING IDENTITY  
Graduate  
Focuses on the rhetorical theories and practices through which various cultural groups within the U.S. construct a sense of identity. The course examines different rhetorical forms and strategies through an analysis of the rhetorical situations, texts and artifacts of various cultural groups.  
Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.
CMNS 523
GENDERED COMMUNICATION
Graduate
Examines research into the ways the various aspects of communication are affected by and affect the social construction of gender. Topics covered include language and language usage differences, interaction patterns and perceptions of the sexes generated through language and communication. (Cross-listed as MLS 445/WMS 440).

Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

CMNS 525
COMPARATIVE MANAGEMENT COMMUNICATION
Graduate
Examines and contrasts the management philosophies of different cultures around the world, paying special attention to how European and Asian organizational practices influence structure, culture and communication within American corporations.

Status as a College of Communication Graduate Student, Organizational Diversity MBA Student or department consent is a prerequisite to this class.

CMNS 527
ASSESSMENT AND INTERVENTION IN ORGANIZATIONS
Graduate
Organizations are symbolic realities constructed by humans in communication. In other words, organizations are creations, and both organizational members and observers need to comprehend them as such. Communication 527 is devoted to preparing you to become communication professionals able to understand organizations through the analysis of organizational patterns of meaning and expectations. Communication professionals help organizations to improve communication by (1) identifying differences between actual and desired conditions of communication and (2) devising ways to close the gap between actual and desired states. The first function involves organizational communication evaluation (gathering, analyzing, and interpreting data about an organization's communication processes). The second function is referred to as intervention (actions taken to improve organizational communication). People who perform organizational communication evaluation and intervention may be members of the organization or outside agents brought in to perform specific projects. This class will focus on the role of the communication professional in the maintenance and change of organizational communication functions, structures, and the communication processes that occur at various systems levels, including dyads, groups, intercultural and multicultural relations, and organization-wide network processes.

Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

CMNS 529
TOPICS IN ORGANIZATIONAL AND MULTICULTURAL COMMUNICATION
Graduate
This course offers students a variety of special topic areas related to organizational and multicultural communication. Students will have opportunities to delve more deeply into each topic area working with instructors who have specialized expertise in that area. Typical topics include but are not limited to Global Workplaces and International Management, Organizational Identity, Critical Theory, and Latino(a) Representation.

Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

CMNS 530
INSTRUCTIONAL DEVELOPMENT
Graduate
This course is designed to assist in understanding the principles necessary for effective design, delivery and evaluation of instruction based on awareness of differing learning styles, subject content, the educational setting, and learning outcomes. This course examines issues related to instructional development by emphasizing the components that are critical in the development, delivery, and assessment of quality teaching and learning experiences in both academic and organizational settings. Students will have the opportunity to implement instructional strategies in the class setting.

Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.
CMNS 531
INSTRUCTIONAL DEVELOPMENT PRACTICUM
Graduate
After completing CMNS 530, students have the option of taking CMNS 531. The course allows students to apply concepts learned in Instructional Development as they partner as a teaching assistant with a College of Communication instructor to prepare assignments, conduct teaching sessions, and grade.

Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

CMNS 532
INTRODUCTION TO TRAINING AND DEVELOPMENT
Graduate
This course provides an introduction to training and its relationship to organizational problem solving. Basic and advanced training strategies are taught within the context of developing organizations. Organizations often have in house training and development specialists that facilitate on-going organizational change processes. The functions of such human relations specials are explored and the kinds of communication knowledge, competencies and skills needed to enact such functions are examined.

Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

CMNS 541
ORGANIZATIONAL COMMUNICATION AND CULTURE
Graduate
The central purpose of this course is to introduce students to the role communication plays in organizational life. Throughout the quarter, attention will be devoted to examining the various theoretical perspectives from which organizational communication can be viewed, and selectively surveying major content topics and current issues in the organizational communication literature.

Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

CMNS 542
MULTICULTURAL COMMUNICATION IN THE WORKPLACE
Graduate
Multicultural issues affect the communication of organizational members on a day-to-day basis. This course examines multicultural issues in professional settings. It provides students with knowledge about co-cultural communication patterns, which will enhance their own ability to interact. Further, it demonstrates how multicultural communication can be an organizational asset.

Status as a College of Communication Graduate Student, Organizational Diversity MBA Student or department consent is a prerequisite to this class.

CMNS 543
COMMUNICATION AND ORGANIZATIONAL CHANGE
Graduate
Change in an organization implies change in communicative processes at the individual, dyadic, group and systemic levels. Communication variables that define patterns of interaction within these organizational contexts will be examined as well as key issues that might cause communication difficulties.

Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

CMNS 544
POLITICS AND POWER IN ORGANIZATIONS
Graduate
Examines political activities sanctioned and encouraged by organizations, subjective political activities initiated by individuals, bases of power within organizations (influence strategies), living and working with organizational politics (coping mechanisms).

Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.
CMNS 545
COMMUNICATION AND TECHNOLOGY
Graduate
Communication and Technology explores the process through which technological and social systems co-create or invent each other. As such, this course not only examines the role that new communication technologies play in shaping our social systems and the organizations within them, but also looks at how social, cultural, economic and legal contexts influence the development and emergence of these technologies.

Status as a College of Communication graduate student or Experience Design student or department consent is a prerequisite for this class.

CMNS 547
COMMUNICATION IN CUSTOMER SERVICE
Graduate
America’s economy is currently driven by service industries. In this course we will explore the communicative dimensions of customer service. By reviewing the theory and research of customer service and exploring the research methods available for assessing service, students will be both better able to appreciate the service process and diagnose and change ineffective service systems.

Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

CMNS 548
TEAMS AND LEADERSHIP
Graduate
Modern organizations are increasingly interested in shifting their organizational structures toward the goal of creating self-managed work teams. Therefore, the current communication graduate greatly benefits from knowledge and experience with two interdependent aspects of group dynamics: decision-making under conditions of uncertainty, and the philosophy and practice of developing groups into self-managed teams. The December quarter version of this course will combine a relatively brief period of lecture/discussion with a teamwork intensive action learning component towards the goal of making each student competent to either spearhead a change to self-managed work teams in their own organization (if called upon to do so), or to understand and weather this change in work mode without stress.

Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

CMNS 549
SPECIAL TOPICS IN ORGANIZATIONAL COMMUNICATION
Graduate
Course covers a variety of topics that address theories about organizational communication such as group processes, conflict management, and leadership.

Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

CMNS 550
ORGANIZATIONAL DIVERSITY & LEADERSHIP
Graduate
Organizational Diversity and Leadership provides students with a conceptual framework of the strategies and systems required to design, implement, and manage a comprehensive diversity initiative spanning various functions in various business sectors. This course addresses issues relating to diversity philosophy, organization and administration of diversity initiatives as well as the development and implementation of a comprehensive diversity strategy within the business enterprise.

Status as a College of Communication Graduate Student, Organizational Diversity MBA Student or department consent is a prerequisite to this class.

CMNS 552
STRATEGIC COMMUNICATION
Graduate
This course explores the process by which communicators attempt to accomplish their goals. In particular, this course covers theories of persuasion, strategic message design (creating messages that take into account multiple audiences and goals), and how the inferential process influences decision-making.

Status as a College of Communication graduate student or Experience Design student or department consent is a prerequisite for this class.
CMNS 557
SPECIAL TOPICS IN TRAINING AND DEVELOPMENT
Graduate
This course varies on topics related to issues in training and development.
Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

CMNS 561
INTERNATIONAL MEDIA
Graduate
Examines the political economy of the global media, with attention to institutional, historical, and contemporary questions of ownership and program content, as well as representations by the U.S. commercial news media of the foreign other and the representation of Western culture and institutional life in non-Western contexts. Includes examination of issues in the mass media now debated within the international community, pursuing questions about the New World Information Order, the international marketplace of images, cultural imperialism and national culture, and types of programming aimed at an international audience.
Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

CMNS 563
MULTICULTURAL MEDIA REPRESENTATIONS
Graduate
This course examines both representational practices and theories that are informed by multicultural perspectives. It explores ways in which scholars and media practitioners have dealt with the epistemological problem of "difference". The course may take up topics such as race, class, age, and sexual orientation as categories of difference that have informed and continue to inform academic inquiries. The course also looks at historical and/or contemporary media texts, and analyzes them through these methods.
Status as a College of Communication Graduate Student, Critical Ethnic Studies Student or department consent is a prerequisite to this class.

CMNS 570
INTRODUCTION TO DIGITAL CMN
Graduate
This course will provide students with a detailed critical introduction to the field of digital communication. Topics will include practical applications of digital communication across disciplines: communication studies, journalism, public relations, advertising, media and cinema studies, and communication technology. This class will offer students a glimpse of those disciplines and allow them to integrate them all together. Additionally, this course will provide an entry point for students into the program who have had little experience with either digital technology or communication courses. Ideally, this course would be a critical introduction to the field.
Status as a MA-DCMA, MA-MCS, or MA-DGCMED student or department consent is a prerequisite for this class.

CMNS 581
QUALITATIVE RESEARCH METHODS
Graduate
Introduction to qualitative approaches to research in communication. The course includes a systematic review and application of ethnography, unstructured interviewing, personal document analysis, historical research, and critical practice. Addresses the rationale, method, and theory of each qualitative approach to research in addition to placing emphasis upon data collection and interpretation.
Status as a College of Communication Graduate Student, Critical Ethnic Studies Student or department consent is a prerequisite to this class.

CMNS 582
QUANTITATIVE RESEARCH METHODS
Graduate
Introduces students to quantitative approaches to research and basic statistics. Topics include research design and control, survey construction, measurement and other general research issues, nonparametric statistics, correlation, the t-test and analysis of variance.
Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.
CMNS 583  
**RESEARCH METHODS**  
Graduate  
Focuses on developing an understanding of appropriate quantitative and qualitative research methodologies and relevant descriptive and inferential statistics for the investigation of both practical and theoretical problems in the study of communication. By considering the nature, concepts, and logic of the research enterprise, permits a critically informed assessment of published research, including data gathering and data analysis procedures.

Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

CMNS 584  
**METHODOLOGICAL TOPICS**  
Graduate  
This course is a special topics course in research methods, wherein students study and practice a specialized approach to data collection and knowledge generation. Students will engage the philosophical foundations and practical methodological operations of the study of human communication from a specific research perspective.

Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

CMNS 590  
**COMMUNICATION WORKSHOP (VARIABLE TOPICS)**  
Graduate  
This course allows students to sample a range of hands-on, practical offerings in communication that can enhance their knowledge and expertise. Topics offered include survey design and focus groups. (2 quarter hours)

Status as a College of Communication Graduate Student or department consent is a prerequisite for this class.

CMNS 592  
**INDEPENDENT STUDY**  
Graduate  
Students will be guided in the development of a special project that furthers their collaboration with an instructor and produces a report that demonstrates their mastery of critical content and competencies. The independent study option is intended for students who have demonstrated a mastery of course content, who would benefit from a sustained, focused collaboration with a relevant faculty member. (Variable credit).

Status as a Graduate Communication student and Director Consent is a prerequisite for this class.

CMNS 596  
**GRADUATE CAPSTONE**  
Graduate  
The graduate capstone course is designed to accompany the completion of an exit project, an option to fulfill the requirements for an M.A. in the following programs: Organizational and Multicultural, Relational Communication, and Health Communication. Under the mentorship of a faculty member, students will design and create an exit project as guided by their chosen committee. The students in the course will serve as peer collaborators for one another, providing resources throughout the exit project process. The purpose of an exit project is to allow students the flexibility to create a meaningful work product that integrates the graduate coursework, which is distinctly separate from the thesis and comprehensive exam options. To enroll in this course, students must complete and submit the requisite paperwork with the signature of their exit project committee members along with a proposal of the exit project.

Status as a Graduate Communication student, Health Communication student, or Relational Communication student is a prerequisite for this class.

CMNS 599  
**RESEARCH THESIS**  
Graduate  
Enroll in 599 during the term you plan to defend your thesis or complete your final project. This is a graded, 4-credit hour course. Tuition is charged. You must have a scheduled defense/completion date to be approved for this class. Your thesis/project advisor needs to communicate this date to the Graduate Studies Director for your program, before you are allowed to enroll. Loan deferment is allowed to those registered for this class.

Status as a Graduate Communication student and Director Consent is a prerequisite for this class.
CMNS 601
ACTIVE DEGREE COMPLETION
Graduate
This is a 0-credit hour course that is available to students who are working actively toward the completion of a thesis or project. Enrollment in this course is limited to the two quarters prior to the defense of the thesis/project and requires graduate director approval and proof of work each quarter. No tuition is charged, only student fees (approx. $50), which allows you access to the library and other campus facilities. This course is graded as pass/fail. Eligible for loan deferment and student loans. (0 credit hours)
Status as a Graduate Communication or Relational Communication student or department consent is a prerequisite for this class.

CMNS 602
CANDIDACY CONTINUATION
Graduate
This is a 0-credit hour course that requires permission from the graduate director. Students can enroll in 602 if they are finishing a course in which they received an incomplete (IN). If the student does not register for any regular courses in the quarter they plan to finish the incomplete, they can enroll in 602 and access the library and other campus facilities. No tuition is charged, only student fees (approx. $50). This course is graded as pass/fail. Not eligible for loan deferment or student loans. (0 credit hours)
Status as a Graduate Communication student is a prerequisite for this class.

CNS 228
LEGAL, ETHICAL AND SOCIAL ISSUES IN INFORMATION SECURITY
Undergraduate
This course is designed to acquaint students with electronic privacy, security and ethics. Students will gain an understanding of information ethics, existing and emerging cyber-laws, organizational liability issues, and explore several Codes of Ethics. Students will learn about real and potential security issues, steps that can be taken to create environments of trust, how to evaluate the strengths and weaknesses of a firm's information resource environment, and risk management and operation feasibility issues. Formerly CNS 330.

CNS 320
COMPUTER FORENSIC AND INCIDENT RESPONSE
Undergraduate
Introduction to the topics of computer forensic, computer crimes, response to security incidents, Cybercrime investigation and prosecution. Students will learn how an organization can setup a security response team, prepare for Security incidents and manage these incidents.
PREREQUISITE(S): CNS 378 or CSC 374
CNS 378 or CSC 374 is a prerequisite for this class

CNS 340
FUNDAMENTALS OF INFORMATION ASSURANCE
Undergraduate
This course is a survey of the fundamental elements of computer security and information assurance. Topics may include confidentiality, integrity, and availability; security policies; authentication; access control; risk management; threat and vulnerability assessment; common attack/defense methods; ethical issues. Formerly CSC 390.

CNS 355
PHYSICAL AND IT SECURITY CONVERGENCE
Undergraduate
This course introduces students to the fundamental processes associated with the Physical Security discipline. This course will present the convergence of IT Security and Corporate Physical Security, focusing on where convergence takes place - at the technology, process and function level. Students will look at real-world illustrations of implementation and analyze perceived efficiencies and cost-savings. This course is designed for students who desire to understand physical and IT security in the framework of Enterprise Risk Management.
CNS 366
CRITICAL INFRASTRUCTURE AND CONTROL SYSTEMS CYBERSECURITY
Undergraduate
This course is an introduction to the cybersecurity challenges for control systems present in industry, homes and traditional businesses such as manufacturing. Topics covered include the design and setup of Supervisory Control and Data Acquisition (SCADA) systems, Distributed Control Systems (DCS), and Programmable Logic Controller (PLC) systems. As these systems are typically designed without any intrinsic security mechanism, we will study the challenges of protecting them and how to employ a defense-in-depth methodology to secure them. This class will focus on the security risks of critical infrastructure systems (such as Electrical, Pipelines, Water/Wastewater and transportation) and methods to protect them. PREREQUISITE(S): CNS 340 or TDC 377 or IT 263

CNS 378
HOST BASED SECURITY
Undergraduate
Principles of host based security. Review of security methods used to ensure the confidentiality, integrity, and availability of the information stored on a host. The class will cover OS configuration, access control, anti-malware, public facing application security, host-based intrusion detection/prevention, host-based firewalls and audit & compliance. Course includes laboratory work with both the Linux and Windows operating systems. PREREQUISITE(S): CSC 374 or TDC 311 or IT 373

CSC 374 or TDC 311 or IT 373 is a prerequisite for this class.

CNS 388
SECURITY TESTING AND ASSESSMENT
Undergraduate
Vulnerability assessment and ethical security testing; review of ethical concerns and legal issues associated with security testing activities; study and analysis of the defensive mechanisms used to mitigate such threats. There will be extensive hands-on laboratory exercises. PREREQUISITE(S): CNS 378 or CSC 374 or TDC 311 or IT 373

CSC 374 or TDC 311 or IT 373 is a prerequisite for this class

CNS 389
CYBER DEFENSE EXERCISES AND ATTACK RESPONSES
Undergraduate
This is a hands-on, lab based applied security course in which students will work in teams to defend against cyber-attacks and implement services in a hostile cyber environment. Most activities will be derived from Cyber Dense and Cyber League competitions and will prepare students to participate and excel in these competitions. This course is open to all students, including students inexperienced in Cyber Defense competitions. Repeat enrollment is encouraged. PREREQUISITE(S) CNS 378 or CSC 374

CNS 378 or CSC 374 is a prerequisite for this class

CNS 390
VULNERABILITY ASSESSMENT FOR COMMUNITY-BASED ORGANIZATIONS
Undergraduate
This service learning course prepares students with real-world experience by partnering with a non-profit, community-based organization to identify information security vulnerabilities and propose recommendations that improve the organization's security and privacy practices. Within the context of an assigned community-based organization, students will work in teams to conduct a vulnerability assessment; identify and propose cost-effective safeguards that may be administrative, technical, or physical; define a plan to test, monitor, and train system users on recommended security safeguards, and; document project deliverables for the organization's management. The course emphasizes hands-on exercises and student reflection on a community-based term project. PREREQUISITIE(S): CNS 340

CNS 394
INFORMATION SYSTEMS SECURITY ENGINEERING I
Undergraduate
This course requires students to apply Information System Security Engineering methods and processes to design, document and implement comprehensive security infrastructures in realistic scenarios. Students will work in teams through the entire life cycle of a Security infrastructure project from needs discovery, threat assessment, architecture design, implementation, effectiveness assessment and auditing. The course is designed to span two quarters. In this first quarter, students will learn the Information Systems Security Engineering process and perform asset identification, threat assessment and system requirement specification. PREREQUISITE(S): CNS 378 (formerly IT 378) and TDC 377 and TDC 379.

CNS 378 and TDC 377 and TDC 379 are prerequisites for this course.
CNS 395
INFORMATION SYSTEMS SECURITY ENGINEERING II
Undergraduate
This senior project capstone course requires students to apply Information System Security Engineering methods and processes to perform
the design and implementation of Information Systems Security infrastructures. The human and sociological impacts of Information Security
will be studied with a particular focus on privacy issues, ethical use of Security tools and cultural and legal difference that exist in a globally
connected but diverse world. PREREQUISITE(S): CNS 394

CNS 397
TOPICS IN COMPUTER, INFORMATION AND NETWORK SECURITY
Undergraduate
May be repeated for credit. (1 quarter hour)

CNS 399
INDEPENDENT STUDY
Undergraduate
Variable credit. PREREQUISITE(S): Consent of dean. (variable credit)

CNS 418
INTRODUCTION TO HOST SECURITY
Graduate
Principles of host based security. Review of security methods used to ensure the confidentiality, integrity, and availability of the information
stored on a host. The class will cover OS configuration, access control, anti-malware, public facing application security, host-based intrusion
detection/prevention, host-based firewalls and audit & compliance. Course includes laboratory work with both the Linux and Windows
operating systems. PREREQUISITE(S): TDC 411

TDC 411 is a prerequisite for this class.

CNS 440
INFORMATION SECURITY MANAGEMENT
Graduate
Survey of information security management as it applies to information systems analysis, design, and operations. Managing information assets
and the security infrastructure. Emphasis on managing security-related risk, as well as the process of developing, implementing, and
maintaining organizational policies, standards, procedures, and guidelines. Identifying and evaluating information assets, threats, and
vulnerabilities. Quantitative and qualitative risk analysis, risk mitigation, residual risk, and risk treatment as they relate to information security.
Topics include information security vulnerabilities, threats, and risk management; security policies and standards; security audits; access
controls; network perimeter protection, data protection; physical security; security education training and awareness. Introduction to
compliance, as well as the CISSP domains. PREREQUISITE(S): None

CNS 450
DIGITAL FORENSIC TECHNIQUES
Graduate
This course focuses on the forensic acquisition, analysis and presentation of data from computer systems. This course covers: preservation
and interpretation of evidence; forensic imaging; file systems and data recovery; Windows registry forensics; internet history and social media
analysis; mobile device forensics; timeline analysis; incident response and writing expert reports and testimony. PREREQUISITE(S): CSC 407
or CNS 418

CSC 407 or CNS 418 is a prerequisite for this class.

CNS 455
PHYSICAL AND IT SECURITY CONVERGENCE
Graduate
This course introduces students to the fundamental processes associated with the Physical Security discipline. This course will present the
convergence of IT Security and Corporate Physical Security, focusing on where convergence takes place - at the technology, process and
function level. Students will look at real-world illustrations of implementation and analyze perceived efficiencies and cost-savings. This course
is designed for students who desire to understand physical and IT security in the framework of Enterprise Risk Management.
PREREQUISITE(S): None
This course is an introduction to the cybersecurity challenges for control systems present in industry, homes and traditional businesses such as manufacturing. Topics covered include the design and setup of Supervisory Control and Data Acquisition (SCADA) systems, Distributed Control Systems (DCS), and Programmable Logic Controller (PLC) systems. As these systems are typically designed without any intrinsic security mechanism, we will study the challenges of protecting them and how to employ a defense-in-depth methodology to secure them. This class will focus on the security risks of critical infrastructure systems (such as Electrical, Pipelines, Water/Wastewater and transportation) and methods to protect them. PREREQUISITE(S): CNS 440 or TDC 477

CNS 440 or TDC 477 is a prerequisite for this class.

This graduate course is a survey of legal issues arising under information security and control frameworks such as COBIT and ISO17799. Topics include the basics of trademark, copyright, patent and trade secrets and protection strategies for each of them; software licensing issues; data privacy under state, federal and international law; evidence and digital forensic practices; ethics; the Computer Fraud and Abuse Act's boundaries for illegal access to computers; electronic surveillance and cyber traps; information security measures mandated by select federal statutes (HIPAA, Gramm-Leach-Bliley and Sarbanes-Oxley); and practical techniques on how to find and keep abreast of legal issues affecting information security. PREREQUISITE(S): CNS 440 or IS 433

CNS 440 or IS 433 is a prerequisite for this class.

Methodologies and tools for performing vulnerability testing; management of security testing initiatives and activities; review of the different types of assessments, legal issues, ethical concerns. Defensive mechanisms to mitigate the risks illustrated by the assessment using Defense-In-Depth architectures. Concepts illustrated using hands-on lab exercises. PREREQUISITE(S): CSC 407 or TDC 477

CSC 407 or TDC 477 is a prerequisite for this class

This lab-based applied security course introduces students to advanced cyber defense and cyber-attack response. Students manage an organize teams to defend against cyber-attacks and implement services in a hostile cyber environment. Most activities will be derived from Cyber Defense and Cyber League competitions and will prepare students to participate and excel in these competitions. This course is open to all students, including students inexperienced in Cyber Defense competitions. Repeat enrollment is encouraged. PREREQUISITE(S): CSC 407 or CNS 418

CSC 407 or CNS 418 is a prerequisite for this class.

Students taking this course will gain real-world experience by partnering with a non-profit, community-based organization to assess information security needs and propose recommendations that improve the organization's security and privacy practices. Within the context of an assigned non-profit organization, students will work in teams to conduct a security risk assessment using industry standards as guidance; write a formal risk assessment report for the organization's management; identify and propose cost-effective security safeguards that may consist of security policies, technologies, or procedures; define a plan to test, monitor, and train system users on recommended security safeguards. PREREQUISITE(S): CNS 440

CNS 440 is a prerequisite for this class.
CNS 533
ENTERPRISE SECURITY INFRASTRUCTURE CONTROLS AND REGULATORY COMPLIANCE
Graduate
Design, implementation, support and management of control methods in enterprise environments. Focus is on how these controls can help organizations achieve regulatory compliance. Review of Sarbanes-Oxley and its impact on IT systems. Detailed study of how risk assessment methods, information security program management and ERP systems can be used to fulfill regulatory and legal requirements. Control Objectives for Information and related Technology (COBIT) guidelines and best practices for SOX compliance. Security management standards (ISO 17799, BS 7799 and ISO 27001). PREREQUISITE(S): CNS 440 or IS 433

CNS 440 or IS 433 is a prerequisite for this class.

CNS 587
INFORMATION SECURITY GOVERNANCE
Graduate
In this course, students apply their knowledge of information security and regulatory compliance to analysis and evaluation of governance, risk management, and compliance problems. Students will learn the meaning of IT governance by examining the differences between governance and management; gaining hands-on application of industry governance frameworks; evaluating an information security program; defining incident response policy; assessing risk; and defining regulatory compliance strategy. Students will discover how good information security governance adds value to an organization. PREREQUISITE(S): CNS 477 and (IS 444 or CNS 490 or CNS 533 or CSC 439 or TDC 577)

CNS 477 and (IS 444 or CNS 490 or CNS 533 or CSC 439 or TDC 577) are prerequisites for this class.

CNS 594
COMPUTER INFORMATION AND NETWORK SECURITY CAPSTONE
Graduate
Design, setup and configuration of realistic enterprise computing and networking environments. Securing the infrastructure and integration of different services and technology in efficient, secured and redundant manners. Technologies will include: open-source and commercial products, firewalls, Virtual Private Networks (VPNs), authentication systems, Intrusion Detection Systems (IDS), advanced routing mechanisms (OSPF, BGP, IS-IS), highly redundant and robust networking. PREREQUISITE(S): TDC 477 or CNS 533

TDC 477 or CNS 533 is a prerequisite for this class.

CNS 597
TOPICS IN COMPUTER INFORMATION AND NETWORK SECURITY
Graduate
Specific topics will be selected by the instructor and may vary with each quarter. Can be repeated for credit. Variable credit. PREREQUISITE(S): For specific prerequisites, see syllabus or consult course instructor. (variable credit)

CNS 599
INDEPENDENT STUDY
Graduate
Independent study supervised by an instructor. Independent study form required. Can be repeated for credit. Variable Credit. PREREQUISITE(S): None. (variable credit)

COM 300
ORCHESTRATION I
Undergraduate
Ranges, sonorities and characteristics of woodwind, brass, percussion and string instruments; orchestral studies of representative works through the 19th century; arrangements for orchestral ensembles.

Status as an undergraduate composition major and MUS 230 are a prerequisite for this class.
COM 301
16TH CENTURY COUNTERPOINT
Undergraduate
Species counterpoint in two and three parts; melodic, formal and “harmonic” practices in Renaissance polyphony; free composition in the style; analysis and in-class performances of Renaissance motets and mass settings as well as original student compositions.

Status as an undergraduate composition major and MUS 230 are a prerequisite for this class.

COM 302
18TH CENTURY COUNTERPOINT
Undergraduate
Contrapuntal techniques of Bach and Handel; analysis, composition, and in-class performances of solo and ensemble works in the style. Assignments include composition of inventions and fugues.

Status as an undergraduate composition major and MUS 230 are a prerequisite for this class.

COM 303
20TH CENTURY COUNTERPOINT
Undergraduate
Exploration of contrapuntal techniques using 20th century vocabularies; analysis of selected compositions from the 20th-century, including works of Ives, Schonberg, Webern, Bartok, Hindemith, Ligeti and others as well as music of very recent times.

Status as an undergraduate composition major and MUS 230 are a prerequisite for this class.

COM 305
ANALYTICAL STUDIES
Undergraduate
Use of various analytical techniques for detailed studies of selected compositions from the common-practice period through the present day.

Status as an undergraduate composition major and MUS 230 are a prerequisite for this class.

COM 313
INTRODUCTION TO COMPOSITION
Undergraduate
Basic composition. Recommended as preparatory for intended composition majors. This course may be repeated for credit. (2 quarter hours)

Status as an Undergraduate Music student is a prerequisite for this class.

COM 315
COMPOSITION
Undergraduate
Exploration of 20th and 21st century techniques through creative projects and possible analytical assignments. Projects are designed to lead to the completion of compositions for a variety of performance media, culminating in the senior composition project.

Status as a Composition student is a prerequisite for this class.

COM 320
ORCHESTRATION II
Undergraduate
A survey of orchestral practices and techniques from the last 100 years. Assignments include analysis, notation, and orchestration.

Status as an undergraduate composition major, MUS 230, and COM 300 are a prerequisite for this class.
COM 326
ELECTRO-AcouSTIC MUSIC I
Undergraduate
Introduction to the history and literature of electro-acoustic music. Introduction to electronic tools and techniques, including MIDI sequencing, timbral manipulation, and digital sampling.

Status as an Undergraduate Music student is a prerequisite for this class.

COM 327
ELECTRO-AcouSTIC MUSIC II
Undergraduate
Introduction to digital video and multimedia composition and delivery. Further study in the history, literature, and analysis of electro-acoustic music.

COM 326 is a prerequisite for this class.

COM 398
INDEPENDENT STUDY
Undergraduate
An in-depth study of a composition topic under the supervision of a faculty member. (Departmental permission required). (variable credit)

Status as an Undergraduate Music student is a prerequisite for this class.

COM 405
GRADUATE ANALYTICAL STUDIES
Graduate
The study and practice of specific analytical techniques as related to specific works from the common practice period through the present day.

Status as a Graduate Music student is a prerequisite for this class.

COM 415
COMPOSITION
Graduate
The study of advanced compositional issues at the graduate level which will culminate in quarterly projects as well as a final composition project.

Status as a Graduate Composition student is a prerequisite for this class.

COM 416
COMPUTER ASSISTED COMPOSITION
Graduate
The purpose of this course is to offer composition majors an introduction to the use of computers in the implementation of generative and formal strategies for music composition.

Status as a Graduate Composition student is a prerequisite for this class.

COM 420
ORCHESTRATION II
Graduate
The study of significant notation, orchestration and instrumentation practices and techniques from the last 75 years. Course activities include consistent score analysis as well as demonstrations of extended instrumental techniques. Projects include orchestral transcriptions and the creation of short works for specific instrumental combinations.

Status as a Graduate Composition student is a prerequisite for this class.
COM 421
SEMINAR IN COMPOSITION
Graduate
(2 quarter hours)
Status as a Graduate Music student is a prerequisite for this class.

COM 444
NOTATIONAL SEMINAR: NOTATION, COMPOSITION, & SOUND STRUCTURES
Graduate
A study of some of the most relevant notational issues that have emerged in western music since WWII.
Status as a Graduate Music student is a prerequisite for this class.

COM 445
TWENTIETH CENTURY MUSIC TOPICS
Graduate
A review of significant 20th century literature and techniques as partial preparation for the comprehensive exam. (2 quarter hours)
Status as a Graduate Composition student is a prerequisite for this class.

COM 446
NEW MUSIC COMPOSITION SEMINAR
Graduate
Analysis of compositional and notation techniques as found in significant new works from the last twenty-thirty years for chamber ensembles or orchestral ensembles. Students will develop weekly presentations on specific works that will eventually be presented at the department's weekly meeting sessions and will also develop a minimum 10 page paper on one-two works.
Status as a Graduate Composition student is a prerequisite for this class.

COM 447
NON-WESTERN SOUND AND CONCEPT IN CONTEMPORARY MUSIC
Graduate
This class will consist of two major elements: one is a survey of the non-western influences in question and the second is the application of non-western influences to actual composition. The final goal of the class is to produce a small scale composition, which demonstrates the application of non-western music ideas.
Status as a Graduate Composition student is a prerequisite for this class.

COM 498
INDEPENDENT STUDY
Graduate
An in-depth study of a composition topic under the supervision of a faculty member. (Departmental permission required). (2 quarter hours)
Status as a Graduate Music student is a prerequisite for this class.

CPL 210
GREAT IDEAS, THE INDIVIDUAL AND SOCIETY I
Undergraduate
Classical Antiquity and the Middle Ages Representative works from the Bible, ancient Greek and Roman literature, and European literature of the Middle Ages. Emphasis on close reading of particular texts in different genres; all readings in English. Authors treated in this sequence may include: Homer, Sappho, Aeschylus, Sophocles, Euripides, Hippocrates, Aristophanes, Plato, Aristotle, Cicero, Lucretius, Ovid, Seneca, Plutarch, Augustine, Maimonides, Dante. Formerly ISP 210.
CPL 211
GREAT IDEAS, THE INDIVIDUAL AND SOCIETY II
Undergraduate
From Renaissance to Enlightenment Representative works of European literature from the Renaissance to the Enlightenment. Emphasis on close reading of particular texts in different genres; all readings in English. Authors treated in this sequence may include: Pico della Mirandola, Machiavelli, Erasmus, Rabelais, Bacon, Las Casas, Montaigne, Shakespeare, Descartes, Hobbes, Milton, Pascal, Locke, Defoe, Voltaire, Hume, Rousseau, Kant, Sade. Formerly ISP 211.

CPL 212
GREAT IDEAS, THE INDIVIDUAL AND SOCIETY III
Undergraduate
The Modern Era Representative works of European literature from the French Revolution to the modern period. Emphasis on close reading of particular texts in different genres; all readings in English. Authors treated in this sequence may include: Hegel, Kierkegaard, Marx, Melville, Flaubert, Nietzsche, Freud. Formerly ISP 212.

CPL 240
VOICES OF WAR AND PEACE; ART, LITERATURE AND FILM
Undergraduate
This course is an overview of the ways in which the arts, including literature and film, portray warfare and the attempts to end violence and build reconciliation and peace. Cross-listed with PAX 240.

CPL 242
PICTURES OF INJUSTICE: NARRATIVE ARTS IN SOCIAL JUSTICE MOVEMENTS
Undergraduate
This course will critically examine social justice themes in documentary and feature films in order to consider the role film and filmmaking can play in social justice movements. Together, we will carefully analyze a wide variety of films with the goal of critically examining their representations of race, gender, class and their depiction of agency of their subjects. We will also examine the storytelling and technical techniques used by filmmakers and how those techniques support the goals of filmmakers. Finally, we will examine case studies of activists who are using film and film-making as a part of movements for social justice. Students will leave this course with a better understanding of the ethics of filmmaking and the use of film in social movements. They will be more critical consumers of media and more familiar with a variety of social justice issues. Cross-listed with PAX 242.

CPL 301
EPIC AND ROMANCE
Undergraduate
Study of examples of heroic literature from a variety of cultures, including Western and non-Western civilizations.

CPL 302
COMEDY
Undergraduate
Study of important examples of dramatic comedy; selections may range from ancient times to the present day with some attention to the relevant theories of comedy (Aristotle, Freud, Bergson, Frye, etc.).

CPL 303
TRAGEDY
Undergraduate
Study of important examples of dramatic tragedy; selections may range from ancient times to the present day with some attention to the relevant theories of tragedy.

CPL 304
THE NOVEL
Undergraduate
Study of the novel, any period or subgenre (historical, picaresque, romantic, realist etc.) from any given area or country with some attention to the literary theory of the particular novels in question.
CPL 305
AUTOBIOGRAPHICAL/CONFESSIONAL LITERATURE
Undergraduate
Study of autobiographical/confessional literature; selections may range from ancient times to the present day from any given area or country with some attention to the relevant theories of these genres.

CPL 306
UTOPIAN LITERATURE
Undergraduate
Study of utopian literature; selections range from the Renaissance to the present day. Readings are discussed within the context of relevant political and social theory.

CPL 311
REVOLUTIONARY LITERATURE
Undergraduate
Study of revolutionary literature in any of its manifestations and genres in specific areas and periods.

CPL 312
THE LITERATURE OF IDENTITY
Undergraduate
Cross-cultural study of self-discovery and identity as manifested in the literatures of self-awareness and self-definition (African-American, Hispanic, gay/lesbian, etc.).

CPL 313
FEMINIST LITERATURE
Undergraduate
Cross-cultural synchronic or diachronic study of feminist literature.

CPL 319
TOPICS IN COMPARATIVE LITERATURE
Undergraduate
Selected topics on any theme from comparative literature.

CPL 355
CONTEMPORARY CRITICISM
Undergraduate
An overview of contemporary criticism from Russian formalism to post-modernism.

CS 447
CURRICULUM DESIGN FOR THE MIDDLE GRADES
Graduate
This course is designed to provide students with a comprehensive understanding of the history of and rationale for middle level education as well as the curricular and pedagogical knowledge needed to meaningfully engage middle level students in learning within and across the content areas. Important considerations and strategies for disciplinary and interdisciplinary learning in the middle school classroom, as well as the importance of reading and writing across the curriculum with regard to these, will be addressed.

CS 460
LEARNING IN A TECHNOLOGY-SUPPORTED CLASSROOM
Graduate
An examination of current theories about instructional technology and of recent literature in the field. Students will become familiar with particular technology appropriate for their areas of interest and will learn to evaluate this technology for a variety of instructional purposes. The course includes: frameworks for classifying educational uses of the technology; an analysis of selected research on educational technology; theories and practices of using technology in classrooms; and the advantages and disadvantages of distance learning. Emphasis throughout will be on why and how technology can be used to enhance the learning process.
CS 461  
LITERACY PROCESSES AND PRACTICES  
Graduate  
Foundational theoretical perspectives and practices for teaching and learning language and literacy in a diverse, changing, and political world. Background of knowledge in the area of learning and exposure to the controversies that surround the teaching of literacy will be used to develop an understanding of literacy learning in action. Students will be invited to participate in the current conversations around literacy learning and teaching in order to inform their everyday curricular decisions.

CS 463  
ASSESSMENT, DIAGNOSIS, DEVELOPMENTAL/REMEDIAL MATERIALS & RESOURCES: EMERGENT & DEVELOPING READING  
Graduate  
Assessment, diagnosis and instructional planning for early and emergent learners. Building on a knowledge base of emergent reading processes and literacy practices, teachers will explore the ways in which young learners construct meaning and use language purposefully in their unique social worlds, even before beginning school. Participants in this course will learn to use performance based assessments as well as more formal standardized measures of achievement to support emerging and struggling readers with appropriate materials and theoretically sound instructional practices.

CS 464  
ASSESSMENT, DIAGNOSIS, DEVELOPMENTAL/REMEDIAL MATERIALS & RESOURCES: MIDDLE SCHOOL/adolescent reading  
Graduate  
Assessment, diagnosis and instructional planning for middle school students. Building on a knowledge base of reading processes and literacy practices, teachers will explore the ways in which students construct meaning and use language purposefully in their unique social worlds. Participants in this course will learn to use performance based assessments as well as more formal standardized measures of achievement to support middle school and adolescent readers with appropriate materials and theoretically sound instructional practices.

CS 466  
TEACHING READING IN THE CONTENT AREAS  
Graduate  
This course focuses on teaching reading in various subject (content) areas and emphasizes non-fiction reading process, strategies, and theories for grades K-9. The course will examine what it means to be literate in the elementary content areas (e.g. science, math, social studies, arts). Emphasis will be placed on learning effective literacy strategies for different subject areas. There will also be a focus on how one uses reading and writing to think, act, speak, question, and apply the tools of each content/subject area in ways that are unique to that discipline. Additionally, as teachers it is important to remember that students will bring various literacies from their homes and communities. An important emphasis will be on creating learning environments that honor student diversity, and learning about multiple ways of knowing, acting, and communicating.

CS 460  
TEACHERS AS LEADERS  
Graduate  
Assists teachers in becoming leaders for positive change in schools and districts. Provides overview of major theoretical models in research on teaching and teacher leadership, historical perspectives on the teaching profession, and overview of select best practice in teacher collaboration, mentoring and coaching. Specific topics addressed may include: developing leadership among existing teaching staff; fostering professional collaboration; improving instruction school-wide; organizing colleagues, administrators, parents and students to improve achievement; fostering sustainability in teaching/fighting teacher attrition; teaching standards; team teaching; and curriculum mapping.

CS 471  
DIVERSITY IN THE CLASSROOM  
Graduate  
Examines issues related to diversity that result when students from diverse socioeconomic, cultural, linguistic, and academic backgrounds are in the same classroom. Explores the impact of inclusion, ESL, bilingual, and bicultural programs on instruction. Emphasis on developing strategies to meet individual student needs within the regular classroom.
CS 472
ETHICS, CURRICULUM AND SOCIAL CHANGE
Graduate
Explores some major issues impacting curriculum, including cultural and socioeconomic factors, legal issues, conflicting values, pressures for assessment, and the push to include technology. Examines the historical development and current state of education in the U.S. as compared to education in other cultures. Emphasis on ways that educators can work as change agents within the competing demands of these forces.

CS 473
ASSESSMENT
Graduate
Explores current theory and practice regarding alternate forms of assessment, including formal, standardized, and informal tests and inventories; selection, evaluation, and interpretation of tests used in educational settings; portfolio assessment, video performances, and presentations; preparation and use of teacher-made tests; evaluating outcomes; and utilizing data to improve instruction. The critical examination of multiple perspectives of assessment theories, policies and practices center around the emphasis on developing strategies to evaluate student progress.

CS 481
THE STUDY OF TEACHERS AND TEACHING
Graduate
A selective survey and analysis of research on teachers and teaching. Particular emphasis will be placed on the assumptions which are built into various forms of research and the effect these assumptions have on how results should be interpreted and used in supervision and curriculum development. Each student will be expected to become familiar with alternative ways of studying teachers and the teaching process in his/her area of expertise. While many school settings will be utilized because of the many studies done in this area, research in non-school settings will be given a good deal of emphasis.

CS 482
THE HISTORY OF CURRICULUM PRACTICE
Graduate
A survey of trends and movements in curriculum practice. Particular emphasis will be placed on the recurrent nature of curriculum practices and the reasons for this. The class will consider underlying models of curriculum practice in their historical settings as possible methods for meeting contemporary social needs as well as the assets and liabilities of these models.

CS 484
MULTIMEDIA MATERIALS PRODUCTION
Graduate
This course will analyze the role of multimedia materials in instruction. A variety of media will be explored (including software, internet, audio, video, and film). Students will be expected to manipulate a variety of images and produce sample materials for critique and analysis. The primary focus will be on enhancing learning in elementary and secondary schools.

CS 485
CURRICULUM/PROGRAM EVALUATION
Graduate
Evaluation is essential for curriculum/program development and implementation. Hence, understanding evaluation methods, technologies, and quality criteria is particularly relevant to educational leaders, curriculum/program designers, and technology specialists. In this course, students will critically examine a variety of current evaluation models, instruments, and resources. Students will also conduct a comprehensive analysis of a significant evaluation study relevant to their specific professional interest. Registration is restricted to students in Advanced Master's programs.

Status as an Advanced Masters Education student is a prerequisite for this class.

CS 487
INTRODUCTION TO CURRICULUM DELIBERATION
Graduate
An introduction to systematic and collaborative deliberation on curriculum problems. A pattern for deliberation (including situation analysis, problem discrimination and formulation, development of alternative courses of action, and anticipation of consequences) will be developed and exemplified. This pattern will be contrasted with other descriptions of curriculum planning. Each student will complete a project which describes his/her systematic formulation of a curriculum problem and a plan of action for resolving it.

Status as an Advanced Masters Education student is a prerequisite for this class.
CS 488
CURRICULUM DESIGN
Graduate
Provides a project-based opportunity to develop curriculum that promotes student understanding, student voice, and student involvement in school or community change. Encourages educators to think carefully about what does and should constitute the curriculum and why, who and what is served and who/what is marginalized by current curriculum arrangements, and how collaboration in curriculum design can assist in organizing classrooms, schools, and communities.

CS 489
CREATIVITY AND CRITICAL THINKING - VYGOTSKY, BAKHTIN, MAKIGUCHI, IKEDA
Graduate
Introduces students to the educational philosophies of Russian thinkers Lev Vygotsky (1896 - 1934) and Mikhail Bakhtin (1895 - 1975) and Japanese thinkers Tsunesaburo Makiguchi (1871 - 1944) and Daisaku Ikeda (1928 - ). Students will locate confluences in these thinkers' philosophies and apply them to current curriculum or curriculum theorizing in their chosen discipline(s) (e.g., mathematics, social studies, language education, etc.), context(s) (e.g., policy, gender, socioeconomics, identity, etc.) and K-12/adult level(s). Topics covered include, among others, cultural-historical theory, socially constructed meaning making, zone of proximal development, dialogism, carnival, value and value-creating pedagogy, humanitarian competition, and human revolution.

CS 492
CREATING AND SUSTAINING PROFESSIONAL LEARNING COMMUNITIES
Graduate
This course will provide the framework for the creation, development and sustainability of a professional learning community. Professional learning communities have at their core three guiding principles: 1) a focus on learning, 2) the creation of a collaborative culture and 3) a results-orientation. Within the professional learning community, members are committed to working collaboratively in an ongoing process of collective inquiry and action research in order to achieve better results for the students and community they serve. Professional Learning Communities operate under the assumption that the key to improved learning for students is continuous, job-embedded learning for educators.

CS 493
CURRICULUM DEVELOPMENT AND ASSESSMENT IN K-12 SCHOOLS
Graduate
This course prepares future school leaders with knowledge; understanding; and application of planning, assessment, and instructional leadership for roles in the K-12 school setting at the supervisory or administrative level. The emphasis of the course will be planning, implementation, and refinement of standards-based curriculum aligned with instruction, assessment, and instructional decisions as they affect the teaching and learning environment of the school with diverse cultural, ethnic, linguistic, and special needs populations.

CS 579
RESEARCH IN TEACHING READING: DEVELOPMENTAL & REMEDIAL READING INSTRUCTION & SUPPORT: BEST PRACTICES
Graduate
In this course, students will explore and analyze current literacy research through the critical lenses of educational practitioners. Students will: identify meaningful questions about literacy practices in their classrooms and schools; create a plan for addressing the identified research question(s); collect and analyze data relevant to the research question(s); and organize and present the research findings. This inquiry project, or an extension of it, may subsequently become the basis for the student's Master's paper or thesis.

CS 461 is a prerequisite for this class.

CS 580
RESEARCH SEMINAR IN CURRICULUM STUDIES
Graduate
This course is designed to help graduate students in Curriculum Studies through the difficult process of planning, organizing, drafting, and revising their Master's papers. Students will be expected to complete a literature review and to develop a strong proposal for an integrative paper as a prelude to selecting an advisor for their Master's papers. For M.Ed. students only.

SCG 410, 6 additional graduate courses and status as an Advanced Masters student is a prerequisite for this class.
This course provides directed experiences in decision-making for curriculum, participation, and leadership in the planning and management of reading curricula. Students will: assess students' reading capabilities; make informed curricular choices to address students' needs; identify and implement short and long-term learning goals for students; manage instructional materials needed to guide students; develop curriculum based on assessments of the needs of students. It is designed to offer students an opportunity to put into practice, in a summer school classroom, previous learning about the teaching of reading, especially their beliefs and understandings regarding literacy as social practice. Provides students with multiple opportunities to share their thinking with each other in a supportive community of learners.

CS 461 is a prerequisite for this class.

A student writing a thesis registers for this course for four quarter hours of credit. Where the thesis research and the writing of the thesis itself are prolonged beyond the usual time, the program advisor may require the student to register for additional credit.

SCG 410 and CS 580 are prerequisites for this class.

This course examines diverse curriculum discourses, historical as well as contemporary, within a broader context of issues related to education and schooling. It is designed to engage students critically in the study of curricular frameworks, their assumptions, values, and implications for education, schooling, teaching and learning. Major topics include frameworks for defining and conceptualizing curriculum and curricular visions; social, political, and historical contexts of curriculum construction; issues of gender, race, class, and the media; and the curriculum as socially constructed and historically contextualized discourse(s) about what is and what should be taught. Particular content areas will be used as examples.

Registration is open to students who are not registered for any other courses but need to complete requirements/assignments for previously taken courses. It provides access to University facilities. Permission of advisor required. (0 credit hours)

Status as a student in a College of Education Advanced Master's program is a prerequisite for this class.

Review of Literature. This paper will give students the opportunity to develop and demonstrate written competence in a subfield of their disciplines and to enhance life-long learning. Specifically, they will broaden their knowledge base and inform themselves about a topic, issue, theory, etc., reviewing and synthesizing existing literature. To do so, students will need a variety of bibliographic skills including searching data bases. (See the student handbook for additional information about completing Master's papers.) (0 credit hours)

Integrative Paper. Non-credit. Students will observe and/or participate in the reciprocal interaction of theory and practice, by investigating actual practice in the field as it relates to theory. This might take the form of investigating how a particular theory is applied in the field, developing a practical application of a theory, or, conversely, developing/refining a theory based on investigations made in the field. (See the student handbook for additional information about completing Master's papers.) (0 credit hours)
CS 608  
CAPSTONE IN CURRICULUM STUDIES  
Graduate  
Students who have completed the majority of the Curriculum Studies coursework will engage in a thorough analysis of a school or other educational institution (e.g., museum, community organization) and develop an action plan for: professional development; mentoring and inducting new teachers; teacher evaluation and training; instructional coaching; curriculum development, assessment, or alignment; using assessments or other data to improve student learning; or building collaboration with teachers and stakeholders. Students will gather and analyze demographic, financial and testing data, develop a narrative to tell the story of a school's (or educational institution's) history and recent past, capture the school by way of photographs and interviews, and collect documents or other pertinent artifacts to support their action plan.

CS 625  
CANDIDACY CULMINATING PROJECT (STUDENT IN GOOD STANDING)  
Graduate  
Registration in this course is required of all students who are not enrolled in a course but are completing culminating projects for their program of study, including theses, papers, and final portfolios. It provides access to university facilities. Permission of advisor required. Registration limited to three terms. (0 credit hours)

Status as a student in a College of Education Advanced Master's program is a prerequisite for this class.

CS 700  
REGISTERED DOCTORAL STUDENT IN GOOD STANDING  
Graduate  
This registration is required of all doctoral students who are not enrolled in a doctoral course, but are completing course requirements and/or dissertation research. It provides access to University facilities. Academic advisor approval required. After the third enrollment, dissertation chair approval required. (0 credit hours)

Status as an EDD student with a declared concentration is a prerequisite for this class.

CS 704  
CURRICULUM DISCOURSES/PERSPECTIVES OVER TIME  
Graduate  
This course focuses on the examination of the ways in which curriculum as a field has developed over time: attention to changes in terms of how it has been defined, conceptualized; theoretical and philosophical issues; assumptions and values; as well as implications for teaching and learning. These topics will be addressed within different historical and social contexts. Readings will include primary texts by major theorists as well as secondary material including commentary and critique. A primary goal of the course is to provide students with an overview of major movements in curriculum history as a foundation for further study. This course will serve as a prerequisite for all other curriculum courses in the doctoral program.

Status as an EDD student with a declared concentration is a prerequisite for this class.

CS 706  
CANDIDACY PAPER  
Graduate  
Registration in this course is required of all students who are not enrolled in a course but are completing a dissertation. It provides access to university facilities. Permission of advisor required. This registration indicates that a student has successfully completed the candidacy paper as specified in the Doctoral Student Handbook. (0 credit hours)

Status as an EDD student with a declared concentration is a prerequisite for this class.
CS 751
CURRICULUM FOR HUMAN AND COMMUNITY DEVELOPMENT
Graduate
This course provides a framework for thinking about how education can and cannot facilitate both human development (that is, healthy growth, learning, and maturation of individuals) and community development (that is, the creation or maintenance of healthy, safe, connected, literate, & politically enfranchised neighborhoods). The course explores contemporary theories and models of curriculum reform, school improvement, and youth and community development, notably: project and community based learning, asset-based development, participatory action research (PAR), full-service community schools, and university-assisted community schools. Additional topics explored may include: the kinds of schools, curricula, and teaching needed to best prepare all students for meaningful participation in an increasingly interconnected world; the explicit and implicit goals of current school reform efforts and how these (re-)shape civic and democratic goals of schools; how universities, schools, and communities can collaborate to push school improvement and community development; and the benefits and liabilities of hybrid school improvement/community development projects (e.g., the Harlem Children's Zone and Promise Neighborhoods).

Status as a EDD student with a declared concentration is a prerequisite for this class.

CS 754
CURRICULUM THEORIZING: MULTIPLE LENSES
Graduate
Curriculum Theorizing: Multiple Lenses. This course examines diverse curriculum discourses, historical as well as contemporary, within a broader context of issues related to education and schooling. It is designed to engage students critically in the study of curricular frameworks, their assumptions, values, and implications for education, schooling, teaching and learning. Major topics include: frameworks for defining and conceptualizing curriculum and curricular visions; social, political, and historical contexts of curriculum construction; issues of gender, race, class ableness, and the media; the curriculum as socially constructed, and historically contextualized discourse(s) about what is and what should be taught. Particular content areas will be used as examples.

Status as a EDD student with a declared concentration is a prerequisite for this class.

CS 761
ASSESSING SCHOOL CURRICULUM
Graduate
This course develops a framework for assessing the content, characteristics, and outcomes of the curriculum in a school. The framework will include the collection, organization and analysis of both quantitative and qualitative measures of effective instruction. Particular attention will be given to local, state, and national standards for content, teaching and outcomes. Attention will also be given to the qualities of the lived experiences of students in school and thus to the unintended as well as intended outcomes of schooling. Each student will be expected to begin assessing the curriculum in his or her school and to outline a proposal for a more complete assessment of the school's curriculum.

Status as a EDD student with a declared concentration is a prerequisite for this class.

CS 764
YOUTH DEVELOPMENT, IDEOLOGY, CULTURE, AND SOCIETY
Graduate
This course examines the ideological significance of “youth,” youth development, and education in societies characterized by structural inequalities based on class, race, ethnicity, and sexual/gendered relations of domination and subordination. Texts from a range of academic disciplines -- psychology, sociology, cultural studies, social work -- are studied to show the influence these perspectives have had in shaping discourse about youth, youth development, and education as a vehicle for social reproduction and social change. Youth and education are looked at as the locus of arguments about social crises and social change and the impacts of framing social problems as educational and youth problems are explored.

Status as a EDD student with a declared concentration is a prerequisite for this class.

CS 774
ENGAGING IN CURRICULUM DELIBERATION
Graduate
This course engages students in systematic and collaborative deliberation on curriculum problems. A pattern for deliberation -- including situation analysis, problem discrimination and formulation, development of alternative courses of action, and anticipation of consequences -- will be developed, exemplified, and contrasted with other descriptions of curriculum development. The importance and role of alternative conceptions of learners, of situation, and of knowledge structures within disciplines will be emphasized. After engaging in stimulated deliberations, each student will be asked to examine the intellectual commitments underlying this approach to curriculum change, to reconsider his or her role as a curriculum leader in a school or other educational setting, and to develop realistic plans for engaging a particular school community in collaborative curriculum deliberation.

Status as a EDD student with a declared concentration is a prerequisite for this class.

DePaul University Winter/Spring/Summer 2016-2017 Page 1578 of 2776
CS 784  
CURRICULUM AND PROGRAM DESIGN  
Graduate  
This course studies principles underlying the design of effective, coherent, and comprehensive instructional programs. Topics include: the design and organization of core courses of study and related curricular components; the associated staff development program; and alignment with local, state, and national mandates. Particular attention will be given to planning for diversity, including differences in learning styles, special needs, culture and language.

Status as a EDD student with a declared concentration is a prerequisite for this class.

CS 794  
SPECIAL TOPICS IN CURRICULUM  
Graduate  
In order to assure that the program remains flexible, responsive to the needs of students, and inclusive of the areas of interest of both faculty and students, this variable topics course will provide an opportunity for critical examination of compelling topical issues related to education. Topics could include: issues in educational reform; special education; controversies in curricular discourse; current issues such as the education of homeless children; or legal and constitutional issues in education and schooling. The course will be conducted in a seminar format.

Status as a EDD student with a declared concentration is a prerequisite for this class.

CS 849  
SUPERVISED DISSERTATION PROPOSAL DEVELOPMENT  
Graduate  
Students register for this course for the quarter in which they defend their dissertation proposals. Permission of dissertation chair required.

CS 859  
INDEPENDENT DISSERTATION RESEARCH: CURRICULUM STUDIES  
Graduate  
Students register for this course for the quarter in which they defend their dissertations. Permission of dissertation chair required.

CSC 200  
SURVEY OF COMPUTING  
Undergraduate  
This introductory course explores various careers in the field of information technology. A hands-on component will deal with state of the art personal computer operating systems, applications, database systems, Internet, email, and basic website construction. The structure of the course utilizes both classroom lectures and computer classroom labs. This course is geared toward the non-major and assumes no prior knowledge or experience in Computer Science.

CSC 202  
DISCRETE STRUCTURES FOR COMPUTER SCIENCE  
Undergraduate  
This course introduces basic mathematical tools essential for solving problems in computer science. The mathematical topics are presented through their applications in computer science: logic and set theory in the context of relational databases, arithmetic, number theory, and algebra through cryptography; graph theory and discrete structures through puzzles and games. Optional subjects include fractals (recursion and rewriting systems), computer graphics (linear algebra), and Artificial Intelligence (first-order logic).

CSC 208  
ETHICS IN TECHNOLOGY  
Undergraduate  
Information Technology and the rapid pace in which it has advanced have had a tremendous impact on our lives. Changes have been swift and the human capacity to deal with them is limited. It has been said that our technology has outpaced our humanity. This course will research the new responsibilities technology presents and our ability to deal with these changes in an ethical manner. Students will employ ethical frameworks, which integrate computer science and ethics, to develop the skills required to examine different sets of assumptions and question them. Case studies will provide a historical perspective for analysis.
CSC 211
PROGRAMMING IN JAVA I
Undergraduate
Introduction to programming in Java and problem solving. Variables, data types, input/output, using objects and methods from the standard classes (such as String and Scanner), control structures, writing methods, arrays. Solving problems with algorithms and implementing algorithms in Java. (Not for CS majors)

CSC 212
PROGRAMMING IN JAVA II
Undergraduate

CSC 223
THE IMPACT OF COMPUTING TECHNOLOGY ON OUR LIVES
Undergraduate
This course will introduce students to an overview of social analysis techniques and the theories of social change. These tools will be used to explore social impact issues of computing technology. Counts for Liberal Studies SSMW credit.

CSC 224
JAVA FOR PROGRAMMERS
Undergraduate
Object-oriented programming using Java for students that already know how to program. Students will learn how to design, code and test multi-class Java programs. Topics covered include: Variables, Operators, Arrays, Classes, Inheritance, Abstract classes, Interfaces, Inner classes, Exception Handling, File I/O, User Interfaces, and Event Handling. PREREQUISITE(S): Experience in at least one high-level programming language.

CSC 233
CODES AND CIPHERS
Undergraduate
This course is an introduction to the science and history of secret writing (cryptography) and how codes and ciphers can be broken (cryptanalysis). In historical settings we will encounter the main ideas and methods devised to secure communication channels. Possible topics include: substitution ciphers, transposition ciphers, the Vigenere cipher, statistical methods in cryptanalysis, public-key cryptography, and quantum cryptography. PREREQUISIT: LSP 120.

CSC 235
PROBLEM SOLVING
Undergraduate
How do you solve a problem? In this course we discuss different problem solving techniques and strategies such as modeling, establishing subgoals, and searching and pruning. The techniques will be presented as part of a theoretical framework, but there will be significant emphasis on solving problems in familiar domains such as games, newspaper articles, philosophy, and simple geometry and logic. At the end of the course, students will have built a repertoire of problem solving tools that will allow them to make an informed choice of approach towards new problems.

CSC 241
INTRODUCTION TO COMPUTER SCIENCE I
Undergraduate
An introduction to problem solving, algorithms and structured programming using a higher-level programming language. The course will focus on skills for developing algorithms, and for writing and debugging programs. Students will learn how and when to use loops, conditionals, and functional abstractions in the context of problems motivated by real world applications. PREREQUISITE(S): MAT 130 or Mathematics Diagnostic Test placement into MAT 140.

MAT 130 or above or equivalent or Mathematics Diagnostic test placement into MAT 140 is the prerequisite for this class.
CSC 242
INTRODUCTION TO COMPUTER SCIENCE II
Undergraduate
An intermediate course in problem solving, algorithms and programming. Programming skills are further strengthened through more complex and larger programming assignments. The assignments will also be used to introduce different Computer Science areas (e.g. a Client/Server application for the Distributed Systems area). Classes and object oriented programming are motivated and introduced. PREREQUISITE(S): CSC241

CSC 241 is the prerequisite for this class.

CSC 243
PYTHON FOR PROGRAMMERS
Undergraduate
An accelerated course covering the essentials of programming, with a focus on problem-solving, structured programming, and algorithm design. The concepts covered include collection types, conditional and iterative structures, functions, file input/output, exceptions, namespaces, recursion, and Internet client programming. PREREQUISITE(S): MAT 130 or equivalent

MAT 130 or above or equivalent or Mathematics Diagnostic test placement into MAT 140 is the prerequisite for this class.

CSC 250
COMPUTERS AND HUMAN INTELLIGENCE
Undergraduate
Students taking this course will study human problem-solving and its simulation by computers. Artificial intelligence, pattern recognition and learning programs will be discussed. PREREQUISITE(S): Familiarity with basic computer productivity tools and the Web.

CSC 261
PROGRAMMING IN C++ I
Undergraduate
This is an introductory course in computer programming covering basic data types, variables, flow of control, functions, and parameter passing, pointers and pass by reference, arrays, c strings and the C string library, basic input/output and structures. Examples in this course will concentrate on basic procedural algorithms for manipulating data.

CSC 262
PROGRAMMING IN C++ II
Undergraduate
This is an intermediate programming course in C++, intended as a follow-up course to CSC 261. Topics include object-oriented programming, user-defined classes and objects, constructors, C++ memory management including pointers and dynamic allocation, copy constructors, destructors, and operator overloading. The course will also cover inheritance and polymorphism. Optional topics, as time allows, will include templates and the C++ Standard Template Library. PREREQUISITE(S): CSC 261

CSC 261 is a prerequisite for this class.

CSC 270
FROM FIREFLIES TO FACEBOOK: THE SCIENCE OF NETWORKS
Undergraduate
This course explores complex systems both natural and man-made, characterized by the relationships between interacting entities. Network structures can be found in the Internet and its many applications, but also in social relationships, marketplaces, ecosystems, even cells. We will examine a wide range of networks including technological, social, and natural. Students will learn basic concepts from graph theory, algorithms and network analysis, apply tools for extracting, analyzing and visualizing network properties, using data sets drawn from a variety of areas. PREREQUISITE(S): LSP 120

LSP 120 is a prerequisite for this class.

CSC 281
WORKSHOP: JAVA FOR PROGRAMMERS
Undergraduate
This course introduces students to the Java programming language and eclipse development environment. PREREQUISITE(S): CSC 241 or CSC 243 (2 quarter hours)

CSC 241 or CSC 243 is a prerequisite for this class.
CSC 282
WORKSHOP: LINUX FOR PROGRAMMERS
Undergraduate
This course provides an introduction to Linux, the command-line environment, C programming, and version control. PREREQUISITE(S): CSC 241 or CSC 243 (2 quarter hours)

CSC 241 or CSC 243 is a prerequisite for this class.

CSC 298
INTERNSHIP
Undergraduate
This course satisfies the junior year experiential learning requirement. In cooperation with local employers, this course offers students the opportunity to integrate their academic experience with on-the-job training in computer related work areas. Admission to the program requires consent of internship course instructor. Current work experience plus classroom time is required. Supervisor evaluation will contribute to the final grade.

CSC 299
SOPHOMORE LAB IN APPLIED COMPUTING
Undergraduate
In this course, students investigate a particular application of computing. Students learn tools, methodologies, and formalisms used in a particular computing area, and apply them to develop working systems. Courses stress student initiative in investigating the application context, learning new tools (including languages and APIs), studying algorithms and code examples, and working on projects. Topics will vary by the faculty member's interest and perspective. PREREQUISITE(S): CSC 242 or CSC 243

CSC 242 or CSC 243 is the prerequisite for this class.

CSC 300
DATA STRUCTURES IN JAVA I
Undergraduate
This is the first course in a two-course sequence on data structures using Java. The course introduces basic Java programming, reviews recursion, introduces asymptotic notations, and focuses mainly on linear data structures including arrays, linked lists and their variants, stacks and queues, and data structures supporting disjoint-set operations. The implementation of the basic operations on each data structure are discussed and analyzed in terms of their efficiency. The applications covered highlight and exploit the unique characteristics of the data structures, and emphasize problem solving and recursive thinking. Prerequisite(s): CSC 242 or CSC 243

CSC 242 or CSC 243 is the prerequisite for this class.

CSC 301
DATA STRUCTURES IN JAVA II
Undergraduate
This is the second course in a two-course sequence on data structures using Java. The course focuses mainly on the following data structures, their analysis, and their applications: trees (search trees, balanced search trees), heaps, associative arrays, hash tables, and data structures for representing graphs. The implementation of the basic operations on each data structure are discussed and analyzed in terms of their efficiency. The applications discussed highlight and exploit the unique characteristics of the different data structures, and emphasize problem solving and recursive thinking. Prerequisite(s): CSC 300

CSC 300 is the prerequisite for this class.

CSC 308
FRAMEWORKS FOR WEB APPLICATION DEVELOPMENT
Undergraduate
This course introduces concepts, techniques, technologies and APIs for web application development. The main focus of the course is on the Model-View-Controller design pattern employed by modern full-stack web frameworks. Concepts and techniques covered include client/server programming, database abstraction APIs, and asynchronous JavaScript. Examples of full-stack MVC frameworks include Ruby-on-Rails (written in Ruby), Django and TurboGears (written in Python). PREREQUISITE(S): CSC 374

CSC 374 is a prerequisite for this class.
CSC 309
C++ FOR PROGRAMMERS
Undergraduate
This course covers the essentials of C and C++ programming, focusing primarily on the topics of memory management and object-oriented programming. Topics include pointers and dynamic allocation, operator overloading, copy constructors and destructors, inheritance and polymorphism. PREREQUISITE(S): CSC 242 or CSC 243 or CSC 224 or proficiency in another programming language.

CSC 321
DESIGN AND ANALYSIS OF ALGORITHMS
Undergraduate
Techniques for designing algorithms including: analyzing algorithms (big-O, recurrence relations) and divide-and-conquer (quicksort, mergesort). Additional topics chosen from: the greedy method, dynamic programming, backtracking, branch-and-bound and string matching. PREREQUISITE(S): (CSC 301 or CSC 383 or CSC 393) and MAT140. MAT141 Recommended.

(CSC 301 or CSC 383 or CSC 393) and MAT140 are prerequisites for this class. MAT141 Recommended.

CSC 324
DATA ANALYSIS & STATISTICAL SOFTWARE II
Undergraduate
Continuation of IT223. Multiple regression and correlation, residual analysis, analysis of variance, and robustness. PREREQUISITE(S): IT 223 or MAT 351.

IT 223 or MAT 351 are the prerequisites for this class

CSC 325
TIME SERIES ANALYSIS AND FORECASTING
Undergraduate
The course introduces students to statistical models for time series analysis and forecasting. The course topics include: autocorrelated data analysis, Box-Jenkins models (autoregressive, moving average, and autoregressive moving average models), analysis of seasonality, volatility models (GARCH-type, GARCH-M type, etc.), forecasting evaluation and diagnostics checking. The course will emphasize applications to financial data, volatility modeling and risk management. Real examples will be used throughout the course. PREREQUISITE(S): (CSC 212 or CSC 224 CSC 262 or CSC 309) and (CSC324 or MAT356) or consent of instructor.

CSC 327
PROBLEM SOLVING FOR CONTESTS
Undergraduate
This course prepares students to compete in programming contests. More broadly, it covers problem solving techniques in an informal, fun, and hands-on setting. This course will improve your analytical and programming skills and is thus recommended for all students and not just the competitors among us. This course can be taken for credit twice. PREREQUISITE(S): CSC 301 or CSC 383 (2 quarter hours)

CSC 328
DATA ANALYSIS FOR EXPERIMENTERS
Undergraduate
The use of statistical software in conducting an analysis of variance in a variety of settings and the interpretation of generated results. Analysis of variance for completely randomized, randomized block, and Latin square designs; for factorial experiments; for incomplete block designs; with missing data; for fixed-effects, random-effects, and mixed-effects models; and for experiments with repeated measures. The analysis of covariance. PREREQUISITE(S): CSC324 or MAT 353.

CSC 331
SCIENTIFIC COMPUTING
Undergraduate
This course presents fundamental numerical algorithms for solving problems in scientific computing and computational finance. Areas covered include: error analysis, computer arithmetic, linear algebra, optimization problems, numerical integration (solvers), ordinary differential equations (ODE). The emphasis of the course is on the design of the algorithms, and their analysis. Algorithms will be implemented using mathematical software. PREREQUISITE(S): ((CSC 242 or CSC 243) and MAT 152) or instructor permission.
CSC 333
CRYPTOLOGY
Undergraduate
Introduction to the methods of cryptography and cryptanalysis. Topics include classical cryptography (codes, substitution ciphers, transposition ciphers), block and stream ciphers (Feistel networks, DES), and public key cryptography (RSA, Key agreement, signature schemes). Optional topics include zero-knowledge protocols, quantum cryptography, and history. PREREQUISITE(S): (CSC 242 or CSC 243 or IT 212) and MAT 140

CSC 334
ADVANCED DATA ANALYSIS
Undergraduate
The course will teach advanced statistical techniques to discover information from large sets of data. The course topics include visualization techniques to summarize and display high dimensional data, dimensional reduction techniques such as principal component analysis and factor analysis, clustering techniques for discovering patterns from large datasets, and classification techniques for decision making. The methods will be implemented using standard computer packages. PREREQUISITE(S): CSC 324 or consent of instructor.

CSC 343
INTRODUCTION TO OPERATING SYSTEMS
Undergraduate
An advanced course on operating system design and implementation. Process management and scheduling, memory management, file systems, device drivers, access control, and virtualization will be covered. The emphasis of the course will be on implementing components of a functional operating system. PREREQUISITE(S): CSC 373 and CSC 374

CSC 344
AUTOMATA THEORY AND FORMAL GRAMMARS
Undergraduate
An introduction to the most important abstract models of computation and their applications: finite state machines and pushdown automata. Explores the relationship between regular expressions and formal grammars and automata. PREREQUISITE(S): (CSC 301 or CSC 383) and MAT 141

CSC 347
CONCEPTS OF PROGRAMMING LANGUAGES
Undergraduate
Syntax of programming languages: regular expressions, finite automata, context-free grammars, parsing. Scoping, binding, parameter passing, exception handling. Declarative programming languages. Typing, polymorphism. Runtime systems: dynamic loading, byte-code verification, security managers, garbage collection, versioning. PREREQUISITE(S): (CSC 301 or CSC 383 or CSC 393) and CSC 373

CSC 348
INTRODUCTION TO COMPILER DESIGN
Undergraduate
An overview of the design of a compiler for a general purpose programming language; tools for designing the components of the compiler; implementing the compiler; run time environments. PREREQUISITE(S): (CSC 301 or CSC 383 or CSC 393) and CSC 373
CSC 352
DATABASE PROGRAMMING
Undergraduate
Programming in a large-scale relational database environment using procedural languages. Topics covered in the course include: procedural extension of query languages, runtime error handling, subprograms (procedures and functions), packages, database triggers, dynamic query language. Optional topics include transaction management, reliability, and security. PREREQUISITE(S): (IT 240 or CSC 355) and (CSC 212 or CSC 242 or CSC 243 or CSC 262 or CSC 224 or CSC 300 or CSC 309).

(IT 240 or CSC 355) and (CSC 212 or CSC 242 or CSC 243 or CSC 262 or CSC 224 or CSC 300 or CSC 309) are the prerequisites for this class.

CSC 353
ADVANCED DATABASE CONCEPTS
Undergraduate
An introduction to advanced selected topics in databases. Possible topics include: object-oriented databases, distributed databases, intelligent and deductive databases, temporal databases, multimedia databases, spatial and geographic databases, fuzzy databases, mobile databases, data mining and data warehousing, as well as emerging issues and concepts in database design, implementation and management. PREREQUISITE(S): IT 240.

IT 240 is a prerequisite for this class.

CSC 355
DATABASE SYSTEMS
Undergraduate
An introduction to modern database systems; the course covers the traditional concepts and techniques of database systems including the relational model, SQL indexes and normalization as well as a selection of advanced topics such as constraints and triggers, transactions, database programming, semi-structured data, and recursive SQL. PREREQUISITE(S): CSC 301 or CSC 383 or CSC 393.

CSC 301 or CSC 383 or CSC 393 is a prerequisite for this class.

CSC 357
EXPERT SYSTEMS
Undergraduate
A study of the development of expert systems. Students will use commercial packages to develop standalone and embedded expert systems. Topics will include rule-based systems, decision trees, forward and backward chaining, inference, reasoning with uncertainty, and intelligent agents. PREREQUISITE(S): CSC 301 or CSC 383 or CSC 393.

CSC 301 or CSC 383 or CSC 393 is a prerequisite for this class.

CSC 358
SYMBO LIC PROGRAMMING
Undergraduate
Concepts of symbolic programming as embodied in the language LISP. Basic data and control structures of LISP: symbolic expressions, the interpreter, functions, recursion, iteration. Techniques for prototyping and building conceptually advanced systems in an environment that encourages procedural and data abstraction. Advanced topics may include Prolog, intelligent tutoring systems, intelligent agents, and natural language processing. Assignments will focus on basic AI techniques, but the class is intended for anyone who will need to rapidly develop large complex systems. PREREQUISITE(S): CSC 301 or CSC 383 or CSC 393.

CSC 301 or CSC 383 or CSC 393 is a prerequisite for this class.

CSC 360
USER INTERFACE ARCHITECTURE AND DEVELOPMENT
Undergraduate
Fundamentals of design and implementation for graphical user interfaces (GUIs). Students design a GUI-based application following the user-centered design process and implement it using the Model-View-Controller architecture. Topics include usability engineering, event dispatching, multi-threaded programming, GUI widget toolkits, frameworks and customization. PREREQUISITE(S): CSC 301.

CSC 301 is a prerequisite for this class.
CSC 361
OPTIMIZED C++
Undergraduate
This game programming class will focus on developing software to efficiently use the fixed CPU power and resources in today's console and mobile devices. This course will use real-world game examples that demonstrate performance and optimization issues that software architects face in software development. These problems include: performance enhancements through extended matrix instruction set, dynamic memory usages, performance related to increasing run-time systems to very large scale, C++ language enhancements and extensions, algorithms, streaming and profiling. PREREQUISITE(S): (CSC 301 or CSC 383 or CSC 393) and CSC 373

(CSC 301 or CSC 383 or CSC 393) and CSC 373 are prerequisites for this class.

CSC 362
C++ MULTITHREADING
Undergraduate
Applied C++ concurrency and multithreading fundamentals. Basic threading concepts: process model, threads, stacks, fibers, mutexes, semaphores, atomic, and events. Understanding synchronous/ asynchronous interactions and behavior of threads. Using managed thread pools and queues in applications. Understanding advanced C++ language features relating to the memory model and the threading support. PREREQUISITE(S): GAM 391 or CSC 361

CSC 367
INTRODUCTION TO DATA MINING
Undergraduate
The course is an introduction to the Data Mining (DM) stages and its methodologies. The course provides students with an overview of the relationship between data warehousing and DM, and also covers the differences between database query tools and DM. Possible DM methodologies to be covered in the course include: multiple linear regression, clustering, k-nearest neighbor, decision trees, and multidimensional scaling. These methodologies will be augmented with real world examples from different domains such as marketing, e-commerce, and information systems. If time permits, additional topics may include privacy and security issues in data mining. The emphasis of this course is on methodologies and applications, not on their mathematical foundations. PREREQUISITE(S): IT 223

IT 223 is the prerequisite for this class.

CSC 371
MOBILE APPLICATION DEVELOPMENT FOR IOS
Undergraduate
This course introduces the core issues associated with application development for mobile devices using the iOS platform. Students will learn the Swift language, the XCode IDE, UIKit and other frameworks, the elements and architecture of the user interfaces, and more. Students will be exposed to the iOS system architecture including memory management, MVC, delegates and threads. Topics will also include understanding and handling of multi-touch events, gestures, and motion events. PREREQUISITE(S): (CSC 301 or CSC 383 or CSC 393) and CSC 374

(CSC 301 or CSC 383 or CSC 393) and CSC 374 are prerequisites for this class.

CSC 372
MOBILE APPLICATION DEVELOPMENT FOR ANDROID
Undergraduate
This course introduces the core issues associated with application development for mobile devices using the Android platform. Students will learn the Eclipse IDE, frameworks, the elements and architecture of user interfaces, graphics, and more. Students will be exposed to the Android system architecture, including Views, Widgets, Resources, Adapters, Intents and Activities. Topics will also include understanding and handling of threads, multi-touch events, gestures, and motion events. PREREQUISITE(S): (CSC 301 or CSC 383 or CSC 393) and CSC 374

(CSC 301 or CSC 383 or CSC 393) and CSC 374 are prerequisites for this class.

CSC 373
COMPUTER SYSTEMS I
Undergraduate
A course on computer systems topics, focusing on machine-level programming and architecture and their relevance for application programming. Information representations, assembly language, C programming, and debuggers, processor architecture. PREREQUISITE: (CSC 383 or CSC 393 or CSC 300) and Math 140

(CSC 383 or CSC 393 or CSC 300) and MAT 140 are the prerequisites for this class.
CSC 374
COMPUTER SYSTEMS II
Undergraduate
A course on computer systems topics, focusing on operating systems components and their relevance for application programming. Caching, memory hierarchy, performance optimization, linking, processes, virtual memory, dynamic memory allocation, system level I/O.
PREREQUISITE: CSC 373

CSC 375
INTRODUCTION TO ROBOTICS
Undergraduate
An introduction to the field of Robotics. Topics include history of robotics, kinematics, control theory, and sensor theory. A large portion of class time will be lab based, building and programming robots using the Lego Mindstorms NXT Robotics Kit. The programming will be using a C derivative and knowledge of C and general systems concepts is required. PREREQUISITE(S): CSC 373 and CSC 374

CSC 373 and CSC 374 are prerequisites for this class.

CSC 376
DISTRIBUTED SYSTEMS
Undergraduate
An introduction to distributed systems. Topics may include: architecture of distributed systems; networking; datagram-oriented and stream-oriented protocols; network programming (for example, the sockets API); remote procedure call and remote method invocation; processes and threads; code migration; software agents; naming of non-mobile and mobile entities; cryptography and security. PREREQUISITE(S): (CSC 301 or CSC 383 or CSC 393) and CSC 374.

(CSC 301 or CSC 383 or CSC 393) and CSC 374 are prerequisites for this class.

CSC 378
SOFTWARE PROJECTS FOR COMMUNITY CLIENTS
Undergraduate
This is the first course in a two-quarter sequence (winter/spring) for CTI students that satisfies both the Senior Year Capstone requirement and the Junior Year Experiential Learning requirement. The second quarter will be a special section of CSC 399. You will earn four quarter hours of credit for each quarter for a total of eight quarter hours of credit. You must complete both quarters to receive any credit. We work with a community service organization, chosen with help of the Steans Center for Community-based Service Learning. As a community-based service learning course, students will have the opportunity to assess urban community needs in technology, and use problem-solving methods and strategies to make a substantial difference in an inner-city community group, usually by developing an application or a web site. (2 quarter hours)

CSC 379
TECHNOLOGY PARTNERSHIPS IN URBAN SCHOOLS
Undergraduate
Students in this course will have the opportunity to assess urban community needs in the technology arena and develop skills in assisting and developing methods for “bridging the digital divide” that exists. As a result, the student will be able to make a substantial difference in an underprivileged academic community group. This course is a CDM-sponsored community-based service learning course. Any student enrolled in this course can also satisfy the junior year experiential learning requirement.

CSC 380
FOUNDATIONS OF ARTIFICIAL INTELLIGENCE
Undergraduate
An in-depth survey of important concepts, problems, and techniques in artificial intelligence, including search, knowledge representation, logical reasoning, and reasoning with uncertainty. A particular focus and a unifying theme of the course will be the concept of intelligent agents. No prior knowledge of AI is required. The course is particularly suitable for graduate and advanced undergraduate students who want to gain the technical background necessary to build intelligent systems, or who want to prepare for more advanced work in AI. The concepts and techniques learned in this course will be directly applicable to many other areas of computer science including software design, distributed systems, databases, and information management and retrieval. PREREQUISITE(S): CSC 301 or CSC 383 or CSC 393.

CSC 301 or CSC 383 or CSC 393 is a prerequisite for this class.
CSC 381
INTRODUCTION TO DIGITAL IMAGE PROCESSING
Undergraduate
Components of an image processing system and its applications, elements of visual perception, sampling and quantization, image enhancement by histogram equalization, color spaces and transformations, introduction to segmentation (edge detection algorithms), and morphological image processing. PREREQUISITE(S): MAT 150 or MAT 262
MAT 150 or MAT 262 are prerequisites for this class

CSC 382
APPLIED IMAGE ANALYSIS
Undergraduate
Fundamentals of computational image analysis will be explored in terms of its two most important components, image information extraction and modeling of image patterns. These components will be studied in the context of image representation, segmentation, classification, retrieval and recognition. The course will be useful for students interested in image analysis related to areas such as image databases, multimedia management, animation, GIS, computer graphics, medical imaging, remote sensing and robotics. Specific topics include, but are not limited to segmentation, multi-scale representation, shape analysis, texture analysis, Fourier analysis, wavelets, Gabor and fractal analysis, template matching, and object recognition. PREREQUISITE(S) CSC 381
CSC 381 is a prerequisite for this class.

CSC 383
DATA STRUCTURES AND ALGORITHMS IN JAVA
Undergraduate
Design, implementation, application, and analysis of algorithms on a variety of data structures, including stacks, queues, lists, trees, binary heaps, hash tables, and graphs. Algorithmic analysis includes computation of running times and asymptotic analysis. PREREQUISITE(S): CSC 212 or CSC 224 or CSC 300
CSC 212 or CSC 224 or CSC 300 is a prerequisite for this class.

CSC 387
OPERATIONS RESEARCH I: LINEAR PROGRAMMING
Undergraduate
The Linear Programming problem and its dual; the simplex method; transportation and warehouse problems; computer algorithms and applications to various fields. PREREQUISITE(S): MAT 220 and any introductory programming course.

CSC 389
THEORY OF COMPUTATION
Undergraduate
Advanced topics in the mathematical foundations of computation. Topics may include random access and Turing machines, recursive functions, algorithms, computability and computational complexity, intractable problems, NP-complete problems. PREREQUISITE(S): CS321 or CS344.
CSC 321 or CSC 344 is a prerequisite for this class.

CSC 393
DATA STRUCTURES IN C++
Undergraduate
This course covers the design, implementation, application and analysis of algorithms on a variety of data structures, including lists, stacks, queues, trees, heaps, hash tables and graphs. Implementation is done in C++, in particular with the use of templates and the C++ standard template library (STL). PREREQUISITE(S): CSC 262 or CSC 309
CSC 262 or CSC 309 is a prerequisite for this class.
CSC 394
SOFTWARE PROJECTS
Undergraduate
Students will be provided with experience in team design, implementation and testing of a large software project. PREREQUISITE(S): CSC 301 or CSC 383 or CSC 393 or ISM 360

CSC 395
RESEARCH COLLOQUIUM
Undergraduate
The research colloquium series features informal talks by a variety of speakers including DePaul faculty, students, and guests from the academic and business communities. The lectures feature new creative and scholarly works that encompass the disciplines and areas of interest of the School of Computing. The talks are free and open to all who are interested, though only students who register can obtain academic credit. Every quarter, a different set of speakers will be invited. PREREQUISITE(S): WRD 204 and (CSC 321 or CSC 376 or CSC 355) (2 quarter hours)

WRD 204 and (CSC 321 or CSC 376 or CSC 355) are prerequisites for this class.

CSC 397
TOPICS IN COMPUTER SCIENCE
Undergraduate
Specific topics will be selected by the instructor and may vary with each quarter. Can be repeated for credit. Variable credit.
PREREQUISITE(S): Consult the instructor (2 quarter hours)

CSC 398
INTERNSHIP
Undergraduate
This course does not carry Experiential Learning credit. In cooperation with local employers the computer science program offers students the opportunity to integrate their academic experience with on-the-job training in computer related work areas. Academic credit is variable and admission to the program requires consent of internship advisor. Supervisor evaluation will contribute to the final grade. This course is repeatable for 8.00 credit hours.

CSC 399
INDEPENDENT STUDY
Undergraduate
Independent study supervised by an instructor. Independent study form required. Can be repeated for credit. Variable Credit.
PREREQUISITE(S): None. (variable credit)

CSC 400
DISCRETE STRUCTURES FOR COMPUTER SCIENCE
Graduate
This course covers the basic mathematical tools essential for solving problems in computer science. The mathematical topics are presented with emphasis on their applications in computer science. The topics covered include: logic and set theory, relations, functions, graphs, and counting and probability.

CSC 401
INTRODUCTION TO PROGRAMMING
Graduate
An introduction to programming with a focus on problem solving, structured programming, and algorithm design with a gentle introduction to efficiency. Concepts covered include data types, expressions, variables, assignments, conditional and iterative structures, functions, file input/output, exceptions, namespaces, and recursion. PREREQUISITE(S): None
CSC 402  
DATA STRUCTURES I  
Graduate  
A first course on data structures in Java for graduate students. The course introduces Java programming from within the context of data structures. The course covers arrays, linked lists, stacks and queues, data structures supporting disjoint-set operations, and discusses recursion and performance analysis. The implementation of the basic operations on each data structure are discussed and analyzed in terms of their efficiency. PREREQUISITE(S): CSC 401

CSC 403  
DATA STRUCTURES II  
Graduate  
This is the second course on data structures in Java for graduate students. The course covers trees, heaps, associative arrays, hash tables, tries, and data structures for representing graphs. The implementation of the basic operations on each data structure are discussed and analyzed in terms of their efficiency. PREREQUISITE(S): CSC 402

CSC 404  
ACCELERATED C++  
Graduate  
This introductory graduate course covers the essentials of C++ programming. Topics include encapsulation, inheritance, polymorphism, dynamic memory allocation, casting, pointer arithmetic, operator overloading, templates, and the Standard Template Libraries.  
PREREQUISITE(S): None

CSC 406  
SYSTEMS I  
Graduate  
An introductory graduate course on computer systems topics, focusing on machine-level programming and architecture and their relevance for application programming. Information representations, assembly language and debuggers, processor architecture, program optimization, memory hierarchy and caching. Students are recommended to finish CSC 400 before enrolling in this course. PREREQUISITE(S): CSC 401

CSC 407  
SYSTEMS II  
Graduate  
An introductory graduate course on computer systems topics, focusing on operating systems components and their relevance for application programming. Linking, processes, virtual memory, dynamic memory allocation, system level I/O, networking and network programming, concurrent servers and web services. PREREQUISITE(S): CSC 406 and CSC 402

CSC 412  
TOOLS AND TECHNIQUES FOR COMPUTATIONAL ANALYSIS  
Graduate  
Use of mathematical software to explore basic concepts in linear algebra and calculus. Scripting for symbolic and computational processing. Emphasis is on applications in computer science, finance, data mining, and computer vision. PREREQUISITE(S): None

CSC 421  
APPLIED ALGORITHMS AND STRUCTURES  
Graduate  
This course covers techniques for designing and analyzing algorithms and structures in the context of computer application development. Examples will come from Internet, WWW, database, and computer system applications. Fundamental topics such as running-time analysis, searching and sorting within various structures, divide-and-conquer and dynamic programming will be covered. PREREQUISITE(S): CSC 400 and CSC 403

CSC 400 and CSC 403 are prerequisites for this class.
CSC 423
DATA ANALYSIS AND REGRESSION
Graduate
Multiple regression and correlation, residual analysis, analysis of variance, and robustness. These topics will be studied from a data analytic perspective, supported by an investigation of available statistical software. PREREQUISITE(S): IT 403

IT 403 is a prerequisite for this class.

CSC 424
ADVANCED DATA ANALYSIS
Graduate
The course will teach advanced statistical techniques to discover information from large sets of data. The course topics include visualization techniques to summarize and display high dimensional data, dimensional reduction techniques such as principal component analysis and factor analysis, clustering techniques for discovering patterns from large datasets, and classification techniques for decision making. The methods will be implemented using standard computer packages. PREREQUISITE(S): CSC 423 or consent of instructor.

CSC 425
TIME SERIES ANALYSIS AND FORECASTING
Graduate
The course introduces students to statistical models for time series analysis and forecasting. The course topics include: autocorrelated data analysis, Box-Jenkins models (autoregressive, moving average, and autoregressive moving average models), analysis of seasonality, volatility models (GARCH-type, GARCH-M type, etc.), forecasting evaluation and diagnostics checking. The course will emphasize applications to financial data, volatility modeling and risk management. Real examples will be used throughout the course. PREREQUISITE(S): CSC 423 or MAT 456 or consent of instructor.

CSC 426
RESEARCH METHODS AND PRACTICE IN COMPUTING
Graduate
The course is intended to help students understand the process of and issues related to doing scientific research in computing or related areas. Topics covered include how to develop an effective research proposal, how to critically evaluate or review a scientific research paper, how to use appropriate research methods in scientific research, key elements of a publishable paper or a dissertation, ethics and professional responsibility in scientific research. The course is intended for PhD students in Computer and Information Sciences or for students who are interested in pursuing a research career. PREREQUISITE(S): PhD status or consent of instructor.
